RIDER UNIVERSITY

University Student Learning Outcomes

1. **Competencies/Skills**
   a. Critical Thinking - Students will be able to complete a comprehensive exploration of issues, ideas, artifacts, or events before accepting or formulating an opinion or conclusion.
   b. Written Communication - students will be able to effectively express ideas in writing using text, data, and images.
   c. Information Literacy - Students will be able to identify a need for information and effectively locate, evaluate and share that information.
   d. Quantitative Reasoning - Students will be able to reason and solve quantitative problems across a variety of contexts.
   e. Oral Communication - Students will be able to prepare and present orally in order to foster understanding.
   f. Technological Competence - Students will be able to effectively use technology to enhance learning.
   g. Scientific Reasoning - Students will be able to apply the methods and principles of scientific inquiry in the analysis of evidence.
2. **Strategic Themes**
   a. Leadership Skills - Students will be able to collaborate with others, engaging team members to contribute to the accomplishment of a common goal.
   b. Ethics and Social Responsibility - Students will be able to identify and articulate the principles and values of social and civic responsibility.
   c. Global/Multicultural Perspectives - Students will be able to identify and explain the potential benefits and/or conflicts that arrive from a world that is a complex, interdependent global system of social, cultural, and economic communities.
3. **Connected Learning** - Students will be able to connect their education in the classroom to real-world issues beyond the campus.

- Cancellation of Classes (p. 10)
- Commencement (p. 10)
- Fall Withdrawal Dates (p. 9)
- JTerm Winter Session Course Availability (p. 10)
- Spring Withdrawal Dates (p. 9)
- Summer Sessions (p. 10)

Fall Semester 2024

September

4 Wednesday	Classes begin
4 Wednesday	7-Week Part A Classes Begin
4 Wednesday	Alumni Audit Registration
6 Friday	7-Week Part A Last day to add courses
10 Tuesday	Last day to add courses
10 Tuesday	7-Week Part A Last day to drop courses
12 Thursday	Deadline for makeup of Summer 2 incomplete grades
17 Tuesday	Last day to drop courses

October

14 Monday	Course Selection for Spring semester and JTerm begins
21 Monday	7-Week Part A Classes End
22 Tuesday	7-Week Part A Final Exams
23 Wednesday	7-Week Part B Classes Begin
25 Friday	7-Week Part B Last day to add courses
29 Tuesday	7-Week Part B Last day to drop courses

November

27-Dec. 1 Wednesday-Sunday	Thanksgiving recess

December

2 Monday	Classes resume
6 Friday	Classes end (except Graduate Education classes)
9-13 Monday-Friday	Final exams
12 Thursday	7-Week Part B Classes End
13 Friday	7-Week Part B Final Exams
13 Friday	Graduate Education classes end
14 Saturday	Residence halls close at noon

Fall 2024 Withdrawal Dates[1]

Sept. 18-Nov. 12 Wednesday-Tuesday	Withdrawal, student discretion
Nov. 13-Dec. 6 Wednesday-Friday	Withdrawal, psychological or physiological incapacity

Fall 2024 Withdrawal Dates (7-Week Part A) [1]

Sept. 11-Oct. 11 Wednesday-Friday	Withdrawal, student discretion
Oct. 14-Oct. 22 Monday-Tuesday	Withdrawal, psychological or physiological incapacity

Fall 2024 Withdrawal Dates (7-Week Part B) [1]

Oct. 30-Nov. 29 Wednesday-Friday	Withdrawal, student discretion
Dec. 2-Dec. 6 Monday-Friday	Withdrawal, psychological or physiological incapacity

[1] Please refer to www.rider.edu/offices-services/finaid/payments-billing-deposits/refunds (http://www.rider.edu/offices-services/finaid/payments-billing-deposits/refunds/) for information regarding course withdrawals and refunds.

JTerm Winter Session 2025

January 2025

6 Monday	JTerm Classes begin
6 Monday	Last day to add courses
7 Tuesday	Last day to drop courses
8-20 Wednesday-Monday	Withdrawal, student discretion
20 Monday	Martin Luther King, Jr. Day (Closed)
21-23 Tuesday-Thursday	Withdrawal, psychological/physiological incapacity
22 Wednesday	Classes end
23 Thursday	Final Exams

Spring Semester 2025

January

17 Friday	Deadline for makeup of Fall semester incomplete grades
27 Monday	Classes begin
27 Monday	7-Week Part A Classes Begin
29 Wednesday	7-Week Part A Last day to add courses
31 Friday	7-Week Part A Last day to drop courses

February

2 Sunday	Last day to add courses
2 Sunday	Last day to add or drop Applied Lessons

9 Sunday	Last day to drop courses (excluding Applied Lessons)
15 Saturday	Spring 2025 degree applications due

March

13 Thursday	7-Week Part A Classes End
14 Friday	7-Week Part A Final Exams
15 Saturday	Last day of classes before Spring recess
16-23 Sunday-Sunday	Spring recess
24 Monday	Classes resume
24 Monday	7-Week Part B Classes Begin
25 Tuesday	Course Selection for Fall and Summer semesters begin
26 Wednesday	7-Week Part B Last day to add courses
28 Friday	7-Week Part B Last day to drop courses

April

Intentionally left blank

May

2 Friday	Classes end (except Graduate Education classes)
5-9 Monday-Friday	Final Exams
8 Thursday	7-Week Part B classes end
9 Friday	7-Week Part B Final Exams
	Graduate Education classes end
10 Saturday	Residence halls close at noon
17 Saturday	University Undergraduate and Graduate Commencement
19 Monday	Summer Session I begins

June

1 Sunday	Summer 2025 degree applications due
11 Wednesday	Deadline for makeup of spring semester incomplete grades

July

1 Tuesday	Summer 1 classes end
2 Wednesday	Summer 1 final exams
4 Friday	4th of July (Closed)
7 Monday	Summer Session 2 begins

August

18 Monday	Summer 2 classes end
19 Tuesday	Summer 2 final exams

Spring 2025 Withdrawal Dates [1]

Feb. 10-April 11 Monday-Friday	Withdrawal, student discretion
April 14-May 3 Monday-Saturday	Withdrawal, psychological or physiological incapacity

Spring 2025 Withdrawal Dates (7-Week Part A) [1]

Feb. 3-March 4 Monday-Tuesday	Withdrawal, student discretion
March 5-March 14 Wednesday-Friday	Withdrawal, psychological or physiological incapacity

Spring 2025 Withdrawal Dates (7-Week Part B) [1]

March 31-April 29 Monday-Tuesday	Withdrawal, student discretion
April 30-May 9 Wednesday-Friday	Withdrawal, psychological or physiological incapacity

For additional information and updates to the Academic Calendar refer to www.rider.edu (https://www.rider.edu/academics/academic-calendars/)

JTerm Winter Session

Students interested in 3-week JTerm course offerings during winter break should contact Admissions at 800-257-9026 or refer to www.rider.edu/jterm (http://www.rider.edu/jterm/).

Summer Session 2025

Students interested in calendar and course offerings for the summer sessions should contact Admissions at 800-257-9026 or refer to www.rider.edu/summer (http://www.rider.edu/summer/).

Commencement Information

For Commencement ceremonies information, refer to www.rider.edu/commencement (http://www.rider.edu/commencement/)

Cancellation of Classes

In most cases, Rider will remain open and fully operational during snowstorms and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, close certain buildings, or take emergency actions.

If such circumstances should arise, a notice will be sent via the Rider Alert System.

Students may sign up for Rider Alert at https://www.rider.edu/offices-services/public-safety/rider-alert (https://www.rider.edu/offices-services/public-safety/rider-alert/)

Cancellations will also be announced online at www.rider.edu (http://www.rider.edu) and on the Rider University information hotline at 609-219-2000, option 1.

Rider University's Vision and Mission

Rider's Vision

Rider University is a premier, forward-looking university known for its Engaged Learning Program that, together with dynamic academic programs, enriching co-curricular experiences and a vibrant living and learning community, challenges students, excites their imaginations, and instills in them excellence in thought and action, preparing them for highly engaged and fulfilling professional and personal lives.

Rider's Mission

Rider University welcomes students from throughout the region, across the nation, and around the world who seek to be challenged and supported as active members of our inclusive and vibrant living and learning community. Committed to student growth, transformation and leadership, we connect rigorous academic, artistic and professional programs of study with a rich array of learning experiences that engage students inside and outside the classroom. We prepare graduates to thrive professionally and to be lifelong independent learners and responsible citizens who embrace diversity, support the common good, and contribute meaningfully to the changing world in which they live and work.

Our students, alumni, faculty, staff, and administrators live the **RIDER PROMISE** by being forever:

P - prepared to contribute meaningfully to the changing world in which they live and work

R - respectful of all people, rights, freedoms and individual differences

O - open to a life of independent learning

M - motivated to be responsible citizens who support the common good

I - innovative, creative and resourceful

S - skilled and thriving professionals, educators, artists and performers

E - engaged in their communities as leaders and role models

Accreditations

Rider University is regionally accredited by the Middle States Commission on Higher Education (https://www.msche.org/).

The University also holds many specialized accreditations that attest to the quality of its academic programs. Rider is among the select business schools to have attained AACSB International (https://www.aacsb.edu/) (Association to Advance Collegiate Schools of Business) accreditation in both Business and Accounting. Education programs are accredited by the Council for the Accreditation of Educator Preparation (http://caepnet.org/) (CAEP). Rider's graduate counseling programs in the College of Education and Human Services hold the Council for Accreditation of Counseling and Related Education Programs (https://www.cacrep.org/) (CACREP) national accreditation, and its school psychology program holds the National Association of School Psychologists (https://www.nasponline.org/) (NASP) accreditation. Rider's B.S. in Chemistry program is approved by the Committee on the Professional Training of the American Chemical Society (https://www.acs.org/content/acs/en/about/governance/committees/training.html). The baccalaureate degree, master's degree, and post-graduate APRN certificate programs in Nursing at are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/ccne-accreditation/)

Rider University is a member of the National Collegiate Athletic Association (http://www.ncaa.org/) (NCAA) for both men's and women's athletics. The University offers 21 NCAA Division I sports—10 men's and 11 women's. Rider is a member of the Metro Atlantic Athletic Conference (https://maacsports.com/) (MAAC) for most sports, while wrestling competes in the Mid-American Conference (https://getsomemaction.com/news/2019/3/4/mac-announces-historic-wrestling-expansion.aspx) (MAC) and field hockey competes in the Northeast Conference (https://northeastconference.org/?path=fhockey) (NEC).

Notice of the Title IX Coordinator

As a community of educators and learners, Rider University is committed to fostering an environment dedicated to learning and mutual respect as reflected in the University's mission, Statement of Community Values, Anti-Harassment and Non-Discrimination Policy and Title IX. All students, faculty, administrators and staff at the University have the right to expect an environment that allows them to enjoy the full benefits of their learning or work experience. The University, therefore, does not condone violations of its Anti-Harassment and Non-Discrimination Policy and treats all allegations about violations very seriously. As outlined in the Anti-Harassment and Non-Discrimination Policy (https://www.rider.edu/about/consumer-information/handbooks-policies/ahnd/), the University prohibits all forms of discrimination, harassment, sexual assault, sexual misconduct, sexual harassment, dating violence, domestic violence and stalking.

Rider University adheres to all federal, state, and local civil rights laws prohibiting discrimination in education and employment. Rider University does not discriminate in its admissions practices, in its employment practices, or in its educational programs or activities on the basis of race, sex/gender, religion, national origin, or other protected class status. As a recipient of federal financial assistance for education activities, Rider University is required by Title IX of the Education Amendments of 1972 to ensure that all of its education programs and activities do not discriminate on the basis of sex/gender.

For questions or concerns regarding these policies, or to report a violation of policy, please contact the Office of Title IX and Equal Opportunity Compliance:

Debbie Stasolla
Vice President for Strategic Initiatives and Planning
Title IX Coordinator

Degrees

Rider University offers programs leading to the following undergraduate degrees: Bachelor of Arts, Bachelor of Science, Bachelor of Fine Arts, Bachelor of Arts and Education, Bachelor of Science in Education, Bachelor of Science in Business Administration, Associate in Arts, Bachelor of Music, and Bachelor of Arts in Music.

Academic Support Services

Rider University offers a wide array of academic support services. Additional information regarding each of these can be found on Rider's website (http://www.rider.edu/academics/academic-support-services/). (http://www.rider.edu/academics/academic-support-services/)

Academic Success Center (http://www.rider.edu/academics/academic-support-resources/student-success-center/)

Offers free tutoring and other programs to enhance learning and development.

Career Development and Success (http://www.rider.edu/careerservices/)

Provides resume assistance, interview preparation, job search and postings, networking, career fairs, graduate school preparation, alumni services, employer partnerships and more.

Registrar (http://www.rider.edu/academics/academic-support-resources/registrar/)

Responsible for academic records, registration processing, degree and attendance verification, transcripts, grade reporting, veterans services, and maintenance of the student and course information systems.

Rider University Librar (https://www.rider.edu/academics/libraries/)y

The University Library support the student's academic journey by offering in-person and virtual consultations with librarians for information and research needs, quiet study areas and collaborative workspace, and technology such as virtual reality (VR).

Student Accessibility and Support Services (http://www.rider.edu/academics/academic-support-resources/services-students-disabilities/)

Ensures equal access by providing services for all students with qualifying documented disabilities.

TRIO Student Support Services (https://www.rider.edu/academics/academic-support/trio-programs/)

A comprehensive academic support program designed to increase performance, retention, and graduation rates, primarily of first-generation college students.

Additional Learning Opportunities

Study Abroad

Rider University offers a variety of study abroad opportunities through the Office for International Education (https://www.rider.edu/academics/centers-institutes/office-of-international-education/). Regardless of a student's academic program, students are encouraged to participate in one of Rider study abroad programs that meets their degree requirements. Students apply online for all study abroad programs using their RiderKey credentials.

Each January, Spring break week, and May, Rider offers a variety of credit-bearing opportunities abroad led by Rider faculty and staff. For a list of currently offered programs, please visit Faculty Led Programs (https://rider.studioabroad.com/?Program_Type_ID=1&Program_Name=&pt=%7F&pi=%7F&pc=%7F&pr=%7F&FuseAction=Programs.SearchResults&SimpleSearch=1). Interested students can begin their applications by clicking "Apply Now" on their selected program.

Rider offers study abroad opportunities during all academic semesters (https://rider.studioabroad.com/?Program_Type_ID=6&Program_Name=&pt=Fall%7F&pi=%7F&pc=%7F&pr=%7F&FuseAction=Programs.SearchResults&SimpleSearch=1) and summer (https://rider.studioabroad.com/) programs. Some approved programs, specifically summer programs, offer the opportunity for an internship abroad (https://rider.studioabroad.com/?FuseAction=Programs.AdvancedSearch). Additionally, Rider's Office of Service and Civic Engagement (https://www.rider.edu/about/offices-services/service-civic-engagement/) delivers two service learning abroad programs annually. For information about all of Rider's Study Abroad (https://rider.studioabroad.com/?FuseAction=Programs.AdvancedSearch) programs, visit the web site and explore the array of offerings. We are certain you will find the right study abroad opportunity so every Rider student can be a Bronc Abroad!

Summer Sessions

The summer sessions often include study abroad courses scheduled in a 3-week or 6-week format. Summer I begins in May following Commencement, and Summer II begins in late June or early July. Courses are offered during the day, evening, and in an online format.

Information regarding summer sessions is available at www.rider.edu/summer (http://www.rider.edu/summer/) . Student registration begins in March. Please contact your college's academic coordinator with questions regarding summer registration.

BA, BS/MBA Program

Overview

The integrated BA, BS/MBA program is designed for students who wish to combine undergraduate study in arts and sciences leading to a Bachelor of Arts or Bachelor of Science degree, with graduate study leading to the degree of Master of Business Administration. This intensive program enables highly motivated students to engage in a broadly based education for a career in business or not-for-profit organizations.

The admission process for this program carefully tracks students through the course requirements and ensures that only capable students are enrolled. Freshman students are strongly encouraged, when they start classes, to seek advice about the program from the deans' offices in business administration and liberal arts and sciences. Certain courses must be completed in the freshman and sophomore years if the student intends to complete the program within 11-12 semesters. The actual timing of completing the two degrees will be based on courses that may have been taken in summer sessions and the individual student's internships.

The admission process starts prior to the beginning of the student's junior year (defined as 54 earned credit hours) and assumes completion of the first seven required business courses. At that point, the Norm Brodsky College of Business Dean's Office meets with the student and reviews his/her progress in completing the business core. Step two of the admission process occurs in the first semester of the senior year when the student will formally apply to the MBA Program through the Graduate Admissions Office. The process involves the following:

- A completed application for admission to the MBA program, accompanied by a $50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- A statement of objectives prepared by the student that presents the student's reasons for wanting to enter the MBA program;
- An interview with the Norm Brodsky College of Business Dean's Office; and,
- Completion of the required freshman and sophomore classes.

Students completing the BA, BS/MBA program must take at least 90 credits in liberal arts and sciences courses at the undergraduate level.

Students will be awarded the BS or BA degree when they complete the requirements for that degree in liberal arts and sciences. The MBA will be awarded upon completion of the MBA requirements.

Students in the program will complete all the courses required in the liberal arts core as well as those courses necessary to satisfy the requirements for a major in liberal arts and sciences. The following courses will be completed in the first eight semesters, offered by the Norm Brodsky College of Business comprising the undergraduate business core:

Code	Title	Credits
ACC 210	Introduction to Accounting	3
ACC 220	Managerial Uses of Accounting	3
ECO 200	Principles of Macroeconomics [1]	3
ECO 201	Principles of Microeconomics [1]	3
FIN 220	Introduction to Finance	3
MGT 201	Fund Management & Org Behavior	3
MKT 200	Marketing Principles	3
MSD 105	Quantitative Methods for Business	3
CIS 385	Management Information Systems	3
CIS 185	Information Systems Essentials	3
MSD 205	Business Statistics	3
BDA 201	Introduction to Business Analytics	3
Total Credits		**36**

[1] May be considered either business or liberal arts course.

In the last semester of the senior year, students will take the following course if they have all of the prerequisites met:

Code	Title	Credits
MSD 301	Operations Management	3

In all of the above courses, students must achieve a "B" or better in order for them to waive the equivalent "pre-program requirements" for their MBA Degree. If they do not, the student will be required to take the corresponding course at the graduate level.

During the student's three (3) or four (4) graduate semesters, the following graduate courses must be completed:

Code	Title	Credits
PMBA 8000	Executive Communications	3
PMBA 8210	Information Technology Management	3
PMBA 8220	Strategic Accounting for Manager	3
PMBA 8230	Managerial Economics	3
PMBA 8240	Applied Corporate Finance	3
PMBA 8250	Operations & Supply Chain Management	3
PMBA 8260	Mkt Analysis & Decision Making	3
PMBA 8270	Adv. Organizational Behavior	3
PMBA 8290	Legal and Ethical Aspects of Management	3
PMBA 8880	Strategic Management	3
Electives		6
Total Credits		**36**

Note: There is not a specific combination BS, BA/MBA program for business majors. All business majors may apply directly to the MBA program. If accepted, the student may be able to complete the MBA within twelve months after undergraduate graduation.

Further information concerning the MBA program is available by emailing gradbusiness@rider.edu.

Honors Programs

- Baccalaureate Honors Program (p. 15)
- Honors in Business (p. 15)

Baccalaureate Honors Program

The Baccalaureate Honors Program (BHP) is a University-wide program designed to enrich the educational opportunities available to Rider students of proven intellectual ability who choose to become Baccalaureate Scholars. Interdisciplinary in orientation, the program enables Baccalaureate Scholars to explore diverse forms of thought, expression, and institutions past and present—an exploration that will enable them to meet future challenges with confidence. Through a series of team-taught seminars and other Honors courses, co-curricular experiences, personal contact with faculty, and completion of a senior Honors capstone project, the scholars extend their ability to think critically about the great themes of their human heritage.

An invitation to join the Baccalaureate Honors Program is extended to eligible entering freshmen and transfer students. Currently enrolled students may also apply for BHP. Students currently enrolled at Rider must have at least a 3.5 GPA at the time of application to the program.

Students in the Business Honors Program in the Norm Brodsky College of Business may also complete the Baccalaureate Honors Program if desired. They will complete BHP 100 and BHP 150. After that, two Business Honors courses may count toward BHP, and their Business Honors senior thesis may also count for BHP with approval by the BHP Honors Director. Completing both honors programs requires 3 additional honors courses beyond what is already required for Business Honors. How specifically to fulfill those requirements may be discussed with the Honors Director.

Other qualified Rider students with a 3.5 grade point average, including juniors and seniors, may also enroll in Honors seminar courses if seats remain open, as long as they receive the BHP director's approval.

BHP courses count toward the completion of the honors program, and may also count to fulfill one other requirement. For example, they may count toward ONE general education requirement OR toward the student's major/ minor (depending on what the course has been approved for). In addition, Honors sections of single-discipline courses, designated in the course roster, assist in fulfilling BHP requirements.

Honors seminars and courses are designated on student transcripts, whether or not the student completes the program. Successful completion of the BHP is noted on the student's transcript and in the commencement program.

Eligibility for the Baccalaureate Honors Program

For students entering Rider as a freshman:

- Students who earn a 3.5 GPA or higher in high school AND who also score 1280 or higher on the SAT or an ACT composite of 26 or better, are invited to join the Baccalaureate Honors Program as entering freshmen. If students apply test-optional, they must receive a GPA of 3.7 or higher and a total of approximately 17-20 honors/ AP/ IB/ Dual-Enrollment classes. Students may contact the Office of Admissions for any questions surrounding eligibility for honors in any given year.
- While at Rider, the completion of two honors writing courses, 5 upper-level seminars or honors experiences, and an honors capstone project is required for graduation with honors.
- Currently enrolled freshmen or sophomores may apply to the honors program if they achieve success in their freshmen writing class(es), earn a GPA of at least 3.5, and/ or are recommended by at least two faculty members. For these late-start students, completion of one honors course or experience per semester they are in the program is required for graduation with honors. This includes an honors capstone project during one semester of their senior year.

For students entering Rider as a transfer with 20 credits or less:

- Students who earn a cumulative GPA of 3.5 or higher and achieve a grade of B or higher in a college-level English/writing class may be invited to join the Baccalaureate Honors program as transfer students. For these transfer students, completion of 6 courses in the honors program including a senior honors capstone project is required for graduation with honors. Honors credits taken at the students' first institution may be accepted at the discretion of the program director.
- Transfer students must speak with the Honors Program Director to establish the personal trajectory required to complete their honors experience at Rider.

For students entering Rider as a transfer with more than 20 credits:

- Students who earn a cumulative GPA of 3.5 or higher and achieve a grade of B or higher in a college-level English/writing class may be invited to join the Baccalaureate Honors program as transfer students. For these transfer students, completion of 5 courses in the honors program including a senior honors capstone project is required for graduation with honors. Honors credits taken at students' first institution may be accepted at the discretion of the program director.
- Transfer students must speak with the Honors Program Director to establish the personal trajectory required to complete their honors experience at Rider.

For more information on the Baccalaureate Honors Program please see: www.rider.edu/bhp (http://www.rider.edu/BHP/).

Honors in Business

The Business Honors Program is designed exclusively for business majors enrolled in the Norm Brosky College of Business. Entering students are automatically considered for the program based on their academic record. Continuing students are invited to join by the director of the program.

Rider's Business Honors Program features cohort learning, which teaches the framework of successful business environments by encouraging teamwork and critical thinking. Students participate in classes with the same group of students for all four years. The cohort creates a powerful

learning environment where students gain crucial business skills: the ability to communicate and collaborate, problem-solve, analyze various perspectives, initiate discussions, network, and delegate.

Business honors students receive special advising, the opportunity to live in a residential learning community in their freshman year, priority in course registration, and invitations to attend co-curricular events (e.g., art exhibits, film screenings, poetry slams, theater previews, etc.) which are planned by the faculty team.

Each fall, approximately 25 students who have applied for and have been accepted to Rider University's Norm Brodsky College of Business will be invited to participate in the Business Honors Program. These students will be chosen based on their SAT scores and high school GPA. An additional ten students will be chosen after the end of the fall semester based on GPA.

To complete the Business Honors Programs, students must complete the required number of honors business core classes, write an honors thesis, maintain a minimum overall GPA of 3.4, complete one non-core business honors class, and complete a thesis.

The selected students will take the following sequence of honors courses beginning in the fall of their freshman year:

Class Standing	Semester	Honors Courses
Freshman	Fall	CIS 185, ECO 200 and CBA 110
	Spring	ECO 201 and MKT 200
Sophomore	Fall	ACC 210 and MGT 201
	Spring	FIN 220
Junior	Fall	BUS 300 and CIS 385
Senior		BUS 444, BUS 400 and Senior Honors Thesis

In order to successfully complete the honors program, a student will do the following:

- Complete eight of the eleven honors courses above (not including BUS 444), one of which must be BUS 400. Students that enter in the Fall of their sophomore year must complete six core honors courses.
- Complete a non-core CBA honors course (BUS 444).
- Complete an honors thesis.
- Have a minimum GPA of 3.4 in all honors courses.
- Have a minimum GPA of 3.4 overall.

Upon successful completion of the honors program, a student will receive a special honors designation on his/her transcript, an honors award, and special recognition at graduation.

The Academic Programs A to Z Chart (p. 16) lists Rider University's majors, minors and certificates alphabetically, along with the college or school (p. 18) that grants each degree, major, minor and certificate.

The following definitions explain the difference between majors, minors, tracks, concentrations, and emphases:

Major	An organized group of courses ranging from introductory through advanced levels. Typically most if not all courses are in a single primary area of study, although some majors include study in multiple disciplines. Undergraduate majors require between 18 and 90 credits, depending upon the liberal arts or professional focus. Graduate majors require between 30 and 45 credits. Entrance into some majors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the major is listed on the official transcript.
Minor	An organized group of courses, typically involving introductory through intermediate levels. While most minors are in a single discipline, Rider University offers several interdisciplinary minors, such as Law and Justice, and Sustainability Studies. Minors are offered at only the undergraduate level, and require between 15-33 credits. Some departments have restrictions on the connection between major and minor options. Entrance into some minors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the minor is listed on the official transcript.
Track	A choice of specialty within a degree, tracks comprise an organized group of courses serving a particular focus within a major. In undergraduate and graduate majors that represent multiple disciplines, tracks indicate a particular disciplinary focus. In a single discipline major with tracks, each track represents a singular focus, often representing a liberal arts or professional path. In some cases, a track represents a sub-specialization within the major field. Entrance into some tracks, particularly those that represent a particular disciplinary focus, may require prerequisites, portfolios, auditions, or other forms of assessment. Tracks require between 21 and 52 credits. Upon completion of all requirements, the track is listed on the official transcript along with the major field of study.
Concentration	Concentrations, such as for the Finance Major or Supply Chain Analytics, represent a specialty or focus within an undergraduate or graduate major field of study. Typically, a concentration unites courses around content or a particular theme. Concentration requirements are a portion of a major, not the entire major itself. In some cases, concentrations refer to an interdisciplinary combination. Entrance into some concentrations may require prerequisites, portfolios, auditions, or other forms of assessment. Undergraduate concentrations require between 9 and 36 credits; graduate concentrations range from 9 to 18 credits. Upon completion of all requirements, the concentration is listed on the official transcript along with the major field of study.
Emphasis	Typically an organized group of courses in a single discipline, the emphasis represents a subset of credits within an undergraduate or graduate major. The emphasis provides a coherent focus of study within a discipline, which may or may not be in the major field. Typically an emphasis represents less than one third of the total major credits, mostly ranging from 15 to 19 credits. Entrance into some areas of emphasis may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the emphasis is listed on the official transcript along with the major field of study.

Accounting

Program Overview

Rider's accounting program is designed to build professionals. The B.S.B.A. in accounting provides students with the skills and knowledge needed for careers with corporations, public accounting firms, and governmental organizations.

Accounting majors learn in the classroom, through co-op and internship positions, and through ongoing networking opportunities with accounting executives.

Student Learning Outcomes:

An accounting graduate will:

- demonstrate an ability to apply knowledge of fundamental U.S. accounting, auditing and tax techniques and standards to accounting problems;
- demonstrate effective oral communication and presentation skills;
- demonstrate effective written communication skills;
- demonstrate proficiency in the appropriate application of relevant information technology skills for professional tasks;
- demonstrate basic professional skills for problem-solving and critical thinking;
- demonstrate an ability to research accounting, auditing and tax issues;
- demonstrate an understanding of the importance of ethics in the accounting profession and the ability to apply ethical reasoning to accounting decision making.

Curriculum Overview

The B.S.B.A. accounting curriculum prepares students for a variety of career paths in the dynamic field of accounting. The curriculum emphasizes technical knowledge, professional development, written and oral communication, information technology, ethics and global perspectives.

The B.S.B.A. program has an active co-op and internship program in which students work in paid positions during the semester or summer and earn academic credit for the program. Both the co-op and internship can be completed within the four year program and often lead to full-time employment. The B.S.B.A. also offers a business forensic concentration.

Students who want to pursue **CPA certification** can meet the 150 hour requirement for CPA licensure by double majoring in the B.S.B.A. program or by continuing in the **4+1 Master of Accountancy (MAcc) program**.

Undergraduate accounting majors are encouraged to work closely with their advisor to select courses which will best address their career and

certification plans. Students should consult the specific certification requirements of the state jurisdiction in which they plan to become certified and plan accordingly. To learn more about individual state requirements for CPA licensure see www.nasba.org. (https://nasba.org/exams/cpaexam/)

Master of Accountancy (4 + 1 MAcc Program)

The 4 +1 MAcc program is the fastest growing program in the Norm Brodsky College of Business. The MAcc prepares students for CPA licensure and allows for an area of specialization. Students may enter the program directly from the B.S.B.A. program, and for students with overall and accounting GPA of 3.0, the GMAT requirement for admission is waived. The MAcc can be completed on either a full-time or part-time basis.

Accreditation Information

The accounting program is one of less than 3% of accounting programs worldwide to hold the prestigious AACSB business and accounting accreditation. The accounting faculty are committed to continuous improvement in curriculum, faculty and student preparation.

Degrees Offered

- B.S.B.A. in Accounting
- Master of Accountancy (fifth year program, 4+1)

Major Requirements

(27 credits)

Code	Title	Credits
Business Core		
See Business Core Requirements (p. 564)		
Major Requirements		
ACC 302	Cost Management	3
ACC 310 & ACC 311	Acct Theory & Concepts I and Accounting Theory & Concepts II	6
ACC 320	Accounting Info Systems	3
ACC 400	Principles of Auditing	3
ACC 405	Accounting Problems & Practice	3
ACC 410	Fundamentals of Federal Taxation	3
BUS 210	Intro to Law: Contracts	3
FIN 308	International Finance	3
Total Credits		**27**

Students who plan to take the CPA exam may, with the Department Chair's permission, take MACC 658 Governmental and Not-for-Profit Accounting during their senior year. These credits may be used to fulfill the 120 undergraduate credit requirement. Students who are not entering into the MAcc but plan on taking the CPA test are allowed to take MACC 658 as part of the undergraduate program. The student will need to have an overall and accounting GPA of 3.3.

Students desiring to become certified public accountants (CPAs) will be required to have 120 credit hours of education to take the CPA exam and have completed 150 credit hours of education for licensure. Rider accounting majors may graduate after four years (120 credit hours) or seek to achieve the additional credit hours directly through admission to the Master of Accountancy (MACC) program at the University. It is possible to apply to the MACC program at Rider after completion of 90 credit hours. (Please consult the Rider University Graduate Academic Catalog for details on the MACC program (p. 1326).) Undergraduate accounting majors are encouraged to work closely with their advisor to select courses that will best address their career and certification plans. Students should consult the specific certification requirements of the state jurisdiction in which they plan to become certified and plan accordingly.

Students majoring in accounting must receive a grade of at least “C-” in a prerequisite course for any advanced course in accounting, and must have a cumulative average of at least 2.0 in the major.

4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

[1] Students must take four Liberal Arts Electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Liberal Arts and Sciences.

[2] Choose from LDP 398 The Co-op Experience Seminar, LDP 200 Foundations of Leadership, LDP 220 Service Learning Through Minding Our Bus, MGT 355 Team Management, or MGT 363 Management Skills. Students taking ACC 399 The Co-Operative Experience are required to take LDP 398 The Co-op Experience Seminar during the co-op semester.

[3] CIS 185 Information Systems Essentials and CBA 110 Introduction to Business can be taken in the Fall or Spring of Year 1.

[4] Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.

NOTES

- **Business Fraud and Forensic Concentration:** Students should take ACC 325 Fraud Examination and Business Forensics in the spring of sophomore year, ACC 321 Internal Auditing in the fall of junior year, and ACC 450 Business Forensic Application in the spring of senior year.
- **CPA Licensure Requirements for Students Not Entering the MAcc:** Students should also work with their academic advisor to plan the additional 30 credits.
- Students are required to take FIN 308 International Finance as one of the required International Business Electives, as well as BUS 210 Intro to Law: Contracts.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., Internship, Co-op, Study Tour, study abroad, ENT 448 Seminar in Small Business Consulting,ECO 450 Seminar in Economic Research).
- Students working co-op positions in the spring of their third year will substitute ACC 399 (6 credits of free electives) for MSD 301 and one liberal arts elective. MSD 301 and the liberal arts elective must be taken in another semester.

3 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

1 Students must take four Liberal Arts Electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.

2 Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.

NOTES

- The above plan assumes no AP or other credits were transferred into Rider University.
- Students are required to take 6 credits of International Business Electives. One of the courses must be FIN 308 International Finance.
- Business Honors students will have a different sequence.
- For the Leadership Elective, choose from LDP 200 Foundations of Leadership, LDP 220 Service Learning Through Minding Our Bus, LDP 398 The Co-op Experience Seminar, MGT 355 Team Management, or MGT 363 Management Skills.
- It is strongly suggested that students complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448 Small Business Consulting Sem, ECO 450 Seminar in Economic Research).
- Students are required to take FIN 308 International Finance as one of the required International Business Electives, as well as BUS 210 Intro to Law: Contracts.

Courses and Descriptions

ACC 210 Introduction to Accounting 3 Credits
This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

ACC 220 Managerial Uses of Accounting 3 Credits
This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.
Prerequisite(s): ACC 210.

ACC 302 Cost Management 3 Credits
This course focuses on firm strategy and the role managerial accounting information plays in the decision making process. Topics include the balanced scorecard, the value chain, product life cycles , target costing, theory of constraints, strategic pricing, management and control of quality cost systems, traditional and activity-based costing, cost control, standard costs and variances, and capital budgeting.
Prerequisite(s): ACC 220 with a minimum grade of C- and CIS 185 with a minimum grade of C-.

ACC 310 Acct Theory & Concepts I 3 Credits
This is the first upper-level course in a sequence in financial accounting courses. Topics include the conceptual framework, and standard setting process followed by application and evaluation of generally accepted accounting principles including content, and structure of financial statements, present value concepts, current assets, current liabilities, property, plant, and equipment, intangible assets and non-current liabilities are studied. An overview of comparable international financial reporting standards (IFRS) is also included.
Prerequisite(s): (ACC 210 with a minimum grade of C- and ACC 220 with a minimum grade of C-) or PMBA 8020 or VL10 with a score of WV).

ACC 311 Accounting Theory & Concepts II 3 Credits
This course is a continuation of ACC 310. Topics include long-term investments, stockholders' equity, earnings per share, interperiod income tax allocation, accounting changes, revenue recognition, pensions, leases and cash flow analysis. An overview of comparable international financial reporting standards (IFRS) is also included.
Prerequisites: ACC 310 with a minimum grade of C- or VL02 with a score of WV.

ACC 320 Accounting Info Systems 3 Credits
This course provides an introduction to accounting information systems and enterprise-wide, process-focused information systems. Topics include quality of data for decision usefulness, internal control concepts and documentation tools, and database theory and applications.
Prerequisite(s): ACC 220 and CIS 185.

ACC 321 Internal Auditing 3 Credits
This course provides an introduction to the internal audit profession, including understanding the nature and activities associated with the internal audit process. Topics include: international auditing standards, risk assessment including internal control system evaluation, business processes, and the relationship of management and employee fraud to the internal audit process.
Prerequisite(s): ACC 220.

ACC 325 Fraud Examination and Business Forensics 3 Credits
This course provides an introduction to the prevalence of fraud in all forms of business, including the many methods used by employees and managers to perpetrate fraud. Topics include: the motivation of individuals to commit fraud, various types of fraud schemes perpetrated in the workplace, as well as the various tools and techniques that are used to investigate, detect and prevent fraud.
Prerequisite(s): ACC 210.

ACC 399 The Co-Operative Experience 6 Credits
This course provides the student with a semester long supervised employment with participating companies. Students are evaluated periodically by senior staff members of the participating firms and required to complete a work journal, self-assessment and reflection paper. Eligible students include junior and senior accounting majors with a minimum GPA of 3.0 in accounting coursework. Co-op credits can be applied toward business or free elective requirements. Grading is on a pass/fail basis.
Prerequisite(s): ACC 210, ACC 220, and ACC 310 and permission of department chairperson.

ACC 400 Principles of Auditing 3 Credits
This course provides an introduction to financial statement audits performed by certified public accountants. Topics include corporate governance, the audit environment, professional standards, audit methodology, and audit report preparation. The course also provides an overview of other types of assurance and non-assurance services provided by CPA firms.
Prerequisite(s): (ACC 310 with a minimum grade of C- or ACC 310P with a minimum grade of C-) or VL02 with a score of WV.

ACC 405 Accounting Problems & Practice 3 Credits
This course provides additional coverage of financial reporting issues and procedures. Topics include business combinations, consolidated financial statements, foreign currency translation, the effects of diversity across countries, disclosure and SEC reporting issues. Governmental and not-for-profit accounting standards are also covered.
Prerequisite(s): (ACC 311 with a minimum grade of C- or ACC 311P with a minimum grade of C- or VL03 with a score of WV).

ACC 406 Integrative Professional Capstone 3 Credits
This course provides an integrative experience that applies financial statement and data analysis tools to a variety of accounting settings. Topics include issues of ethics and professionalism and linkages between accounting methods and company policy, equity valuation, bond ratings and other decision areas.
Prerequisite(s): ACC 405 or permission of department chairperson.

ACC 410 Fundamentals of Federal Taxation 3 Credits
This course provides fundamental federal tax concepts applicable to individuals, partnerships, corporations, estates, and gifts. Topics are considered from a tax compliance and planning perspective. Preparation of individual and corporate tax returns is also included.
Prerequisite(s): ACC 311 with a minimum grade of C- or ACC 311P with a minimum grade of C- or VL03 with a score of WV.

ACC 410P Fund of Federal Taxation - PM 3 Credits
This course provides fundamental federal tax concepts applicable to individuals, partnerships, corporations, estates, and gifts. Topics are considered from a tax compliance and planning perspective. Preparation of individual and corporate tax returns is also included.
Prerequisite(s): ACC 311 or ACC 311P. Restricted to students in the MAcc program.

ACC 450 Business Forensic Application 3 Credits
This course provides an opportunity to perform complex investigative cases and analyses, thus demonstrating mastery of the knowledge and skills required to be effective forensic professionals. The course covers how to manage and present digital and technical evidence gathered for forensic litigation cases, including the ability to be an expert witness in court.
Prerequisite(s): ACC 325 and ACC 321.

ACC 490 Independent Research and Study 3-4 Credits
Topic to be approved by professor and department chairperson. Available to juniors and seniors.

ACC 491 Accounting Internship 3 Credits
This course provides the student with approximately two months of supervised employment with participating companies. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a term paper. Eligible students include junior and senior accounting majors with a minimum GPA of 3.0 in accounting coursework. Upon completion of course, a letter grade will be awarded. **Prerequisite**(s): Permission of department chairperson.

BUS 210 Intro to Law: Contracts 3 Credits
An introduction to the origin of current law, with emphasis on the development of business law, students are exposed to legal terminology and acquainted with the system of application of rules of law to actual situations. The laws of contracts, particularly common-law developments, are considered in great detail.

FIN 308 International Finance 3 Credits
Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.
Prerequisite(s): FIN 220.

Acting for Film, Television and Theatre

Program Overview

The B.F.A. in Acting for Film, Television and Theatre is a professional training program that prepares students for entry into the performance fields of stage, film, and television. The program consists of comprehensive training in acting, voice, and movement and also includes courses geared toward the business of acting, directing and script analysis, as well as theatre and film history. Students will learn from a faculty of working professionals who collectively have experience in every aspect of the discipline. Rider's close proximity to New York City and Philadelphia allows students to interface with many industry experts who will help nurture students' professional aspirations as they experience the vibrant, cultural atmosphere of these major entertainment markets.

FMS 260	Great Performances in Film	
Total Credits		**81**

[1] Double majors should consult their advisors to determine the most pedagogically appropriate lab to attend. Students should not register in more than one lab per semester. Students are required to complete at least three lab sections in each of their majors before graduation. Students must meet the minimum total credits of lab required by each major though some of those credits may come from a different discipline.

[2] FTV 343 is a corequisite for THE 300 and THE 315 and must be completed at the same time.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Courses and Descriptions

THE 103 The Authentic Instrument I: Introduction to Performance Skills 3 Credits
Through the Alexander Technique and other methodologies, actors gain awareness of personal habits and begin to find their authentic, truth-telling voice and body—a dynamic and expressive instrument to serve them in any medium.

THE 104 The Authentic Instrument II: Developing the Imaginative Performer 3 Credits
Continuing from THE 103, actors explore psycho-physical techniques (e.g. Michael Chekhov, Viewpoints, Laban) to develop the actor's imagination. The class culminates in a public presentation using the tools that have been cultivated in Authentic Instrument I & II.
Prerequisite(s): THE 103.

THE 105 Theatre History to 1700 3 Credits
The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras.This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 106 Theater History Since 1700 3 Credits
The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements.This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 107 Acting I: Intro to Acting 3 Credits
Students will learn and practice the fundamental techniques and skills for authentic acting: pursuit of objectives, struggles against obstacles, and use of various tactics.

THE 110 Acting II: Scene Study 3 Credits
Students will continue to apply fundamentals from Acting I while learning how to read a script for actor clues, searching for and applying given circumstances to scene work, and monologues. Pre-requisite: THE 107 with a minimum grade of C.

THE 115 Stagecraft 3 Credits
The theory and practice of construction and rigging of stage scenery is offered. Emphasis is on actual productions and road show set-ups. One lecture and two labs per week.

THE 126 Acting for Camera 1 3 Credits
Focuses on the craft and artistry of acting in television and film. Examination of TV production and the styles needed for work in various media will be discussed. Physicalization, simplicity, listening, marking and other technical requirements will be explored. Staging involving different camera angles will be rehearsed. The emphasis of this class is on adapting the performance to the special needs of the camera.
Prerequisite(s): THE 107 (minimum grade of C).

THE 127 Theatre Production 1 Credits
Students rehearse and perform roles in a play produced by the department and directed by a member of its faculty.

THE 220 Movement for the Actor I 3 Credits
This course is an introduction to movement training methodologies, and emphasizes physical awareness and expressivity as it relates to development of character.
Prerequisite(s): THE 110, For Acting majors or by permission of the instructor.

THE 221 Voice for the Actor 1: Foundations of Speech 3 Credits
Focuses on the exploration of the basic principles of vocal production and cultivating the natural expressivity of the voice. Classwork is based upon the classic progression of voice exercises of Kristin Linklater.
Prerequisite(s): THE 107 with a minimum grade of C; restricted to BFA in Acting for Film, Television and Theatre.

THE 222 Voice for the Actor 2: Speech & Dialects 3 Credits
Focuses on the exploration of the International Phonetic Alphabet (IPA) and the use of the IPA in learning dialects (including Standard Neutral American) for the stage.
Prerequisite(s): THE 221 with a minimum grade of C.

THE 229 Movement for the Actor II 3 Credits
This course is a continuation of study in movement training methodologies (Alexander Technique, Viewpoints, Laban). It will emphasize developing physical awareness and expressiveness as it relates to the development of character work. It will also continue the further cultivation of awareness of habitual psycho-physical patterns that inhibit students in their professional development.
Prerequisite(s): THE 220, THE 221.

THE 240 Script Analysis 3 Credits
This course provides students with a technique for analyzing a theatrical script in terms of its theatrical requirements and aesthetic qualities. Students will use critical research and develop the abilities to write and speak clearly about dramatic literature, the requirements of production, and the experience of performance.
Prerequisite(s): THE 107 with a minimum grade of C.

THE 300 Acting for the Camera 3 Credits
Focuses on the craft and artistry of acting in television and film. Examination of TV production and the styles needed for work in various media will be discussed. Physicalization, simplicity, listening, marking and other technical requirements will be explored. Staging involving different camera angles will be rehearsed. The emphasis of this class is on adapting the performance to the special needs of the camera.
Prerequisite(s): THE 107.

THE 310 Acting III 3 Credits
Building upon the skill sets learned in Acting I and II, students will learn how to utilize both interior and exterior analysis of characters while being introduced to a variety of techniques stemming from the Stanislavsky method. Techniques will then be applied through scene and monologue performances in class. Pre-requisite: THE 110 with a minimum grade of C.

THE 311 Acting IV 3 Credits
Students will learn and practice performance techniques that explore a variety of theatrical styles, primarily focused on styles that have a heightened form and/or language.
Prerequisite(s): THE 310 with a minimum grade of C.

THE 313 Voice for the Actor 3: Voice Acting 3 Credits
Students will learn and practice the foundational requirements needed to audition for a variety of voiceover projects including commercial, animation, audio drama, podcasts, video games, audio books, and other forms of voice acting.
Prerequisite(s): THE 222 with a minimum grade of C.

THE 315 Acting for the Camera 2 3 Credits
This course is a continuation of the study of acting for the camera.
Prerequisite(s): THE 126 with a minimum grade of C.

THE 329 Movement for the Actor III 3 Credits
This course is a continuation of study in movement training methodologies focusing on continued development of expressivity, ease, dynamics and authenticity in character development.
Prerequisite(s): THE 229.

THE 400 Directing for the Stage I 3 Credits
The technique of play directing and production management. Lectures present aesthetic and theoretical concepts that are explored in workshops.
Prerequisite(s): THE 107 with a minimum grade of C.

THE 410 Advanced Performance Workshop 3 Credits
An opportunity to work an entire semester on a specific style or period of theatre, e.g., Shakespeare, farce, Readers' Theater.
Prerequisite(s): THE 107, THE 110.

THE 450 NY Experience: Professional Audition Technique and the Business of Acting 3 Credits
Students engage weekly with New York professionals to learn the business of acting and strategies for successful auditions in the NY Film, Television and Theatre industry. Students will participate in mock auditions with casting directors and theatre and on camera directors to refine audition skills. Travel costs to New York are the responsibility of the student.

FTV 135 Filmmaking I 3 Credits
Filmmaking I introduces students to basic film and television production theories, techniques, and applications. Students will gain competency in a number of production areas including composition, lighting, filmic storytelling, sound, production planning and editing. As well as gaining practical production experience, students will also be introduced to basic art theory in relation to composition and visual storytelling.

FTV 238 Screenplay Fundamentals 3 Credits
Screenplay Fundamentals will instruct students in how to write for the screen. Students will learn how to convey story and character through the medium of film and television, how to write effective dialogue, and understand the basics of dramatic writing and scene structure.
Prerequisite: COM 131.

FTV 243 The Actor and Filmmaker 3 Credits
A practicum course that instructs the student on how actors and directors work together to build a performance. The course will provide on-hands experience in technical aspects of behind and in front of camera processes in capturing an actor's performance, exploring the demands and particularities of acting for the camera. This course will also serve as an introduction to basic acting theories and practices as they relate to how actors work to express a character onscreen. Elements of this course include monologue and scene rehearsal and performance (both multi-camera and single camera), audition techniques (for both actors and directors), and how film directors block and cover a scene. Students will gain experience both behind and in front of the camera,
Prerequisite(s): COM 131 or FTV 135 for Film/TV majors or THE 110 for Theater majors.

FTV 343 Actor and Filmmaker Practicum 1 Credits
A workshop class designed to give acting and filmmaking students an opportunity to collaborate on narrative film and television projects. During this class students will work closely with the directors on building compelling performances for the screen. Students will gain practical experience with auditioning, blocking of scenes, developing their characters and techniques for working effectively and efficiently with a director and crew.
Prerequisite(s): FTV 135 or THE 110.

FTV 399 The Co-Operative Experience 3-12 Credits
This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faulty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; .
Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

FTV 235 Filmmaking II 3 Credits
This course will build on the basic technical proficiency gained in COM 135 as applied to narrative filmmaking. Working as individuals and in groups, students will develop skills in narrative cinematic storytelling, and gain a basic proficiency in filmmaking theory, techniques and applications. Students will gain competency in a number of production areas including idea generation and scripting, production planning, cinematography, lighting, sound and editing.
Prerequisite(s): FTV 135 or COM 131.

FTV 236 The Aesthetics of Filmmaking 3 Credits
Introduces general students (other than FTV majors or FMS minors) to a greater appreciation of film art and the various generic and artistic approaches adopted by noteworthy filmmakers through the course of film history. Through film viewing, class discussion, readings, essay writing and creative responses, students will learn how formal choices in cinematography, production and sound design, screenwriting, and acting shape cinematic themes and atmosphere, while forging viewer identification and eliciting emotional response. Among readings will be those on introductory film theory, key works of film criticism, interviews with filmmakers, and scholarship on the aesthetics and ideological underpinnings within various film genres and in the work of selected filmmakers.

FTV 250 Television Studio Production I 3 Credits
This introductory course is designed to expose students to the processes, equipment, production roles, techniques and goals of in-studio television production. Serving as directors, writers, on-camera hosts, etc., students will gain valuable, direct hands-on experience with the technical and creative challenges faced during the various phases of studio production from pre-production planning through actual remote and live studio work. Emphasis will be placed on studio operation and technology; the roles and responsibilities of the production crew; and the pressures faced during the direction of live, multi-camera productions.
Prerequisite(s): COM 131 or FTV 135.

FTV 402 Directing for Film 3 Credits
This course approaches directing both creatively and critically, and examines the role and importance of the director to the filmmaking process. The transformation of the written script into a film is explored through readings, viewing and analyzing the films of accomplished directors. Lectures and exercises illustrated with film clips and readings emphasize plot development, script analysis, developing storyboards and shot lists, rehearsal, blocking, collaborating with talent and production crew, and using the camera to effectively capture action and performance. Students will gain an effective understanding of the role of the director through the various stages of film production, and be provided the opportunity to demonstrate and cultivate his/her effectiveness as a director through individual and group assignments.
Prerequisite(s): FTV 235 and COM 338.

FTV 435 Filmmaking III 3 Credits
This is an intensive hands-on course in advanced digital filmmaking. Students will gain proficiencies in a number of filmmaking areas including production planning, aesthetics, scripting, script breakdown, camera movement, selecting and directing talent, creating scenes and sequences, visualizing action, establishing mood and conflict, as well as advanced lighting, sound and digital editing techniques. The students' use of high definition digital imaging systems as a medium for narrative cinematography will be developed and refined. In addition, students will explore how filmmaking techniques and technology can impact the visual storytelling process. Students will work cooperatively in groups, modeling the interdependent structure of professional film crews. Throughout the class, there will be an important integration of theory and practice which will enable students to produce meaningful film projects that will not only be technically effective, but strong in content and context as well.
Prerequisite(s): FTV 235.

MTR 105 Musical Theatre Practicum 1 Credits
This course explores the literature of musical theatre vocal ensembles. It emphasizes examining a wide range of styles. This is a studio/academic class, not a performance ensemble.

MTR 109 Ballet I 1 Credits
This course introduces the basic elements of ballet technique. Technique is based on the five positions of the legs and feet, coupled with appropriate arm positions. The class consists of a basic ballet barre warm-up that includes stretching and developing strength and turn-out used in dance positions and combinations. Instruction includes jumping, turning, and connecting steps with movement. Ballet terminology is addressed.

MTR 112 Ballet II 1 Credits
A continuation of MTR 109, building upon techniques learned in that course.
Prerequisite(s): MTR 109.

MTR 114 Ballet IV 1 Credits
A continuation of MTR 113 Intermediate ballet, expanding upon Ballet I and concentrating upon the American lineage of ballet training.

MTR 209 Tap Dance I 1 Credits
Introduction to the basic elements of tap dancing. Tap technique is geared to enhance rhythm and motor skills, basic elements that will be used to connect several steps and movements into combinations. Other variations such as "soft shoe" or "clogging" are included.

MTR 210 Tap Dance II 1 Credits
Continuation of MTR 209. Combinations most often used in music theater productions are emphasized.
Prerequisite(s): MTR 209.

MTR 212 Ballet VI 1 Credits
Continuation of MTR 211. Intermediate ballet, expanding upon Ballet III and concentrating upon the American lineage of ballet training.
Prerequisite(s): MTR 211.

MTR 307 Tap III 1 Credits
This course is designed for the moderately advanced tap dancer. Course to be taken in the fall.
Prerequisite(s): MTR 210.

MTR 308 Tap IV 1 Credits
The course will allow the more advanced student to complete the work begun in Tap III.
Prerequisite(s): MTR 307.

MTR 309 Jazz I 1 Credits
Based upon the ballet foundation, this course explores the expressive style of jazz dance, and basic Western theatrical dance forms and social dances used most often on the stage.
Prerequisite(s): MTR 109 and permission of the instructor.

MTR 313 Ballet VII 1 Credits
Advanced ballet, expanding upon Ballet IV and concentrating upon the American lineage of ballet training. Inclusion of advanced combinations, physical development and coordination skills. Repeatable one time for total of two credits earned.
Prerequisite(s): MTR 212.

MTR 314 Ballet VIII 1 Credits
Continuation of MTR 313. Advanced ballet, expanding upon Ballet IV and concentrating upon the American lineage of ballet training. Inclusion of advanced combinations, physical development and coordination skills.
Prerequisite(s): MTR 313.

MTR 315 Jazz II 1 Credits
Continuation of work begun in MTR 309. Permission of the instructor required.

MTR 316 Jazz III 1 Credits
This course continues the work begun in MTR 309 and MTR 315.
Prerequisite(s): MTR 310.

MTR 318 Jazz IV 1 Credits
This course continues the work begun in MTR 309, MTR 315 and MTR 316.
Prerequisite(s): MTR 211.

MTR 319 Jazz V 1 Credits
This course continues the work begun in MTR 318.
Prerequisite(s): MTR 318 and MTR 212.

MTR 320 Jazz VI 1 Credits
This course continues the work begun in MTR 319.
Prerequisite(s): MTR 319 and MTR 212.

THE 118 Visual Imagination 3 Credits
Introduction to the visual world of theater design. Visual examples, physical exercises and handcraft of composition and style, with dramatic input and meaning. The course explores how to translate ideas in a dramatic text into a visual context.

THE 201 Devised Theatre 3 Credits
Devised theatre is a process in which a whole creative team – from actors to technicians - develop a new work collaboratively. Students will create an original production inspired by a theme, topic, poem, or circumstance using multimedia, interviews, and other methods and build them through collaborative workshops and rehearsals.

THE 206 American Theatre History 3 Credits
The history of the American theater from the colonial period to the present, emphasizing dramatic scripts and theatrical conventions. Examines important playwrights, theorists, and practitioners representative of each period of American history, emphasizing the 19th and 20th centuries.

THE 207 Contemporary Theatre 3 Credits
The course will engage in exploring the art of contemporary dramatic literature and theatre practices. The scripts studied will reflect the complexity and diversity of contemporary society in various places around the world. Through an examination of a diverse body of scripts, the student will gain a better understanding of the possibilities inherent in the dramatic form, as well as the potential for the form to impact thought and action in society.

THE 224 Stage Make Up 3 Credits
Basic application of make up artistry and techniques for the stage. How it can help build a character, and how to apply to self and others.

THE 250 Introduction to Costume Construction 3 Credits
This course will introduce students to basic costume construction methods and alteration skills used by professional costume shops and costume houses to create theatrical costumes. Students will complete several projects, covering hand and machine sewing, cutting, fabric identification, and will also learn how to use home and commercial patterns to cut out garments and simple patterning and draping techniques. Students will also get practical experience by assisting the costume designer and/or shop manager in supporting the needs of the current productions and will have experience taking measurements, fitting and the alteration of actual costumes.

THE 260 History of Style and Decor 3 Credits
This class is a survey of elements, furnishings, decorative motifs and trends in architecture, decor and fashion, starting with prehistory and moving through the early part of the 21st century. It is intended to be a visual survey of the major "periods" of both decor and fashion and is intended to help theatre artists to develop an understanding of visual history.

THE 312 The Arts Abroad 1-3 Credits
A short-term trip abroad that includes a critical study of local & regional arts and culture. Students are required to attend all performances, guided tours, and classes before and after the trip. A travel fee is required. Travel sites and artistic disciplines may vary year to year. May be taken more than once for credit.
Prerequisite(s): Permission of instructor.

FMS 250 Global Film History: Origins to 1960 3 Credits
Examines major technological and aesthetic developments in both American and international cinema of the period, with an emphasis on global cinema. From silent comedy and melodrama to German Expressionism and Soviet activist cinema; from French poetic realism and Italian Neo-realism to Hollywood sound cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. FMS 250 is cross-listed with ENG 281 and fulfills the general education global perspectives requirement.

FMS 251 Global Film History: 1961 to Present 3 Credits
Examines major technological, industrial, and aesthetic developments in both American and international cinema of the period, with an emphasis on global cinema. From the decline of the studio system and the emergence of the "New Hollywood" to the digital revolution; from the renaissance in Western and Eastern European cinemas to Latin American, Asian, and Middle Eastern cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. FMS 251 is cross-listed with ENG 282 and fulfills the general education global perspectives requirement.

FMS 252 American Film History: Origins to 1960 3 Credits
Examines major technological and aesthetic developments in American cinema as it grew from the days of one-reel silent shorts exhibited in storefront theaters through the days of studio productions exhibited in lavish picture palaces and featuring iconic stars the system manufactured and promoted. From the inception of sound and color, to the later development of lightweight equipment that freed filmmakers from the confines of the studio, from the "golden age" to the gradual decline of the Hollywood studio system in the 1950s, we will study the lasting genres that grew out of the system, the filmmakers who flourished and those who rebelled against the system, and the ground-breaking films that established the American film industry as a dominant force within the world. FMS 252 is cross-listed with ENG 285.

FMS 253 American Film History: 1961 to Present 3 Credits
Examines the transitions of Hollywood in the post-studio era— the rise of the 1960s-1970s New Hollywood and its ground-breaking films, the rise of the blockbuster as an industry standard; the responses of independent filmmakers and the avant-garde to blockbuster dominance; the transition from the Production Code to the ratings system, the move back to studio-owned theaters, and the emergence of digital cinema and CGI. We will look at how genres are being redefined, how major filmmakers are re-shaping their work to fit 21st century demands, how "gaming," YouTube, and other media sources are altering the very definition of cinema. FMS 253 is cross-listed with ENG 286.

FMS 260 Great Performances in Film 3 Credits
Examines major accomplishments in film acting from the silent era to the present day. Students will acquire knowledge of the historical and critical contexts and the artistic vocabulary necessary to understanding, appreciating and assessing screen performances in a range of genres—from comedy and the musical, to the melodrama, psychological thriller, and "hard-boiled" film noir. Students will be asked to read, evaluate, and analyze film performance texts, as well as to research and write about performances in numerous films.

African American Studies

Overview

Housed in the Multicultural Studies program, the African American Studies minor addresses issues surrounding race, class, and gender, focusing on the specific history and obstacles associated with the unique experiences of African Americans in the United States. The coursework draws from many disciplines, including history, sociology, political science, literature, culture, and American studies, providing a broad range of ideas and information.

Learning Outcomes

Upon completing the minor in African and African American Studies, students will be able to:

1. Describe major social, cultural, and political events in the African and African American experience.
2. Explore and analyze the African and African American experience through the lens of different disciplines.
3. Compare and contrast the different experiences of African descent peoples within the United States and across the African diaspora.
4. Identify major figures in African and African American history and understand their impact on global and American society.

Minor Offered

Courses and Descriptions

MCS 110 Race, Class and Gender in Contemporary American Society 3 Credits
This interdisciplinary course analyzes the ways in which race, class, gender and ethnic relationships shape the experience of all persons in this society. It examines the categories of race, class and gender as social constructs that have been historically developed and sustained by economic, social, political, and cultural factors. Note: This course is cross-listed with GSS 110. Students may only get credit for one course: MCS 110 or GSS 110.

MCS 210 Power and Privilege in a Multicultural Society 3 Credits
This course will examine how the intersection of power and privilege shapes race, gender and class relationships in the United States. Analyses will show how the legal, economic, political and social manifestations of power influence the assignments and distribution of privilege in the United States, both in historical and contemporary contexts. The impositions of power on identity in the social assignment of privilege will be an important component of the course. The two "big questions" to be examined in this course are: How do issues of race, ethnicity, class, age, religion, gender, and sexual orientation interact with privilege? How do the tensions between power, privilege, oppression and inequality lead to movements for social justice? Various interlocking systems of privileges—justice system, educational system, medical system, political system, economic system, etc.–will be examined, using the theoretical frameworks of inequality, oppression and dependency. Prominent public policies and social movements that have challenged the notions of power and privilege, both historically and contemporarily, will be examined: civil rights, women's suffrage, affirmative action, Occupy Wall Street, LGBT rights, Metoo movement, Equal Rights Amendment, Title IX, Lilly Ledbetter Fair Pay Act, etc.

HIS 201 African American History 3 Credits
Examines the actions and thought of peoples of African ancestry in the United States. Briefly considers Africa before the Atlantic slave trade, then concentrates on major themes in African-American history–the slave trade, slavery, and the genesis of African American society, emancipation and its consequences, urbanization and industrialization, Black Nationalism, the Civil Rights Movement, and African Americans today. Emphasizes African Americans' dynamic and creative role both in shaping their society and establishing their place in United States society. The on-going struggle for freedom and equality provides thematic continuity for analyzing nearly 400 years of African-American history.

AMS 212 Multicultural America 3 Credits
Focusing primarily on the new century, this course explores the experiences of the remarkably diverse range of ethnic groups who have come to the U.S. in recent years, including Hispanics, Europeans, Asians and Africans. How these groups have impacted the communities where they have settled, how they have interacted with other ethnic groups, and how they have assimilated (or not) and prospered (or not) are among the issues examined and discussed.

AMS 227 Martin Luther King Jr's America 3 Credits
This course studies Martin Luther King Jr's writings, speeches, and sermons, the context of the America he saw in his lifetime, and the implications of his message for today's America and its place in the world. King envisioned a wholly democratic America free of racism, poverty, and military aggression. Students will critically assess the political, economic, and religious thought at the root of his call for change.

AMS 307 Depictions of Racism in American Literature, Music, and Film 3 Credits
Depictions of Racism in American Literature, Music, and Film will study representations of racism in the American arts in historical context. Students will examine artistic representations of practices that disadvantage and disfranchise non-white Americans, with an eye toward understanding the ways America's history of racist practices has prompted responses from American writers, musicians, and filmmakers. **Prerequisites:** CMP 125 or CMP 203 or BHP 150.

AMS 313 Black American Thought 3 Credits
This course introduces students to the critical and constructive nature of Black social and political thought through a survey of Black American leaders, with a focus on ideology, society and politics. Through readings and discussions, students will assess the complexities of various Black leaders and their ideological positions, often comparing and contrasting the attitudes, values and beliefs of Black thought leaders. Through the study of Black American leaders, students will gain an appreciation for the impact of Black history on the past and present of American public life. As we focus our attention on Black leaders of the 19th and 20th century, we will be mindful of the complex ways in which these leaders have agreed and disagreed on themes such as, but not limited to: achievement of Black liberation, direct action versus armed protests, the role of historical memory in modern political life, the economic and political significance of Black culture, and the tensions between Black segregation versus integration, as well as the defining of such core political concepts as citizenship, freedom, equality, progress, power, and justice.

ENG 228 Black American Lit 3 Credits
A survey of writings by black Americans, presented historically from early slave narratives through emancipation, reconstruction, the Harlem Renaissance, and literature from the 1930s to the present. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 229 Multi-Ethnic Literature in America 3 Credits
Surveys the literature of various ethnic groups including African Americans, American Indians, Asian Americans, Hispanic Americans, Jewish Americans and European Americans. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 366 Black and Multi-Ethnic Literature 3 Credits
A Survey of the literary writings of selected writers of Black and Multi-Ethnic America. Writers may include Zora Neale Hurston, Dorothy West, Maxine Hong Kingston, Anzia Yezierska, Louise Erdrich, Don Lee and Amy Tan.

POL 235 Race and Ethnicity in American Politics 3 Credits
Examines the changing political, economic, and social situation of racial and ethnic groups in American politics since the 1950s. Topics include the relationship between race/ethnicity and voting behavior, political parties, and election results. Includes an analysis of specific areas of contemporary racial and ethnic conflict, such as voting rights, immigration, and affirmative action.

POL 365 Politics of the Developing World 3 Credits
Studies the major political issues of the so-called "developing" world. Particular reference to political systems of Africa, Asia, Latin America, and the Middle East according to the relevance of the examples to large conceptual issues, and according to the major interests of the instructor. Typical issues include neocolonial dependency, the role of the state in newly developed countries, military rule and democratization.

SOC 207 Racial and Ethnic Relations 3 Credits
Examines the social origins of prejudice and discrimination, and analyzes intergroup trends in conflict, competition, and cooperation. Considers issues of immigration, economic and political power, and ethnic, racial, and religious pluralism.

SOC 345 Race and Crime 3 Credits
Examines the impact of crime policy on minority communities in the United States, with particular attention to the impact of "The War on Drugs", three-strike laws, and mandatory sentencing on minorities and minority communities. Drawing on sociological research, the course explores myths and realities concerning the relationship between race and crime. The relationship between racial attitudes, historical race relations, and mass incarceration are discussed.
Prerequisite(s): SOC 101.

Allied Health Studies

Program Overview

Designed for working professionals in allied health fields, the Allied Health Studies degree for Continuing Education students allows them to gain the skills and credentials to advance in their field — while balancing both their career and family life.

The experience, skills and compassion an individual brings to his or her job transforms the lives of the patients in one's care every day. But rapid changes in today's health care environment now present allied health professionals with new challenges — and exciting opportunities. The B.S.

in Allied Health Studies program prepares students for these challenges while still training them to be compassionate caregivers and partners.

Curriculum Overview

The curriculum is designed to provide a seamless transition from an Associate degree or a diploma program, building on the students' experiences in allied health professions. Separate clinicals are not required.

Admissions Requirement

- Official transcripts from all institutions attended with a minimum 2.5 cumulative GPA
- Copies of a current/unrestricted license (in any allied health field)

Degree Offered

- B.S. in Allied Health Studies

[1] This course may only be used to fulfill the requirements of a single category.

Courses and Descriptions

BIO 100 Life Science 3 Credits
An introductory course for non-science majors in which students develop an understanding of the nature of science and are introduced to foundational topics in the biological life sciences and how they relate to human affairs. The course may emphasize human evolution, genetics, aging, disease, reproduction, bioethics or other topics in biology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CAS general education curriculum.

BIO 110 Life Science: Inquiry Approach 4 Credits
An introductory course for non-science majors in which students develop an understanding of biological evolution, the molecular basis of heredity, the cell, matter, energy and organization in living systems, and the interdependence of organisms. In addition, students will develop an understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives. Through investigative activities, students will develop an understanding about scientific inquiry and develop abilities necessary to do scientific inquiry. Three hours of lecture and one three-hour lab per week.
Corequisite(s): BIO 110L.

BIO 110L Life Science: Inquiry Approach Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 110.

BIO 115 Principles of Biology I 4 Credits
An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three- hour lab per week.
Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 115.

BIO 206 The Pharmaceutical Industry 3 Credits
An introduction to drug discovery and development. Topics include how drugs are used to diagnose, cure, treat, and prevent disease and how drugs affect body function. The origins of diseases and the early attempts at treatment are also covered. Designed for business majors; does not satisfy requirements for the biology major.
Prerequisite(s): any BIO1XX or BNS1XX or CHE 1XX.

BIO 221 Human Anatomy & Physiology I 4 Credits
A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training. Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor.
Corequisite(s): BIO 221L.

BNS 107 Life Science: Brain and Behavior 3 Credits
An introduction to the biology of the human brain and the rest of the human nervous system. Topics in neuroscience are covered in molecular, cellular, and systematic terms. Additional material is presented on the origins and effects of neurological and psychiatric diseases. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BNS 275 Behavioral Neuroscience 4 Credits
An introductory behavioral neuroscience course including basic neuroanatomy and neurophysiology of movement, ingestive, reproductive, emotional, and learning behaviors. Emphasis is on the structure/function relationships that allow animals to make appropriate physiological and behavioral responses to the environment. Three hours of lecture and one three-hour lab per week.
Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C.

BNS 275L Behavioral Neuroscience Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Prerequisite(s): BIO 115 and BIO 116.

CHE 115 Chemistry & Society 3 Credits
Designed to give the nonscientist an appreciation of the role of chemistry in today's world. The approach is conceptual rather than mathematical. Topics include basic principles of chemical theory, energy sources, elementary organic chemistry, drugs, food additives, polymers, chemistry of living systems, inorganic solids in modern technology, and problems involving pollution of the environment. Three hours of lecture per week. This course satisfies the core requirements for education and business majors.

COM 254 Intro to Health Communication 3 Credits
Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

GLS 325 Global Perspectives on Health and Illness 3 Credits
Explores the different international perspectives on health and illness. Themes include how men, women, and children in respective civilizations are treated and viewed within their communities or nations, as they become ill. Particular attention is given to the contrast between various types of traditional healing and Western medical practices, and their interactions. Discussions will also compare the usefulness of national versus international health agencies in dealing with global health problems.

HTH 205 Introduction to Health Care 3 Credits
This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 215 Population Health Care Management 3 Credits
In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.
Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

HTH 315 Health Care Law, Ethics and Policy 3 Credits
This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system. Students will not receive credit for completing both HTH 315 and BUS 315.

HTH 336 Economics of Health Care System 3 Credits
This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

HTH 491 Health Management Internship 3 Credits
This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.
Prerequisite(s): HTH 205; junior or senior standing; and permission of faculty supervisor.

MKT 380 Health Care Marketing 3 Credits
The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.
Prerequisite(s): MKT 200; junior & senior standing.

NUR 404 Healthcare Policy, Finance, and Regulatory Environments 3 Credits
This course provides a foundation of U.S. healthcare policy, including financial and regulatory policies, as well as the nature and functioning of the U.S. healthcare delivery system. There is emphasis on policy processes at the organizational, local, state, national, and global levels. Learning activities and assignments focus on strategies for learning how to assess the role of the baccalaureate-prepared nurse in policy formation and reformation at all levels, demonstrating understanding of the political process at all levels, developing effective advocacy strategies for vulnerable populations, how to identify and influence key stakeholders in the policy process, the importance of effective communication of key healthcare issues, and how to influence change in the political process at all levels when there is social injustice.

PSY 220 Psychological Disorders 3 Credits
This course covers the major forms of psychological disorders from childhood to adulthood. Topics include the etiology of disorders from biological, social, behavioral, cognitive, and cultural perspectives, as well as diagnostic and treatment considerations.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 345 Health Psychology 3 Credits
This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health-enhancing behaviors such as exercise and nutrition, as well as health-compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 365 Drugs and Human Behavior 3 Credits
Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 374 Psychology of the Family 3 Credits
This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the variety of ways family impacts development across the lifespan.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 382 Aging, Brain, and Cognition 3 Credits
This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 385 Death, Dying and Suicide 3 Credits
Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. Class members will examine difficult and controversial psychosocial issues related to dying and death, death perceptions from childhood through older adulthood, religious and death attitudes, the dying process, living with dying, dying in the American health care system, euthanasia and biomedical issues, pain management, suicide, cross-cultural perspectives on dying and death, the business of dying, the legal aspects of dying, and the bereavement process.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

SOC 247 Aging 3 Credits
The emergence of social gerontology, demographic foundation of aging, the aging process, comparative study of aging and aged, effect of aging on the individual, social institutions and aging, and problems of aging and some solutions.

SOC 346 Health Care and Society 3 Credits
Application and contributions of sociology to medicine; the strategy and methods of sociomedical research; sociology of illness, addictive and mental disorder; medical institutions; health services and medical care; and current status of medical sociology.
Prerequisite(s): SOC 101.

SOC 347 Aging and the Elderly 3 Credits
The emergence of social gerontology, demographic foundation of aging, the aging process, comparative study of aging and aged, effect of aging on the individual, social institutions and aging, and problems of aging and some solutions.

Allied Health Studies Online (CEP or Virtual Campus)

Program Overview

Designed for working professionals in allied health fields, the Allied Health Studies degree for Continuing Education students allows them to gain the skills and credentials to advance in their field — while balancing both their career and family life. This online degree program provides flexibility and convenience to students.

The experience, skills and compassion an individual brings to his or her job transforms the lives of the patients in one's care every day. But rapid changes in today's health care environment now present allied health professionals with new challenges — and exciting opportunities. The B.S. in Allied Health Studies program prepares students for these challenges while still training them to be compassionate caregivers and partners.

Prerequisite(s): any BIO1XX or BNS1XX or CHE 1XX.

BIO 221 Human Anatomy & Physiology I 4 Credits
A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training. Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor.
Corequisite(s): BIO 221L.

BIO 221L Human Anatomy & Physiology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 221.

BNS 107 Life Science: Brain and Behavior 3 Credits
An introduction to the biology of the human brain and the rest of the human nervous system. Topics in neuroscience are covered in molecular, cellular, and systematic terms. Additional material is presented on the origins and effects of neurological and psychiatric diseases. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BNS 275 Behavioral Neuroscience 4 Credits
An introductory behavioral neuroscience course including basic neuroanatomy and neurophysiology of movement, ingestive, reproductive, emotional, and learning behaviors. Emphasis is on the structure/function relationships that allow animals to make appropriate physiological and behavioral responses to the environment. Three hours of lecture and one three-hour lab per week.
Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C.

BNS 275L Behavioral Neuroscience Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Prerequisite(s): BIO 115 and BIO 116.

CHE 115 Chemistry & Society 3 Credits
Designed to give the nonscientist an appreciation of the role of chemistry in today's world. The approach is conceptual rather than mathematical. Topics include basic principles of chemical theory, energy sources, elementary organic chemistry, drugs, food additives, polymers, chemistry of living systems, inorganic solids in modern technology, and problems involving pollution of the environment. Three hours of lecture per week. This course satisfies the core requirements for education and business majors.

COM 254 Intro to Health Communication 3 Credits
Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

GLS 325 Global Perspectives on Health and Illness 3 Credits
Explores the different international perspectives on health and illness. Themes include how men, women, and children in respective civilizations are treated and viewed within their communities or nations, as they become ill. Particular attention is given to the contrast between various types of traditional healing and Western medical practices, and their interactions. Discussions will also compare the usefulness of national versus international health agencies in dealing with global health problems.

HTH 205 Introduction to Health Care 3 Credits
This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 215 Population Health Care Management 3 Credits
In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.
Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

HTH 315 Health Care Law, Ethics and Policy 3 Credits
This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system. Students will not receive credit for completing both HTH 315 and BUS 315.

HTH 336 Economics of Health Care System 3 Credits
This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

HTH 491 Health Management Internship 3 Credits
This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.
Prerequisite(s): HTH 205; junior or senior standing; and permission of faculty supervisor.

MKT 380 Health Care Marketing 3 Credits
The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.
Prerequisite(s): MKT 200; junior & senior standing.

NUR 404 Healthcare Policy, Finance, and Regulatory Environments 3 Credits
This course provides a foundation of U.S. healthcare policy, including financial and regulatory policies, as well as the nature and functioning of the U.S. healthcare delivery system. There is emphasis on policy processes at the organizational, local, state, national, and global levels. Learning activities and assignments focus on strategies for learning how to assess the role of the baccalaureate-prepared nurse in policy formation and reformation at all levels, demonstrating understanding of the political process at all levels, developing effective advocacy strategies for vulnerable populations, how to identify and influence key stakeholders in the policy process, the importance of effective communication of key healthcare issues, and how to influence change in the political process at all levels when there is social injustice.

PSY 220 Psychological Disorders 3 Credits
This course covers the major forms of psychological disorders from childhood to adulthood. Topics include the etiology of disorders from biological, social, behavioral, cognitive, and cultural perspectives, as well as diagnostic and treatment considerations.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 345 Health Psychology 3 Credits
This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health-enhancing behaviors such as exercise and nutrition, as well as health-compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 365 Drugs and Human Behavior 3 Credits
Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 374 Psychology of the Family 3 Credits
This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the variety of ways family impacts development across the lifespan.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 382 Aging, Brain, and Cognition 3 Credits
This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 385 Death, Dying and Suicide 3 Credits
Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. Class members will examine difficult and controversial psychosocial issues related to dying and death, death perceptions from childhood through older adulthood, religious and death attitudes, the dying process, living with dying, dying in the American health care system, euthanasia and biomedical issues, pain management, suicide, cross-cultural perspectives on dying and death, the business of dying, the legal aspects of dying, and the bereavement process.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

SOC 247 Aging 3 Credits
The emergence of social gerontology, demographic foundation of aging, the aging process, comparative study of aging and aged, effect of aging on the individual, social institutions and aging, and problems of aging and some solutions.

SOC 346 Health Care and Society 3 Credits
Application and contributions of sociology to medicine; the strategy and methods of sociomedical research; sociology of illness, addictive and mental disorder; medical institutions; health services and medical care; and current status of medical sociology.
Prerequisite(s): SOC 101.

Applied Behavior Analysis Certificate

Overview

The Certificate in Applied Behavior Analysis (ABA) is designed to provide undergraduate students a depth of academic and practical experience relevant for employment in behavioral technician-and related- jobs immediately after finishing their Bachelor of Arts degree. Moreover, the Certificate in ABA will provide students with a solid foundation for Rider University's Masters in applied psychology program with concentration in Applied Behavior Analysis.

The 17-18 credit certificate includes introductory and advanced courses that focus on ABA (PSY 212, PSY 299), the Experimental Analysis of Behavior (PSY 388), Research Methods in ABA (PSY 339/PSY 339L), and Professional Issues in ABA (PSY 389), as well as engaged learning experience conducting research in ABA (PSY 490), or interning for a school, clinic or agency that uses ABA (PSY 491).

Degree Offered

- Applied Behavioral Analysis Certificate

Applied Behavior Analysis Certificate Requirements

(17-18 credits)

Code	Title	Credits
Required Courses:		
PSY 212	Introduction to Applied Behavior Analysis [1]	3
PSY 299	Field Placement in Applied Behavior Analysis [2]	1
PSY 339 & 339L	Research Methods in Applied Behavior Analysis and Research Methods in ABA Lab	4
PSY 388	Learning and the Experimental Analysis of Behavior	3
PSY 389	Professional Issues in ABA	3
PSY 490	Independent Study: Research and Creative Expression [3]	3-4
or PSY 491	Internship in Psychology	
Total Credits		**17**

1 PSY 212 is waived with RBT certification.
2 PSY 299 is waived if employed full- or part-time in an ABA setting.
3 PSY 490 Independent Study must have an ABA focus; PSY 491 Internship must have an ABA focus. EDU 465 may be used in place of PSY 490 or PSY 491 with an ABA focus.

Certificate Completion
To complete the ABA Certificate Program, students must meet the following requirements:

- A grade of "C+" or better in each course is required for the certificate;
- Completion of a capstone paper from PSY 490/ PSY 491/EDU 465 is required.

Courses and Descriptions

PSY 212 Introduction to Applied Behavior Analysis 3 Credits
Presents a review of classical and operant conditioning, data collection and research design, data analysis and interpretation. In addition, assessment and treatment strategies in a variety of settings, contingency management in institution, classroom and home, systematic self-desensitization, and ethical consideration are discussed.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 299 Field Placement in Applied Behavior Analysis 1 Credits
The practicum provides hands-on experience using the tools of applied behavior analysis in a field setting. Provides supervised field placement experience in an approved institution or agency in order for students to gain knowledge in applications of applied behavior analysis. Placement is made in various community institutions and agencies that offer services to diverse populations.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 212.

PSY 339 Research Methods in Applied Behavior Analysis 4 Credits
This upper-level laboratory course will provide students with an in-depth study of the principles and applications of Applied Behavior Analysis. Students will examine behavioral principles, ethical considerations, and real-life applications of ABA. Each student will design and implement a self-management plan to alter the behavior of their choosing.
Prerequisite(s): (Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and (PSY 212 or PSY 225) and a minimum grade of C in PSY 201.

PSY 339L Research Methods in ABA Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. (Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131) and (PSY 212 or PSY 225) and a minimum grade of C in PSY 201.

PSY 388 Learning and the Experimental Analysis of Behavior 3 Credits
Students will review principles of behavior covered in PSY 212 Intro to ABA (or PSY 225 Learning Theory) and move into more complex concepts and principles of behavior analysis including respondent behavior, respondent conditioning, motivating operations, schedules of reinforcement, and verbal operants. Students will also learn elements of behavior change and specific behavior-change procedures including verbal behavior training, discrete trial training, interventions based on motivating operations and discriminative stimuli, and stimulus equivalence procedures.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 389 Professional Issues in ABA 3 Credits
This course will provide students interested in working in the field of applied behavior analysis at the bachelor's level content based on the task list of the Behavior Analyst Certification Board (BACB) The course covers ethical and professional considerations relevant to the profession of applied behavior analysis as well as ethical and disciplinary standards of the profession. In addition, the course covers behavioral assessment and intervention, competency-based training, and evaluating the effectiveness of behavioral programs. Students will also have the opportunity to read seminal and current research literature on the topics.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits
Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 75 credits.

PSY 491 Internship in Psychology 1-4 Credits
Provides supervised work experience in an approved institution or agency in order for students to gain knowledge in applications of psychology. Placement is made in various community institutions and agencies that offer services to both exceptional and normal individuals.
Prerequisite(s): senior psychology majors or minors.

Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 75 credits.

Arts and Entertainment Industries Management

Program Overview

Arts and Entertainment Industries Management (AEIM) combines a passion for arts and entertainment with the business know-how that keeps these industries strong. Opportunities abound for rewarding management careers in the Music Business, Film & TV Industries, Broadway & Regional Theatre, professional Dance, Symphonies, Galleries, and many more. With nearly five million jobs in AEIM - ranging from Executive Producers, Entertainment Lawyers or Marketing Executives to Funding Leaders, Talent Managers and more - AEIM is a solid career path close to your passion.

For aspiring performing artists, AEIM is a smart complement to your performance degree and can give you career stability when performing gigs falter. What better way to bolster your arts aspirations than with AEIM? With its comprehensive, dynamic curriculum options, vast networking opportunities, professional internships and nearly 100 years combined executive leadership expertise grounding its faculty, Rider affords you the know-how to succeed in this and many other career paths.

Curriculum Overview

The degree requirements within Arts and Entertainment Industries Management (B.A.) encompass a **core AEIM curriculum** of 33 credits (Foundations, Legal Aspects, Fund Development, Marketing & Communications, etc.) **a selected Path** of 9 credits in either Commercial (i.e., Music Business, Film/TV Business, and Broadway) - or Traditional/Institutional (such as nonprofit organizations like Lincoln Center, Carnegie Hall, MoMA, Guggenheim), and **a discipline-based "Emphasis"** of 12 credits which focuses on discipline/industry-specific coursework including required professional Internships.

Rounding out the degree are the general university requirements and several "free elective" credits that let you expand professional skills development and perhaps even pick up a second major or minor. Perfectly-suited second majors or minors often selected include Music Production (p. 402), Theatre-Making, (p. 535) Film & Television (https://www.rider.edu/academics/colleges-schools/college-arts-sciences/communication-media-arts/undergraduate/film-television/), Dance or Dance Science (p. 141), Music and Music Education (p. 394) or other field-related options including Legal Studies (for entertainment law aspirants), Events Planning, and Marketing, to name a few.

Degrees Offered

- B.A. in Arts and Entertainment Industries Management: Commercial/For Profit Path, with multiple "Emphasis" options
- B.A. in Arts and Entertainment Industries Management: Non-commercial/Institutional Path with multiple "Emphasis" options

Related Programs

- Music Production (p. 402)
- Film & Television (p. 877)
- Theatre (p. 535)
- Dance (p. 141) or Dance Science (p. 148)
- Music (p. 385) or Music Education (p. 394)

Arts and Entertainment Industries Management Major Requirements

General Remarks

For all majors offered in the Department of Performing Arts, students must earn a minimum grade of "C" in those courses required in the major area in order to make satisfactory progress. If a grade of "C-" or lower is earned, the student must repeat the course.

To satisfy the major, students must complete the following (54 credits):

- 33 credits from Required Core Courses (p. 41)
- 9 credits from courses in Path 1 or Path 2 (p. 41)
- 12 credits from courses in the Optional Emphasis which aligns with your selected Path (p. 42)

The remaining 66 credits will be earned through completing General Education Requirements (p. 1129) or elective courses. Elective course credits may be used to complete a minor or second major in one of the arts disciplines or related field of interest (i.e., marketing, event planning and production, business administration, etc.

Required Core Courses

(33 credits)

Code	Title	Credits
Complete the following courses:		
AAD 121	Arts Management Foundations	3
AAD 202	Commun/Marketing in Arts	3
AAD 203	Arts Fundraising	3
AAD 204	Arts Outreach & Education	3
AAD 225	Arts Administration Practicum [1]	3
AAD 308	Legal Aspects of Arts & Entertainment	3
AAD 309	Arts Events & Festivals Mgt	3
AAD 315	Arts & Entertainment Industries Professional Development	3
AAD 322	Policy Perspectives on Arts & Entertainment	3
AAD 350	Arts Venue and Patron Services Management	3
AAD 401	New York Arts Network	3
Total Credits		**33**

[1] AAD 225 is a 1-credit course and must be taken three times (Sophomore year Fall, Spring, and Junior year Fall sequence recommended) to satisfy the program requirement.

Select either Path 1 or Path 2

(9 credits)

Path 1: Commercial / For Profit

Code	Title	Credits
Complete the following courses:		
AAD 310	Acquiring & Managing Talent in Arts & Entertainment Industries	
AAD 312	Deal-Making in Arts & Entertainment	
AAD 314	Arts/Entertainment Licensing, Distribution & Commerce	

Path 2: Non-Commercial / Institutional

Code	Title	Credits
Complete the following courses:		
AAD 307	Touring and Production Management	
Complete two AEIM Elective course options from the following: [1]		
AAD 295	Art & Business of Entertainment	
AAD 306	Music Business	
AAD 310	Acquiring & Managing Talent in Arts & Entertainment Industries	
AAD 312	Deal-Making in Arts & Entertainment	
AAD 314	Arts/Entertainment Licensing, Distribution & Commerce	
BUS 210	Intro to Law: Contracts	
CIS 340	Electronic Commerce	
COM 107	Writing for the Media	
COM 212	Digital Publication Design	
COM 261	Introduction to Web Design	
COM 280	Issues in Event Planning	
COM 290	Professional/Strategic Speech	
COM 341	Public Relations Writing and Strategy	
COM 363	Converging Digital Media	
ENG 322	Grant Proposals, Fundraising and Development	
LDP 200	Foundations of Leadership	
MGT 201	Fund Management & Org Behavior	
MGT 310	Intro to Human Resource Mgmt	
MGT 346	Negotiation	
MGT 363	Management Skills	
MKT 330	International Marketing	
MKT 340	Personal Selling	
MUS 312	The Arts Abroad	

[1] Students will choose the courses for this requirement during course selection.

Select one option from either the Commercial Emphasis (p. 42) or the Traditional/Institutional Emphasis (p. 42) that aligns with your selected Path

(12 credits)

Commercial Emphasis Options (Path 1)

Code	Title	Credits
Option 1: Music Industry (record labels, publishers, agencies, etc.)		
AAD 306	Music Business	3
AAD 307	Touring and Production Management	3
AAD 318	Music Publishing	3
AAD 491	Arts Management Internship	3
Option 2: Commercial Theatre (Broadway, Las Vegas, parks, cruise lines)		
AAD 307	Touring and Production Management	3
AAD 491	Arts Management Internship	3
AAD 295	Art & Business of Entertainment	3
One History of Broadway/Commercial Theatre course [1]		3
Option 3: Film and Television Industries		
AAD 295	Art & Business of Entertainment	3
FTV 230	Foundations of Film, Television and Radio	3
FTV 330	Documenting Cultures Through Travel	3
AAD 491	Arts Management Internship	3
Option 4: Sport Entertainment		
AAD 295	Art & Business of Entertainment	3
SPT 250	Introduction to the Business of Sports	3
COM 347	Sports Communication	3
AAD 491	Arts Management Internship	3

Traditional / Institutional Emphasis Options (Path 2)

(12 credits)

Code	Title	Credits
Option 1: Institutional Music (symphonies, operas, etc.)		
Select 3 credits in Music History from the following:		
MUS 105	Survey of Music History I	3
MUS 106	Survey of Music History II	3
MUS 204	Jazz History	3
MUS 205	History of Pop and Rock Part I	3
MUS 206	History of Pop and Rock Part 2	3
MUS 217	Black Music in America	3
Select 6 credits in Music Making or Performing courses from the following:		
MUS 116	Digital DJing	3
MUS 127	Pop, Rock & Hip-Hop Ensemble	1
MUS 128	Choir	1
MUS 129	Contemporary Vocal Ensemble	1
MUS 131	Beginning Piano I	2
MUS 132	Beginning Piano II	2
MUS 201	Skills Ensemble I	1
MUS 213	Digital Composition of Popular Music	3
MUS 216		3
MUS 219		3
MUS 220	Songwriting	3
MUS 301	Skills Ensemble II	1
Complete 3 credits in an industry-specific administrative internship:		
AAD 491	Arts Management Internship [1]	
Option 2: Institutional Theatre (regional theatres, touring, etc.)		
Select 3 credits in Theatre History from the following:		
THE 105	Theatre History to 1700	3
THE 106	Theater History Since 1700	3
THE 206	American Theatre History	3
THE 260	History of Style and Decor	3
Select 6 credits in Theatre Making and/or Performing from the following:		
THE 107	Acting I: Intro to Acting	3
THE 115	Stagecraft	3
THE 118	Visual Imagination	3
THE 127	Theatre Production	1
THE 290	Production II	3
THE 390	Production III [2]	3
THE 317	Scenic Design [2]	3
THE 318	Stage Lighting Design [2]	3
THE 319	Costume Design [2]	3
THE 325	Sound Design [2]	3
Complete 3 credits in an industry-specific administrative internship:		
AAD 491	Arts Management Internship [1]	3
Option 3: Dance (ballet and contemporary dance companies, etc.)		
Complete the following courses (4 credits):		
DAN 350	History of Ballet, Modern & Jazz Dance	3
DAN 151	Pilates and Modern	1
Select 2 credits in dance studio courses from the following:		
DAN 100A	Ballet I [3]	1
DAN 100G	Jazz I [3]	1
DAN 100J	Modern Dance I [3]	1
Select 3 credits in a related Theatre course from the following:		
THE 107	Acting I: Intro to Acting	3
THE 118	Visual Imagination	3
Complete 3 credits in an industry-specific administrative internship:		
AAD 491	Arts Management Internship [1]	3
Option 4: Visual Arts (galleries, museums, etc.)		
Complete the following course (3 credits):		
ART 227	Gallery Management	3
Select one 3 credit Art History course from the following:		
ART 104	Survey of Art History I	3
ART 106	Survey of Art History II	3
ART 207	Medieval and Renaissance Art	3
ART 209	Art of the Baroque	3
ART 214	American Art	3
ART 303	19th Century Art	3
ART 306	Art of the 20th Century	3
Select 3 credits in Creating Art or Graphic Design from the following:		
ART 103	Fundamentals of Drawing	3
ART 105	Design	3
ART 150	Digital Foundations	3
ART 204	Fundamentals of Painting	3

COM 212	Digital Publication Design	3
COM 262	Graphic Imaging for Digital Media	3
COM 265	3D Graphic Animation	3
COM 361	Photography	3
Complete 3 credits in an industry-specific administrative internship:		
AAD 491	Arts Management Internship [1]	3

[1] Two internships are required; one completed in your Path and one in your Emphasis selection.
[2] This course has a prerequisite that must be met first.
[3] Determination of placement in this level or a higher level will be made by the instructor.

Arts and Entertainment Industries Management Minor Requirements

(15 credits)

Any Rider University student may choose to pursue the Arts & Entertainment Industries (AEIM) minor. Interested students should declare the minor by completing a form available in the Department Office.

Code	Title	Credits
Required Courses		**9**
AAD 121	Arts Management Foundations	
AAD 202	Commun/Marketing in Arts	
AAD 203	Arts Fundraising	
AAD Electives		**6**
Select two (totaling 6 credits) of the following:		
AAD 204	Arts Outreach & Education	
AAD 295	Art & Business of Entertainment	
AAD 306	Music Business	
AAD 307	Touring and Production Management	
AAD 308	Legal Aspects of Arts & Entertainment	
AAD 309	Arts Events & Festivals Mgt	
AAD 310	Acquiring & Managing Talent in Arts & Entertainment Industries	
AAD 314	Arts/Entertainment Licensing, Distribution & Commerce	
AAD 320		
AAD 350	Arts Venue and Patron Services Management	
Total Credits		**15**

Academic Plans of Study

The following educational plans are provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Commercial Emphasis Options - Path 1

Commercial Theatre Emphasis (p. 44)
Film and Television Industries Emphasis (p. 44)
Music Business Emphasis (p. 43)

Courses and Descriptions

AAD 121 Arts Management Foundations 3 Credits
A survey course that investigates foundations of institutional vision & mission-building, strategic planning, governance, operations, marketing and fund development for institutions which create, produce and present arts & entertainment. Students conceptualize an arts and/or entertainment business and develop summary business plan and pitch. Though the nonprofit lens is prominent for purposes of understanding the role of fundraising, commonalities in governance, management, branding marketing, community engagement and other aspects relative to both nonprofit and for-profit arts sectors are explored.

AAD 202 Commun/Marketing in Arts 3 Credits
Intended for arts or business majors interested in arts management, this course immerses students in the fundamentals of promoting the arts, from grassroots public relations to basic marketing concepts and applications. Students will have opportunities to interact with professionals in the field and explore career options.
Prerequisite(s): AAD 121 and CMP 125, or permission of instructor.

AAD 203 Arts Fundraising 3 Credits
Provides students with an understanding of the ethics, strategies and practices of fundraising for non-profit arts agencies. Students gain an understanding of the role of the development office in a non-profit arts agency, prepare for careers in arts management by increasing the skills necessary to function, and learn to plan a multi-faceted fundraising campaign effectively.
Prerequisite(s): CMP 120 or CMP 125.

AAD 204 Arts Outreach & Education 3 Credits
This course examines essential educational components of arts institutions, how they evolve and are produced, and will assess the importance of educational programming to arts organizations and the communities they serve.
Prerequisite(s): AAD 121.

AAD 225 Arts Administration Practicum 1 Credits
Under faculty advisement and project site supervision, students complete a total of three, 1-credit (33-hour) "mini-internships" or practicum projects in service to the field, sequentially in the Sophomore Fall, Sophomore Spring, and Junior Fall semesters, simultaneous to Arts Administration Lab. The first practicum project is in connection with Box Office and Patron Service to Rider Performing Arts. The second is in connection with a project of the student's choosing in service to the arts on campus or beyond. The third is in connection with a project of the student's choosing in service to the field in an outside, professional setting.
Prerequisite(s): AAD 121.

AAD 295 Art & Business of Entertainment 3 Credits
Students explore traditional and emerging models in entertainment and the impacts which social media, online service and other emerging platforms continue to have on the evolution of the industry. Students will identify and define pivotal functions and functionaries across all sectors who apply innovation, effective leadership and essential skills to produce and distribute various forms of entertainment to the masses. Through the application of a "wheel of fortune" research & analysis approach to each commercial entertainment sector, students will come to understand the multiple aspects of each (film, television, media, commercial theatre and entertainment in sports), the people who drive them and the critical functions which they serve.
Prerequisite(s): AAD 121, AAD 202 and AAD 203.

AAD 306 Music Business 3 Credits
Survey of the music business. Responsibilities of the label and producer, copyrights, royalties, residuals, publishing, contracts and artist development, promotion, distribution, product management, domestic and international licensing, and related technology.
Prerequisite(s): AAD 121.

AAD 307 Touring and Production Management 3 Credits
Organizing, marketing and managing tours. Responsibilities of the booking agent, tour manager, and performers. Case studies, relationships, contracts with venues, transportation companies, housing, and unions, budgeting, press kits, and insurance.
Prerequisite(s): AAD 121 or permission of instructor.

AAD 308 Legal Aspects of Arts & Entertainment 3 Credits
A survey of legal issues in the arts and entertainment industries, examining the relationship between arts and the law – from cultural property rights to intellectual property, copyright and beyond.
Prerequisite(s): AAD 121.

AAD 309 Arts Events & Festivals Mgt 3 Credits
Students learn to develop, produce, and staff successful arts events while refining planning skills through practice with theoretical and real arts event venues and participating in the production and management of actual events.
Prerequisite(s): AAD 121.

AAD 310 Acquiring & Managing Talent in Arts & Entertainment Industries 3 Credits
This course teaches foundations of professional talent management and explores the many ways by which the role of today's artist manager has evolved and expanded, particularly in an era of "independent" artists seeking managers who can act as CEO's. The course explores the many facets which an artist manager oversees, from launching an artist's career to building a successful and enduring business and fan base. Topics of exploration include talent acquisition, the artist/manager partnership, contracts, strategic planning, branding and more relating to managing all key aspects of an artist's career. Students will gain deep understanding of the dynamic roles which managers and agents play in the entertainment business as the "backbone of our industry" and of the pathways to career success as artist managers & representatives. Aspiring artists will find guidance in self-management and choosing the right partners. Other aspiring entertainment professionals will learn how to effectively engage with artist managers & agents as essential components in the broader ecology of professional arts & entertainment.

AAD 312 Deal-Making in Arts & Entertainment 3 Credits
This course explores all practical aspects of deal-making in commercial entertainment and the art of negotiation as the catalyst for success. Through forensic analysis & discussion of multiple types and structures of short and long-form agreements and the wide variety of provisions to be found therein, students will gain knowledge of key legal, historical, discipline-specific and industry-wide contexts of deal-making. Readings and lectures will focus on the nuts and bolts of negotiation – from essential research processes to finding and exercising bargaining power to knowing when to compromise and when to withdraw. Skills gained will be exercised through role-play, writing and ongoing analysis of peer and professional contracts. Students will gain and exercise deep understanding of agreements across multiple disciplines and the common elements therein including agency, personal management, personal appearance, merchandising, endorsements, creative ownership and union influence will be explored, as well as the unique characteristics which apply to distinct disciplines. For Arts & Entertainment Industries Management majors or minors only except by permission of Dean.

AAD 314 Arts/Entertainment Licensing, Distribution & Commerce 3 Credits
Licensing, distribution and commerce associated with creative output powers nearly every aspect of the arts and entertainment industries as significant brand builders and revenue-generators for intellectual property owners and producers. This course delivers foundational knowledge of the many ways by which music, theater, dance film and other media are licensed for commercial use or otherwise distributed directly to vendors and consumers. Discussion encompasses the various types and purposes of license, key points of negotiation, parties, agreements and business constructs involved in licensing and distribution deals across multiple entertainment sectors, including key elements relating to effective commerce and merchandising of same. Through readings, lectures and case-based analysis students will study the means of directly and indirectly getting works and ancillary content out into the marketplace, as well as the risks and rewards that may result. Through comparative analysis of traditional and contemporary professional agreements, students will come to understand how licensing and distribution contracts, modalities, administration and payments have evolved, and what the future holds for this vital engine of the arts & entertainment industries.

AAD 315 Arts & Entertainment Industries Professional Development 3 Credits
Arts & Entertainment Industries (AEIM) Professional Development is designed to prepare AEIM majors for successful internship and career placement, growth and development. Through this course, AEIM majors will engage in best possible selves vision mission goals and objectives-setting, transferrable skills identification and articulation, resume development, informational and formal interview skills practice and application as well as refine and package their individual portfolios comprised of final projects/portfolios from several prior courses. These and other assets, including personal web-page and social media profile work and editorial bio, will be developed in the creation of a comprehensive professional "toolkit" of assets to aid in their pre-professional and professional career pursuits. Over the course of a semester, students will work on professional communication skills including public speaking, writing, and corresponding etiquette, and interviewing techniques for both in-person and virtual meetings. Students will explore their own strengths and weaknesses through industry-leading personality and professional skills and traits analyses and how to apply them to maximal effect. Industry guests from all arts disciplines will afford "real-world" perspectives and build networking capacity. Restricted to AEIM Majors, Junior standing or above.

AAD 316 Data Analytics in Commercial Entertainment 3 Credits
Data analytics is a driving force of today's entertainment industry as companies face new business models for creating, marketing and distributing creative output to consumers who access content anywhere, at any time and on any device. It is transforming businesses, social interactions and how entertainment is marketed and consumed. With the explosion of social media, entertainment streaming platforms and online distribution, the amount of data available has reached unprecedented levels. Hiring skilled people who know how to collect and interpret big data is crucial. This course explores the many ways by which data is used to develop detailed understanding of consumer preferences and behaviors, inform production, advertising and distribution strategies, forecast performance and help increase efficiency. Students will learn how to retrieve, analyze and apply data for successful outcomes in today's entertainment industry, helping companies seize upon ever-expanding opportunities to utilize data to identify and understand new audiences, increase content exposure and identify new products and services.
Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 318 Music Publishing 3 Credits
This course teaches foundational concepts, context, tools, and function of music publishing as an essential force in today's ever-evolving music industry. Students examine the many roles which the music publisher plays in the acquisition, market development and administration of copyrighted musical works. Through case-based analysis of the inner workings of major, independent and self-owned music publishing companies, students will gain understanding of the depth, breadth and scope of this fascinating aspect of the business. Discussion will encompass the fundamentals of copyright, types of publishing deals, income streams, registrations and collection, foreign sub-publishing deals, and the rights and royalties applicable to copyrighted musical work. Students will also learn how music is licensed for use in film, television, advertising, theatrical performance, game and other forms of interactive media, as well as an overview of the administrative aspects of these uses and the ways by which legislative action impacts opportunities and earnings of copyright holders. Lastly, students will explore the creative and administrative responsibilities involved in establishing their own music publishing company.

AAD 322 Policy Perspectives on Arts & Entertainment 3 Credits
This course delivers foundational knowledge of the historical evolution, current state, and anticipated future of legislative actions, general policies and protocols impacting the many diverse components of arts and entertainment. Students will gain understanding of the several stakeholders, advocates and allies involved in the process of shaping policy and effectuating legislation, from lobbyists and industry leaders to politicians and the constituents whom they represent. Discussion will also encompass the expanding role and reach of the internet and streaming services which have often driven, and too often outpaced legislative agendas, putting the rights and benefits of intellectual property owners at risk through inequitable compensation practices, usurping of rights and expanding of global piracy. Case-based analysis will afford insight into current and anticipated lobbying agendas, legislative action (or inaction) on Capitol Hill, resolutions in process and recent legislation in action. Students will create an advocacy campaign around a pertinent issue facing arts & entertainment today, and strategize an effective lobbying process in order to gain direct insight and inspiration to become lifelong agents for change.
Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 308.

AAD 350 Arts Venue and Patron Services Management 3 Credits
Integrating workplace with organizational mission: administration, staff, general public, artists. Internal control, artist/employee contracts, collective bargaining, health and safety issues, facilities operation, inventory, cultivation and maintenance of clientele and audience.
Prerequisite(s): AAD 121.

AAD 351 Crossing Cultural Borders 3 Credits
Course includes two weeks at an international arts organization, meeting and shadowing administrative staff, studying management styles, finance, and operational procedures, and attending all possible events during the visit. Travel fee required. May be repeated.
Prerequisite(s): Junior standing.

AAD 375 Special Topics: Arts Admin 3 Credits
Intensive study or activity in a specific area of Arts Administration. The content will vary with social/cultural events and/or interests and qualifications of the professor. May be repeated for credit. Fee may be required.
Prerequisite(s): AAD 121 or CBA 110 or permission of instructor.

AAD 401 New York Arts Network 3 Credits
Students learns how arts institutions of varying scope, size and function and how administrators keep them running by spending focused, intensive time with them on their own turf.
Prerequisite(s): AAD 121, AAD 202 and AAD 203.

AAD 490 Independent Research and Study 1-4 Credits
This self-motivated, self-directed course culminates in a complete project. The student and the faculty advisor will mutually develop the scope of each project. It will be designed to demonstrate the student's entrepreneurial skills and provide an opportunity for practical application of the curriculum.
Prerequisite(s): AAD 202, AAD 203, and either AAD 121 or CBA 110.

AAD 491 Arts Management Internship 3-12 Credits
Arts Administration majors are required to spend 13 weeks of on-site participation in a broad range of daily operations at an internship site. In addition, there are group meetings with all students participating in internships and site-analysis assignments given under the direction of Arts and Sciences faculty. Students may enroll for a maximum of 6 credits of internships.
Prerequisite(s): Junior standing.

Behavioral Neuroscience

Program Overview

The Behavioral Neuroscience major educates the next generation of scientists with a foundation in biological sciences and behavioral neuroscience. Students in the behavioral neuroscience major are prepared to join the workforce or attend professional or graduate school. Rider achieves this through small class and laboratory sizes allowing direct, hands-on instruction, and faculty accessibility. Students also have opportunities to do research with faculty via work study or independent study. Each student is assigned a faculty advisor who provides academic advice and career guidance tailored to the student's needs. Areas of professional and graduate study include medical, dental, and veterinary school; allied health programs in optometry, podiatry, physical therapy, occupational therapy, nursing; as well as programs leading to M.S. or Ph.D. degrees in the life sciences; and programs in science education.

Many graduates of the Behavioral Neuroscience program have pursued graduate studies at prestigious institutions including Johns Hopkins University, University of Pennsylvania, Dartmouth College and Cornell University. Others have entered medical school, or have gone on to become educators, surgical assistants, marine biologists, mental health technicians, nurses, behavioral therapists, occupational therapists or physical therapists.

Curriculum Overview

The curriculum for majors has been shaped to prepare students for a life of learning in the sciences. Students are expected to gain knowledge, and develop technical and analytical skills and competency in writing and speaking. Classes include coursework focused on the principles of evolution and diversity, neuroscience, and psychology, among other courses. Rider's faculty are research-oriented, and encourage students to take advantage of the opportunity to engage in internships and research by doing work study, an independent research project and/or a senior thesis. Students also have the opportunity to take part in a three-week internship course through the Capital Health System Hospitals, summer research and other off-campus internships.

Student Learning Outcomes

Graduates of the Behavioral Neuroscience major will be able to:

1. Explain foundational concepts in biological sciences.
2. Apply scientific methods of inquiry through testing of newly formed hypotheses with observation and experimentation.
3. Apply concepts from other disciplines in the analysis and interpretation of biological information.
4. Demonstrate the ability to locate, critically analyze, and communicate relevant scientific information.
5. Explain the ethical practice of scientific research and its societal applications.

Honors Programs

Honors in Behavioral Neuroscience

The objective of the honors program in Behavioral Neuroscience is to introduce talented undergraduate majors to the methods of basic research in behavioral neuroscience. Qualified biology or behavioral neuroscience majors may participate in the Departmental Honors program. For consideration, a student must have at least a 3.25 overall grade point average at the end of their junior year. In the senior year, a student seeking Honors must write and orally defend a written honors thesis based upon their independent research. A candidate who has a 3.25 cumulative average, a 3.5 average in their science courses, and who has completed an acceptable Honors Thesis, will be awarded Honors in Behavioral Neuroscience upon graduation.

Pre-medical, Pre-Dental, Pre-Veterinary and Pre-allied Health Advising Programs

In addition to their academic advisor, students pursuing medical, dental or veterinary school or pre-allied health programs upon graduation from Rider are encouraged to also consult with the department's pre-medical studies advisor. The pre-medical studies advisor is a faculty member who assists pre-medical, pre-dental, pre-veterinary students and pre-allied health students with academic and extra-curricular planning required to become competitive applicants for programs in the health professions.

Rider and Thomas Jefferson University have a long-standing articulation agreement for students who wish to pursue training in the allied health professions. This agreement does not guarantee admission of Rider students into Jefferson's programs; it does mean that Rider faculty members are familiar with Jefferson's academic requirements and that Rider's courses are eligible for transfer to Jefferson.

Rider University offers students with baccalaureate degrees the opportunity to take the undergraduate science course prerequisites for medical, dental, veterinary or graduate school. For more information, visit the Premedical Studies (https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/programs-opportunities/pre-med/) page.

Major Requirements

(51-54 credits)

Departmental Course Repeat Policy (p. 52)

Code	Title	Credits
Required Courses:		
Biology		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab [1]	4
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab [1]	4
Behavioral Neuroscience		
BNS 275 & 275L	Behavioral Neuroscience and Behavioral Neuroscience Lab [1]	4
Select two of the following:		8
BNS 310 & 310L	Neurobiology and Neurobiology Lab	
BNS 360 & 360L	Neurochemistry and Neurochemistry Lab	
BNS 375 & 375L	Neuroethology: Circuits of Behavior and Neuroethology Lab	
Select one of the following		
PSY 100 or BNS 107	Introduction to Psychology Life Science: Brain and Behavior	3
Mathematics		
MTH 105 or MTH 106	Algebra and Trigonometry [2] Precalculus	4

Select one of the following:		3-4
BNS 250 & 250L	Biostatistics and Biostatistics Lab [2]	
ENV 200 & 200L	Statistical and Computer Applications in the Natural Sciences and Statistical and Computer Applications in the Natural Sciences Lab [2]	
PSY 201	Statistics and Research Design (requires PSY 105 prerequisite) [2]	
Chemistry		
CHE 120	Principles of Chemistry	3
CHE 121	Principles of Chemistry Lab	1
CHE 122	Intro to Chemical Systems	3
CHE 123	Quantitative Methods Lab	1
Biology/Psychology Electives		
Select two of the following:		6-8
Upper-level Biology Course		
BIO 215 & 215L	Medical Microbiology and Microbiology Lab	
BIO 260 & 260L	Principles of Biology: Evolution, Diversity, and Biology of Cells and Principle of Biology: Cells Lab	
BIO 265 & 265L	Genetics and Genetics Lab	
BIO 272 & 272L	Intro to Marine Biology and Marine Biology Laboratory	
BIO 300 & 300L	Developmental Biology and Developmental Biology Lab	
BIO 305 & 305L	Animal Physiology and Animal Physiology Lab	
BIO 335 & 335L	Plant Biology and Modern Plant Biology Lab	
BIO 340 & 340L	Evolutionary Biology and Evolutionary Biology Lab	
BIO 350 & 350L	General Ecology and General Ecology Lab	
BIO 370 & 370L	Immunology and Immunology Lab	
BIO 372 & 372L	Behavior of Marine Organisms: Evolutionary Approach and Behavior of Marine Organisms: Evolutionary Approach Lab	
Any PSY 200-level or higher course		
Additional Electives		
Select one of the following:		4
Any additional BNS 300-level course with a lab		
Any PSY 300-level course with a lab		
Any BCH 200 or higher course with a lab		
Senior Capstone Seminar		**3**
Complete one of the following:		
BNS 415	Seminar in Behavioral Neuroscience	
BIO 400	Seminar in Cellular and Molecular Biology	
BIO 420	Seminar in Organismal Biology	
BIO 450	Seminar in Ecology & Evolution	
BNS 490	Independent Study: Research and Creative Expression [3]	
Total Credits		**51-54**

1 Students must earn a grade of "C" or better in this course to meet the major requirements and before enrolling in upper-level courses for which these courses are prerequisites.

2 Students must place into MTH 105 Algebra & Trigonometry or higher level mathematics in order to register for BIO 115, BIO 116 and BNS 275.

3 It is the student's responsibility to arrange an independent study with a faculty member in the Department. To be registered for a BNS 490, the student must complete an independent study form (https://www.rider.edu/academics/academic-support/registrar/forms/) and proposal with the faculty member.

Department of Biology and Behavioral Neuroscience Course Repeat Policy

The following guidelines apply to courses offered by the Department of Biology and Behavioral Neuroscience. Students may repeat any biology (BIO) or behavioral neuroscience (BNS) course once without special permission *unless* they received an unsatisfactory grade (C-, D, F). With an unsatisfactory grade, students need permission from the department chair to repeat a class. They can not register on their own on MyRider. Students with an unsatisfactory grade should email the department chair to request permission to repeat a course. A course will be considered repeated if the student has previously earned a letter grade in the course, or if the student has previously withdrawn from the course after the Friday of the seventh week of classes (previously Withdrawal II or Withdrawal III).

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab	4

BNS 360 Neurochemistry or BNS 375 Neuroethology		
Four Elective Courses [2]		12
	Semester Credit Hours	**16**
Spring Semester		
Biology/Psychology Elective		3-4
BNS 415	Seminar in Behavioral Neuroscience	3
Three Elective Courses [2]		9
	Semester Credit Hours	**15-16**
	Total Credit Hours for Graduation	**122-124**

1 For course placement information see https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing (https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing/)

2 Elective credits may be used to complete requirements in a second major or minor.

3 Natural and Physical Sciences and Mathematics core requirements are included in the major.

Courses and Descriptions

BNS 107 Life Science: Brain and Behavior 3 Credits
An introduction to the biology of the human brain and the rest of the human nervous system. Topics in neuroscience are covered in molecular, cellular, and systematic terms. Additional material is presented on the origins and effects of neurological and psychiatric diseases. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BNS 250 Biostatistics 4 Credits
This course will assist students with acquiring the skills necessary to design, conduct, and interpret research studies. Emphasis will be on learning how to develop experimental designs to translate theoretical concepts into testable hypotheses. Experiments conducted during laboratory sessions will use laboratory mice and will use equipment for measuring animal behavior. Students will gain experience collecting, analyzing, writing and orally presenting their research results. Three hours of lecture and one three-hour lab per week. Prerequisite(s): MTH 105 or higher or placement into MTH 210, grade of "C" or better in one lab science course.
Corequisite(s): BNS 250L.

BNS 250L Biostatistics Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Prerequisite(s): MTH 105 or higher or placement into MTH 210, grade of "C" or better in one lab science course.

BNS 275 Behavioral Neuroscience 4 Credits
An introductory behavioral neuroscience course including basic neuroanatomy and neurophysiology of movement, ingestive, reproductive, emotional, and learning behaviors. Emphasis is on the structure/function relationships that allow animals to make appropriate physiological and behavioral responses to the environment. Three hours of lecture and one three-hour lab per week.
Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C.

BNS 275L Behavioral Neuroscience Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Prerequisite(s): BIO 115 and BIO 116.

BNS 310 Neurobiology 4 Credits
A lecture-laboratory course investigating the structure and function of the nervous system. Lecture topics include organization of the nervous system, neuroanatomy, neurophysiology, neurochemistry, physiology of sensory systems, biological aspects of nervous system diseases, and behavior. Laboratory exercises include study of anatomy of the nervous system, nerve cell recording, modern neuroanatomical techniques, and the neural basis of animal behavior. Three hours of lecture and one three-hour lab per week.
Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C.

BNS 310L Neurobiology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Prerequisite(s): BIO 115 and BIO 116.

BNS 360 Neurochemistry 4 Credits
Examines the fundamentals of neurochemistry, including the neuroanatomical distribution, pharmacology, and functions of neurotransmitters; signal transduction pathways; behavioral and physiological effects of chemicals either used therapeutically to treat biopsychological disorders or that may be abused for their psychotropic effects; and mechanisms and models for the study of drug action. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116, CHE 122, CHE 123 with a grade of C or better in each course.
Corequisite(s): BNS 360L.

BNS 360L Neurochemistry Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Corequiste(s): BNS 360.

BNS 375 Neuroethology: Circuits of Behavior 4 Credits
Neuroethology is the study of the neural and physiological basis of animal behavior. This course focuses on the specific behavioral problems faced by animals in their natural habitats, and the ways in which their nervous systems solve these problems. The mechanisms that underlie complex behaviors such as spatial orientation and navigation, escape mechanisms, and animal communication will be examined, as well as the extraordinary sensory adaptation of organisms to their environments (e.g., echolocation, electroreception, and magnetic reception). The neural control of motor programs and temporally-patterned behaviors will be studied in simpler neuronal systems. Finally, recent cellular and molecular approaches to the study of behavior will be addressed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.
Corequisite(s): BNS 375L.

BNS 375L Neuroethology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BNS 375.

BNS 415 Seminar in Behavioral Neuroscience 3 Credits
Critical analysis of the scientific literature pertaining to current topics in behavioral neuroscience. Topics include mechanisms through which the brain influences physiology and behavior and the integration of nervous and endocrine systems. Three hours of lecture per week.
Prerequisite(s): BIO 115 and BIO 116, junior standing and permission of instructor.

BNS 490 Independent Study: Research and Creative Expression 1-4 Credits
Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BNS 491 Internship in Behavioral Neuroscience 1-4 Credits
A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and should include keeping a journal of activities, a term paper or project report and a poster presentation.
Prerequisite(s): 2.5 GPA and permission of the instructor.

Secondary Education

Program Overview

Since 1913, Rider University's College of Education and Human Services has made a difference in the lives of future teachers with its commitment to excellence. The College of Education and Human Services (CEHS) keeps its programs relevant to the changing needs of students, the professional communities it serves, and society.

The College of Education and Human Services prepares students to be effective educators. CEHS is accredited by the Council for the Accreditation of Education Preparation (CAEP) (http://caepnet.org/), the highest accreditation possible in teacher education and we offer graduates added value and recognition nationwide when seeking employment or admission to graduate study.

Preparation to teach a particular academic subject is accomplished through a program requiring completion of the major requirements of the appropriate liberal arts or science major, general studies, and professional education major requirements.

Curriculum Overview

Areas of study for secondary education at Rider are English education, foreign language education: Spanish, history education, mathematics education, and science education (biochemistry, biology, chemistry, earth sciences, environmental sciences, marine sciences).

In addition, secondary education majors can elect to pursue the following minors, certifications and endorsements: English as a second language; bilingual education; or interdisciplinary minor in special education.

Degree Offered

- B.A. in Secondary Education

Secondary Education Major Requirements

Preparation to teach a particular academic subject in secondary education is accomplished through a program requiring completion of the major requirements of the appropriate liberal arts or science major, general studies and professional education major requirements. In addition to completing these requirements, all Rider University students are required to complete the Engaged Learning (https://www.rider.edu/academics/engaged-learning/about/) requirements.

Second major/options include:

- English Education (p. 55)
- Foreign Language Education: Spanish (p. 56)
- History Education (p. 56)
- Mathematics Education (p. 57)
- Science Education: (Biochemistry (p. 57), Biology (p. 58), Chemistry, (p. 58) Earth Sciences (p. 59), or Environmental Sciences (p. 60))

3 Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465. In addition, students must present evidence of a passing score on the Praxis Content Knowledge for Teaching Assessments Test for their specific subject area six months prior to student teaching (by March 1 for those students applying for student teaching in the fall semester and July 1 for those students applying for student teaching in the spring).

Science Education (Biochemistry) Major Requirements

General Studies and Academic Major
(136 credits)

Code	Title	Credits
CMP 120	Seminar in Writing and Rhetoric	3
or BHP 100	Honors Seminar: Great Ideas I	
CMP 125	Seminar in Writing and Research	3
or BHP 150	Honors Seminar: Great Ideas II	
PSY 100	Introduction to Psychology	3
COM 104	Speech Communication	3
EDU 106	Contexts Of Schooling	3
EDU 206	Developmental Education Psychology	3

Social Science elective	3
Fine Arts elective	3
Foreign language elective [1]	3
History elective	3
Literature elective	3
Philosophy elective	3
Technology elective	3
Total Credits	**39**

Biochemistry Major Requirements
(70 credits minimum)

See the requirements for the Biochemistry major listed in the College of Arts and Sciences section (p. 76).

Professional Education
(27 credits)

Code	Title	Credits
Methodology, curriculum and instruction courses with associated field experiences: [2]		
ELD 385	Teaching Science in the Middle School	3
SED 370	Teaching in the High School	3
SED 410	Teaching Science in Secondary Schools	3
SED 431	Content Area Reading and Writing	3
SPE 300	Inclusive Practices for General Education Teachers	3
Capstone professional semester of full-time student teaching:		
EDU 465	Student Teaching and Seminar [3]	12
Total Credits		**27**

1. For proper course placement please visit this website (https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing/).
2. ALL students must show evidence of having taken and passed all sections of the Praxis Core Academic Skills For Educators Test prior to being able to register for ALL education methods courses.
3. Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465. In addition, students must present evidence of a passing score on the Praxis Content Knowledge for Teaching Assessments test for their specific subject area six months prior to student teaching (by March 1 for those students applying for student teaching in the fall semester and July 1 for those students applying for student teaching in the spring).

Science Education (Biology) Major Requirements

General Studies and Academic Major
(99-101 credits)

Code	Title	Credits
CMP 120	Seminar in Writing and Rhetoric	3
or BHP 100	Honors Seminar: Great Ideas I	
CMP 125	Seminar in Writing and Research	3
or BHP 150	Honors Seminar: Great Ideas II	
PSY 100	Introduction to Psychology	3
COM 104	Speech Communication	3
EDU 106	Contexts Of Schooling	3
EDU 206	Developmental Education Psychology	3
Social Science elective		3
Fine Arts elective		3
Foreign Language elective [1]		3
General Studies Electives		11
History elective		3
Literature elective		3
Philosophy elective		3
Technology elective		3
Total Credits		**50**

Biology Major Requirements
(49-51 credits)

See the requirements for the Biology major listed in the College of Arts and Sciences section (p. 80).

Professional Education
(27 credits)

Code	Title	Credits
Methodology, curriculum and instruction courses with associated field experiences: [2]		
ELD 385	Teaching Science in the Middle School	3
SED 370	Teaching in the High School	3

[1] For proper course placement please visit this website (https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing/).

[2] ALL students must show evidence of having taken and passed all sections of the Praxis Core Academic Skills For Educators Test prior to being able to register for ALL education methods courses.

[3] Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465. In addition, students must present evidence of a passing score on the Praxis Content Knowledge for Teaching Assessments test for their specific subject area six months prior to student teaching (by March 1 for those students applying for student teaching in the fall semester and July 1 for those students applying for student teaching in the spring).

Secondary Education Minor Requirements

Undergraduate secondary education majors can elect to pursue the following minors, certifications and endorsements:

- Bilingual Education (p. 61)
- English as a Second Language (ESL) (p. 61)
- Secondary Education and Interdisciplinary Minor in Special Education (p. 61)

Bilingual Education

Certification in bilingual education is available to secondary education majors in the areas of Math, Science, Social Studies and English who upon completion of the program have demonstrated competence in both English and another language. Candidates for this certification will complete:

Code	Title	Credits
Multicultural Studies elective		3
EDU 320	Introduction to Linguistics and Psycholinguistics	3
EDU 358	Literacy and the Bilingual/Bicultural Child	3
EDU 420	Teaching a Second Language	3
EDU 460	Educating and Evaluating the Bilingual Child	3
Bilingual field experiences are required.		
Language proficiency evaluations are required.		

For information regarding this program please contact:

Maria Villalobos-Buehner, Ph.D.
Associate Professor
Fine Arts 354
609-895-5596
mvillalobos@rider.edu

English as a Second Language

Certification in English as a second language (ESL) is available to elementary and secondary education majors. It may be achieved by an additional 3-6 semester hours by majors in English or foreign language (French or Spanish). All candidates for this certification will complete:

Code	Title	Credits
Multicultural Studies elective		3
EDU 320	Introduction to Linguistics and Psycholinguistics	3
EDU 358	Literacy and the Bilingual/Bicultural Child	3
EDU 420	Teaching a Second Language	3
EDU 460	Educating and Evaluating the Bilingual Child	3
English as a Second Language field experiences are required.		
English proficiency evaluations are required.		

For information regarding this program please contact:

Maria Villalobos-Buehner, Ph.D.
Associate Professor
Fine Arts 354
609-895-5596
mvillalobos@rider.edu

Secondary Education and Interdisciplinary Minor in Special Education

The secondary education interdisciplinary minor in special education curriculum is an additional option for students majoring in secondary education and a content area who wish to effectively work with students with disabilities, particularly in inclusive settings. This program includes the courses required by the New Jersey Department of Education for a Teacher of Students with Disabilities licensure endorsement. The following courses are required for this program:

Code	Title	Credits
SPE 201	Foundations in Special Education and Inclusive Practice	3
SPE 202	Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities	3
SPE 303	Assessment and Instruction for Students with Disabilities	3
SPE 304	Assessment and Instruction in the Inclusive Classroom	3
PSY 212	Introduction to Applied Behavior Analysis	3
PSY 237	Cognitive Disabilities	3
TEC 404	Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities	3

For information regarding this program please contact:

Diane Casale-Giannola, Ed.D.
Professor
Bierenbaum Fisher Hall 102E
609-896-5078
dgiannola@rider.edu

Academic Plans of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

- Secondary Education / Biochemistry (p. 62)
- Secondary Education / Biology (p. 63)
- Secondary Education / Chemistry (p. 64)
- Secondary Education / Earth Sciences (p. 65)
- Secondary Education / English Literature (p. 66)
- Secondary Education / English Writing (p. 66)
- Secondary Education / Environmental Sciences (p. 67)
- Secondary Education / History (p. 68)
- Secondary Education / Mathematics (p.)
- Secondary Education / Spanish (p. 70)

Academic Plan for Secondary Education / Biochemistry

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab	4
CHE 120	Principles of Chemistry	3
CHE 121	Principles of Chemistry Lab	1
CMP 120	Seminar in Writing and Rhetoric	3
MTH 210	Calculus I [1]	4
	Semester Credit Hours	**15**
Spring Semester		
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	4
CHE 122	Intro to Chemical Systems	3
CHE 123	Quantitative Methods Lab	1
CMP 125	Seminar in Writing and Research	3
MTH 211	Calculus II	4
Technology Elective		2
	Semester Credit Hours	**17**
Year 2		
Fall Semester		
BIO 260 & 260L	Principles of Biology: Evolution, Diversity, and Biology of Cells and Principle of Biology: Cells Lab	4
CHE 211 & 211L	Organic Chemistry I and Organic Chemistry I Lab	4
COM 104	Speech Communication	3
PSY 100	Introduction to Psychology	3
Foreign Language Elective [1]		3
	Semester Credit Hours	**17**
Spring Semester		
BIO 265 & 265L	Genetics and Genetics Lab	4
CHE 214 & 214L	Organic Chemistry II and Organic Chemistry II Lab	4
EDU 106	Contexts Of Schooling [2]	3
EDU 206	Developmental Education Psychology [2]	3
Technology Elective		1
History Elective		3
	Semester Credit Hours	**18**
Year 3		
Fall Semester		
BCH 325	Biochemistry	3
BCH 326	Biochem and Enzymology I Lab	1
CHE 250 & 250L	Quantitative Analysis and Statistics Methods and Quantitative Analysis and Statistical Methods Lab	4
PHY 200 & 200L	General Physics I and General Physics I Lab	4
SPE 300	Inclusive Practices for General Education Teachers [3]	3
Social Science Elective		3
	Semester Credit Hours	**18**
Spring Semester		
BCH 330	Biochemistry II	3
BCH 331	Biochemistry II Lab	1
ELD 385	Teaching Science in the Middle School [4]	3
PHY 201 & 201L	General Physics II and General Physics II Lab	4
SED 431	Content Area Reading and Writing	3
Literature Elective		3
	Semester Credit Hours	**17**
Year 4		
Fall Semester		
BCH 490	Independent Study: Research and Creative Expression	1-4
CHE 305	Physical Chemistry I	3
SED 370	Teaching in the High School	3
SED 410	Teaching Science in Secondary Schools [5]	3
Advanced Elective Course [6]		1-4
Advanced Elective Course [6]		1-4
Fine Arts Elective		3
Philosophy Course		3
	Semester Credit Hours	**18-27**
Spring Semester		
EDU 465	Student Teaching and Seminar [7]	12
	Semester Credit Hours	**12**
	Total Credit Hours for Graduation	**132-141**

[1] For proper course placement please visit this website (https://www.rider.edu/about/offices-services/transition-programs/new-student-orientation/placement-testing/). (http://www.rider.edu/offices-services/orientation/course-placement/)

[2] EDU 106 and EDU 206 must be taken concurrently in either the fall or spring of the second year.

[3] Special Education minors should replace this course with a General Studies Elective.

[4] ELD 385 is offered in spring semester only.

[5] SED 410 is offered in fall semester only.

[6] Five or more credits of upper level courses required. At least two of the five credits must be connected to laboratory courses.

[7] Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465 (http://catalog.rider.edu/search/?P=EDU%20465). In addition, students must present evidence of a passing score on the Praxis Content Knowledge for Teaching Assessments test for their specific subject area six months prior to student teaching (by March 1 for those students applying for student teaching in the fall semester and July 1 for those students applying for student teaching in the spring)

Academic Plan for Secondary Education / Biology

[3] Special Education minors should replace this course with a General Studies Elective.

[4] ELD 385 is offered in spring semester only.

[5] SED 410 is offered in fall semester only.

[6] Advanced Laboratory course: a total of four lab credits required.

[7] Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465. In addition, students must present evidence of a passing score on the Praxis Content Knowledge for Teaching Assessments test for their

specific subject area six months prior to student teaching (by March 1 for those students applying for student teaching in the fall semester and July 1 for those students applying for student teaching in the spring).

Academic Plan for Secondary Education / Earth Sciences

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

In addition, students must present evidence of a passing score on the Praxis Content Knowledge for Teaching Assessments test for their specific subject area six months prior to student teaching (by March 1 for those students applying for student teaching in the fall semester and July 1 for those students applying for student teaching in the spring).

Courses and Descriptions

EDU 101 First Year and Transfer Education Seminar 1 Credits
First year/transfer seminar provides an engaging orientation to the undergraduate teacher education program at Rider University. During this course, students new to the Department of Teacher Education will explore their beliefs about teaching, learning and school. This focus will be broken into four areas of inquiry that include: (a) What knowledge is of "greatest worth" for educators? (b) What is the purpose of a policy and who gets to make the decisions? (c) What is a "safe" school? (d) What role do unions and professional communities play in the lives of educators and children?.

EDU 106 Contexts Of Schooling 3 Credits
Students in this field-based course will begin to examine aims, practices, and contemporary issues of schooling in their historical, sociological, philosophical, and futuristic contexts and from the perspectives of various multicultural constituencies-- students, parents, local community, wider economic community, government, and the profession. In doing so, they will begin to develop professional skills of observation, reflection, analysis, and argument. This course must be taken concurrently with EDU 206. A cumulative GPA of 2.75 is required.

EDU 206 Developmental Education Psychology 3 Credits
This field-based course focuses on: a) the cognitive, personality, social, creative, and moral development of children and adolescents; b) influential theories, concepts, and research findings of educational psychology; and c) the translation of psychological theory into classroom practices. This course must be taken concurrently with EDU 106. A cumulative GPA of 2.75 is required.

EDU 310 Introduction to STEM Education 3 Credits
STEM (Science, Technology, Engineering, and Math) in an educational context refers to teaching and learning that integrates science, technology, engineering, and mathematics. This course aims to provide experience with teaching approaches that promote a more holistic and interdisciplinary understanding of STEM, encouraging preservice teachers to explore real-world problems and develop critical thinking and problem-solving skills. Additionally, it aims to introduce pre-service teachers to some of the best practices of STEM teaching and provide opportunities to practice these approaches.

EDU 320 Introduction to Linguistics and Psycholinguistics 3 Credits
This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester. A cumulative GPA of 2.75 is required. NOTE: This course is cross-listed with FLE 320. Students cannot get credit for both FLE 320 and EDU 320.

EDU 358 Literacy and the Bilingual/Bicultural Child 3 Credits
Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

EDU 420 Teaching a Second Language 3 Credits
This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. A cumulative GPA of 2.75 is required. *NOTE: This course is cross-listed as FLE 420. Students cannot get credit for both FLE 420 and EDU 420.
Prerequisite(s): EDU 106 with a minimum grade of C+ or EDU 106 with a minimum grade of TR and EDU 206 with a minimum grade of C+ or EDU 206 with a minimum grade of TR.

EDU 451 Special Topics in Education 1-6 Credits
Student teachers, graduate interns, Rider faculty, cooperating teachers, and building-level administrators will engage in collaborative study of a topic through reading, writing, discussion, observation, and reflection on their work in classrooms. Work in these seminars will help student teachers synthesize knowledge from their professional courses and all participants extend their understanding of a particular topic pertaining to teaching. Teacher research methods will be employed as participants analyze their own teaching through perspectives of the seminar topic. Topics will vary each semester. This course is dual-listed for undergraduate and graduate credit. Enrollment is limited to students concurrently enrolled in student teaching and to cooperating teachers and principals working with them.

EDU 460 Educating and Evaluating the Bilingual Child 3 Credits
An examination of the historical, legal, and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing, and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study. A cumulative GPA of 2.75 is required.

EDU 465 Student Teaching and Seminar 12 Credits
A full-time program for seniors providing practical teaching experience in an accredited elementary or secondary school. Under the direct supervision of the cooperating teacher, student teachers are responsible for the planning of lessons and for teaching in their areas of specialization and for developing a high level of teaching competency. Supervisors from Rider observe the student teachers at work, confer with the cooperating teachers and student teachers, and evaluate the growth of the student teachers throughout the internship period. Special topics are considered in seminars held in conjunction with student teaching. These topics include school health and substance abuse, school law, teacher certification and placement, classroom management, mainstreaming, professionalism, and other topics deemed appropriate by the faculty and student teachers.
Prerequisite(s): 1. Satisfactory completion of junior-level professional courses; 2. Cumulative GPA of at least 3.0 prior to commencing the semester in which student teaching is to be completed; 3. All professional education courses, with the exception of those taken concurrently with student teaching, must be completed with a grade of "C +" or better; 4. A candidate for student teaching must be approved by the education division and the coordinator of student teaching. There is an additional fee for Student Teaching.

EDU 477 International Student Teaching 3 Credits
This course provides an immersion opportunity for student teachers to learn about the different cultures and the education system of other countries while living and teaching abroad. Students will explore topics such as global awareness, international curriculum, global educational issues, and pedagogy to support diverse student needs. Through seminar discussion, research, observation, reflection and practical experience, students will develop and share their understanding of diversity in an international setting to increase global awareness, inclusive practice, and professional skills to develop a culturally responsive classroom. A fee is required for this course.
Prerequisites: 3.25 GPA, letter of recommendation, successful completion of required PRAXIS exams, interview, essay, and successful completion of local student teaching. POI required.

ELD 128 Developing Mathematical Ideas for Elementary School Teachers 1 Credits
Prospective teachers will examine the mathematics content and curriculum that is taught in grades K-6, focusing upon the multi-layered aspects of the topics that successful elementary teachers need to understand profoundly in order to provide appropriate instruction. There will be a series of topics selected from those that have historically been especially difficult for teachers to thoroughly understand at the depth needed to teach effectively. Some of the topics may vary each semester.

ELD 307 Foundations of Early Literacy, K-3 3 Credits
This course introduces students to the development of literacy in young children, beginning in kindergarten and continuing through the early elementary grades. Students will learn what research has revealed about how young children develop the insights, skills, and conceptual knowledge that enable them to successfully learn to read and write. Students will learn to support young learners and prompt the development of foundational skills in phonemic awareness, phonics, fluency, vocabulary, comprehension, and writing. In addition, the course examines the relationship between oral language and literacy and the role motivation and social contexts play in literacy learning. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 308 Fostering Literacy and Language Development Across Disciplines 3 Credits
Explores evidenced based practices for literacy instruction in grade 3-6. Students study foundational reading and writing skills alongside theories and practices of motivation and engagement to support literacy and language development and learning. Students learn assessment measures for identifying individual literacy learning needs and methods for organizing instruction that includes access to diverse texts and resources to support all learners. Threaded throughout the course is the importance of understanding and supporting the diverse linguistic, cultural and learning experiences of students and communities and the awareness of how children comprehend and construct text across multiple modalities. Disciplinary literacy strategies children access for success across content areas are studied. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206; ELD 307.

ELD 350 Early Adolescence 1 Credits
This course will focus on common dilemmas faced by young people as they move from childhood into adolescence. It will examine age-related differences between children and adolescents and consider ways to create stimulating environments that fit this developmental transition. Representations of adolescence in the media and in research will be compared, including common stereotypes.

ELD 355 Teaching in the Inclusive Middle School Classroom 1 Credits
This course will highlight the legal and ethical responsibilities of general education teachers in the middle school classroom. The special education process will be discussed and methods to address special needs in the classroom will be shared. Strategies to differentiate instruction and work collaboratively with school community members will help pre-service teachers develop and implement effective instruction that meets diverse needs in the middle school inclusive classroom.
Prerequisite(s): EDU 106 and EDU 206 and a cumulative GPA of 2.75 is required.

ELD 360 Structure and Culture of Middle School Classroom 1 Credits
This course focuses on the teaching of those concepts critical to the understanding of the structure and culture of middle school education. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 375 Methods of Teaching Mathematics in Elementary Classrooms 3 Credits
This course focuses on the teaching of mathematics that is developmentally appropriate for students from nursery to grade eight. In keeping with ACET, NAEYC, and NCTM Standards, emphasis is placed on planning for and implementing an integrated curriculum approach, discovery learning, hands-on experience, theme cycles, use of technology, and traditional and non-traditional assessment strategies. Field experiences will consist of classroom observations and teaching individuals and/or small groups of students. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206, MTH 102 or MTH 105 or MTH 150 or MTH 210.

ELD 376 Teaching Science, Social Studies and the Arts N-6 3 Credits
This course focuses on methods and materials of instruction in science, social studies, and the arts that are developmentally appropriate for students in preschool through grade six (based on NCSS, NSTA, and NAEA Standards). Emphasis is placed on an integrated approach to curriculum, with lesson and unit planning activities that incorporate hands-on-experiences, discovery learning and traditional and non-traditional assessment strategies. Field experience will consist of observation and analysis of classroom instruction and the teaching of lessons to individual and/or small groups of children. A cumulative GPA of 2.75 is required.
Prerequisite(s): ELD 307 and ELD 375.

ELD 380 Methods of Teaching Mathematics in the Middle School 3 Credits
This course focuses on the teaching of mathematics that is developmentally appropriate for students in grades six through eight. In keeping with the National Council of Teachers of Mathematics (NCTM) Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experience, use of technology, and traditional and non-traditional assessment. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 385 Teaching Science in the Middle School 3 Credits
This course focuses on the teaching of sciences that is developmentally appropriate for students in grades six through eight. In keeping with the National Science Education Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experiences, use of technology and traditional and non-traditional assessment strategies. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 390 Teaching Social Studies in the Middle School 3 Credits
This course focuses on the teaching of social studies that is developmentally appropriate for students in grades six through eight. Its focus will explore understanding of United States history, geography and civics from the perspective of the middle school. The course emphasizes the ten themes of social studies as developed by the National Council for the Social Studies. In addition to the facts, concepts and generalizations encompassed by the ten themes, the course works with academic, social, thinking and citizenship skills. The required, intensive field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 395 Literacy Learning in the Middle School 3 Credits
This course focuses on the teaching of literacy that is developmentally appropriate for students in grades six through eight. It explores processes in reading, writing, speaking, listening and viewing, relationships among the language arts and other subject areas, and the development of critical literacy and cognitive strategies. The intense field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 490 Independent Study: Research and Creative Expression 1-6 Credits
Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hour's credit to be assigned is determined by the department.

SED 370 Teaching in the High School 3 Credits
This field-based course focuses on general pedagogy in grades nine through 12. Emphasis will be on generic teaching approaches, planning lessons and developing units of study, learning styles, issues and techniques of evaluation, and multiculturalism. Working in local high schools, students continue observing and begin teaching lessons in their subject area specialization. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

SED 400 Teaching English Language Arts in the Secondary School 3 Credits
Students preparing to teach English in middle schools and senior high schools explore strategies for the imaginative teaching of literature, poetry, drama, grammar, composing processes, vocabulary, and oral language use. Students research, develop, and critique thematic units, analyze curriculum, and study the selection, development, and use of a wide variety of teaching materials. Traditional and alternative methods of assessment are explored. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

SED 405 Teaching Social Studies in Secondary Schools 3 Credits
The theoretical foundations of teaching social studies in junior and senior high schools. Basic goals and aims of social studies instruction are studied, and specific methodological techniques are described and practiced. Demonstration lessons are prepared and presented. Considers typical problems with which teachers are confronted. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

SED 410 Teaching Science in Secondary Schools 3 Credits
Classroom interaction analysis systems are utilized in the study of the teaching-learning process. Students develop their own repertoire of teaching strategies. Emphasis on the investigation and interpretation of recent curriculum developments, and the use of the laboratory in science instruction. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

SED 415 Teaching Mathematics in Secondary Schools 3 Credits
The critical analysis of the aims of teaching mathematics in the secondary school; review of recent research in the content and teaching of mathematics by individuals and groups; demonstration lessons (reflective teaching) to illustrate techniques of teaching; the planning of lessons; selection and organization of materials and subject matter; and evaluation of lesson presentation. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

SED 431 Content Area Reading and Writing 3 Credits
Explores theoretical and methodological issues concerned with teaching reading and writing within content area classes. Students analyze junior high and high school textbooks and other reading materials, study methods of adjusting instruction to varying reading and writing needs of students, prepare directed reading activities in their specific content areas, and use informal diagnostic reading tools. Included is the preparation of content area writing assignments and the evaluation of student writing as well as the teaching of study skills? Emphasis throughout is on the integration of reading and writing into secondary school subject classes. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

SED 490 Independent Research and Study 1-6 Credits
The outline for study must be accepted by the professor and approved by the department. The semester hours credit to be assigned is determined by the department.

SPE 201 Foundations in Special Education and Inclusive Practice 3 Credits
This course emphasizes the foundations of special education and introduces students to inclusive practice. Philosophical, historical, and legal foundations of special education and characteristics of students with disabilities will be examined. Students will learn the components of an Individualized Education Program (IEP), how to adapt learning environments and curricular materials, as well as how to select and implement modifications for students with disabilities. Inclusive educational practices including communication, coteaching, and collaborative partnerships will be addressed through case studies and fieldwork. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours.
Prerequisite(s): A cumulative GPA of 2.75 is required.

SPE 202 Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities 3 Credits
This course is designed to examine the characteristics of individuals with Autism Spectrum Disorder (ASD) and strategies to support their academic, communication, and social/behavioral growth, including the use of assistive technology and positive behavioral supports. Methods and strategies for ASD and other low incidence disabilities will be explored. Through active participation in class and field sites, students will become aware of the various social issues related to family, education, transition, community resources and work experiences of individuals with these disabilities. Students will be required to complete a minimum of 30 weekday field hours in addition to regularly scheduled class hours.
Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 210 Global Encounters 3 Credits
This course is an international learning experience focused on exploring educational opportunities in the United States and abroad. Students will study the history, policy and practice of special education in the United States and compare it with another country and culture first hand, through lectures, school visits and reflection. Current strategies and challenges of educators and families supporting individuals with disabilities will be examined. Through this cross-cultural experience, students will broaden perspectives and develop cultural awareness, knowledge, and understanding of diversity. This course is open to all students and disciplines. There are no prerequisites.

SPE 300 Inclusive Practices for General Education Teachers 3 Credits
This course is designed to introduce preservice general education teachers students to special education and the inclusive classroom. Students will explore current issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours. Prereqisite(s): EDU 106 and EDU 206. A cumulative gpa of 2.75 is required.

SPE 303 Assessment and Instruction for Students with Disabilities 3 Credits
This course will emphasize the relationship between assessment and instructional design and implementation. Coursework includes the evaluation, selection, development, and adaptation of standardized, normreferenced, and functional assessments, such as a Functional Behavioral Assessment (FBA) and Ecological Assessment. Strategies to support literacy instruction for students with disabilities will be examined. Transition planning, program development, and agencies available to support students with disabilities and their families will be explored. This course requires a field experience in order to help students apply theory to practice.
Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 304 Assessment and Instruction in the Inclusive Classroom 3 Credits
This course will emphasize assessment, planning, and instructional design to maximize the learning of all students, including those with exceptional learning needs, in the inclusive classroom. Students will have the opportunity to explore a variety of instructional strategies to meet the needs of diverse learners. Organization of learning environments and the collaborative process, including co-teaching models, will be utilized to design a long-term unit plan. This course requires a field experience in order to help students apply theory to practice.
Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 305 Assessment and Instruction for Students with Autism Spectrum Disorders 3 Credits
Through this course, teacher candidates will learn both theories related to teaching students with Autism Spectrum Disorder (ASD) as well as best practices in the classroom related to academic instruction, as well as emotional, behavioral, and communicative interventions. This course also includes a field component, in which teacher candidates are expected to complete 10 hours of observation in a classroom with students with ASD. The course begins by examining the characteristics of the disability, causes, early warning signs, diagnostic procedures, and early intervention practices. Specific practices related to instruction and intervention as well as how to best structure a classroom for students will be examined. Teacher candidates will receive instruction in a variety of strategies and practices, even those that do not yet qualify as EBPs, as well as their theoretical underpinnings. Strategies for communicating effectively and efficiently with parents, as well as the most current and/or special issues in the field will also be discussed. Issues related to post-secondary transition will also be examined.
Prerequisites: A cumulative GPA of 2.75 and SPE 201.

TEC 200 Google© Educator Level One Training 3 Credits
This course will provide the skills and knowledge for pre-service teachers in undergraduate education to successfully take the Google© Educator Level One Exam.

TEC 201 Internet Ethics 1 Credits
This course focuses on using the Internet to explore and reflect on current ethical issues involving technology. These include individual privacy, legal issues such as fair use and copyright laws, and social issues such as bullying and social networking. Students will explore these topics using a variety of search engines and will reflect on the information found in terms of its impact on society as well as its appropriate uses in personal life, education and business. Pass/fail.

TEC 202 Smartboard 1 Credits
This course is designed to provide an opportunity for students to become familiar with the features and applications of Smartboard, an interactive whiteboard that can be used in classrooms and professional presentations. Students will gain experience using the touch screen and in integrating the features of the program into learning and professional materials. Pass/fail.

TEC 203 Desktop Publishing and Web Page Design 1 Credits
This course provides students with the ability to use desktop publishing software to create materials suitable for use in classrooms, professional settings, and personal use, and with the ability to design web pages. The course is appropriate for anyone who will be involved in designing classroom and student publications and for those who will use web pages in their teaching or personal lives. Discussion will be held on how to use desktop publishing and web page design in elementary and secondary school settings. A project involving application of various desktop publishing and web page design techniques will be completed and demonstrated to the class. Pass/fail.

TEC 204 Electronic Spreadsheets and Classroom Management Software 1 Credits
Basic electronic spreadsheet concepts and applications are taught using a major spreadsheet program. Topics include writing basic formulas, copying formulas, playing “What If,” customizing a worksheet, and printing a spreadsheet. Discussions will be held on how to integrate spreadsheets into elementary and secondary classes and activities. Pass/fail.

TEC 206 Teaching and Presenting with Technology 1 Credits
This course covers designing, planning, and using technology enhanced instruction and presentations. Group assignments will enable students to explore uses of technology to enhance instruction and presentations. Collaboration will be encouraged when discussing the efficient and effective use of technology. Three collaborative group reports will be submitted dealing with discussion questions and chapter topics. Appropriate web sites and programs will be visited. Students will design a final original application that could be used to create motivation and visual learning in a specific classroom or other professional setting related to their major areas of study. Emphasis will be given to technology integration strategies. A final oral presentation of individual projects will be given.

TEC 207 Social Media for Education 3 Credits
Social Media for Education will introduce students to the structure and culture of social media and how social networking applies to the educational environment. This three-credit course will foster a deep understanding of how social media in education can benefit students, teachers, administrators, staff, and stakeholders.

TEC 307 Concepts Instuct Media & Tech 3 Credits
Designed to provide the student with familiarity and appreciation of the role of educational technology in the workplace as it applies to students, teachers, administrators, and trainers. The student will explore the Internet, various educational multimedia, distance learning, virtual reality environments, learning theories, and integration models. Appropriate developmental/reflective strategies will be incorporated with instruction. Although multimedia microcomputers will be utilized throughout the course, prior microcomputer knowledge and experience is not a critical element. Multimedia expertise will be developed as the course progresses.

TEC 308 Digital Tools for Teaching 3 Credits
Designed to enable the student to develop instructional presentations utilizing the advantages of multimedia technology. Each student will be required to create a multimedia portfolio that contains information presentations, cumulative records, presenter notes, work samples, photo library, video animation, and audio narration. Cooperative learning strategies will be utilized throughout the course. Developmental/reflective strategies will include self-reflection, peer feedback, and interaction with the instructor in class and via E-mail. Expertise will be developed as the course progresses.

TEC 309 Instruct Media/Technology Management 3 Credits
Designed to develop technology management skills that can be used for individual classrooms, training centers, subject area specializations, grade levels, school laboratories, curriculum integration, administrative functions, system networks, community services, communication systems and connecting linkages between educational/work environments and home. Various management strategies will be explored and each student will have an opportunity to design, via a multimedia microcomputer, an instructional technology system of their choice along with a management plan. Cooperative learning strategies will be utilized throughout the course. Developmental/reflective strategies will include self-reflection, peer feedback, and interaction with the instructor in class and via E-mail.
Prerequisite(s): At least six semester hours of technology courses or modules.

TEC 404 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits
This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners.
Prerequisite: SPE 201 or SPE 300.

TEC 407 New Literacies for New Learning 3 Credits
As we consider the rapid expansion of information and text it is timely to take a critical view of what literacy means and how it is influencing children's literacy development and the work of educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

TEC 490 Independent Research and Study 1-6 Credits
Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hours credit to be assigned is determined by the department.

Biochemistry

Program Overview

Students in the biochemistry major will find themselves taking part in small classes that encourage close and frequent interaction between students and professors, helping to create a stimulating learning environment.

Students in this major are offered abundant research opportunities (https://www.rider.edu/academics/colleges-schools/college-arts-sciences/science-technology-math/faculty-departments/earth-chemical-sciences/student-research/) both during the academic year and during the summer months. Faculty are engaged in research projects which lend themselves to undergraduate participation. In tackling the challenge of advanced and independent laboratory work, students begin to understand the nature of science and the scientific method. Participation in research by all students is strongly encouraged, as it builds a greater appreciation of the nature of their chosen field. The opportunity to perform independent research has motivated many students to continue their education either in an accredited graduate program or in a professional school in a number of medical fields.

Often, faculty and students jointly present their research results at national professional meetings, the Rider Independent Scholarly Research & Creative Activities Presentations (ISCAP) Day, or as written research papers submitted to scholarly journals.

Curriculum Overview

Core chemistry classes include one year of general chemistry, one year of organic chemistry, one year of biochemistry, three semesters of general biology and courses in quantitative analysis, physical chemistry and genetics.

Students also must earn advanced course credits at the 300 level or above in chemistry, biochemistry, biology or behavioral neuroscience. Independent research, BCH 490, is also a requirement of the biochemistry major.

Student Learning Outcomes

Graduates of the Biochemistry major will demonstrate the ability to:

1. Apply their chemical knowledge and make predictions about the outcome of fundamental chemical processes.
2. Generate and interpret raw data from standard research instrumentation and computational tools.
3. Utilize databases to locate relevant primary literature articles and evaluate the validity of resources.
4. Communicate data and advanced chemical concepts via meaningful and effective representations in both oral and written forms.

Degree Offered:

- B.S. in Biochemistry

Biochemistry Major Requirements

(70 credits)

Code	Title	Credits
Required Courses:		
Biology		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab	4
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	4
BIO 260 & 260L	Principles of Biology: Evolution, Diversity, and Biology of Cells and Principle of Biology: Cells Lab	4
BIO 265	Genetics	4
Chemistry		
CHE 120 & CHE 121	Principles of Chemistry and Principles of Chemistry Lab	4
CHE 122 & CHE 123	Intro to Chemical Systems and Quantitative Methods Lab	4
CHE 211 & 211L	Organic Chemistry I and Organic Chemistry I Lab	4
CHE 214 & 214L	Organic Chemistry II and Organic Chemistry II Lab	4
CHE 250 & 250L	Quantitative Analysis and Statistics Methods and Quantitative Analysis and Statistical Methods Lab	4
CHE 305	Physical Chemistry I	3
BCH 325	Biochemistry	3
BCH 326	Biochem and Enzymology I Lab	1
BCH 4XX - Advanced 400-level Biochemistry Elective		3
BCH 430	Advanced Lab Techniques in Biochemistry.	1
BCH 490	Independent Study: Research and Creative Expression	3
Mathematics		**8**
MTH 210	Calculus I	
MTH 211	Calculus II	
Physics		**8**
PHY 200 & 200L	General Physics I and General Physics I Lab	
PHY 201 & 201L	General Physics II and General Physics II Lab	
Upper Level Electives		**4**
Students must take 4 more credits of upper level courses. These are courses at 300 level or above in BCH, CHE, BNS, or BIO (excluding extra credits in Independent Research and Study). At least one of the four credits must be connected to a laboratory course.		
Total Credits		**70**

Students wishing an ACS-certified degree in Biochemistry will need to take at least one additional course and four additional lab credits in chemistry or biochemistry. The additional requirements should be discussed with their academic advisor and/or the Department Chair.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

[1] For course placement information see https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing (https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing/)

[2] Please note that elective credits may be used to complete requirements in a second major or a minor.

Courses and Descriptions

BCH 325 Biochemistry 3 Credits
Outlines the chemistry and biological function of carbohydrates, proteins, lipids, nucleic acids, vitamins, and enzymes, and introduces enzyme kinetics and biological energetics. Degradative metabolic pathways of carbohydrates and lipids, and their controlled interrelationships are discussed in detail.
Prerequisite(s): CHE 122, CHE 214 with a minimum grade of D.

BCH 326 Biochem and Enzymology I Lab 1 Credits
The laboratory work illustrates techniques and methods essential to the biochemist. Methods for quantification of proteins, purification of enzymes and determination of their kinetic parameters, polarimetry, and structure proof of carbohydrates. The lab must be taken concurrently with BCH 325 by biochemistry and biology majors, but is optional for others.
Prerequisite(s): CHE 123, CHE 214.

BCH 400 Advanced Biochemistry. 3 Credits
Continuation of Biochemistry I. Includes molecular analysis of biological membrane structure and function and a molecular level analysis of information flow from DNA through RNA to proteins. Other topics include mechanisms of hormone action and an expansion on metabolic concepts.
Prerequisite(s): BCH 325.

BCH 410 Metabolism and Bioenergetics 3 Credits
An examination of principles of energetics and chemical transformations as they pertain to metabolism. Students will explore general issues of bioenergetics and will delve into biochemical pathways of catabolism and anabolism of biological molecules, including key nutrients, and xenobiotic compounds, including drugs and toxins. Attention will be placed on the enzymes and cofactors that mediate critical metabolic transformations, and students will use the scientific literature to investigate mechanisms of regulation and integration of metabolic pathways as well as consequences of aberrant enzyme function to human disease.
Prerequisite(s): BCH 325.

BCH 415 Signal Transduction 3 Credits
Cells in multicellular organisms are in constant communication with each other. One way that cells communicate is through the sharing of chemical signals through a process called “signal transduction.” In this course, we will study the basic biochemical principles of signal transduction to better understand life on a molecular level. Topics to be covered include a broad overview of signal transduction mechanisms, including basic receptor theory and the use of second messengers; investigations into specific signaling strategies, including signaling via receptor ion channels, G protein-coupled receptors, and nuclear hormone receptors; and examinations of cellular mechanisms used to coordinate signaling spatially and temporally. Special focus will be placed on roles of signal transduction pathways in health and disease.
Prerequisite(s): BCH 325.

BCH 425 Medicinal Chemistry 3 Credits
A comprehensive description of the important principles of medicinal chemistry including principles of rational drug design with synthetic strategies, mechanisms of drug actions, structure-activity relationships, the absorption, distribution, metabolism and elimination of drugs. Specific classes of drugs to be discussed include: anticancer agents, analgesics, anti-inflammatory drugs, steroids, drugs acting on the nervous system and antibiotics.
Prerequisite(s): BCH 325 or permission of instructor.

BCH 430 Advanced Lab Techniques in Biochemistry. 1 Credits
Methods of protein analysis, building on techniques and principles learned in BCH 326. Students will use bioinformatics and molecular biological techniques, including PCR, to harness and change protein sequence. They will implement modern protein purification techniques, develop enzyme essays, and perform equilibrium binding assays to investigate the relationships among protein sequence, structure, and function.
Prerequisite(s): BCH 326.

BCH 490 Independent Study: Research and Creative Expression 1-4 Credits
Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurement, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BIO 115 Principles of Biology I 4 Credits
An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three- hour lab per week.
Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits
An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.
Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 116.

BIO 260 Principles of Biology: Evolution, Diversity, and Biology of Cells 4 Credits
Lectures and labs focus on basic cell biology. Cell diversity and function, genetics and biotechnology are emphasized. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115/115L and BIO 116/116L or BIO 115, BIO 117, (BNS 118 or BNS 275).
Corequisite(s): BIO 260L.

BIO 260L Principle of Biology: Cells Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 260.

BIO 265 Genetics 4 Credits
A comprehensive course focusing on molecular, Mendelian, and population genetics. Topics covered will include molecular advances in the study of genetics, including genomics and bioinformatics; evolution and the effects of genetic mutations; the application of population genetics to forensic science; genetic problem solving, including genetic crosses and statistical analysis; and regulation of gene expression. The laboratory for this course will introduce students to commonly used genetic model organisms and basic molecular biology techniques. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C and (BIO 117 with a minimum grade of C or BIO 260 with a minimum grade of C)
Corequisite(s): BIO 265L.

BIO 265L Genetics Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C and (BIO 117 with a minimum grade of C or BIO 260 with a minimum grade of C)
Corequisite(s): BIO 265.

CHE 120 Principles of Chemistry 3 Credits
For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.
Corequisite(s): CHE 121.

CHE 121 Principles of Chemistry Lab 1 Credits
For students concurrently taking CHE 120. Experiments involve gravimetric, volumetric, and spectrophotometric quantitative analysis. One three-hour lab per week. Fall.

CHE 122 Intro to Chemical Systems 3 Credits
A continuation of CHE 120. For students majoring in the sciences but may be taken by others. Chemical systems in which the study of kinetics, thermodynamics, equilibrium, and radiochemistry are emphasized. Three hours of lecture per week. Prerequisite(s): CHE 120, MTH 105 or higher.
Corequisite(s): CHE 123.

CHE 123 Quantitative Methods Lab 1 Credits
Usually taken concurrently with CHE 122. Primarily for students majoring in the sciences. A number of quantitative classical and instrumental methods of analysis are used to determine thermodynamic properties and reaction mechanisms. One three-hour lab per week. Prerequisite(s): CHE 121.
Corequisite(s): CHE 122.

CHE 211 Organic Chemistry I 4 Credits
The structure, chemical properties, and methods of preparation of the more important classes of carbon compounds are studied, with an emphasis on the relationship of structure, stereochemistry, and conformation to chemical reactivity. The preparation and reactivity of organic functional groups is introduced. The use of infrared and nuclear magnetic resonance spectroscopy, and mass spectrometry for elucidating structures of organic molecules is discussed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 120, CHE 121.
Corequisite(s): CHE 211L.

CHE 211L Organic Chemistry I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): CHE 211.

CHE 214 Organic Chemistry II 4 Credits
A continuation of Chemistry 211, emphasizing the mechanism of organic reactions, structural interpretations of properties, preparations, reactivity and identification of organic compounds. Three hours of lecture and one three-hour lab per week.
Prerequisite(s): CHE 211 and CHE 211L.

CHE 214L Organic Chemistry II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): CHE 214.

CHE 250 Quantitative Analysis and Statistics Methods 4 Credits
This course will provide a deeper exploration of topics in chemistry that are steeped in numerical analysis. These topics include advanced analysis of equilibrium systems, acid-base systems and electrochemical systems. Additional detail will be given to methods of chemical measurement, statistical methods of data analysis and determination of data validity and reliability. Both lecture and laboratory will show an emphasis on using computer-based tools to analyze experimental data. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 122 & CHE 123
Corequisite(s): CHE 250L.

CHE 250L Quantitative Analysis and Statistical Methods Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): CHE 250.

CHE 305 Physical Chemistry I 3 Credits
The mathematic and conceptual foundations of physical chemistry will be introduced with an over-arching theme of determination of energy allocation within atomic and molecular systems. Topics will include determination and measurement of energy states in atoms and molecules, simple quantum mechanical systems, distribution of energies and the connection to thermodynamic quantities, the three laws of thermodynamics, spontaneity, equilibrium and experimental kinetics.
Prerequisite(s): CHE 122, CHE 214, MTH 211, PHY 201.

MTH 210 Calculus I 4 Credits
Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.
Prerequisite(s): Math SAT 650 or higher or Math ACT score of 28 or higher or MTH 105 or MTH 106 with a grade of C or higher.

MTH 211 Calculus II 4 Credits
The definite integral, differentiation of transcendental functions, methods of integration and approximate integration, determination of area, volume, and surface area.
Prerequisite(s): MTH 210 with a grade of C or higher.

PHY 200 General Physics I 4 Credits
Introductory classical physics; Newtonian mechanics, including the conservation laws, wave motion, gravity, thermodynamics. Three hours of lecture and one three-hour lab per week. Prerequisite(s): MTH 210 or concurrent enrollment
Corequisite(s): PHY 200L.

PHY 200L General Physics I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): PHY 200.

PHY 201 General Physics II 4 Credits
A continuation of the concepts developed in Physics 200. Electricity, electrical circuits, magnetism, Maxwell's equations. Light and optics, including lenses, interference, and diffraction. Three hours of lecture and one three-hour lab per week. Prerequisite(s): PHY 200, MTH 211 or concurrent enrollment.
Corequisite(s): PHY 201L.

PHY 201L General Physics II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): PHY 201.

Biology B.S. / Biology B.A.

Program Overview

Rider's biology major educates the next generation of scientists by providing students with a foundation in the life sciences that prepares them to join the workforce or attend professional or graduate school. Rider achieves this through small class and laboratory sizes allowing direct, hands-on instruction, and faculty accessibility. Students also have opportunities to do research with faculty via work study or independent study. Each student is assigned a faculty advisor who provides academic advice and career guidance tailored to the student's needs. Areas of professional and graduate study pursued by students in this major include medical, dental, and veterinary school; allied health programs such as optometry, podiatry, physical therapy, occupational therapy and nursing; programs leading to M.S. or Ph.D. degrees in the life sciences; and programs in science education.

Graduates of the biology program have pursued their graduate studies at prestigious institutions such as John Hopkins University, Cornell University, Princeton University, University of North Carolina at Chapel Hill, University of Pennsylvania, Harvard University, Dartmouth College and The Scripps Research Institute, among others.

Bachelor of Science Curriculum Overview

The curriculum for biology majors is structured to prepare students for a life of learning in the sciences. Students are expected to master content, develop technical skills, analytical skills and competency in oral and written communication. Foundational courses in biology, chemistry, physics and mathematics prepare students for the rigor of upper-level courses in microbiology, evolutionary biology, developmental biology, immunology, physiology, plant biology, ecology and neurobiology. Capstone seminars allow students to explore one area of the life sciences in depth through exploration and analysis of original scientific literature. Rider's science faculty are research-oriented and encourage students to take advantage of opportunities to engage in independent research. Students also have the opportunity to take part in a three-week internship course through the Capital Health System Hospitals, summer research and other off-campus internships.

Bachelor of Arts Option

The curriculum described above is for a Bachelor of Science program. All students admitted to the College of Arts and Sciences seeking a biology degree will be enrolled in the B.S. program consisting of 62-63 credits. However, there is the option to be enrolled in a Bachelor of Arts program in biology. This program consists of 52 credits in the major and is designed for students who may desire a biology degree, but do not have a full eight semesters to commit to the program. Such students may be those enrolled in the College of Education and Human Services, transfer students or students choosing a second major. However, students may not choose to double-major in the B.A. program in biology and a closely-related B.S. program such as Behavioral Neuroscience or Health Science.

Students seeking to enroll in the Bachelor of Arts program in Biology must consult with the Chair of the Department of Biology and Behavioral Neuroscience before being considered for this program.

Student Learning Outcomes

Graduates of the Biology major will be able to:

1. Explain foundational concepts in biological sciences.
2. Apply scientific methods of inquiry through testing of newly formed hypotheses with observation and experimentation.
3. Apply concepts from other disciplines in the analysis and interpretation of biological information.
4. Demonstrate the ability to locate, critically analyze, and communicate relevant scientific information.
5. Explain the ethical practice of scientific research and its societal applications.

Honors Programs

Honors in Biology

The objective of the honors program in biology is to introduce talented undergraduate majors to the methods of basic research in the biological sciences. For consideration a student must have a 3.25 average at the end of their junior year. In the senior year, participating students must complete an independent research project and present a written honors thesis. At graduation a student who has a 3.25 cumulative average, a 3.5 average in biology courses, and who has completed an acceptable honors thesis will be awarded Honors in Biology.

Pre-medical, Pre-Dental, Pre-Veterinary and Pre-allied Health Advising Programs

In addition to their academic advisor, students pursuing medical, dental or veterinary school or pre-allied health programs upon graduation from Rider are encouraged to also consult with the department's pre-medical studies advisor. The pre-medical studies advisor is a faculty member who assists pre-medical, pre-dental, pre-veterinary students and pre-allied health students with academic and extra-curricular planning required to become competitive applicants for programs in the health professions.

The Biology curriculum helps pre-medical studies students prepare for the MCAT (Medical College Admission Test) by covering topics included on the MCAT.

Rider and Thomas Jefferson University have a long-standing articulation agreement for students who wish to pursue training in the allied health professions. This agreement does not guarantee admission of Rider students into Jefferson's programs; it does mean that Rider faculty members are familiar with Jefferson's academic requirements and that Rider's courses are eligible for transfer to Jefferson.

Rider University offers students with baccalaureate degrees the opportunity to take the undergraduate science course prerequisites for medical, dental, veterinary or graduate school. For more information, visit the Premedical Studies (https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/programs-opportunities/pre-med/) page.

Degree Offered

- B.S. in Biology
- B.A. in Biology
- Minor in Biology

Requirements for the Major

All students admitted to the College of Arts and Sciences seeking a biology degree will be enrolled in the Bachelor of Science (B.S.) program consisting of 62-63 credits. However, there is an option to be enrolled in a Bachelor of Arts (B.A.) program in biology. This program consists of 52 credits in the major and is designed for students who may desire a biology degree, but do not have a full eight semesters to commit to the program. Such students may be those also enrolled in the College of Education and Human Services, transfer students, or students choosing a second major. However, students who double-major may not select the B.A. program in biology and a closely-related B.S. program such as Behavioral Neuroscience or Health Science.

Students students seeking to enroll in the Bachelor of Arts program in Biology must consult with the Chair of the Department of Biology and Behavioral Neuroscience before being considered for this program.

Program Requirements for:
B.S. in Biology (p.)

B.A. in Biology (p.)
Departmental Course Repeat Policy (p. 83)

Biology B.S. Requirements for Arts and Sciences students

(62-63 credits)

Code	Title	Credits
Complete the following foundational courses:		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab [1]	4
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab [1]	4
Select five courses from Group I and Group II, with at least one course selected from each Group:		**20**
Group I		
BIO 272 & 272L	Intro to Marine Biology and Marine Biology Laboratory	
BIO 335 & 335L	Plant Biology and Modern Plant Biology Lab	
BIO 340 & 340L	Evolutionary Biology and Evolutionary Biology Lab	
BIO 350 & 350L	General Ecology and General Ecology Lab	
BIO 372 & 372L	Behavior of Marine Organisms: Evolutionary Approach and Behavior of Marine Organisms: Evolutionary Approach Lab	
Group II		
BIO 215 & 215L	Medical Microbiology and Microbiology Lab	
BIO 260 & 260L	Principles of Biology: Evolution, Diversity, and Biology of Cells and Principle of Biology: Cells Lab	
BIO 265 & 265L	Genetics and Genetics Lab	
BIO 300 & 300L	Developmental Biology and Developmental Biology Lab	
BIO 305 & 305L	Animal Physiology and Animal Physiology Lab	
BIO 370 & 370L	Immunology and Immunology Lab	
BNS 275 & 275L	Behavioral Neuroscience and Behavioral Neuroscience Lab	
BNS 310 & 310L	Neurobiology and Neurobiology Lab	
BNS 360 & 360L	Neurochemistry and Neurochemistry Lab	
BNS 375 & 375L	Neuroethology: Circuits of Behavior and Neuroethology Lab	
BCH 325 & BCH 326	Biochemistry and Biochem and Enzymology I Lab	
Mathematics		
Select two of the following:		7-8
MTH 105	Algebra and Trigonometry [2]	
or MTH 106	Precalculus	
MTH 210	Calculus I [2]	
MTH 211	Calculus II [2]	
BNS 250	Biostatistics (plus lab) [2]	
or ENV 200	Statistical and Computer Applications in the Natural Sciences	
or MTH 120	Introduction to Applied Statistics	
Chemistry		
CHE 120 & CHE 121	Principles of Chemistry and Principles of Chemistry Lab	4
CHE 122 & CHE 123	Intro to Chemical Systems and Quantitative Methods Lab	4
CHE 211 & 211L	Organic Chemistry I and Organic Chemistry I Lab	4
CHE 214 & 214L	Organic Chemistry II and Organic Chemistry II Lab	4
Physics		
PHY 100 & 100L	Principles of Physics I and Principles of Physics I Lab	4
or PHY 200 & 200L	General Physics I and General Physics I Lab	
PHY 101 & 101L	Principles of Physics II and Principles of Physics II Lab	4
or PHY 201 & 201L	General Physics II and General Physics II Lab	
Senior Capstone Seminar		**3**
Select one of the following:		
BNS 415	Seminar in Behavioral Neuroscience	
BIO 400	Seminar in Cellular and Molecular Biology	
BIO 420	Seminar in Organismal Biology	
BIO 450	Seminar in Ecology & Evolution	

BIO 490	Independent Study: Research and Creative Expression [3]	
Total Credits		**62-63**

[1] Students must earn a grade of "C" or better in these courses to meet the major requirement and before enrolling in upper-level courses for which these courses are prerequisites.

[2] Students must place into MTH 105 Algebra & Trigonometry or higher level mathematics to register for BIO 115 and BIO 116.

[3] It is the student's responsibility to arrange an independent study with a faculty member in the Department. To be registered for a BIO 490, the student must complete an independent study form (https://www.rider.edu/academics/academic-support/registrar/forms/) and proposal with the faculty member.

Biology B.A. Requirements for other than College of Arts and Sciences students

(52 credits)

Code	Title	Credits
Requirements for the Major		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab	4
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	4
BIO 260 & 260L	Principles of Biology: Evolution, Diversity, and Biology of Cells and Principle of Biology: Cells Lab	4
BIO 265 & 265L	Genetics and Genetics Lab	4
BIO 350 & 350L	General Ecology and General Ecology Lab	4
Select one upper-level elective from the following:		**4**
BIO 300 & 300L	Developmental Biology and Developmental Biology Lab	
BIO 305 & 305L	Animal Physiology and Animal Physiology Lab	
BIO 335 & 335L	Plant Biology and Modern Plant Biology Lab	
BIO 340 & 340L	Evolutionary Biology and Evolutionary Biology Lab	
BIO 370 & 370L	Immunology and Immunology Lab	
BIO 372 & 372L	Behavior of Marine Organisms: Evolutionary Approach and Behavior of Marine Organisms: Evolutionary Approach Lab	
BCH 325	Biochemistry	
BNS 310 & 310L	Neurobiology and Neurobiology Lab	
BNS 360 & 360L	Neurochemistry and Neurochemistry Lab	
BNS 375 & 375L	Neuroethology: Circuits of Behavior and Neuroethology Lab	
Senior Capstone		**4**
Select one of the following options:		
BIO 490	Independent Study: Research and Creative Expression (4 credits)	
OR		
BIO 400	Seminar in Cellular and Molecular Biology (3 credits)	
or BIO 420	Seminar in Organismal Biology	
or BIO 450	Seminar in Ecology & Evolution	
AND		
BIO 491	Internship in Biology (as a lab facilitator (1 credit))	
Required Chemistry Courses:		**8**
CHE 120 & CHE 121	Principles of Chemistry and Principles of Chemistry Lab	
CHE 122 & CHE 123	Intro to Chemical Systems and Quantitative Methods Lab	
Select one of the following:		**4**
BCH 225 & 225L	Introduction to Organic and Biochemistry and Introduction to Organic & Biochemistry Lab	
CHE 211 & 211L	Organic Chemistry I and Organic Chemistry I Lab	
Select two of the following Mathematics courses:		**8**
MTH 105	Algebra and Trigonometry	
or MTH 106	Precalculus	
MTH 210	Calculus I	
BNS 250 & 250L	Biostatistics and Biostatistics Lab	
Select one of the following Physics courses:		**4**
PHY 100 & 100L	Principles of Physics I and Principles of Physics I Lab	
PHY 200 & 200L	General Physics I and General Physics I Lab	
Total Credits		**52**

Department of Biology and Behavioral Neuroscience Course Repeat Policy

The following guidelines apply to courses offered by the Department of Biology & Behavioral Neuroscience. Students may repeat any biology (BIO) or behavioral neuroscience (BNS) course once without special permission ***unless*** they received an unsatisfactory grade (C-, D, F). With an unsatisfactory grade, students need permission from the department chair to repeat a class. They can not register on their own on MyRider. Students with an unsatisfactory grade should email the department chair to request permission to repeat a course. A course will be considered repeated if the student has previously earned a letter grade in the course, or if the student has previously withdrawn from the course after the Friday of the seventh week of classes (previously Withdrawal II or Withdrawal III).

Requirements for the Minor [1]

(20 credits)

Code	Title	Credits
Foundational Courses:		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab [2, 3]	4

BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab [2, 3]	4
Select three courses from Group I and Group II, with at least one course selected from each Group:		**12**
Group I		
BIO 272 & 272L	Intro to Marine Biology and Marine Biology Laboratory	
BIO 335 & 335L	Plant Biology and Modern Plant Biology Lab	
BIO 340 & 340L	Evolutionary Biology and Evolutionary Biology Lab	
BIO 350 & 350L	General Ecology and General Ecology Lab	
BIO 372 & 372L	Behavior of Marine Organisms: Evolutionary Approach and Behavior of Marine Organisms: Evolutionary Approach Lab	
Group II		
BIO 215 & 215L	Medical Microbiology and Microbiology Lab	
BIO 260 & 260L	Principles of Biology: Evolution, Diversity, and Biology of Cells and Principle of Biology: Cells Lab	
BIO 265 & 265L	Genetics and Genetics Lab	
BIO 300 & 300L	Developmental Biology and Developmental Biology Lab	
BIO 305 & 305L	Vertebrate Physiology and Vertebrate Physiology Lab	
BIO 370 & 370L	Immunology and Immunology Lab	
BNS 310 & 310L	Neurobiology and Neurobiology Lab	
BNS 360 & 360L	Neurochemistry and Neurochemistry Lab	
BNS 375 & 375L	Neuroethology: Circuits of Behavior and Neuroethology Lab	
Total Credits		**20**

[1] Not available to Behavioral Neuroscience, Biochemistry, Health Sciences or Science Education majors.

[2] Students must earn a grade of "C" or better in this course to meet the major requirements and before enrolling in upper-level courses for which these courses are prerequisites.

[3] Students must place into MTH 105 Algebra & Trigonometry or higher level mathematics in order to register for BIO 115 and BIO 116.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

BIO 400	Seminar in Cellular and Molecular Biology	3
Three Elective Courses [2]		9
	Semester Credit Hours	**16**
Spring Semester		
Five Elective Courses [2]		15
	Semester Credit Hours	**15**
	Total Credit Hours for Graduation	**120**

1 For course placement information see https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing (https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing/)

2 Please note that elective credits may be used to complete requirements in a second major or minor.

3 Natural and Physical Sciences and Mathematics Core requirements are included in the major.

Courses and Descriptions

BIO 100 Life Science 3 Credits
An introductory course for non-science majors in which students develop an understanding of the nature of science and are introduced to foundational topics in the biological life sciences and how they relate to human affairs. The course may emphasize human evolution, genetics, aging, disease, reproduction, bioethics or other topics in biology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CAS general education curriculum.

BIO 102 The Biology of Cannabis 1.5 Credits
In this course, you will learn about many aspects of the biology of cannabis, including botany, genetics, growth techniques, strain selection, and health benefits. Emphasis is placed on current methods in the marijuana industry to help legal growers and professionals understand best practices for cultivation, management, and medicinal use. Current literature and sources will be discussed.

BIO 110 Life Science: Inquiry Approach 4 Credits
An introductory course for non-science majors in which students develop an understanding of biological evolution, the molecular basis of heredity, the cell, matter, energy and organization in living systems, and the interdependence of organisms. In addition, students will develop an understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives. Through investigative activities, students will develop an understanding about scientific inquiry and develop abilities necessary to do scientific inquiry. Three hours of lecture and one three-hour lab per week.
Corequisite(s): BIO 110L.

BIO 110L Life Science: Inquiry Approach Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 110.

BIO 115 Principles of Biology I 4 Credits
An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three- hour lab per week.
Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits
An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.
Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 116.

BIO 206 The Pharmaceutical Industry 3 Credits
An introduction to drug discovery and development. Topics include how drugs are used to diagnose, cure, treat, and prevent disease and how drugs affect body function. The origins of diseases and the early attempts at treatment are also covered. Designed for business majors; does not satisfy requirements for the biology major.
Prerequisite(s): any BIO1XX or BNS1XX or CHE 1XX.

BIO 210 Hospital Intern Program 2 Credits
An internship that provides students with the experience in the practical aspects of medicine. Major departments in the hospital such as the emergency room, operating room, clinic, radiology, and the laboratory will be open for student rotations. Field trips to various medical schools in the area will provide information on professional school educational opportunities available in the health professions.
Prerequisite(s): sophomore standing or above and permission of instructor.

BIO 215 Medical Microbiology 4 Credits
Biology of prokaryotes of medical interest with emphasis placed on diversity and host-pathogen interaction. Current research literature will be covered and presented by students. Methods of microbial identification are introduced in the laboratory and applied in the identification of mock clinical isolates. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course,
Corequisite(s): BIO 215L.

BIO 215L Microbiology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 215.

BIO 221 Human Anatomy & Physiology I 4 Credits
A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training. Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor.
Corequisite(s): BIO 221L.

BIO 221L Human Anatomy & Physiology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 221.

BIO 222 Human Anatomy & Physiology II 4 Credits
A comprehensive survey of the organ systems of the body including special senses, cardiovascular, respiratory, digestive, excretory, reproduction and development. Physiological components include electrolytes, metabolism, nutrition, and the mechanisms of homeostasis and cell reception. Lab studies support lecture material through dissections, wet labs, computer-assisted learning, microscopy, and models. Assessment includes lab practicums, exams, and reports. Course emphasis supports allied health and pre-professional training. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): BIO 221.
Corequisite(s): BIO 222L.

BIO 222L Human Anatomy & Phys II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 221L.
Corequisite(s): BIO 222.

BIO 260 Principles of Biology: Evolution, Diversity, and Biology of Cells 4 Credits
Lectures and labs focus on basic cell biology. Cell diversity and function, genetics and biotechnology are emphasized. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115/115L and BIO 116/116L or BIO 115, BIO 117, (BNS 118 or BNS 275).
Corequisite(s): BIO 260L.

BIO 260L Principle of Biology: Cells Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 260.

BIO 265 Genetics 4 Credits
A comprehensive course focusing on molecular, Mendelian, and population genetics. Topics covered will include molecular advances in the study of genetics, including genomics and bioinformatics; evolution and the effects of genetic mutations; the application of population genetics to forensic science; genetic problem solving, including genetic crosses and statistical analysis; and regulation of gene expression. The laboratory for this course will introduce students to commonly used genetic model organisms and basic molecular biology techniques. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C and (BIO 117 with a minimum grade of C or BIO 260 with a minimum grade of C)
Corequisite(s): BIO 265L.

BIO 265L Genetics Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C and (BIO 117 with a minimum grade of C or BIO 260 with a minimum grade of C)
Corequisite(s): BIO 265.

BIO 272 Intro to Marine Biology 4 Credits
Introduces students to the study of marine environments, emphasizing the diversity, ecology, and physiology of marine animals, algae, and plants. Aspects of the human impact on marine environments are also discussed.
Prerequisite(s): BIO 115 with a minimum grade of C, or BIO 116 with a minimum grade of C.

BIO 272L Marine Biology Laboratory 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Course
Prerequisite(s): BIO 115 or BIO 116.

BIO 290 Special Topics in Biology 3 Credits

BIO 300 Developmental Biology 4 Credits
Lectures and laboratories explore molecular, cellular, and genetic mechanisms of animal development. Aspects of gametogenesis, fertilization, induction, cytoplasmic determinants, morphogenetic movements, differentiation and developmental evolution are discussed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C and (BIO 117 with a minimum grade of C or BIO 260 with a minimum grade of C)
Corequisite(s): BIO 300L.

BIO 300L Developmental Biology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C and (BIO 117 with a minimum grade of C or BIO 260 with a minimum grade of C)
Corequisite(s): BIO 300.

BIO 305 Animal Physiology 4 Credits
Study of the principles and mechanisms of animal physiology. Topics include the nervous system, muscle physiology, cardiovascular physiology, respiration, gastrointestinal activity, renal function, and endocrine physiology. Lectures and laboratory exercises emphasize homeostatic mechanisms and organ-system interactions. Three hours of lecture and one three-hour lab per week.
Prerequisite(s): BIO 115 and BIO 116 with a grade of C or better in each course.

BIO 305L Animal Physiology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Prerequisite(s): BIO 115 and BIO 116 with a minimum grade of C.

BIO 310 Health and Ecology in Central America 3 Credits
This interdisciplinary course seeks to provide a unique educational experience for students to explore the relationship between human health, ecological health, and environmental concerns. Using a country in Central America as our focus (e.g., Costa Rica or Panama) we will begin by studying the health care system, including visits to several hospitals and clinics to see firsthand some of the challenges they face. We will also examine the ecotourism industry in the country, including visits to coffee plantations and a National Wildlife Refuge on the coast, again with a focus on environmental health challenges. We begin our exploration of these topics with three pre-departure meetings at Rider University during the Fall semester. We continue our experience with a ten-day trip to Central America during the January term and will meet for four additional class sessions during the Spring semester.

BIO 335 Plant Biology 4 Credits
Biology of seed plants, including growth, development, and reproduction of flowering plants. Emphasis is placed on acclimation and adaptations demonstrating environmental influences on plant structure and function. Current literature involving molecular mechanisms of control will be discussed. Three hours of lecture and one three-hour lab per week. One Saturday field trip. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C.
Corequisite(s): BIO 335L.

BIO 335L Modern Plant Biology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C
Corequisite(s): BIO 335.

BIO 340 Evolutionary Biology 4 Credits
Where did we come from? This course will explore the generation of biological diversity on earth. Course topics will include: the history of evolutionary thought; the different lines of evidence and fields of inquiry that bear on our understanding of evolution; selection vs. random changes in populations over time; speciation; extinction; the molecular basis of evolution; and evolutionary developmental biology. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C and BIO 260 with a minimum grade of C Co-requisite(s): BIO 340L.

BIO 340L Evolutionary Biology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C and BIO 260 with a minimum grade of C Co-requisite(s): BIO 340.

BIO 350 General Ecology 4 Credits
An investigation of the processes that regulate the distribution of plants and animals throughout the biosphere. Relationships among species and their interactions with the environment are stressed. Quantitative analyses of experimental results and current research in basic and applied ecology are discussed. Laboratory activities explore conceptual models using both field activities and computer simulations. Three hours of lecture and one three-hour lab per week. One Saturday field trip (laboratory time will be adjusted accordingly). Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C
Corequisite(s): BIO 350L.

BIO 350L General Ecology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Prerequisite(s): BIO 115 with a minimum grade of C and (BIO 116 with a minimum grade of C or BIO 117 with a minimum grade of C.

BIO 370 Immunology 4 Credits
An introduction to the cells and molecules of the immune system with emphasis on recent advances. Topics include AIDS, autoimmunity, transplantation, and cancer. Readings from current journals will be discussed and presented by students. The laboratory will introduce current research techniques and then apply these to a research problem with critical analyses of the data generated. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C and (BIO 260 with a minimum grade of C or BIO 117 with a minimum grade of C)
Corequisite(s): BIO 370L.

BIO 370L Immunology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C and (BIO 260 with a minimum grade of C or BIO 117 with a minimum grade of C)
Corequisite(s): BIO 370.

BIO 372 Behavior of Marine Organisms: Evolutionary Approach 4 Credits
An examination of the underlying mechanisms and evolutionary causes of behavior, including habitat use, feeding, and mate choice, particularly in marine organisms. The laboratory will involve collecting, analyzing and interpreting field data and performing experiments in the lab using a variety of marine organisms including fish and crabs. Three hours of lecture and one three-hour lab per week. Some full-day field trips (usually on a weekend) are required. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.
Corequisite(s): BIO 372L.

BIO 372L Behavior of Marine Organisms: Evolutionary Approach Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Course
Prerequisite(s): BIO 115 or BIO 116.

BIO 390 Special Topics in Biology 4 Credits
This course will provide students the opportunity to deeply explore a specialized topic in the broad field of biological sciences. The course entails 3 hours of lecture and 3 hours of laboratory per week, and may satisfy upper-level biology course requirements for the Biology, Behavioral Neuroscience, and/or Health Sciences majors. Examples may include such topics as ornithology, ethnobotany, entomology, neuroelectrophysiology, or exercise physiology, among other possibilities.
Prerequisite(s): BIO 115 and BIO 116.

BIO 390L Special Topics in Biology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Prerequisite(s): BIO 115 and BIO 116.

BIO 400 Seminar in Cellular and Molecular Biology 3 Credits
Critical analysis of the scientific literature pertaining to current topics in cell and molecular biology. Topics may include: genomics, regulation of gene expression, development, and molecular processes of disease. Three hours of lecture per week.
Prerequisite(s): BIO 115, BIO 116, (BIO 260 or BIO 117) with a grade of C or better in each course, junior standing, and permission of instructor.

BIO 416 Bioinformatics 3 Credits
A comprehensive overview of relevant computer-based technologies used in genome research, DNA sequence analysis, and evolutionary biology. Will focus extensively on Internet resources and predictive algorithm usage for determining evolutionary relationships of organisms based on molecular evidence. Lectures will focus on terms and concepts frequently used in genomic and bioinformatic research, while computer labs will allow students to perform hands-on projects with actual DNA sequence data.
Prerequisite(s): BIO 115, BIO 116, (BIO 260 or BIO 117) with a grade of C or better in each course, junior standing, permission of instructor and BIO 265 recommended.

BIO 420 Seminar in Organismal Biology 3 Credits
Critical analysis of the scientific literature pertaining to current topics in physiology and organismal biology. Topics may include hormonal control of behavior, immune pathogen interactions, and other aspects of whole animal and/or plant biology. Three hours of lecture per week.
Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course; junior standing, and permission of instructor.

BIO 450 Seminar in Ecology & Evolution 3 Credits
Critical analysis of the scientific literature pertaining to current topics in ecology and evolutionary biology. Ecology and evolution of terrestrial and aquatic systems may include scales of adaptation, mechanisms, or human impacts. Three hours of lecture per week.
Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course; junior standing, and permission of instructor.

BIO 490 Independent Study: Research and Creative Expression 1-4 Credits
Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BIO 491 Internship in Biology 1-4 Credits
A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and should include keeping a journal of activities, a term paper or project report and a poster presentation. 2.5 GPA required.
Prerequisite(s): Permission of the instructor.

Business Administration B.S.B.A.

Program Overview

Rider's business administration major provides students with a general business focus, and is ideal for students who do not want to concentrate in a particular functional area, but instead intend to pursue one of the following goals:

- attend graduate school, such as law school or a MBA or Ph.D. program;
- enter a management training or marketing program with a future employer;
- enter a family business or start a new one.

Student Learning Outcomes

A business administration graduate will demonstrate the ability to:

- define the concepts of corporate social responsibility and business ethics;
- construct organizational strategies for implementing an effective ethics program for an organization;
- use oral communication effectively in a professional setting;
- use written communication effectively in a professional setting;
- apply a broad base of knowledge and skills that are necessary for a career in business;
- explain the impact that businesses and stakeholders have on one another in a given business enterprise.

Curriculum Overview

The Business Administration major requires completion of 18 credit hours of upper-level business courses across a variety of disciplines, including: economics, finance, management, and marketing. For graduation students must achieve an overall GPA of 2.0 in the major. Business Administration majors may not count more than six credit hours toward a second major, with the exception of International Business. Students majoring in Business Administration can count up to nine credit hours toward the International Business major.

Degree Offered

- B.S.B.A. in Business Administration

Business Administration Major Requirements

(18 credits)

Code	Title	Credits
Business Core [1]		
See Business Core Requirements (p. 564)		
Courses are to be selected as specified below:		**12**
One upper-level economics (ECO) elective		
One upper-level finance (FIN) elective		
One upper-level management (MGT) or human resources (HRM) elective		
One upper-level marketing (MKT) elective		
Two upper level business courses which may include:		**6**
BUS 490	Independent Research and Study	
BUS 491	Business Admin Internship	
Total Credits		**18**

[1] Courses listed as core requirements may not be used for filling the requirements of the business administration major.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

[1] CIS 185 Information Systems Essentials and CBA 110 Introduction to Business can be taken in the Fall or Spring of Year 1.

[2] Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.

[3] Students are required to complete 6 credits of International Business Electives which can be fulfilled as major courses or as free electives.
[4] Business Administration majors are required to take an upper level ECO Elective, an upper level FIN Elective, an upper level HRM/MGT Elective, an ADV/MKT Elective, and 6 credits of additional upper level business electives for a total of 18 credits.
[5] Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.

3-Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

[1] Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.
[2] For the Leadership Elective, choose from LDP 200, LDP 220, LDP 398, MGT 355, or MGT 363.
[3] Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit course.
[4] CIS 185 Information Systems Essentials and CBA 110 Introduction to Business can be taken in the Fall or Spring of Year 1.

Notes:

- The Plan assumes no AP or other credits were transferred into Rider University.
- Students are required to take 6 credits of International Business Electives which can be fulfilled as major courses or as free elective courses.
- Business Administration majors are required to take an upper level ECO Elective, an upper level FIN Elective, an upper level HRM/MGT Elective, an ADV/MKT Elective, and 6 credits of additional upper level business electives for a total of 18 credits.

- Business Honors students will have a different sequence.
- It is strongly suggested that students complete a credit-bearing experiential course (e.g., Internship, Co-op, Study Tour, Study Abroad, ENT 448, or ECO 450.)

Courses and Descriptions

ACC 210 Introduction to Accounting 3 Credits
This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

ACC 220 Managerial Uses of Accounting 3 Credits
This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.
Prerequisite(s): ACC 210.

BDA 201 Introduction to Business Analytics 3 Credits
This course introduces students to the process of analyzing big data and discovering new information to support business decision making. The course covers descriptive, predictive, and prescriptive analytics. Some topics covered include data visualization, data forecasting, and data mining. This course provides students with the fundamental concepts and tools needed to understand the role of business analytics in organizations and shows students how to apply basic business analytics tools in a spreadsheet environment. It also includes how to communicate with analytics professionals to effectively use and interpret analytic models and results for making better business decisions. Emphasis is given on applications, concepts and interpretation of results. Students utilize Excel for data analysis.
Prerequisite(s): MSD 200 with a minimum grade of D or MSD 205 with a minimum grade of D.

BUS 300 The Legal and Ethical Environment of Business 3 Credits
The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.
Prerequisite(s): 54 credits.

BUS 400 Strategic Management and Policy 3 Credits
This capstone course for seniors in business administration provides a framework for problem identification, analysis, and decision making within the organization. Students are given the opportunity to integrate and apply previously acquired knowledge of accounting, decision sciences, economics, finance, marketing, management, and statistics. Case studies, critical incidents, and other appropriate techniques are utilized.
Prerequisite(s): 84 credits and ACC 210, ACC 220, BUS 300, CIS 185, FIN 220, MGT 201, MKT 200, MSD 301, and (CIS 385 or GSC 385).

CBA 110 Business in Action 3 Credits
This course will provide students with the opportunity to develop a foundational understanding of the business environment and various business functions. Students will be introduced to core concepts in accounting, e-business, finance, human resource management, information technology, macroeconomics, management, marketing, and production and operations management. In addition, the student will have ample opportunity to improve his/her communication and teamwork skills, as well as further develop problem-solving, analytical, and decision-making abilities through a Business in Action project.

CBA 212 Business Communications 3 Credits
Good communication is a vital skill in any environment where interpersonal interaction occurs. Communication skills do not, however, come naturally to everyone. This course introduces students to skills, practices, and strategies that will help them effectively communicate in the workplace and highlights the value of carefully documenting interactions between client and vendor. Students will engage in developmental activities intended to help them learn key aspects of communication, including, but not limited to: different formats of business writing (e.g., executive summaries, client and corporate correspondence, email messages, memos, reports, etc.); visual aids and presentations; active listening; small group facilitation; professional presence; and establishing credibility. Deliverables will include written documents and oral presentations, both individually and in teams. These skills cut across all disciplines and are qualitative tools that enhance overall career development.
Prerequisite(s): CMP 120 or BHP 100, and CMP 125 or BHP 150, and CBA 110 or CBA 110 with a score of WV.

CBA 236 Career Planning 3 Credits
How careers are shaped by individual needs and experience and assisted by organization systems and practices is the focus of this couse. The meaning of work and the development of careers are discussed, and careers are examined in the context of important changes occurring today in the world of work. Students undertake self-assessments, learn career search strategies and resources, and enhance resume and interviewing skills to maximize their career preparation.

CIS 185 Information Systems Essentials 3 Credits
This course provides students with a conceptual understanding and hands-on practice with spreadsheets. At the completion of this course students will be able to apply the appropriate information systems technology tools within spreadsheets to a variety of quantitative data-centric analytic activities. This course assumes you have a basic knowledge of Microsoft Windows, Word, Excel, and Web browsers.

CIS 385 Management Information Systems 3 Credits
This course will enhance students' digital dexterity and familiarity with existing and emerging information technologies, emphasizing skills of abstraction in relation to digital strategy and organizational change, innovation, analytics, and ethics. This course will also provide hands-on experience with at least one essential business technology. At the completion of the course, students will have an understanding of the business-related, policy, societal, and ethical implications associated with modern information systems.
Prerequisite(s): CIS 185 and junior or senior standing.

CMP 120 Seminar in Writing and Rhetoric 3 Credits
Students will increase their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. This course counts towards the fulfillment of the Essential Competencies element of the CAS general education curriculum.

CMP 125 Seminar in Writing and Research 3 Credits
Introduces students to the process of library research and documented writing. Emphasis will be on the refinement of critical reading, thinking, and writing strategies applied to multiple sources and documented papers. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.
Prerequisite(s): CMP 120 or BHP 100.

COM 290 Professional/Strategic Speech 3 Credits
Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the Norm Brodsky College of Business.

ECO 200 Principles of Macroeconomics 3 Credits
A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.
Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

ECO 201 Principles of Microeconomics 3 Credits
Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output a re evaluated. Welfare, social control, monopoly, and income inequality a re explored in the light of price theory. The role of the United States in the world economy is explored.
Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

FIN 220 Introduction to Finance 3 Credits
An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.
Prerequisite(s): ACC 210 and ECO 201.

MGT 201 Fund Management & Org Behavior 3 Credits
This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.
Prerequisite(s): minimum 30 credits completed.

MKT 200 Marketing Principles 3 Credits
This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.
Prerequisite(s): 15 credits.

MSD 105 Quantitative Methods for Business 3 Credits
The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.
Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

MSD 205 Business Statistics 3 Credits
This course is designed to provide students with fundamental concepts, knowledge and tools from statistics that may be useful in one's attempt to reach intelligent conclusions in real-world settings, particularly in business applications. The focus is on the normal random variable, sampling distributions, framework of estimation and hypothesis testing, as well as the one-way ANOVA and simple regression model.
Prerequisite(s): MSD 105.

MSD 301 Operations Management 3 Credits
This course introduces students to the concepts and techniques necessary to manage firm operations. The course emphasizes enhancing students' ability in problem-solving and decision-making by (1) identifying operations problems, (2) structuring decision-making process, (3) evaluating options that provide resolution of the problems using appropriate and proven techniques. It is well recognized that today's global business competition is among supply chains. Operations management concentrates on the supply side of the corporate strategy of a supply chain, where the bulk of the organization resources are committed. Good management of operations, which may also be called management of supply chain operations, is crucial in achieving an effective supply chain. The emphasis on systematic thinking and analytic decision model discussed the course will also provide students with necessary skills and useful tools in the emerging field of Business Analytics.
Prerequisite(s): MSD 200 or MSD 205 or MTH 341.

Business Administration A.A.

Program Overview

This 60-credit program was developed to meet the needs of students who need an abbreviated professional business curriculum. This program is

fully transferable to the bachelor of science in business administration degree program.

Curriculum Overview

The associates degree program is designed to enable working professionals to gain knowledge and skills to succeed in the competitive job market. It includes courses in numerical literacy, communication, global awareness, business analytics, and technology.

Admissions Requirement

Official transcripts from all institutions attended with a minimum 2.5 cumulative GPA.

Degree Offered

- A.A. in Business Administration

Total Credits		**60**

1. Select one course from: CHI, CMP, DAN, ENG, FRE, GER, ITA, LIT, MUS, PHL, SPA, THE
2. Select one course from: BCH, BIO, BNS, CHE, ENV, EXS, GEO, HSC, ISM, MAR, SUS
3. Select one course from: AMS, COM, GSS, HIS, HLS, LAW, MCS, POL, PSY, SOC, SOW
4. Choose from Natural science, Humanities or Social Science electives.

ACC 210 Introduction to Accounting 3 Credits
This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

ACC 220 Managerial Uses of Accounting 3 Credits
This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.
Prerequisite(s): ACC 210.

CIS 185 Information Systems Essentials 3 Credits
This course provides students with a conceptual understanding and hands-on practice with spreadsheets. At the completion of this course students will be able to apply the appropriate information systems technology tools within spreadsheets to a variety of quantitative data-centric analytic activities. This course assumes you have a basic knowledge of Microsoft Windows, Word, Excel, and Web browsers.

CIS 200 Application Development with JavaScript 3 Credits
In the early 1990s, Tim Berners-Lee created a set of technologies to allow information sharing at the CERN particle accelerator in Europe. These technologies dramatically changed the face of computing and became what we know today as the Web. Understanding how to develop and manage applications for the Web is a requirement for the information system professional. Because of the ease of development, deployment, maintenance and general scalability of Web applications, this approach to building and managing applications has become the de facto standard for business application development. This class will examine Web application development in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications, how to develop Web pages using HTML and CCS, how to control user interaction with those pages using the JavaScript programming language. The programming basics of variable declaration and usage, program flow of control, function declaration and calling, and object usage and declaration will also be shown. The use of the JQuery Javascript library to ease the development of Web pages will also be shown.

CMP 120 Seminar in Writing and Rhetoric 3 Credits
Students will increase their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. This course counts towards the fulfillment of the Essential Competencies element of the CAS general education curriculum.

CMP 125 Seminar in Writing and Research 3 Credits
Introduces students to the process of library research and documented writing. Emphasis will be on the refinement of critical reading, thinking, and writing strategies applied to multiple sources and documented papers. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.
Prerequisite(s): CMP 120 or BHP 100.

COM 290 Professional/Strategic Speech 3 Credits
Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the Norm Brodsky College of Business.

ECO 200 Principles of Macroeconomics 3 Credits
A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.
Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

ECO 201 Principles of Microeconomics 3 Credits
Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output a re evaluated. Welfare, social control, monopoly, and income inequality a re explored in the light of price theory. The role of the United States in the world economy is explored.
Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

MSD 105 Quantitative Methods for Business 3 Credits
The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.
Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

Business Data Analytics

Program Overview

Due to technological advancements and exponential growth in data, businesses are increasingly relying on the use of analytics and artificial intelligence to create new opportunities, address business challenges and outperform their peers. Companies such as OpenAI (Microsoft), Tesla, Google (Alphabet), Facebook (Meta), Amazon, Netflix, and Spotify rise above their competition through continual innovations fueled by artificial intelligence and driven by actionable business insights uncovered from analyzing their data. With the increasing demand for professionals who are capable of sifting through zettabytes of data to uncover insights and find business value, there is a shortage of talent in the analytics space.

Student Learning Outcomes

A business analytics graduate will demonstrate the ability to:

- formulate a business problem through developing a hypothesis;
- apply various descriptive, predictive, and prescriptive analytics techniques;
- implement all steps in the business analytics (BA) process (e.g., CRISP-DM);
- convey the results of analytics through visualization, oral, and written communication;
- apply information technology knowledge and domain-specific business knowledge to solve a business analytics problem (e.g. Marketing);
- apply ethical, socially responsible, and global perspectives in business analytics projects and/or processes.

Curriculum Overview

The structure of the program consists of six required courses and two elective courses. The six required courses provide core data analytics skills that are ubiquitously applicable for all analytics professionals. The two electives provide various track options that allow students to customize their program of study based on their choice of career path and interest in a specific industry or a business functional area.

Another key feature of the program is its emphasis on experiential learning through course projects embedded in multiple required courses plus a practicum/capstone course that gives students the opportunity to apply their analytical skills to solve a real business problem and to communicate their findings to real-world clients.

Degree Offered

- B.S.B.A. in Business Analytics
- Minor in Business Analytics

Business Data Analytics Major Requirements

(24 credits)

Code	Title	Credits
Complete the following required courses:		
BDA 205	Introduction to Visual Data Analytics	3
BDA 355	Business Analytics with Python	3
BDA 398	Business Data Analytics Practicum	3
CIS 330	Database Systems	3
CIS 350	Practical Business Analytics with Excel and R	3
CIS 360	Data Mining	3
Select two courses from one of the following tracks:		**6**
Accounting Track		
ACC 302	Cost Management	
ACC 320	Accounting Info Systems	
Marketing Track		
MKT 366	Marketing Research	
MKT 367	Marketing Web Analytics	
Finance Track		
FIN 312	Investments	
FIN 315	Financial Modeling	
FIN 360	Fixed Income and Derivatives	
Risk Management Track		
MSD 260	Principles of Risk Management	
MSD 361	Risk Assessment and Analysis	
CIS 377	Risk Management and Compliance for Information Security	
Artificial Intelligence and Machine Learning Track		
CIS 401	Artificial Intelligence for Business	
MSD 330	Predictive Modeling and Applications	
Global Supply Chain Management Track		
GSC 115	Introduction to Global Supply Chain Mgt.	
GSC 235	Supply Chain External Focus: Customer and Supplier Logistics	
GSC 355	Supply Chain Internal Focus: Firm Operations	
Health Care Management Track		
ECO 450	Seminar in Economic Research	
HTH 215	Population Health Care Management	
Sport Analytics Track		
SPT 250	Introduction to the Business of Sports	
SPT 322	Sports Analytics	
Total Credits		**24**

Business Data Analytics Minor Requirements

(15 credits)

The Minor in Business Analytics is open to all Rider students.

Code	Title	Credits
Prerequisite Courses		
CIS 185	Information Systems Essentials [1]	3
MSD 205	Business Statistics [2]	3
Required Courses		**9**
CIS 330	Database Systems	
CIS 350	Practical Business Analytics with Excel and R	
CIS 360	Data Mining	
Select two of the following:		**6**
ACC 320	Accounting Info Systems	
BDA 205	Introduction to Visual Data Analytics	
ECO 450	Seminar in Economic Research	
BDA 355	Business Analytics with Python	
FIN 315	Financial Modeling	
HTH 215	Population Health Care Management	
MKT 366	Marketing Research	
MKT 367	Marketing Web Analytics	
MSD 330	Predictive Modeling and Applications	
Total Credits		**15**

1 Business students pursuing the Business Analytics Minor are advised to take GSC 385 in lieu of CIS 385 for their business core.

2 For non-business students, the following courses may be used as a substitute for MSD 205: BNS 250, MTH 120, ENV 200, PSY 105, PSY 201, or POL 230.

4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

[1] Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.

[2] Students are required to take six credits of International Business Electives.

[3] Select from LDP 200, LDP 220, LDP 398, MGT 355, or MGT 363.

Notes:

- The above plan assumes no AP or other credits transferred into Rider University.
- Business Honors students may have a different course sequence.
- Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.

Courses and Descriptions

BDA 201 Introduction to Business Analytics 3 Credits
This course introduces students to the process of analyzing big data and discovering new information to support business decision making. The course covers descriptive, predictive, and prescriptive analytics. Some topics covered include data visualization, data forecasting, and data mining. This course provides students with the fundamental concepts and tools needed to understand the role of business analytics in organizations and shows students how to apply basic business analytics tools in a spreadsheet environment. It also includes how to communicate with analytics professionals to effectively use and interpret analytic models and results for making better business decisions. Emphasis is given on applications, concepts and interpretation of results. Students utilize Excel for data analysis.
Prerequisite(s): MSD 200 with a minimum grade of D or MSD 205 with a minimum grade of D.

BDA 205 Introduction to Visual Data Analytics 3 Credits
This course will equip the students with the fundamental skills to perform visual data analytics. Students will learn how to prepare a dataset for visual analysis, create basic and advanced visualizations using Tableau, and “tell a story” using data visualization. At the completion of the course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience.
Prerequisite(s): CIS 185 and BDA 201.

BDA 355 Business Analytics with Python 3 Credits
Python has become essential for data analysis in recent years. Research shows that Python is the most popular and growing programming language for business analytics mainly because it is flexible, easy to learn, easily accessible due to its open-source nature, and well supported by plenty of useful analytics libraries since it is heavily used in industry and academy. This course provides students with the required knowledge of working with popular Python data analytics libraries such as Pandas, NumPy, Matplotlib, SciPy, and Scikit-Learn as well as basic programming with Python such as Python syntax, data structure, conditional statements, and functions. Some topics covered include data retrieval and manipulation with Pandas (Python's most popular library for data analytics) and SQL, data visualization with Matplotlib, statistical distributions with NumPy, hypothesis testing with SciPy, and multiple regression with Scikit-Learn.
Prerequisite(s): BDA 201.

BDA 398 Business Data Analytics Practicum 3 Credits
This course develops and sharpens the skills needed for a successful career in analytical business consulting, such as analysis, critical thinking, presentation, problem solving, and teamwork. This class will develop skills in each of these areas through discussion of the principles underlying best practices and feedback in a series of applied exercises and cases that will prepare students to obtain and succeed in analytical business consulting problems. The students will analyze the data provided by professionals from experts in the field, and they will present the project at the end of the semester.
Prerequisite(s): BDA 205 and BDA 201; Junior or Senior Standing; Completion of 12 credit hours in business analytics coursework or Permission of Instructor.

BDA 399 The Co-Operative Experience 6 Credits
This Co-Operative Experience will provide Business Analytics majors with supervised employment (approximately four months), where the students will have an opportunity to apply what they have learned in their business analytics and other business classes.
Prerequisite(s): Business Analytics major, Junior or Senior standing, GPA of 3.0 or above.

BDA 490 Independent Research and Study 3-4 Credits
Topic to be approved by professor and department chairperson. Available to juniors and seniors.

BDA 491 Business Data Analytics Internship 3 Credits
This Internship course will provide Business Analytics majors students with supervised employment (approximately two months), where the students will have an opportunity to apply what they have learned in their business analytics and other business classes.
Prerequisite(s): Business Analytics major, Junior or Senior standing, GPA of 2.75 or above.

CIS 330 Database Systems 3 Credits
This course involves the study of computer databases. Major topics include relational databases, use of the structured query language (SQL) to query relational databases, and design and maintenance of relational databases.
Prerequisite(s): CIS 185.

CIS 350 Practical Business Analytics with Excel and R 3 Credits
This is a required course for the Business Analytics major/minor. This course will provide the student with an opportunity to gain proficiency in analyzing and visualizing data using both Excel and R. The learning experience includes not only classic data tools, such as PivotTables, VLOOKUP, and data visualization, but also more advanced data tools such as descriptive statistics, inferential statistics, predictive analytics using R, and optimization using Excel Solver.
Prerequisite(s): BDA 201.

CIS 360 Data Mining 3 Credits
This course deals with modern technologies for data analysis. Hands-on exercises for data retrieval, data visualization and predictive analytics will be carried out using up-to-date methodologies and software tools. The full data mining life cycle will be covered from recognizing business problems and opportunities amenable to data mining analysis through deploying and monitoring solutions.
Prerequisite(s): CIS 185 with a minimum grade of D .

Business Basics

Overview

The Business Basics certificate program is designed for students holding an undergraduate degree in areas other than business. The 18–24 credit program includes courses in accounting, computing, economics, finance, legal studies, management and leadership, management science and marketing. The Business Plus certificate program (p. 99) will provide students with a good foundation toward the Master in Business Administration (p. 1329).

Admission Requirements

Minimum admissions requirements for the Business Basics programs are:

- a baccalaureate degree in an area other than Business;
- a 2.5 GPA in all undergraduate work.

Program Completion and Certification

Students must achieve a 2.5 GPA in their coursework with no grade lower than a "C" to successfully complete a Continuing Education Program certificate. Students leaving the Continuing Education Program for any other Rider undergraduate program before earning the certificate will not be eligible for the certificate.

Business Basics Certificate Program Requirements

(18-24 credits)

Code	Title	Credits
Complete the following courses:		
ACC 210	Introduction to Accounting	3
BUS 300	The Legal and Ethical Environment of Business	3
CIS 185	Information Systems Essentials [1]	3
ECO 201	Principles of Microeconomics	3
FIN 220	Introduction to Finance	3
MGT 201	Fund Management & Org Behavior	3
MKT 200	Marketing Principles	3
MSD 105	Quantitative Methods for Business [1]	3
Total Credits		**24**

[1] CIS 185 and MSD 105 may be waived based on prior equivalent work.

Note: If prior equivalent coursework has been completed, substitutions may be made using the courses from the Business Plus Certificate.

Courses and Descriptions

ACC 210 Introduction to Accounting 3 Credits
This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

BUS 300 The Legal and Ethical Environment of Business 3 Credits
The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.
Prerequisite(s): 54 credits.

CIS 185 Information Systems Essentials 3 Credits
This course provides students with a conceptual understanding and hands-on practice with spreadsheets. At the completion of this course students will be able to apply the appropriate information systems technology tools within spreadsheets to a variety of quantitative data-centric analytic activities. This course assumes you have a basic knowledge of Microsoft Windows, Word, Excel, and Web browsers.

ECO 201 Principles of Microeconomics 3 Credits
Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output a re evaluated. Welfare, social control, monopoly, and income inequality a re explored in the light of price theory. The role of the United States in the world economy is explored.
Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

FIN 220 Introduction to Finance 3 Credits
An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.
Prerequisite(s): ACC 210 and ECO 201.

MGT 201 Fund Management & Org Behavior 3 Credits
This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.
Prerequisite(s): minimum 30 credits completed.

MKT 200 Marketing Principles 3 Credits
This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.
Prerequisite(s): 15 credits.

MSD 105 Quantitative Methods for Business 3 Credits
The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.
Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

Business Plus

Business Plus Certificate Overview

The Business Plus certificate program is designed for students holding an undergraduate degree in areas other than business. The 18 credit program includes courses in accounting, business analytics, economics, information systems, operations management, and statistics. The Business Plus certificate program will provide students with a good foundation toward the Master in Business Administration (p. 1329).

Admission Requirements

Minimum admissions requirements for the Business Plus certificate programs are:

- a baccalaureate degree in an area other than Business;
- a 2.5 GPA in all undergraduate work.

Degree Awarded:

- Business Plus Certificate

ECO 200	Principles of Macroeconomics	3
MSD 205	Business Statistics [3]	3
BDA 201	Introduction to Business Analytics	3
MSD 301	Operations Management	3
Total Credits		**18**

1 Prerequisiste: ACC 210
2 Prerequisite: CIS 185
3 Prerequisite: MSD 105

Program Completion and Certification

Students must achieve a 2.5 GPA in their coursework with no grade lower than a 'C' to successfully complete a Continuing Education Program certificate. Students leaving the Continuing Education Program for any other Rider undergraduate program before earning the certificate will not be eligible for the certificate.

Courses and Descriptions

ACC 220 Managerial Uses of Accounting 3 Credits
This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.
Prerequisite(s): ACC 210.

BDA 201 Introduction to Business Analytics 3 Credits
This course introduces students to the process of analyzing big data and discovering new information to support business decision making. The course covers descriptive, predictive, and prescriptive analytics. Some topics covered include data visualization, data forecasting, and data mining. This course provides students with the fundamental concepts and tools needed to understand the role of business analytics in organizations and shows students how to apply basic business analytics tools in a spreadsheet environment. It also includes how to communicate with analytics professionals to effectively use and interpret analytic models and results for making better business decisions. Emphasis is given on applications, concepts and interpretation of results. Students utilize Excel for data analysis.
Prerequisite(s): MSD 200 with a minimum grade of D or MSD 205 with a minimum grade of D.

CIS 385 Management Information Systems 3 Credits
This course will enhance students' digital dexterity and familiarity with existing and emerging information technologies, emphasizing skills of abstraction in relation to digital strategy and organizational change, innovation, analytics, and ethics. This course will also provide hands-on experience with at least one essential business technology. At the completion of the course, students will have an understanding of the business-related, policy, societal, and ethical implications associated with modern information systems.
Prerequisite(s): CIS 185 and junior or senior standing.

ECO 200 Principles of Macroeconomics 3 Credits
A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.
Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

MSD 205 Business Statistics 3 Credits
This course is designed to provide students with fundamental concepts, knowledge and tools from statistics that may be useful in one's attempt to reach intelligent conclusions in real-world settings, particularly in business applications. The focus is on the normal random variable, sampling distributions, framework of estimation and hypothesis testing, as well as the one-way ANOVA and simple regression model.
Prerequisite(s): MSD 105.

MSD 301 Operations Management 3 Credits
This course introduces students to the concepts and techniques necessary to manage firm operations. The course emphasizes enhancing students' ability in problem-solving and decision-making by (1) identifying operations problems, (2) structuring decision-making process, (3) evaluating options that provide resolution of the problems using appropriate and proven techniques. It is well recognized that today's global business competition is among supply chains. Operations management concentrates on the supply side of the corporate strategy of a supply chain, where the bulk of the organization resources are committed. Good management of operations, which may also be called management of supply chain operations, is crucial in achieving an effective supply chain. The emphasis on systematic thinking and analytic decision model discussed the course will also provide students with necessary skills and useful tools in the emerging field of Business Analytics.
Prerequisite(s): MSD 200 or MSD 205 or MTH 341.

Chemistry B.S. / Chemistry B.A.

Program Overview

Students in the chemistry major will find themselves taking part in small classes that encourage close and frequent interaction between students and professors, helping to create a stimulating learning environment.

Students in this major are offered abundant research opportunities (https://www.rider.edu/academics/colleges-schools/college-arts-sciences/science-technology-math/faculty-departments/earth-chemical-sciences/student-research/) both during the academic year and during the summer months. Faculty are engaged in research projects which lend themselves to undergraduate participation. In tackling the challenge of advanced and independent laboratory work, students begin to understand the nature of science and the scientific method. Participation in research by all students is strongly encouraged, as it builds a greater appreciation of the nature of their chosen field. The opportunity to perform independent research has motivated many students to continue their education either in an accredited graduate program or in a professional school in a number of medical fields.

Often, faculty and students jointly present their research results at national professional meetings, the Rider Independent Scholarly Research & Creative Activities Presentations (ISCAP) Day (https://www.rider.edu/academics/additional-programs/research-opportunities/iscap-day/), or as written research papers submitted to scholarly journals.

The Bachelor of Science (B.S.) program has been approved by the American Chemical Society (https://www.acs.org/) (ACS), which means that it is nationally recognized as providing adequate experimental skills, oral and written communication skills, and knowledge that prepares students to be future professionals in the chemical sciences. Chemistry students at Rider University have challenging and engaging experiences in the five areas of chemistry: analytical, inorganic, organic, physical chemistry, and biochemistry.

Curriculum Overview

Core chemistry classes include one year of general chemistry, one year of organic chemistry, quantitative analysis, biochemistry, physical chemistry and inorganic chemistry. Students must also take two semesters each of calculus and physics. Advanced chemistry courses include biochemistry II, medicinal chemistry, physical organic chemistry, chemical bonding, and more. Students must also earn four lab credits from the following courses: biochemistry I lab, biochemistry II lab, advanced organic

synthesis and spectroscopy, computational chemistry lab, and physical organic chemistry.

Student Learning Outcomes

Graduates of the Chemistry major will demonstrate the ability to:

- Apply their chemical knowledge and make predictions about the outcome of fundamental chemical processes.
- Generate and interpret raw data from standard research instrumentation and computational tools.
- Utilize databases to locate relevant primary literature articles and evaluate the validity of resources.
- Communicate data and advanced chemical concepts via meaningful and effective representations in both oral and written forms.

Degrees Offered:

- B.S. in Chemistry
- B.A. in Chemistry
- Minor in Chemistry

Requirements for the Chemistry B.S. Major (p. 101)

Requirements for the Chemistry B.A. Major (p. 101)

Requirements for the Chemistry (B.S.) Major

(62 credits)

All students seeking a degree in chemistry through the College of Arts and Sciences will be enrolled in the Bachelor of Science (B.S.) program. The program is approved by the American Chemical Society (ACS) and students who graduate with the B.S. degree will be certified and recognized by the ACS.

Students who do not require certification by the ACS or who cannot use a full eight semesters to earn a B.S. in chemistry should consider the Bachelor of Arts (B.A.) degree.

[1] CHE 420 counts as a three credit course and one lab credit only.
[2] Lab courses count for one or two credits (see course descriptions).

Requirements for the Chemistry (B.A.) Major

(52 credits)

The Bachelor of Arts (B.A.) program consists of 52 credits in the major and is designed for students who may desire a chemistry degree, but do not have a full eight semesters to commit to the program. Such students

may be those enrolled in the College of Education and Human Services, transfer students or students choosing a second major.

Students in the College of Education and Human Services who declare a second major in Chemistry will automatically be enrolled in the B.A. program. Other students seeking to enroll must consult with the chairperson of the Department of Earth and Chemical Sciences before being considered for this program.

The B.A. in Chemistry does explore the five sub-disciplines of chemistry and does have a laboratory component. However, the depth of student exploration in the chemical sciences is not sufficient enough to attain certification by the ACS.

Chemistry or biochemistry courses at the 200 level or above, six credits of which must be at the 300 level or above. At least one course must be taken in three of the five disciplines: organic chemistry, inorganic chemistry, biochemistry, physical chemistry and analytical chemistry		12
Total Credits		**24**

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

[2] Please note that elective credits may be used to complete requirements in a second major or minor.

Note:

1. Math and Science general education requirements are included in the major.

Courses and Descriptions

CHE 100 Intro to College Chemistry 3 Credits
Open to all students, but designed primarily for those who wish to major in a science which requires chemistry but whose chemistry background is not sufficient to allow entrance into Chemistry 120. It focuses on the nomenclature used in chemistry including the symbols used to designate the chemical elements, the construction of chemical formulas, and the writing and balancing of chemical equations. Other topics will include interpreting the Periodic Table, the valences of the elements, the mole concept, and simple stoichiometry. In addition, chemical calculations involving units, scientific notation, significant figures, and the algebraic manipulations of simple equations will be included. Three hours of lecture per week. This course does not satisfy the requirements for the biochemistry or chemistry degree, but does satisfy the core requirements for education and business majors.

CHE 110 Survey of General Chemistry 4 Credits
A one-semester survey of basic general chemical principles designed to be applied to questions in health-related fields. Students will explore the fundamental structures of atoms and simple compounds that comprise living beings; basic patterns in chemical reactivity, especially oxidation-reduction and acid-base reactions; quantitative analyses of biologically-relevant compounds and chemical reactions; properties of substances; and kinetic and thermodynamic principles underlying such chemicals and chemical processes. In the laboratory portion of this course, students will learn and apply principles of experimental safety and will apply knowledge gained in the class via application in basic experimental contexts. No prerequisites. Students who have completed CHE 120 and/or CHE 122 will not be permitted to enroll in CHE110/110L. Furthermore CHE 110 will not serve as a prerequisite for CHE 122.

CHE 110L Survey of Gen Chemistry Lab 0 Credits
In the laboratory portion of this course, students will learn and apply principles of experimental safety and will apply knowledge gained in the class via application in basic experimental contexts.

CHE 114 Chemistry in the Kitchen 4 Credits
Chemistry permeates aspects of our daily lives in which we are often unaware. In this course, students will learn the core tenets of chemistry including atomic and molecular structure, bonding, intermolecular and macromolecular interactions, and chemical reactivity, and will personally investigate these properties in the context of cooking, baking, metabolism, and other kitchen-related activities. This 4-credit course will include a weekly 3-hour lab in which students will perform experiments that allow them to prepare dishes that illustrate key chemical concepts. As part of the course, students will collaborate with the Trenton Area Soup Kitchen to prepare and serve food to the community, as well as share their understanding about the chemical properties that are involved in the development of various dishes. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.
Corequisite(s): CHE 114L.

CHE 114L Chemistry in the Kitchen Lab 0 Credits
This is the laboratory portion of CHE 114.
Corequisite(s): CHE 114.

CHE 115 Chemistry & Society 3 Credits
Designed to give the nonscientist an appreciation of the role of chemistry in today's world. The approach is conceptual rather than mathematical. Topics include basic principles of chemical theory, energy sources, elementary organic chemistry, drugs, food additives, polymers, chemistry of living systems, inorganic solids in modern technology, and problems involving pollution of the environment. Three hours of lecture per week. This course satisfies the core requirements for education and business majors.

CHE 118 Exploration of Chemical Principles 4 Credits
A one-semester introduction to the principles of chemical sciences. Students will utilize inquiry-based learning methods to examine contextual problems as a means to explore introductory models and concepts of chemistry. Students will also gain an understanding of how scientific models are used to explain experimental observations. The laboratory component of this course is designed to provide students with an experimental context within which to develop some of the models described in the classroom. Three hours of lecture and one three-hour lab per week.

CHE 118L Exploration of Chemical Principles Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): CHE 118.

CHE 120 Principles of Chemistry 3 Credits
For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.
Corequisite(s): CHE 121.

CHE 121 Principles of Chemistry Lab 1 Credits
For students concurrently taking CHE 120. Experiments involve gravimetric, volumetric, and spectrophotometric quantitative analysis. One three-hour lab per week. Fall.

CHE 122 Intro to Chemical Systems 3 Credits
A continuation of CHE 120. For students majoring in the sciences but may be taken by others. Chemical systems in which the study of kinetics, thermodynamics, equilibrium, and radiochemistry are emphasized. Three hours of lecture per week. Prerequisite(s): CHE 120, MTH 105 or higher.
Corequisite(s): CHE 123.

CHE 123 Quantitative Methods Lab 1 Credits
Usually taken concurrently with CHE 122. Primarily for students majoring in the sciences. A number of quantitative classical and instrumental methods of analysis are used to determine thermodynamic properties and reaction mechanisms. One three-hour lab per week. Prerequisite(s): CHE 121.
Corequisite(s): CHE 122.

CHE 211 Organic Chemistry I 4 Credits
The structure, chemical properties, and methods of preparation of the more important classes of carbon compounds are studied, with an emphasis on the relationship of structure, stereochemistry, and conformation to chemical reactivity. The preparation and reactivity of organic functional groups is introduced. The use of infrared and nuclear magnetic resonance spectroscopy, and mass spectrometry for elucidating structures of organic molecules is discussed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 120, CHE 121.
Corequisite(s): CHE 211L.

CHE 211L Organic Chemistry I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): CHE 211.

CHE 214 Organic Chemistry II 4 Credits
A continuation of Chemistry 211, emphasizing the mechanism of organic reactions, structural interpretations of properties, preparations, reactivity and identification of organic compounds. Three hours of lecture and one three-hour lab per week.
Prerequisite(s): CHE 211 and CHE 211L.

CHE 214L Organic Chemistry II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): CHE 214.

CHE 225 Introduction to Organic and Biochemistry 4 Credits
An introductory course describing the basic principles of organic chemistry and biochemistry as they relate to human metabolism and disease. The nature of the chemical structure and reactivity of organic functional groups such as alcohols, aldehydes, ketones, carboxylic acids and amines will be presented with biological processes in mind. The biochemistry of the macromolecules DNA, RNA, proteins, carbohydrates and lipids will be discussed leading in to a discussion of some of the more important metabolic pathways. This course is intended for science majors who do not take the full two semester sequence of organic chemistry and two semesters of biochemistry and desire a background in biochemistry. Non-science major students who have had one semester of general chemistry and one semester of biology may also enroll in the course. Three hours of lecture and one three-hour lab per week.
Prerequisite(s): (CHE 110 UG D and CHE 110L) or (CHE 122 UG D and CHE 123) and BIO 115 .

Corequisite(s): CHE 225L.

CHE 225L Introduction to Organic and Biochemistry Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (CHE 110 UG D and CHE 110L) or (CHE 122 UG D and CHE 123) and BIO 115
Corequisite(s): CHE 225.

CHE 250 Quantitative Analysis and Statistics Methods 4 Credits
This course will provide a deeper exploration of topics in chemistry that are steeped in numerical analysis. These topics include advanced analysis of equilibrium systems, acid-base systems and electrochemical systems. Additional detail will be given to methods of chemical measurement, statistical methods of data analysis and determination of data validity and reliability. Both lecture and laboratory will show an emphasis on using computer-based tools to analyze experimental data. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 122 & CHE 123
Corequisite(s): CHE 250L.

CHE 250L Quantitative Analysis and Statistical Methods Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): CHE 250.

CHE 305 Physical Chemistry I 3 Credits
The mathematic and conceptual foundations of physical chemistry will be introduced with an over-arching theme of determination of energy allocation within atomic and molecular systems. Topics will include determination and measurement of energy states in atoms and molecules, simple quantum mechanical systems, distribution of energies and the connection to thermodynamic quantities, the three laws of thermodynamics, spontaneity, equilibrium and experimental kinetics.
Prerequisite(s): CHE 122, CHE 214, MTH 211, PHY 201.

CHE 306 Physical Chemistry II 3 Credits
Physical chemistry concepts are explored in more detail with emphasis on examination of systems that require multiple models in physical chemistry to explain. Topics will include, kinetic theory and transition state theory, statistical mechanics and its connections to thermodynamic functions, temperature dependence of spontaneity and equilibrium, the thermodynamics of condensed phases and multi-component equilibria, electrochemistry, multi-electron quantum mechanical systems, approximations in quantum mechanics, symmetry and advanced molecular spectroscopy.
Prerequisite(s): CHE 305, MTH 211.

CHE 315 Inorganic Chemistry 3 Credits
The periodic table as a tool for predicting the physical and chemical properties of chemical systems is developed and examined in conjunction with various theories of bonding, including valence bond, molecular orbital, valence shell electron repulsion, and ligand field theory. Emphasizes structure of crystalline solids, coordination compounds, reaction mechanisms, and structure-property relationships. Three hours of lecture per week.
Prerequisite(s): CHE 122, CHE 214.

CHE 316 Inorganic Chemistry Laboratory 1 Credits
Students will explore a variety of synthetic methodologies for the growth of inorganic molecular systems, and solid-state materials. A transition metal or main group metal plays a central structural role in all systems that will be examined. Modern analytical methods will be applied to characterize synthesis products, such as FT-IR spectroscopy, polarimetry, NMR, and powder X-ray diffraction analysis. Prerequisite(s): CHE 123, CHE 214.
Corequisite: CHE 315.

CHE 320 Polymer Chemistry 3 Credits
Designed to acquaint students with the structure and properties of polymers, the contrast between small molecules and polymers, methods of measuring molecular weight, the mechanism of polymerization, and the methods of fabricating polymers.
Prerequisite(s): CHE 211.

CHE 325 Physical Chemistry Laboratory 1 Credits
Measurements are made of physical properties of molecules and chemical dynamical processes. These measurements will be used to develop models which explain the physical chemical nature of the systems under examination. Experiments will utilize various instrumental techniques such as infrared spectrometry, nuclear magnetic resonance, fluorescence and UV/Vis spectrometry. One three-hour lab per week.
Prerequisite(s): CHE 250, CHE 305.

CHE 330 Instrumental Analysis Laboratory 2 Credits
This course is designed to give students practical experience using modern analytical instrumentation and to provide students with the background theory and principles of operation. The instrumental methods introduced in this course include: ultraviolet and visible spectroscopy, atomic emission spectroscopy, gas chromatography (GC), high performance liquid chromatography (HPLC), X-ray powder diffraction analysis and electrochemical analysis. This experimental laboratory course meets two times per week with three hours for each session. One session will be focused on instrumentation background theory and discussion and the other session will be experimental practice.
Prerequisite(s): CHE 214, CHE 250, PHY 201.

CHE 340 Environmental Chemistry 3 Credits
This course is an advanced quantitative and qualitative study of the sources of environmental pollutants, their chemical reactions and mechanism of formation, their fate in the environment, and ultimately their impact on environmental systems and services including ozone cycling, ozone hole formation, smog formation, heavy metals in drinking water, energy, and global climate change. This course will review scientific literature to identify advances in science and technology to combat these environmental problems. The course is aimed principally at chemistry majors, but other science majors that desire a chemical understanding of the environment and meet the course prerequisites are welcome. This course satisfies the global perspectives (GP) requirement at Rider University. Recommended courses include MTH 210 and CHE 250.
Prerequisite(s): (CHE 211 and 211L) or (BCH 225 and 225L) or (CHE 225 and CHE 225L) and MTH 105 or higher.

CHE 350 Advanced Organic Synthesis 2 Credits
The first of four experimental chemistry labs designed for chemistry majors. It presents the use of modern techniques, and instrumentation in organic chemistry, including distillation, chromatography, infrared, ultraviolet, nuclear magnetic spectroscopy, and mass spectrometry. Two three-hour labs per week.
Prerequisite(s): CHE 214.

CHE 375 Computational Chemistry Lab 2 Credits
This course will provide students with a means to explore various methods in computational chemistry. Basic computational methods will be developed from first principles and these methods will then be tested using various modeling and computational software packages. Methods will include, but are not limited to, molecular mechanics, semi-empirical molecular orbital calculations, ab initio methods, and density functional calculations. Students will be exposed to various computational software packages and the strengths and limitations of each methodology will be explored. The course will meet in a computer laboratory for two for three-hour lab periods a week.
Prerequisite(s): CHE 305.

CHE 400 Chemical Bonding 3 Credits
The effects of the chemical bond on the structure and properties of molecules are investigated. Molecular orbital theories of bonding are introduced. Emphasis is placed on group theoretical methods utilizing molecular symmetry to simplify the description of the electronic structure of molecules and to predict their geometric structures and reactivity. Three hours of lecture per week.
Prerequisite(s): CHE 305, MTH 212.

CHE 415 Special Topics in Chemistry 3 Credits
An advanced level of one or more areas of modern chemistry. Emphasis on research and the literature of an area of current importance. Three hours of lecture per week.

CHE 420 Physical Organic Chemistry 4 Credits
In-depth studies of the methods for elucidating mechanisms of organic reactions for students who have completed one year of organic chemistry and physical chemistry. Topics include conformational analysis, linear free energy relationships, frontier molecular orbital theory, transition state theory, and chemical reaction kinetics. Isotopic scrambling, kinetic isotope effects, NMR and IR spectroscopy, polarimetry, and ultraviolet-visible spectrophotometry will be employed to investigate these concepts. Three hours of lecture and one three-hour lab per week.
Prerequisite(s): CHE 214, CHE 305.
Corequisite(s): CHE 214L.

CHE 420L Physical Organic Chemistry Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): CHE 420.

CHE 490 Independent Study: Research and Creative Expression 1-4 Credits
Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

CHE 491 Internship in Chemistry 1-4 Credits
A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in a private, public, non-profit, or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 50 hours of internship per credit is required. The grade for the course will be determined by the students' overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester.
Prerequisite(s): 2.5 GPA and permission of the instructor.

Chinese

Program Overview

The Chinese minor is a valuable supplement to any degree programs in Business, Education, Music, and Arts and Sciences. It broadens your horizon, enhances your resume, and allows you to prepare for and pursue careers in business, government, education, translation, national security, military intelligence, communications, travel, and more. Many Rider students who graduated with a Chinese minor have shared with us their experience of how it gave them a competitive edge over other applicants and helped them get their dream job or to get accepted into the graduate program they applied for. In addition, a Chinese minor opens doors for you to teach or work in China, Taiwan, Singapore, Malaysia, and Hong Kong. Through a vigorous and exciting minor program, you will be ushered into a fascinating culture that is not only rich and colorful but also ancient and modern at the same time. And the minor curriculum may include study abroad or a travel course if you choose to do so.

A Surprising Fact: Chinese is comparatively easy to learn!

- No verbal conjugations needed (no need to memorize verb tenses)
- No noun declension needed (no gender or number distinctions)

Students in the Chinese minor will acquire an international perspective and a special intercultural sensitivity. Advanced foreign language skills combined with intercultural expertise increase the employment prospects of our students in the global marketplace.

Degree Offered

- Minor in Chinese

Chinese Minor Requirements

(18 Credits)

Note: Our 18-credit minor creates a comprehensive learning experience with courses in Chinese language, culture, literature, composition, and phonetics and conversation. Students must receive a grade of "C" or better in courses required for the major or minor in the department. If a student receives a grade lower than "C" in a required course, the student must meet with his/her academic advisor to discuss the appropriate action that must be taken to remedy the situation.

Some of the requirements for the minor may be met by Study Abroad, upon agreement by the department. Students must enroll in at least one upper level course upon completion of a Study Abroad program.

Note that CHI 101 Chinese II counts towards the minor, which means you can use this course for both Foreign Language (Core) requirements and Chinese minor (double-dipping). Once you complete Chinese II, you are only 5 courses (15 credits) away from completing the minor.

Code	Title	Credits

CHI 490	Independent Study: Research and Creative Expression	
CHI 500	Democracy, Revolution/Reform and Literary Movement in Modern China	
Total Credits		**18**

[1] If original placement test is determined to be above these courses, 300- or 400- level courses may be taken instead.

Courses and Descriptions

CHI 100 Chinese I 3 Credits
This course is designed to foster mastery of the basic skills of Mandarin Chinese: speaking, listening, reading, and writing. The focus of the course is on communicative competency and accuracy. Together with Chinese 101, the course provides a thorough foundation in basic Chinese grammar. Students will have opportunities to work extensively with audio and/or video resources/ materials and other technology, and above all, students from China. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.
Prerequisite(s): placement test if Chinese has been studied elsewhere.

CHI 101 Chinese II 3 Credits
A continuation of CHI 100. This course continues to foster mastery of the basic skills of Mandarin Chinese: speaking, listening, reading and writing. The focus of the course is on communicative competency and accuracy. Together with Chinese I, the course provides a thorough foundation in basic Chinese grammar. Students will have opportunities to work extensively with audio and/or video resources/ materials and other technology and above all, students from China. This course counts towards the fulfillment of the Essential Competencies element of the CAS general education curriculum.
Prerequisite(s): CHI 100 or placement test.

CHI 200 Chinese III 3 Credits
This course is designed to foster mastery of the intermediate skills of Mandarin Chinese: speaking, listening, reading, and writing. The focus of the course is on communicative competency and accuracy. Together with Chinese 201, the course provides intermediate-level Chinese grammar, vocabulary, and cultural knowledge through the use of film clips, simple newspaper articles, the Internet, and other multimedia resources. Students are required to work extensively with audio and/ or video resources/ materials and other technology and they have a unique opportunity to work with students from China. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.
Prerequisite(s): CHI 101 or placement test.

CHI 201 Chinese IV 3 Credits
This course is designed to foster mastery of the intermediate skills of Mandarin Chinese: speaking, listening, reading, and writing. The focus is on communicative competency and accuracy. Together with CHI 200, the course provides intermediate-level Chinese grammar, vocabulary, and cultural knowledge through the use of film clips, simple newspaper articles, the Internet, and other multimedia resources. Students are required to work extensively with audio and/or video resources/ materials and other technology and they have a unique opportunity to work with students from China. This course counts towards the fulfillment of the Essential Competencies element of the CAS general education curriculum.
Prerequisite(s): CHI 200 or placement test.

CHI 300 Advanced Chinese Reading and Composition 3 Credits
This course develops Chinese reading and writing skills within a cultural context and aided by a systematic review and expansion of grammar and vocabulary. Using literary, journalistic, business and other sources, students learn various writing discourses and their Chinese variants including narration, description, exposition, and journalistic, business documentation and letter writing. Some translation is used to encourage linguistic analysis. Interviews with native speakers, Chinese Americans, and working with students from China enhance the cultural understanding of students necessary for meaningful reading and writing. **Prerequisite**(s): CHI 201 or placement test.

CHI 307 Images of Women in Chinese Literature and Film 3 Credits
This course will introduce students to the (change of) status of women in China through literature and film. Students will explore the rich Chinese literary traditions and examine how the images of women are represented by both male and female writers/directors in fiction and film of different historical periods. In the process of such exploration and examination, students will also examine how the literary movements and their historical, social, cultural and political contexts shape, and are shaped by, each other. They will learn to understand how diverse the experiences of Chinese women are. While students will be exposed to both classic and modern/contemporary literary traditions, the focus will be on the latter, such as May 4th New Culture Movement, Maoist revolutionary literature, (Post-Mao) Wound/Scar Literature, Root-Searching Literature, etc. Classes are in English.

CHI 310 Chinese Culture and Civilization 3 Credits
This course introduces students to Chinese Civilization and Culture. Through reading, viewing, discussion, and presentation, students will have a chance to "experience" Chinese cultural riches and "interact with" its long history, religions, philosophies, literature and art, politics, as well as its different peoples and diverse customs. We will learn about China's ancient dynasties and its cultural and aesthetic achievements in the past, and its modern revolutions, nationalism, communism, and post-Mao economic and political reforms today. We will also explore Chinese customs, particularly festivals, and try to gain an appreciation of different social relationships and diverse cultural practices. No knowledge of Chinese required. This course offers an optional TRIP TO CHINA during Spring Break or in May WHICH WILL EARN 3 ENGAGED LEARNING POINTS. Interested students must register for the travel course separately from taking CHI 310.

CHI 311 Calligraphy As a Window to Chinese Language and Culture 3 Credits
This course provides students with a chance to gain an intimate knowledge of Chinese language and culture through calligraphy. Students will learn the basic principles and techniques of writing Chinese characters with the writing brush. They will be introduced to the pronunciation, the composition and evolution of Chinese characters so that they will be able to read and understand what they write. Students will also learn how calligraphy is immersed in various aspects of Chinese culture. The main content of the course derives from examining applications of calligraphy to poetry, painting, and core concepts of Confucianism, Daoism and Buddhism. They will have a chance to cross time and space, having dialogues with Confucius, experiencing Buddhist bliss of final "awakening" or "enlightenment" and abandoning themselves to the Daoist spontaneous flow with the movement of Nature and the cosmos. No knowledge of Chinese language is required.

CHI 490 Independent Study: Research and Creative Expression 1-4 Credits
Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

CHI 500 Democracy, Revolution/Reform and Literary Movement in Modern China 3 Credits
This course will exam representative works in modern and contemporary Chinese literature from the May 4th period to the "Red Classics Era" or to various Post-Cultural Revolution literary movements, situating them in their social, political, and historical contexts, exploring them as an imaginary space where various cultural and political values are contested, a space where modern Chinese identity is defined and redefined, and a space against which the trajectory of China's search for democracy and modernization is mapped. The literary movements that will be examined are May 4th Literary Movement at the beginning of the 20th century; Maoist / Communist Literature from 1949 to the Great Cultural Revolution (1966-1976); Wound/Scar Literature from the late 1970s to early 1980s; Root-searching literature from mid-1980s to the late 1980s; Postmodern Play Literature and Reform Literature from 1990s to the present.

IND 210 Global Encounters 3 Credits
This course provides students with an exposure to foreign cultures consisting of both travel and study components. Destinations may include countries in Europe, Latin America, or Asia. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political, and aesthetic cultural components appropriate to the location(s) visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. A travel fee is required. No foreign language skills are required unless otherwise indicated.

Chinese and Asian Area Studies

Program Overview

Chinese and Asian area studies is a multi-disciplinary minor that aims to provide students with a complex and interrelated knowledge base from which to understand China as a historical and cultural entity. The minor incorporates the study of language, the humanities and the social sciences. Students are encouraged to incorporate study abroad in their program and can complete the minor with an independent research project.

The minor, drawing on the breadth and strengths of departments in the Liberal Arts, will guide students into the field systematically through course work and education abroad opportunities as well as co-curricular activities such as lectures, symposia, colloquia, film festivals, and other events that will help students understand the matrix of Chinese culture. Students will come to understand China in its geographic, topographical and climatological richness; its linguistic, demographic, social, and other cultural formations; and its national and regional, social and political developments. Each student will work with an adviser to help them create

a set of courses that provides a system and structure to the student's academic development.

[1] Students who place out of CHI 200 must take CHI 201 and one additional Chinese language course at the 300 or 400 level. Students who place out of CHI 200 and CHI 201 must complete one Chinese language course at the 300 or 400 level.

Notes:

1. Study Abroad or domestic experience within a Chinese linguistic context or business environment - study, service-learning or internships - may meet some of the minor requirements upon consultation with the student's advisor. Students must take at least one course in the Chinese and Asian Area Studies Minor upon completion of Study Abroad or a domestic experience as described above.
2. Independent Research and Study courses and Baccalaureate Honors courses may be substituted in consultation with the Area Studies Program director.
3. Students must receive a grade of "C" or better in courses required for the major or minor in the department. If a student receives a grade lower than "C" in a required course, the student must meet with his/her academic advisor to discuss the appropriate action that must be taken to remedy the situation.

Courses and Descriptions

CHI 150 Chinese Culture and Basic Language 3 Credits
This course integrates beginning-level functional Mandarin Chinese language skills acquisition with the knowledge of Chinese business practices and culture as well as hands-on information and strategies for successful inter-cultural encounters. Students gain practical basic language skills through classroom practice and the use of audio/video and computer materials. Readings, films, documentaries, and lectures in English by members of the business community enable students to integrate language acquisition with practical cultural knowledge and cross-cultural awareness. Examination of Chinese customs highlights social relationships and cultural practices. No knowledge of Chinese language is required. This course does not fulfill the CLAS foreign language requirement.

CHI 200 Chinese III 3 Credits
This course is designed to foster mastery of the intermediate skills of Mandarin Chinese: speaking, listening, reading, and writing. The focus of the course is on communicative competency and accuracy. Together with Chinese 201, the course provides intermediate-level Chinese grammar, vocabulary, and cultural knowledge through the use of film clips, simple newspaper articles, the Internet, and other multimedia resources. Students are required to work extensively with audio and/or video resources/ materials and other technology and they have a unique opportunity to work with students from China. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.
Prerequisite(s): CHI 101 or placement test.

CHI 201 Chinese IV 3 Credits
This course is designed to foster mastery of the intermediate skills of Mandarin Chinese: speaking, listening, reading, and writing. The focus is on communicative competency and accuracy. Together with CHI 200, the course provides intermediate-level Chinese grammar, vocabulary, and cultural knowledge through the use of film clips, simple newspaper articles, the Internet, and other multimedia resources. Students are required to work extensively with audio and/or video resources/ materials and other technology and they have a unique opportunity to work with students from China. This course counts towards the fulfillment of the Essential Competencies element of the CAS general education curriculum.
Prerequisite(s): CHI 200 or placement test.

CHI 300 Advanced Chinese Reading and Composition 3 Credits
This course develops Chinese reading and writing skills within a cultural context and aided by a systematic review and expansion of grammar and vocabulary. Using literary, journalistic, business and other sources, students learn various writing discourses and their Chinese variants including narration, description, exposition, and journalistic, business documentation and letter writing. Some translation is used to encourage linguistic analysis. Interviews with native speakers, Chinese Americans, and working with students from China enhance the cultural understanding of students necessary for meaningful reading and writing.
Prerequisite(s): CHI 201 or placement test.

CHI 307 Images of Women in Chinese Literature and Film 3 Credits
This course will introduce students to the (change of) status of women in China through literature and film. Students will explore the rich Chinese literary traditions and examine how the images of women are represented by both male and female writers/directors in fiction and film of different historical periods. In the process of such exploration and examination, students will also examine how the literary movements and their historical, social, cultural and political contexts shape, and are shaped by, each other. They will learn to understand how diverse the experiences of Chinese women are. While students will be exposed to both classic and modern/contemporary literary traditions, the focus will be on the latter, such as May 4th New Culture Movement, Maoist revolutionary literature, (Post-Mao) Wound/Scar Literature, Root-Searching Literature, etc. Classes are in English.

CHI 310 Chinese Culture and Civilization 3 Credits
This course introduces students to Chinese Civilization and Culture. Through reading, viewing, discussion, and presentation, students will have a chance to "experience" Chinese cultural riches and "interact with" its long history, religions, philosophies, literature and art, politics, as well as its different peoples and diverse customs. We will learn about China's ancient dynasties and its cultural and aesthetic achievements in the past, and its modern revolutions, nationalism, communism, and post-Mao economic and political reforms today. We will also explore Chinese customs, particularly festivals, and try to gain an appreciation of different social relationships and diverse cultural practices. No knowledge of Chinese required. This course offers an optional TRIP TO CHINA during Spring Break or in May WHICH WILL EARN 3 ENGAGED LEARNING POINTS. Interested students must register for the travel course separately from taking CHI 310.

CHI 311 Calligraphy As a Window to Chinese Language and Culture 3 Credits
This course provides students with a chance to gain an intimate knowledge of Chinese language and culture through calligraphy. Students will learn the basic principles and techniques of writing Chinese characters with the writing brush. They will be introduced to the pronunciation, the composition and evolution of Chinese characters so that they will be able to read and understand what they write. Students will also learn how calligraphy is immersed in various aspects of Chinese culture. The main content of the course derives from examining applications of calligraphy to poetry, painting, and core concepts of Confucianism, Daoism and Buddhism. They will have a chance to cross time and space, having dialogues with Confucius, experiencing Buddhist bliss of final "awakening" or "enlightenment" and abandoning themselves to the Daoist spontaneous flow with the movement of Nature and the cosmos. No knowledge of Chinese language is required.

COM 352 Chinese and American Intercultural Communication 3 Credits
Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator.

HIS 286 Modern East Asia 3 Credits
Examines the disintegration of the Ch'ing dynasty in China and the Tokugawa Shogunate in Japan under internal stresses and foreign incursions, and the varied experience of those states in coming to terms with the challenges of modernization and westernization. Covers political, economic, social, and cultural factors in China, Japan, and East Asia.

HIS 341 China in Revolution 3 Credits
Treats the Chinese Revolution in terms of political, economic, and social transformation.

HIS 342 Women in East Asia 3 Credits
Treats the history of the relationship between women and society in traditional East Asia and the modern transformation of their relationship.

PHL 207 Asian Philosophy 3 Credits
A survey of the principal philosophical perspectives of Asia. Emphasis on the traditional Indian schools of Hinduism, Jainism, and Buddhism, Chinese Confucianism and Taoism, and the development of Zen Buddhism in China and Japan. Philosophical topics include: mystical experience, the ultimate nature of reality, the existence of a soul, the causes of human suffering, and the possibility of release, the nature of virtue and its development, and the nature of society and government. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 358 Chinese Philosophy 3 Credits
Consideration of major movements in the philosophical tradition of China. Emphasis on the political philosophies of ancient China. Topics include: human nature and the development of virtue, the nature and purpose of government, and the cognitive value of mystical experience. Philosophers such as Confucius, Laozi, Xunzi, Mencius, Mozi, and Zhuangzi will be read and discussed.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

SOC 341 Developing Societies 3 Credits
Examines theories explaining patterns of development; indicators and measures of social well-being; and problems such as population, hunger and environmental crises in developing countries. Focuses especially on patterns of development in Latin America or China.
Prerequisite(s): SOC 101.

Communication Studies

Program Overview

In Rider's Communication Studies program, students hone their writing, research, verbal and nonverbal communication skills, all of which are vital for people entering the communication fields. By stressing the importance of both verbal and nonverbal proficiency, the program provides students with the skills and confidence they need to become successful as they begin their careers. In addition, most students participate in internships in order to supplement classroom learning and move into their career of choice upon graduation.

Curriculum Overview

In addition to the department and major core courses, students can take a variety of courses that will allow them to delve into specific areas of interest. These particular interest areas include but are not limited to communication and culture, organizational communication, communication, and popular culture, or advocacy. In the capstone course, students bring together their research and presentation skills as they conduct comprehensive research on topics of their choosing, learning from faculty who themselves are researchers in the field.

Students also have the opportunity, even in their first year, to write and present academic research papers and showcase their work at undergraduate conferences both locally and regionally. Students graduate with the skills needed to critically analyze a problem, research possible answers, evaluate information, and report findings in an accessible manner. In a fast-changing world, these are invaluable skills.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits
Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits
Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 104 Speech Communication 3 Credits
Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 104S Intro to Speech Communication 1 Credits
As part of the EOP program, this course is designed to improve the speaking and language skills of new college students. Through directed practice, students have the opportunity to develop poise and confidence in oral communication, as well as competence in analyzing and synthesizing messages. Emphasis is placed on development, organization, and delivery of speeches. To receive credit, a grade of "C" or higher must be earned. Students who receive credit for COM 104S may not take COM 104.

COM 105 Communication, Culture and Media 3 Credits
Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 106 Writing for the Communication Professions 3 Credits
Provides students with written communication writing strategies and tools. Applies theory and practice in communication to targeted audiences. Emphasizes the critical role writing plays in the communication workplace and provides an opportunity to evaluate and respond to real-life writing samples and situations.

COM 107 Writing for the Media 3 Credits
Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 110 Digital Survival Skills: Media Literacy and Critical Thinking 3 Credits
This course is designed to help students critically engage with the digital media they encounter in their daily lives and build savvy skills to navigate this endless online world of information and proliferating disinformation. The course examines the digital communication, information, entertainment -- and even surveillance – that surrounds us all. Critical engagement includes understanding theories used to study the power of these media and practical techniques to assess the accuracy of digital content.

COM 131 Fundamentals of Video Production 3 Credits
Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 150 Introduction to Critical Media 3 Credits
In this course, media is understood as any communication outlet or tool used to deliver information or data to a large number of people. This includes various components of the mass media communications industry, such as print media, publishing, news media, photography, popular culture artifacts (such as movies and film), broadcasting, advertising, billboards, etc. As such, this course teaches students how to think critically about the power and influence of mass media in their daily lives and the lives of others. The course is designed to teach students how to analyze mass mediated messages through a variety of theoretical and analytical frameworks through the lens of hegemonic discourse and power dynamics. These perspectives and approaches include, but are not limited to: Marxist, queer, psychoanalytical, rhetorical and feminist perspectives. Emphasis will be placed on the ways the media produce and reproduce societal norms, expectations and taken-for-granted beliefs. This course will provide insights into our understanding of the relationship between media and one's attitudes, values and beliefs.

COM 201 Communication Theory 3 Credits
Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 202 Color Theory 3 Credits
Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 203 Introduction to Social Media 3 Credits
Introduces the tools and techniques of social media as an effective means of communication in a variety of organizational settings. Students will practice with a variety of social media platforms, explore the roles and responsibilities of a social media manager, discuss the importance of establishing social media policies, and learn how to develop a social media strategy as well as how to measure its effectiveness through social media analytics. In addition, students will discuss important issues such as how to handle an online crisis, and the legal and ethical implications of digital communication.

COM 204 Advanced Speech Communication 3 Credits
Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.
Prerequisite(s): COM 104 or COM 290.

COM 205 Persuasion 3 Credits
Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 207 Social Media and Social Change 3 Credits
Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 210 News Reporting and Writing 3 Credits
Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.
Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits
Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.
Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits
Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 213 Typography 3 Credits
Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 220 Voice and Articulation 3 Credits
Increases the student's knowledge of the vocal elements of oral communication and improves use of voice and articulation. Introduces anatomy and physiology for enhanced vocal production. Analyzes volume, rate, pitch, quality, phrasing, stress, and inflection. Presents the International Phonetic Alphabet as a means of developing correct articulation and pronunciation. Uses classroom exercises and tape recording for feedback and learning.

COM 221 Speaking for Broadcast and Digital Media 3 Credits
Introduces the principles and techniques of speaking in traditional and digital media through the preparation and presentation of copy for live television and radio as well as recorded video and audio for the web. Students will apply the principles and techniques to a number of contexts including television and radio news, music and sports announcing, interviewing and talk programs, as well as public service announcements. **Prerequisite**(s): COM 104 or COM 290.

COM 230 Foundations of Film, Television and Radio 3 Credits
Examines film, television and radio industries, the programs they create and the powerful role they play in society. This course will examine the history, technology, structure, programming and regulation of these industries including issues, trends, and the impact of new and evolving technologies.

COM 232 Podcasting I 3 Credits
Podcasting I will offer students an innovative reading, research, discussion and creative lab experience. Using fictional storytelling, broadcast journalism and talk show formats, students will learn the basics of producing an original, creative podcast. They will gain insight on how to communicate and successfully market a podcast towards a mass audience. Students would also receive a basic overview of podcasting, so they can continue work to podcast on their own after taking Podcasting I.

COM 233 Writing for Broadcast 3 Credits
Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 234 Audio Production 3 Credits
Provides a laboratory study of audio production techniques, and performance. Introduces the fundamental properties of sound as applied in modern audio production at radio and television stations, sound studios, and production houses. Students conduct lab exercises in editing, mixing, and digital recording using ProTools. Students perform a variety of genres including news, commercials, dramas, and promos.

COM 237 Rhetoric in the Digital Age 3 Credits
Focuses on the critical examination of the major public discourses in digital media. Students will learn classical and modern rhetorical theory such as Aristotle's Rhetoric, power, publics and counterpublics, and argumentation. Students will apply these theoretical aspects to critically engage digital texts such as memes, emojis, hashtags, trolls, blogs/reviews, and video game narratives.

COM 239 Script Writing for Comic Books 3 Credits
The medium of comics presents a fascinating vehicle to communicate through a sequence of text and images. Comic books, graphic novels and other forms of the genre (web comics, comic strips, etc.) hold a significant place in modern society, history and culture. This course is designed to orient students towards writing comic book scripts. Focus will be placed on students creating and writing their own stories. Students will learn basic concepts around scripting for sequential art, story research, the relationship between text and image, comic panel theory, working within page-length restrictions and various scripting formats. Beyond learning how to write a comic book, students will explore topics such as: the different types of script formats, plot points, writing sound effects, story structure and outlining. No artistic experience needed.

COM 240 Public Relations 3 Credits
Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 247 Covering the Sports Betting Industry 3 Credits
This course will introduce students to the world of covering the sports betting landscape via traditional sports media. Emphasis will be placed on learning the jargon of sports betting, learning how to break down financial reports from both states and gambling operators, how to cover legislative action on the subject. In short: Covering the world of sports betting is quickly becoming akin to covering the world of financial markets, and students wishing to pursue a career in sports media will have to know how to navigate this world going forward.
Prerequisite(s): COM 104 or COM 290.

COM 251 Interpersonal Communication 3 Credits
Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 252 Intercultural Communication 3 Credits
Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application.

COM 253 Organizational Communication 3 Credits
Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 254 Intro to Health Communication 3 Credits
Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 261 Introduction to Web Design 3 Credits
Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 262 Graphic Imaging for Digital Media 3 Credits
Teaches students techniques for image development, and image preparation for various multimedia applications. Emphasis is placed on color calibration and palette issues, image manipulation, advanced image selection techniques, transparency and masking, multimedia authoring file formats, and dynamic image design. Students will be expected to participate in critiques of professional designs in order to learn to critically evaluate their work and their fellow students' work.

COM 263 History and Principles of Graphic Design 3 Credits
Covers the history and principles of graphic design from analog art through the digital revolution. The elements and principles of design will be used to study stylistic progressions, artistic techniques, design innovations, and mechanical inventions. Material will be presented through a combination of illustrated lectures and discussions.

COM 264 Digital Media: Theory and Practice 3 Credits
Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 265 3D Graphic Animation 3 Credits
Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation using Maya software. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 270 Sports Multimedia Reporting 3 Credits
COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.
Prerequisite(s): COM 102. Introduction to News Writing.

COM 280 Issues in Event Planning 3 Credits
Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.
Prerequisite(s): COM 240 or MKT 200.

COM 290 Professional/Strategic Speech 3 Credits
Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the Norm Brodsky College of Business.

COM 292 Content for Social Media 3 Credits
Focuses on creating social media content that will inform, entertain, and engage audiences within a variety of organizational and business contexts. Students will learn about message planning for specific platforms and creative ways to use digital content to support public relations, branding, customer, and media relations.

COM 301 Communication Law 3 Credits
Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits
Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 303 Radio Programming 3 Credits
As new listening opportunities, options and alternatives emerge in a world of constantly changing and developing new media options, the over 100-year-old radio broadcast medium has remarkably been able to quietly continue to dominate the media landscape with the highest audience share of any audio platform, including satellite radio and streaming audio. In this course, students will learn how radio reaches and keeps its audience as well as the impact its programming has on the local communities it serves daily.

COM 304 Rhetoric for Politics and Law 3 Credits
Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.
Prerequisite(s): COM 104 or COM 290.

COM 310 Crisis Communication 3 Credits
Students will learn how professionals define and prepare for various crises, including theory, techniques and applications. This course will teach students about the importance of planning for a crisis and defining key messages. Through case studies, students will assess the successes and failures of various organization's responses. Students will work in teams to develop the knowledge and skills to manage the messages surrounding crisis-related issues found in organizations.

COM 312 Special Topics in Journalistic Writing 3 Credits
Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.
Prerequisite(s): COM 102 or COM 107.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits
This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.
Prerequisite(s): COM 347 and MKT 280.

COM 315 Computer Assisted Reporting 3 Credits
Develops advanced reporting techniques for researching and writing in-depth news stories and investigative articles. Uses state-of-the-art computer-assisted reporting methods including finding and mining data bases on the Internet, creating spreadsheets to analyze data, and employing data base manager software to sort and summarize information in government documents and other specialized resources. Focuses on conceptualizing of story ideas, planning major projects, gathering information by means of data bases, participant-observation, interviews, and analysis of public documents. Emphasizes organizing large quantities of material and presenting it in a meaningful context, including with information graphics.
Prerequisite(s): COM 210 or permission of instructor.

COM 316 Feature Writing 3 Credits
Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.
Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 318 Gender and Communication 3 Credits
Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GSS 318. Students may not get credit for both COM 318 and GSS 318.

COM 320 Negotiations 3 Credits
This course provides students with the theory and skills for effective negotiations. Students will learn how to prepare for and participate in negotiations by applying various strategies and tactics. This course will be split between theoretical lecture/discussion and practical application / skill development, including in-class simulations.

COM 321 Stand Up Comedy 3 Credits
Explores the theory, history, and practice of stand up and comedy writing as a contemporary rhetorical practice. Students will learn the various mechanics of joke construction, the nature of comedic narratives, and how humor can be used to engage in personal, social, cultural, and political commentary through the analysis of comedic performances. The class will also feature workshops in which students create and refine their comedic performances and personae. The class will culminate with students performing their material in front of an audience.
Prerequisite(s): COM 104 or COM 290.

COM 322 Argumentation and Advocacy 3 Credits
Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.
Prerequisite(s): COM 104 or COM 290.

COM 323 Oral Interpretation of Literature 3 Credits
Provides an orientation to the field of oral performance. Students select literary texts, adapt the material to the audience and prepare it for presentation. Emphasizes the development of voice, articulation, and kinesic behavior. Presentations to the class are critiqued.
Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 324 Political Rhetoric and Democratic Culture 3 Credits
Explores how political rhetoric has shaped the democratic culture of the United States. Students will focus on the role political rhetoric plays in the struggle to contest and redefine the meaning of the Declaration of Independence's promise of life, liberty and the pursuit of happiness. In so doing this course attempts to develop an appreciation for the ways in which the challenges to extant laws and traditions—and in particular the language choices and modes of argument used in those challenges—have expanded the meanings of democracy.
Prerequisite(s): COM 105 or POL 100 or POL 102.

COM 325 Rhetoric of American Labor 3 Credits
This course examines speeches, tracts, lyrics, newspapers, posters, poems, and films of the labor movement in America. The course also examines the historical context of the labor movement to better understand and appreciate the public discourse of labor. The course explores how rhetoric has been used to give force to ideas and lead to actions, how we develop a sense of how the values and norms of our society were reflected and shaped, and we understand how that history influences our collective perception in the present. Special attention is paid to the nature and locus of power, the interplay of conflict and confrontation, and the speaker's attempt to maintain or change the allocation of that power.

COM 326 Social Media Analytics 3 Credits
Examines how social media analytics are used to improve and inform an organization's decision-making process to develop, manage, and evaluate the success of an organization's social media strategy. Students will learn how to use analytics tools, and analyze and use data to plan and evaluate the effectiveness of social media campaigns.
Prerequisite(s): COM 203.

COM 327 Career Development in the Sports Marketplace 3 Credits
This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. Prereq(s): COM 270, COM 347, and MKT 280.

COM 330 Documenting Cultures Through Travel 3 Credits
Offers students, through travel and study, a unique opportunity to gain firsthand experience of a foreign culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

COM 331 Television News Production 3 Credits
In this course, students will learn to write, shoot, edit and produce video news for television, the Internet and social media. Students will be introduced to the necessary video and digital production techniques, software and technologies for producing and reporting both individual news packages and entire news programs. Through this class, students will sharpen their news judgement and learn the roles and responsibilities of television news reporters and producers.
Prerequisite(s): COM 131 or COM 230.

COM 332 Topics in Advanced Podcasting and Radio 3 Credits
Develops advanced podcasting and radio techniques, allowing students to focus closely on researching, recording, script writing, producing and distributing podcast and/or radio content in specialized genres. Students produce complex, long-form audio features suitable either for terrestrial broadcast and online/mobile podcasts. Topics may include journalism and news; narrative storytelling; sports; politics; business; and the arts. Since topics will vary by semester and instructor, this course may be repeated once.

COM 333 Media Program Development and Distribution 3 Credits
Critically analyzes the theory, practice, structure, and function of media program development and distribution. Examines the structure of the field as it relates to programming, the industry and audiences. Studies program categories, formats, genres, trends, and audience measurement and analysis as well as the new and evolving technologies responsible for program development and distribution.
Prerequisite(s): COM 230.

COM 337 Music Production for Mass Media 3 Credits
Offers students education in audio production techniques for music and other advanced audio material. Building on theory and practice introduced in the prerequisite, the class will instruct students in the theory behind acoustics and electronics as well as the digital tools and media. Those theoretical studies will be put to practice through exercises in recording music, making selections from music libraries, multi-track recording, arranging, editing, mixing and mastering. Students will begin to develop both an engineer's attention to audio detail and a musician's sense of artistry. Putting these skills to use, the students will produce complete musical works of varying musical styles, working both individually and in teams.
Prerequisite(s): COM 234.

COM 338 Writing for Broadcast II 3 Credits
Building on COM 233 Writing for Broadcast, this course provides a hands-on approach to more sophisticated reporting and interviewing techniques and writing formats used in long-form radio and television programs. This course will expose students to the following broadcast script writing areas: features, documentaries and reality programs. It will also cover writing for interview/talk show programs, music, comedy and variety programs. Students will also be exposed to writing for corporate, educational and children's programming. Students will have hands-on experiences writing, producing and editing news pieces and webcasts for student and area media outlets and web sites.

COM 341 Public Relations Writing and Strategy 3 Credits
Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.
Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits
Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

COM 348 Communication Research Methods 3 Credits
Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.
Prerequisite(s): COM 105; junior or senior standing.

COM 350 Team & Group Communication 3 Credits
Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

COM 352 Chinese and American Intercultural Communication 3 Credits
Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator.

COM 353 Nonverbal Communication 3 Credits
Investigates studies in and theories of nonverbal communication. Lectures and experiential activities explore the effect of status, culture, and gender upon kinesics, physical characteristics, proxemics, tactile communication, paralanguages, artifacts, and environmental factors.
Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 355 Social Justice and Journalism 3 Credits
The best of American journalism is rooted in exploring issues of social justice and shining a spotlight on abuse. In this course, students will learn about the role journalism has played to expose social injustice in America by exploring powerful investigations by the mass media and also press organizations employing and representing non-white and marginalized groups. Students will examine both historical and contemporary journalism examples. The course also will include critical assessment of journalism's failings, including an exploration of the discrimination and disenfranchisement historically perpetuated by media.

COM 360 Advanced Publication Design and Presentation 3 Credits
Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.
Prerequisite(s): COM 212.

COM 361 Photography 3 Credits
Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 363 Converging Digital Media 3 Credits
Examines the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COM 364 Web Design II 3 Credits
Equips students with the theories and practical techniques required to produce effective digital text, graphics, and animations for the Web. Discusses theories behind the use of these media in terms of effective communication and interaction. Introduces students to different computer platforms and requirements for cross-platform media.
Prerequisite(s): COM 261 or permission of instructor.

COM 365 Graphic Animation 3 Credits
Students receive an education in motion graphics and animation theories, development techniques, and preparation for various multimedia applications. Emphasis is placed on the design principles used in motion graphics and animated communication to effectively convey information in an entertaining and engaging manner. The course covers the integration of sound and imagery through graphic animation techniques, compression, rendering, input/output file formats, and delivery. Projects include the creation of web banner ads, title sequences, a music video, and an original final project. The primary software for this course is Adobe Photoshop, Adobe AfterEffects, and a taste of 3D animation using Maya. Students will be expected to participate in critiques of professional animation designs in order to learn to critically evaluate their own work and their fellow students' work.
Prerequisite(s): COM 262 or permission of instructor.

COM 366 Project Management in Graphic Design 3 Credits
Explores the creative process of graphic design while developing an understanding of the methods employed in problem solving in the industry standard design software packages. Students learn how to create a hierarchy of information through the ordering of elements into a comprehensive visual unity. They consider the relationship between content and page size, proportion, grid and margins. Students learn about typography as a design element and how it works with other visual elements in design. In order to develop an understanding of the project-planning process for either printer or Web projects, students will develop and present a series of projects that will build on one another to develop their "visual voice." Students will be evaluated on their ability to apply course material to the projects to create professional-quality work; their ability to apply exchange ideas and accept and apply constructive criticism; and on their participation in class discussions, critiques and presentations.
Prerequisite(s): COM 262, COM 360.

COM 367 3D Graphic Animation II 3 Credits
Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.
Prerequisite(s): COM 265.

COM 370 Sports Television and Field Production 3 Credits
Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.
Prerequisite(s): COM 131.

COM 371 Sports Feature Content Creation 3 Credits
Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.
Prerequisite(s): COM 102, COM 270.

COM 380 Broadcast News Practicum 3 Credits
Provides a workshop dedicated to the planning and creation of professional caliber broadcast news content for the campus television network and beyond. This course will provide an opportunity for students to develop writing, graphic, audio, video design and production skills in an experiential setting. Students will create materials to be used by the Rider University Network and for broadcast, cable and Internet distribution. Students can be involved in any and all phases of creating content from project conception through implementation. Students will gain valuable experience with, a greater appreciation for, and increased competency in creating professional media content. This class will also prepare students to more effectively function in the communication industry as an effective member of a professional production team. Since topics will vary by semester and instructor, this course may be repeated once.
Prerequisite(s): Permission of instructor.

COM 390 Communication and Society 3 Credits
Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits
Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits
Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media.

COM 399 The Co-Operative Experience 3-12 Credits
This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faulty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; Pass/fail.
Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

COM 400 Senior Seminar Communication 3 Credits
Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 415 In-Depth Reporting 3 Credits
Utilizes advanced tools and techniques of contemporary in-depth reporting for print and multimedia. Covering multifaceted stories, students will learn how to do balanced multi-sourced field reporting and writing using primary and secondary sources including human sources, electronic documents and databases, both online and offline. Emphasis will be placed on writing stories that answer not only who, what, when and where questions but also the why, the how and the "so what?" questions. Students will also be exposed to some of the best investigative work of journalists past and present as models for analysis and discussion.
Prerequisite(s): COM 210.

COM 426 Social Media Capstone 3 Credits
A client-based social media campaign will be developed from conception to evaluation based on research and digital media strategies. Focus will be on engagement with audiences, managing social media, and evaluation using social media metrics. Permission of instructor required.
Prerequisite(s): COM 203, COM 292.

COM 431 Advanced Television News Production 3 Credits
This course will focus on writing, reporting and producing a video news magazine program. Students will research, write, shoot, edit and report feature stories that will be included in a bi-weekly news magazine program that students will produce. Emphasis will be placed on meeting deadlines and developing the professional skills required of reporters creating visual stories for television, the Internet and Social Media. During the course, students will learn to sharpen their video production, writing and leadership skills, as well as their news judgment in creating and reporting digital content.

COM 432 Radio Station Operations Capstone 3 Credits
Students will practice the advanced study of the internal workings of a radio station and the podcasting and radio industry through hands-on work at 107.7 FM The Bronc, participating in multiple facets of the operation, including: programming, on-air broadcast, podcasting, audio software editing, event planning, public relations, business of media and advertising. Seniors only. Permission of instructor required.

COM 434 Advanced Structure of Sound in Podcasting and Radio 3 Credits
Provides in-depth study of advanced techniques in audio recording and radio programming and production. Individual and group production of short and long-form radio projects including: promotional spots, features, music programming, and news. Students will be involved in all phases of programming and production for radio including: project conception, development, management, and implementation. Selected student projects will air on the student radio station, 107.7 The Bronc.
Prerequisite(s): C or better in COM 234 or COM 232.

COM 440 Cases & Campaigns in Public Relations 3 Credits
Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.
Prerequisite(s): COM 341 or permission of instructor.

COM 452 Seminar in Communication Studies 3 Credits
Offers an in-depth investigation of relational communication. Students explore the many complexities involved in human interaction and interpersonal dynamics. Social and psychological implications of various communicative relationships ranging from cross-gender communication to dysfunctional family systems to intercultural interactions are included.

COM 460 Web Design III 3 Credits
Builds on previous courses to refine students' understanding of theories and procedures of digital media development. Further develops Web site creation and project management theories. Students develop advanced Web creation techniques, including responsible site production.
Prerequisite(s): COM 364.

COM 462 Advanced Graphic Design and Portfolio 3 Credits
Explores the processes of graphic design by creating independent and creative solutions to a series of design problems. Students expand their proficiency in all aspects of the design process, including creative brainstorming, conceptualizing, critical thinking and presentation. Students take a design project to both print and digital formats using Photoshop, Illustrator, and InDesign. Students develop and present a balanced portfolio as the culmination of their experience in the course.
Prerequisite(s): COM 366.

COM 470 Live Sports Reporting Capstone 3 Credits
Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits
Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits
Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.
Prerequisite(s): 3.2 GPA and permission of instructor.

Computer Science

Program Overview

The Computer Science program at Rider is focused on providing a strong foundational education for its students. Students in this program enjoy small class sizes, dedicated faculty and the opportunity to apply their skills to real-world problems in a variety of settings. Computer science, with a focus on problem solving, optimization, collaboration and security, equips students to succeed in the workplace and in graduate school.

Curriculum Overview

Students studying computer science will develop a broad technical understanding of the field, and will gain a deep appreciation of computing and its functions. Students collaborate while applying their knowledge to real world problems. During the course of their studies, students will develop a passion for lifelong learning and a professional responsibility to uphold ethical behavior. Foundational classes in mathematics, physics and computer science prepare them for upper level courses on Computer Organization and Architecture, Operating Systems, Secure Software Engineering, Data Engineering and Parallel and Distributed Systems. Students are offered a variety of upper-level electives, including Human Computer Interaction, Cybersecurity, and internship opportunities. Rider's computer science faculty are engaged in research and students are encouraged to apply their computational skills to a variety of research projects in the sciences.

Student Learning Outcomes

Graduates of the Computer Science major will be able to:

1. Graduate with a broad technical understanding of computer science.
2. Graduate with a deep appreciation of computing and its functions.
3. Graduate with the ability to collaborate and apply their knowledge to real world problems.

4. Graduate with a passion for lifelong learning, professional responsibility to uphold ethical behavior.

Degrees Offered:

- B.S. in Computer Science

Computer Science Major Requirements

Note: A grade of 'C' or better is required in 100-level CSC or CYB courses.

(64 Credits)

Code	Title	Credits
Computer Science Core		
Complete the following courses:		
CSC 110	Computer Science I	3
CSC 120	Computer Science II	3
CSC 130	Data Structures and Algorithms	3
CSC 140	Discrete Structures	3
CSC 150	Cyber Ethics and Societal Impact	3
CSC 200	Introduction to Software Engineering	3
CSC 220	Computer Organization and Architecture	3
CSC 230	Probability for Computer Science	3
CSC 240	Operating Systems	3
or CYB 200	Operating Systems & Cybersecurity	
CSC 350	Analysis of Algorithms	3
Mathematics		
MTH 210	Calculus I	4
MTH 211	Calculus II	4
Physics		
PHY 200 & 200L	General Physics I and General Physics I Lab	4
PHY 201 & 201L	General Physics II and General Physics II Lab	4
Elective Courses		**6**
Select two of the following courses:		
CSC 260	Computer Networks	
CSC 310	Theory of Computation	
CSC 320	Human-Computer Interaction	
CIS 330	Database Systems [1,2]	
CSC 380	Parallel and Distributed Systems	
CSC 490	Independent Research and Study	
CSC 491	Internship in Computer Science	
Track Requirements		**12**
Complete one of the following tracks:		
Track: Cyber Security		
CYB 240	Ethical Hacking and Penetration Testing	
CSC 250	Software Security Engineering	
CYB 260	Network Defenses and Countermeasures	
CSC 340	Cybersecurity Essentials	
Track: Artificial Intelligence [3]		
CSC 360	Concept of Artificial Intelligence	
CSC 400	Introduction to Machine Learning	
CSC 410	Data Science and Big Data Analytics	
CSC 470	Special Topics in Artificial Intelligence	
Track: Software Engineering		
CSC 301	Software Requirements & Modeling	
CSC 390	Software Design & Construction	
CSC 420	Software Testing, Verification, and Validation	
CSC 430	Software Quality Assurance	
Track: General [4]		
Select two of the following:		
CSC 301	Software Requirements & Modeling	
CSC 340	Cybersecurity Essentials	
CSC 360	Concept of Artificial Intelligence	
CSC 390	Software Design & Construction	
Select two of the following:		
CSC 400	Introduction to Machine Learning	
CSC 410	Data Science and Big Data Analytics	
CSC 420	Software Testing, Verification, and Validation	
CSC 430	Software Quality Assurance	
CSC 470	Special Topics in Artificial Intelligence	
Total Credits		**64**

1 This course is offered through the Department of Information Systems, Analytics, and Supply Chain Management in the Norm Brodsky College of Business.
2 CIS 185 prerequisite is waived for CSC majors.
3 Note that this track requires an extra MTH class.
4 Students may also choose from the electives listed above, but are required to take unique courses (i.e., no double counting).

Computer Science Minor Requirements

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Courses and Descriptions

CSC 105 Fundamentals of Computer Science 3 Credits
This course offers an introduction to fundamental areas of study in computer science - their applications, capabilities, and boundaries. Topics include computer organization, algorithms design and analysis, programming paradigms, software development process, operating systems responsibilities, applications, and communications. Hands-on python programming is also introduced in this course from a non-mathematical problem-solving point of view. Basic programming constructs include statements, expressions, variables, control structures, functions, and file operation.

CSC 110 Computer Science I 3 Credits
This course is an introduction to computer science and modern computing fundamentals. Students will develop programs and algorithms to solve a variety of problems posed in the natural sciences. Students will learn to code in Python, a widely adopted language, and learn the basics of algorithms, data types, program structure and development,
Prerequisite(s): MTH 105 or MTH 106 or MTH 210 or concurrent enrollment. MTH 210 or MTH 106 preferred for CSC majors.

CSC 120 Computer Science II 3 Credits
This course is an introduction to developing algorithms using abstract data types and the object-oriented methodology. Students will design and implement robust ADTs using Java, an object-oriented programming language. Students will learn how to develop their own algorithms and the best techniques for analyzing their performance. Students will be able to adapt the course knowledge to real world, practical challenges.
Prerequisite(s): CSC 110.

CSC 130 Data Structures and Algorithms 3 Credits
This course is a study of data structures and the algorithms used to process them. Topics include stacks, queues, lists, trees, graphs, sorting and searching techniques, recursive algorithms, and efficiency considerations. This course will give students a comprehensive study in data structures and algorithms which are the building blocks in programming.
Prerequisite(s): CSC 120.

CSC 140 Discrete Structures 3 Credits
This course is an introduction to the ideas and techniques from discrete mathematics as widely applied to Computer Science. Topics include sets, numbers, algorithms, logic, combinatorics, recursion principles, graph theory, trees, and discrete probability.
Prerequisite(s): MTH 105 or or concurrent enrollment or MTH 106 or concurrent enrollment or MTH 210 or concurrent enrollment.

CSC 150 Cyber Ethics and Societal Impact 3 Credits
This course will investigate the ethical and social challenges stemming from computing and telecommunication technology, as well as from mobile information-enabling devices. Topics include: cyber ethics, global and societal impact of the Internet, ethical analysis tools, ethical dimensions of computer system reliability, professional ethics, ethical frontiers in emerging technologies, privacy, security, intellectual property, cybercrime, and civil liberties in cyberspace. CSC 150 is a required course for CSC majors and minors. This course will be open to other math and science majors.
Prerequisite(s): CMP 120 or CMP 125 or BHP 100 or BHP 150 may be taken concurrently.

CSC 200 Introduction to Software Engineering 3 Credits
This course introduces software engineering ideas and concepts in the context of the software development life cycle. The course will discuss fundamental methodologies of software engineering, the Software Development Life Cycle (SDLC) and Unified Modeling Language (UML), which is a modeling language in the field of software engineering. It also concentrates on the five major phases of the SDLC: requirements engineering, requirements analysis, design, coding/implementation, and testing. Students will also learn about project management which is used for delivering high-quality software that satisfies customer needs and budgets. Prerequisite(s): Sophomore or Junior Standing
Prerequisite(s): CSC 120.

CSC 220 Computer Organization and Architecture 3 Credits
An introduction to the fundamental concepts of computer organization and architecture, this course explores how computer systems execute programs and manipulate data, working from the C programming language down to the microprocessor. Topics include: processor organization, Assembly and C programming languages, machine-level code, data representation, digital logic gates and Boolean algebra, computer arithmetic, code compilation, memory organization and management, interrupts, and performance evaluation and optimization. CS 220 is a required course for CS majors.
Prerequisite(s): CSC 130, CSC 140.

CSC 230 Probability for Computer Science 3 Credits
This course is an overview of probability theory and its application to computer science. Students will develop an understanding of combinatorics, variables, distributions, and parameter estimation. Applications to real world data and large datasets are also studied, with an introduction to machine learning.
Prerequisite(s): MTH 211 or concurrent enrollment.

CSC 240 Operating Systems 3 Credits
The course will study the basic concepts, design and implementation of operating systems. Topics to be covered include an overview of basic computing hardware components, operating system structures, process management, memory management, concurrency, resource allocation and scheduling, file systems, input/output systems, protection and security. CS 240 is a required course for CS majors.
Prerequisite(s): CSC 130.

CSC 250 Software Security Engineering 3 Credits
Secure software engineering focuses on both theoretical and practical perspectives in the development of software systems, exploring secure software design and development methods, software analysis, and reverse engineering. Emphasis is placed on security as part of the software engineering lifecycle, as well as on the correctness and robustness of code. CSC 250 is a required course for CS majors.
Prerequisite(s): CSC 200.

CSC 260 Computer Networks 3 Credits
This course provides an introduction to the design and analysis of computer networks. Topics include application layer protocols, transport layer protocols, network layer protocols, data link layer and physical layer protocols. Also, the course will explore state-of-the art topics in computer networks such as Software Defined Networking (SDN) technologies and network security problems, etc.
Prerequisite(s): CSC 120 with a grade of C or better; permission of instructor.

CSC 301 Software Requirements & Modeling 3 Credits
This course is intended to introduce students with the techniques for eliciting requirements. . The course will consider the past, present and future standards and approaches in requirements engineering. This course will specifically focus on identifying and analyzing requirements for various types of systems: embedded systems, consumer systems, web-based systems, business systems, systems for scientists and other engineers. Prereq(s): CSC 200.

CSC 310 Theory of Computation 3 Credits
This course introduces a formal framework for investigating both the computability and complexity of problems. Theoretical foundations of computer science and formal models of computation are covered. Students study several models of computation including finite automata, regular expressions, formal languages, Chomsky language hierarchy, context-free grammars and Turing machines. Topics include undecidable problems, the halting problem and the P versus NP problem.
Prerequisite(s): CSC 130 and CSC 140.

CSC 320 Human-Computer Interaction 3 Credits
This course presents Human-Computer Interaction (HCI) as a discipline that is concerned with technical advance, and that must integrate different disciplinary perspectives. Foundational theoretical issues deal with principles of human perception, visual representation and purposeful action, discussed in the context of novel interactive technologies and computer-based systems. It examines issues in the design of system interfaces from a number of perspectives: user, programmer, and designer.
Prerequisite(s): CSC 130.

CSC 340 Cybersecurity Essentials 3 Credits
This course is an in-depth study of the theories and practices for prevention of cyber attacks. Countermeasures discussed include education, encryption, virtual private networks, policies, practices, access controls, secure systems development, software assurance, verification and validation, firewall architectures, anti-virus, patching practices, personnel security practices, and physical security practices. Topics also include incident response, forensic investigations, business continuity plans, disaster recovery plans, and critical infrastructure protection.
Prerequisite(s): CSC 150.

CSC 350 Analysis of Algorithms 3 Credits
This course investigates methods for analyzing and designing efficient and reliable algorithms, emphasizing methods useful in practice. It introduces several algorithm design strategies that build on data structures and programming techniques learned in the introductory computer science course sequence. Topic coverage includes induction, divide-and-conquer, dynamic programming, network flow, randomization, complexity theory, greedy algorithms, searching and sorting algorithms, cryptographic algorithms, graph theory, hashing, and advanced data structures. CSC 350 is a required course for CS majors.
Prerequisite(s): CSC 130 and CSC 140.

CSC 360 Concept of Artificial Intelligence 3 Credits
This course offers an introduction to the basic principles, techniques, and applications of Artificial Intelligence. Topics to be covered include agent design, advanced search algorithms and heuristics, knowledge representation, logic, inference, game theory, advanced planning, and learning. Prereq(s): CSC 130 and CSC 230.

CSC 380 Parallel and Distributed Systems 3 Credits
Widely deployed in scientific computing centers and commercial data centers, large-scale parallel and distributed systems (PDS) are crucial to scientific discovery, business success, national security, and technology innovation. This course examines the design and analysis of large scale computing systems for processor- and data-intensive applications with the focus on the technologies and factors that impact the performance, power, resilience, and scalability of modern parallel and distributed systems. Topics include the organization of multicore computers, parallel computer clusters, computing grids, supercomputers, client-server systems, and peer-to-peer systems; computer networks and network protocols; network security; multithreaded programming; and network programming.
Prerequisite(s): CSC 220 and (CSC 240 or CYB 200).

CSC 390 Software Design & Construction 3 Credits
This course introduces students to software design methodologies and also equips them with the knowledge and skills necessary to design large-scale software and to improve the quality of end products. Design techniques and methodologies for improving the productivity of software development and the quality of software are introduced. The course explores fundamental design concepts and notations with emphasis on Unified Modeling Languages (UML) and design patterns.
Prerequisite(s): CSC 200.

CSC 400 Introduction to Machine Learning 3 Credits
This course focuses on the fundamental concepts, theories, and algorithms for machine learning. The course briefly covers topics in supervised, unsupervised, reinforced, and deep learning including clustering, association, regression, neural network, support vector machines, Bayesian decision theory, decision trees, ensemble learning-the nearest neighbor algorithm and random forest.
Prerequisite(s): MTH 240 and CSC 360.

CSC 410 Data Science and Big Data Analytics 3 Credits
This course serves as an introduction to the interdisciplinary and emerging fields of data science and big data analytics. Students learn to combine tools and techniques from computer science, statistics, data visualization and the social sciences to solve problems using data. Central themes include: the data science and data analytics processes; advanced analytical theory and methods; tools for working with both big and small datasets, statistical modeling, and machine learning. Specific topics and tools include: data wrangling and munging, machine learning algorithms, statistical models, data visualization, NoSQL, Weka, RapidMiner, R, Python, Hadoop, and MapReduce.
Prerequisite(s): CSC 360.

CSC 420 Software Testing, Verification, and Validation 3 Credits
This course discusses the concept software quality assurance and source code review. This course will help students understand the testing concepts and how they can easily apply the concepts to any software testing situation. This course presents the concepts and techniques for testing software and assuring its quality. Concepts that are taught as part of this course are software testing at the unit, module, subsystem, and system levels, automatic and manual techniques for generating and validating test data, the testing process, static vs. dynamic analysis, functional testing, web application testing, and reliability assessments.
Prerequisite(s): CSC 200.

CSC 430 Software Quality Assurance 3 Credits
The course aims to teach the basics of quality management in software development projects. Students will learn the definitions of quality of software product and software process. Students will learn about software quality assurance, software metrics and models in quality management, internal quality and external quality.
Prerequisite(s): CSC 420.

CSC 470 Special Topics in Artificial Intelligence 3 Credits
This is an upper level undergraduate course that covers advanced topics in Artificial Intelligence. Topics vary from one offering to the other. Topics that may be discussed include: Artificial Intelligence/ Machine Learning for Cybersecurity, Computer Vision, Robotics and Automation, Game Theory, Planning and Acting in the real World, Deep Learning, Reinforcement Learning, Decision-making under uncertainty, Image Processing, and Natural Language for Communication.
Prerequisite(s): CSC 360.

CSC 490 Independent Research and Study 3 Credits
Immerses the student in guided research. The student learns to organize material, use the literature, obtain reproducible data, and synthesize the results of the study. If possible, the student will publish the results or present them at a scientific meeting. Available to Junior or Senior students or Sophomores with permission of the department chair.

CSC 491 Internship in Computer Science 1-4 Credits
A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 50 hours of internship per credit is required. The grade for the course will be determined by the student's overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester. Available for juniors and seniors.
Prerequisite(s): 2.5 GPA and permission of the instructor.

Creativity and Innovation Certificate

Overview

In today's ever-changing and competitive economic landscape, creativity and innovation are prerequisites not only for success but for survival at the organizational level and job marketability at the individual level. The ability to adapt to change and deal with uncertainty and constraints creatively becomes critical for securing a good entry job and subsequently becoming successful in the workplace.

The proposed certificate aims to develop an important skillset in Rider students, namely, thinking and acting creatively, whether for problem-solving or innovation purposes. More generally, it aims to better prepare the students to navigate uncertain and ever-changing environments and to rise to these challenges in their professional careers.

Certificate Offered

- Certificate in Creativity and Innovation

Requirements for the Creativity and Innovation Certificate

(11-12 credits)

Code	Title	Credits
Select one of the following courses:		**3**
PSY 100	Introduction to Psychology	
PSY 102	Explorations in Psychology Honors	
PSY 110	Psychology:The Science of Well-being	
PSY 117	Psychology of Creativity	
Required Courses:		
PSY 210	Organizational Psychology	3
PSY 367	Creativity and Innovation	3
Select one elective course from the following list (2-3 credits):		**2-3**
Select from the following:		
Any course with the designation *490 Independent Research and Study		
Any course from among the following pre-approved Creativity and Innovation electives:		
ART 150	Digital Foundations	
BHP 251	Idea to Innovation	
BHP 252	Creativity and Design Thinking	
BHP 307	Presence of Mind — Artificial Intelligence and Human Creativity	
CIS 388	Design Thinking	
ENG 206	Introduction to Creative Writing	
ENG 245	Creativity	
ENG 303	Creative Writing: Poetry	
ENG 304	Creative Writing: Fiction	
ENG 305	Creative Writing: Nonfiction	
ENG 306	Creative Writing: Drama	
ENG 311	Creative Writing: Playwriting	
ENT 100	Innovation and Entrepreneurship	
IND 133	Creativity: Edu & Psych Persp	
ME 592	Creativity & Music Technology	
PSY 324	Play and Imagination	
THE 118	Visual Imagination	
Any internship experience or 2-3 credit course not listed above that has a strong, demonstrable creativity/creative problem solving/innovation component, as approved by the Program Chair.		
Total Credits		**11-12**

Courses and Descriptions

PSY 100 Introduction to Psychology 3 Credits
This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 102 Explorations in Psychology Honors 3 Credits
The course introduces the history of psychology, and demonstrates how the discipline is a science. It provides students with experience exploring the mind, behavior, and the relationship between the two, from multiple perspectives, including biological, behavioral, cognitive, developmental, humanistic, social, and abnormal. It tackles questions including (but not limited to) how different areas of the brain are involved in behavior and are affected by injury, how humans sense and perceive the world, how states of consciousness differ from one another, how humans learn, remember, communicate, and develop, what motivates humans to behave in particular ways, how social groups affect behavior and decision-making, and what happens when behavior and emotions deviate from what is typical.

PSY 110 Psychology:The Science of Well-being 3 Credits
This course uses theory and methods of psychology to examine the question: How to make a good life? Students will learn how psychology examines the ways that motivation, intellect, relationships, self-respect and a healthy lifestyle contribute to happiness, well-being, and flourishing. Students will learn how psychology examines human nature through observation and experimentation. Students will understand how psychology applies research to improve human well-being. Students will leave the course with a better understanding of themselves and their connection to others, and apply their self-knowledge to their personal goals and relationships. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CAS general education curriculum.

PSY 117 Psychology of Creativity 3 Credits
Is creativity reserved only for geniuses, or can ordinary individuals also be creative? Is it domain-specific or domain-general? How do we measure it? What is the connection between creativity and innovation? Can you and I become more creative, and if so, what factors influence creative thinking? This course surveys the modern theories of creativity and problem solving from a psychological perspective, and their applications to real-world challenges. Specific topics will focus on convergent and divergent thinking, the role of constraints, change, and motivation in creativity, social and personality factors, techniques such as brainstorming, design thinking, and creative problem solving, and innovation in organizations. You will apply what you have learned in hands-on activities that challenge you to propose creative solutions to real-world problems.

PSY 210 Organizational Psychology 3 Credits
Focuses on issues related to human behavior in work settings. Topics include personnel issues such as hiring and promotion decisions, performance appraisals, and methods of on-the-job training. Issues of job satisfaction, motivation, productivity, and effective leadership styles are also examined. Finally, organizational structure as it relates to communication within organizations will be examined.
Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 367 Creativity and Innovation 3 Credits
What is creativity, and how do we measure, study, and enhance it? This course will survey the modern theories of creativity from a psychological perspective, with an emphasis on the processes that underlie creative thinking and the variables that influence creative idea generation. Specific topics will include: convergent and divergent thinking, the role of the unconscious in creative ideation, flow and mindfulness, individual and group creativity, techniques such as brainstorming and creative problem solving, the neuroscience of creativity, the role of motivation, and creativity and innovation in organizations. Discussions of theoretical findings will be complemented by in-class activities and assignments that highlight applications to day-to-day living and to larger-scale challenges that require creativity and innovation.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits
Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 75 credits.

ART 150 Digital Foundations 3 Credits
Industry standard digital tools are used to explore the basic concepts of composition, form, texture, value, and color in two-dimensional design. Further consideration of digital formats and technologies in the visual arts will be highlighted.

BHP 251 Idea to Innovation 3 Credits
The pharmaceutical industry comprises an incredibly diverse team of thinkers, including accountants and biochemists, who are all on a quest to improve human health. The development of medical treatments relies on pivotal insights from the scientific laboratory, but turning these ideas into practical medical innovations requires the solving of many problems outside of the scientific field. Through the examination of historical and contemporary case studies, this course will investigate the nature of science as it is practiced in the real world. How are problems identified and ideas generated and refined? What political and sociological challenges does the industry encounter? Who pays for all of this? By exploring growth in the pharmaceutical industry from the inside, students in this class will gain a deeper understanding of both science and business and how these disciplines interact in order to enhance and extend human life.

BHP 252 Creativity and Design Thinking 3 Credits
Creative, interdisciplinary, and collaborative work is being recognized as increasingly important for innovation and solving global problems of the 21st century. This course will introduce students to a much-needed framework for dealing with unstructured problems for creative problem solving, and a process for innovation. The course consists of two related parts: the psychology of creativity provides a foundational basis of knowledge and discussion, and the design thinking framework serves as an example of a powerful creative thinking strategy that an increasing number of individuals and organizations have used successfully over the past decade.
Prerequisite(s): BHP 100 or CMP 120; non-BHP students POI only.

BHP 307 Presence of Mind — Artificial Intelligence and Human Creativity 3 Credits
What is Artificial Intelligence (AI)? In what ways can computers "think"? How is their "thinking" similar to and different from that of humans? Through readings, lectures, discussions, and creative projects, students will investigate evidence of intelligence and creativity in various disciplines including music composition, art, and human and non-human systems. We will examine historical precedents and ponder likely developments in this area in the twenty-first century. No prior experience with computers or music is required.

CIS 388 Design Thinking 3 Credits
This undergraduate course on Design Thinking provides students with a framework for dealing with unstructured problems to create innovative business solutions. Students in this course will learn about the complex and iterative process of design thinking and its several phases, including problem finding, observation, visualization and sense making, ideation, prototyping and testing, and explore the value of design thinking for creating business solutions with lasting impact. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.
Prerequisite(s): JR/SR, 54+ credits, or POI.

ENG 206 Introduction to Creative Writing 3 Credits
A workshop that introduces students to basic conventions and techniques of creative writing. Students will read and study published writing in multiple genres, such as short fiction, drama, poetry, and creative nonfiction, and write and revise their own creative pieces.

ENG 245 Creativity 3 Credits
This course is an introduction to the history of literary creativity and the related topics of invention, genius, imagination, and originality. It examines theories of literary creativity throughout history from ancient ideas about the origins of inventiveness to recent theories. It looks at select works in English and other sources, and it looks at the subject of creativity in poetic, prose, and dramatic works.
Prerequisite(s): English Literature majors should take all Gateway Courses before they take 300- and 400- level courses.

ENG 303 Creative Writing: Poetry 3 Credits
A workshop analyzing the techniques of poetic expression, with a focus on the student's original experiments in traditional and contemporary verse forms.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 304 Creative Writing: Fiction 3 Credits
Students write original fiction and analyze the techniques of writing fiction in discussion of both their own drafts and published examples of the form.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 305 Creative Writing: Nonfiction 3 Credits
A workshop in Creative Nonfiction (aka Literary Nonfiction or Narrative Nonfiction, abbreviated CNF) in which students will write and read different forms of memoir and essay, including Personal Essay, Lyric Essay, Travel Writing, Oral History, and Personal Profiles. Creative Nonfiction (CNF) tells true stories using the literary techniques of fiction-writing, such as building dramatic scenes, establishing suspense, and developing a narrative sequence of events, or plot. CNF employs vivid sensory detail and builds characters and scenes to enhance the reader's experience of the story. Challenging the traditional journalist's stance of objectivity and emotional distance from her topics, CNF writers often put themselves into their stories to create a voice of reflection. We'll talk about what types of creative license CNF gives writers, and also about the ethics of storytelling, especially when your story's characters are real, living people.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 306 Creative Writing: Drama 3 Credits
Examines cultural developments in the United States from the late 19th century to the present. Topics include popular culture, intellectual history, gender history, literary history, film, institutions like museums and department stores, subcultures and countercultures, popular commemorations like World's Fairs, and political culture. Some of the largest trends explored include the development of the modern culture of consumption, the urban landscape, and the polarization of cultural values.

ENT 100 Innovation and Entrepreneurship 3 Credits
This course provides students with an introduction to creativity, innovation, and the concept of an entrepreneurial mindset. Students explore the excitement and challenges faced by individuals and businesses as they create, develop, and evaluate innovative business opportunities. We also discuss the probable paths of career development for students pursuing entrepreneurship. In this course, students evaluate their own views of innovation and entrepreneurship within the framework of entrepreneurial thinking, and putting this mindset into action.

IND 133 Creativity: Edu & Psych Persp 3 Credits
This course will examine both psychological and educational research about creativity. It will consider the various definitions of creativity that have guided research and theory; compare current theories of creativity in the fields of education and psychology, including cognitive, personality, and motivational theories; review research regarding what has been termed the "dark side"of creativity, including possible links to mental illness; and consider if and how schools and colleges might include creativity in admissions and promote creativity among students.

ME 592 Creativity & Music Technology 2 Credits
Creativity and Technology in the Music Classroom is designed to prepare students to foster musical creativity using a variety of approaches and tools. In particular, students will use equipment such as digital audio workstations, MIDI controllers, microphones, and SmartBoards to facilitate rich and engaging creative experiences. Students will explore ways to structure learning experiences in response to the needs and interests of students, and will examine current thinking and trends related to the uses of creativity and technology in the music classroom.
Prerequisite(s): Junior status or permission of instructor.

PSY 324 Play and Imagination 3 Credits
This course surveys two of the most important manifestations of children's imagination: pretend play and imaginary companions. It will discuss the evolution of play, the purpose of play, the role of play in the development of creativity, and individual differences in play (e.g., among children of different gender, cultures, and ability levels). Finally, it will discuss the application of play to therapeutic methods for children. **Prerequisite**(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

THE 118 Visual Imagination 3 Credits
Introduction to the visual world of theater design. Visual examples, physical exercises and handcraft of composition and style, with dramatic input and meaning. The course explores how to translate ideas in a dramatic text into a visual context.

Criminal Justice

Program Overview

Rider University's Department of Sociology, Criminal Justice, and Social Work houses a major and minor in criminal justice.

Criminal justice courses provide students, regardless of career goals, with tools for reasoned appraisal of how the criminal justice system works and its social consequences. Experienced faculty members who teach in the Criminal Justice major are available to advise students interested in pursuing a career in criminal justice, law or law-related fields and assist students in course selection and a variety of career paths, including graduate school, law school and criminal justice professionals serving in communities throughout the country in law enforcement, corrections, and the courts.

Curriculum Overview

Criminal Justice students take a total of 14 three-credit courses to complete the major. The curriculum includes a collection of required courses, taken sequentially, that introduce students to criminal justice but also a selection of courses from "topic-based" areas, including legal institutions, social groups and crime, law enforcement and courses from other disciplines that contextualize the major and give students a perspective from other disciplines. Seminars at the freshman and senior levels provide extensive class participation, personalized instruction, and carefully supervised individual research.

The criminal justice major and minor are designed to provide students with in-depth knowledge and understanding of laws, legal institutions and processes and their relationships to social, moral, political, and economic issues. Students will benefit from learning to approach law (both civil and criminal), and law enforcement from diverse perspectives.

Students can focus their course of study around their specific career goals by selecting from a wide range of courses within the program. In addition, the criminal justice major and minors are often be combined with other major and minor programs.

Student Learning Outcomes

Graduates of the Criminal Justice major will be able to:

1. Understand the role of criminal justice institutions in the social world.
2. Assess how criminal justice institutions affect other social institutions and structures.
3. Identify major theoretical orientations employed in criminal justice research.
4. Evaluate, collect, and analyze criminal justice data.
5. Apply appropriate methods to specific research questions and areas of inquiry.
6. Demonstrate an ability to use basic quantitative skills used by criminologists.
7. Critically summarize and evaluate criminal justice literature.
8. Construct arguments using literature as a framework for your arguments.
9. Communicate ideas effectively and logically in oral and written forms.
10. Recognize the role of research in criminal justice work.

Honors Program in Criminal Justice

Honors in criminal justice may be achieved by earning a 3.5 cumulative average in the discipline and completing, through honors in criminal justice (SOC 496), a senior honors thesis with distinction.

Degree Offered

- B.A. in Criminal Justice
- Minor in Criminal Justice

Criminal Justice Major Requirements

(42 credits) A minimum of 6 courses at 300-level or higher must be selected.

Code	Title	Credits
Category I: Core Courses		**15**
SOC 206	Deviance and Crime [1]	
SOC 119	Introduction to Criminal Justice: Police, Courts, Corrections [1]	
PHL 115	Ethics	
SOC 307	Criminal Justice Practice	
SOC 460	Criminal Justice Senior Seminar [2]	

Category II: Research Methods and Applications		**3**
Select one of the following:		
POL 230	Methods of Political Analysis	
SOC 301	Methods of Sociological Research [1]	
or SOW 295	Social Work Research Methods	
Category III: Criminal Justice Processes And Institutions		**9**
Select three courses from the two areas below with at least one course from each area:		
Law Enforcement, Criminal Investigation and Punishment		
SOC 150	Introduction to Forensics	
SOC 210	Criminal Investigation	
SOC 322	Punishment and Corrections	
SOC 342	Police and American Society	
SOC 343	Policing and Counter Terrorism	
Courts and Law		
LAW 140	Intro Seminar in Law & Justice	
LAW 305	Trial Advocacy	
SOC 351	The Rights of the Accused	
PHL 303	Philosophy of Law	
POL 260	Politics of Law and Order	
POL 361	Courts, Judges and Politics	
PSY 379	Psychology and Law	
SOC 317	Law and Lawyers	
Category IV: Crime and Social Groups and Issues		**9**
Select three of the following:		
SOC 302	Crime & Justice in the Media	
SOC 318	Hate Crimes in the United States	
SOC 216	Youth and Crime	
SOC 246	Drugs, Crime & American Society	
SOC 313	Gender and Criminal Justice	
SOC 321	White Collar and Corporate Crime	
SOC 333	Convict Criminology	
SOC 344	Gangs in America	
SOC 345	Race and Crime	
Category V: Contextualizing Crime and Criminal Justice		**6**
Select two courses from any of the following areas:		
Legal Issues		
HIS 301	Constitutional History of U.S.	
SOC 204	Law, Literature, and Film in America	
SOC 304	Women and Law	
LAW 310	Cyberspace Law and Policy	
POL 300	U.S. Constitutional Law	
POL 301	Civil Liberties in the U.S.	
Philosophical Issues		
PHL 130	Political Philosophy	
PHL 202	Social Philosophy	
PHL 360	Contemporary Ethics	
Political Issues		
POL 235	Race and Ethnicity in American Politics	
POL 325	Public Administration	
POL 327	Contemporary Issues in American Public Policy	
POL 335	Urban Politics	
POL 345	Justice in Comparative Context	
POL 350	U.S. Foreign Policy and Security Policy	
POL 351	Critical Views of Global Security	
POL 363	Human Rights in Global Context	
Psychological Issues		
PSY 220	Psychological Disorders	
PSY 365	Drugs and Human Behavior	
Social Issues		
SOC 205	Families	
SOC 207	Racial and Ethnic Relations	
SOC 245	Social Problems	
SOC 308	Cities And Suburbs	
SOC 312	Women in Society	
SOC 330	Class and Economic Inequality	
SOC 340	Power and Politics	
SOC 350	Social Policy	
or SOW 350	Social Work Policy	
SOC 396	Applied Sociology	
Internships and Advanced Research [3]		
LAW 490	Independent Study: Research and Creative Expression	
LAW 496	Honors Thesis in Law & Justice	
LAW 491	Internship in Law and Justice	
SOC 491	Internship in Sociology	
PHL 491	Internship in Philosophy	
POL 491	Internship in Political Science	
PSY 491	Internship in Psychology	
Total Credits		**42**

1 SOC 101 is waived as a pre-requisite for criminal justice majors ONLY for SOC 119 . SOC 101 is strongly recommended for criminal justice majors.

2 SOC 460 involves advanced research related to criminal justice and may be taken as an Independent Studies course or an Honors Thesis, if approved by the Law and Justice Director.

3 Internships must be related to Criminal Justice and approved by the Law and Justice Director.

Notes:

- No course may be used to satisfy more than one requirement for the Criminal Justice or Legal Studies major.
- Students are required to complete a minimum of 5 courses at the 300 or 400 levels in Categories II - V.

Criminal Justice Minor Requirements

(21 Credits)

Code	Title	Credits
Category I Multi-disciplinary Approaches to Criminal Justice [1]		**9-15**
At least three courses from the following areas:		
Law and Justice Interdisciplinary Courses		
LAW 140	Intro Seminar in Law & Justice	
SOC 150	Introduction to Forensics	
SOC 204	Law, Literature, and Film in America	

SOC 210	Criminal Investigation
SOC 302	Crime & Justice in the Media
SOC 304	Women and Law
LAW 305	Trial Advocacy
SOC 307	Criminal Justice Practice
LAW 308	Conflict & Conflict Resolution
LAW 310	Cyberspace Law and Policy
LAW 355	Sports and the Law
SOC 351	The Rights of the Accused
LAW 395	Selected Topics in Law/Justice
SOC 318	Hate Crimes in the United States
LAW 490	Independent Study: Research and Creative Expression
LAW 491	Internship in Law and Justice
LAW 496	Honors Thesis in Law & Justice
Political Sciences	
POL 260	Politics of Law and Order
POL 361	Courts, Judges and Politics
Psychology	
PSY 379	Psychology and Law
Sociology	
SOC 119	Introduction to Criminal Justice: Police, Courts, Corrections
SOC 206	Deviance and Crime
SOC 216	Youth and Crime
SOC 246	Drugs, Crime & American Society
SOC 313	Gender and Criminal Justice
SOC 321	White Collar and Corporate Crime
SOC 342	Police and American Society
SOC 343	Policing and Counter Terrorism
SOC 345	Race and Crime
Category II Crime and Justice Related Courses [1]	**6**
Maximum of two courses from the following:	
Communication	
COM 251	Interpersonal Communication
COM 252	Intercultural Communication
COM 322	Argumentation and Advocacy
Philosophy	
PHL 303	Philosophy of Law
POL 235	Race and Ethnicity in American Politics
POL 300	U.S. Constitutional Law
POL 301	Civil Liberties in the U.S.
POL 325	Public Administration
POL 335	Urban Politics
Psychology	
PSY 220	Psychological Disorders
PSY 365	Drugs and Human Behavior
SOC 205	Families
SOC 207	Racial and Ethnic Relations
SOC 308	Cities And Suburbs
SOC 317	Law and Lawyers
SOC 322	Punishment and Corrections
SOC 340	Power and Politics
SOC 350	Social Policy
Category III Theory/Application	**3**
One course from the following:	
SOC 307	Criminal Justice Practice
LAW 305	Trial Advocacy
LAW 308	Conflict & Conflict Resolution
Electives	
LAW 490	Independent Study: Research and Creative Expression [2]
LAW 491	Internship in Law and Justice [2]
LAW 496	Honors Thesis in Law & Justice [2]
Category IV	**3**
LAW 450	Law & Justice Senior Seminar
Total Credits	**21**

[1] Students may take up to six additional credits from Category I instead of taking the courses listed under Category II.

[2] These courses may count toward Category II only with permission of the program director.

Notes:

- No more than three courses from the same department may be counted toward the minor. There is no limit on 'LAW' courses.

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
CMP 120	Seminar in Writing and Rhetoric	3
SOC 101	Sociological Imagination	3
PHL 115	Ethics	3
HIS 150	Pre-Modern World: Evolution to Revolution	3
Foreign Language [1]		3
	Semester Credit Hours	**15**
Spring Semester		
SOC 119	Introduction to Criminal Justice: Police, Courts, Corrections	3
CMP 125	Seminar in Writing and Research	3
HIS 151 or HIS 152 or HIS 153	World in the Modern Era: Exploration to Globalization or Contemporary World: Historical Perspectives or Cold War: A Global History	3
MTH 102	Finite Mathematics	3
Foreign Language [1]		3
	Semester Credit Hours	**15**

Year 2		
Fall Semester		
SOC 206	Deviance and Crime	3
Category III Course		3
Aesthetic Perspectives: Literature		3
Social Perspectives		3
Scientific Perspectives		3
	Semester Credit Hours	**15**
Spring Semester		
Category III Course		3
Category IV Course		3
Aesthetic Perspectives: Literature		3
Scientific Perspectives		3
Elective Course [2]		3
	Semester Credit Hours	**15**
Year 3		
Fall Semester		
Category II Course		3
Category III Course		3
Category IV Course		3
Two Elective Courses		6
	Semester Credit Hours	**15**
Spring Semester		
Category IV Course		3
SOC 307	Criminal Justice Practice	3
Three Elective Courses		9

Year 4		
Fall Semester		
Category IV Course		3
Category V Course		3
Three Elective Courses		9
	Semester Credit Hours	**15**
Spring Semester		
SOC 460	Criminal Justice Senior Seminar	3
Four Elective Courses		12
	Semester Credit Hours	**15**
	Total Credit Hours for Graduation	**120**

Notes:

1. For course placement information see https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing (https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing/)
2. Please note that elective credits may be used to complete requirements in a second major or minor.
3. Philosophy core included in major.

Courses and Descriptions

HIS 301 Constitutional History of U.S. 3 Credits
Surveys the English, Colonial, and Confederation backgrounds of American law and constitutionalism; the framing, adoption, and implementation of the Federal Constitution and its later development; the role of law in the nation's history; the changing interpretations of federalism; the growth of judicial review; and the increasing role of the Supreme Court.

LAW 140 Intro Seminar in Law & Justice 3 Credits
Introduces students to the interdisciplinary study of law and justice. The seminar is designed to enable students to think critically about legal issues, address legal problems from various viewpoints, and apply different types of theories of justice to analyze laws and legal institutions. Students will learn to examine law and legal issues from a variety of perspectives and approaches: anthropological, historical, literary, philosophical, political, psychological, and sociological. Open to freshmen and sophomores only.

LAW 305 Trial Advocacy 3 Credits
Students will apply fundamental legal concepts and rules of evidence to specific cases. By engaging in trial simulations, students will evaluate various forms of evidence, identify legal principles and evidentiary rules that impact a criminal trial, learn about trial procedures, pursuit of case theories, and witness, exhibit and jury selection.

LAW 310 Cyberspace Law and Policy 3 Credits
Explores the legal and policy concerns raised by the Internet, nationally and globally. The course considers issues of legal regulation of the Internet, and consider the debate about whether cyberspace can or should be regulated. Attention will be given to the applicability of principles of law and models of regulation. Topics addressed will include jurisdiction, freedom of expression, intellectual property, privacy protection, safety concerns, equal access, electronic commerce, and computer crime.

LAW 490 Independent Study: Research and Creative Expression 1-4 Credits
Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

LAW 491 Internship in Law and Justice 1-4 Credits
Provides supervised work experience in an institution, office, or agency related to law or law enforcement, such as courts, prosecutor/defense attorney offices, private law offices, state agencies, and local police departments. Students are expected to apply and broaden the knowledge obtained from law and justice minor courses to their fieldwork experience.
Prerequisite(s): 2.75 GPA and permission of the Director of the Law and Justice program.

LAW 496 Honors Thesis in Law & Justice 3-6 Credits
Entails substantial research and writing on a topic selected by the student. Proposals must be reviewed and approved by the law and justice program committee. Proposals must be submitted at least four weeks prior to course registration.
Prerequisite(s): Seniors in the minor with a minimum cumulative GPA of 3.25 and a 3.25 GPA in law and justice minor courses.

PHL 115 Ethics 3 Credits
A combined historical and systematic analysis of the problems of ethics. Such problems as the nature and meaning of moral values and judgments, moral responsibility and freedom, conscience and happiness, the good life, and the relativity of value, are explored through the writings of such philosophers as Plato, Aristotle, Aquinas, Kant, Mill, and Nietzsche. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 130 Political Philosophy 3 Credits
An introduction to the problems of political philosophy with an emphasis on recent and contemporary issues, such as the conflict between liberal and conservative ideologies, fascism, revolution, civil disobedience, and the concept of legitimate political authority. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 202 Social Philosophy 3 Credits
Emphasizes social ethics through critical studies of such contemporary problems as abortion, euthanasia, the death penalty, pornography and censorship, animal rights, drug use, sexual morality, environmental ethics, and world hunger. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 303 Philosophy of Law 3 Credits
An examination and analysis of selected topics including classical and contemporary theories in the philosophy of law and moral philosophy. Such topics as the nature of the law and legal reasoning, the legal enforcement of morality, protection of personal liberty, and the moral justification of punishment are considered. Such philosophers as Aquinas, Austin, Holmes, Bentham, Hart, and Dworkin are read and discussed.

PHL 360 Contemporary Ethics 3 Credits
An examination of recent and contemporary challenges to traditional ethical theory including such movements as logical positivism, cultural relativism, feminism, environmentalism, multiculturalism, and postmodernism. Such problems as the meaning and cognitive status of value judgments, the relation between fact and value, the relativity of values, and how value judgments can be justified are considered.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 491 Internship in Philosophy 1-4 Credits
Students will work under supervision within an area hospital, corporation, or legal agency. The specific duties and tasks will be developed jointly by the intern, intern agency, and faculty supervisor. Within the hospital setting, students will work with the Hospital Medical Ethics Committee. Within the corporate setting, there will be two types of internships: students will work in the corporate office responsible for addressing the ethical issues that arise in the business environment; or students will work in a department that allows them to explore the potential business applications of their philosophic intellectual training. Within the legal setting, students will work with the federal magistrate, prosecutor, or public defender, exploring issues in the philosophy of law that arise in the practice of law. Students must have completed four philosophy courses, one at the 300 level, before applying for the internship. No more than six credits will be allowed toward graduation. A member of the department of philosophy will supervise the internship.
Prerequisite(s): juniors and seniors with a minimum of 2.7 cumulative GPA and 3.0 GPA in philosophy, or permission of the department of philosophy.

POL 230 Methods of Political Analysis 3 Credits
An overview of the various qualitative and quantitative methods that political scientists use to study their discipline. Themes include analyses of political participation and support, methods of studying elections, measures of political tolerance and liberalism.

POL 235 Race and Ethnicity in American Politics 3 Credits
Examines the changing political, economic, and social situation of racial and ethnic groups in American politics since the 1950s. Topics include the relationship between race/ethnicity and voting behavior, political parties, and election results. Includes an analysis of specific areas of contemporary racial and ethnic conflict, such as voting rights, immigration, and affirmative action.

POL 260 Politics of Law and Order 3 Credits
The constitutional, legal, political, and administrative aspects of the criminal justice system in the United States are studied, including the court system at all levels of government, law enforcement agencies, correctional programs and institutions, probation, parole, and the relationship of our legal institutions to the broader political system.

POL 300 U.S. Constitutional Law 3 Credits
The role of the Supreme Court in the American political system is assessed. Topics include the staffing and functioning of the Supreme Court and the federal judicial bureaucracy, the origins and development of judicial review, and the role of the Supreme Court in national policy-making. Note: This course is cross-listed as HLS 300. Students may not get credit for both HLS 300 and POL 300.

POL 361 Courts, Judges and Politics 3 Credits
In-depth examination of the nature of judicial decision-making and the impact that judicial decisions have on society. Considers the sources of judicial authority, judicial fact-finding, statutory and constitutional interpretation, individual and collective processes of judicial decision-making, relations between judges and other government officials, and the political consequences of judicial decisions with particular emphasis on federal courts and judges. Note: This course is cross-listed as HLS 361. Students may not get credit for both POL 361 and HLS 361.

POL 301 Civil Liberties in the U.S. 3 Credits
The American doctrine of civil liberties in theory and practice. Emphasis on analyzing the freedoms of speech, press, assembly, and religion, the right of privacy, and the problem of discrimination in the context of contemporary issues and problems. Particular attention to the role of the Supreme Court in this area. Note: This course is cross-listed as HLS 301. Students may not get credit for both HLS 301 and POL 301.

POL 325 Public Administration 3 Credits
Public administration in modern society, emphasizing the administrative formulation of public policy and its implementation. Attention on who gets what, when, and how from the decisions of administrative units; the role administrators have in policy-making compared to elected legislators, chief executives and judges; the effect administrators have on the benefits citizens receive from government; and the effect administrators have on citizens' behavior. Note: This course is cross-listed as HLS 325. Students may not get credit for both HLS 325 and POL 325.

POL 327 Contemporary Issues in American Public Policy 3 Credits
An in-depth examination of current issues in American politics. Drunk driving, political corruption, drug policy, education, and poverty are among the issues to be considered. Emphasis on analyzing policy problems and on developing and evaluating proposed solutions.

POL 335 Urban Politics 3 Credits
Political structure and administration of municipalities in the United States. Emphasis on challenges posed by suburbanization, global and regional shifts in business, economic dislocation, housing, mass transportation, race relations, and policing.

POL 345 Justice in Comparative Context 3 Credits
This course will compare conceptions of justice across a wide range of traditions in time and space. We will begin in ancient Greece with Socrates, Plato and Aristotle, whose thought left an indelible mark on early Christian thinkers like St. Augustine and Aquinas. Indeed, modern philosophy has been famously characterized as a series of footnotes to Plato. But we shall see that this is a rather narrow reading of political philosophy, as there are myriad other ways of thinking about justice that begin with entirely different premises and take us in entirely different directions in terms of thinking about how the individual relates to the collective, what governments owe their people, and what citizens and subjects owe their state. This class will explore a number of these alternatives, including the Confucian account of virtue, the African concept of ubuntu ("I am because we are") and Native American concepts of justice and forgiveness. This comparison will also allow us to consider the relationship between medium and message, as we encounter ideas and values expressed in a range of mediums including analytical texts, manifestos, aphorisms, dramas, dialogues, myths and storytelling. In the service of this, the course is likely to include at least one historical simulation. The course will conclude by looking at responses to the Western injustice of colonialism, including Frantz Fanon's Wretched of the Earth.

POL 350 U.S. Foreign Policy and Security Policy 3 Credits
Principles, institutions, and processes involved in the formulation and implementation of policies regarding the nation's military, economic, and environmental security within the global framework. Strands, trends, and problem areas in U.S. foreign policy, with focus on the changing global environment of the post-Cold World War. Note: This course is cross-listed as HLS 350. Students may get credit for only one.

POL 351 Critical Views of Global Security 3 Credits
This course will examine the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspective on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survial, to societal security, to unit level-variables such as Human Security. Note: This course is cross-listed as HLS 351. Students may not get credit for both HLS 351 and POL 351.

POL 363 Human Rights in Global Context 3 Credits
Human rights – droits de l'homme, derechos humanos, Menschenrechte, "the rights of man" – are, literally, the rights that one has because one is human. What does it mean to have a right? How are being human and having rights related? This course provides an introduction to theory and global practice of human rights. Human rights claims play an increasingly central role in political and social struggles across the world. The adoption of the Universal Declaration of Human Rights in 1948 signaled a proliferation of international human rights law and transnational non-governmental activism. While the promotion of human rights has become global, adherence to those standards remains highly uneven and gross violations and atrocities continue to occur. Given the breath and complexity of the human rights movement, including its engagement with law, politics and morals, in radically different cultures, this course is by its very nature multidisciplinary. Note: This course is cross-listed as HLS 363. Students may not get credit for both HLS 363 and POL 363.

POL 491 Internship in Political Science 1-4 Credits
Students work under supervision in a public agency, political party, or public interest group. A minimum of 52 hours of fieldwork per credit required, with regular reports and a concluding critique analyzing and evaluating the experience. Primarily for seniors and qualified juniors. No more than six credits allowed toward graduation.
Prerequisite(s): permission of instructor.

PSY 220 Psychological Disorders 3 Credits
This course covers the major forms of psychological disorders from childhood to adulthood. Topics include the etiology of disorders from biological, social, behavioral, cognitive, and cultural perspectives, as well as diagnostic and treatment considerations.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 379 Psychology and Law 3 Credits
Introduces students to a study of selected topics in psychology and law. Topics include eyewitness testimony, jury selection, and decision-making.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 365 Drugs and Human Behavior 3 Credits
Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 491 Internship in Psychology 1-4 Credits
Provides supervised work experience in an approved institution or agency in order for students to gain knowledge in applications of psychology. Placement is made in various community institutions and agencies that offer services to both exceptional and normal individuals.
Prerequisite(s): senior psychology majors or minors.

Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 75 credits.

SOC 150 Introduction to Forensics 3 Credits
Introduces students to principles of forensic science. Whether the issue is establishing paternity or cause of death, determining arson or liability, or deciding criminal guilt or innocence, collecting and evaluating forensic material is typically involved. Students will learn the meaning and significance of scientific evidence and its role in criminal investigations and civil and criminal trials. Students will learn how forensic scientists work, define a problem, collect data, and analyze results. Case studies, crime simulations and examination of criminal evidence will highlight the application of scientific principles.

SOC 204 Law, Literature, and Film in America 3 Credits
Focuses in an interdisciplinary manner on law and justice as represented in American literature and films. It analyzes novels, short stories, and selected non-fiction texts from the perspectives of literary criticism, social history, and cultural and American studies.

SOC 205 Families 3 Credits
Examines families in the United States, past and present, emphasizing the variety of family experiences in different social contexts and the relationship between family life and social change. Includes comparative material on families in other countries and considers possible alternatives to current family forms.

SOC 206 Deviance and Crime 3 Credits
Considers deviant behavior as violation of social norms. Examines the concepts of deviance and crime in socio-historical context. Evaluates major theories advanced to explain deviance. Surveys different types of deviance, including conventional crime, non-criminal deviant behavior, and white-collar corporate, and government crime.
Prerequisite(s): SOC 101.

SOC 207 Racial and Ethnic Relations 3 Credits
Examines the social origins of prejudice and discrimination, and analyzes intergroup trends in conflict, competition, and cooperation. Considers issues of immigration, economic and political power, and ethnic, racial, and religious pluralism.

SOC 216 Youth and Crime 3 Credits
In-depth examination of the nature and extent of youth criminality in the U.S. Explores changes in youth culture and theories of delinquency. Social policies are related to youth criminality and the youth justice system is considered.

SOC 119 Introduction to Criminal Justice: Police, Courts, Corrections 3 Credits
This course introduces students to the sociological study of the criminal justice system. It examines the cultural and social foundations of this system, and review debates about problems with the criminal justice system and proposals to change it. Topics covered include nature of the crime problem, requirements of criminal law, policing, the role of the courts and legal professionals, sentencing, incarceration and alternatives to it.
Prerequisite(s): SOC 101.

SOC 245 Social Problems 3 Credits
American social, economic, and political institutions and their interrelationships are analyzed, with an emphasis on the causes, directions, and consequences of social change in American society.

SOC 246 Drugs, Crime & American Society 3 Credits
Explores the nature and extent of drug use in the U.S., how drugs are legally defined and socially constructed, and considers how and why drug policies have developed and changed historically. Considers how the criminalization of drugs has impacted policing strategies, courts, probation programs, sentencing and corrections, as well as other social institutions. Examines the role of local and federal agencies in enforcing drug laws, and considers debates about directions for legal reforms.

SOC 301 Methods of Sociological Research 3 Credits
One of the required courses in both the Sociology and Criminal Justice majors, Methods of Sociological Research introduces students to basic research processes in the social sciences. The course introduces students to both quantitative and qualitative approaches and data analysis using both original and secondary sources. Students will also complete an original research paper in this course.
Prerequisites: SOC 101 or SOW 250.

SOC 302 Crime & Justice in the Media 3 Credits
This course focuses on the impact of media on Americans' perceptions and understanding of the extent and causes of crime, and the effectiveness and purposes of crime policy. It examines how criminals, types of crime, crime policies and the criminal justice system are portrayed in various media outlets, including film, tv, newspaper, and electronic/internet. It explores the historical and contemporary relationships between media representations of criminal behavior, crime as a social problem, and the nature of the criminal justice system and contrasts these to their social realities.

SOC 304 Women and Law 3 Credits
Explores the social, economic, political and cultural context of laws relating to women and gender, such as workplace discrimination, divorce and child custody and reproductive rights. It examines how such laws have changed historically and the impact such laws have had on women as well as on men and on American social institutions, such as the family, politics, and the workplace. The course also examines women in the legal profession and their impact on the practice of law and legal reasoning.

SOC 307 Criminal Justice Practice 3 Credits
This course will consider the ways criminal justice agencies and occupations are shaped by social, economic, political, technological and legal changes. Through case studies and projects students will examine the work, culture, and work settings of various criminal justice practitioners, assess the impact of social policies on criminal justice careers, and identify new directions in the field. Students will develop the reading and writing skills needed by an array of criminal justice practitioners.

SOC 308 Cities And Suburbs 3 Credits
Examines the growth of an urban way of life under the influence of industrialism. Study of community, political, and economic institutions in cities. Comparisons between urban and suburban areas.
Prerequisite(s): SOC 101.

SOC 312 Women in Society 3 Credits
Examines changes in women's roles and in male-female relationships. Focuses on impact of law, economy and social movements in shaping women's positions as wives and as workers. Explores theories and evidence concerning the nature and extent of sex differences. Attention to women's socialization through language, schools and media.
Prerequisite(s): SOC 101.

SOC 313 Gender and Criminal Justice 3 Credits
This course will examine women's experiences with the criminal justice system as offenders, victims, prisoners, and practitioners. It will consider how gender has shaped theories of crime and criminological research. It will explore how cultural constructions of gender have influenced substantive and procedural criminal law, the ways criminal justice agencies respond to crime, and how these have changed historically. Attention will be given to the development of new approaches, reforms, and challenges.
Prerequisite(s): SOC 101.

SOC 317 Law and Lawyers 3 Credits
Relationships between law, the economy, and the state are explored. Discussion of laws, legal systems and legal reasoning using cross-cultural comparisons and historical analysis of these in the United States. Particular attention given to impact of law on corporations, workers, women, and minorities. Changes in legal profession and legal education are examined.
Prerequisite(s): SOC 101.

SOC 321 White Collar and Corporate Crime 3 Credits
This course will identify, explore, and study the unique criminological characteristics of the crime subtypes white collar crime and corporate crime. In addition to developing a formal definition of white collar crime and corporate crime, students will study: (a) the nature of the criminal act and the criminal actor(s); (b) the extent or scope of the white collar/corporate crime problem; (c) the factors that contribute to the crime decision, and (d) the various prevention and mitigation strategies used to address the white collar crime/corporate crime problem. Students will learn to evaluate historical cases of white collar crime/corporate crime and apply criminological theory to actual cases.
Prerequisite(s): SOC 101.

SOC 322 Punishment and Corrections 3 Credits
This course explores the nature, forms, rationales, and effectiveness of punishment as a form of crime control. It traces the development of corrections in the U.S., identifies cultural trends and developments in penology, including mass incarceration and supermax prisons, considers the ways race and class have shaped these, and the reverberating effects penal policies have had on American culture and society beyond the criminal justice system. It examines the role of laws, politics, crime control agencies, as well as of media, and corporations in shaping penal policies. Topics also include: prison subcultures, inmate rights, correctional practices, privatization of prisons, and alternatives to punitive policies of incarceration and capital punishment.
Prerequisite(s): SOC 101.

SOC 330 Class and Economic Inequality 3 Credits
Social, economic, and political aspects of the division of society into classes are considered. Theories of stratification and the distribution of wealth, power, and prestige in societies past and present are examined.
Prerequisite(s): SOC 101.

SOC 342 Police and American Society 3 Credits
This course examines important issues regarding police in American society, such as the paradoxes inherent in police work, police organization and strategies and their effectiveness, the dilemmas of supervising police work, police unionism, the nature and implications of police occupational subculture, the use of police discretion, forms of police misconduct and accountability, professionalization of police and the trend toward police privatization. It also considers the diversity of the police force, trends in the delivery of policing services, the impact of new technologies on policing, and the challenges of policing in a multicultural society.
Prerequisite(s): SOC 101.

SOC 343 Policing and Counter Terrorism 3 Credits
This course is designed as an upper level (undergraduate/graduate) combination lecture and discussion section on the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.
Prerequisite(s): SOC 101.

SOC 345 Race and Crime 3 Credits
Examines the impact of crime policy on minority communities in the United States, with particular attention to the impact of "The War on Drugs", three-strike laws, and mandatory sentencing on minorities and minority communities. Drawing on sociological research, the course explores myths and realities concerning the relationship between race and crime. The relationship between racial attitudes, historical race relations, and mass incarceration are discussed.
Prerequisite(s): SOC 101.

SOC 350 Social Policy 3 Credits
Investigates the relationship between economic development and social policy in comparative and historical context. The main features of preindustrial, early industrial, and advanced industrial social welfare systems are described. Social, economic and political factors that shape social policy are investigated.
Prerequisites: SOC 101 or SOW 250.

SOC 340 Power and Politics 3 Credits
Examines the nature and distribution of power in contemporary societies; analyzes the relationships between power and politics.
Prerequisite(s): SOC 101.

SOC 365 Selected Top: Social Movements 3 Credits
FALL 2012 - This course examines movements that seek change in the social, cultural and political structures of society. The social, economic and political contexts of these movements are treated as well as their origins, tactics, organization, recruitment, and successes and failures. Case studies focus on movements in the areas of labor, civil rights, feminism, the environment, "right wing politics", and neighborhood activism. In today's world, social movements abound. Movements such as the Tea Party and the Occupy movements demonstrate that they can take place across the political spectrum of society. Moreover, the interconnectedness of the world economy creates social movements throughout the world, whether in Asia, the Mid-East or Europe that have direct affects on the United States. Because the coverage of these movements are given considerable media exposure, students (and the public) tend to accept the interpretations of these movements as presented in the narratives of the media coverage. This class will provide a systematic academic treatment of social movements. Because social movements target structural and cultural institutions in society, the study of these movements will not only provide an understanding of these movements, but of larger social problems in society as well.
Prerequisite(s): SOC 101.

SOC 396 Applied Sociology 3 Credits
Shows how sociology can be applied in work settings. As participant observers in organizations related to their career objectives, students learn to apply sociological knowledge, perspectives, and skills. In class meetings and individual consultations with the instructor, students examine the applied dimensions of sociology, the uses of sociology in various occupations, the ethical issues involved in applied sociology, and the culture and structure of their work organization.
Prerequisite(s): SOC 101.

SOC 401 Sex and the Body in Society 3 Credits
Examines cultural meanings and social practices associated with sex and the body. Contemporary cultural norms and practices in the U.S. will be compared to other societies, historically and cross-culturally. Variations in sexual practices, ideals of sexual attractiveness according to age, gender, race, ethnicity, class and sexual orientation also will be discussed. Topics may include beauty industries (e.g. cosmetics, diet, fashion, surgery, drugs), sex and the workplace, the impact of media, social policy, and technology on ideals of sexual attractiveness, birth control, and sexual violence.
Prerequisite(s): SOC 101.

SOC 460 Criminal Justice Senior Seminar 3 Credits
Draws on and develops students' knowledge and understanding of crime, criminal law and criminal justice institutions, and applies these to a specific topic, method, institution, or controversy. Topics vary. Students will be expected to contribute to seminar discussions and to complete research projects related to the seminar theme. Required for senior criminal justice majors; open to others only by permission of the chair.

Cybersecurity

Program Overview

Just as computing technology has become an integral part of many aspects of our lives, the need to secure the operation of that technology has become critical. The importance of secure computational operations has had significant impacts in social, commercial, financial, industrial, and political realms, and will continue to grow as the right to privacy is tested.

In NJ and the surrounding Philadelphia and New York metro areas the demand is even greater, with over 27,000 unfilled cybersecurity positions. On a national level, cybersecurity has been recognized as a critical component of Homeland Security, and the Senate Appropriations committee funded cybersecurity efforts above the President's request for FY 2019. Students pursuing a B.S. in Cybersecurity will bring a powerful combination of a traditional liberal arts education with foundational knowledge and technical training needed to excel in the cybersecurity field. A Minor in Cybersecurity is also available.

Curriculum Overview

Rider students in this program will benefit from a curriculum aligned with the latest national guidelines, adaptable to meet the evolving demands of industry and research. Cybersecurity is a nascent academic affair, although it has been in existence for nearly as long as computers. Thus, any cybersecurity curriculum should be founded in basic principles: that the computers, including data, software, systems, and networks, as well as the people and organizations using the machines, are kept secure and operational. The courses comprising the major are foundational, with the concentrations offering breadth and expertise in a given aspect of cybersecurity.

Student Learning Outcomes

Graduates of the Cybersecurity major will be able to:

1. Graduate with a broad understanding of the nature of cybercrime and cybersecurity.
2. Graduate with a deep understanding of security at multiple levels.
3. Graduate with the ability to collaborate and apply their knowledge to real-world problems.
4. Graduate with a passion for lifelong learning, professional responsibility to uphold ethical behavior.

Degrees Offered:

- B.S. in Cybersecurity
- Minor in Cybersecurity

Cybersecurity Program Requirements

(57 credits)

Students must select either the Technical Track or the Policy Track.
Notes:

- Majors must complete either MTH 105 or MTH 210 to fulfill their mathematics core requirement.
- A grade of 'C' or better is required in all 100-level CSC or CYB courses.

Code	Title	Credits
Required Cybersecurity Core Courses:		**12**
CYB 105	Introduction to Cybersecurity	
CYB 110	Cybercrime and Cyberterrorism	
CYB 130	IT Fundamentals	
CSC 150	Cyber Ethics and Societal Impact	
Select either the Technical Track or the Policy Track		**36**
Technical Track:		
Complete the following required courses:		
CSC 110	Computer Science I	
CSC 120	Computer Science II	
CSC 130	Data Structures and Algorithms	
CSC 140	Discrete Structures	
CYB 200	Operating Systems & Cybersecurity	
CYB 240	Ethical Hacking and Penetration Testing	
CSC 250	Software Security Engineering	
CYB 260	Network Defenses and Countermeasures	
CSC 260	Computer Networks	
CYB 300	Developing & Deploying Cybersecurity Programs	
CYB 320	Cyber Forensics	
CSC 340	Cybersecurity Essentials	
Elective Courses		
Select two of the following Policy courses:		**6**
HLS 203/POL 203	Homeland Security	
HLS 204/POL 204	Development and Structure of the US Intelligence Community	
SOC 210	Criminal Investigation	
LAW 310	Cyberspace Law and Policy	
HLS 320	Defense Policy and Analysis	
HLS 331	Critical Infrastructure	
POL 351/HLS 351	Critical Views of Global Security	
Select one of the following Technical courses: [1]		**3**
CSC 320	Human-Computer Interaction	
CSC 350	Analysis of Algorithms	
CSC 380	Parallel and Distributed Systems	
Policy Track (36 credits)		
Complete the following required courses:		
SOC 150	Introduction to Forensics	
HLS 203/POL 203	Homeland Security	
HLS 204/POL 204	Development and Structure of the US Intelligence Community	
SOC 210	Criminal Investigation	
SOC 119	Introduction to Criminal Justice: Police, Courts, Corrections	
POL 301	Civil Liberties in the U.S.	
HLS 205	Spies, Double Agents, and Moles: The World of Counterintelligence	
or HLS 304/ POL 304	Political Behavior: Fear, Risk and Crisis	
HLS 220/POL 220	Terrorism & Counter Terrorism	
or HLS 322	Countering Domestic Extremism in the United States	
LAW 310	Cyberspace Law and Policy	
POL 327	Contemporary Issues in American Public Policy	
or HLS 320	Defense Policy and Analysis	
SOC 343	Policing and Counter Terrorism	
or HLS 332	Disaster Management and Incident Response	
POL 351/HLS 351	Critical Views of Global Security	
or HLS 331	Critical Infrastructure	
Elective Courses		
Select two of the following Technical courses (6 credits): [1]		
CSC 105	Fundamentals of Computer Science	
CSC 110	Computer Science I	
CSC 120	Computer Science II	
CSC 140	Discrete Structures	
CYB 200	Operating Systems & Cybersecurity	
CYB 240	Ethical Hacking and Penetration Testing	
CYB 320	Cyber Forensics	
Select one of the following Policy courses (3 credits):		
HLS 341	Cybersecurity Policy: Hacktivism and Cyberviolence	
HLS 334	Cyber Strategy	
Electives for either Track		
CYB 490	Cybersecurity Independent Study and Research	
CSC 491	Internship in Computer Science	
Total Credits		**57**

NOTE: Cybersecurity majors must also complete either MTH 105 or MTH 210 to fulfill their mathematics core requirement.

[1] Other technical electives are available for Cybersecurity B.S. undergraduates pursuing the **4+1 M.S.**:

- CYBR 500 Beyond Code: Cybersecurity in Context
- CYBR 510 Cryptogragphy for Cybersecurity
- CYBR 520 Managing Cyber Risks
- CYBR 530 Mobile Computing & Wireless Security

Cybersecurity Minor Requirements

(21 credits)

Code	Title	Credits
Required Courses		**12**
CYB 105	Introduction to Cybersecurity	
CYB 110	Cybercrime and Cyberterrorism	
CSC 150	Cyber Ethics and Societal Impact	
CYB 130	IT Fundamentals	
Select at least three of the following courses:		**9**
CSC 105	Fundamentals of Computer Science	
CSC 110	Computer Science I	
CSC 120	Computer Science II	
CSC 130	Data Structures and Algorithms	
CYB 200	Operating Systems & Cybersecurity	
CYB 240	Ethical Hacking and Penetration Testing	
CYB 260	Network Defenses and Countermeasures	
CYB 300	Developing & Deploying Cybersecurity Programs	
CYB 320	Cyber Forensics	
CSC 340	Cybersecurity Essentials	
CSC 260	Computer Networks	
CIS 319	Computer Forensics	
Total Credits		**21**

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Courses and Descriptions

CYB 105 Introduction to Cybersecurity 3 Credits
Introduction to Cybersecurity introduces students to this interdisciplinary field by exploring the technology, policies, and processes that enable assured computer operations. Students will be introduced to recent developments in cybercrime such as phishing, ransomware, viruses, and worms. Students will also learn about the policy and legislation regarding privacy, terrorism, hacktivism, and the dark web. Students will also be introduced to programming and networking concepts.

CYB 110 Cybercrime and Cyberterrorism 3 Credits
This course explores the world of cybercrime and cyber terrorism. Students will learn about the social and legal aspects of cybercrime and the technical tools that enable the investigation of these acts. They will discuss and review several definitions and types of cybercrime, and the roles of private sectors and law enforcement in detecting, investigating and preventing these acts.

CYB 130 IT Fundamentals 3 Credits
IT Fundamentals is designed to immerse students in the essentials of computer hardware and software. The IT Fundamentals course provides students with principles of data and technology that frame and define cybersecurity and insight into the importance of cybersecurity and the integral role of cybersecurity professionals. Students will explore foundational cybersecurity principles, security architecture, risk management, attacks, incidents, and emerging IT and IS technologies.

CYB 200 Operating Systems & Cybersecurity 3 Credits
This course focuses on the fundamental properties of three major operating systems (Linux, MacOS, and Windows). The course covers file systems, command line interfaces, and shell scripting. Students will learn how to manage user groups while focusing on security. They will also be introduced to SQL database architecture.
Prerequisite(s): CYB 130.

CYB 240 Ethical Hacking and Penetration Testing 3 Credits
This course introduces students to the methods of penetration testing and hacking as method of locating and successfully exploiting computer systems for the purpose of making computer systems more secure. This process includes probing for vulnerabilities as well as providing proof of concept attacks to demonstrate the vulnerabilities are real and generating specific and effective recommendations for addressing and fixing security issues discovered vulnerability assessments and penetration.
Prerequisite(s): (CYB 200 with a minimum grade of D or CSC 240 with a minimum grade of D) and CSC 260 with a minimum grade of D.

CYB 260 Network Defenses and Countermeasures 3 Credits
This course in network defenses and countermeasures prepares students to defend networks against attacks by implementing proactive protection measures and by responding to active and potential threats. It covers multiple techniques for network defense, including firewalls, intrusion-detection systems, VPNs, encryption, and system hardening.
Prerequisite(s): CYB 240.

CYB 300 Developing & Deploying Cybersecurity Programs 3 Credits
In Developing and Deploying Cybersecurity Programs, students will learn how to create cybersecurity policies, standards, guidelines and plans, and the differences between them. Students will learn how threats develop, and how threat actors launch attacks on their targets. The material in this course conforms to the NIST Cybersecurity Framework and the ISO/IEC 27000-series standards.
Prerequisite(s): CSC 260 with a minimum grade of D.

CYB 320 Cyber Forensics 3 Credits
This course covers the technical and legal aspects of cyber forensics, including general forensic procedures, electronic discovery, imaging, hashing, file recovery, mismatched file types, and preserving the chain of evidence. Students will perform detailed cyber forensic analyses on compromised system images, using both open-source and court-approved digital forensic software tools to conduct forensic examinations, write analytical reports, and practice mock courtroom presentations.
Prerequisite(s): CYB 200.

CYB 490 Cybersecurity Independent Study and Research 3 Credits
Immerses the student in guided research. The student learns to organize material, use the literature, obtain reproducible data, and synthesize the results of the study. If possible, the student will publish the results or present them at a scientific meeting.

CYB 491 Internship in Cybersecurity 1-4 Credits
A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 40 hours of internship per credit is required. The grade for the course will be determined by the student's overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester. Available for juniors and seniors.
Prerequisite(s): 2.5 GPA and Permission of Dept. Chair/Program Director.

Dance

Program Overview

Rider's Bachelor of Arts in Dance prepares students for rewarding and multi-faceted careers in the field - nurturing the dance creators, performers, educators, analysts and healers of the future. Through comprehensive exploration of diverse dance techniques, histories, movement theories, pedagogies and choreography in our studios and classrooms, students develop solid foundations. Multiple creative, repertory and performance opportunities advance students' skills and bring their passions to life on stage and in other mediums.

Rider's expanded curriculum solidly grounds students in contemporary and traditional movement practices while also delivering a broad array of diverse & relevant social and cultural dance styles. Dance techniques include Contemporary, Ballet, Jazz, Tap, Vogueing, Hip Hop (Locking, Breaking, and Hip Hop Choreography), and other forms originating from diasporic dance traditions. Dancers at Rider develop a breadth and depth of knowledge of the broad, global tapestry of dance which informs their approach.

Opportunities exist, unique to Rider, to enhance and expand career potential including minors or even a second major in:

- Arts & Entertainment Industries Management with Dance Emphasis (for those wanting to effectively market themselves, or who may want to start their own studio or company)
- Elementary Education – a distinct degree whereby students second major in Dance Studies & receive k-12 certification (for students wanting to build a career in k-12 teaching)
- Dance Science – a distinct degree that balances science and dance coursework (for those who may pursue dance conditioning & physical therapy)
- Accelerated Master of Arts in Clinical Mental Health Counseling with a Dance/Movement Therapy Concentration - students can take up to two graduate-level courses (p. 1449) in their senior year (for those wanting to pursue a career in licensed clinical therapy through movement & dance)
- Secure all credits needed to become a Certified Educator (CE) to teach Dance in New Jersey's K-12 public schools through your dance degree (state certificate application required)

Dancers at Rider benefit from close proximity to two of the world's great dance scenes – NYC just an hour away, and Philly just 40 minutes – enjoying the creative calm of a traditional campus setting. Its close proximity means dance professionals from Broadway, national & regional companies and studios regularly teach and work among the close-knit community of aspiring dancers, actors, designers, technicians and arts leaders that comprise Rider's Department of Performing Arts.

Degrees Offered

- B.A. in Dance Performance
- B.A. in Elementary Education with a 2nd major in Dance Studies
- Minor in Dance

Associated Department: Performing Arts (https://www.rider.edu/academics/colleges-schools/college-arts-sciences/communication-media-arts/faculty-departments/performing-arts/)

Related Programs:

- Arts Entertainment Industries Management (p. 40)
- Dance Science, B.A. (p. 148)
- Movement Science minor (p. 382)
- M.A. in Clinical/Mental Health Counseling with Dance/Movement Therapy concentration (p. 1368)

Dance Program Requirements

General Remarks

For all majors offered in the Department of Performing Arts, students must earn a minimum grade of "C" in those courses required in the major area in order to make satisfactory progress. If a grade of "C-" or lower is earned, the student must repeat the course.

Select one course of study from the Dance Performance (p. 142) or Dance Studies (p. 142) options below:

Dance Performance

(45 credits)

Code	Title	Credits
Applied (Dance Studio)		**12**
All incoming first year students will be pre-placed in the appropriate level of Ballet, Modern and DAN 100		
Complete 12 credits from the list of courses below (some courses are repeatable, please consult your advisor):		
DAN 112	Ballet I	
DAN 113	Ballet II	
DAN 201	Ballet III	
DAN 202	Ballet IV	
DAN 301	Ballet V	
DAN 302	Ballet VI	
DAN 151	Modern Dance I	
DAN 152	Modern Dance II	
DAN 251	Modern Dance III	
DAN 351	Modern Dance IV	
DAN 100	Contemporary Dance Forms (Select from Latin, Hip Hop, West African, Tap, or Jazz. Can be repeated for credit.)	
Ensemble / Performance		
DAN 210	Rider Dances: Repertory & Productions (complete 4 terms for 4 credits)	4
DAN 210T	Rider Dances Rep&Produc:Tech (1 credit needed)	1
DAN 111	Dance Lab (7 terms) [1]	0
DAN 215	Improvisation and Embodiment	1
DAN 220	Dance Composition	3
Complete 3 credits from the list below:		3
DAN 490	Independent Research and Study	
DAN 491	Internship in Dance	
DAN 498	Senior Capstone	
DAN 499	Seniors Honor Program	
Dance History and Theory		
DAN 105	Survey of Dance History	3
DAN 250	Movement Analysis	3
DAN 350	History of Ballet, Modern & Jazz Dance	3
DAN 450	Pedagogy and Methodology in Dance	3
DAN 460	Movement Theory and Somatic Practice	3
Special Topics		**6**
Select two courses from the list below:		
DAN 310	Music for Dance	
DAN 311	Dance Video	
DAN 312	Special Topics in Dance	
Total Credits		**45**

[1] Double majors should consult their advisors to determine the most pedagogically appropriate lab to attend. Students should not register in more than one lab per semester. Students are required to complete at least three lab sections in each of their majors before graduation. Students must meet the minimum total credits of lab required by each major though some of those credits may come from a different discipline.

Notes:

- All new Majors will participate in a placement review at start of first semester in order to be placed in appropriate level(s) of studio courses.
- Of the twelve total studio credits required, Majors must successfully complete a minimum three progressive levels of Ballet, as well as Modern and minimum three Contemporary Dance Forms course options to graduate
- All students enrolled in DAN 210 (https://rider-curr.courseleaf.com/search/?P=DAN%20210) and performing in Rider Dances are expected to be concurrently enrolled in a dance studio course.
- All majors and minors will participate in ongoing Dance Screening with a certified Dance Physical Therapist, fees for which are assessed as part of overall tuition package.

Dance Studies

For Elementary Education majors (p. 153) double majoring in Dance Studies

(32 credits)

Code	Title	Credits
Ensemble/Performance		
DAN 111	Dance Lab (4 semesters)	0

Applied (Dance Studio)		
Ballet		3
Studio Electives		5
DAN 100	Contemporary Dance Forms	
or DAN 300	Lecture & Studio in Dance	
DAN 112	Ballet I	1
DAN 113	Ballet II	1
DAN 151	Modern Dance I	1
DAN 152	Modern Dance II	1
DAN 310	Music for Dance	3
DAN 201	Ballet III	1
DAN 202	Ballet IV	1
Dance History and Theory		
DAN 105	Survey of Dance History	3
DAN 350	History of Ballet, Modern & Jazz Dance	3
DAN 450	Pedagogy and Methodology in Dance	3
Select 6 credits from the following: [1,2]		**6**
DAN 460	Movement Theory and Somatic Practice	
DAN 220	Dance Composition	
ART 104	Survey of Art History I	
ART 106	Survey of Art History II	
ART 199	Arts in Contemporary Civilization	
ART 201	Art of the Ancient World	
ART 207	Medieval and Renaissance Art	
ART 209	Art of the Baroque	
ART 214	American Art	
ART 303	19th Century Art	
ART 306	Art of the 20th Century	
ART 495	Selected Topics in Art History	
MUS 105	Survey of Music History I	
MUS 106	Survey of Music History II	
MUS 204	Jazz History	
MUS 205	History of Pop and Rock Part I	
MUS 206	History of Pop and Rock Part 2	
MUS 208	Music of the Theater	
MUS 209	Great Composers	
MUS 218	Postmodernism & Popular Culture	
MUS 300	Beethoven and the Romantic Age	
MUS 304	Music of the Beatles	
MUS 306	Contemporary Music Experience	
MUS 309	Film Music	
MUS 315	Black Music in America	
THE 105	Theatre History to 1700	
THE 106	Theater History Since 1700	
THE 199	The Arts in Contemporary Civil	
THE 207	Contemporary Theatre	
THE 206	American Theatre History	
THE 308	Modern Drama	
College of Education and Human Service Requirements		
See the College of Education and Human Services Degree Programs for information on the programs available.		
Total Credits		**32**

1 From the ART, MUS or THE courses in the list select no more than one from each discipline.

2 ART 120, MUS 120, and THE 120 will not fulfill this requirement.

Notes:

- All new dance students must take a placement exam.
- It is strongly suggested that DAN 210 and DAN 210T are taken at least once.
- Majors must successfully complete Ballet III or equivalent to receive a degree.
- All students enrolled in DAN 210 and performing in Rider Dances are expected to be concurrently enrolled in a dance studio course.
- All majors and minors must have a Dance Screening ($75.00) with a certified Dance Physical Therapist.

Dance Minor Requirements

(19 credits)

Code	Title	Credits
Select two of the following:		**6**
DAN 105	Survey of Dance History	
or DAN 180	History of Movement Theory	
or DAN 220	History of Choreography	
or DAN 350	History of Ballet, Modern & Jazz Dance	
Complete the following courses:		
DAN 111	Dance Lab (4 semesters)	0
DAN 151	Pilates and Modern	1
DAN 152	World Dance & Improvisation	1
DAN 190	Dalcroze Eurythmics	3
DAN 210	Rider Dances: Repertory & Productions	1
DAN 210T	Rider Dances Rep&Produc:Tech	1
DAN 100	Fundamentals of Dance	4
or DAN 300	Lecture & Studio in Dance	
or DAN 493	Special Topics in Dance Studio	
DAN 201	Vaganova I	1
DAN 202	Vaganova II	1
Total Credits		**19**

Note:

- All majors and minors must have a Dance Screening ($75.00) with a certified Dance Physical Therapist.

Dance Concentrations

Select one of the following concentrations:

Dance Performance Concentration (p. 144)

Dance Studies Concentration (p. 144)

Dance Performance

Code	Title	Credits
Applied (Dance Studio)		**12**
All incoming first year students will be pre-placed in the appropriate level of Ballet, Modern and DAN 100		
Complete 12 credits from the list of courses below (some courses are repeatable, please consult your advisor):		
DAN 112	Ballet I	
DAN 113	Ballet II	
DAN 201	Ballet III	
DAN 202	Ballet IV	
DAN 301	Ballet V	
DAN 302	Ballet VI	
DAN 151	Modern Dance I	
DAN 152	Modern Dance II	
DAN 251	Modern Dance III	
DAN 351	Modern Dance IV	
DAN 100	Contemporary Dance Forms (Select from Latin, Hip Hop, West African, Tap, or Jazz. Can be repeated for credit.)	
Ensemble / Performance

Select two courses from the list below:		
DAN 310	Music for Dance	
DAN 311	Dance Video	
DAN 312	Special Topics in Dance	
Total Credits		**45**

[1] Double majors should consult their advisors to determine the most pedagogically appropriate lab to attend. Students should not register in more than one lab per semester. Students are required to complete at least three lab sections in each of their majors before graduation. Students must meet the minimum total credits of lab required by each major though some of those credits may come from a different discipline.

Note:

- All majors and minors must have a Dance Screening ($75.00) with a certified Dance Physical Therapist.

College of Education and Human Service Requirements		
See the College of Education and Human Services Degree Programs for information on the programs available.		
Total Credits		**32**

[1] From the ART, MUS or THE courses in the list select no more than one from each discipline.

[2] ART 120, MUS 120, and THE 120 will not fulfill this requirement.

Notes:

- All new dance students must take a placement exam.
- It is strongly suggested that DAN 210 and DAN 210T are taken at least once.
- Majors must successfully complete Ballet 3 or equivalent to receive a degree.
- Al students enrolled in DAN 210 and performing in Rider Dances and expected to be concurrently enrolled in a dance studio course.
- All majors and minors must have a Dance Screening ($75.00) with a certified Dance Physical Therapist.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

DAN 100 Contemporary Dance Forms 1 Credits
Designed to offer students training in a range of dance genres such as Hip Hop, West African, Latin, Commercial, Lyrical, Tap, and Jazz. Forms rotate each semester. This course may be taken more than once for credit.

DAN 105 Survey of Dance History 3 Credits
An introductory course to familiarize students with the breadth and depth of dance in human society. It will chronologically examine dance through four lenses: Dance and Community, Dance and Religion, Dance and Politics, and Dance as Art. Students will be exposed to various dance forms from around the world with varying purposes, functions, and motivations from the beginning of recorded history to present.

DAN 111 Dance Lab 0 Credits

DAN 112 Ballet I 1 Credits
This course provides a foundational study of ballet for dancers within a university setting. Classes concentrate on foundational concepts within ballet technique and theory. Work focuses on alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration and coordination; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; and self-motivation discipline. Over the term students become familiar with terminology and positions of the body, and gain broad knowledge of the protocols and traditions of ballet class.

DAN 113 Ballet II 1 Credits
This is a continuation of the fundamental practices covered in Ballet I, including proper use of alignment, feet, rotation, and use of the core in the classical vocabulary. In addition this course extends the coverage of discourse, terminology and vocabulary of the classical technique. Course pre-req(s): DAN 112 with a C+ or better.

DAN 151 Modern Dance I 1 Credits
Modern Dance I is a foundation level technique class that aims to inform students' dance skills through studying the concepts and techniques of modern dance by expanding knowledge and expressive range to increase potential as a dancer and artist. The course will progress throughout the semester and is based on the foundational exercises. Variation on the exercises will be practiced as the class progresses. The sequence of movements - floor work, standing center work, and traveling across the floor - is usually taught in order. The contraction and release principle is used throughout the classwork.

DAN 152 Modern Dance II 1 Credits
Modern Dance II is a continuation of Modern Dance I and is a foundation level technique class that aims to inform students' dance skills through studying the concepts and techniques of modern dance by expanding knowledge and expressive range to increase potential as a dancer and artist. The course will progress throughout the semester and is based on the foundational exercises. Variation on the exercises will be practiced as the class progresses. The sequence of movements - floor work, standing center work, and traveling across the floor - is usually taught in order. The contraction and release principle is used throughout the classwork. Permission of Instructor or prescreen placement is required.

DAN 201 Ballet III 1 Credits
This course provides a foundational study of ballet for dancers within a university setting. Classes concentrate on foundational concepts within ballet technique and theory. Work focuses on alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration and coordination; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; and self-motivation discipline. Over the term students become familiar with terminology and positions of the body, and gain broad knowledge of the protocols and traditions of ballet class. Permission of Instructor or prescreen placement is required.

DAN 202 Ballet IV 1 Credits
This course is a continuation of DAN 201. The course provides further skills in basic classical ballet vocabulary and preparation for professional study at the intermediate level. Permission of Instructor or prescreen placement is required.

DAN 210 Rider Dances: Repertory & Productions 1 Credits
This course provides an in-depth experience with the art of dance production from creation to performance. Students will be chosen to learn and perform repertory; fulfill technical roles such as sound, lighting and costume design; and assume production and managerial responsibilities such as promotion, publicity, front of house management and stage management.
Prerequisite(s): permission of instructor.

DAN 210T Rider Dances Rep&Produc:Tech 1 Credits

DAN 215 Improvisation and Embodiment 1 Credits
This course provides experiences in the spontaneous use of movement structures derived from movement concepts, games, imagery, and media sources. It is designed to help students discover and develop their own movement potential. Weight, speed, momentum, inertia, and relationships are explored through structural improvisational exercises. These techniques provide the basis for improvised duets and group dances.

DAN 220 Dance Composition 3 Credits
This course prepares the dance student for the creation of dance through critical analysis, reading, writing and practical assignments. Students will examine the creative process as applied to dance artists and various forms and genres of dance. Weekly choreographic studies that deal with space, time, energy, gesture, and form are assigned.
Prerequisite(s): DAN 215 with a C+ or better.

DAN 250 Movement Analysis 3 Credits
This course introduces movement analysis through a theoretical framework and historical lens. Methods of movement analysis such as Laban Movement Analysis and other systems of movement description are critically evaluated in this course. The course investigates application in the fields of dance, education, anthropology, and non-verbal communications research. This movement course familiarizes students with the basic elements of music theory (staff, clefs, time signatures, notations, chords, etc.) and the Dalcrozian principles regarding music, movement and improvisation.

DAN 251 Modern Dance III 1 Credits
Modern Dance III is a continuation of Modern Dance II and is an advanced level technique class that aims to inform students' dance skills by studying the concepts and techniques of modern dance by expanding their knowledge and expressive range to increase their potential as a dancer and artist. The course will progress throughout the semester and is based on the foundational exercises. Variations on the exercises will be practiced as the class progresses. The sequence of movements - floor work, standing center work, and traveling across the floor - is usually taught in order. The contraction and release principle is used throughout the classwork. Permission of Instructor or prescreen placement is required.

DAN 301 Ballet V 1 Credits
This course provides advanced intermediate level study of ballet for dancers within a university setting. Classes concentrate on foundational concepts within ballet technique and theory. Work focuses on: alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; and self-motivation and discipline. In keeping with contemporary practice in higher education, students continue to deepen their understanding of ballet as a historically-situated movement practice and oral tradition, learning and performing historical ballet repertory and the many ways this choreographic legacy is evolving over time. Permission of Instructor or prescreen placement required.

DAN 302 Ballet VI 1 Credits
This course provides advanced intermediate level study of ballet for dancers within a university setting. Classes concentrate on foundational concepts within ballet technique and theory. Work focuses on alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; and self-motivation and discipline. In keeping with contemporary practice in higher education, students continue to deepen their understanding of ballet as a historically situated movement practice and oral tradition, learning and performing historical ballet repertory and the many ways this choreographic legacy is evolving over time. Permission of Instructor or prescreen placement is required.

DAN 310 Music for Dance 3 Credits
This course teaches dancers to consider Western and non-Western music, building the necessary vocabulary to analyze, develop, and communicate musical ideas. We will explore the basic elements of music through the study of rhythmic structures, an introduction to fundamental music theory, critical analysis of compositions and choreography of various genres, and experiential activities that combine music and movement. This course explores temporal and rhythmic organizations of movement and dance analyzed for the purpose of enhancing clarity in performance, choreography, and teaching. Elementary musical notation, scoring, and accompaniment skills are developed.

DAN 311 Dance Video 3 Credits
This course teaches students how to create dance choreography specifically for the camera. Student learn how to recognize and use the camera apparatus to film, edit and produce choreographic projects. Each student is required to create a substantial dance video by the end of the semester.
Prerequisite(s): DAN 220 with a C+ or better.

DAN 350 History of Ballet, Modern & Jazz Dance 3 Credits
Studies the major periods in the development of Western Theatrical Dance from the Renaissance to the present focusing on ballet, modern, jazz, tap and musical theater dance. The course will examine the ideas and individuals that caused the development of choreographers, producers, designers and productions.

DAN 351 Modern Dance IV 1 Credits
Modern Dance IV is a continuation of Modern Dance III and is an advanced level technique class that aims to inform students' dance skills through studying the concepts and techniques of modern dance by expanding knowledge and expressive range to increase potential as a dancer and artist. The course will progress throughout the semester and is based on the foundational exercises. Variations on the exercises will be practiced as the class progresses. The sequence of movements - floor work, standing center work, and traveling across the floor - is usually taught in order. The contraction and release principle is used throughout the classwork. Permission of Instructor or prescreen placement required.

DAN 450 Pedagogy and Methodology in Dance 3 Credits
This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. Cross-listing existing entry-level teaching course with analogous graduate-level course (CURR 711).

DAN 460 Movement Theory and Somatic Practice 3 Credits
Somatic Dance Explorations investigates basic kinesiological principles that have informed a range of somatic practices such as Feldenkrais, Bartenieff Fundamentals, Alexander Technique, and yoga. These practices have become widely incorporated into the contemporary dance field as a means of developing greater movement efficiency, enhancing mindfulness, and preventing injuries. In this course, students will gain an understanding of dance performance as it relates to functional anatomy. Building knowledge of the body's structures and regions, particularly the musculoskeletal system, the course will incorporate imagery and kinesthetic exercises to expand the students' technical proficiency and expressivity.
Prerequisite(s): C+ or better in DAN 450.

DAN 490 Independent Research and Study 1-4 Credits
Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credit hours. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.
Prerequisite(s): junior or senior standing, good academic standing.

DAN 491 Internship in Dance 1-4 Credits
Provides junior or senior dance majors with the practical experience of working within an educational or professional dance environment. Students must be sponsored by a dance professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.
Prerequisite(s): permission of instructor.

DAN 498 Senior Capstone 3 Credits

DAN 499 Seniors Honor Program 3 Credits
A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, to be planned under the direction of a faculty advisor, will represent a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

Dance Science

Program Overview

A degree in Dance Science blends both the art and science of dance into a singular curriculum. Students will study the art and movement of dance - fundamentals of classical dance forms; history and theory of dance, composition and performance - while simultaneously exploring the science underlying human performance. They will understand socio-political-historical aspects of dance, and be able to discuss meaning in movement. Students will learn to integrate mind-body and develop strength, coordination, flexibility, musicality, and expression, while studying how the human body functions as a dancer to achieve optimal performance.

Curriculum Overview

Students will learn how to conceptualize, create, and analyze dance as they study the art of movement. They will receive a comprehensive education in both the art of dance and the instrument of dance - the body. Students will have opportunities to both perform on stage and work, shadow, and research with our physical therapist who specializes in movement logic and injury prevention. Each student will select a capstone, multi-disciplinary, or research project. Understanding

biomechanics will increase understanding and equip students with the skills, theoretical framework, and experience necessary to enter the workforce as dance teachers, choreographers, directors, producers, and candidates for graduate school in education, dance, or sciences.

Degree Offered

Dance Science Program Requirements

General Remarks

For all courses offered through the Department of Performing Arts (course prefix DAN), students must earn a minimum grade of "C" in those courses required in the major area in order to make satisfactory progress. If a grade of "C-" or lower is earned, the student must repeat the course.

(76 major credits and 44 General Education and Free Elective credits)

Courses and Descriptions

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three- hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 115.

BIO 221 Human Anatomy & Physiology I 4 Credits
A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training. Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor.
Corequisite(s): BIO 221L.

BIO 221L Human Anatomy & Physiology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 221.

BIO 222 Human Anatomy & Physiology II 4 Credits
A comprehensive survey of the organ systems of the body including special senses, cardiovascular, respiratory, digestive, excretory, reproduction and development. Physiological components include electrolytes, metabolism, nutrition, and the mechanisms of homeostasis and cell reception. Lab studies support lecture material through dissections, wet labs, computer-assisted learning, microscopy, and models. Assessment includes lab practicums, exams, and reports. Course emphasis supports allied health and pre-professional training. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): BIO 221.
Corequisite(s): BIO 222L.

BIO 222L Human Anatomy & Phys II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 221L.
Corequisite(s): BIO 222.

DAN 100 Contemporary Dance Forms 1 Credits
Designed to offer students training in a range of dance genres such as Hip Hop, West African, Latin, Commercial, Lyrical, Tap, and Jazz. Forms rotate each semester. This course may be taken more than once for credit.

DAN 105 Survey of Dance History 3 Credits
An introductory course to familiarize students with the breadth and depth of dance in human society. It will chronologically examine dance through four lenses: Dance and Community, Dance and Religion, Dance and Politics, and Dance as Art. Students will be exposed to various dance forms from around the world with varying purposes, functions, and motivations from the beginning of recorded history to present.

DAN 111 Dance Lab 0 Credits

DAN 112 Ballet I 1 Credits
This course provides a foundational study of ballet for dancers within a university setting. Classes concentrate on foundational concepts within ballet technique and theory. Work focuses on alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration and coordination; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; and self-motivation discipline. Over the term students become familiar with terminology and positions of the body, and gain broad knowledge of the protocols and traditions of ballet class.

DAN 113 Ballet II 1 Credits
This is a continuation of the fundamental practices covered in Ballet I, including proper use of alignment, feet, rotation, and use of the core in the classical vocabulary. In addition this course extends the coverage of discourse, terminology and vocabulary of the classical technique. Course pre-req(s): DAN 112 with a C+ or better.

DAN 121 Introduction to Dance Science 3 Credits
This orientation to dance science will consider important aspects of the study of human performance including anatomy, biology, kinesiology, and psychology of movement and performance. Covered are the foundations and research findings in Movement Theory, Motor Development, and Well -Being. Topics include the Care and Prevention of Injuries, Movement Analysis, Dance Movement Therapy, Mind-body Connection, Dance Fitness and Optimal Performance.

DAN 151 Modern Dance I 1 Credits
Modern Dance I is a foundation level technique class that aims to inform students' dance skills through studying the concepts and techniques of modern dance by expanding knowledge and expressive range to increase potential as a dancer and artist. The course will progress throughout the semester and is based on the foundational exercises. Variation on the exercises will be practiced as the class progresses. The sequence of movements - floor work, standing center work, and traveling across the floor - is usually taught in order. The contraction and release principle is used throughout the classwork.

DAN 152 Modern Dance II 1 Credits
Modern Dance II is a continuation of Modern Dance I and is a foundation level technique class that aims to inform students' dance skills through studying the concepts and techniques of modern dance by expanding knowledge and expressive range to increase potential as a dancer and artist. The course will progress throughout the semester and is based on the foundational exercises. Variation on the exercises will be practiced as the class progresses. The sequence of movements - floor work, standing center work, and traveling across the floor - is usually taught in order. The contraction and release principle is used throughout the classwork. Permission of Instructor or prescreen placement is required.

DAN 201 Ballet III 1 Credits
This course provides a foundational study of ballet for dancers within a university setting. Classes concentrate on foundational concepts within ballet technique and theory. Work focuses on alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration and coordination; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; and self-motivation discipline. Over the term students become familiar with terminology and positions of the body, and gain broad knowledge of the protocols and traditions of ballet class. Permission of Instructor or prescreen placement is required.

DAN 202 Ballet IV 1 Credits
This course is a continuation of DAN 201. The course provides further skills in basic classical ballet vocabulary and preparation for professional study at the intermediate level. Permission of Instructor or prescreen placement is required.

DAN 210 Rider Dances: Repertory & Productions 1 Credits
This course provides an in-depth experience with the art of dance production from creation to performance. Students will be chosen to learn and perform repertory; fulfill technical roles such as sound, lighting and costume design; and assume production and managerial responsibilities such as promotion, publicity, front of house management and stage management.
Prerequisite(s): permission of instructor.

DAN 210T Rider Dances Rep&Produc:Tech 1 Credits

DAN 220 Dance Composition 3 Credits
This course prepares the dance student for the creation of dance through critical analysis, reading, writing and practical assignments. Students will examine the creative process as applied to dance artists and various forms and genres of dance. Weekly choreographic studies that deal with space, time, energy, gesture, and form are assigned.
Prerequisite(s): DAN 215 with a C+ or better.

DAN 300 Lecture & Studio in Dance 2 Credits
Dance 300 series is also designed to offer students concurrent participation and theoretical inquiry in specific dance forms. Students must register for four classes per week at the Princeton Ballet School. One additional hour is comprised of video observation, lecture, or readings and is held at Rider's Lawrenceville campus. Prerequisite(s): permission of instructor; Dance Studio Courses Ballet I.

DAN 310 Music for Dance 3 Credits
This course teaches dancers to consider Western and non-Western music, building the necessary vocabulary to analyze, develop, and communicate musical ideas. We will explore the basic elements of music through the study of rhythmic structures, an introduction to fundamental music theory, critical analysis of compositions and choreography of various genres, and experiential activities that combine music and movement. This course explores temporal and rhythmic organizations of movement and dance analyzed for the purpose of enhancing clarity in performance, choreography, and teaching. Elementary musical notation, scoring, and accompaniment skills are developed.

DAN 350 History of Ballet, Modern & Jazz Dance 3 Credits
Studies the major periods in the development of Western Theatrical Dance from the Renaissance to the present focusing on ballet, modern, jazz, tap and musical theater dance. The course will examine the ideas and individuals that caused the development of choreographers, producers, designers and productions.

DAN 450 Pedagogy and Methodology in Dance 3 Credits
This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. Cross-listing existing entry-level teaching course with analogous graduate-level course (CURR 711).

DAN 460 Movement Theory and Somatic Practice 3 Credits
Somatic Dance Explorations investigates basic kinesiological principles that have informed a range of somatic practices such as Feldenkrais, Bartenieff Fundamentals, Alexander Technique, and yoga. These practices have become widely incorporated into the contemporary dance field as a means of developing greater movement efficiency, enhancing mindfulness, and preventing injuries. In this course, students will gain an understanding of dance performance as it relates to functional anatomy. Building knowledge of the body's structures and regions, particularly the musculoskeletal system, the course will incorporate imagery and kinesthetic exercises to expand the students' technical proficiency and expressivity.
Prerequisite(s): C+ or better in DAN 450.

DAN 490 Independent Research and Study 1-4 Credits
Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credit hours. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.
Prerequisite(s): junior or senior standing, good academic standing.

DAN 491 Internship in Dance 1-4 Credits
Provides junior or senior dance majors with the practical experience of working within an educational or professional dance environment. Students must be sponsored by a dance professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.
Prerequisite(s): permission of instructor.

DAN 498 Senior Capstone 3 Credits

EXS 320 Exercise Physiology 3 Credits
An entry level exploration of the physiological processes, metabolic requirements, and consequences of exercise in humans. Emphasis is placed on bioenergetics, as well as circulatory, respiratory, and neuromuscular responses to the physical stress of exercise performed for health and disease prevention.
Prerequisite(s): BIO 221, BIO 222.

EXS 321 Exercise Physiology Laboratory 1 Credits
EXS 321 is the laboratory course that accompanies EXS 320. Topics will include entry-level practical skills and competencies related to exercise capacity evaluation, interpretation of exercise data, and application of exercise interventions in a clinical setting. Prerequisite(s): BIO 221, 222 Co-requisite(s): EXS 320.

EXS 360 Foundations of Strength and Conditioning 3 Credits
This course examines the advanced methods and techniques associated with the design of strength and conditioning programs to enhance human performance in sport and fitness. This course is designed to develop, enhance, and apply knowledge and skills to prepare the student for the profession of strength and conditioning. Prerequisite(s): EXS 320, EXS 321, and HSC 302.
Corequisite(s): EXS 360L.

EXS 361 Foundations of Strength and Conditioning Lab 1 Credits
This course examines the advanced methods and techniques associated with the design of strength and conditioning programs to enhance human performance in sport and fitness. Prerequisite(s): EXS 320, EXS 321, and HSC 302.
Corequisite(s): EXS 360.

HSC 110 Introduction to Human Nutrition 3 Credits
This course is designed to offer the student an understanding of fundamental human nutrition concepts including, but not limited to, digestion, absorption, metabolism, functions, and sources of macronutrients and micronutrients. The theme of the course will align with human health and disease states and the important conceptions about the food industry and its relation to healthy dietetic choices.

HSC 210 Nutrition for Exercise and Physical Activity 3 Credits
An introductory exploration of evidence based nutritional theory and applications in sport and exercise.
Prerequisite(s): HSC 100 with a minimum grade of D or BCH 225 with a minimum grade of D.

HSC 302 Kinesiology 3 Credits
The purpose of this course is to explore human movement during performance of activities. This course will explore the relationship between anatomical structures and function in the production of movement. The application and relationships between the fundamental principles of mechanics and musculoskeletal system function will be addressed within the framework of clinical and research perspectives. Both qualitative and quantitative approaches will be applied towards a better understanding of human movement, the analysis of physical activity. Prerequisite(s): BIO 221 & MTH 105 (or equivalent) or POI.
Corequisite: HSC 303.

HSC 303 Kinesiology Lab 1 Credits
This lab is a co-requisite and must be taken with HSC 302.
Corequisites: HSC 302.

MTH 105 Algebra and Trigonometry 4 Credits
The course is an in depth and rigorous study of functions and graphs, equations and inequalities, polynomial and rational functions, exponential, and logarithmic functions, basic trigonometric functions and their inverses, trigonometric identities.
Prerequisite(s): A mathematics SAT score of 570, departmental placement or MTH 100 with a grade of C or higher.

PHL 303 Philosophy of Law 3 Credits
An examination and analysis of selected topics including classical and contemporary theories in the philosophy of law and moral philosophy. Such topics as the nature of the law and legal reasoning, the legal enforcement of morality, protection of personal liberty, and the moral justification of punishment are considered. Such philosophers as Aquinas, Austin, Holmes, Bentham, Hart, and Dworkin are read and discussed.

PSY 100 Introduction to Psychology 3 Credits
This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 283 Sport Psychology 3 Credits
This survey course will focus on the social and psychological factors related to performance and participation in sport and exercise, health, and injury rehabilitation settings. Two general questions will be explored: (a) how do social and psychological variables influence performance and participation in physical activity pursuits? And (b) how does physical activity participation affect the psychological well-being of the individual? To better understand these questions, this course will overview theoretical and methodological approaches to a variety of sport and exercise psychology topics, including: socialization, motivation, group processes, competition, and performance enhancement. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 345 Health Psychology 3 Credits
This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health-enhancing behaviors such as exercise and nutrition, as well as health-compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

SOC 101 Sociological Imagination 3 Credits
Introduction to principles and concepts for the sociological analysis of human societies. Social relations, social structure, and institutions characteristic of societies past and present are examined, and causes and directions of social change are considered. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Elementary Education

Program Overview

The elementary education program at Rider's College of Education and Human Services prepares students for fulfilling teaching careers in America's diverse society. The College of Education and Human Services is accredited by the Council for the Accreditation of Education Preparation (CAEP), the highest accreditation possible in teacher education and we offer graduates added value and recognition nationwide when seeking employment or admission to graduate study.

Curriculum Overview

As they begin their path to becoming effective and skilled elementary school teachers, students in Rider's elementary education program engage in studies that provide an academic background for those subjects they will be teaching. Elementary Education majors have three pathways to choose from. They may select a second major in the College of Arts & Sciences or complete one of two stand-alone majors in the College of Education: Elementary Education: Multidisciplinary Studies (p. 197) or Elementary Education: STEM Studies (p. 203).

The fulfillment of the requirements of the second major in liberal arts or of the standalone education majors, together with general studies

courses, provides a substantial liberal studies background as well as a foundation for professional development.

In addition, elementary education majors can elect to pursue the following minors, early childhood; middle school; English as a second language; bilingual education; and special education. Please see the Minor Requirements tab on this page for further information on these programs.

Related Programs

- Secondary Education (p. 55)

Elementary education majors may select one of three main paths. They may select a second major in the College of Arts & Sciences or complete one of two stand-alone majors in the College of Education: Elementary Education: Multidisciplinary Studies (p. 197) or Elementary Education: STEM Studies (p. 203). Students opting to complete a second major in the College of Arts & Sciences may complete any second major in the School of Humanities and Social Sciences or the School of Science, Technology, and Mathematics or a second major in dance studies, music production, or theater in the School of Communication, Media & Performing Arts. Students interested in special education might consider the dual major in Elementary Education and Psychology with Special Education, although the special education minor can be added to any of the elementary education major options described above.

The fulfillment of these second major or concentration requirements together with the general studies courses provides a substantial liberal studies background as well as a foundation for professional development. In addition to completing these requirements, all Rider University students are required to complete the Engaged Learning (https://www.rider.edu/academics/engaged-learning/about/) requirements.

Please see the second major selections below. (p. 155)

Elementary Education General Studies and Academic Major Requirements

(84 credits minimum)

Code	Title	Credits
CMP 120	Seminar in Writing and Rhetoric	3
or BHP 100	Honors Seminar: Great Ideas I	
CMP 125	Seminar in Writing and Research	3
or BHP 150	Honors Seminar: Great Ideas II	
MTH 150	Mathematics for Education Majors I	3
COM 104	Speech Communication	3
PSY 100	Introduction to Psychology	3
EDU 101	First Year and Transfer Education Seminar	1
Fine Arts elective		3
Foreign Language elective [1]		3
History elective		3
Literature elective		3
Science elective (without lab)		3
Science Elective (with lab)		4
Social Science Elective (may be used toward a minor, including PSY 230, PSY 212, PSY 237, PSY 330, MCS 110)		3
Technology Elective (SPED minors take TEC 404)		3
EDU 106	Contexts Of Schooling	3
EDU 206	Developmental Education Psychology	3
General Studies Electives (number varies according to second major; may be used towards a minor)		0-5
Requirements of a selected academic major (number of credits varies according to major) *Some high credit second majors are not included in the credit range above		32-54*

Professional Education

(36 credits)

Code	Title	Credits
Methodology, curriculum and instruction courses, with associated field experiences: [2]		
ELD 307	Foundations of Early Literacy, K-3	3
ELD 308	Fostering Literacy and Language Development Across Disciplines	3
EDU 358	Literacy and the Bilingual/Bicultural Child	3
Additional math pedagogy course to be approved in fall '24		3
ELD 375	Methods of Teaching Mathematics in Elementary Classrooms	3
ELD 376	Teaching Science, Social Studies and the Arts N-6	3
SST 300	Historical & Contemporary Issues in the Social Studies	3
SPE 300	Inclusive Practices for General Education Teachers	3
Capstone professional semester of full-time student teaching:		
EDU 465	Student Teaching and Seminar [3]	12
Total Credits		**36**

[1] For proper course placement please visit this website. (https://www.rider.edu/about/offices-services/transition-programs/new-student-orientation/placement-testing/)

[2] ALL students must show evidence of having taken and passed all sections of the Praxis Core Academic Skills For Educators Test prior to being able to register for ALL field-based Education Methods Courses.

[3] Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465. In addition, students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects prior to registering for ELD 308 and ELD 376 and before applying for student teaching.

Note: Students may be required to fulfill entrance requirements for certain second majors.

Second Major Selections

College of Education and Human Services

- Multidisciplinary Studies
- STEM Studies

College of Arts and Sciences

- Behavioral Neuroscience
- Biochemistry
- Biology
- Chemistry
- Communication Studies
- Criminal Justice
- Dance Studies
- Earth Sciences
- English Literature
- English Writing
- Environmental Sciences
- Environmental Studies
- Film and Television
- Graphic Design
- Health Sciences
- History
- Journalism
- Mathematics
- Music Production
- Political Science
- Psychology
- Public Relations
- Radio and Podcasting
- Sociology
- Spanish
- Theatre: Theatre-Making Concentration

Elementary Education Minor Requirements

Undergraduate elementary education majors can elect to pursue the following minors, certifications and endorsements:

- Early Childhood / Elementary Dual Licensure Progra (p. 155)m
- Elementary Education and Interdisciplinary Minor in Special Education with a Second Major in a Content Area (p. 155)
- Elementary Education and Interdisciplinary Minor in Special Education with a Second Major in Psychology (p. 156)
- Bilingual Education (p. 156)
- English as a Second Language (p. 156)
- Middle School Education (p. 157)
  - (p. 157)Middle School with a Subject Matter Specialization in Chinese (p. 157)
  - Middle School with a Subject Matter Specialization in French (p. 157)
  - Middle School with a Subject Matter Specialization in Spanish (p. 157)
- Certificate in Technology (p. 158)

Early Childhood/Elementary Dual Licensure Program

The early childhood/elementary dual licensure program leads to two teaching certificates: preschool through third grade (P–3) and elementary (kindergarten through sixth grade). In addition to the professional education courses required of elementary education students, students in this dual licensure program are required to take the following 12-credit sequence of courses:

Code	Title	Credits
PSY 230	Child Development	3
ECE 200	Infant and Toddler Care and Education	3
ECE 332	Families, Community, and Diversity in Early Childhood Education	3
ECE 450	Developmental Methods and Assessment in Early Childhood Education	3

This program is available to any student who maintains a 2.75 GPA and meets all other requirements for admission and retention in the elementary education program.

Note: Students seeking early childhood certification are required to also take and pass the Early Childhood Praxis test (5025) prior to student teaching.

For information regarding this program please contact:

sdougherty@rider.edu

Elementary Education and Interdisciplinary Minor in Special Education with a Second Major in a Content Area

The elementary education interdisciplinary minor in special education is designed for students majoring in elementary education and a content area (other than psychology) who wish to effectively work with students with disabilities, particularly in inclusive settings. This program includes the courses required by the New Jersey Department of Education for a Teacher of Students with Disabilities licensure endorsement.

The 21-credit sequence of courses is to be taken in addition to the requirements of both the elementary education and content area majors. The required courses may be included as general studies electives where appropriate. Students enrolled in the interdisciplinary minor in special education are required to maintain a GPA of 2.75. The following courses are required for this program:

Code	Title	Credits
SPE 201	Foundations in Special Education and Inclusive Practice	3
SPE 202	Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities	3
SPE 303	Assessment and Instruction for Students with Disabilities	3
SPE 304	Assessment and Instruction in the Inclusive Classroom	3
PSY 212	Introduction to Applied Behavior Analysis	3
PSY 237	Cognitive Disabilities	3
TEC 404	Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities	3
Total Credits		**21**

For information regarding this program please contact:

Diane Casale-Giannola, Ed.D.
Professor
Bierenbaum Fisher Hall 102E
609-896-5078
dgiannola@rider.edu

Elementary Education and Interdisciplinary Minor in Special Education with a Second Major in Psychology

This interdisciplinary minor in special education is designed for undergraduate students who are enrolled in elementary education with a second major in psychology. In addition to the courses required for the elementary education major, students enrolled in the minor program are required to take a specific sequence of courses within the psychology major. The following 15-credit sequence of courses is designed to teach concepts and applications in special education:

Code	Title	Credits
SPE 201	Foundations in Special Education and Inclusive Practice	3
SPE 202	Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities	3
SPE 303	Assessment and Instruction for Students with Disabilities	3
SPE 304	Assessment and Instruction in the Inclusive Classroom	3
TEC 404	Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities	3
Total Credits		**15**

Students enrolled in the interdisciplinary minor in special education are required to maintain a GPA of 2.75. The prescribed sequence of courses fulfills the requirements for a New Jersey Endorsement for Teacher of Students with Disabilities. Graduates of this dual licensure program also receive certification in elementary education.

For information regarding this program please contact:

Diane Casale-Giannola, Ed.D.
Professor
Bierenbaum Fisher Hall 102E
609-896-5078
dgiannola@rider.edu

Bilingual Education

Certification in bilingual education is available to elementary education majors and secondary education majors who upon completion of the program have demonstrated competence in both English and another language. Candidates for this certification will complete:

Code	Title	Credits
Multicultural Studies Elective [1]		
EDU 320	Introduction to Linguistics and Psycholinguistics	3
EDU 358	Literacy and the Bilingual/Bicultural Child	3
EDU 420	Teaching a Second Language	3
EDU 460	Educating and Evaluating the Bilingual Child	3
Total Credits		**12**

Language proficiency evaluations such as the Oral Proficiency Interview (OPI) and Written Proficiency Test (WPT) are required.

[1] Possible multicultural electives: SPA 102, SPA 311, SPA 325; MCS 110, MCS 220, MCS 280; AMS 210, AMS 212; COM 252; HIS 307; POL 235; SOC 207.

Language proficiency evaluations such as the Oral Proficiency Interview (OPI) and Written Proficiency Test (WPT) are required.

For information regarding this program please contact:

Maria Villalobos-Buehner, Ph.D.
Professor
Fine Arts 354
609-895-5596
mvillalobos@rider.edu

English as a Second Language

Certification in English as a second language (ESL) is available to elementary and secondary education majors. It may be achieved by an additional 3-6 credits by majors in English or a foreign language (French, German or Spanish). All candidates for this certification will complete:

(15 credits)

Code	Title	Credits
EDU 320	Introduction to Linguistics and Psycholinguistics	3
Multicultural Studies elective [1]		3
EDU 358	Literacy and the Bilingual/Bicultural Child	3
EDU 420	Teaching a Second Language	3

EDU 460	Educating and Evaluating the Bilingual Child	3
Total Credits		**15**

[1] Possible multicultural electives:SPA 102, SPA 311, SPA 325, MCS 110, MCS 220, MCS 280, AMS 210, AMS 212, COM 252, HIS 307, POL 235,SOC 207.

For information regarding this program please contact:

Maria Villalobos-Buehner, Ph.D.
Professor
Fine Arts 354
609-895-5596
mvillalobos@rider.edu

Middle School Education

The minor in middle school education leads to an endorsement in middle school teaching of either English, mathematics, social studies, science, Chinese, French or Spanish. In order to qualify for the middle school endorsement, students must major in elementary education, minor in middle school education, take the required five credits in middle school education listed below, take a minimum of 15 credits in one of the above disciplines, and must also take the Middle School Praxis test for their content area.

In addition to the professional education courses required of elementary education students, students in this program are required to take:

Code	Title	Credits
ELD 350	Early Adolescence	1
ELD 360	Structure and Culture of Middle School Classroom	1
Select one of the following, depending upon your discipline:		**3**
EDU 420	Teaching a Second Language (required for students completing a specialization in Chinese, French, or Spanish)	
ELD 380	Methods of Teaching Mathematics in the Middle School	
ELD 385	Teaching Science in the Middle School	
ELD 390	Teaching Social Studies in the Middle School	
ELD 395	Literacy Learning in the Middle School	
Total Credits		**5**

For information regarding this program please contact:

Susan Dougherty, Ed.D.
Associate Professor and Chairperson
Department of Teacher Education
Bierenbaum Fisher Hall 102D
609-896-5162
sdougherty@rider.edu

In addition to the Middle School Education requirements above, students who specialize in Chinese, French, or Spanish must complete the following required courses:

Middle School Minor with a Subject Matter Specialization in Chinese

(20 credits: 15 credits shown below plus 5 credits for the Middle School Education Minor)

Code	Title	Credits
Complete the following courses:		
CHI 100	Chinese I	3
CHI 101	Chinese II	3
CHI 200	Chinese III	3
CHI 201	Chinese IV	3
CHI 300	Advanced Chinese Reading and Composition	3
Total Credits		**15**

Middle School Minor with a Subject Matter Specialization in French

(20 credits: 15 credits shown below plus 5 credits for the Middle School Education Minor)

Code	Title	Credits
Complete the following courses:		
FRE 200	French III	3
FRE 201	French IV	3
FRE 300	French Composition/Translation	3
FRE 305	An Introduction to French Literature	3
FRE 320	French Phonetics and Conversation	3
Total Credits		**15**

[1] If placement is at the 300 level or above, two additional courses at the 300 level or above are needed to replace the 200 level courses.

Middle School Minor with a Subject Matter Specialization in Spanish

(20 credits: 15 credits shown below plus 5 credits for the Middle School Education Minor)

Code	Title	Credits
Complete the following courses:		
SPA 200	Spanish III	3
SPA 201	Spanish IV	3
SPA 300	Advanced Grammar & Composition	3
SPA 302	Writing and Translating	3
Select one course from the following:		**3**
SPA 320	Introduction to Spanish Literature	
SPA 325	Introduction to Latin-American/Latino Literature	
SPA 403	Medieval Literature	
SPA 410	Modern Hispanic Poetry	
SPA 411	Modern Spanish Novel	
SPA 412	Theater and Film of the Hispanic World	
SPA 413	The Hispanic Short Story: Transatlantic Connections	

SPA 415	Spanish Renaissance	
SPA 416	The Spanish Golden Age	
Total Credits		**15**

[1] If placement is at the 300 level or above, two additional courses at the 300 level or above are needed to replace the 200 level courses.

For information regarding the Chinese, French or Spanish specializations please contact:

Maria Villalobos-Buehner, Ph.D.
Professor
Fine Arts 354
609-895-5596
mvillalobos@rider.edu

Certificate in Technology

Students enrolled in education who successfully complete nine credits in technology-based courses are eligible for a Rider University Certificate in Technology indicating proficiency in instructional technology. Transfer students may transfer in a maximum of three credits for an appropriate technology course. The certificate is issued by the Department of Teacher Education and is obtained from the chair of the department.

For information regarding this certificate please contact:

Susan Dougherty, Ed.D.
Associate Professor and Chairperson
Department of Teacher Education
Bierenbaum Fisher Hall 102D
609-896-5162
sdougherty@rider.edu

Academic Plans of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

- Elementary Education / Behavioral Neuroscience (p. 158)
- Elementary Education / Biochemistry (p. 159)
- Elementary Education / Biology (p. 160)
- Elementary Education / Chemistry (p. 161)
- Elementary Education / Communication Studies (p. 162)
- Elementary Education / Criminal Justice (p. 163)
- Elementary Education / Dance (p. 164) Studies (p. 164)
- Elementary Education / Earth Sciences (p. 166)
- Elementary Education / English Literature (p. 167)
- Elementary Education / English Writing (p. 168)
- Elementary Education / Environmental Sciences (p. 169)
- Elementary Education / Environmental Studies (p. 170)
- Elementary Education / Film and Television (p. 165)
- Elementary Education / Graphic Design (p.)
- Elementary Education / Health Sciences (p. 172)
- Elementary Education / History (p. 173)
- Elementary Education / Journalism (p. 174)
- Elementary Education / Mathematics (p. 175)
- Elementary Education / Music Production (p. 177)
- Elementary Education / Political Scienc (p. 176)e (p. 176)
- Elementary Education / Psychology (p. 178)
- Elementary Education / Public Relation (p.)s (p.)
- Elementary Education / Radio and Podcasting (p. 180)
- Elementary Education / Sociology (p. 181)
- Elementary Education / Spanish (p. 182)
- Elementary Education / Theatre: Theatre Making Concentration (p. 183)

Academic Plan for Elementary Education / Behavioral Neuroscience

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
CMP 120	Seminar in Writing and Rhetoric	3
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab	4
CHE 120	Principles of Chemistry	3
CHE 121	Principles of Chemistry Lab	1
MTH 105	Algebra and Trigonometry [1]	4
EDU 101	First Year and Transfer Education Seminar	1
	Semester Credit Hours	**16**
Spring Semester		
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	4
CHE 122	Intro to Chemical Systems	3
CHE 123	Quantitative Methods Lab	1
CMP 125	Seminar in Writing and Research	3
COM 104	Speech Communication	3
Technology Elective		2
	Semester Credit Hours	**16**
Year 2		
Fall Semester		
BNS 250 & 250L or ENV 200 or MTH 120	Biostatistics or Statistical and Computer Applications in the Natural Sciences or Introduction to Applied Statistics	3-4
BNS 275 & 275L	Behavioral Neuroscience and Behavioral Neuroscience Lab	4

PSY 100	Introduction to Psychology	3
History Elective		3
Foreign Language Elective [1]		3
	Semester Credit Hours	**16-17**
Spring Semester		
BCH 225 & 225L	Introduction to Organic and Biochemistry and Introduction to Organic & Biochemistry Lab	4
BNS 310 & 310L	Neurobiology and Neurobiology Lab	4
EDU 106	Contexts Of Schooling [2]	3
EDU 206	Developmental Education Psychology [2]	3
Literature Elective		3
	Semester Credit Hours	**17**
Year 3		
Fall Semester		
EDU 358	Literacy and the Bilingual/Bicultural Child	3
SPE 300	Inclusive Practices for General Education Teachers	3
Two Upper-level Neuroscience:		8
BNS 360 & 360L	Neurochemistry and Neurochemistry Lab	
BNS 375 & 375L	Neuroethology: Circuits of Behavior and Neuroethology Lab	
Fine Arts Elective		3
	Semester Credit Hours	**17**
Spring Semester		
Select two Biology/Psychology electives:		8
BIO 260 or higher with a lab		
Psy 200 or higher		
ELD 307	Foundations of Early Literacy, K-3 [3]	3
ELD 375	Methods of Teaching Mathematics in Elementary Classrooms [3]	3
SST 300	Historical & Contemporary Issues in the Social Studies	3
Technology Elective		1
	Semester Credit Hours	**18**
Year 4		
Fall Semester		
One Upper-Level Neuroscience		4
BNS 360 & 360L	Neurochemistry and Neurochemistry Lab	
or		
BNS 375 & 375L	Neuroethology: Circuits of Behavior and Neuroethology Lab	
BNS 415	Seminar in Behavioral Neuroscience	3
ELD 308	Fostering Literacy and Language Development Across Disciplines [4]	3
ELD 376	Teaching Science, Social Studies and the Arts N-6 [4]	3
	Semester Credit Hours	**13**
Spring Semester		
EDU 465	Student Teaching and Seminar [5]	12
	Semester Credit Hours	**12**
	Total Credit Hours for Graduation	**125-126**

1. For proper course placement please visit this website (https://www.rider.edu/about/offices-services/transition-programs/new-student-orientation/placement-testing/).
2. EDU 106 and EDU 206 must be taken concurrently in either the fall or spring of the second year.
3. ELD 307 and ELD 375 must be taken concurrently. Students must pass all sections of the Core Academic Skills for Educators Test (Test Code 5752) in order to register for these courses.
4. ELD 308 and ELD 376 must be taken concurrently in the semester preceding student teaching. Students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for these courses.
5. Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465. In addition, students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for ELD 308 and ELD 376 and before applying for student teaching.

Academic Plan for Elementary Education / Biochemistry

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1

2 Please see requirements for Criminal Justice Major (p. 129).

3 EDU 106 and EDU 206 must be taken concurrently in either the fall or spring of the second year.

4 ELD 307 and ELD 375 must be taken concurrently. Students must pass all sections of the Core Academic Skills for Educations Test (Test Code 5752) in order to register for these courses.

5 ELD 308 and ELD 376 must be taken concurrently in the semester preceding student teaching. Students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for these courses.

6 Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465 (http://catalog.rider.edu/search/?P=EDU%20465). In addition, students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for ELD 308 and ELD 376 and before applying for student teaching.

Academic Plan for Elementary Education / Dance Studies

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
CMP 120	Seminar in Writing and Rhetoric	3
DAN 105	Survey of Dance History	3
DAN 111	Dance Lab	0
DAN 112	Ballet I	1
DAN 151	Modern Dance I	1
EDU 101	First Year and Transfer Education Seminar	1
MTH 150	Mathematics for Education Majors I	3
Foreign Language Elective [1]		3
	Semester Credit Hours	**15**
Spring Semester		
CMP 125	Seminar in Writing and Research	3
COM 104	Speech Communication	3
DAN 111	Dance Lab	0
DAN 113	Ballet II	1
DAN 152	Modern Dance II	1
DAN 350	History of Ballet, Modern & Jazz Dance	3

PSY 100	Introduction to Psychology	3
Technology Elective		3
	Semester Credit Hours	**17**
Year 2		
Fall Semester		
DAN 100	Contemporary Dance Forms	1
DAN 111	Dance Lab	0
DAN 201	Ballet III	1
EDU 106	Contexts Of Schooling [2]	3
EDU 206	Developmental Education Psychology [2]	3
Arts History Elective		3
Science Elective with a lab (bio/phy)		4
	Semester Credit Hours	**15**
Spring Semester		
DAN 100	Contemporary Dance Forms	1
DAN 111	Dance Lab	0
DAN 202	Ballet IV	1
DAN 310	Music for Dance	3
General Studies Electives		6
Science Elective (bio/phy)		3
Social Science Elective		3
	Semester Credit Hours	**17**
Year 3		
Fall Semester		
DAN 300	Lecture & Studio in Dance	2
EDU 358	Literacy and the Bilingual/Bicultural Child	3
ELD 307	Foundations of Early Literacy, K-3 [3]	3
ELD 375	Methods of Teaching Mathematics in Elementary Classrooms [3]	3
SPE 300	Inclusive Practices for General Education Teachers	3
Arts History Elective		3
	Semester Credit Hours	**17**
Spring Semester		
DAN 300	Lecture & Studio in Dance	2
DAN 450	Pedagogy and Methodology in Dance	3
SST 300	Historical & Contemporary Issues in the Social Studies	3
Arts History Elective		3
General Studies Electives		3
History Elective		3
	Semester Credit Hours	**17**
Year 4		
Fall Semester		
DAN 300	Lecture & Studio in Dance	2
ELD 308	Fostering Literacy and Language Development Across Disciplines [4]	3
ELD 376	Teaching Science, Social Studies and the Arts N-6 [4]	3
General Studies Elective		6
Literature Elective		3
	Semester Credit Hours	**17**
Spring Semester		
EDU 465	Student Teaching and Seminar [5]	12
	Semester Credit Hours	**12**
	Total Credit Hours for Graduation	**127**

1. For proper course placement please visit this website (https://www.rider.edu/about/offices-services/transition-programs/new-student-orientation/placement-testing/).
2. EDU 106 and EDU 206 must be taken concurrently in either the fall or spring semester of the second year.
3. ELD 307 and ELD 375 must be taken concurrently. Students must pass all sections of the Core Academic Skills for Educators Test (Test Code 5752) in order to register for these courses.
4. ELD 308 and ELD 376 must be taken concurrently in the semester preceding student teaching. Students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for these courses.
5. Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465 (http://catalog.rider.edu/search/?P=EDU%20465). In addition, students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for ELD 308 and ELD 376 and before applying for student teaching.

Academic Plan for Elementary Education / Film and Television

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
CMP 120	Seminar in Writing and Rhetoric	3
EDU 101	First Year and Transfer Education Seminar	1
FTV 135	Filmmaking I	3
MTH 150	Mathematics for Education Majors I	3
Foreign Language Elective [1]		3
History Elective		3
	Semester Credit Hours	**16**
Spring Semester		
CMP 125	Seminar in Writing and Research	3
COM 104	Speech Communication	3
FTV 230	Foundations of Film, Television and Radio	3

EDU 358	Literacy and the Bilingual/Bicultural Child	3
Select one of the following:		3-4
ENV 320 & 320L	Global Biogeochemistry and Global Biogeochemistry Lab	
ENV 340	Field Methods and Data Analysis	
GEO 350 & 350L	Soil and Surficial Processes and Soil and Surficial Processes Lab	
GEO 407 & 407L	Hydrology and Water Resources and Hydrology and Water Resources Lab	
SPE 300	Inclusive Practices for General Education Teachers	3
One Policy and Humanities Elective [3]		3
Technology Elective		3
	Semester Credit Hours	**15-16**
Year 4		
Fall Semester		
BIO 350 & 350L	General Ecology and General Ecology Lab	4
EDU 358	Literacy and the Bilingual/Bicultural Child	3
ELD 308	Fostering Literacy and Language Development Across Disciplines [5]	3
ELD 376	Teaching Science, Social Studies and the Arts N-6 [5]	3
One Policy and Humanities Course [3]		3
Two Policy and Humanities Electives (not already taken) [6]		6
	Semester Credit Hours	**22**
Spring Semester		
EDU 465	Student Teaching and Seminar [7]	12
	Semester Credit Hours	**12**
	Total Credit Hours for Graduation	**136-137**

1. For proper course placement please visit this website (https://www.rider.edu/about/offices-services/first-year-programs/new-student-orientation/placement-testing/).
2. EDU 106 and EDU 206 must be taken concurrently in either the fall or spring semester of the second year.
3. Policy and Humanities Electives - HIS 224, PHL 215, POL 328, POL 329.
4. ELD 307 and ELD 308 must be taken concurrently. Students must pass all sections of the Praxis Core Academic Skills for Educators Test (Test Code 5752) in order to register for these courses.
5. ELD 308 and ELD 376 must be taken concurrently in the semester preceding student teaching. Students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for these courses.
6. Policy and Humanities Electives (select two not already chosen) - AMS 304, BHP 259, PHL 215, HIS 224, IND 316, POL 215, POL 328, POL 329, POL 330, SOC 225.
7. Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465. In addition, students must present evidence of a passing score on the Praxis Subject Assessments: Elementary Education Multiple Subjects test must be passed prior to registering for ELD 308 and ELD 376 and before applying for student teaching.

Academic Plan for Elementary Education / Graphic Design

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
CMP 120	Seminar in Writing and Rhetoric	3
COM 105	Communication, Culture and Media	3
EDU 101	First Year and Transfer Education Seminar	1
MTH 150	Mathematics for Education Majors I	3
Foreign Language Elective [1]		3
History Elective		3

Academic Plan for Elementary Education / Health Sciences

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
CMP 120	Seminar in Writing and Rhetoric	3
MTH 105	Algebra and Trigonometry [1]	4

BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab	4
CHE 120	Principles of Chemistry	3
CHE 121	Principles of Chemistry Lab	1
EDU 101	First Year and Transfer Education Seminar	1
	Semester Credit Hours	**16**
Spring Semester		
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	4
CHE 122	Intro to Chemical Systems	3
CHE 123	Quantitative Methods Lab	1
PSY 100	Introduction to Psychology	3
CMP 125	Seminar in Writing and Research	3
Fine Arts Elective		3
	Semester Credit Hours	**17**
Year 2		
Fall Semester		
BIO 260	Principles of Biology: Evolution, Diversity, and Biology of Cells	4
BNS 250 & 250L	Biostatistics and Biostatistics Lab	4
COM 104	Speech Communication	3
Foreign Language Elective [1]		3
SOC 101	Sociological Imagination	3
	Semester Credit Hours	**17**
Spring Semester		
Category I Elective [2]		3-4
EDU 106	Contexts Of Schooling [3]	3
EDU 206	Developmental Education Psychology [3]	3
SST 300	Historical & Contemporary Issues in the Social Studies	3
History Elective		3
Math Pedagogy Course (ELD 374 will be approved in fall '24)		3
	Semester Credit Hours	**18-19**
Year 3		
Fall Semester		
BIO 221 & 221L	Human Anatomy & Physiology I and Human Anatomy & Physiology I Lab	4
ELD 307	Foundations of Early Literacy, K-3 [4]	3
ELD 375	Methods of Teaching Mathematics in Elementary Classrooms [4]	3
HTH 205	Introduction to Health Care	3
Category II Elective [5]		4
Literature Elective		3
	Semester Credit Hours	**20**
Spring Semester		
BIO 222 & 222L	Human Anatomy & Physiology II and Human Anatomy & Phys II Lab	4
EDU 358	Literacy and the Bilingual/Bicultural Child	3
HTH 215	Population Health Care Management	3
PHL 304	Medical Ethics	3
PSY 345	Health Psychology	3
SOC 346	Health Care and Society	3
	Semester Credit Hours	**19**
Year 4		
Fall Semester		
Category I Elective [2]		3-4
Category II Elective [5]		4
ELD 308	Fostering Literacy and Language Development Across Disciplines [6]	3
ELD 376	Teaching Science, Social Studies and the Arts N-6 [6]	3
SPE 300	Inclusive Practices for General Education Teachers	3
Seminar Capstone in Health Sciences		3
	Semester Credit Hours	**19-20**
Spring Semester		
EDU 465	Student Teaching and Seminar [7]	12
GLS 325	Global Perspectives on Health and Illness	3
	Semester Credit Hours	**15**
	Total Credit Hours for Graduation	**141-143**

1 For proper course placement please visit this website (https://www.rider.edu/about/offices-services/transition-programs/new-student-orientation/placement-testing/).

2 One course from Category I: BCH 225, BIO 206, CHE 211, CHE 214, PHY 100 and PHY 100L or PHY 200 and PHY 200L, PHY 101 and PHY 101L or PHY 201 and PHY 201L, PSY 220.

3 EDU 106 and EDU 206 must be taken concurrently in either the fall or spring of the second year.

4 ELD 307 and ELD 375 must be taken concurrently. Students must pass all sections of the Praxis Core Academic Skills for Educators Test (Test Code 5752) in order to register for these courses.

5 One course from Category II: BIO 265, BIO 300, BIO 305, BIO 370, BNS 310, or BNS 360.

6 ELD 308 and ELD 376 must be taken concurrently in the semester preceding student teaching. Students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for these courses.

7 Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465 (http://catalog.rider.edu/search/?P=EDU%20465). In addition, students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for ELD 308 and ELD 376 and before applying for student teaching.

4. ELD 308 and ELD 376 must be taken concurrently in the semester preceding student teaching. Students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for these courses.
5. Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465 (http://catalog.rider.edu/search/?P=EDU%20465). In addition, students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for ELD 308 and ELD 376 and before applying for student teaching.

Courses and Descriptions

ECE 200 Infant and Toddler Care and Education 3 Credits
Focuses on nutritional and psychological influences on infant and toddler growth and development, including current research in infant development; childbirth; breast feeding; infant stimulation; intellectual development; attachment behavior; and infants in group care. Recognizing that there is increased demand for infant/toddler care, it is increasingly important to assure that America's infants receive a safe, healthy, emotionally secure, and intellectually rich start in life. High quality care and education of very young children are based upon responsive and respectful relationships among all of the people in each child's life.

ECE 332 Families, Community, and Diversity in Early Childhood Education 3 Credits
This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ECE 450 Developmental Methods and Assessment in Early Childhood Education 3 Credits
The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

EDE 200 Effective Classroom Management 3 Credits
Issues of classroom management often pose the biggest challenges for novice teachers. However, with the proper training many of these obstacles can be prevented, which results in more time spent on effective instruction. This course is based on two premises: (1) that most problems of classroom order can be prevented through the use of effective, research-based classroom management strategies, positive teacher-student relationships, and engaging instruction; and (2) that the goal of classroom management is the development of an environment conducive to both academic and social emotional learning. Given these premises, the course focuses not on disciplinary interventions designed to control students, but on ways of preventing disruptive behavior, creating a peaceful, caring community, resolving conflicts, and meeting the needs of diverse students through the use of effective motivational and instructional strategies. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

EDE 225 Guided Field Experience in K-12 Classrooms 3 Credits
This is a field-based course in which students will spend an intensive three-week term in a designated school setting, mediated by University faculty. Students will participate in the daily routines of elementary, middle, or secondary schools. Field-site teachers will mentor students by articulating decisions that they make regarding classroom instruction and assessment. Students will meet regularly in seminar to analyze and discuss issues related to teaching and learning. This course will be offered J-Term, Summer I or other three week period.

EDE 226 Teaching and Managing in the Urban Classroom 3 Credits
This course focuses on teaching and managing K-12 classrooms in urban settings. Through four weeks of on-line instruction, students will learn key principles of classroom management and examine foundational issues that can underpin educational inequality, such as racial, ethnic and linguistic diversity, poverty, high student mobility and frequent teacher turnover. The course culminates with the Philadelphia Urban Seminar, a two-week residential experience (mediated by Rider University faculty) that includes ten days of intensive field experience in central Philadelphia classrooms, weekday seminars with faculty, and historical/cultural experiences and community service project activities on the weekend.

EDE 306 Thinking Critically with Data 1 Credits
This course will help students develop the kinds of data literacy skills needed for success in teaching. It will focus on five related that teachers need: (1) finding the relevant pieces of data in the data system or display available to them (data location); (2) understanding what the data signify (data comprehension); (3) figuring out what the data mean (data interpretation); (4) selecting an instructional approach that addresses the situation identified through the data (instructional decision making); (5).

EDE 307 Assessment in 21st Century Classrooms 1 Credits
This course offers an in-depth look at assessment to meet the need of 21st century teaching and learning. Students learn how to plan, develop, interpret, and manage valid assessments of student learning. Students will learn the following assessment-related skills and understandings: (1) the purpose of assessment in 21st century classrooms; (2), basics of assessments: reliability and validity; formative and summative assessment; alignment of assessments with objectives; and determining what can (what cannot) be reliably and validly assessed; (3) basics of rubric development; (4) holistic scoring; (5) assessment of critical thinking skills in diverse domains; (6) assesment of creativity in diverse domains. The course will be taught online.

EDE 375 Applications for Teaching Mathematics in Grades 4-5 1 Credits
This course will provide students the experience to share and learn about the practical applications of teaching mathematics to the 4th and 5th grade children as they are based on the field site classrooms of these grades. Students complete reflections about their work with mathematics and their observations of their cooperating teachers' lessons. The developmental aspect of math skills will be reviewed, looking at the Learning Progressions that are the basis for the new Common CORE State Standards. This course will provide an opportunity for students to have guidance in the teaching and learning of mathematics in the upper elementary grades. Upon completion of this course, students should have the knowledge, skills and confidence to meet the needs of all students, K-6. Prerequisite(s): ELD 375.
Corequisite(s): ELD 376 or ELD 308 or as prerequisite.

EDU 101 First Year and Transfer Education Seminar 1 Credits
First year/transfer seminar provides an engaging orientation to the undergraduate teacher education program at Rider University. During this course, students new to the Department of Teacher Education will explore their beliefs about teaching, learning and school. This focus will be broken into four areas of inquiry that include: (a) What knowledge is of "greatest worth" for educators? (b) What is the purpose of a policy and who gets to make the decisions? (c) What is a "safe" school? (d) What role do unions and professional communities play in the lives of educators and children?.

EDU 106 Contexts Of Schooling 3 Credits
Students in this field-based course will begin to examine aims, practices, and contemporary issues of schooling in their historical, sociological, philosophical, and futuristic contexts and from the perspectives of various multicultural constituencies-- students, parents, local community, wider economic community, government, and the profession. In doing so, they will begin to develop professional skills of observation, reflection, analysis, and argument. This course must be taken concurrently with EDU 206. A cumulative GPA of 2.75 is required.

EDU 206 Developmental Education Psychology 3 Credits
This field-based course focuses on: a) the cognitive, personality, social, creative, and moral development of children and adolescents; b) influential theories, concepts, and research findings of educational psychology; and c) the translation of psychological theory into classroom practices. This course must be taken concurrently with EDU 106. A cumulative GPA of 2.75 is required.

EDU 310 Introduction to STEM Education 3 Credits
STEM (Science, Technology, Engineering, and Math) in an educational context refers to teaching and learning that integrates science, technology, engineering, and mathematics. This course aims to provide experience with teaching approaches that promote a more holistic and interdisciplinary understanding of STEM, encouraging preservice teachers to explore real-world problems and develop critical thinking and problem-solving skills. Additionally, it aims to introduce pre-service teachers to some of the best practices of STEM teaching and provide opportunities to practice these approaches.

EDU 320 Introduction to Linguistics and Psycholinguistics 3 Credits
This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester. A cumulative GPA of 2.75 is required. NOTE: This course is cross-listed with FLE 320. Students cannot get credit for both FLE 320 and EDU 320.

EDU 358 Literacy and the Bilingual/Bicultural Child 3 Credits
Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

EDU 420 Teaching a Second Language 3 Credits
This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. A cumulative GPA of 2.75 is required.
*NOTE: This course is cross-listed as FLE 420. Students cannot get credit for both FLE 420 and EDU 420.
Prerequisite(s): EDU 106 with a minimum grade of C+ or EDU 106 with a minimum grade of TR and EDU 206 with a minimum grade of C+ or EDU 206 with a minimum grade of TR.

EDU 451 Special Topics in Education 1-6 Credits
Student teachers, graduate interns, Rider faculty, cooperating teachers, and building-level administrators will engage in collaborative study of a topic through reading, writing, discussion, observation, and reflection on their work in classrooms. Work in these seminars will help student teachers synthesize knowledge from their professional courses and all participants extend their understanding of a particular topic pertaining to teaching. Teacher research methods will be employed as participants analyze their own teaching through perspectives of the seminar topic. Topics will vary each semester. This course is dual-listed for undergraduate and graduate credit. Enrollment is limited to students concurrently enrolled in student teaching and to cooperating teachers and principals working with them.

EDU 460 Educating and Evaluating the Bilingual Child 3 Credits
An examination of the historical, legal, and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing, and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study. A cumulative GPA of 2.75 is required.

EDU 465 Student Teaching and Seminar 12 Credits
A full-time program for seniors providing practical teaching experience in an accredited elementary or secondary school. Under the direct supervision of the cooperating teacher, student teachers are responsible for the planning of lessons and for teaching in their areas of specialization and for developing a high level of teaching competency. Supervisors from Rider observe the student teachers at work, confer with the cooperating teachers and student teachers, and evaluate the growth of the student teachers throughout the internship period. Special topics are considered in seminars held in conjunction with student teaching. These topics include school health and substance abuse, school law, teacher certification and placement, classroom management, mainstreaming, professionalism, and other topics deemed appropriate by the faculty and student teachers.
Prerequisite(s): 1. Satisfactory completion of junior-level professional courses; 2. Cumulative GPA of at least 3.0 prior to commencing the semester in which student teaching is to be completed; 3. All professional education courses, with the exception of those taken concurrently with student teaching, must be completed with a grade of "C +" or better; 4. A candidate for student teaching must be approved by the education division and the coordinator of student teaching. There is an additional fee for Student Teaching.

EDU 477 International Student Teaching 3 Credits
This course provides an immersion opportunity for student teachers to learn about the different cultures and the education system of other countries while living and teaching abroad. Students will explore topics such as global awareness, international curriculum, global educational issues, and pedagogy to support diverse student needs. Through seminar discussion, research, observation, reflection and practical experience, students will develop and share their understanding of diversity in an international setting to increase global awareness, inclusive practice, and professional skills to develop a culturally responsive classroom. A fee is required for this course.
Prerequisites: 3.25 GPA, letter of recommendation, successful completion of required PRAXIS exams, interview, essay, and successful completion of local student teaching. POI required.

ELD 128 Developing Mathematical Ideas for Elementary School Teachers 1 Credits
Prospective teachers will examine the mathematics content and curriculum that is taught in grades K-6, focusing upon the multi-layered aspects of the topics that successful elementary teachers need to understand profoundly in order to provide appropriate instruction. There will be a series of topics selected from those that have historically been especially difficult for teachers to thoroughly understand at the depth needed to teach effectively. Some of the topics may vary each semester.

ELD 307 Foundations of Early Literacy, K-3 3 Credits
This course introduces students to the development of literacy in young children, beginning in kindergarten and continuing through the early elementary grades. Students will learn what research has revealed about how young children develop the insights, skills, and conceptual knowledge that enable them to successfully learn to read and write. Students will learn to support young learners and prompt the development of foundational skills in phonemic awareness, phonics, fluency, vocabulary, comprehension, and writing. In addition, the course examines the relationship between oral language and literacy and the role motivation and social contexts play in literacy learning. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 308 Fostering Literacy and Language Development Across Disciplines 3 Credits
Explores evidenced based practices for literacy instruction in grade 3-6. Students study foundational reading and writing skills alongside theories and practices of motivation and engagement to support literacy and language development and learning. Students learn assessment measures for identifying individual literacy learning needs and methods for organizing instruction that includes access to diverse texts and resources to support all learners. Threaded throughout the course is the importance of understanding and supporting the diverse linguistic, cultural and learning experiences of students and communities and the awareness of how children comprehend and construct text across multiple modalities. Disciplinary literacy strategies children access for success across content areas are studied. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206; ELD 307.

ELD 350 Early Adolescence 1 Credits
This course will focus on common dilemmas faced by young people as they move from childhood into adolescence. It will examine age-related differences between children and adolescents and consider ways to create stimulating environments that fit this developmental transition. Representations of adolescence in the media and in research will be compared, including common stereotypes.

ELD 355 Teaching in the Inclusive Middle School Classroom 1 Credits
This course will highlight the legal and ethical responsibilities of general education teachers in the middle school classroom. The special education process will be discussed and methods to address special needs in the classroom will be shared. Strategies to differentiate instruction and work collaboratively with school community members will help pre-service teachers develop and implement effective instruction that meets diverse needs in the middle school inclusive classroom.
Prerequisite(s): EDU 106 and EDU 206 and a cumulative GPA of 2.75 is required.

ELD 360 Structure and Culture of Middle School Classroom 1 Credits
This course focuses on the teaching of those concepts critical to the understanding of the structure and culture of middle school education. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 375 Methods of Teaching Mathematics in Elementary Classrooms 3 Credits
This course focuses on the teaching of mathematics that is developmentally appropriate for students from nursery to grade eight. In keeping with ACET, NAEYC, and NCTM Standards, emphasis is placed on planning for and implementing an integrated curriculum approach, discovery learning, hands-on experience, theme cycles, use of technology, and traditional and non-traditional assessment strategies. Field experiences will consist of classroom observations and teaching individuals and/or small groups of students. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206, MTH 102 or MTH 105 or MTH 150 or MTH 210.

ELD 376 Teaching Science, Social Studies and the Arts N-6 3 Credits
This course focuses on methods and materials of instruction in science, social studies, and the arts that are developmentally appropriate for students in preschool through grade six (based on NCSS, NSTA, and NAEA Standards). Emphasis is placed on an integrated approach to curriculum, with lesson and unit planning activities that incorporate hands-on-experiences, discovery learning and traditional and non-traditional assessment strategies. Field experience will consist of observation and analysis of classroom instruction and the teaching of lessons to individual and/or small groups of children. A cumulative GPA of 2.75 is required.
Prerequisite(s): ELD 307 and ELD 375.

ELD 380 Methods of Teaching Mathematics in the Middle School 3 Credits
This course focuses on the teaching of mathematics that is developmentally appropriate for students in grades six through eight. In keeping with the National Council of Teachers of Mathematics (NCTM) Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experience, use of technology, and traditional and non-traditional assessment. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 385 Teaching Science in the Middle School 3 Credits
This course focuses on the teaching of sciences that is developmentally appropriate for students in grades six through eight. In keeping with the National Science Education Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experiences, use of technology and traditional and non-traditional assessment strategies. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 390 Teaching Social Studies in the Middle School 3 Credits
This course focuses on the teaching of social studies that is developmentally appropriate for students in grades six through eight. Its focus will explore understanding of United States history, geography and civics from the perspective of the middle school. The course emphasizes the ten themes of social studies as developed by the National Council for the Social Studies. In addition to the facts, concepts and generalizations encompassed by the ten themes, the course works with academic, social, thinking and citizenship skills. The required, intensive field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 395 Literacy Learning in the Middle School 3 Credits
This course focuses on the teaching of literacy that is developmentally appropriate for students in grades six through eight. It explores processes in reading, writing, speaking, listening and viewing, relationships among the language arts and other subject areas, and the development of critical literacy and cognitive strategies. The intense field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 490 Independent Study: Research and Creative Expression 1-6 Credits
Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hour's credit to be assigned is determined by the department.

SPE 201 Foundations in Special Education and Inclusive Practice 3 Credits
This course emphasizes the foundations of special education and introduces students to inclusive practice. Philosophical, historical, and legal foundations of special education and characteristics of students with disabilities will be examined. Students will learn the components of an Individualized Education Program (IEP), how to adapt learning environments and curricular materials, as well as how to select and implement modifications for students with disabilities. Inclusive educational practices including communication, coteaching, and collaborative partnerships will be addressed through case studies and fieldwork. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours.
Prerequisite(s): A cumulative GPA of 2.75 is required.

SPE 202 Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities 3 Credits
This course is designed to examine the characteristics of individuals with Autism Spectrum Disorder (ASD) and strategies to support their academic, communication, and social/behavioral growth, including the use of assistive technology and positive behavioral supports. Methods and strategies for ASD and other low incidence disabilities will be explored. Through active participation in class and field sites, students will become aware of the various social issues related to family, education, transition, community resources and work experiences of individuals with these disabilities. Students will be required to complete a minimum of 30 weekday field hours in addition to regularly scheduled class hours.
Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 210 Global Encounters 3 Credits
This course is an international learning experience focused on exploring educational opportunities in the United States and abroad. Students will study the history, policy and practice of special education in the United States and compare it with another country and culture first hand, through lectures, school visits and reflection. Current strategies and challenges of educators and families supporting individuals with disabilities will be examined. Through this cross-cultural experience, students will broaden perspectives and develop cultural awareness, knowledge, and understanding of diversity. This course is open to all students and disciplines. There are no prerequisites.

SPE 300 Inclusive Practices for General Education Teachers 3 Credits
This course is designed to introduce preservice general education teachers students to special education and the inclusive classroom. Students will explore current issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours. Prereqisite(s): EDU 106 and EDU 206. A cumulative gpa of 2.75 is required.

SPE 303 Assessment and Instruction for Students with Disabilities 3 Credits
This course will emphasize the relationship between assessment and instructional design and implementation. Coursework includes the evaluation, selection, development, and adaptation of standardized, normreferenced, and functional assessments, such as a Functional Behavioral Assessment (FBA) and Ecological Assessment. Strategies to support literacy instruction for students with disabilities will be examined. Transition planning, program development, and agencies available to support students with disabilities and their families will be explored. This course requires a field experience in order to help students apply theory to practice.
Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 304 Assessment and Instruction in the Inclusive Classroom 3 Credits
This course will emphasize assessment, planning, and instructional design to maximize the learning of all students, including those with exceptional learning needs, in the inclusive classroom. Students will have the opportunity to explore a variety of instructional strategies to meet the needs of diverse learners. Organization of learning environments and the collaborative process, including co-teaching models, will be utilized to design a long-term unit plan. This course requires a field experience in order to help students apply theory to practice.
Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 305 Assessment and Instruction for Students with Autism Spectrum Disorders 3 Credits
Through this course, teacher candidates will learn both theories related to teaching students with Autism Spectrum Disorder (ASD) as well as best practices in the classroom related to academic instruction, as well as emotional, behavioral, and communicative interventions. This course also includes a field component, in which teacher candidates are expected to complete 10 hours of observation in a classroom with students with ASD. The course begins by examining the characteristics of the disability, causes, early warning signs, diagnostic procedures, and early intervention practices. Specific practices related to instruction and intervention as well as how to best structure a classroom for students will be examined. Teacher candidates will receive instruction in a variety of strategies and practices, even those that do not yet qualify as EBPs, as well as their theoretical underpinnings. Strategies for communicating effectively and efficiently with parents, as well as the most current and/or special issues in the field will also be discussed. Issues related to post-secondary transition will also be examined.
Prerequisites: A cumulative GPA of 2.75 and SPE 201.

SST 300 Historical & Contemporary Issues in the Social Studies 3 Credits
This course is designed to provide education and non-education majors a comprehensive introduction to, and understanding of, social studies knowledge. This knowledge covers a broad array of academic disciplines, including American/World History, Government and Politics, Geography, Economics, and the various behavioral sciences. The course is aimed at engendering a theoretical grasp of the essential elements of these disciplines, as well as a practical understanding of how the content areas exist in both human society and contemporary policies/issues.

TEC 200 Google© Educator Level One Training 3 Credits
This course will provide the skills and knowledge for pre-service teachers in undergraduate education to successfully take the Google© Educator Level One Exam.

TEC 201 Internet Ethics 1 Credits
This course focuses on using the Internet to explore and reflect on current ethical issues involving technology. These include individual privacy, legal issues such as fair use and copyright laws, and social issues such as bullying and social networking. Students will explore these topics using a variety of search engines and will reflect on the information found in terms of its impact on society as well as its appropriate uses in personal life, education and business. Pass/fail.

TEC 202 Smartboard 1 Credits
This course is designed to provide an opportunity for students to become familiar with the features and applications of Smartboard, an interactive whiteboard that can be used in classrooms and professional presentations. Students will gain experience using the touch screen and in integrating the features of the program into learning and professional materials. Pass/fail.

TEC 203 Desktop Publishing and Web Page Design 1 Credits
This course provides students with the ability to use desktop publishing software to create materials suitable for use in classrooms, professional settings, and personal use, and with the ability to design web pages. The course is appropriate for anyone who will be involved in designing classroom and student publications and for those who will use web pages in their teaching or personal lives. Discussion will be held on how to use desktop publishing and web page design in elementary and secondary school settings. A project involving application of various desktop publishing and web page design techniques will be completed and demonstrated to the class. Pass/fail.

TEC 204 Electronic Spreadsheets and Classroom Management Software 1 Credits
Basic electronic spreadsheet concepts and applications are taught using a major spreadsheet program. Topics include writing basic formulas, copying formulas, playing "What If," customizing a worksheet, and printing a spreadsheet. Discussions will be held on how to integrate spreadsheets into elementary and secondary classes and activities. Pass/fail.

TEC 206 Teaching and Presenting with Technology 1 Credits
This course covers designing, planning, and using technology enhanced instruction and presentations. Group assignments will enable students to explore uses of technology to enhance instruction and presentations. Collaboration will be encouraged when discussing the efficient and effective use of technology. Three collaborative group reports will be submitted dealing with discussion questions and chapter topics. Appropriate web sites and programs will be visited. Students will design a final original application that could be used to create motivation and visual learning in a specific classroom or other professional setting related to their major areas of study. Emphasis will be given to technology integration strategies. A final oral presentation of individual projects will be given.

TEC 207 Social Media for Education 3 Credits
Social Media for Education will introduce students to the structure and culture of social media and how social networking applies to the educational environment. This three-credit course will foster a deep understanding of how social media in education can benefit students, teachers, administrators, staff, and stakeholders.

TEC 307 Concepts Instuct Media & Tech 3 Credits
Designed to provide the student with familiarity and appreciation of the role of educational technology in the workplace as it applies to students, teachers, administrators, and trainers. The student will explore the Internet, various educational multimedia, distance learning, virtual reality environments, learning theories, and integration models. Appropriate developmental/reflective strategies will be incorporated with instruction. Although multimedia microcomputers will be utilized throughout the course, prior microcomputer knowledge and experience is not a critical element. Multimedia expertise will be developed as the course progresses.

TEC 308 Digital Tools for Teaching 3 Credits
Designed to enable the student to develop instructional presentations utilizing the advantages of multimedia technology. Each student will be required to create a multimedia portfolio that contains information presentations, cumulative records, presenter notes, work samples, photo library, video animation, and audio narration. Cooperative learning strategies will be utilized throughout the course. Developmental/ reflective strategies will include self-reflection, peer feedback, and interaction with the instructor in class and via E-mail. Expertise will be developed as the course progresses.

TEC 309 Instruct Media/Technology Management 3 Credits
Designed to develop technology management skills that can be used for individual classrooms, training centers, subject area specializations, grade levels, school laboratories, curriculum integration, administrative functions, system networks, community services, communication systems and connecting linkages between educational/work environments and home. Various management strategies will be explored and each student will have an opportunity to design, via a multimedia microcomputer, an instructional technology system of their choice along with a management plan. Cooperative learning strategies will be utilized throughout the course. Developmental/reflective strategies will include self-reflection, peer feedback, and interaction with the instructor in class and via E-mail.
Prerequisite(s): At least six semester hours of technology courses or modules.

TEC 404 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits
This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners.
Prerequisite: SPE 201 or SPE 300.

TEC 407 New Literacies for New Learning 3 Credits
As we consider the rapid expansion of information and text it is timely to take a critical view of what literacy means and how it is influencing children's literacy development and the work of educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

TEC 490 Independent Research and Study 1-6 Credits
Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hours credit to be assigned is determined by the department.

IND 210 Global Encounters 3 Credits
This course provides students with an exposure to foreign cultures consisting of both travel and study components. Destinations may include countries in Europe, Latin America, or Asia. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political, and aesthetic cultural components appropriate to the location(s) visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. A travel fee is required. No foreign language skills are required unless otherwise indicated.

Earth Sciences

Program Overview

The Bachelor of Arts Degree in Earth Sciences is designed specifically as a second major for students in the College of Education and Human Services who are interested in teaching earth science in high schools. The program is tailored to meet the earth science related objectives of high school education majors and to facilitate the timely completion of their dual requirements in the College of Education and Human Services and the College of Arts and Sciences. This program is not designed to prepare students for further study in science disciplines at the graduate or professional level. This major is designed to enable students to satisfy course and credit requirements from the New Jersey Department of Education for the High School Teacher of Earth Science Certificate. Additional details can be found at t (https://nj.gov/cgi-bin/education/license/endorsement.pl?string=999&maxhits=1000&field=2)his link at the NJ Department of Education.

Curriculum Overview

The curriculum for this major focuses on the interdisciplinary nature of the marine sciences by offering classes that give students a strong background in the earth science as well as in the sub-field of earth sciences that each student selects from the concentrations available. Students take introductory classes in chemistry, physics, biology, geology and the marine sciences, followed by more in-depth course work focused on the concentration selected.

Student Learning Outcomes

Graduates of the Earth Sciences major will be able to:

1. The student can combine relevant data with scientific principles to compose an explanation of natural phenomena in earth sciences.
2. The student can use physical, chemical, and biological characteristics to identify materials or organisms that form the foundation of their discipline.
3. The student can properly use technical equipment and associated techniques to collect, organize, and interpret field data.
4. The student can identify, find, evaluate, and use information to produce scientific reports, both written and orally, for scientific research and communication.

Honors Program in Earth Sciences

Graduation with honors in Earth Sciences is awarded in recognition of majors who have demonstrated outstanding academic ability. Enrollment in the Honors Program is by invitation of the department faculty. Eligibility requirements include a minimum GPA of 3.5 in courses required for the major and the satisfactory completion of a senior thesis or a three- or four-credit Independent Research and Study course related to their major. In addition, an honors candidate must maintain an overall minimum GPA of 3.0.

Degree Offered

- B.A. in Earth Sciences

Earth Sciences Major Requirements

Code	Title	Credits
Required Courses		
ENV 100 & 100L	Introduction to Environmental Sciences and Introduction to Environmental Sciences Lab	4
ENV 220	Weather and Climate Change	3
GEO 100	Earth Systems Science	3
or GEO 113	Environmental Geology	
GEO 102	Earth Materials and Processes Lab	1
MAR 120	Oceanography	3
MAR 121	Introductory Oceanography Lab	1
PHY 180	Astronomy	3
CHE 120	Principles of Chemistry	3
CHE 121	Principles of Chemistry Lab	1
Mathematics - Select one from the list below:		**4**
MTH 105	Algebra and Trigonometry	
MTH 106	Precalculus	
MTH 210	Calculus I	
Electives		**24-28**
Select seven of the following:		
ENV 200 & 200L	Statistical and Computer Applications in the Natural Sciences and Statistical and Computer Applications in the Natural Sciences Lab	
ENV 205	Introduction to Geographic Information Systems	
ENV 320 & 320L	Global Biogeochemistry and Global Biogeochemistry Lab	
ENV 340	Field Methods and Data Analysis	
GEO 306 & 306L	Sedimentology and Stratigraphy and Sedimentology and Stratigraphy Lab	
GEO 350 & 350L	Soil and Surficial Processes and Soil and Surficial Processes Lab	
GEO 407 & 407L	Hydrology and Water Resources and Hydrology and Water Resources Lab	
MAR 340	Marine Processes and Environments: Seminar	
MAR 401 & 401L	Marine Ecology and Marine Ecology Lab	
MAR 410	Physical Oceanography	
Total Credits		**50-54**

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
CMP 120	Seminar in Writing and Rhetoric [1]	3
MAR 120	Oceanography	3
MAR 121	Introductory Oceanography Lab	1
MTH 105	Algebra and Trigonometry [1]	4
PHY 180	Astronomy	3
	Semester Credit Hours	**14**
Spring Semester		
CMP 125	Seminar in Writing and Research	3
GEO 100	Earth Systems Science	3
GEO 102	Earth Materials and Processes Lab	1
Social Perspectives		3
Foreign Language		3
Select one of the following:		3-4
ENV 220	Weather and Climate Change [3]	
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	
	Semester Credit Hours	**16-17**
Year 2		
Fall Semester		
CHE 120 & CHE 121	Principles of Chemistry and Principles of Chemistry Lab	4
HIS 150	Pre-Modern World: Evolution to Revolution	3
Foreign Language		3
ENV 200	Statistical and Computer Applications in the Natural Sciences	4
ENV 200L	Statistical and Computer Applications in the Natural Sciences Lab	0
	Semester Credit Hours	**14**
Spring Semester		
One Major Concentration Requirement or Elective [3]		3-4
HIS 151 or HIS 152 or HIS 153	World in the Modern Era: Exploration to Globalization or Contemporary World: Historical Perspectives or Cold War: A Global History	3
Social Perspectives		3
Philosophical Perspectives		3
Aesthetic Perspectives: Literature		3
	Semester Credit Hours	**15-16**

Year 3		
Fall Semester		
ENV 340	Field Methods and Data Analysis (Or other Major Concentration Requirement or elective)	3
One Major Concentration Requirement or Elective [3]		4
3 Elective Courses [2]		9
	Semester Credit Hours	**16**
Spring Semester		
Two Major Concentration Requirements or Electives [3]		6-8
3 Elective Courses [2]		9
	Semester Credit Hours	**15-17**
Year 4		
Fall Semester		
Two Major Concentration Requirements or Elective [3]		6-8
Elective Courses [2]		9
	Semester Credit Hours	**15**
Spring Semester		
Elective Courses [2]		9
One to Two Major Concentration Requirements or Electives if needed [3]		6-8
	Semester Credit Hours	**15**
	Total Credit Hours for Graduation	**120-124**

Note: Natural and Physical Science core requirements are included in the major.

1 For course placement information see https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing (https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing/)

2 Please note that elective credits may be used to complete requirements in a second major or minor.

3 For choices see Concentrations for List of Requirements and Electives. Courses selected should be made with approval from Earth Sciences academic advisor.

4 Courses from other institutions must be reviewed and receive approval by the Department Chair.

Courses and Descriptions

ENV 100 Introduction to Environmental Sciences 4 Credits
Examines how ecosystems function, with emphasis on the interactions between biological organisms and their physical environment, and the chemical processes that govern these interactions. The impact of human populations on natural ecosystems is investigated in detail using case studies from history and current events. The laboratory provides for hands-on experiences and/or short field trips to local sites for a better understanding of many of the concepts discussed. Weekday and weekend field trips may be required. Three hours of lecture and one three-hour lab per week. CLAS general education areas addressed: DP, SP, GP.
Corequisite(s): ENV 100L.

ENV 100L Introduction to Environmental Sciences Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): ENV 100.

ENV 110 Future of Natural Resources 3 Credits
In this course, students are introduced to topics in the natural sciences through studies of human exploitation of selected natural resources (e.g. water, fisheries, mineral resources, energy, etc.). The course work includes a study of the scientific process and how it can contribute to solutions to contemporary issues. Topics covered will include factors that influence real-world decisions to manage natural resources more sustainably (e.g. political, economic, ethical factors). During the three hours of class meetings each week, lecture and exercises will be integrated. Field trips will be required. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENV 110L Future of Natural Resources Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): ENV 110.

ENV 120 Introduction to Climate Change 3 Credits
This course offers students an overview of the human impacts on Earth's climate and emerging solutions to limit future climate change. Students will learn scientific insights into the interconnected components of Earth's climate as a system including the atmosphere, oceans, land, geology, and ice. Human effects on Earth's climate system will be contrasted with natural climate variation that preceded the industrial revolution. Students will also consider the personal, societal, and ethical implications of climate change through the lens of environmental justice.

ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits
This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.
Corequisite(s): ENV 200L.

ENV 200L Statistical and Computer Applications in the Natural Sciences Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): ENV 200.

ENV 205 Introduction to Geographic Information Systems 3 Credits
This course introduces the computer-based concepts and skills of Geographic Information Systems (GIS). It covers the basic GIS concepts, such as map characteristics and projections, spatial data models and analysis, and relational databases. It explores data sources, data quality, and metadata, as well as implementation and management of specific GIS projects. Hands-on experience with ArcGIS software is provided through a series of student exercises completed throughout the semester. Students will also be taught how to process both vector and raster data using ArcGIS software. The course is relevant for students from numerous disciplines in the natural sciences, social sciences, and business, which require the analysis and graphical representation of spatial data. Three hours of lecture per week.

ENV 220 Weather and Climate Change 3 Credits
This course introduces students to the concepts of weather and climate change. These concepts frame a continuum from short-term or daily changes in the atmosphere (meteorology) to those changes averaged over much longer periods of time (climatology). Students will learn the fundamentals of weather forecasting, the causes of natural variation in the Earth's climate, and the impact of human actions on the Earth's climate. Connections will be drawn to other current issues in the Earth system, including land use change, biodiversity, and pollution. Three hours of lecture per week.
Prerequisite(s): GEO 100 or GEO 113 or permission of instructor.

ENV 290 Directed Research and Study in Environmental Sciences 1-4 Credits
Provides an opportunity for freshman and sophomore students to gain hands-on research experience in the environmental sciences. This is an individual program of study and each student will work with a selected faculty member on a topic of mutual interest. The course consists of a combination of project meetings, supervised research, and guided readings. The focus will be on formulating research questions, designing and conducting experiments, collecting the necessary data, reviewing the scientific literature as it relates to each student's research topic in weekly meetings with the instructor, and communicating the findings by writing a final project report.

ENV 320 Global Biogeochemistry 4 Credits
This course introduces students to global biogeochemical processes in the earth system and their influences on marine and terrestrial ecosystems. With a focus on systems thinking and interdisciplinary science, students will learn about the interactions of the biosphere, lithosphere, hydrosphere and atmosphere through elemental cycling and energy transfers. The course extends from the origin of our planet to the modern earth system and considers the anthropogenic impacts of climate change and pollution on humans and other species. Students will analyze scientific data with examples in regulatory and research settings. Students will also gain first-hand experience with field methods including sampling ocean and freshwater using various techniques and equipment and interpreting chemical data. Field trips may be required for this course. Course
Prerequisites: GEO 100 or GEO 113; GEO 102; CHE 120 & 121.

ENV 320L Global Biogeochemistry Lab 0 Credits
This course introduces students to global biogeochemical processes in the earth system and their influences on marine and terrestrial ecosystems. With a focus on systems thinking and interdisciplinary science, students will learn about the interactions of the biosphere, lithosphere, hydrosphere and atmosphere through elemental cycling and energy transfers. The course extends from the origin of our planet to the modern earth system and considers the anthropogenic impacts of climate change and pollution on humans and other species. Students will analyze scientific data with examples in regulatory and research settings. Students will also gain first-hand experience with field methods including sampling ocean and freshwater using various techniques and equipment and interpreting chemical data. Field trips may be required for this course. Course
Prerequisites: GEO 100 or GEO 113; GEO 102; CHE 120 & 121.

ENV 340 Field Methods and Data Analysis 3 Credits
This course will provide students with practical experience in field methods and data analyses within environmental and marine sciences. The course will apply advanced scientific methods such as field-based exercises, GIS or coding analyses, statistical analyses, and database management. Students will also complete an independent or group project focused on a relevant topic. Local field trips during lab and potentially longer trips on weekends may be required. This course earns 3 Engaged Learning points in Civic and Community Engagement (CCE.)
Prerequisite(s): D or better in (MTH 105, or MTH 106, or MTH 210) and GEO 100, GEO 102, ENV 100, and MAR 120; or Permission of Instructor.

ENV 375 Environmental Biogeochemistry 3 Credits
This course examines the biogeochemical interactions among various environmental components, including water, rock, soil, organisms, and atmosphere. Covered topics focus on the relation between the biosphere and changes in the Earth's environment and atmosphere. The transfer of energy and nutrients within terrestrial ecosystems also is explored. Case studies from various examples will be used to understand ecosystem dynamics. Long-term environmental change and present-day ecosystem restoration activities are examined in the context of biotic offsets and land-use planning. The biogeochemical cycles of some environmentally sensitive compounds and elements in natural systems, such pesticides, mercury, and lead, also may be examined. Three hours of lecture per week.
Prerequisite(s): GEO 100 or GEO 113, CHE 120, CHE 121, CHE 122, CHE 123.

ENV 480 Senior Thesis 3 Credits
A senior thesis is optional for environmental science majors. However, a senior thesis is required for eligibility to graduate with honors in environmental science. The topic for investigation will be chosen by the student in consultation with the faculty of the Department of Geological, Environmental, and Marine Sciences. The student must initiate consideration of a proposal to the Department. The proposal must contain a discussion of the proposed project and a timetable to be followed in the study. A departmental committee consisting of a major and minor advisor will evaluate the written paper submitted at the conclusion of the study. An oral presentation before the department at the conclusion of the semester in which the study is completed is required. Proposals must be submitted in final form no later than the end of the ninth week of the semester prior to the semester in which the study is undertaken.
Prerequisite(s): senior standing in the geosciences major and permission of instructor.

ENV 490 Independent Study: Research and Creative Expression 1-4 Credits
Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

ENV 491 Internship in Environmental Sciences 1-4 Credits
A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placements may be in private, public, non-profit, or governmental organizations. These can include consulting firms, regulatory agencies, advocacy groups, and educational or research institutions. Normally, 50 hours of internship per credit is required. A mutually agreed upon method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and could include a term paper or project report and a poster presentation.
Prerequisite(s): 2.5 GPA and permission of instructor.

GEO 100 Earth Systems Science 3 Credits
Investigates the major global processes that occur on Earth. These processes can be grouped into four major systems: atmosphere, hydrosphere, lithosphere, and cosmosphere. Each system interacts with and affects the other systems creating, in a sense, a single Earth process. With this approach, the student will view the Earth as a whole, and understand that the many seemingly separate components that make up this planet are, in fact, a set of interacting processes, that operate in cycles through time, within a single global system. Three hours of lecture per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 102 Earth Materials and Processes Lab 1 Credits
This lab course introduces students to the origin, identification, and significance of geologic materials, processes, and landforms. Hands-on experiences with mineral and rock specimens, topographic and geologic maps, and GPS and other data collection techniques are emphasized, along with field trip and in-lab observations, measurements, and interpretations. One three-hour lab per week.
Prerequisite(s): concurrent enrollment in, or prior completion of, GEO 100 or GEO 113 is required.

GEO 102SP Earth Materials and Processes Lab 1 Credits
This lab course introduces students to the origin, identification, and significance of geologic materials, processes, and landforms. Hands-on experiences with mineral and rock specimens, topographic and geologic maps, and GPS and other data collection techniques are emphasized, along with field trip and in-lab observations, measurements, and interpretations. One three-hour lab per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.
Prerequisite(s): concurrent enrollment in, or prior completion of, GEO 100 or GEO 113 is required.

GEO 110 Geology of National Parks 3 Credits
U.S. national parks highlight the geologic wonders of our country and provide us with some of the best examples of the many processes that initially formed our planet and those that continue to shape it. This course is an introduction to the geological setting of selected U.S. national parks. It provides an overview of geological concepts and relates the geology of each park to the processes that initially formed, and subsequently shaped, their characteristic landforms. Such processes include: plate tectonics, volcanic and plutonic activity, glaciation, cave formation, stream and coastal processes, and erosional processes. Consequently, students not only will understand how the physical geography of the U.S. varies from coast to coast, but also will connect these varied landscapes with the geologic processes that formed them and relate them to unique wildlife or vegetation in the parks studied.

GEO 113 Environmental Geology 3 Credits
Examines the fundamental premise that "society exists by geologic consent subject to change without notice" by studying a number of important global geologic processes and cycles, and the hazards and/or resources they present to individuals, societies, and the natural environment. Topics discussed include earthquakes, volcanism, stream flooding, coastal erosion, global climate change, and global water, soil, mineral, and energy resources. Cost/benefit considerations, hazard mitigation concepts, economic and political ramifications, and interactions among the lithosphere, hydrosphere, atmosphere, and biosphere also are presented. The course is designed to give non-science majors a deeper appreciation and understanding of the basic scientific concepts involved, as well as individual and societal connections to the global geologic environment, leading to better, more informed business, political, policy, and personal decisions. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 168 Mesozoic Ruling Reptiles 3 Credits
This course provides an introduction to the vertebrate groups that dominated the land (Dinosaurs), the seas (Mosasaurs, Plesiosaurs, Pliosaurs, Tylosaurs, and Ichthyosaurs) and the skies (Pterosaurs, Pterdactyls) during the Mesozoic Era (65-250 million years ago). Students study the diversity of skeletal architectures and their reconstructed function and the often controversial, inferred anatomy, physiology, reproductive strategy, habit, and social behaviors of these animals that are different from mainstream reptiles, birds, and mammals. They also learn about the paleogeographical, and paleoclimatological conditions that facilitated the evolutionary rise to dominance and diversification of these vertebrate groups and the debated causes of their eventual extinction. These topics also serve to illustrate how the scientific approach works and how competing hypotheses are evaluated. Three hours of lecture per week. Weekend field trips may be required.. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 290 Directed Research and Study in Geosciences 1-4 Credits
Directed Research and Study in Geosciences will provide an opportunity for freshman and sophomore students to gain hands-on research experience in the geosciences. This is an individual program of study and each student will work with a selected faculty member on a topic of mutual interest. The course consists of a combination of project meetings, supervised research, and guided readings. The focus will be on formulating research questions, designing and conducting experiments, collecting the necessary data, reviewing the scientific literature as it relates to each student's research topic in a weekly meetings with the instructor, and communicating the findings by writing a final project report.

GEO 306 Sedimentology and Stratigraphy 4 Credits
The principles of weathering, erosion, transportation, and deposition of sediment are the focus of this course. Sediment characteristics are examined to identify the processes involved in transporting grains and the specific environment in which the grains were deposited. Students will learn how to collect, analyze, and interpret sedimentary data and how to interpret surface and subsurface stratigraphic data using various techniques, such as lithostratigraphic, biostratigraphic, and geophysical, correlations. Field trips will expose students to different sedimentary environments and provide opportunities for students to learn how to conduct fieldwork. Three hours of lecture and one three-hour lab per week. Weekend field trips may be required. Prerequisite(s): GEO 100.
Corequisite(s): GEO 306L.

GEO 306L Sedimentology and Stratigraphy Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): GEO 306.

GEO 350 Soil and Surficial Processes 4 Credits
This course examines the physical, chemical, hydrological, and biological aspects of soil and their relation to geomorphologic development. Specific topics include descriptions of soil texture and structures, soil classification, soil colloids, soil redox and pH, and their effect on vadose zone water chemistry. Soil genesis and erosion controls, microbiology/ecology, nutrient cycles, and modern soil pollution from sludge and pesticide applications, as well as domestic and industrial chemical spills, also are discussed. The lab portion of the course introduces the basic techniques of soil analysis, both physical and chemical, and field survey methods. Three hours of lecture and one three-hour lab per week. Prerequisite(s): GEO 100 or GEO 113, and GEO 102.
Corequisite(s): GEO 350L.

GEO 350L Soil and Surficial Processes Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): GEO 350.

GEO 407 Hydrology and Water Resources 4 Credits
This course introduces the principles that govern both surface water and groundwater flows that have applications to societal water needs. Surface water topics cover the basics of the hydrologic cycle, the processes of precipitation, evapotranspiration, runoff, and infiltration, and various factors affecting water supply and water quality issues in a modern watershed. Groundwater topics examine the principles that govern flow through a porous medium and the basics of well hydraulics under different pumping conditions that community development requires. Laboratory exercises will give students hands-on experience with the delineation of watersheds, analysis of precipitation data, and flow contaminant transport modeling. The field portion of the laboratory includes runoff and stream discharge measurements, as well as hydraulic conductivity estimations from both slug and pumping tests. Three hours of lecture and one three-hour lab per week. Prerequisite(s): GEO 100 or GEO 113, GEO 102, and MTH 105 or higher.
Corequisite(s): GEO 407L.

GEO 407L Hydrology and Water Resources Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): GEO 407.

GEO 480 Senior Thesis 3 Credits
A senior thesis is optional for geosciences majors. However, a senior thesis is required for eligibility to graduate with honors in geosciences. The topic for investigation will be chosen by the student in consultation with the faculty of the Department of Geological, Environmental, and Marine Sciences. The student must initiate consideration of a proposal to the Department. The proposal must contain a discussion of the proposed project and a timetable to be followed in the study. A departmental committee consisting of a major and minor advisor will evaluate the written paper submitted at the conclusion of the study or other approved venue. An oral presentation before the department at the conclusion of the semester in which the study is completed is required. Proposals must be submitted in final form no later than the end of the ninth week of the semester prior to the semester in which the study is undertaken.
Prerequisite(s): senior standing in the geosciences major and permission of instructor.

GEO 490 Independent Study: Research and Creative Expression 1-4 Credits
Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

GEO 491 Internship in Geosciences 1-4 Credits
A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placements may be in private, public, non-profit, or governmental organizations. These can include consulting firms, regulatory agencies, advocacy groups, and educational or research institutions. Normally, 50 hours of internship per credit is required. A mutually agreed upon method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and could include a term paper or project report and a poster presentation.
Prerequisite(s): 2.5 GPA and permission of instructor.

MAR 120 Oceanography 3 Credits
In this course, students will investigate the geological, chemical, physical, and biological processes that shape the ocean. Emphasis will be placed on how these processes interact with each other and with human populations. These interactions influence important global phenomena that impact all our lives, including weather and climate, the distribution of marine organisms and other natural resources, and coastal processes. Understanding these phenomena will enable students to make more informed decisions and contribute to serious global marine issues. Students will learn through a combination of hands-on exercises designed to foster a deeper understanding of the scientific content as well as the scientific process, practical experiences with real data, readings, and some lectures. CLAS general education areas addressed: DP & GP.

MAR 121 Introductory Oceanography Lab 1 Credits
This lab course introduces students to the fundamental aspects of geological, chemical, physical and biological oceanography. Students learn through inquiry-based, hands-on exercises and activities using actual data collected in the lab and in the field. Independent projects and local field trips during lab and on weekends may be required. One three-hour lab per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

MAR 290 Directed Research and Study in Marine Sciences 1-4 Credits
Provides an opportunity for freshman and sophomore students to gain hands-on research experience in the marine sciences. This is an individual program of study and each student will work with a selected faculty member on a topic of mutual interest. The course consists of a combination of project meetings, supervised research, and guided readings. The focus will be on formulating research questions, designing and conducting experiments, collecting the necessary data, reviewing the scientific literature as it relates to each student's research topic in a weekly meetings with the instructor, and communicating the findings by writing a final project report.

MAR 340 Marine Processes and Environments: Seminar 3 Credits
This course is designed as a seminar course. Therefore, students will learn to lead class discussions, to analyze and critique peer-reviewed journal articles, and to enhance their presentation skills. Students will interpret graphical, spatial, and numerical data to support their positions. Content will emphasize the interactions among marine processes, biological features, and geologic landforms.
Prerequisite(s): A minimum grade of D in MAR 120 and GEO 100 or GEO 113.

MAR 401 Marine Ecology 4 Credits
The purpose of this course is to introduce students to fundamental principles in ecology, as it relates to marine systems. Topics include the marine environment and its influence on the organisms living there; biodiversity and speciation; factors regulating population dynamics in marine systems; larval and fisheries ecology; species interactions such as predation, competition, and symbiosis; factors regulating productivity and energy flow in marine systems; and marine conservation. Hands-on laboratory exercises will provide students with the opportunity to design and conduct experiments related to marine ecology, and to collect, analyze, and interpret data from those experiments. Ecosystem modeling will also be introduced. Three hours of lecture and one three-hour lab per week. Weekend field trips may be required.
Prerequisite(s): D or better in MAR 120 and either BIO 115 or 116.

MAR 401L Marine Ecology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): MAR 401.

MAR 410 Physical Oceanography 3 Credits
Introduction to the physical aspects and processes of the oceans and their influence on marine ecosystems and Earth processes. Topics include distribution of salinity and water temperature and their effect on water movement, the oceanic heat budget, atmospheric and oceanic interactions, ocean currents including surface and deep water circulation, waves, tides, and medium- to small-scale circulation features. Throughout the course, emphasis is placed on how these physical processes affect the biology and chemistry of the ocean. Three hours of lecture per week. Weekend field trips may be required.
Prerequisite(s): MAR 120.

MAR 480 Senior Thesis 3 Credits
A senior thesis is optional for marine sciences majors. However, a senior thesis is required for eligibility to graduate with honors in marine sciences. The topic for investigation will be chosen by the student in consultation with the faculty of the Department of Geological, Environmental, and Marine Sciences. The student must initiate consideration of a proposal to the Department. The proposal must contain a discussion of the proposed project and a timetable to be followed in the study. A departmental committee consisting of a major and minor advisor will evaluate the written paper submitted at the conclusion of the study or other approved venue. An oral presentation before the department at the conclusion of the semester in which the study is completed is required. Proposals must be submitted in final form no later than the end of the ninth week of the semester prior to the semester in which the study is undertaken.
Prerequisite(s): senior standing in the marine sciences major and permission of department chair.

MAR 490 Independent Study: Research and Creative Expression 1-4 Credits
Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

MAR 491 Internship in Marine Sciences 1-4 Credits
A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placements may be in private, public, non-profit, or governmental organizations. These can include consulting firms, regulatory agencies, advocacy groups, and educational or research institutions. Normally, 50 hours of internship per credit is required. A mutually agreed upon method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and could include a term paper or project report and a poster presentation.
Prerequisite(s): 2.5 GPA and permission of instructor.

Elementary Education: Multidisciplinary Studies

Program Overview

The elementary education program in the Department of Teacher Education prepares students for fulfilling teaching careers in America's diverse society. Rider was the first private New Jersey institution to hold the highest accreditation possible in teaching from the National Council for the Accreditation of Teacher Education (http://caepnet.org/) (NCATE/CAEP) and we offer graduates added value and recognition nationwide when seeking employment or admission to graduate study.

Curriculum Overview

As they begin their path to becoming effective and skilled elementary school teachers, students in Rider's elementary education program engage in studies that provide an academic background for those subjects they will be teaching.

The major in Elementary Education: Multidisciplinary Studies seeks to provide students with a broad-based liberal arts education in four areas: English, mathematics, science, and history. By combining these different areas of study, students will be able to develop a unique plan of study to achieve their personal and career goals. In addition to being qualified to teach all four areas in grades kindergarten through 6, students will also accumulate at least 15 credits in one of the four areas so that they will be

highly qualified in the state of New Jersey to teach, additionally, in grades 6 through 8, that particular subject area upon passing the appropriate middle school subject matter Praxis. This course of study will enable students to expand their level of certification and thus be marketable to teach at either the elementary or middle school level.

In addition, elementary education majors may also elect to pursue an endorsement, minor, and/or certification in English as a second language/bilingual education, middle school, early childhood, or special education.

Degree Offered

- B.A. in Elementary Education

Elementary Education Major Requirements

Elementary Education: Multidisciplinary Studies majors may also elect to pursue the following endorsements, minors, and certifications:

- English as a second language/bilingual education
- middle school, early childhood, or special education

In addition to completing the major requirements and any requirements for endorsements, minors, and certifications, all Rider University students are required to complet the Engaged Learning (https://www.rider.edu/academics/engaged-learning/about/) requirements.

[1] Or other approved Mathematics course.

[2] These electives must be used to acquire a total of 15 credits in English, history, science or mathematics.

Academic Plans of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

[1] For proper course placement please visit this website. (https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing/)

[2] Any course in the College of Arts & Sciences may be used as a General Studies Elective (GSE) provided the prerequisites have been met. A maximum of two Education courses (six credits) may be used. Courses required to fulfill a minor may be used as GSEs. Courses in the College

of Business or the arts administration major/ minor in the School of Communication, Media and Performing Arts may not be used as GSEs.

[3] EDU 106 and EDU 206 must be taken concurrently in either the fall or spring of the second year.

[4] Any course in the College of Arts & Sciences may be used as a liberal arts and science elective provided the prerequisites have been met.

[5] ELD 375 and ELD 375 must be taken concurrently. Students must pass all sections of the Core Academic Skills for Educators Test (Test Code 5751) in order to register for these courses.

[6] ELD 308 and ELD 376 must be taken concurrently in the semester preceding student teaching.

[7] Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465. In addition, students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test (Test Code 5001) six months prior to Student Teaching (by March 1 for those students applying for student teaching in the fall semester and July 1 for those students applying for student teaching in the spring).

ECE 200 Infant and Toddler Care and Education 3 Credits
Focuses on nutritional and psychological influences on infant and toddler growth and development, including current research in infant development; childbirth; breast feeding; infant stimulation; intellectual development; attachment behavior; and infants in group care. Recognizing that there is increased demand for infant/toddler care, it is increasingly important to assure that America's infants receive a safe, healthy, emotionally secure, and intellectually rich start in life. High quality care and education of very young children are based upon responsive and respectful relationships among all of the people in each child's life.

ECE 332 Families, Community, and Diversity in Early Childhood Education 3 Credits
This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ECE 450 Developmental Methods and Assessment in Early Childhood Education 3 Credits
The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

EDU 101 First Year and Transfer Education Seminar 1 Credits
First year/transfer seminar provides an engaging orientation to the undergraduate teacher education program at Rider University. During this course, students new to the Department of Teacher Education will explore their beliefs about teaching, learning and school. This focus will be broken into four areas of inquiry that include: (a) What knowledge is of "greatest worth" for educators? (b) What is the purpose of a policy and who gets to make the decisions? (c) What is a "safe" school? (d) What role do unions and professional communities play in the lives of educators and children?.

EDU 106 Contexts Of Schooling 3 Credits
Students in this field-based course will begin to examine aims, practices, and contemporary issues of schooling in their historical, sociological, philosophical, and futuristic contexts and from the perspectives of various multicultural constituencies-- students, parents, local community, wider economic community, government, and the profession. In doing so, they will begin to develop professional skills of observation, reflection, analysis, and argument. This course must be taken concurrently with EDU 206. A cumulative GPA of 2.75 is required.

EDU 206 Developmental Education Psychology 3 Credits
This field-based course focuses on: a) the cognitive, personality, social, creative, and moral development of children and adolescents; b) influential theories, concepts, and research findings of educational psychology; and c) the translation of psychological theory into classroom practices. This course must be taken concurrently with EDU 106. A cumulative GPA of 2.75 is required.

EDU 310 Introduction to STEM Education 3 Credits
STEM (Science, Technology, Engineering, and Math) in an educational context refers to teaching and learning that integrates science, technology, engineering, and mathematics. This course aims to provide experience with teaching approaches that promote a more holistic and interdisciplinary understanding of STEM, encouraging preservice teachers to explore real-world problems and develop critical thinking and problem-solving skills. Additionally, it aims to introduce pre-service teachers to some of the best practices of STEM teaching and provide opportunities to practice these approaches.

EDU 320 Introduction to Linguistics and Psycholinguistics 3 Credits
This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester. A cumulative GPA of 2.75 is required. NOTE: This course is cross-listed with FLE 320. Students cannot get credit for both FLE 320 and EDU 320.

EDU 358 Literacy and the Bilingual/Bicultural Child 3 Credits
Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

EDU 420 Teaching a Second Language 3 Credits
This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. A cumulative GPA of 2.75 is required.
*NOTE: This course is cross-listed as FLE 420. Students cannot get credit for both FLE 420 and EDU 420.
Prerequisite(s): EDU 106 with a minimum grade of C+ or EDU 106 with a minimum grade of TR and EDU 206 with a minimum grade of C+ or EDU 206 with a minimum grade of TR.

EDU 451 Special Topics in Education 1-6 Credits
Student teachers, graduate interns, Rider faculty, cooperating teachers, and building-level administrators will engage in collaborative study of a topic through reading, writing, discussion, observation, and reflection on their work in classrooms. Work in these seminars will help student teachers synthesize knowledge from their professional courses and all participants extend their understanding of a particular topic pertaining to teaching. Teacher research methods will be employed as participants analyze their own teaching through perspectives of the seminar topic. Topics will vary each semester. This course is dual-listed for undergraduate and graduate credit. Enrollment is limited to students concurrently enrolled in student teaching and to cooperating teachers and principals working with them.

EDU 460 Educating and Evaluating the Bilingual Child 3 Credits
An examination of the historical, legal, and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing, and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study. A cumulative GPA of 2.75 is required.

EDU 465 Student Teaching and Seminar 12 Credits
A full-time program for seniors providing practical teaching experience in an accredited elementary or secondary school. Under the direct supervision of the cooperating teacher, student teachers are responsible for the planning of lessons and for teaching in their areas of specialization and for developing a high level of teaching competency. Supervisors from Rider observe the student teachers at work, confer with the cooperating teachers and student teachers, and evaluate the growth of the student teachers throughout the internship period. Special topics are considered in seminars held in conjunction with student teaching. These topics include school health and substance abuse, school law, teacher certification and placement, classroom management, mainstreaming, professionalism, and other topics deemed appropriate by the faculty and student teachers.
Prerequisite(s): 1. Satisfactory completion of junior-level professional courses; 2. Cumulative GPA of at least 3.0 prior to commencing the semester in which student teaching is to be completed; 3. All professional education courses, with the exception of those taken concurrently with student teaching, must be completed with a grade of "C +" or better; 4. A candidate for student teaching must be approved by the education division and the coordinator of student teaching. There is an additional fee for Student Teaching.

EDU 477 International Student Teaching 3 Credits
This course provides an immersion opportunity for student teachers to learn about the different cultures and the education system of other countries while living and teaching abroad. Students will explore topics such as global awareness, international curriculum, global educational issues, and pedagogy to support diverse student needs. Through seminar discussion, research, observation, reflection and practical experience, students will develop and share their understanding of diversity in an international setting to increase global awareness, inclusive practice, and professional skills to develop a culturally responsive classroom. A fee is required for this course.
Prerequisites: 3.25 GPA, letter of recommendation, successful completion of required PRAXIS exams, interview, essay, and successful completion of local student teaching. POI required.

ELD 128 Developing Mathematical Ideas for Elementary School Teachers 1 Credits
Prospective teachers will examine the mathematics content and curriculum that is taught in grades K-6, focusing upon the multi-layered aspects of the topics that successful elementary teachers need to understand profoundly in order to provide appropriate instruction. There will be a series of topics selected from those that have historically been especially difficult for teachers to thoroughly understand at the depth needed to teach effectively. Some of the topics may vary each semester.

ELD 307 Foundations of Early Literacy, K-3 3 Credits
This course introduces students to the development of literacy in young children, beginning in kindergarten and continuing through the early elementary grades. Students will learn what research has revealed about how young children develop the insights, skills, and conceptual knowledge that enable them to successfully learn to read and write. Students will learn to support young learners and prompt the development of foundational skills in phonemic awareness, phonics, fluency, vocabulary, comprehension, and writing. In addition, the course examines the relationship between oral language and literacy and the role motivation and social contexts play in literacy learning. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 308 Fostering Literacy and Language Development Across Disciplines 3 Credits
Explores evidenced based practices for literacy instruction in grade 3-6. Students study foundational reading and writing skills alongside theories and practices of motivation and engagement to support literacy and language development and learning. Students learn assessment measures for identifying individual literacy learning needs and methods for organizing instruction that includes access to diverse texts and resources to support all learners. Threaded throughout the course is the importance of understanding and supporting the diverse linguistic, cultural and learning experiences of students and communities and the awareness of how children comprehend and construct text across multiple modalities. Disciplinary literacy strategies children access for success across content areas are studied. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206; ELD 307.

ELD 350 Early Adolescence 1 Credits
This course will focus on common dilemmas faced by young people as they move from childhood into adolescence. It will examine age-related differences between children and adolescents and consider ways to create stimulating environments that fit this developmental transition. Representations of adolescence in the media and in research will be compared, including common stereotypes.

ELD 355 Teaching in the Inclusive Middle School Classroom 1 Credits
This course will highlight the legal and ethical responsibilities of general education teachers in the middle school classroom. The special education process will be discussed and methods to address special needs in the classroom will be shared. Strategies to differentiate instruction and work collaboratively with school community members will help pre-service teachers develop and implement effective instruction that meets diverse needs in the middle school inclusive classroom.
Prerequisite(s): EDU 106 and EDU 206 and a cumulative GPA of 2.75 is required.

ELD 360 Structure and Culture of Middle School Classroom 1 Credits
This course focuses on the teaching of those concepts critical to the understanding of the structure and culture of middle school education. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 375 Methods of Teaching Mathematics in Elementary Classrooms 3 Credits
This course focuses on the teaching of mathematics that is developmentally appropriate for students from nursery to grade eight. In keeping with ACET, NAEYC, and NCTM Standards, emphasis is placed on planning for and implementing an integrated curriculum approach, discovery learning, hands-on experience, theme cycles, use of technology, and traditional and non-traditional assessment strategies. Field experiences will consist of classroom observations and teaching individuals and/or small groups of students. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206, MTH 102 or MTH 105 or MTH 150 or MTH 210.

ELD 376 Teaching Science, Social Studies and the Arts N-6 3 Credits
This course focuses on methods and materials of instruction in science, social studies, and the arts that are developmentally appropriate for students in preschool through grade six (based on NCSS, NSTA, and NAEA Standards). Emphasis is placed on an integrated approach to curriculum, with lesson and unit planning activities that incorporate hands-on-experiences, discovery learning and traditional and non-traditional assessment strategies. Field experience will consist of observation and analysis of classroom instruction and the teaching of lessons to individual and/or small groups of children. A cumulative GPA of 2.75 is required.
Prerequisite(s): ELD 307 and ELD 375.

ELD 380 Methods of Teaching Mathematics in the Middle School 3 Credits
This course focuses on the teaching of mathematics that is developmentally appropriate for students in grades six through eight. In keeping with the National Council of Teachers of Mathematics (NCTM) Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experience, use of technology, and traditional and non-traditional assessment. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 385 Teaching Science in the Middle School 3 Credits
This course focuses on the teaching of sciences that is developmentally appropriate for students in grades six through eight. In keeping with the National Science Education Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experiences, use of technology and traditional and non-traditional assessment strategies. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 390 Teaching Social Studies in the Middle School 3 Credits
This course focuses on the teaching of social studies that is developmentally appropriate for students in grades six through eight. Its focus will explore understanding of United States history, geography and civics from the perspective of the middle school. The course emphasizes the ten themes of social studies as developed by the National Council for the Social Studies. In addition to the facts, concepts and generalizations encompassed by the ten themes, the course works with academic, social, thinking and citizenship skills. The required, intensive field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 395 Literacy Learning in the Middle School 3 Credits
This course focuses on the teaching of literacy that is developmentally appropriate for students in grades six through eight. It explores processes in reading, writing, speaking, listening and viewing, relationships among the language arts and other subject areas, and the development of critical literacy and cognitive strategies. The intense field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 490 Independent Study: Research and Creative Expression 1-6 Credits
Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hour's credit to be assigned is determined by the department.

SPE 201 Foundations in Special Education and Inclusive Practice 3 Credits
This course emphasizes the foundations of special education and introduces students to inclusive practice. Philosophical, historical, and legal foundations of special education and characteristics of students with disabilities will be examined. Students will learn the components of an Individualized Education Program (IEP), how to adapt learning environments and curricular materials, as well as how to select and implement modifications for students with disabilities. Inclusive educational practices including communication, coteaching, and collaborative partnerships will be addressed through case studies and fieldwork. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours.
Prerequisite(s): A cumulative GPA of 2.75 is required.

SPE 202 Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities 3 Credits
This course is designed to examine the characteristics of individuals with Autism Spectrum Disorder (ASD) and strategies to support their academic, communication, and social/behavioral growth, including the use of assistive technology and positive behavioral supports. Methods and strategies for ASD and other low incidence disabilities will be explored. Through active participation in class and field sites, students will become aware of the various social issues related to family, education, transition, community resources and work experiences of individuals with these disabilities. Students will be required to complete a minimum of 30 weekday field hours in addition to regularly scheduled class hours.
Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 210 Global Encounters 3 Credits
This course is an international learning experience focused on exploring educational opportunities in the United States and abroad. Students will study the history, policy and practice of special education in the United States and compare it with another country and culture first hand, through lectures, school visits and reflection. Current strategies and challenges of educators and families supporting individuals with disabilities will be examined. Through this cross-cultural experience, students will broaden perspectives and develop cultural awareness, knowledge, and understanding of diversity. This course is open to all students and disciplines. There are no prerequisites.

SPE 300 Inclusive Practices for General Education Teachers 3 Credits
This course is designed to introduce preservice general education teachers students to special education and the inclusive classroom. Students will explore current issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours. Prereqisite(s): EDU 106 and EDU 206. A cumulative gpa of 2.75 is required.

SPE 303 Assessment and Instruction for Students with Disabilities 3 Credits
This course will emphasize the relationship between assessment and instructional design and implementation. Coursework includes the evaluation, selection, development, and adaptation of standardized, normreferenced, and functional assessments, such as a Functional Behavioral Assessment (FBA) and Ecological Assessment. Strategies to support literacy instruction for students with disabilities will be examined. Transition planning, program development, and agencies available to support students with disabilities and their families will be explored. This course requires a field experience in order to help students apply theory to practice.
Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 304 Assessment and Instruction in the Inclusive Classroom 3 Credits
This course will emphasize assessment, planning, and instructional design to maximize the learning of all students, including those with exceptional learning needs, in the inclusive classroom. Students will have the opportunity to explore a variety of instructional strategies to meet the needs of diverse learners. Organization of learning environments and the collaborative process, including co-teaching models, will be utilized to design a long-term unit plan. This course requires a field experience in order to help students apply theory to practice.
Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 305 Assessment and Instruction for Students with Autism Spectrum Disorders 3 Credits
Through this course, teacher candidates will learn both theories related to teaching students with Autism Spectrum Disorder (ASD) as well as best practices in the classroom related to academic instruction, as well as emotional, behavioral, and communicative interventions. This course also includes a field component, in which teacher candidates are expected to complete 10 hours of observation in a classroom with students with ASD. The course begins by examining the characteristics of the disability, causes, early warning signs, diagnostic procedures, and early intervention practices. Specific practices related to instruction and intervention as well as how to best structure a classroom for students will be examined. Teacher candidates will receive instruction in a variety of strategies and practices, even those that do not yet qualify as EBPs, as well as their theoretical underpinnings. Strategies for communicating effectively and efficiently with parents, as well as the most current and/or special issues in the field will also be discussed. Issues related to post-secondary transition will also be examined.
Prerequisites: A cumulative GPA of 2.75 and SPE 201.

Elementary Education: STEM Studies

Program Overview

Currently, NJ and nearby areas are experiencing an expanding teacher shortage and the need for teachers certified to teach math & science continues to grow. This program offers an attractive option for pre-service teachers interested in STEM subjects at the middle school level as well as for teachers at the elementary level with competence and interest in STEM subjects. This program is specifically tailored to those who aim to become middle school math or science teachers or who would like to be elementary teachers with expertise in the STEM fields.

Degree Offered

- B.A. in Elementary Education: STEM Studies

Elementary Education: STEM Studies Program Requirements

(120 credits)

In addition to completing the Elementary Education: STEM Studies requirements, all Rider University students are required to complete the Engaged Learning (https://www.rider.edu/academics/engaged-learning/about/) requirements.

Code	Title	Credits
Basic Education Core Courses		
Complete the following courses:		
CMP 120	Seminar in Writing and Rhetoric	3
or BHP 100	Honors Seminar: Great Ideas I	
CMP 125	Seminar in Writing and Research	3
or BHP 150	Honors Seminar: Great Ideas II	
COM 104	Speech Communication	3
PSY 100	Introduction to Psychology	3
History Elective [1]		3
Fine Arts elective (Appreciation or Studio)		3
Literature elective		3
Foreign Language elective		3
Social Science Elective (may be used toward a minor, including PSY 230, PSY 212, PSY 237, PSY 330, MCS 110		3
EDU 101	First Year and Transfer Education Seminar	1
EDU 106	Contexts Of Schooling [2]	3
EDU 206	Developmental Education Psychology [2]	3
General Education Electives		**4**
Professional Education		
Complete the following courses:		
SPE 300	Inclusive Practices for General Education Teachers	3
EDU 310	Introduction to STEM Education	3
additional math pedagogy course (will be approved in fall '24)		3
EDU 358	Literacy and the Bilingual/Bicultural Child	3
SST 300	Historical & Contemporary Issues in the Social Studies	3
ELD 307	Foundations of Early Literacy, K-3 [3]	3
ELD 375	Methods of Teaching Mathematics in Elementary Classrooms [3]	3
ELD 308	Fostering Literacy and Language Development Across Disciplines [4]	3
ELD 376	Teaching Science, Social Studies and the Arts N-6 [4]	3
ELD 350	Early Adolescence	1
ELD 360	Structure and Culture of Middle School Classroom	1
ELD 380	Methods of Teaching Mathematics in the Middle School	3
or ELD 385	Teaching Science in the Middle School	
EDU 465	Student Teaching and Seminar	12
STEM Concentration		
Multidisciplinary Courses:		
ENG 336	Grammar and Style	3
or ENG 236	Applied Grammar & Syntax	
Mathematics Courses:		

MTH 150	Mathematics for Education Majors I [5]	3
MTH 151	Mathematics for Education Majors II [5]	3
MTH 152	Mathematics for Education Majors III [5]	3
ENV 200 & 200L	Statistical and Computer Applications in the Natural Sciences and Statistical and Computer Applications in the Natural Sciences Lab	4
MTH 105	Algebra and Trigonometry	4
Technology Courses:		
Select one from the list below:		3
TEC 207	Social Media for Education	
TEC 308	Digital Tools for Teaching	
CSC 105	Fundamentals of Computer Science	
CSC 110	Computer Science I	
Science Requirement:		**15**
A minimum of 15 credits in any science and at any level are needed, with at least 3 courses that include a Lab section (12 credits) and one non-Lab science (3 credits). The following are options to select from to complete the credits required for both Basic Education core and Multidisciplinary Concentration in Sciences and Mathematics.		
Lab-science courses. Select a total of three 4-credit and 3-credit + 1-credit courses:		
BIO 110 & 110L	Life Science: Inquiry Approach and Life Science: Inquiry Approach Lab	
CHE 118 & 118L	Exploration of Chemical Principles and Exploration of Chemical Principles Lab	
ENV 100 & 100L	Introduction to Environmental Sciences and Introduction to Environmental Sciences Lab	
CHE 114 & 114L	Chemistry in the Kitchen and Chemistry in the Kitchen Lab	
GEO 100 & GEO 102	Earth Systems Science and Earth Materials and Processes Lab	
GEO 113 & GEO 102	Environmental Geology and Earth Materials and Processes Lab	
MAR 120 & MAR 121	Oceanography and Introductory Oceanography Lab	
Select one from the list below, or select one additional 3-credit course from the Science Requirement list above.		
PHY 180	Astronomy	
BIO 100	Life Science	
ENV 120	Introduction to Climate Change	
ENV 110	Future of Natural Resources	
GEO 168	Mesozoic Ruling Reptiles	
Total Credits		**120**

1 While any HIS course is allowed, either HIS 150 or HIS 151 is recommended.
2 EDU 106 and EDU 206 must be taken concurrently.
3 ELD 307 and ELD 375 must be taken concurrently.
4 ELD 308 and ELD 376 must be taken concurrently.
5 With approval from your advisor, a different MTH course may be substituted.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
CMP 120	Seminar in Writing and Rhetoric	3
EDU 101	First Year and Transfer Education Seminar	1
MTH 150	Mathematics for Education Majors I [1]	3
PSY 100	Introduction to Psychology	3
Fine Arts Elective		3
History Elective		3
	Semester Credit Hours	**16**
Spring Semester		
CMP 125	Seminar in Writing and Research	3
COM 104	Speech Communication	3
MTH 151	Mathematics for Education Majors II [1]	3
Foreign Language Elective [2]		3
Science Elective with Lab [3]		4
	Semester Credit Hours	**16**
Year 2		
Fall Semester		
English Literature Elective		3
General Studies Elective		3
Science Elective without a Lab		3
ENV 200 & 200L	Statistical and Computer Applications in the Natural Sciences and Statistical and Computer Applications in the Natural Sciences Lab	4
Social Science Elective (PSY 230, PSY 212, PSY 237, PSY 330, MCS 110, etc)		3
	Semester Credit Hours	**16**
Spring Semester		
EDU 106	Contexts Of Schooling [4]	3
EDU 206	Developmental Education Psychology [4]	3
ENG 236 or ENG 336	Applied Grammar & Syntax or Grammar and Style	3
Science Elective with a lab [3]		4
Math Pedagogy Course (ELD 374 will be approved in fall '24)		3
	Semester Credit Hours	**16**
Year 3		
Fall Semester		
ELD 307	Foundations of Early Literacy, K-3	3
ELD 375	Methods of Teaching Mathematics in Elementary Classrooms	3
ELD 350	Early Adolescence	1
MTH 105	Algebra and Trigonometry	4
SST 300	Historical & Contemporary Issues in the Social Studies	3
	Semester Credit Hours	**14**

Spring Semester		
ELD 380 or ELD 385	Methods of Teaching Mathematics in the Middle School or Teaching Science in the Middle School	3
SPE 300	Inclusive Practices for General Education Teachers	3
ELD 360	Structure and Culture of Middle School Classroom	1
Math Elective		3
Science Elective with a lab [3]		4
Technology Elective		3
	Semester Credit Hours	**17**
Year 4		
Fall Semester		
ELD 308	Fostering Literacy and Language Development Across Disciplines [6]	3
ELD 376	Teaching Science, Social Studies and the Arts N-6 [6]	3
EDU 358	Literacy and the Bilingual/Bicultural Child	3
EDU 310	Introduction to STEM Education	3
General Studies Elective		1
	Semester Credit Hours	**13**
Spring Semester		
EDU 465	Student Teaching and Seminar [7]	12
	Semester Credit Hours	**12**
	Total Credit Hours for Graduation	**120**

1. Or other approved math course.
2. For proper course placement please visit this website (http://catalog.rider.edu/policies/undergraduate/placement-testing-information/).
3. Choose one lab science from the following: BIO 110, CHE 118, ENV 100, CHE 114, GEO 100 and GEO 102, GEO 113 and GEO 102, MAR 120 and MAR 121.
4. EDU 106 and EDU 206 must be taken concurrently in either the fall or spring of the second year.
5. ELD 307 and ELD 375 must be taken concurrently. Students must pass all sections of the Core Academic Skills for Educators Test (Test Code 5752) in order to register for these courses.
6. ELD 308 and ELD 376 must be taken concurrently in the semester preceding student teaching. Students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering these courses.
7. Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465. In addition, students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for ELD 308 and ELD 376 and before applying for student teaching.

Courses and Descriptions

BHP 100 Honors Seminar: Great Ideas I 3 Credits
Traces the impact of great ideas on society, politics, economics, science, and the arts. This writing-intensive course substitutes for CMP 120 Expository Writing. Freshmen only.

BHP 150 Honors Seminar: Great Ideas II 3 Credits
A continuation of Great Ideas I, the introductory Freshman Baccalaureate Honors Seminar. Great ideas are studied in their cultural and historical contexts and from an interdisciplinary perspective. Students are guided in writing an effective research paper. This writing-intensive course substitutes for CMP 125 Research Writing. Freshmen only.
Prerequisites: BHP 100 with a minimum grade of C or CMP 120 with a minimum grade of C or BHP100 with a score of WV.

BIO 100 Life Science 3 Credits
An introductory course for non-science majors in which students develop an understanding of the nature of science and are introduced to foundational topics in the biological life sciences and how they relate to human affairs. The course may emphasize human evolution, genetics, aging, disease, reproduction, bioethics or other topics in biology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CAS general education curriculum.

BIO 110 Life Science: Inquiry Approach 4 Credits
An introductory course for non-science majors in which students develop an understanding of biological evolution, the molecular basis of heredity, the cell, matter, energy and organization in living systems, and the interdependence of organisms. In addition, students will develop an understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives. Through investigative activities, students will develop an understanding about scientific inquiry and develop abilities necessary to do scientific inquiry. Three hours of lecture and one three-hour lab per week.
Corequisite(s): BIO 110L.

BIO 110L Life Science: Inquiry Approach Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 110.

CHE 114 Chemistry in the Kitchen 4 Credits
Chemistry permeates aspects of our daily lives in which we are often unaware. In this course, students will learn the core tenets of chemistry including atomic and molecular structure, bonding, intermolecular and macromolecular interactions, and chemical reactivity, and will personally investigate these properties in the context of cooking, baking, metabolism, and other kitchen-related activities. This 4-credit course will include a weekly 3-hour lab in which students will perform experiments that allow them to prepare dishes that illustrate key chemical concepts. As part of the course, students will collaborate with the Trenton Area Soup Kitchen to prepare and serve food to the community, as well as share their understanding about the chemical properties that are involved in the development of various dishes. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.
Corequisite(s): CHE 114L.

CHE 114L Chemistry in the Kitchen Lab 0 Credits
This is the laboratory portion of CHE 114.
Corequisite(s): CHE 114.

CHE 118 Exploration of Chemical Principles 4 Credits
A one-semester introduction to the principles of chemical sciences. Students will utilize inquiry-based learning methods to examine contextual problems as a means to explore introductory models and concepts of chemistry. Students will also gain an understanding of how scientific models are used to explain experimental observations. The laboratory component of this course is designed to provide students with an experimental context within which to develop some of the models described in the classroom. Three hours of lecture and one three-hour lab per week.

CHE 118L Exploration of Chemical Principles Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): CHE 118.

CMP 120 Seminar in Writing and Rhetoric 3 Credits
Students will increase their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. This course counts towards the fulfillment of the Essential Competencies element of the CAS general education curriculum.

CMP 125 Seminar in Writing and Research 3 Credits
Introduces students to the process of library research and documented writing. Emphasis will be on the refinement of critical reading, thinking, and writing strategies applied to multiple sources and documented papers. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.
Prerequisite(s): CMP 120 or BHP 100.

COM 104 Speech Communication 3 Credits
Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

CSC 105 Fundamentals of Computer Science 3 Credits
This course offers an introduction to fundamental areas of study in computer science - their applications, capabilities, and boundaries. Topics include computer organization, algorithms design and analysis, programming paradigms, software development process, operating systems responsibilities, applications, and communications. Hands-on python programming is also introduced in this course from a non-mathematical problem-solving point of view. Basic programming constructs include statements, expressions, variables, control structures, functions, and file operation.

CSC 110 Computer Science I 3 Credits
This course is an introduction to computer science and modern computing fundamentals. Students will develop programs and algorithms to solve a variety of problems posed in the natural sciences. Students will learn to code in Python, a widely adopted language, and learn the basics of algorithms, data types, program structure and development,
Prerequisite(s): MTH 105 or MTH 106 or MTH 210 or concurrent enrollment. MTH 210 or MTH 106 preferred for CSC majors.

EDU 106 Contexts Of Schooling 3 Credits
Students in this field-based course will begin to examine aims, practices, and contemporary issues of schooling in their historical, sociological, philosophical, and futuristic contexts and from the perspectives of various multicultural constituencies-- students, parents, local community, wider economic community, government, and the profession. In doing so, they will begin to develop professional skills of observation, reflection, analysis, and argument. This course must be taken concurrently with EDU 206. A cumulative GPA of 2.75 is required.

EDU 206 Developmental Education Psychology 3 Credits
This field-based course focuses on: a) the cognitive, personality, social, creative, and moral development of children and adolescents; b) influential theories, concepts, and research findings of educational psychology; and c) the translation of psychological theory into classroom practices. This course must be taken concurrently with EDU 106. A cumulative GPA of 2.75 is required.

ELD 307 Foundations of Early Literacy, K-3 3 Credits
This course introduces students to the development of literacy in young children, beginning in kindergarten and continuing through the early elementary grades. Students will learn what research has revealed about how young children develop the insights, skills, and conceptual knowledge that enable them to successfully learn to read and write. Students will learn to support young learners and prompt the development of foundational skills in phonemic awareness, phonics, fluency, vocabulary, comprehension, and writing. In addition, the course examines the relationship between oral language and literacy and the role motivation and social contexts play in literacy learning. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 308 Fostering Literacy and Language Development Across Disciplines 3 Credits
Explores evidenced based practices for literacy instruction in grade 3-6. Students study foundational reading and writing skills alongside theories and practices of motivation and engagement to support literacy and language development and learning. Students learn assessment measures for identifying individual literacy learning needs and methods for organizing instruction that includes access to diverse texts and resources to support all learners. Threaded throughout the course is the importance of understanding and supporting the diverse linguistic, cultural and learning experiences of students and communities and the awareness of how children comprehend and construct text across multiple modalities. Disciplinary literacy strategies children access for success across content areas are studied. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206; ELD 307.

ELD 350 Early Adolescence 1 Credits
This course will focus on common dilemmas faced by young people as they move from childhood into adolescence. It will examine age-related differences between children and adolescents and consider ways to create stimulating environments that fit this developmental transition. Representations of adolescence in the media and in research will be compared, including common stereotypes.

ELD 360 Structure and Culture of Middle School Classroom 1 Credits
This course focuses on the teaching of those concepts critical to the understanding of the structure and culture of middle school education. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 375 Methods of Teaching Mathematics in Elementary Classrooms 3 Credits
This course focuses on the teaching of mathematics that is developmentally appropriate for students from nursery to grade eight. In keeping with ACET, NAEYC, and NCTM Standards, emphasis is placed on planning for and implementing an integrated curriculum approach, discovery learning, hands-on experience, theme cycles, use of technology, and traditional and non-traditional assessment strategies. Field experiences will consist of classroom observations and teaching individuals and/or small groups of students. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206, MTH 102 or MTH 105 or MTH 150 or MTH 210.

ELD 376 Teaching Science, Social Studies and the Arts N-6 3 Credits
This course focuses on methods and materials of instruction in science, social studies, and the arts that are developmentally appropriate for students in preschool through grade six (based on NCSS, NSTA, and NAEA Standards). Emphasis is placed on an integrated approach to curriculum, with lesson and unit planning activities that incorporate hands-on-experiences, discovery learning and traditional and non-traditional assessment strategies. Field experience will consist of observation and analysis of classroom instruction and the teaching of lessons to individual and/or small groups of children. A cumulative GPA of 2.75 is required.
Prerequisite(s): ELD 307 and ELD 375.

ELD 380 Methods of Teaching Mathematics in the Middle School 3 Credits
This course focuses on the teaching of mathematics that is developmentally appropriate for students in grades six through eight. In keeping with the National Council of Teachers of Mathematics (NCTM) Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experience, use of technology, and traditional and non-traditional assessment. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ELD 385 Teaching Science in the Middle School 3 Credits
This course focuses on the teaching of sciences that is developmentally appropriate for students in grades six through eight. In keeping with the National Science Education Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experiences, use of technology and traditional and non-traditional assessment strategies. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

ENG 236 Applied Grammar & Syntax 3 Credits
This course offers a review of the essential elements of English grammar and syntax and fosters understanding of how these elements work in notable argumentative and expository writing as well as in the student's own compositions. Focus is on both expert reading and effective writing. Changing attitudes toward usage, including influence of digital media on language use, are discussed. May be taken as preparation for, or independently of ENG 336, which addresses grammar, syntax, and style at a more advanced level.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 336 Grammar and Style 3 Credits
By building a comprehensive knowledge of the conventions of English grammar, punctuation and syntax, students will learn how to analyze the way words, phrases, sentences, and paragraphs work in expert writing, and they will apply this knowledge to their own writing. Emphasis is on argument, exposition, and analysis.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENV 100 Introduction to Environmental Sciences 4 Credits
Examines how ecosystems function, with emphasis on the interactions between biological organisms and their physical environment, and the chemical processes that govern these interactions. The impact of human populations on natural ecosystems is investigated in detail using case studies from history and current events. The laboratory provides for hands-on experiences and/or short field trips to local sites for a better understanding of many of the concepts discussed. Weekday and weekend field trips may be required. Three hours of lecture and one three-hour lab per week. CLAS general education areas addressed: DP, SP, GP.
Corequisite(s): ENV 100L.

ENV 100L Introduction to Environmental Sciences Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): ENV 100.

ENV 110 Future of Natural Resources 3 Credits
In this course, students are introduced to topics in the natural sciences through studies of human exploitation of selected natural resources (e.g. water, fisheries, mineral resources, energy, etc.). The course work includes a study of the scientific process and how it can contribute to solutions to contemporary issues. Topics covered will include factors that influence real-world decisions to manage natural resources more sustainably (e.g. political, economic, ethical factors). During the three hours of class meetings each week, lecture and exercises will be integrated. Field trips will be required. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENV 120 Introduction to Climate Change 3 Credits
This course offers students an overview of the human impacts on Earth's climate and emerging solutions to limit future climate change. Students will learn scientific insights into the interconnected components of Earth's climate as a system including the atmosphere, oceans, land, geology, and ice. Human effects on Earth's climate system will be contrasted with natural climate variation that preceded the industrial revolution. Students will also consider the personal, societal, and ethical implications of climate change through the lens of environmental justice.

ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits
This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.
Corequisite(s): ENV 200L.

ENV 200L Statistical and Computer Applications in the Natural Sciences Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): ENV 200.

GEO 100 Earth Systems Science 3 Credits
Investigates the major global processes that occur on Earth. These processes can be grouped into four major systems: atmosphere, hydrosphere, lithosphere, and cosmosphere. Each system interacts with and affects the other systems creating, in a sense, a single Earth process. With this approach, the student will view the Earth as a whole, and understand that the many seemingly separate components that make up this planet are, in fact, a set of interacting processes, that operate in cycles through time, within a single global system. Three hours of lecture per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 102 Earth Materials and Processes Lab 1 Credits
This lab course introduces students to the origin, identification, and significance of geologic materials, processes, and landforms. Hands-on experiences with mineral and rock specimens, topographic and geologic maps, and GPS and other data collection techniques are emphasized, along with field trip and in-lab observations, measurements, and interpretations. One three-hour lab per week.
Prerequisite(s): concurrent enrollment in, or prior completion of, GEO 100 or GEO 113 is required.

GEO 113 Environmental Geology 3 Credits
Examines the fundamental premise that "society exists by geologic consent subject to change without notice" by studying a number of important global geologic processes and cycles, and the hazards and/or resources they present to individuals, societies, and the natural environment. Topics discussed include earthquakes, volcanism, stream flooding, coastal erosion, global climate change, and global water, soil, mineral, and energy resources. Cost/benefit considerations, hazard mitigation concepts, economic and political ramifications, and interactions among the lithosphere, hydrosphere, atmosphere, and biosphere also are presented. The course is designed to give non-science majors a deeper appreciation and understanding of the basic scientific concepts involved, as well as individual and societal connections to the global geologic environment, leading to better, more informed business, political, policy, and personal decisions. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 168 Mesozoic Ruling Reptiles 3 Credits
This course provides an introduction to the vertebrate groups that dominated the land (Dinosaurs), the seas (Mosasaurs, Plesiosaurs, Pliosaurs, Tylosaurs, and Ichthyosaurs) and the skies (Pterosaurs, Pterdactyls) during the Mesozoic Era (65-250 million years ago). Students study the diversity of skeletal architectures and their reconstructed function and the often controversial, inferred anatomy, physiology, reproductive strategy, habit, and social behaviors of these animals that are different from mainstream reptiles, birds, and mammals. They also learn about the paleogeographical, and paleoclimatological conditions that facilitated the evolutionary rise to dominance and diversification of these vertebrate groups and the debated causes of their eventual extinction. These topics also serve to illustrate how the scientific approach works and how competing hypotheses are evaluated. Three hours of lecture per week. Weekend field trips may be required.. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

HIS 150 Pre-Modern World: Evolution to Revolution 3 Credits
This course traces both regional histories and global interactions, and covers the development of societies and states in Africa, the Americas, Asia and Europe from prehistoric times until about 1500. Certain major topics will be pursued, including agriculture, great empires, the major world religions, long-distance trade, and early modern exploration. While learning about these topics, students will also gain an understanding of the practice of history, especially of the kinds of sources historians use and how they reconstruct and interpret the past.

HIS 151 World in the Modern Era: Exploration to Globalization 3 Credits
Learn what college students should know about history as a discipline and why history matters by tracing the development and interactions of the cultures of Europe, Africa, Asia and the Americas from 1500 to the present. Students will gain an appreciation for the value of historical thinking and a greater understanding of the relationships among modern nations so necessary for global citizenship.
Prerequisite(s): HIS 150.

MAR 120 Oceanography 3 Credits
In this course, students will investigate the geological, chemical, physical, and biological processes that shape the ocean. Emphasis will be placed on how these processes interact with each other and with human populations. These interactions influence important global phenomena that impact all our lives, including weather and climate, the distribution of marine organisms and other natural resources, and coastal processes. Understanding these phenomena will enable students to make more informed decisions and contribute to serious global marine issues. Students will learn through a combination of hands-on exercises designed to foster a deeper understanding of the scientific content as well as the scientific process, practical experiences with real data, readings, and some lectures. CLAS general education areas addressed: DP & GP.

MTH 150 Mathematics for Education Majors I 3 Credits
This is the first course in a three-course sequence for education majors, This course covers the concept of Numbers, starting with counting numbers, decimals, negative numbers, fractions, and real numbers; different ways of representing numbers, and the relations between them are explored; different meanings and applications of the arithmetic operations are studied; standard and non-standard algorithms for arithmetic are considered in light of the representation of numbers. May not be used by CLAS students to satisfy the mathematics component of the core.

MTH 151 Mathematics for Education Majors II 3 Credits
This is the second course in a three-course sequence for elementary education majors. In this course, students will study proportional reasoning, Number Theory, Algebra, Geometry, and measurement. May not be used by SLAS students to satisfy the mathematics component of the core.
Prerequisite(s): MTH 150.

MTH 152 Mathematics for Education Majors III 3 Credits
This is the third course in a three-course sequence for elementary education majors. In this course, students will study area and volume, transformational geometry, statistics and probability.
Prerequisite(s): MTH 151.

MTH 105 Algebra and Trigonometry 4 Credits
The course is an in depth and rigorous study of functions and graphs, equations and inequalities, polynomial and rational functions, exponential, and logarithmic functions, basic trigonometric functions and their inverses, trigonometric identities.
Prerequisite(s): A mathematics SAT score of 570, departmental placement or MTH 100 with a grade of C or higher.

NCT 012 Navigating Rider 0 Credits

PHY 180 Astronomy 3 Credits
Examines mankind's quest to understand the origin and form of the universe. Emphasis on the ideas of modern cosmology and their impact on our changing perception of our place in the universe, making use of information gleaned by simply looking at the night sky as well as post Apollo-era views of the solar system and the evolving universe as a whole.

PSY 100 Introduction to Psychology 3 Credits
This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

SPE 300 Inclusive Practices for General Education Teachers 3 Credits
This course is designed to introduce preservice general education teachers students to special education and the inclusive classroom. Students will explore current issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours. Prereqisite(s): EDU 106 and EDU 206. A cumulative gpa of 2.75 is required.

SST 300 Historical & Contemporary Issues in the Social Studies 3 Credits
This course is designed to provide education and non-education majors a comprehensive introduction to, and understanding of, social studies knowledge. This knowledge covers a broad array of academic disciplines, including American/World History, Government and Politics, Geography, Economics, and the various behavioral sciences. The course is aimed at engendering a theoretical grasp of the essential elements of these disciplines, as well as a practical understanding of how the content areas exist in both human society and contemporary policies/issues.

TEC 207 Social Media for Education 3 Credits
Social Media for Education will introduce students to the structure and culture of social media and how social networking applies to the educational environment. This three-credit course will foster a deep understanding of how social media in education can benefit students, teachers, administrators, staff, and stakeholders.

TEC 308 Digital Tools for Teaching 3 Credits
Designed to enable the student to develop instructional presentations utilizing the advantages of multimedia technology. Each student will be required to create a multimedia portfolio that contains information presentations, cumulative records, presenter notes, work samples, photo library, video animation, and audio narration. Cooperative learning strategies will be utilized throughout the course. Developmental/ reflective strategies will include self-reflection, peer feedback, and interaction with the instructor in class and via E-mail. Expertise will be developed as the course progresses.

English

Program Overview

English majors at Rider develop creativity and skills in language, writing, analysis, and critical thinking by taking literature, writing, and cinema courses. English majors receive support from devoted faculty who help them develop their talents and skills as they learn to write intelligently and persuasively, to read with pleasure and understanding, and to strengthen the powers of their imaginations.

On the pragmatic level, employers actively seek employees with critical thinking and writing skills. English majors go on to be authors, editors, journalists, teachers, professors, librarians, executives, and lawyers. They work in publishing, media, public relations, and other areas. Graduates of the English Department have published poetry, fiction, plays, and screenplays.

More than just a curriculum, we sponsor social gatherings, networking opportunities, a speaker series, a literary magazine, poetry and fiction readings, film screenings, a newsletter, and two English Clubs, including an English SGA organization and Sigma Tau Delta Honor Society.

Curriculum Overview

English majors can focus their studies in the literature concentration or the writing concentration. Both concentrations offer substantial grounding in the rich heritage of world literature and in the cultural diversity of contemporary life. The cinema studies concentration is also an option for English majors, if they wish to combine a focus on film analysis with a grounding in literary studies.

Literature Concentration

Students who are primarily interested in literature can choose from a wide variety of courses and subjects ranging from the Anglo-Saxon epic, *Beowulf*, to poets and novelists of the 21st Century, from 19th-century American slave narratives to dramatic and fictional works by Shakespeare, Austen, Woolf, and Hurston.

Writing Concentration

Those who want to primarily develop their writing can choose a concentration offering intensive instruction in many kinds of writing, including creative writing (fiction, nonfiction, playwriting, and poetry), as well as publishing and professional writing.

Cinema Studies Concentration

Those who are drawn to film might choose a concentration in cinema studies and enroll in a variety of classes on film analysis, history, and theory, courses which also emphasize interpretive and writing skills.

Honors Program in English

Qualified majors may apply for honors in their senior year. A student must have a 3.25 cumulative average and a 3.5 average in English. Upon approval from the Department of English, a candidate for honors enrolls in ENG 497 Advanced Study, writes a thesis, and submits it for departmental approval. The student must achieve a course grade of "B+" or better to graduate with honors in English.

Degree Offered

- B.A. in English

English Major Requirements

All declared English majors should take the departmental gateway courses as prerequisites to upper-level major courses. The gateway courses should be taken in the sophomore year. All transfers into the major must take the gateway courses in the first two semesters after their transfer. (Transfer students may take the gateway courses concurrently with upper-level major courses.)

Majors must receive a "C-" or above in each of the gateway courses to continue in the major. Those who receive a "C" or "C-" in any gateway course must meet with the individual professor teaching that course to discuss their academic progress. Majors who receive a "D" or below in any gateway course must repeat the course and meet with the professor teaching that course. Gateway courses may be repeated only once in order to achieve a grade of "C-" or above. (The repeated course may be taken concurrently with other major courses.)

- Requirements for the Literature Concentration (p. 210)
- Requirements for the Writing Concentration (p. 211)
- Requirements for the Cinema Studies Concentration (p. 212)

Requirements for the Literature Concentration

ENG 312	Creative Writing: Screenwriting [3]	
or FMS 286	Writing Short Screenplays for Digital Cinema	
FMS 342	Artists of the Cinema	
AMS 215	Alfred Hitchcock in America	
FRE 422	Cultural Expression in French Film and Television	
LIT 322	German Literature & Film in English Translation	
SPA 412	Theater and Film of the Hispanic World (knowledge of Spanish language required)	
SPA 426	Latin American/Latino Film and Fiction	
Elective Honors Capstone		**3**
ENG 484	Seminar in Cinema Studies	
ENG 490	Independent Study: Research and Creative Expression [4]	
ENG 491	Internship in Writing and Publishing [2]	
Total Credits		**39**

[1] Special Topics in any given semester may be approved by the Department of English to fulfill course requirements within the concentration.

[2] **English majors concentrating in cinema studies may also take:**

- ENG 354 - ENG 361 to fulfill course requirements in the category designated as appropriate by the English Department at the time such courses are offered;
- ENG 490;
- ENG 491 with permission.

[3] Students may choose to take either ENG 312 or FMS 286.

[4] The Independent Research and Study must be applicable to Cinema Studies and could result in a major research paper, a full-length screenplay, or a short film production project, including a screenplay authored by the student.

English Minor Requirements

All declared English minors should take the departmental gateway courses as prerequisites to upper-level minor courses. The gateway courses should be taken in the sophomore year. All transfers into the minor should take the gateway courses in the first two semesters after their transfer. (Transfer students may take the gateway courses concurrently with upper-level minor courses.)

Minors must receive a "C-" or above in each of the gateway courses to continue in the minor. Those who receive a "C" or "C-" in any gateway course must meet with the individual professor teaching that course to discuss their academic progress. Minors who receive a "D" or below in any gateway course must repeat the course and meet with the professor teaching that course. Gateway courses may be repeated only once in order to achieve a grade of "C-" or above. (The repeated course may be taken concurrently with other major courses.)

- Requirements for the Minor with a Concentration in Literature (p. 212)
- Requirements for the Minor with a Concentration in Writing (p. 213)
- Requirements for the Minor with a Concentration in Cinema Studies (p. 213)

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

[2] Literature general education requirement included in the major.

Courses and Descriptions

ENG 205 Understanding Literature 3 Credits
The novel, the short story, drama, and poetry are studied, with a view to the insights to be gained from literature. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 206 Introduction to Creative Writing 3 Credits
A workshop that introduces students to basic conventions and techniques of creative writing. Students will read and study published writing in multiple genres, such as short fiction, drama, poetry, and creative nonfiction, and write and revise their own creative pieces.

ENG 208 Arthurian Legends in Literature 3 Credits
The legends attached to King Arthur and the Knights of the Round Table have become cultural touchstones in England and the United States. This survey of medieval to contemporary Arthurian literature examines the legends and their written versions within their respective cultural, historical, philosophical and aesthetic contexts.This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 210 Major American Authors 3 Credits
An introductory course focusing on major American poets, novelists, essayists, and playwrights. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 211 Major British Authors 3 Credits
An introductory course focusing on major British poets, novelists, essayists, and playwrights. Students will learn to understand, interpret, and evaluate literary works.This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 213 Literature and Mythology 3 Credits
The interrelationships that exist between literary works and folklore, ritual, and religious scriptures and beliefs are explored. The primary emphasis is on analyzing the presence of mythic patterns in specific literary works; the secondary emphasis is on theories of mythology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 214 Monsters in Literature 3 Credits
This course examines various texts on the topic of monsters. Students read and watch films, and explore the answers to the following: Who are they? Undead, alien, satanic, outcast, hidden, hostile, tragic. Where are they? Crossroads, arctic wastes, moors, abandoned buildings, forests, outer reaches, inside. What do they want? Revenge, bodies, lives, escape, life, contact, humanity. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 215 Satire and Comedy 3 Credits
Explores these two related modes of literature with the primary emphasis on satire. Possible readings include works by Euripedes, Jonson, Shakespeare, Moliere, Voltaire, Pope, Swift, Dickens, Twain, Wilde, Waugh, Orwell, and Heller.This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 217 Introduction To Shakespeare 3 Credits
Students in this course study Shakespearean drama on an introductory level through close reading, analysis, and discussion of selected plays. They learn the relevance and importance of Shakespeare's themes, characterizations, and imagery. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 218 Literature and the Environment 3 Credits
Students examine literature on important environmental issues, such as climate change, pollution, dams, oil pipelines, and nuclear energy. The class focuses on how literature, which may include fiction, poetry, drama, and essays, helps readers understand and grapple with these complex global challenges.

ENG 219 Literature and Violence 3 Credits
This course will examine and critique themes of violence that have become a pervasive and recurring artistic thread in classic literary texts. Through careful, close textual readings and critical analyses of thematically selected texts that contain multiple artistic representations of violence in varied literary genres, students will explore literary violence as a possible metaphor for understanding dimensions of power, control and dominance. In analytical studies of thematically selected texts, students will gain new insights and critical perspectives on modern American society and the social causes and ills of violence. Students will delve into the root, cause and meaning of violence and they will further grow to understand why and how violence still maintains a pervasive presence in their daily lives and in the very literature they read. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 220 Literature & Society 3 Credits
Literature is examined, emphasizing human behavior as it relates to such social phenomena as war, alienation, social disorganization, injustice, and poverty. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 221 Literature and Psychology 3 Credits
Students will study Freudian and other psychoanalytical concepts as they appear in literature, plus psychological patterns of behavior such as aggression, frustration, and submission, that have been utilized by creative literary artists to expand the reader's understanding of the human experience. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 222 Crime and Literature 3 Credits
This introductory course focuses on representations of crime in novels and short stories. The primary goal of this course is to equip you with the basic tools you need to interpret fiction. Examining how narrative elements such as plot, character, point of view, and setting function in literature will enable you to analyze, not just comprehend and summarize, fiction. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 224 Science Fiction 3 Credits
This course is designed to introduce students to science fiction, its major themes and preoccupations, as well as some of its significant authors and genres. It has been argued that science fiction or "speculative" fiction represents a viable way to make sense of our everyday world. Our primary focus, therefore, will be on how these texts--written and visual--help us understand our culture and ourselves through encounters with alien and unfamiliar worlds, species, and technology. By the end of the course, students are expected to be able to critically engage with science fiction, and to identify its broad cultural impact. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 226 Introduction to Film 3 Credits
Focuses on various cinematic techniques used to develop underlying thematic and symbolic concepts and to shape viewer response. Students will analyze classical and contemporary features for their masterful use of visual language.

ENG 228 Black American Lit 3 Credits
A survey of writings by black Americans, presented historically from early slave narratives through emancipation, reconstruction, the Harlem Renaissance, and literature from the 1930s to the present. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 229 Multi-Ethnic Literature in America 3 Credits
Surveys the literature of various ethnic groups including African Americans, American Indians, Asian Americans, Hispanic Americans, Jewish Americans and European Americans. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 230 Women In Literature 3 Credits
A range of literary presentations of the female experience and of the conditions of women's lives is explored. These works are placed in historical and social contexts in order to see behind and beyond traditional literary conventions. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 236 Applied Grammar & Syntax 3 Credits
This course offers a review of the essential elements of English grammar and syntax and fosters understanding of how these elements work in notable argumentative and expository writing as well as in the student's own compositions. Focus is on both expert reading and effective writing. Changing attitudes toward usage, including influence of digital media on language use, are discussed. May be taken as preparation for, or independently of ENG 336, which addresses grammar, syntax, and style at a more advanced level.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 240 Contemporary Literary Lenses 3 Credits
This class teaches students to read literary and other cultural texts through a range of lenses including psychoanalysis, theories of gender and sexuality, social class and ideology, and race and ethnicity. Required of all English literature and writing majors, and literature minors.

ENG 245 Creativity 3 Credits
This course is an introduction to the history of literary creativity and the related topics of invention, genius, imagination, and originality. It examines theories of literary creativity throughout history from ancient ideas about the origins of inventiveness to recent theories. It looks at select works in English and other sources, and it looks at the subject of creativity in poetic, prose, and dramatic works.
Prerequisite(s): English Literature majors should take all Gateway Courses before they take 300- and 400- level courses.

ENG 250 Literary History I 3 Credits
Surveys British literature beginning with the old English epic of Beowulf and ending in 1785. Students analyze diverse works of literature from different genres, movements, and periods while taking into account historical context. Students learn to analyze literature using formal strategies and terms, and to develop arguments about literature. All English majors and writing concentration minors must take this course. Literature and cinema studies concentration minors must take either ENG 250 or 251. Students are advised to take this course prior to upper-level English courses.

ENG 251 Literary History II 3 Credits
Surveys literature in English since 1785. Students analyze diverse works of literature from different genres, movements, and periods while taking into account historical context. Students learn to analyze literature using formal strategies and terms, and to develop arguments about literature. All English majors and writing concentration minors must take this course. Literature and cinema studies concentration minors must take either ENG 250 or 251. Students are advised to take this course prior to upper-level English courses..
Prerequisite(s): ENG 250 or permission of the instructor or chairperson.

ENG 270 Introduction to Poetry 3 Credits
This course introduces students to diverse poets and poetic forms. Students will learn to appreciate a wide range of poetic voices and to situate them within their cultural context. Particular attention will be paid to formal innovations and the evolution of poetic forms across the globe. Our aim is to achieve a richer understanding of poetry in its varied modes of expression. The course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 275 Posthumanism: Bodies and Technology in Literature 3 Credits
This course explores the concept of posthumanism in speculative and futuristic literature. Who counts as human? How do advances in science and technology change what it means to be human? How much can we change our bodies before we stop being human? Categories of posthumanism that may be explored include virtual reality, cybercultures, and bodily transcendence; cyborgs; body modification, duplication, and replacement; cloning; genetic engineering; and postapocalyptic/ecocritical narratives.

ENG 280 Special Topics in Literature 3 Credits
Uses literary works to achieve insights into different areas of human experience. Topics change annually as announced by the English department.

ENG 281 Global Film History: Origins to 1960 3 Credits
Examines major technological and aesthetic developments in both American and international cinema of the period, with an emphasis on global cinema. From silent comedy and melodrama to German Expressionism and Soviet activist cinema; from French poetic realism and Italian Neo-realism to Hollywood sound cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. ENG 281 is crosslisted with FMS 250 and this course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

ENG 282 Global Film History: 1961 to Present 3 Credits
Examines major technological, industrial and aesthetic developments in both American and international cinema of the period. From the decline of the studio system and the emergence of the 'New Hollywood' to the digital revolution; from the renaissance in Western and Eastern European cinemas to Latin American, Asian, and Middle Eastern cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. ENG 282 is crosslisted with FMS 251 and fulfills the general education global perspectives requirement.

ENG 284 Language of Film Analysis 3 Credits
Provides students with the fundamentals necessary for achieving beginning proficiency in methods of cinema studies scholarship. The course provides an in-depth introduction to concepts of film analysis, theory, and history, as well as to the field of cinema studies as an academic discipline. Through close analysis of selected films and readings, students will examine the various and complex ways in which formal elements shape meaning. Students also will study key concepts in film theory, applying these concepts as a further means of understanding the ways in which film positions viewers and mediates ideology. Required of all English majors and minors with a cinema studies concentration. ENG 284 is crosslisted with FMS 284.

ENG 285 American Film History: Origins to 1960 3 Credits
Examines major technological and aesthetic developments in American cinema as it grew from the days of one-reel silent shorts exhibited in storefront theaters through the days of studio productions exhibited in lavish picture palaces and featuring iconic stars the system manufactured and promoted. From the inception of sound and color, to the later development of lightweight equipment that freed filmmakers from the confines of the studio, from the “golden age” to the gradual decline of the Hollywood studio system in the 1950s, we will study the lasting genres that grew out of the system, the filmmakers who flourished and those who rebelled against the system, and the ground-breaking films that established the American film industry as a dominant force within the world. ENG 285 is crosslisted with FMS 252.

ENG 286 American Film History: 1961 to Present 3 Credits
Examines the transitions of Hollywood in the post-studio era— the rise of the 1960's-1970s New Hollywood and its ground-breaking films, the rise of the blockbuster as an industry standard; the responses of independent filmmakers and the avant-garde to blockbuster dominance; the transition from the Production Code to the ratings system, the move back to studio-owned theaters, and the emergence of digital cinema and CGI. We will look at how genres are being redefined, how major filmmakers are re-shaping their work to fit 21st century demands, how "gaming," YouTube, and other media sources are altering the very definition of cinema.

ENG 290 The Short Story 3 Credits
Presents the development of the short story from the 19th century to the present with an emphasis on the techniques of plot, setting, characterization, theme, and point of view. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 295 Human Relationships in Literature (HONORS) 3 Credits
Through in-depth analysis of significant pairs of literary works from a variety of time periods, students in this honors course will study the dynamics of human relationships as they are presented in literature. Emphasis will be on portrayal of interpersonal relationships as inflected by conventions, constraints, and taboos. Social and psychological theories will complement esthetic and formal analysis of fiction, drama, poetry, and film. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.
Prerequisite(s): 3.3 GPA.

ENG 303 Creative Writing: Poetry 3 Credits
A workshop analyzing the techniques of poetic expression, with a focus on the student's original experiments in traditional and contemporary verse forms.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 304 Creative Writing: Fiction 3 Credits
Students write original fiction and analyze the techniques of writing fiction in discussion of both their own drafts and published examples of the form.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 305 Creative Writing: Nonfiction 3 Credits
A workshop in Creative Nonfiction (aka Literary Nonfiction or Narrative Nonfiction, abbreviated CNF) in which students will write and read different forms of memoir and essay, including Personal Essay, Lyric Essay, Travel Writing, Oral History, and Personal Profiles. Creative Nonfiction (CNF) tells true stories using the literary techniques of fiction-writing, such as building dramatic scenes, establishing suspense, and developing a narrative sequence of events, or plot. CNF employs vivid sensory detail and builds characters and scenes to enhance the reader's experience of the story. Challenging the traditional journalist's stance of objectivity and emotional distance from her topics, CNF writers often put themselves into their stories to create a voice of reflection. We'll talk about what types of creative license CNF gives writers, and also about the ethics of storytelling, especially when your story's characters are real, living people.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 306 Creative Writing: Drama 3 Credits
Examines cultural developments in the United States from the late 19th century to the present. Topics include popular culture, intellectual history, gender history, literary history, film, institutions like museums and department stores, subcultures and countercultures, popular commemorations like World's Fairs, and political culture. Some of the largest trends explored include the development of the modern culture of consumption, the urban landscape, and the polarization of cultural values.

ENG 311 Creative Writing: Playwriting 3 Credits
A workshop teaching and analyzing how students write for the stage that pays particular attention to the demands of the genre. Through reading and writing assignments, students will discuss and analyze the development of their own dramatic scripts for theatrical performance. A portfolio of revisions will serve as a final for the course.

ENG 312 Creative Writing: Screenwriting 3 Credits
A workshop teaching and analyzing how students write for the screen, both television and film, that pays particular attention to the demands of the genre. Through reading and writing assignments, students will discuss and analyze the development of their own dramatic scripts for production. A portfolio of revisions will serve as a final for the course.

ENG 313 Creative Writing: Experimental Writing 3 Credits
A creative writing workshop dedicated to developing a wider range of literary techniques. For the purposes of this course, Experimental Writing is defined as writing that departs -- in form, structure, or style -- from the conventions of literary realism. Students will demonstrate proficiency in writing and reading experimental fiction, nonfiction, and poetry, with an emphasis on experimental narrative techniques such as metafiction, magic realism, the unreliable narrator, multi-genre and hybrid forms (works that blur the lines between poetry and prose, for example), nonlinear storytelling, fragmentation, and poetic techniques such as found text and readymades, self-imposed constraints, and the collage or mashup.

ENG 315 Topics in Specialized Writing 3 Credits
A workshop in which students will write on specialized topics chosen by the instructor.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 316 Theories of Writing & Tutoring 3 Credits
A workshop on writing and tutoring theory for students interested in becoming writing tutors or teachers.
Prerequisite(s): minimum GPA 3.0, sophomore standing, and permission of the instructor.

ENG 318 Food Writing 3 Credits
Food Writing is a thematically based course in essay writing. It develops students' ability to write effective informal prose while also extending their knowledge about food sources, preparation, and consumption. They learn through readings and exercises, however, that food writing is about more than food. It encompasses the pleasures of the table, history, culture, science, and politics.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 320 Editing for Literary Publishing 3 Credits
This course introduces students to the process of publishing literary magazines and books. Student will learn all aspects of publishing from solicitation of manuscripts to the production of copy. Specific skills will include copyediting, proofreading, and layout.

ENG 321 Business and Professional Contexts 3 Credits
Students practice writing effectively to achieve specific purposes in typical business and professional workplace environments. Genres include various kinds of internal and external communication, including print and social media, for a range of audiences.
Prerequisite(s): CMP 125 or COM 203 or BHP 150 or permission of instructor.

ENG 322 Grant Proposals, Fundraising and Development 3 Credits
Students employ their analytical and writing skills to research and write grants for non-profit organizations in their local or regional communities. Fundraising and development activities on behalf of area organizations introduce them to career opportunities in this growing field.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150 or permission of instructor.

ENG 323 Reviewing and Publishing 3 Credits
Students learn to write arts and literary criticism through studying the work of prominent critics in literature, theatre, film, dance, visual arts, and music. Students learn how to market themselves as potential reviewers for print and online publications.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150 or permission of instructor.

ENG 324 Writing for Online Audiences 3 Credits
This course will help students adapt their writing to online environments. A writing- intensive course grounded in rhetorical principles, it focuses upon planning, writing and producing online texts distributed entirely through virtual portals. Genres include E-mail, instant messages, text messages, blogs, wikis, workplace social-media, and online team collaborations.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150 or permission of instructor.

ENG 325 Jobs in Book Publishing 3 Credits
Students will practice the forms of writing used by literary agents and publishing professionals working in acquisitions, editorial, and production at trade, academic, and small literary presses. These forms may include the query letter, book proposal, reader's report, and marketing plan.
Prerequisite(s): Completion of composition requirements or permission of instructor.

ENG 326 Editing for Academic Publishing 3 Credits
The course will provide an overview of academic publishing with an emphasis on peer-reviewed scholarly journals. Students will learn firsthand the process of publishing a scholarly journal, from soliciting manuscripts to laying out copy. Assignments may include mastering the standard system of proofreading marks; copyediting, fact-checking and source-checking manuscripts; and correcting page proofs. Students will learn about style sheets, style manuals and reference books; document management; and professional communication standards for querying authors and reviewers.
Prerequisite(s): completion of composition requirements (CMP 125, CMP 203, or BHP 150 with a grade of C) or permission of instructor.

ENG 331 Fantasy and Fable in Medieval Literature 3 Credits
A study of monsters, fairies, magical women, green men, and more in medieval literature. From divine to bawdy, the stories and lyrics cover diverse themes and styles.

ENG 332 British Literature, 20th-Century to Present 3 Credits
A seminar on literature in the United Kingdom from 1900 to the present, emphasizing formal experiments as well as historical contexts, and including such writers as Joyce, Woolf, Beckett, Rhys, Eliot, and Ishiguro.

ENG 333 16th-Century Literature 3 Credits
A seminar on Renaissance literature including such writers as More, Wyatt, Surrey, Spenser, Sidney, Shakespeare, and Marlowe.

ENG 335 17th-Century Literature 3 Credits
A seminar on literature in England from 1600 to 1660, including such writers as Donne, Jonson, Browne, Herbert, and Marvell.

ENG 336 Grammar and Style 3 Credits
By building a comprehensive knowledge of the conventions of English grammar, punctuation and syntax, students will learn how to analyze the way words, phrases, sentences, and paragraphs work in expert writing, and they will apply this knowledge to their own writing. Emphasis is on argument, exposition, and analysis.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 337 Global Literature 3 Credits
A study of the recent literature, in English, of one or more writers whose cultural identification is with one of the former colonies of the British Empire, as it was defined at the beginning of the 20th century. Literature in the English language, written by authors of African, Caribbean, Pacific Island, East Asian, or South Asian cultures may be included.

ENG 340 Restoration & 18th Century Literature 3 Credits
An exploration of literature in England from 1660 to 1800, including such writers as Astell, Pope, Finch, Swift, Defoe, Fielding, Johnson, and Wollstonecraft.

ENG 344 Gods and Monsters: Biblical and Classical Influence in Literature 3 Credits
This course surveys biblical and classical influences on western literature and beyond, analyzing adaptations of seminal texts with special attention to gender, race, and sexuality. We will read selections from the Old and New Testaments, Homer, Sophocles, Virgil, Ovid, and Dante (to name a few) as well as adaptations of that material by popular writers, artists, and musicians.

ENG 345 Romantic Literature 3 Credits
A seminar on literature in England from 1780-1830, emphasizing a close study of the poetry of Blake, Wordsworth, Coleridge, Shelley, Byron, and Keats, as well as important novelists and female poets of the period.

ENG 346 Victorian Literature,1830-1900 3 Credits
A seminar on literature in England from 1830 to 1900, emphasizing close study of the literary culture, including such writers as Dickens, Browning, Mill, and Ruskin.

ENG 347 20th-Century British Literature 3 Credits
A seminar on literature in the United Kingdom from 1900 to 1960, emphasizing formal experiments as well as historical contexts, and including such writers as Joyce, Woolf, Beckett, Rhys, Delaney, and Eliot.

ENG 348 Contemporary British Literature 3 Credits
A study of contemporary literature written in English after 1945, in the U.K. and elsewhere, by writers of British, Irish, Scots, Welsh, and other cultural traditions. Poetry, fiction, literary essays, and drama will be included.

ENG 350 Sex and Sin in Early American Literature 3 Credits
A seminar on literature in the United States from its beginnings to 1800, emphasizing the changing and conflicted nature of religious beliefs and sexual identities in Early America. Students will read and analyze diverse literary genres including diaries, letters, essays, novels, short stories, poems, and sermons.

ENG 351 19th-Century American Literature 3 Credits
A seminar on literature in the United States from 1800 to 1900, emphasizing literary genres and the definition of an American literature as distinct from English literature.

ENG 353 Contemporary American Literature 3 Credits
A seminar on American literature from 1945 to the present.

ENG 354 Selected Topics in English 3 Credits
Exploration of special topics, themes or methodologies in English. This course may be repeated for credit on different topics.

ENG 355 Selected Topics in English 3 Credits
Exploration of special topics, themes or methodologies in English. This course may be repeated for credit on different topics.

ENG 356 Selected Topics in English 3 Credits
Exploration of special topics, themes or methodologies in English. This course may be repeated for credit on different topics.

ENG 357 American Literature, 20th century to Present 3 Credits
"A seminar on American literature from 1900 to the present, including such writers as O'Neill, Hemingway, Faulkner, Richard Wright, Stevens, Moore, and Williams, and Morrison.".

ENG 361 Selected Topics in English 3 Credits
Exploration of special topics, themes or methodologies in English. This course may be repeated for credit on different topics.

ENG 362 The Novel 3 Credits
A close reading of novels from various historical periods and cultures.

ENG 363 The Drama 3 Credits
A close reading of drama, with attention to cultural contexts and the genres of tragedy and comedy.

ENG 364 The Poem 3 Credits
A close reading of poetry, with attention to historical periods and poetic genres.

ENG 365 Short Fiction 3 Credits
A close reading of short fiction from a variety of cultures, with attention to the various genres of short fiction: short-short, short story, long story, and novella.

ENG 366 Black and Multi-Ethnic Literature 3 Credits
A Survey of the literary writings of selected writers of Black and Multi-Ethnic America. Writers may include Zora Neale Hurston, Dorothy West, Maxine Hong Kingston, Anzia Yezierska, Louise Erdrich, Don Lee and Amy Tan.

ENG 371 Classics of Children's Literature 3 Credits
An analytic study of classic and contemporary literature for children. Students will be introduced to a variety of critical approaches, including psychoanalytic, social/historical and feminist. The course may be of particular interest, but is not restricted, to students majoring in education or psychology.

ENG 372 Children's Literature: The Adolescent Experience 3 Credits
A study of enduring literature examines how exemplary writers chronicle the challenges of growing up. Texts may include influential Young Adult fiction, classics such as The Catcher in the Rye and To Kill a Mockingbird, and contemporary fiction by important writers who focus on the relevant themes.

ENG 375 Literature and Sexuality 3 Credits
The study and application of theories of gender and sexuality in various periods of British and/or American literature. Possible course topics include the literature of AIDS, the literary history of sexuality, Gothic literature and sexuality, colonialism and desire, and sensibility and sexuality in the later 18th century.

ENG 381 Studies in Film Genre 3 Credits
Provides an in-depth examination of a variety of film genres (such as the gangster film, the western, the musical, the screwball comedy, the science fiction film, and the horror film, among others), to be examined through the perspective of film genre theory. Through close analysis of selected films and readings, students will define the aesthetic and thematic patterns characterizing specific genres, and will trace the development of those genres within the dual contexts of the film industry and cultural ideology. Note: This course is cross-listed as FMS 381. Although students may not get credit for both ENG 381 and FMS 381 in a single semester, they may repeat this course in future semesters, given that genres studied will rotate.

ENG 382 Comparative Film Directors 3 Credits
Provides an in-depth comparative study of major American, international, independent and avant-garde filmmakers. Through close analysis of selected films and readings, students will define the aesthetic and thematic patterns characterizing the work of individual directors and will draw meaningful comparisons among directors sharing similar aesthetic and thematic approaches. Students will trace the artistic development of directors through their careers, assessing individual works in the context of film criticism and theory, and in the context of multi-layered intertextual influences. Note: This course is cross-listed as FMS 382. Although students may not get credit for both ENG 381 and FMS 381 in a single semester, they may repeat this course in future semesters, given that directors studied will rotate.

ENG 383 Global Cinemas 3 Credits
Provides an in-depth study of the history and defining characteristics of national cinemas. Through close analysis of selected films and readings, students will examine the general movements within the history and development of various national cinemas, with attention to film historiography when considering how patterns are to be viewed in light of the culture, politics, and history of a particular producing nation. Further, students will trace and evaluate the influence of selected film movements and issues upon both cinematic and critical practice. Note: This course is cross-listed as FMS 383. Although students may not get credit for both ENG 381 and FMS 381 in a single semester, they may repeat this course in future semesters, given that national cinemas studied will rotate.

ENG 384 Film Adaptation 3 Credits
Provides an in-depth study of intertextual influence, as film enters into "dialogue" with various literary forms. Through close analysis of selected films and various forms of literature-including novels, graphic novels, short stories, plays, poetry, and journalism- students will study the aesthetic specificity of both film and literary genres and will analyze the transformative qualities at play when a work is adapted from page or stage to screen. Note: This course is cross-listed as FMS 384.

ENG 400 Creative Writing: Advanced Creative Writing 3 Credits
An advanced workshop in creative writing.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 405 Advanced Prose Style 3 Credits
Students analyze prose styles in English from the Renaissance to the present, focusing on the development of syntax, diction, and content. Students will be encouraged to imitate stylistic models and to develop their own prose style.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 407 Advanced Workplace Writing 3 Credits
Students will learn to adapt their writing skills to match specialized writing needs in publishing; corporate and personal finance; health, medicine, science, and technology. This course helps students build a portfolio and introduces them to corporate and freelance writing opportunities in our NJ/PA/NY area.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 411 History of the English Language 3 Credits
A seminar on the historical development of the English language, including phonetics, diversity, and present-day usage.

ENG 425 Seminar in Shakespeare 3 Credits
A seminar on Shakespearean drama and poetry.

ENG 435 Seminar In Milton 3 Credits
A seminar on Milton's lyric poetry, Samson Agonistes, Paradise Lost, and prose.

ENG 440 Seminar in Selected Major Authors 3 Credits
Seminar focusing on literature by one or two authors.

ENG 441 Seminar in American Literature 3 Credits
A seminar focusing on literature by one writer or by a small group of writers.

ENG 443 Seminar in Literary Modernism 3 Credits
A seminar on literature from 1900 to 1940, by British, Irish, and American writers such as Hardy, Yeats, Woolf, Joyce, Eliot, Williams, Hurston, and Faulkner.

ENG 445 Seminar in Black/Multi-Ethnic Literature 3 Credits
A seminar focusing on literature by black, Native American, Hispanic, Asian American and first-generation immigrant writers.

ENG 455 Seminar in Chaucer 3 Credits
An examination of Geoffrey Chaucer's writings from a number of critical perspectives, including close reading of the texts in Middle English, context and history, gender and sexuality, linguistics, and paleography and codicology.

ENG 465 James Joyce 3 Credits
This course will offer advanced English majors an in-depth exploration of the fiction of James Joyce with a particular focus on Joyce's novel Ulysses, considered one of the most (if not the most) important novels written in the twentieth century. Through a carefully scaffolded reading of Joyce's challenging work, students will explore the technical, aesthetic, and social innovations of modernist fiction and its contemporary and continuing cultural impact; recognize and articulate classical, biographical, and cultural influences on Joyce's work; and understand how editors, publishers, critics, and readers contribute to the production of seminal works of literature.

ENG 484 Seminar in Cinema Studies 3 Credits
Provides an in-depth study of areas central to discussion and debate in the field of cinema studies (such as film violence, cinema censorship, feminism and film, post-colonial cinema, African- American cinema, blaxploitation, The French New Wave, and Italian Neorealism, among others). Through close analysis of selected films and readings, students will examine the impact of specialized influential movements in film history and in film theory and criticism. Further, students will trace and evaluate the influence of selected film movements and issues upon both cinematic and critical practice. Note: This course is cross-listed as FMS 484. Although students may not get credit for both ENG 381 and FMS 381 in a single semester, they may repeat this course in future semesters, given that topics in the field of cinema studies will rotate.

ENG 485 Cinema Studies for Teachers 3 Credits
Designed for teachers and education students who (will) use film in their classrooms, ENG 485 provides approaches to teaching basic film analysis; approaches to helping students recognize the permeable boundaries between film, culture, and ideology; and approaches to understanding selected issues crucial in cinema studies as a field of scholarly study. The course provides teachers and prospective teachers with various methodological approaches and flexible uses of fiction and documentary films across the curriculum, whether to supplement or reinforce existing curricula or in stand-alone courses devoted to the study of film.

ENG 490 Independent Study: Research and Creative Expression 1-4 Credits
Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. To count toward the Certificate in Workplace Writing, an ENG 490 project must focus on workplace-related writing and be structured to include substantial formative feedback and revision. No more than one ENG 490 may be counted toward the certificate.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 491 Internship in Writing and Publishing 1-6 Credits
Students work under the supervision of English faculty and on-site supervisors to complete real- world assignments in writing, publishing, and cinema studies. Their performance is assessed by professional standards. A minimum of 48 hours of field work per credit is required. Students report to faculty and on-site supervisors regularly, submit all work required by on-site supervisors, maintain a log, and complete a final report. Three credits required to count toward English writing concentration. Restricted to juniors and seniors.

ENG 497 Advanced Study 3 Credits
Qualified majors may apply for honors in their senior year. Upon approval from the department of English, a candidate for honors enrolls in Advanced Study, writes a thesis, and submits it for departmental approval. The student must achieve a course grade of "B+" or better to be graduated with honors in English.
Prerequisite(s): senior standing; 3.5 GPA in English; 3.25 cumulative GPA.

Entrepreneurial Studies

Program Overview

Rider entrepreneurial studies (ES) students develop the skills and knowledge needed to become independent, innovative and informed entrepreneurs. Entrepreneurs look at the world differently, and see opportunity where others do not. The programs emphasize practical experience and holistic thinking, encourage students to develop their own

business concepts, and enhance analytical skills through experiential classes.

Entrepreneurs and small businesses are the engines for job creation and economic growth. Career opportunities for entrepreneurial students are as boundless as their creativity, imagination and work ethic. Many employers value students with an entrepreneurial attitude and their ability to think outside the box.

The ES program has two key learning objectives. First, encourage entrepreneurial thinking among students. This entails the ability to recognize, evaluate and pursue opportunities. Second, build professional skills relevant for starting and/or managing a venture. These include research, business planning, and understanding functional aspects of small business management and operations.

Student Learning Outcomes:

An Entrepreneurial Studies graduate will demonstrate the ability to:

- Evaluate entrepreneurial opportunities in the marketplace;
- Assess the business viability of an idea using secondary research;
- Use primary research to create a minimum viable product ;
- Articulate how to manage and grow an entrepreneurial venture;
- Create a business plan.

Curriculum Overview

Rider entrepreneurial studies students gain an education in business, plus the skills, attitude and experience needed to create new ventures or revitalize established/family businesses. They learn to identify and understand different types of start-up ventures, how to build and present business concepts, and how to evaluate sources of financing for start-up and other types of ventures.

The program's interdisciplinary format offers the option of double majoring with another business discipline, such as management, marketing, finance, sports management, information systems, and others.

Students also can choose the entrepreneurial studies minor, a four-course program that is paired with a major in the Norm Brodsky College of Business.

Footnotes

1. CIS 185 Information Systems Essentials, ENT 100 Innovation and Entrepreneurship, and CBA 110 Introduction to Business can be taken in the Fall or Spring of Year 1.
2. Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.
3. From the list of Entrepreneurial Studies Electives.
4. Students are required to take 6 credits of International Business Electives, one which can be fulfilled as a major course (ENT 375 International Entrepreneurship) and the other as an elective courses.
5. ENT 348 Small Business Management can taken in the Spring of Year 2 or Fall of Year 3.
6. BUS 400 Strategic Management and ENT 410 New Venture Planning can be taken in the Fall or Spring of Year 3.

Notes:

- This accelerated plan assumes no AP or other credits were transferred into Rider University.
- Business Honors students will have a different sequence.
- For the Leadership Elective, choose from LDP 200, LDP 220, LDP 398, MGT 355, or MGT 363.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., Internship, Co-op, Study Tour, study abroad, ENT 448, ECO 450.)

Courses and Descriptions

ENT 100 Innovation and Entrepreneurship 3 Credits
This course provides students with an introduction to creativity, innovation, and the concept of an entrepreneurial mindset. Students explore the excitement and challenges faced by individuals and businesses as they create, develop, and evaluate innovative business opportunities. We also discuss the probable paths of career development for students pursuing entrepreneurship. In this course, students evaluate their own views of innovation and entrepreneurship within the framework of entrepreneurial thinking, and putting this mindset into action.

ENT 210 Sports Entrepreneurship 3 Credits
Sports Entrepreneurship will introduce students to entrepreneurship in the sports industries as they explore opportunities and challenges for new ventures in this sector. Using an industry's business model, students will identify competitive advantages and understand what is required for startup success.

ENT 220 Inside The Entrepreneurial Mind 3 Credits
Inside the Entrepreneurial Mind is not just for Entrepreneurship majors! Whether you're starting your own business or want to succeed in running a division for another firm, you will need to adopt an entrepreneurial mindset. This mindset takes a holistic approach to running a business, realizes that failure is part of the journey and that resilience in overcoming obstacles are necessary skills for success. In this course, students will hear from entrepreneurs and industry leaders as they share their personal experiences, the challenges they've overcome and the paths they've taken to arrive at success in their businesses and careers. Through these entrepreneurial stories, students will be introduced to the skills and strategies that will help them overcome challenges in both their careers and personal lives. Available to undergraduate Sophomores, Juniors, and Seniors.

ENT 260 Family Business Management 3 Credits
This course is directed at understanding the family-owned and managed firm. Topics included are the strengths and weaknesses of a family firm, the dynamics of the family and business interactions, conflict resolution, succession planning and ownership transfer. The course will help individuals involved with a family firm, regardless if they are a family member.
Prerequisite(s): MGT 201 with a minimum grade of D.

ENT 335 Small Business Tax Planning 3 Credits
This course provides an understanding of the key tax issues faced by small businesses and their business implications. It also familiarizes prospective business owners with various tax filing requirements so that they can use the expertise of tax professionals more effectively.
Prerequisite(s): ACC 210.

ENT 348 Small Business Management 3 Credits
This course provides students with an introduction to ownership/management in the world of small business as well as an understanding of what is needed to start/buy/sell a small business. In addition, the course endeavors to help students move from a consumer orientation to a producer orientation, and to learn project management and research skills through participation in a hands-on project. The project has students investigate the market potential of an innovative business concept, and then use this research to evaluate the business concept as an entrepreneurial opportunity.

ENT 350 Entrepreneurial Finance 3 Credits
This course covers the techniques for acquiring financial resources as a firm advances through successive business stages: seed, start-up, struggling, growing, and stable. In addition, it examines recent trends in credit markets and the latest financial innovations as they impact the process of financing the venture's growth.
Prerequisite(s): FIN 300.

ENT 375 International Entrepreneurship 3 Credits
Students will learn how new or small ventures enter international markets. Requirements include developing a case about starting or running a venture in a single country of the student's choice.
Prerequisite(s): MGT 201 and junior standing.

ENT 399 Entrepreneurship Co-Op 6 Credits
This course provides students with a semester-long supervised employment with an entrepreneurial firm/organization. Students are required to maintain a journal, complete a reflection paper and are evaluated by the participating firm/organization. Eligible students are entrepreneurial studies juniors or seniors with a 3.0 GPA or better. Co-op credits count as free electives. Grading is on a pass/fail basis.
Prerequisite(s): ENT 348 or permission of program director.

ENT 410 New Venture Planning 3 Credits
This course will require students to select a business and prepare a complete new venture plan for it. This plan would identify the product and its target market, analyze its market potential, choose the location, scale of operation, layout, staffing, type of financing, estimate the revenues and profits, and present the income statement, balance sheet, and the cash flow projections.
Prerequisite(s): ENT 348 or permission of instructor.

ENT 420 Student Venture Experience 3 Credits
Students will start and run a small business while under the supervision and guidance of faculty. Students will take a business plan developed through New Venture Planning (ENT 410) and execute it. Students will experience the launch process and learn, hands on, how to adapt to the marketplace. Some businesses started in this class may also be eligible for seed venture funding from Rider.
Prerequisite(s): ENT 348, ENT 410, and permission of instructor.

ENT 444 Special Topics 3 Credits

ENT 448 Small Business Consulting Sem 3 Credits
This course utilizes student teams to assist existing small businesses in solving problems or researching opportunities. Students will spend the majority of time in the field utilizing an experiential learning approach. Weekly activity logs, proposal development, and project completion are required.
Prerequisite(s): Permission of Instructor.

ENT 490 Independent Research and Study 3-4 Credits
Topic to be approved by professor and program chairperson. Available to juniors and seniors.

ENT 491 Internship 3 Credits

Entrepreneurship Minor

Program Overview

Rider students wishing to take a minor in entrepreneurship will develop the skills and know-how they need to become independent, innovative and informed entrepreneurs. The minor emphasizes practical experience and holistic thinking, encourages students to develop their own business concepts, and enhances analytical skills through experiential classes.

For students in the arts, sciences, business, or education who may want to start or have a significant role in a business, based on their skills and talents, the minor in entrepreneurship can help you reach your dream.

Entrepreneurs and small businesses are the engines for job creation and economic growth. Career opportunities for entrepreneurship students are as boundless as their creativity, imagination and work ethic. Many employers value students with an entrepreneurial attitude and their ability to think outside the box.

The entrepreneurship minor has two key learning objectives. First, to encourage entrepreneurial thinking among students. This entails the

ability to recognize, evaluate and pursue opportunities. Second, to build professional skills relevant for starting and managing a venture. These include research, business planning, and understanding functional aspects of small business management and operation.

Rider entrepreneurship students gain an education in business, plus the skills, attitude and experience needed to create new ventures or revitalize established/family businesses. They learn to identify and understand different types of start-up ventures, how to build and present business concepts, and how to evaluate sources of financing for start-up and other types of ventures.

Environmental Sciences

Program Overview

Environmental Sciences students will acquire knowledge and skills applicable to a wide range of scientific careers to help resolve today's environmental challenges. Students will learn about important interdisciplinary topics including ecology, climate change, and earth system processes. Students will also participate in extensive field and laboratory work, exploring a rich diversity of upland, coastal, or marine environments through coursework and research with faculty. Depending on a student's interest, Environmental Sciences majors will choose either a Marine or Environmental Concentration. The program has a long track record of successfully preparing students for graduate school or professional career opportunities. Students also have the option of adding a Sustainability Studies minor to further address the interconnections between environmental issues with social and business perspectives.

Curriculum Overview

The Environmental Sciences program provides students with an interdisciplinary perspective by not only drawing on courses and faculty expertise from the Department of Earth and Chemical Sciences, but also from additional science courses in biology and physics leading to a broad foundation across the sciences.

Student Learning Outcomes

Graduates of the Environmental Sciences major will be able to:

1. Combine relevant data with scientific principles to compose an explanation of natural phenomena in environmental sciences.
2. Use physical, chemical, and biological characteristics to identify materials or organisms that form the foundation of the discipline.
3. Properly use technical equipment and associated techniques to collect, organize, and interpret field data.
4. Identify, find, evaluate, and use information to produce scientific reports, both written and orally, for scientific research and communication.

Honors Program in Environmental Sciences

Graduation with honors in Environmental Sciences is awarded in recognition of majors who have demonstrated outstanding academic ability. Eligibility requirements include a minimum GPA of 3.5 in courses required for the major and the satisfactory completion of a senior thesis or a three- or four-credit Independent Research and Study course related to their major. In addition, an honors candidate must maintain an overall minimum GPA of 3.0.

Degrees Offered

- B.S. in Environmental Sciences with Marine and Environmental Concentrations

- Minor in Environmental Sciences

Environmental Sciences Major Requirements

(67-69 credits)

Code	Title	Credits
Geological, Environmental, and Marine Sciences:		
Compete all of the following:		
ENV 100 & 100L	Introduction to Environmental Sciences and Introduction to Environmental Sciences Lab	4
ENV 200 & 200L	Statistical and Computer Applications in the Natural Sciences and Statistical and Computer Applications in the Natural Sciences Lab	4
GEO 100	Earth Systems Science	3
or GEO 113	Environmental Geology	
GEO 102	Earth Materials and Processes Lab	1
MAR 120	Oceanography	3
Biology:		**4**
Select one from the list below:		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab	
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	
Chemistry:		
Complete all of the following:		
CHE 120 & CHE 121	Principles of Chemistry and Principles of Chemistry Lab	4
CHE 122 & CHE 123	Intro to Chemical Systems and Quantitative Methods Lab	4
Mathematics:		
Select one from the following list: (also satisfies CAS core requirement)		4
MTH 105	Algebra and Trigonometry	
MTH 106	Precalculus	
MTH 210	Calculus I	
Physics:		
Complete all of the following:		
PHY 100 & 100L	Principles of Physics I and Principles of Physics I Lab	4
Select one of the two concentrations below:		
ENVIRONMENTAL CONCENTRATION		
Geological, Environmental, and Marine Sciences:		
ENV 205	Introduction to Geographic Information Systems	3
ENV 220	Weather and Climate Change	3
GEO 350	Soil and Surficial Processes	4
GEO 407	Hydrology and Water Resources	4
Biology:		
Select the BIO course that was not completed above to complete the introductory sequence.		4
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab	
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	
Chemistry:		
Select one of the following:		4
BCH 225 & 225L	Introduction to Organic and Biochemistry and Introduction to Organic & Biochemistry Lab	
CHE 211 & 211L	Organic Chemistry I and Organic Chemistry I Lab	
Ecology:		
Select one of the following:		4
BIO 350 & 350L	General Ecology and General Ecology Lab	
MAR 401 & 401L	Marine Ecology and Marine Ecology Lab	
Elective Courses:		
Select any two 200-level or higher GEMS courses not selected above. BIO 335 & BIO 335L may also be selected.		6-8
ENV 320 & 320L	Global Biogeochemistry and Global Biogeochemistry Lab	
ENV 340	Field Methods and Data Analysis	
GEO 306 & 306L	Sedimentology and Stratigraphy and Sedimentology and Stratigraphy Lab	
MAR 340	Marine Processes and Environments: Seminar	
MAR 410	Physical Oceanography	
BIO 335 & 335L	Plant Biology and Modern Plant Biology Lab	
MARINE CONCENTRATION		
Required Courses:		
BIO 272 & 272L	Intro to Marine Biology and Marine Biology Laboratory	4
ENV 320 & 320L	Global Biogeochemistry and Global Biogeochemistry Lab	4
GEO 306 & 306L	Sedimentology and Stratigraphy and Sedimentology and Stratigraphy Lab	4
MAR 121	Introductory Oceanography Lab	1
MAR 340	Marine Processes and Environments: Seminar	3

MAR 401 & 401L	Marine Ecology and Marine Ecology Lab	4
MAR 410	Physical Oceanography	3
Elective Courses:		**9-11**
Choose any three 200-level or higher GEMS courses not selected above. At least one course must be 3 credits. BIO 372 & BIO 372L may also be selected.		
ENV 205	Introduction to Geographic Information Systems	
ENV 220	Weather and Climate Change	
ENV 340	Field Methods and Data Analysis	
GEO 350 & 350L	Soil and Surficial Processes and Soil and Surficial Processes Lab	
GEO 407 & 407L	Hydrology and Water Resources and Hydrology and Water Resources Lab	
BIO 372 & 372L	Behavior of Marine Organisms: Evolutionary Approach and Behavior of Marine Organisms: Evolutionary Approach Lab	
Total Credits:		**67-69**

Suggested GenEd or Free-Elective Courses:
PHL 215, ENG 218, POL 329

Environmental Sciences Minor Requirements

(21-22 credits)

Students with an Environmental Sciences - Environmental concentration, Environmental Studies, or Earth Sciences majors may not select this minor.

Code	Title	Credits
Fundamental Courses		**14**
ENV 100 & 100L	Introduction to Environmental Sciences and Introduction to Environmental Sciences Lab	
ENV 205	Introduction to Geographic Information Systems	
ENV 220	Weather and Climate Change	
GEO 100	Earth Systems Science	
or GEO 113	Environmental Geology	
GEO 102	Earth Materials and Processes Lab	
Electives		**7-8**
Select two of the following; at least one must be a 300 or 400 level course:		
ENV 320 & 320L	Global Biogeochemistry and Global Biogeochemistry Lab [1]	
ENV 340	Field Methods and Data Analysis	
GEO 306 & 306L	Sedimentology and Stratigraphy and Sedimentology and Stratigraphy Lab	
GEO 350 & 350L	Soil and Surficial Processes and Soil and Surficial Processes Lab	
GEO 407 & 407L	Hydrology and Water Resources and Hydrology and Water Resources Lab [1]	
Total Credits		**21-22**

[1] This course has one or more prerequisites that must be completed in addition to the course required for this minor.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
CMP 120	Seminar in Writing and Rhetoric	3
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab	4
ENV 100 & 100L	Introduction to Environmental Sciences and Introduction to Environmental Sciences Lab	4
MTH 105	Algebra and Trigonometry [1]	4
	Semester Credit Hours	**15**
Spring Semester		
CMP 125	Seminar in Writing and Research	3
GEO 100	Earth Systems Science	3
GEO 102	Earth Materials and Processes Lab	1
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	4
Aesthetic Perspectives: Fine Arts		3
	Semester Credit Hours	**14**
Year 2		
Fall Semester		
CHE 120	Principles of Chemistry	3
CHE 121	Principles of Chemistry Lab	1
ENV 200 & 200L	Statistical and Computer Applications in the Natural Sciences and Statistical and Computer Applications in the Natural Sciences Lab	4
MAR 120	Oceanography	3
Foreign Language		3
	Semester Credit Hours	**14**
Spring Semester		
CHE 122	Intro to Chemical Systems	3
CHE 123	Quantitative Methods Lab	1
ENV 220	Weather and Climate Change	3
Social Perspectives		3
Aesthetic Perspectives: Literature		3
Foreign Language		3
	Semester Credit Hours	**16**
Year 3		
Fall Semester		
PHY 100	Principles of Physics I	3
PHY 100L	Principles of Physics I Lab	1

GEO 407 & 407L	Hydrology and Water Resources and Hydrology and Water Resources Lab	
BCH 225 & 225L	Introduction to Organic and Biochemistry and Introduction to Organic & Biochemistry Lab	4
Elective Credits [2]		8
	Semester Credit Hours	**16**
	Total Credit Hours for Graduation	**120-122**

Note: Natural and Physical Science core requirement included in major.

[1] For course placement information see https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing (https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing/)

[2] Please note that elective credits may be used to complete requirements in a second major or minor.

Courses and Descriptions

ENV 100 Introduction to Environmental Sciences 4 Credits
Examines how ecosystems function, with emphasis on the interactions between biological organisms and their physical environment, and the chemical processes that govern these interactions. The impact of human populations on natural ecosystems is investigated in detail using case studies from history and current events. The laboratory provides for hands-on experiences and/or short field trips to local sites for a better understanding of many of the concepts discussed. Weekday and weekend field trips may be required. Three hours of lecture and one three-hour lab per week. CLAS general education areas addressed: DP, SP, GP.
Corequisite(s): ENV 100L.

ENV 100L Introduction to Environmental Sciences Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): ENV 100.

ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits
This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.
Corequisite(s): ENV 200L.

ENV 200L Statistical and Computer Applications in the Natural Sciences Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): ENV 200.

ENV 205 Introduction to Geographic Information Systems 3 Credits
This course introduces the computer-based concepts and skills of Geographic Information Systems (GIS). It covers the basic GIS concepts, such as map characteristics and projections, spatial data models and analysis, and relational databases. It explores data sources, data quality, and metadata, as well as implementation and management of specific GIS projects. Hands-on experience with ArcGIS software is provided through a series of student exercises completed throughout the semester. Students will also be taught how to process both vector and raster data using ArcGIS software. The course is relevant for students from numerous disciplines in the natural sciences, social sciences, and business, which require the analysis and graphical representation of spatial data. Three hours of lecture per week.

ENV 220 Weather and Climate Change 3 Credits
This course introduces students to the concepts of weather and climate change. These concepts frame a continuum from short-term or daily changes in the atmosphere (meteorology) to those changes averaged over much longer periods of time (climatology). Students will learn the fundamentals of weather forecasting, the causes of natural variation in the Earth's climate, and the impact of human actions on the Earth's climate. Connections will be drawn to other current issues in the Earth system, including land use change, biodiversity, and pollution. Three hours of lecture per week.
Prerequisite(s): GEO 100 or GEO 113 or permission of instructor.

ENV 320 Global Biogeochemistry 4 Credits
This course introduces students to global biogeochemical processes in the earth system and their influences on marine and terrestrial ecosystems. With a focus on systems thinking and interdisciplinary science, students will learn about the interactions of the biosphere, lithosphere, hydrosphere and atmosphere through elemental cycling and energy transfers. The course extends from the origin of our planet to the modern earth system and considers the anthropogenic impacts of climate change and pollution on humans and other species. Students will analyze scientific data with examples in regulatory and research settings. Students will also gain first-hand experience with field methods including sampling ocean and freshwater using various techniques and equipment and interpreting chemical data. Field trips may be required for this course. Course
Prerequisites: GEO 100 or GEO 113; GEO 102; CHE 120 & 121.

ENV 320L Global Biogeochemistry Lab 0 Credits
This course introduces students to global biogeochemical processes in the earth system and their influences on marine and terrestrial ecosystems. With a focus on systems thinking and interdisciplinary science, students will learn about the interactions of the biosphere, lithosphere, hydrosphere and atmosphere through elemental cycling and energy transfers. The course extends from the origin of our planet to the modern earth system and considers the anthropogenic impacts of climate change and pollution on humans and other species. Students will analyze scientific data with examples in regulatory and research settings. Students will also gain first-hand experience with field methods including sampling ocean and freshwater using various techniques and equipment and interpreting chemical data. Field trips may be required for this course. Course
Prerequisites: GEO 100 or GEO 113; GEO 102; CHE 120 & 121.

ENV 340 Field Methods and Data Analysis 3 Credits
This course will provide students with practical experience in field methods and data analyses within environmental and marine sciences. The course will apply advanced scientific methods such as field-based exercises, GIS or coding analyses, statistical analyses, and database management. Students will also complete an independent or group project focused on a relevant topic. Local field trips during lab and potentially longer trips on weekends may be required. This course earns 3 Engaged Learning points in Civic and Community Engagement (CCE.)
Prerequisite(s): D or better in (MTH 105, or MTH 106, or MTH 210) and GEO 100, GEO 102, ENV 100, and MAR 120; or Permission of Instructor.

GEO 100 Earth Systems Science 3 Credits
Investigates the major global processes that occur on Earth. These processes can be grouped into four major systems: atmosphere, hydrosphere, lithosphere, and cosmosphere. Each system interacts with and affects the other systems creating, in a sense, a single Earth process. With this approach, the student will view the Earth as a whole, and understand that the many seemingly separate components that make up this planet are, in fact, a set of interacting processes, that operate in cycles through time, within a single global system. Three hours of lecture per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 102 Earth Materials and Processes Lab 1 Credits
This lab course introduces students to the origin, identification, and significance of geologic materials, processes, and landforms. Hands-on experiences with mineral and rock specimens, topographic and geologic maps, and GPS and other data collection techniques are emphasized, along with field trip and in-lab observations, measurements, and interpretations. One three-hour lab per week.
Prerequisite(s): concurrent enrollment in, or prior completion of, GEO 100 or GEO 113 is required.

GEO 113 Environmental Geology 3 Credits
Examines the fundamental premise that "society exists by geologic consent subject to change without notice" by studying a number of important global geologic processes and cycles, and the hazards and/or resources they present to individuals, societies, and the natural environment. Topics discussed include earthquakes, volcanism, stream flooding, coastal erosion, global climate change, and global water, soil, mineral, and energy resources. Cost/benefit considerations, hazard mitigation concepts, economic and political ramifications, and interactions among the lithosphere, hydrosphere, atmosphere, and biosphere also are presented. The course is designed to give non-science majors a deeper appreciation and understanding of the basic scientific concepts involved, as well as individual and societal connections to the global geologic environment, leading to better, more informed business, political, policy, and personal decisions. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 306 Sedimentology and Stratigraphy 4 Credits
The principles of weathering, erosion, transportation, and deposition of sediment are the focus of this course. Sediment characteristics are examined to identify the processes involved in transporting grains and the specific environment in which the grains were deposited. Students will learn how to collect, analyze, and interpret sedimentary data and how to interpret surface and subsurface stratigraphic data using various techniques, such as lithostratigraphic, biostratigraphic, and geophysical, correlations. Field trips will expose students to different sedimentary environments and provide opportunities for students to learn how to conduct fieldwork. Three hours of lecture and one three-hour lab per week. Weekend field trips may be required. Prerequisite(s): GEO 100.
Corequisite(s): GEO 306L.

GEO 306L Sedimentology and Stratigraphy Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): GEO 306.

GEO 350 Soil and Surficial Processes 4 Credits
This course examines the physical, chemical, hydrological, and biological aspects of soil and their relation to geomorphologic development. Specific topics include descriptions of soil texture and structures, soil classification, soil colloids, soil redox and pH, and their effect on vadose zone water chemistry. Soil genesis and erosion controls, microbiology/ecology, nutrient cycles, and modern soil pollution from sludge and pesticide applications, as well as domestic and industrial chemical spills, also are discussed. The lab portion of the course introduces the basic techniques of soil analysis, both physical and chemical, and field survey methods. Three hours of lecture and one three-hour lab per week. Prerequisite(s): GEO 100 or GEO 113, and GEO 102.
Corequisite(s): GEO 350L.

GEO 350L Soil and Surficial Processes Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): GEO 350.

GEO 407 Hydrology and Water Resources 4 Credits
This course introduces the principles that govern both surface water and groundwater flows that have applications to societal water needs. Surface water topics cover the basics of the hydrologic cycle, the processes of precipitation, evapotranspiration, runoff, and infiltration, and various factors affecting water supply and water quality issues in a modern watershed. Groundwater topics examine the principles that govern flow through a porous medium and the basics of well hydraulics under different pumping conditions that community development requires. Laboratory exercises will give students hands-on experience with the delineation of watersheds, analysis of precipitation data, and flow contaminant transport modeling. The field portion of the laboratory includes runoff and stream discharge measurements, as well as hydraulic conductivity estimations from both slug and pumping tests. Three hours of lecture and one three-hour lab per week. Prerequisite(s): GEO 100 or GEO 113, GEO 102, and MTH 105 or higher.
Corequisite(s): GEO 407L.

GEO 407L Hydrology and Water Resources Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): GEO 407.

MAR 410 Physical Oceanography 3 Credits
Introduction to the physical aspects and processes of the oceans and their influence on marine ecosystems and Earth processes. Topics include distribution of salinity and water temperature and their effect on water movement, the oceanic heat budget, atmospheric and oceanic interactions, ocean currents including surface and deep water circulation, waves, tides, and medium- to small-scale circulation features. Throughout the course, emphasis is placed on how these physical processes affect the biology and chemistry of the ocean. Three hours of lecture per week. Weekend field trips may be required.
Prerequisite(s): MAR 120.

BIO 115 Principles of Biology I 4 Credits
An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three- hour lab per week.
Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits
An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.
Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 116.

BIO 272 Intro to Marine Biology 4 Credits
Introduces students to the study of marine environments, emphasizing the diversity, ecology, and physiology of marine animals, algae, and plants. Aspects of the human impact on marine environments are also discussed.
Prerequisite(s): BIO 115 with a minimum grade of C, or BIO 116 with a minimum grade of C.

BIO 272L Marine Biology Laboratory 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Course
Prerequisite(s): BIO 115 or BIO 116.

BIO 335 Plant Biology 4 Credits
Biology of seed plants, including growth, development, and reproduction of flowering plants. Emphasis is placed on acclimation and adaptations demonstrating environmental influences on plant structure and function. Current literature involving molecular mechanisms of control will be discussed. Three hours of lecture and one three-hour lab per week. One Saturday field trip. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C.
Corequisite(s): BIO 335L.

BIO 335L Modern Plant Biology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C
Corequisite(s): BIO 335.

BIO 350 General Ecology 4 Credits
An investigation of the processes that regulate the distribution of plants and animals throughout the biosphere. Relationships among species and their interactions with the environment are stressed. Quantitative analyses of experimental results and current research in basic and applied ecology are discussed. Laboratory activities explore conceptual models using both field activities and computer simulations. Three hours of lecture and one three-hour lab per week. One Saturday field trip (laboratory time will be adjusted accordingly). Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C
Corequisite(s): BIO 350L.

BIO 350L General Ecology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Prerequisite(s): BIO 115 with a minimum grade of C and (BIO 116 with a minimum grade of C or BIO 117 with a minimum grade of C.

CHE 120 Principles of Chemistry 3 Credits
For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.
Corequisite(s): CHE 121.

CHE 121 Principles of Chemistry Lab 1 Credits
For students concurrently taking CHE 120. Experiments involve gravimetric, volumetric, and spectrophotometric quantitative analysis. One three-hour lab per week. Fall.

CHE 122 Intro to Chemical Systems 3 Credits
A continuation of CHE 120. For students majoring in the sciences but may be taken by others. Chemical systems in which the study of kinetics, thermodynamics, equilibrium, and radiochemistry are emphasized. Three hours of lecture per week. Prerequisite(s): CHE 120, MTH 105 or higher.
Corequisite(s): CHE 123.

CHE 123 Quantitative Methods Lab 1 Credits
Usually taken concurrently with CHE 122. Primarily for students majoring in the sciences. A number of quantitative classical and instrumental methods of analysis are used to determine thermodynamic properties and reaction mechanisms. One three-hour lab per week. Prerequisite(s): CHE 121.
Corequisite(s): CHE 122.

BCH 225 Introduction to Organic and Biochemistry 4 Credits
An introductory course describing the basic principles of organic chemistry and biochemistry as they relate to human metabolism and disease. The nature of the chemical structure and reactivity of organic functional groups such as alcohols, aldehydes, ketones, carboxylic acids and amines will be presented with biological processes in mind. The biochemistry of the macromolecules DNA, RNA, proteins, carbohydrates and lipids will be discussed leading to a discussion of some of the more important metabolic pathways. This course is intended for science majors who do not take the full two semester sequence of organic chemistry and two semesters of biochemistry and desire a background in biochemistry. Non-science major students who have had one semester of general chemistry and one semester of biology may also enroll in the course. Three hours of lecture and one three-hour lab per week. Prerequisite(s): (CHE 110 with a minimum grade of D and CHE 110L) or (CHE 122 with a minimum grade of D and CHE 123 with a minimum grade of D) and BIO 115 with a minimum grade of D
Corequisite(s): BCH 225L.

BCH 225L Introduction to Organic & Biochemistry Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (CHE 110 UG D and CHE 110L) or (CHE 122 UG D and CHE 123) and BIO 115.
Corequisite(s): BCH 225.

PHY 100 Principles of Physics I 3 Credits
Introductory noncalculus physics with applications for pre-professional, biology, and geological, environmental and marine sciences majors. Classical mechanics, energy, mechanical waves, fluid statics and dynamics, thermodynamics. Elements of modern physics are interwoven with those of classical physics from the beginning. Not open to chemistry, physics, or mathematics majors. Three hours of lecture per week. Prerequisite(s): MTH 105, MTH 210, MTH 211 or MTH 212.
Corequisite(s): PHY 100L.

PHY 100L Principles of Physics I Lab 1 Credits
For students concurrently taking PHY 100. One three-hour lab per week.
Corequisite(s): PHY 100.

AMS 304 Technology and Science in America 3 Credits
An overview of the development and impact of technology and science on American institutions. Topics include innovation, economic growth, science and its relation to technology, social theory, and the politics of science.

BHP 259 Honors Seminar: The Environment: a Conflict of Interest 3 Credits
Examines critical environmental issues such as global warming; food, water and energy resources; population trends; and global industrialization. Topics for context will include the origin of the elements, the origin of solar systems, and the origin of life as well as the basic principles of the current biotechnical revolution. Scientific understanding will be combined with knowledge about strategies for raising community awareness in order to (re)formulate public policy. In teams, students will be asked to define the problems; research available and prospective solutions; identify the technical, social, political, and economic constraints; and finally propose a workable strategy for making progress toward solutions.

ENG 218 Literature and the Environment 3 Credits
Students examine literature on important environmental issues, such as climate change, pollution, dams, oil pipelines, and nuclear energy. The class focuses on how literature, which may include fiction, poetry, drama, and essays, helps readers understand and grapple with these complex global challenges.

HIS 224 American Environmental History 3 Credits
Surveys the history of the North American environment from pre-Columbian times through the 20th century. Topics include Native American uses of the environment; the reshaping of ecosystems under European colonization; U.S. frontier expansion; the ecological impact of industrialization and urbanization; and the rise of the environmental movement.

IND 316 Nature's Business 3 Credits
This interdisciplinary, team-taught, experiential learning course brings together various science, liberal arts, and business perspectives in examining the relationships among biological, social, environmental, economic, geological, and political issues. Topics to be discussed and researched by students can include, but are not limited to, ecotourism, sustainable development, biodiversity, local and regional environmental and historical geology, cultural norms, and the legal and political systems of the country being visited. The study tour component of the course provides students with a first-hand opportunity to observe and record field data from settings outside of the United States and in their discipline of interest. Typically, there are approximately 12 hours of pre-trip lectures, seminars, and/or faculty/student presentations during the fall semester, an international study tour, 9-14 days in length, during January (exact dates and length depend on the international location), and approximately three hours of post-trip meetings, seminars, and student presentations during the spring semester. Students enroll in the course during the spring semester. Note: This course is cross-listed as CBA 316; Students may not get credit for both CBA 316 and IND 316. For Business students who take the course as CBA 316, the course will count as a business course. If taken as IND 316, the Business student will receive credit as a liberal arts and science course.
Prerequisite(s): Permission of Instructor.

PHL 215 Environmental Ethics 3 Credits
A comprehensive introduction to environmental ethics that examines the major theoretical approaches, including anthropocentric (human-centered), zoocentric or sentientist (animal-centered), and biocentric or ecocentric (nature-centered) value systems, as well as the most important critiques of these ethical approaches. We will examine and analyze several classical ethical theories that are particularly relevant to a study of contemporary environmental controversies. We will also address specific issues such as biodiversity and wilderness preservation; human use of animals as food, entertainment, and research subjects; environmental racism and toxic dumping; sustainable development, population and consumption. Students will analyze and discuss the ethical dimensions of several contemporary environmental controversies. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

POL 328 Environmental Politics 3 Credits
Environmental Politics examines how policymakers deal with the political challenges of unsustainable resource consumption, which is a primary determinant of environmental problems such as climate change, adverse health effects, and biodiversity loss. The course introduces students to environmental politics and policies at the local, state, national, and international levels. The course is designed to provide students with a framework for understanding how varied interests compete within political institutions in order to transform contending ideas into public policy. With that in mind, students will not only become more informed consumers of political information, but will also become more effective at analyzing and advocating for policies as it relates to the environment.

POL 329 Comparative Environmental Policy 3 Credits
Comparative Environmental Policy analyzes cross-national approaches in developing, implementing, and evaluating policy responses to environmental problems. The course analyzes the political factors, actors, and tools that help and explain why some societies have been more likely to develop effective responses to environmental threats.

SOC 225 Population Study 3 Credits
Demography; its definition, historical emergence, and growth; population as a social problem in developing and developed nations; population theories, sources and methods of demographic data, population composition, and distribution; demographic processes including fertility, mortality, and migration.

Environmental Studies

Program Overview

The Bachelor of Arts Degree in Environmental Studies is designed to meet the interests of students wishing to address environmental issues through multiple disciplinary perspectives, including relevant sciences as well as social and political aspects. The program is meant for students who are interested in careers in environmental policy, advocacy, justice, nonprofit organizations, ecotourism, and other related career opportunities; or graduate school in non-science-focused environmental disciplines, for example, environmental law.

Note: This B.A. program is not designed to prepare students for graduate-level science programs, nor is it designed to enable students to gain employment as professional scientists. Consider the B.S. in Environmental Sciences if you plan to pursue either of these career paths.

Curriculum Overview

The curriculum for this major focuses on the interdisciplinary nature of the environment by offering classes that give students a strong basis of science preparatory material while also offering a unique, hands-on approach to learning. Students take introductory courses in foundational classes in environmental and geology, chemistry, physics, and biology, followed by more in-depth coursework focused on the environmental sciences as well as social and political disciplines.

Student Learning Outcomes

Graduates of the Environmental Studies major will be able to:

1. The student can combine relevant data with scientific principles to compose an explanation of natural phenomena in environmental studies.
2. The student can use physical, chemical, and biological characteristics to identify materials or organisms that form the foundation of their discipline.
3. The student can properly use technical equipment and associated techniques to collect, organize, and interpret field data.
4. The student can identify, find, evaluate, and use information to produce scientific reports, both written and orally, for scientific research and communication.

Honors Program in Environmental Studies

Graduation with honors in Environmental Studies is awarded in recognition of majors who have demonstrated outstanding academic ability. Enrollment in the program is by invitation of the department faculty. Eligibility requirements include a minimum GPA of 3.5 in courses required for the major and the satisfactory completion of a senior thesis or a three- or four-credit Independent Research and Study course related to their major. In addition, an honors candidate must maintain an overall minimum GPA of 3.0.

Degrees Offered

Environmental Studies Major Requirements

(60-61 credits)

Code	Title	Credits
Geological, Environmental and Marine Sciences		**18**
Complete all of the following:		
ENV 100 & 100L	Introduction to Environmental Sciences and Introduction to Environmental Sciences Lab	
ENV 200 & 200L	Statistical and Computer Applications in the Natural Sciences and Statistical and Computer Applications in the Natural Sciences Lab	
ENV 205	Introduction to Geographic Information Systems	
ENV 220	Weather and Climate Change	
GEO 100	Earth Systems Science	
or GEO 113	Environmental Geology	
GEO 102	Earth Materials and Processes Lab	
GEMS Upper Level Elective		**3-4**
Select one of the following:		
ENV 320 & 320L	Global Biogeochemistry and Global Biogeochemistry Lab	
ENV 340	Field Methods and Data Analysis	
GEO 350 & 350L	Soil and Surficial Processes and Soil and Surficial Processes Lab	
GEO 407 & 407L	Hydrology and Water Resources and Hydrology and Water Resources Lab	
Biology		**12**
Complete all of the following:		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab	
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	
Select one of the following higher-level courses:		
BIO 350 & 350L	General Ecology and General Ecology Lab	
MAR 401 & 401L	Marine Ecology and Marine Ecology Lab	
Chemistry		**4**
Complete all of the following:		
CHE 120	Principles of Chemistry	
CHE 121	Principles of Chemistry Lab	
Mathematics		**4**
Select one of the following. The course selected will also satisfy the CAS core requirement.		
MTH 105	Algebra and Trigonometry	
MTH 106	Precalculus	
MTH 210	Calculus I	
Physics		**4**
Complete all of the following:		
PHY 100	Principles of Physics I	
PHY 100L	Principles of Physics I Lab	
Policy and Humanities		
Select five of the following:		15
AMS 304	Technology and Science in America	
BHP 259	Honors Seminar: The Environment: a Conflict of Interest	
ENG 218	Literature and the Environment	
IND 316	Nature's Business	
PHL 202	Social Philosophy	
PHL 215	Environmental Ethics	
POL 205	Introduction to Public Policy	
POL 215	Global Politics	
POL 327	Contemporary Issues in American Public Policy	
POL 328	Environmental Politics	
POL 329	Comparative Environmental Policy	
POL 330	Geopolitics of Energy	
Total Credits		**60-61**

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

	Semester Credit Hours	**15**
	Total Credit Hours for Graduation	**120-121**

Note: Natural and Physical Science core requirements are included in the major.

[1] For course placement information see https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing (https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing/)

[2] Please note that elective credits may be used to complete requirements in a second major or minor.

Courses and Descriptions

ENV 100 Introduction to Environmental Sciences 4 Credits
Examines how ecosystems function, with emphasis on the interactions between biological organisms and their physical environment, and the chemical processes that govern these interactions. The impact of human populations on natural ecosystems is investigated in detail using case studies from history and current events. The laboratory provides for hands-on experiences and/or short field trips to local sites for a better understanding of many of the concepts discussed. Weekday and weekend field trips may be required. Three hours of lecture and one three-hour lab per week. CLAS general education areas addressed: DP, SP, GP.
Corequisite(s): ENV 100L.

ENV 100L Introduction to Environmental Sciences Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): ENV 100.

ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits
This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.
Corequisite(s): ENV 200L.

ENV 200L Statistical and Computer Applications in the Natural Sciences Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): ENV 200.

ENV 205 Introduction to Geographic Information Systems 3 Credits
This course introduces the computer-based concepts and skills of Geographic Information Systems (GIS). It covers the basic GIS concepts, such as map characteristics and projections, spatial data models and analysis, and relational databases. It explores data sources, data quality, and metadata, as well as implementation and management of specific GIS projects. Hands-on experience with ArcGIS software is provided through a series of student exercises completed throughout the semester. Students will also be taught how to process both vector and raster data using ArcGIS software. The course is relevant for students from numerous disciplines in the natural sciences, social sciences, and business, which require the analysis and graphical representation of spatial data. Three hours of lecture per week.

ENV 220 Weather and Climate Change 3 Credits
This course introduces students to the concepts of weather and climate change. These concepts frame a continuum from short-term or daily changes in the atmosphere (meteorology) to those changes averaged over much longer periods of time (climatology). Students will learn the fundamentals of weather forecasting, the causes of natural variation in the Earth's climate, and the impact of human actions on the Earth's climate. Connections will be drawn to other current issues in the Earth system, including land use change, biodiversity, and pollution. Three hours of lecture per week.
Prerequisite(s): GEO 100 or GEO 113 or permission of instructor.

ENV 290 Directed Research and Study in Environmental Sciences 1-4 Credits
Provides an opportunity for freshman and sophomore students to gain hands-on research experience in the environmental sciences. This is an individual program of study and each student will work with a selected faculty member on a topic of mutual interest. The course consists of a combination of project meetings, supervised research, and guided readings. The focus will be on formulating research questions, designing and conducting experiments, collecting the necessary data, reviewing the scientific literature as it relates to each student's research topic in weekly meetings with the instructor, and communicating the findings by writing a final project report.

ENV 320 Global Biogeochemistry 4 Credits
This course introduces students to global biogeochemical processes in the earth system and their influences on marine and terrestrial ecosystems. With a focus on systems thinking and interdisciplinary science, students will learn about the interactions of the biosphere, lithosphere, hydrosphere and atmosphere through elemental cycling and energy transfers. The course extends from the origin of our planet to the modern earth system and considers the anthropogenic impacts of climate change and pollution on humans and other species. Students will analyze scientific data with examples in regulatory and research settings. Students will also gain first-hand experience with field methods including sampling ocean and freshwater using various techniques and equipment and interpreting chemical data. Field trips may be required for this course. Course
Prerequisites: GEO 100 or GEO 113; GEO 102; CHE 120 & 121.

ENV 320L Global Biogeochemistry Lab 0 Credits
This course introduces students to global biogeochemical processes in the earth system and their influences on marine and terrestrial ecosystems. With a focus on systems thinking and interdisciplinary science, students will learn about the interactions of the biosphere, lithosphere, hydrosphere and atmosphere through elemental cycling and energy transfers. The course extends from the origin of our planet to the modern earth system and considers the anthropogenic impacts of climate change and pollution on humans and other species. Students will analyze scientific data with examples in regulatory and research settings. Students will also gain first-hand experience with field methods including sampling ocean and freshwater using various techniques and equipment and interpreting chemical data. Field trips may be required for this course. Course
Prerequisites: GEO 100 or GEO 113; GEO 102; CHE 120 & 121.

ENV 340 Field Methods and Data Analysis 3 Credits
This course will provide students with practical experience in field methods and data analyses within environmental and marine sciences. The course will apply advanced scientific methods such as field-based exercises, GIS or coding analyses, statistical analyses, and database management. Students will also complete an independent or group project focused on a relevant topic. Local field trips during lab and potentially longer trips on weekends may be required. This course earns 3 Engaged Learning points in Civic and Community Engagement (CCE.)
Prerequisite(s): D or better in (MTH 105, or MTH 106, or MTH 210) and GEO 100, GEO 102, ENV 100, and MAR 120; or Permission of Instructor.

ENV 480 Senior Thesis 3 Credits
A senior thesis is optional for environmental science majors. However, a senior thesis is required for eligibility to graduate with honors in environmental science. The topic for investigation will be chosen by the student in consultation with the faculty of the Department of Geological, Environmental, and Marine Sciences. The student must initiate consideration of a proposal to the Department. The proposal must contain a discussion of the proposed project and a timetable to be followed in the study. A departmental committee consisting of a major and minor advisor will evaluate the written paper submitted at the conclusion of the study. An oral presentation before the department at the conclusion of the semester in which the study is completed is required. Proposals must be submitted in final form no later than the end of the ninth week of the semester prior to the semester in which the study is undertaken.
Prerequisite(s): senior standing in the geosciences major and permission of instructor.

ENV 490 Independent Study: Research and Creative Expression 1-4 Credits
Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

ENV 491 Internship in Environmental Sciences 1-4 Credits
A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placements may be in private, public, non-profit, or governmental organizations. These can include consulting firms, regulatory agencies, advocacy groups, and educational or research institutions. Normally, 50 hours of internship per credit is required. A mutually agreed upon method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and could include a term paper or project report and a poster presentation.
Prerequisite(s): 2.5 GPA and permission of instructor.

GEO 100 Earth Systems Science 3 Credits
Investigates the major global processes that occur on Earth. These processes can be grouped into four major systems: atmosphere, hydrosphere, lithosphere, and cosmosphere. Each system interacts with and affects the other systems creating, in a sense, a single Earth process. With this approach, the student will view the Earth as a whole, and understand that the many seemingly separate components that make up this planet are, in fact, a set of interacting processes, that operate in cycles through time, within a single global system. Three hours of lecture per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 102 Earth Materials and Processes Lab 1 Credits
This lab course introduces students to the origin, identification, and significance of geologic materials, processes, and landforms. Hands-on experiences with mineral and rock specimens, topographic and geologic maps, and GPS and other data collection techniques are emphasized, along with field trip and in-lab observations, measurements, and interpretations. One three-hour lab per week.
Prerequisite(s): concurrent enrollment in, or prior completion of, GEO 100 or GEO 113 is required.

GEO 113 Environmental Geology 3 Credits
Examines the fundamental premise that "society exists by geologic consent subject to change without notice" by studying a number of important global geologic processes and cycles, and the hazards and/or resources they present to individuals, societies, and the natural environment. Topics discussed include earthquakes, volcanism, stream flooding, coastal erosion, global climate change, and global water, soil, mineral, and energy resources. Cost/benefit considerations, hazard mitigation concepts, economic and political ramifications, and interactions among the lithosphere, hydrosphere, atmosphere, and biosphere also are presented. The course is designed to give non-science majors a deeper appreciation and understanding of the basic scientific concepts involved, as well as individual and societal connections to the global geologic environment, leading to better, more informed business, political, policy, and personal decisions. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 350 Soil and Surficial Processes 4 Credits
This course examines the physical, chemical, hydrological, and biological aspects of soil and their relation to geomorphologic development. Specific topics include descriptions of soil texture and structures, soil classification, soil colloids, soil redox and pH, and their effect on vadose zone water chemistry. Soil genesis and erosion controls, microbiology/ecology, nutrient cycles, and modern soil pollution from sludge and pesticide applications, as well as domestic and industrial chemical spills, also are discussed. The lab portion of the course introduces the basic techniques of soil analysis, both physical and chemical, and field survey methods. Three hours of lecture and one three-hour lab per week. Prerequisite(s): GEO 100 or GEO 113, and GEO 102.
Corequisite(s): GEO 350L.

GEO 350L Soil and Surficial Processes Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): GEO 350.

GEO 407 Hydrology and Water Resources 4 Credits
This course introduces the principles that govern both surface water and groundwater flows that have applications to societal water needs. Surface water topics cover the basics of the hydrologic cycle, the processes of precipitation, evapotranspiration, runoff, and infiltration, and various factors affecting water supply and water quality issues in a modern watershed. Groundwater topics examine the principles that govern flow through a porous medium and the basics of well hydraulics under different pumping conditions that community development requires. Laboratory exercises will give students hands-on experience with the delineation of watersheds, analysis of precipitation data, and flow contaminant transport modeling. The field portion of the laboratory includes runoff and stream discharge measurements, as well as hydraulic conductivity estimations from both slug and pumping tests. Three hours of lecture and one three-hour lab per week. Prerequisite(s): GEO 100 or GEO 113, GEO 102, and MTH 105 or higher.
Corequisite(s): GEO 407L.

GEO 407L Hydrology and Water Resources Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): GEO 407.

BIO 115 Principles of Biology I 4 Credits
An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three- hour lab per week.
Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits
An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.
Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 116.

BIO 350 General Ecology 4 Credits
An investigation of the processes that regulate the distribution of plants and animals throughout the biosphere. Relationships among species and their interactions with the environment are stressed. Quantitative analyses of experimental results and current research in basic and applied ecology are discussed. Laboratory activities explore conceptual models using both field activities and computer simulations. Three hours of lecture and one three-hour lab per week. One Saturday field trip (laboratory time will be adjusted accordingly). Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C
Corequisite(s): BIO 350L.

BIO 350L General Ecology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Prerequisite(s): BIO 115 with a minimum grade of C and (BIO 116 with a minimum grade of C or BIO 117 with a minimum grade of C.

CHE 120 Principles of Chemistry 3 Credits
For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.
Corequisite(s): CHE 121.

CHE 121 Principles of Chemistry Lab 1 Credits
For students concurrently taking CHE 120. Experiments involve gravimetric, volumetric, and spectrophotometric quantitative analysis. One three-hour lab per week. Fall.

PHY 100 Principles of Physics I 3 Credits
Introductory noncalculus physics with applications for pre-professional, biology, and geological, environmental and marine sciences majors. Classical mechanics, energy, mechanical waves, fluid statics and dynamics, thermodynamics. Elements of modern physics are interwoven with those of classical physics from the beginning. Not open to chemistry, physics, or mathematics majors. Three hours of lecture per week. Prerequisite(s): MTH 105, MTH 210, MTH 211 or MTH 212.
Corequisite(s): PHY 100L.

PHY 100L Principles of Physics I Lab 1 Credits
For students concurrently taking PHY 100. One three-hour lab per week.
Corequisite(s): PHY 100.

AMS 304 Technology and Science in America 3 Credits
An overview of the development and impact of technology and science on American institutions. Topics include innovation, economic growth, science and its relation to technology, social theory, and the politics of science.

BHP 259 Honors Seminar: The Environment: a Conflict of Interest 3 Credits
Examines critical environmental issues such as global warming; food, water and energy resources; population trends; and global industrialization. Topics for context will include the origin of the elements, the origin of solar systems, and the origin of life as well as the basic principles of the current biotechnical revolution. Scientific understanding will be combined with knowledge about strategies for raising community awareness in order to (re)formulate public policy. In teams, students will be asked to define the problems; research available and prospective solutions; identify the technical, social, political, and economic constraints; and finally propose a workable strategy for making progress toward solutions.

HIS 224 American Environmental History 3 Credits
Surveys the history of the North American environment from pre-Columbian times through the 20th century. Topics include Native American uses of the environment; the reshaping of ecosystems under European colonization; U.S. frontier expansion; the ecological impact of industrialization and urbanization; and the rise of the environmental movement.

IND 316 Nature's Business 3 Credits
This interdisciplinary, team-taught, experiential learning course brings together various science, liberal arts, and business perspectives in examining the relationships among biological, social, environmental, economic, geological, and political issues. Topics to be discussed and researched by students can include, but are not limited to, ecotourism, sustainable development, biodiversity, local and regional environmental and historical geology, cultural norms, and the legal and political systems of the country being visited. The study tour component of the course provides students with a first-hand opportunity to observe and record field data from settings outside of the United States and in their discipline of interest. Typically, there are approximately 12 hours of pre-trip lectures, seminars, and/or faculty/student presentations during the fall semester, an international study tour, 9-14 days in length, during January (exact dates and length depend on the international location), and approximately three hours of post-trip meetings, seminars, and student presentations during the spring semester. Students enroll in the course during the spring semester. Note: This course is cross-listed as CBA 316; Students may not get credit for both CBA 316 and IND 316. For Business students who take the course as CBA 316, the course will count as a business course. If taken as IND 316, the Business student will receive credit as a liberal arts and science course.
Prerequisite(s): Permission of Instructor.

PHL 215 Environmental Ethics 3 Credits
A comprehensive introduction to environmental ethics that examines the major theoretical approaches, including anthropocentric (human-centered), zoocentric or sentientist (animal-centered), and biocentric or ecocentric (nature-centered) value systems, as well as the most important critiques of these ethical approaches. We will examine and analyze several classical ethical theories that are particularly relevant to a study of contemporary environmental controversies. We will also address specific issues such as biodiversity and wilderness preservation; human use of animals as food, entertainment, and research subjects; environmental racism and toxic dumping; sustainable development, population and consumption. Students will analyze and discuss the ethical dimensions of several contemporary environmental controversies. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

POL 328 Environmental Politics 3 Credits
Environmental Politics examines how policymakers deal with the political challenges of unsustainable resource consumption, which is a primary determinant of environmental problems such as climate change, adverse health effects, and biodiversity loss. The course introduces students to environmental politics and policies at the local, state, national, and international levels. The course is designed to provide students with a framework for understanding how varied interests compete within political institutions in order to transform contending ideas into public policy. With that in mind, students will not only become more informed consumers of political information, but will also become more effective at analyzing and advocating for policies as it relates to the environment.

POL 329 Comparative Environmental Policy 3 Credits
Comparative Environmental Policy analyzes cross-national approaches in developing, implementing, and evaluating policy responses to environmental problems. The course analyzes the political factors, actors, and tools that help and explain why some societies have been more likely to develop effective responses to environmental threats.

POL 330 Geopolitics of Energy 3 Credits
Geopolitics of Energy Security explores the role of energy in shaping global politics, natural resource management practices and volatility in economic markets. The course begins with an overview of energy security and explores issues associated with energy production, national security, energy consumption, and environmental conservation. Throughout the course students will become familiar with basic data, trends, issues and options in the exploration and production of renewable and non-renewable energy sources.

SOC 225 Population Study 3 Credits
Demography; its definition, historical emergence, and growth; population as a social problem in developing and developed nations; population theories, sources and methods of demographic data, population composition, and distribution; demographic processes including fertility, mortality, and migration.

Ethics

Program Overview

The ethics minor not only helps prepare students for a variety of graduate programs such as law, medicine, and business, but also helps students explore important questions such as how ethics should interpret war, business practice and poverty.

Minor Offered

- Minor in ethics

Ethics Minor Requirements

(18 credits)

Code	Title	Credits
Required Courses:		
PHL 115	Ethics	3
PHL 360	Contemporary Ethics	3
One 400-level philosophy (PHL) seminar course		3
Elective Courses:		**9**
Three philosophy electives with at least one at the 300-level or above		
Total Credits		**18**

Courses and Descriptions

PHL 100 Plato and Aristotle 3 Credits
The beginnings of Western scientific and humanistic thought among the early Greeks and their progress into the two great systems of Plato and Aristotle. Selections from Plato and Aristotle are read and discussed to determine the meaning and significance of philosophical ideas that have subsequently influenced the whole history of Western civilization. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 102 Philosophical Thinking 3 Credits
An introduction to philosophical thought with an emphasis on the enduring questions and problems of philosophy. We will explore such questions as: how do I know I am not dreaming? Is there an external world? What is truth? Is there a self? Is there a God? What is the relationship between the mind and the body? How can I tell right from wrong? What makes government legitimate? What is justice? What is the meaning of life? We will consider answers to these questions from diverse philosophical traditions, reading such philosophers as Plato, Descartes, Zhuangzi, Hume, Vasubandhu, Berkeley, Aquinas, Avicenna, Udayana, Kant, Mill, Russell, Camus, and Nishitani. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 110 Logic and Language 3 Credits
A study of the logical structure of argumentation in ordinary language, with an emphasis on the relation of logic to the uses of language in practical affairs. Traditional informal fallacies are studied as well. Discussions explore the nature of validity, truth, meaning, and evidence in relation to the evaluation of arguments. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 115 Ethics 3 Credits
A combined historical and systematic analysis of the problems of ethics. Such problems as the nature and meaning of moral values and judgments, moral responsibility and freedom, conscience and happiness, the good life, and the relativity of value, are explored through the writings of such philosophers as Plato, Aristotle, Aquinas, Kant, Mill, and Nietzsche. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 120 American Philosophy 3 Credits
The development of philosophical thought in the United States from the colonial era to the 20th century. Studies such thinkers as Edwards, Jefferson, Emerson, Thoreau, Peirce, James, Dewey, and King, and their ideas on human nature, free will, religion, morality, and politics. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 125 Philosophies of Education 3 Credits
Studies classical and contemporary theories of the nature, structure, and aims of education, including major works of such philosophers as Plato, Rousseau, and Dewey. The course will also introduce students to methods of critical philosophical analysis. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 130 Political Philosophy 3 Credits
An introduction to the problems of political philosophy with an emphasis on recent and contemporary issues, such as the conflict between liberal and conservative ideologies, fascism, revolution, civil disobedience, and the concept of legitimate political authority. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 202 Social Philosophy 3 Credits
Emphasizes social ethics through critical studies of such contemporary problems as abortion, euthanasia, the death penalty, pornography and censorship, animal rights, drug use, sexual morality, environmental ethics, and world hunger. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 203 Business Ethics 3 Credits
Surveys and examines ethical problems concerning the institutions and practices of contemporary business. Problems considered include: the conflicts of economic freedom and social responsibility; the relation of profits to work and alienation; the responsibilities of business to employees, minorities, consumers and the environment; the role of truthfulness in business practices; and the ethics of self-fulfillment and career ambitions. Readings selected from works of contemporary and historical philosophers, social theorists, and business people.

PHL 207 Asian Philosophy 3 Credits
A survey of the principal philosophical perspectives of Asia. Emphasis on the traditional Indian schools of Hinduism, Jainism, and Buddhism, Chinese Confucianism and Taoism, and the development of Zen Buddhism in China and Japan. Philosophical topics include: mystical experience, the ultimate nature of reality, the existence of a soul, the causes of human suffering, and the possibility of release, the nature of virtue and its development, and the nature of society and government. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 210 Symbolic Logic 3 Credits
An introduction to logic from the standpoint of modern symbolic methods, including techniques of formal deductive proof, quantification, the logic of relations, and properties of formal deductive systems. Discussions focus on philosophical issues in recent and contemporary logical theory. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 215 Environmental Ethics 3 Credits
A comprehensive introduction to environmental ethics that examines the major theoretical approaches, including anthropocentric (human-centered), zoocentric or sentientist (animal-centered), and biocentric or ecocentric (nature-centered) value systems, as well as the most important critiques of these ethical approaches. We will examine and analyze several classical ethical theories that are particularly relevant to a study of contemporary environmental controversies. We will also address specific issues such as biodiversity and wilderness preservation; human use of animals as food, entertainment, and research subjects; environmental racism and toxic dumping; sustainable development, population and consumption. Students will analyze and discuss the ethical dimensions of several contemporary environmental controversies. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 225 Modern Philosophy 3 Credits
Examines one of the most exciting periods in the history of philosophy during which philosophers from Descartes to Kant tried to come to terms with the following questions: What is knowledge? Can we know the physical world exists? Can we have scientific knowledge? Can we know God exists? Can we even know whether we exist? The works of Descartes, Leibniz, Spinoza, Locke, Berkeley, Hume and Kant are read and discussed. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 230 Philosophy of the Sexes 3 Credits
Studies philosophical views of the differences between the sexes, sexual equality, love, marriage, and the family from ancient Greece to the 20th century. Texts from the contemporary women's and men's movements will also be examined. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 303 Philosophy of Law 3 Credits
An examination and analysis of selected topics including classical and contemporary theories in the philosophy of law and moral philosophy. Such topics as the nature of the law and legal reasoning, the legal enforcement of morality, protection of personal liberty, and the moral justification of punishment are considered. Such philosophers as Aquinas, Austin, Holmes, Bentham, Hart, and Dworkin are read and discussed.

PHL 304 Medical Ethics 3 Credits
Introduces the student to ethical problems associated with the practice of medicine, the pursuit of biomedical research, and health care social policy. The course will explore such issues as: Is a physician morally obligated to tell a terminally ill patient that he or she is dying? Is society ever justified in enacting laws that would commit an individual, against his or her will, to a mental institution? Does society have a moral obligation to ensure that all its members have access to health care? To what extent, if at all, is it ethically acceptable to clone a human being? Under what conditions is human experimentation ethically acceptable?
Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 310 Problems in 20th-Century Philosophy 3 Credits
Consideration of major philosophical movements in the 20th century such as phenomenology, existentialism, pragmatism, and analytic philosophy. Within these movements such topics as the function of analysis, language and meaning, the nature of values, the nature of persons, the synthetic-analytic distinction, the mind-body problem, and the possibility of metaphysics are considered. The work of such figures as Wittgenstein, Russell, Heidegger, Husserl, Sartre, Whitehead, and Dewey are read and discussed.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 315 Existentialism 3 Credits
Historical development and contemporary problems of existentialism with emphasis on the nature of man, his ability to know his situation, the relation between existence and essence, and the meaning of human life and activity. The works of such figures as Kierkegaard, Sartre, Heidegger, Camus, Kafka, Beckett, Buber, Laing, and Frankl are read and discussed.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 320 Philosophy of Science 3 Credits
The logic of fundamental concepts of science and scientific methods are studied. Patterns of explanation are examined to understand the functions of laws, theories, and predictions in science. Inquiry is made into the relation between mathematics and empirical science; similarities and distinctions between the natural and social sciences. The role of science in human affairs and the value of scientific knowledge.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 334 Theories of Knowledge 3 Credits
An investigation of selected, representative theories of knowledge from classical and contemporary sources. Considers the analytic-synthetic distinctions, necessary truth, and the foundations of empirical knowledge. Such philosophers as Leibniz, Hume, Kant, Russell, and Quine are read and discussed.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 336 Philosophy of Mind 3 Credits
An investigation of the nature, existence, and capacities of the mind and self in the light of recent philosophical and psychological theories, including psychoanalysis and behaviorism. Considers such topics as the interaction of mind and body, the unconscious, minds and machines, freedom of thought and action.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 343 Theories of Reality 3 Credits
An examination of metaphysical problems with an emphasis on philosophical views of human nature from ancient Greece to contemporary evolutionary theories. The writings of such classical, modern, and contemporary figures as Plato, Aristotle, Descartes, Kant, Hegel, and Darwin are read and discussed. Issues studied include the relation between mind and matter, freedom and determinism, and the existence of God.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 348 Indian Philosophy 3 Credits
Consideration of major movements in the philosophical tradition of India. Emphasis on the disputes between the traditional Hindu and Buddhist schools of the classical period over logic, knowledge, and reality. Philosophical topics include: skepticism, the problem of universals, realism and idealism, the nature of perception, the problem of induction, the nature of causality, and the problem of identity over time. Philosophers such as Nagarjuna, Vasubandhu, Vatsyayana, Dharmakirti, and Udayana will be read and discussed.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 358 Chinese Philosophy 3 Credits
Consideration of major movements in the philosophical tradition of China. Emphasis on the political philosophies of ancient China. Topics include: human nature and the development of virtue, the nature and purpose of government, and the cognitive value of mystical experience. Philosophers such as Confucius, Laozi, Xunzi, Mencius, Mozi, and Zhuangzi will be read and discussed.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 360 Contemporary Ethics 3 Credits
An examination of recent and contemporary challenges to traditional ethical theory including such movements as logical positivism, cultural relativism, feminism, environmentalism, multiculturalism, and postmodernism. Such problems as the meaning and cognitive status of value judgments, the relation between fact and value, the relativity of values, and how value judgments can be justified are considered.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 368 Japanese Philosophy 3 Credits
Consideration of major movements in the philosophical tradition of Japan, with an emphasis on Zen Buddhism in Medieval Japan and the Kyoto school in the 20th century. Topics include: the use of meditation and koans in Zen practice, the relationship between practice and enlightenment, the nature of time, meaning and nihility, and the relationship between science and religion. Philosophers such as Kukai, Mumon, Dogen, and Nishitani will be read and discussed.
Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 402 Nietzsche and Nihilism 3 Credits
A seminar dealing with Nietzsche's provocative ideas on Nihilism and the possibility of creating meaning, value, and truth for human existence. Many of his important works are read, analyzed, and critically discussed. Recent scholarly interpretations of Nietzsche's philosophy are considered.
Prerequisite(s): any previous philosophy course or permission of instructor.

PHL 408 The Philosophy of William James 3 Credits
Seminar involving a concentrated study of William James' contributions to philosophy with special attention to his pragmatism, pluralism, and radical empiricism. Many of James' philosophical works are read, analyzed, and critically discussed. Recent scholarly interpretations of James' philosophy are considered.

PHL 418 Great Buddhist Thinkers 3 Credits
Concentrated study of a single Buddhist philosopher, emphasizing the systematic views of that philosopher across a range of philosophical issues. Through an examination of primary sources in translation and recent scholarship, students will investigate the views and arguments of one important figure from the Buddhist philosophical tradition on a variety of philosophical problems regarding knowledge, existence, consciousness, religion, and ethics.

PHL 490 Independent Study: Research and Creative Expression 1-4 Credits
Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

Event Planning and Production

Program Overview

Event planning and production is an interdisciplinary minor that combines the study of communication, marketing and management. With the rapid growth of non-profit, educational, corporate, recreational, and entertainment events, this minor provides both theoretical and practical training in event planning and management.

The curriculum emphasizes public relations and effective writing, various strategic approaches to business management, and the corporation-consumer relationship. The minor has a strong applied component and approved internship experiences are recommended for all students.

Degree Offered

- Minor in Event Planning and Production

COM 440	Cases & Campaigns in Public Relations	
MKT 320	Consumer Behavior	
PSY 100	Introduction to Psychology	
Total Credits		**21**

Courses and Descriptions

CBA 110 Business in Action 3 Credits
This course will provide students with the opportunity to develop a foundational understanding of the business environment and various business functions. Students will be introduced to core concepts in accounting, e-business, finance, human resource management, information technology, macroeconomics, management, marketing, and production and operations management. In addition, the student will have ample opportunity to improve his/her communication and teamwork skills, as well as further develop problem-solving, analytical, and decision-making abilities through a Business in Action project.

COM 105 Communication, Culture and Media 3 Credits
Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 107 Writing for the Media 3 Credits
Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 240 Public Relations 3 Credits
Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 261 Introduction to Web Design 3 Credits
Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 280 Issues in Event Planning 3 Credits
Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.
Prerequisite(s): COM 240 or MKT 200.

COM 341 Public Relations Writing and Strategy 3 Credits
Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.
Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 440 Cases & Campaigns in Public Relations 3 Credits
Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.
Prerequisite(s): COM 341 or permission of instructor.

ECO 200 Principles of Macroeconomics 3 Credits
A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.
Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

MGT 201 Fund Management & Org Behavior 3 Credits
This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.
Prerequisite(s): minimum 30 credits completed.

MGT 310 Intro to Human Resource Mgmt 3 Credits
This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, t raining, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.
Prerequisite(s): MGT 201 or PSY 210.

MKT 200 Marketing Principles 3 Credits
This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.
Prerequisite(s): 15 credits.

MKT 320 Consumer Behavior 3 Credits
The nature and determinants of consumer behavior are studied, with attention given to the influence of socio-psychological factors such as personality, small groups, demographic variables, social class, and culture on the formation of consumer attitudes, consumption patterns, and purchasing behavior.
Prerequisite(s): MKT 200.

MKT 260 Service Marketing 3 Credits
Focuses on the unique challenges of managing services and delivering quality service to customers. Emphasis is placed on the total organization, and how effective marketing and customer focus must be coordinated across multiple functions. The course is applicable to service organizations and to organizations that depend on service excellence for competitive advantage. Topics include customer-focused management, and customer satisfaction, retention, lifetime value and profitability. Students will learn to map services, understand customer expectations, and develop relationship marketing strategies.
Prerequisite(s): MKT 200.

PSY 100 Introduction to Psychology 3 Credits
This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

Exercise Science

Program Overview

This program prepares students for both entry level positions in health, fitness, and exercise science and as pre-professional training for a variety of healthcare related programs (i.e., athletic training, physical therapy, occupational therapy). Graduates of this program will be prepared to assess, design, and implement individual and group exercise and fitness programs for both healthy individuals and those with controlled disease. In addition to knowledge and skills associated with physiology, exercise science professionals also must be knowledgeable and skilled in evaluating health behaviors and behavior modification and motivation techniques necessary to promote and maintain positive lifestyle behaviors. Rider achieves this through small class and laboratory sizes allowing direct, hands-on instruction, and faculty accessibility. Students also have opportunities to do research with faculty via work study or independent study. Each student is assigned a faculty advisor who provides academic advice and career guidance tailored to the student's needs. Students completing this program will have the knowledge, skills, and abilities necessary for entry-level exercise science employment in the public and private industries and/or graduate study in related areas.

Students may be eligible for a number of nationally recognized certifications in the field (i.e., American College of Sports Medicine Certification (https://www.acsm.org/get-stay-certified/get-certified/), National Strength and Conditioning Association, (https://www.nsca.com/certification/certification-overview/) National Academy of Sports Medicine (http://www.nasm.org/)) and may pursue employment in various healthcare and/or public health settings in and around exercise and healthy lifestyle interventions. Students will also be able to use their degree as a platform for a wide range of graduate degree programming including, but not limited to: physical therapy, exercise physiology, physician's assistant, occupational therapy, nutrition, strength and conditioning, and public health.

Curriculum Overview

The curriculum is designed to allow flexibility to customize the program by selecting courses in both foundational and core content areas based on the individual's personal and professional goals. Rider's science

faculty are research-oriented and encourage students to take advantage of opportunities to engage in independent research. Two concentrations are identified, each with a selected set of courses which prepare students for their intended career path: Four career paths are identified, each with a selected set of courses which best meets that program:

- **Practitioner Concentration:** designed for those wanting to pursue careers as fitness professionals, corporate health and wellness specialists, and strength and conditioning professionals.
- **Pre-Professional Concentration:** designed for students wanting to pursue additional training in Physical Therapy, Athletic Training, Occupational Therapy, or other healthcare related programs. Students should consult with their faculty advisor regarding the requirements for each career path option.

Student Learning Outcomes

After completing this program, graduates will be able to:

1. Demonstrate knowledge in foundational concepts of exercise science
2. Demonstrate competency in the following domains for both healthy and clinical populations: pre-participation risk stratification, fitness assessment and evaluation, evidence based exercise prescription, and safe/appropriate exercise technique.
3. Articulate the importance of interprofessional collaboration in the delivery of evidence based exercise programming in contemporary health care.
4. Communicate effectively in both the written and spoken word, commensurate with expectations in the field.
5. Act within the ethical and legal parameters of Exercise Science.

Degree Offered:

- B.S. in Exercise Science

Code	Title	Credits
Exercise Science Foundation (40-43 credits)		
BIO 221 & 221L	Human Anatomy & Physiology I and Human Anatomy & Physiology I Lab	4
BIO 222 & 222L	Human Anatomy & Physiology II and Human Anatomy & Phys II Lab	4
EXS 115 & 115L	Introduction to the Science of Exercise and Introduction to the Science of Exercise Lab	4
EXS 121	Exercise Injury Control and Management	3
HSC 105	Introduction to Health Professions	1
HSC 110	Introduction to Human Nutrition	3
HSC 302 & HSC 303	Kinesiology and Kinesiology Lab	4
EXS 320 & EXS 321	Exercise Physiology and Exercise Physiology Laboratory	4
PSY 100	Introduction to Psychology [3]	3
or PSY 110	Psychology:The Science of Well-being	
PSY 283	Sport Psychology	3
or PSY 345	Health Psychology	
MTH 105	Algebra and Trigonometry (or a higher level MTH course)	4
Statistics (3-6 credits)		**3-6**
Select one of the following:		
BNS 250 & 250L	Biostatistics and Biostatistics Lab	
PSY 201	Statistics and Research Design (requires PSY 105 as a prerequisite)	
MTH 120	Introduction to Applied Statistics	
ENV 200	Statistical and Computer Applications in the Natural Sciences	
Practitioner Concentration EXS Professional (27-29 credits)		
(strength and conditioning, corporate fitness, wellness, personal training, exercise professional)		
CHE 110 & 110L	Survey of General Chemistry and Survey of Gen Chemistry Lab	4
HSC 210	Nutrition for Exercise and Physical Activity	3
EXS 291	Exercise Science Practicum 1	1
EXS 340 & EXS 341	Exercise Testing & Prescription and Exercise Testing & Prescription - Lab	4
EXS 360 & EXS 361	Foundations of Strength and Conditioning and Foundations of Strength and Conditioning Lab	4
EXS 391	Exercise Science Practicum 2	2
EXS 401	Organization and Administration in Exercise Science	3
EXS 405	Special Populations & Considerations	3
EXS 491	Internship in Exercise Science	3-4
Pre-Professional Concentration (Pre PT, AT, OT, PA)(40-44 credits)		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab (Core Requirements)	4
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	4

HSC 210	Nutrition for Exercise and Physical Activity	3-4
or CHE 211 & 211L	Organic Chemistry I and Organic Chemistry I Lab	
EXS 405	Special Populations & Considerations	3-4
or BIO 260 & 260L	Principles of Biology: Evolution, Diversity, and Biology of Cells and Principle of Biology: Cells Lab	
EXS 401	Organization and Administration in Exercise Science	3-4
or BIO 215 & 215L	Medical Microbiology and Microbiology Lab	
EXS 340 & EXS 341	Exercise Testing & Prescription and Exercise Testing & Prescription - Lab	4
or EXS 360 & EXS 361	Foundations of Strength and Conditioning and Foundations of Strength and Conditioning Lab	
Complete one of the following Physics course sequences:		**8**
A.		
PHY 100 & 100L	Principles of Physics I and Principles of Physics I Lab	
PHY 101 & 101L	Principles of Physics II and Principles of Physics II Lab	
or B.		
PHY 200 & 200L	General Physics I and General Physics I Lab	
PHY 201 & 201L	General Physics II and General Physics II Lab	
Complete one of the following Chemistry course sequences:		**8**
A.		
CHE 120 & CHE 121	Principles of Chemistry and Principles of Chemistry Lab [1]	
CHE 122 & CHE 123	Intro to Chemical Systems and Quantitative Methods Lab [1]	
or B.		
CHE 110 & 110L	Survey of General Chemistry and Survey of Gen Chemistry Lab	
CHE 225 & 225L	Introduction to Organic and Biochemistry and Introduction to Organic and Biochemistry Lab	
EXS 490	Independent Study: Research and Creative Expression	3-4
or EXS 491	Internship in Exercise Science	
Total Credits: Foundation and Practitioner Concentration		**67-71**
Total Credits: Foundation and Pre-Professional Concentration		**80-87**

Note: CAS General Education Scientific Perspective and Mathematical Reasoning requirements will be fulfilled within this major.

1 If Organic Chemistry is required as prerequisite, students should complete CHE 120 & CHE 121. If Organic Chemistry is not required as a prerequisite, students should complete CHE 110 & CHE 110L.

2. PSY 110 may also be used to satisfy the CAS Social Perspectives core requirement.

Department of Health Sciences and Nursing Course Repeat Policy

The following guidelines apply to courses offered by the Department of Health Sciences and Nursing. Students may repeat any health sciences (HSC) or exercise science (EXS) course **once** without special permission unless they received an unsatisfactory grade (C-, D, F). With an unsatisfactory grade, students need permission from the dean's office to repeat a class. They can not register on their own on myRider. Students should email casdean@rider.edu and the department chair to request permission to repeat a course. A course will be considered repeated if the student has previously earned a letter grade in the course, or if the student has previously withdrawn from the course after the Friday of the seventh week of classes (previously Withdrawal II or Withdrawal III). To take a health science, or exercise science course for a third time, written permission must be obtained from the dean's office and the department chair before the registrar will allow the student to enroll in that course.

Academic Plans of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Exercise Science: Practitioner Concentration Plan of Study (p. 247)
Exercise Science: Pre-Professional Concentration Plan of Study (p. 248)

[2] EXS 490/491 may be taken Fall, Spring, Or Summer (see advisor for requirements and planning)

[3] PSY 100 or PSY 110 may be taken in Fall or Spring of Freshman year.

Courses and Descriptions

BCH 225 Introduction to Organic and Biochemistry 4 Credits
An introductory course describing the basic principles of organic chemistry and biochemistry as they relate to human metabolism and disease. The nature of the chemical structure and reactivity of organic functional groups such as alcohols, aldehydes, ketones, carboxylic acids and amines will be presented with biological processes in mind. The biochemistry of the macromolecules DNA, RNA, proteins, carbohydrates and lipids will be discussed leading to a discussion of some of the more important metabolic pathways. This course is intended for science majors who do not take the full two semester sequence of organic chemistry and two semesters of biochemistry and desire a background in biochemistry. Non-science major students who have had one semester of general chemistry and one semester of biology may also enroll in the course. Three hours of lecture and one three-hour lab per week. Prerequisite(s): (CHE 110 with a minimum grade of D and CHE 110L) or (CHE 122 with a minimum grade of D and CHE 123 with a minimum grade of D) and BIO 115 with a minimum grade of D
Corequisite(s): BCH 225L.

BCH 225L Introduction to Organic & Biochemistry Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (CHE 110 UG D and CHE 110L) or (CHE 122 UG D and CHE 123) and BIO 115.
Corequisite(s): BCH 225.

BIO 115 Principles of Biology I 4 Credits
An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three- hour lab per week.
Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits
An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.
Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 116.

BIO 221 Human Anatomy & Physiology I 4 Credits
A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training. Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor.
Corequisite(s): BIO 221L.

BIO 221L Human Anatomy & Physiology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 221.

BIO 222 Human Anatomy & Physiology II 4 Credits
A comprehensive survey of the organ systems of the body including special senses, cardiovascular, respiratory, digestive, excretory, reproduction and development. Physiological components include electrolytes, metabolism, nutrition, and the mechanisms of homeostasis and cell reception. Lab studies support lecture material through dissections, wet labs, computer-assisted learning, microscopy, and models. Assessment includes lab practicums, exams, and reports. Course emphasis supports allied health and pre-professional training. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): BIO 221.
Corequisite(s): BIO 222L.

BIO 222L Human Anatomy & Phys II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 221L.
Corequisite(s): BIO 222.

BNS 250 Biostatistics 4 Credits
This course will assist students with acquiring the skills necessary to design, conduct, and interpret research studies. Emphasis will be on learning how to develop experimental designs to translate theoretical concepts into testable hypotheses. Experiments conducted during laboratory sessions will use laboratory mice and will use equipment for measuring animal behavior. Students will gain experience collecting, analyzing, writing and orally presenting their research results. Three hours of lecture and one three-hour lab per week. Prerequisite(s): MTH 105 or higher or placement into MTH 210, grade of "C" or better in one lab science course.
Corequisite(s): BNS 250L.

BNS 250L Biostatistics Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Prerequisite(s): MTH 105 or higher or placement into MTH 210, grade of "C" or better in one lab science course.

CHE 110 Survey of General Chemistry 4 Credits
A one-semester survey of basic general chemical principles designed to be applied to questions in health-related fields. Students will explore the fundamental structures of atoms and simple compounds that comprise living beings; basic patterns in chemical reactivity, especially oxidation-reduction and acid-base reactions; quantitative analyses of biologically-relevant compounds and chemical reactions; properties of substances; and kinetic and thermodynamic principles underlying such chemicals and chemical processes. In the laboratory portion of this course, students will learn and apply principles of experimental safety and will apply knowledge gained in the class via application in basic experimental contexts. No prerequisites. Students who have completed CHE 120 and/or CHE 122 will not be permitted to enroll in CHE110/110L. Furthermore CHE 110 will not serve as a prerequisite for CHE 122.

CHE 110L Survey of Gen Chemistry Lab 0 Credits
In the laboratory portion of this course, students will learn and apply principles of experimental safety and will apply knowledge gained in the class via application in basic experimental contexts.

CHE 120 Principles of Chemistry 3 Credits
For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.
Corequisite(s): CHE 121.

CHE 121 Principles of Chemistry Lab 1 Credits
For students concurrently taking CHE 120. Experiments involve gravimetric, volumetric, and spectrophotometric quantitative analysis. One three-hour lab per week. Fall.

CHE 122 Intro to Chemical Systems 3 Credits
A continuation of CHE 120. For students majoring in the sciences but may be taken by others. Chemical systems in which the study of kinetics, thermodynamics, equilibrium, and radiochemistry are emphasized. Three hours of lecture per week. Prerequisite(s): CHE 120, MTH 105 or higher.
Corequisite(s): CHE 123.

CHE 123 Quantitative Methods Lab 1 Credits
Usually taken concurrently with CHE 122. Primarily for students majoring in the sciences. A number of quantitative classical and instrumental methods of analysis are used to determine thermodynamic properties and reaction mechanisms. One three-hour lab per week. Prerequisite(s): CHE 121.
Corequisite(s): CHE 122.

ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits
This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.
Corequisite(s): ENV 200L.

ENV 200L Statistical and Computer Applications in the Natural Sciences Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): ENV 200.

EXS 121 Exercise Injury Control and Management 3 Credits
This course is designed to provide the participant with entry level knowledge, competence, and skill in the care and prevention of injuries sustained during physical activity, sport, and exercise. This course includes units dealing with basic anatomy of common injuries, evaluation techniques, preventive measures to reduce the incidences of injuries and a knowledge of basic treatment procedures to be used after injuries occur. Legal and ethical issues will also be discussed.

EXS 320 Exercise Physiology 3 Credits
An entry level exploration of the physiological processes, metabolic requirements, and consequences of exercise in humans. Emphasis is placed on bioenergetics, as well as circulatory, respiratory, and neuromuscular responses to the physical stress of exercise performed for health and disease prevention.
Prerequisite(s): BIO 221, BIO 222.

EXS 321 Exercise Physiology Laboratory 1 Credits
EXS 321 is the laboratory course that accompanies EXS 320. Topics will include entry-level practical skills and competencies related to exercise capacity evaluation, interpretation of exercise data, and application of exercise interventions in a clinical setting. Prerequisite(s): BIO 221, 222 Co-requisite(s): EXS 320.

EXS 340 Exercise Testing & Prescription 3 Credits
An advanced, competency based course in the evidence based evaluation and prescription of exercise interventions in healthy and clinical populations. Prerequisite(s): EXS 320 Co-requisite(s): EXS 341.

EXS 341 Exercise Testing & Prescription - Lab 1 Credits
An advance, competency based laboratory course in the evidence based evaluation and prescription of exercise interventions in healthy and clinical populations Prerequisite(s): EXS 320 Co-requisite(s): EXS 340.

EXS 360 Foundations of Strength and Conditioning 3 Credits
This course examines the advanced methods and techniques associated with the design of strength and conditioning programs to enhance human performance in sport and fitness. This course is designed to develop, enhance, and apply knowledge and skills to prepare the student for the profession of strength and conditioning. Prerequisite(s): EXS 320, EXS 321, and HSC 302.
Corequisite(s): EXS 360L.

EXS 361 Foundations of Strength and Conditioning Lab 1 Credits
This course examines the advanced methods and techniques associated with the design of strength and conditioning programs to enhance human performance in sport and fitness. Prerequisite(s): EXS 320, EXS 321, and HSC 302.
Corequisite(s): EXS 360.

EXS 401 Organization and Administration in Exercise Science 3 Credits
This course examines the various issues, policies, and procedures involved with administrative aspects of exercise science in traditional and non-traditional settings. Emphasis is on administrative concepts, facility design, budgeting and equipment purchasing, personnel management, record keeping, and legal liability.
Prerequisite(s): EXS 360.

EXS 405 Special Populations & Considerations 3 Credits
This course is an advanced course in exercise programming for a variety of unique populations. Pathophysiology and considerations relative to diseases of the musculoskeletal, neuromuscular, and immunologic systems will be discussed. Recommended modifications and evidence based techniques that support fitness programming for individuals with specific exercise needs will be explored.
Prerequisite(s): EXS 320.

HSC 110 Introduction to Human Nutrition 3 Credits
This course is designed to offer the student an understanding of fundamental human nutrition concepts including, but not limited to, digestion, absorption, metabolism, functions, and sources of macronutrients and micronutrients. The theme of the course will align with human health and disease states and the important conceptions about the food industry and its relation to healthy dietetic choices.

HSC 105 Introduction to Health Professions 1 Credits
Course Description: This course will provide a basic overview of the health science professions including but not limited to: athletic training, clinical exercise physiology & cardiac rehabilitation, chiropractic, physician assistant, occupational therapy, nursing, community health education specialist, and physical therapy. The course will also cover the professional activities (i.e. professional organizations, certifications, professional issues, and professional liabilities) that are related to these professional applications.

HSC 200 Environmental Health & Human Health 3 Credits
The health of any individual is a function of both our genetics and environmental factors. Environmental factors most broadly defined include the air we breathe, the water we drink and the food we eat. This course will focus on numerous examples of how bacteria, viruses, and exposure to environmental chemicals result in human diseases. Examples range from failures in public health infrastructure (cholera, diphtheria, river blindness, etc), failures to vaccinate (polio, measles, hepatitis, etc) and chemical exposures (birth defects, cancer, etc). There is also much known about how diet and nutrition can prevent diseases.
Prerequisite(s): BIO 10X Life Science course or any biology laboratory course or BIO 115 or 116 or 117.

HSC 210 Nutrition for Exercise and Physical Activity 3 Credits
An introductory exploration of evidence based nutritional theory and applications in sport and exercise.
Prerequisite(s): HSC 100 with a minimum grade of D or BCH 225 with a minimum grade of D.

HSC 302 Kinesiology 3 Credits
The purpose of this course is to explore human movement during performance of activities. This course will explore the relationship between anatomical structures and function in the production of movement. The application and relationships between the fundamental principles of mechanics and musculoskeletal system function will be addressed within the framework of clinical and research perspectives. Both qualitative and quantitative approaches will be applied towards a better understanding of human movement, the analysis of physical activity. Prerequisite(s): BIO 221 & MTH 105 (or equivalent) or POI.
Corequisite: HSC 303.

HSC 303 Kinesiology Lab 1 Credits
This lab is a co-requisite and must be taken with HSC 302.
Corequisites: HSC 302.

MTH 105 Algebra and Trigonometry 4 Credits
The course is an in depth and rigorous study of functions and graphs, equations and inequalities, polynomial and rational functions, exponential, and logarithmic functions, basic trigonometric functions and their inverses, trigonometric identities.
Prerequisite(s): A mathematics SAT score of 570, departmental placement or MTH 100 with a grade of C or higher.

MTH 120 Introduction to Applied Statistics 3 Credits
Collection and presentation of data. Measures of location and variation, sampling theory, hypothesis testing, confidence intervals, t-tests, chi-square tests, regression, and correlation. Emphasizes practical applications. Not open to business administration, chemistry, environmental, geosciences, marine sciences, math or liberal studies: marine ecological or environmental emphasis majors.
Prerequisite(s): MTH 102 or MTH 105.

PHY 101 Principles of Physics II 3 Credits
Continuation of Physics 100. Electrostatics, electricity, and magnetism; DC and AC circuits, physical and geometrical optics, introduction to elementary particle and quantum physics. Three hours of lecture per week. Prerequisite(s): PHY 100.
Corequisite(s): PHY 101L.

PHY 101L Principles of Physics II Lab 1 Credits
For students concurrently taking Physics 101. One three-hour lab per week.
Corequisite(s): PHY 101.

PHY 201 General Physics II 4 Credits
A continuation of the concepts developed in Physics 200. Electricity, electrical circuits, magnetism, Maxwell's equations. Light and optics, including lenses, interference, and diffraction. Three hours of lecture and one three-hour lab per week. Prerequisite(s): PHY 200, MTH 211 or concurrent enrollment.
Corequisite(s): PHY 201L.

PHY 201L General Physics II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): PHY 201.

PSY 100 Introduction to Psychology 3 Credits
This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 105 Introduction to Research in Psychology 4 Credits
Students will be introduced to the basic research methods used in psychology including surveys, experiments, and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 201 Statistics and Research Design 3 Credits
Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.
Prerequisite(s): Grade of C or better in PSY 105/105L.

PSY 283 Sport Psychology 3 Credits
This survey course will focus on the social and psychological factors related to performance and participation in sport and exercise, health, and injury rehabilitation settings. Two general questions will be explored: (a) how do social and psychological variables influence performance and participation in physical activity pursuits? And (b) how does physical activity participation affect the psychological well-being of the individual? To better understand these questions, this course will overview theoretical and methodological approaches to a variety of sport and exercise psychology topics, including: socialization, motivation, group processes, competition, and performance enhancement. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 345 Health Psychology 3 Credits
This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health-enhancing behaviors such as exercise and nutrition, as well as health-compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

Finance

Program Overview

The Finance major combines practical classroom training with internship opportunities to prepare students for a professional business career. Rider Finance majors find careers regionally and globally in business, industry, government service, and the non-profit sector. Career paths of our finance graduates include portfolio manager, financial analyst, banker, financial advisor, corporate financial manager, credit analyst, financial consultant and more.

Student Learning Outcomes

A Finance graduate will demonstrate the ability to:

- Compare and contrast the characteristics, features and uses of financial instruments from the corporate, investor and government perspectives;
- Compute the value of stocks, bonds and other financial securities using the appropriate valuation models;
- Calculate the returns and degree of risk associated with widely used investment strategies;

- Perform capital budgeting and other decision-making analyses in order to solve financial problems;
- Interpret the structure of financial markets and evaluate the role and functions of financial institutions within them.

Curriculum Overview

Rider offers three main areas of specialization within the Finance major. All programs lead to nationally recognized professional credentials that align with student career goals and demonstrate competency in the industry.

For students interested in pursuing a career in Financial Advising we offer a Concentration in Private Wealth Management (p. 253). This program prepares students to take the Securities Industry Essentials (SIE) exam that is now part of the Series 7 exam prior to graduation.

The Concentration in Investment Analysis (p. 253) prepares students for a variety of careers in investments and corporate finance. The program includes courses for students who plan to take the Chartered Financial Analyst ® (CFA) Level 1 Exam.

The Concentration in Financial Management (p. 253) helps prepare students to take the Certified Management Accounting (CMA) examinations. This certification can be very worthwhile for those who intend to enter careers in Corporate Finance.

There are many options that can meet your specific needs: highly motivated students with multiple interests may specialize in two or more finance concentrations or double major (e.g., Business Analytics is a valuable supplement to Finance). Alternatively, students may choose a well-rounded exposure to the many facets of financial decision making and forego any specific concentration.

Non-business majors can minor in Finance. Students can receive a non-business degree and at the same time acquire considerable business knowledge and skills from our Finance minor (p. 253).

Degree Offered

- B.S.B.A. in Finance

Program Website: Finance
Associated Department/College: Norm Brodsky College of Business (p. 563)

Related Programs

- Accounting (p. 20)
- Business Analytics (p. 94)

Finance Major Requirements

(18 credits)

Students must achieve a grade of "C-" or better in FIN 220 Introduction to Finance to be entered into the Finance major program.

In addition to the requirements below, students must select one area of concentration (p. 253) to complete.

Code	Title	Credits
Business Core		
See Business Core Requirements (p. 564)		
Major Requirements		
FIN 307	Financial Markets & Institutions	3
FIN 309	Intermediate Corporate Finance	3
FIN 312	Investments	3
Three upper level FIN electives (300-400 level), excluding FIN 491 Finance Internship and FIN 399 Finance Co-op.		9
Total Credits		**18**

Students must achieve a grade of at least "C-" in each of the major courses with a minimum GPA of 2.0 in the major. Finance concentrations have stricter requirements that are designed to assist you in identifying the correct path within the discipline.

Finance Minor Requirements

(Available to all non-business majors)

(18 credits)

Code	Title	Credits
ACC 210	Introduction to Accounting	3
ECO 201	Principles of Microeconomics	3
FIN 220	Introduction to Finance	3
Select three of the following:		9
FIN 305	Personal Financial Planning	
FIN 307	Financial Markets & Institutions	
FIN 308	International Finance	
FIN 309	Intermediate Corporate Finance	
FIN 312	Investments	
FIN 315	Financial Modeling	
FIN 330	Corporate Cash Management	
FIN 350	Entrepreneurial Finance	
FIN 360	Fixed Income and Derivatives	
FIN 370	Financial Analysis and Ethics	
FIN 405	Private Wealth Management	
FIN 412	Investment Analysis	
Total Credits		**18**

Students must achieve a minimum 2.0 GPA in the minor with no course grade below a "C-."

Finance Concentrations

Concentration in Private Wealth Management (p. 253)

Concentration in Investment Analysis (p. 254)

Concentration in Financial Management (p. 254)

Concentration in Private Wealth Management

(21 credits)

The Concentration in Private Wealth Management (PWM) prepares students for a career as a Financial Advisor. The course sequence will provide a foundation for students to take the Securities Industry Essentials (SIE) (https://www.finra.org/industry/essentials-exam/) exam during their senior year prior to graduation. The SIE is a portion of the Series 7 exam required by all brokerages and advisory firms and is the entry-level credential that all financial advisors must earn in order to advance in their career in Finance. Students will undergo frequent benchmark testing through their finance courses, assessing necessary knowledge and thinking to achieve mastery. (A double major or minor in Business Analytics (p. 94) is a recommended complement. Students who are sales-oriented may consider the concentration in Financial Services Marketing.)

Admission
This program is only available to Rider undergraduate Norm Brodsky College of Business students majoring in Finance. With the exception of Finance-Accounting double majors, all Finance majors with a GPA of 2.50 who have completed 30 credits are automatically enrolled in the Concentration in PWM. Transfer students entering with 30 credits are automatically enrolled in PWM during their first semester.

Finance-Accounting double majors are permitted to enroll in this concentration at their discretion. Students can switch to or add the concentration in Financial Management, if desired, after earning 30 credits. Students may “opt-out” of having a concentration with permission of the Department Chair.

Graduation Requirement
A minimum cumulative GPA of 2.50 at graduation and a minimum grade of C is necessary in each of the following courses:

Code	Title	Credits
ACC 210	Introduction to Accounting	3
ACC 220	Managerial Uses of Accounting	3
FIN 220	Introduction to Finance	3
FIN 305	Personal Financial Planning	3
FIN 307	Financial Markets & Institutions	3
FIN 312	Investments	3
FIN 405	Private Wealth Management	3
Total Credits		**21**

Concentration in Investment Analysis

(15 credits)

This program prepares students for a variety of careers in investments and corporate finance. By taking the required courses for the program, participants will receive in-depth training involving investment tools, valuation of assets, and management of investments that will position them to enter the fields of security analysis and portfolio management. Although the focus of the program is on investments, the knowledge that participants gain from the required courses is highly valued in other finance fields such as financial planning and treasury management. (A double major or minor in Business Analytics is a recommended complement).

This program is also designed to prepare students for the Chartered Financial Analyst (CFA) Level 1 Exam (https://www.cfainstitute.org/programs/cfa/exam/level-i/). The CFA designation is globally recognized by employers and investment professionals. The content of the required courses for the concentration, along with the other required courses for a business undergraduate degree, cover a significant portion of the CFA Level 1 Exam curriculum.

Admission
Rider undergraduate Norm Brodsky College of Business students majoring in Finance or double-majoring in Finance may apply for this concentration after completing 60 credits. Students enrolled in the Concentration in Private Wealth Management are encouraged to add this second program if they meet the following criteria:

- minimum cumulative GPA of 3.25
- minimum grade of "B" in FIN 220

Code	Title	Credits
Required Courses for the Concentration:		
FIN 309	Intermediate Corporate Finance	3
FIN 312	Investments	3
FIN 360	Fixed Income and Derivatives	3
FIN 370	Financial Analysis and Ethics [1]	3
FIN 405	Private Wealth Management	3
Total Credits		**15**

[1] Students who are a double major in Finance and Accounting are permitted to waive FIN 370.

Graduation Requirement:

Students must have a minimum GPA of 3.25 in the 15 semester hours of required coursework and a minimum cumulative GPA of 3.25 in order to successfully complete the program.

Concentration in Financial Management

(12-15 credits)

This program prepares Finance majors for careers in Corporate Finance that combine skills in both finance and accounting. Corporate Finance is used by both financial and non-financial firms, and by investment banks that help firms raise capital. The program is also designed to prepare students for the Certified Management Accountant (CMA) (https://www.imanet.org/cma-certification/?ssopc=1) examinations that students are encouraged to complete prior to graduation. This credential is valued in a number of careers relating to both Corporate Finance and Accounting. (A double major or minor in Business Analytics (p. 94) is a recommended complement.)

Admission
Rider undergraduate Norm Brodsky College of Business students majoring in Finance or any other business discipline excluding Accounting majors may choose this program after completing 30 credits and a minimum cumulative GPA of 2.50.

Graduation Requirement
A minimum cumulative GPA of 2.50 at graduation and ~~a~~ minimum grade of C is necessary in each of the following courses:

Code	Title	Credits
Required Courses:		
ACC 302	Cost Management	3

FIN 309	Intermediate Corporate Finance	3
FIN 315	Financial Modeling	3
FIN 370	Financial Analysis and Ethics [1]	3
Total Credits		**12**

[1] The FIN 370 course requirement can be satisfied by completion of both ACC 310 and ACC 311.

4-Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

*** Students are required to complete 6 credits of International Business Electives which can be fulfilled as major course elective (FIN 308 International Finance) or free elective courses.**

Notes:

- This accelerated plan assumes no AP or other credits were transferred into Rider University.
- Business Honors students will have a different sequence.
- Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.
- Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, FIN 399 or FIN 491).

Courses and Descriptions

FIN 200 Managing Your Money 3 Credits

An introduction to the analysis of a wide range of financial decisions which individuals encounter over their careers and lifetime. Topics include financial goals, tax planning, home ownership versus renting, consumer credit, money management and investments, and managing risk with insurance. This course is open to all Rider students, and it counts as a free elective or a business elective. It cannot be used as finance elective.

FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk

and return, capital budgeting, cost of capital, and international financial management.

Prerequisite(s): ACC 210 and ECO 201.

FIN 305 Personal Financial Planning 3 Credits

This course focuses on practical issues and problems involving personal financial planning, budgeting, use of credit and banking regulations, behavioral finance and investments, tax planning, education and retirement planning. Other topics to be covered include: risk exposure identification and mitigation, legal aspects of insurance, insurance policy needs analysis and selection. Students will gain practical knowledge of various types of insurance, including: life insurance, property and casualty insurance, health and disability insurance. An important objective of the course is to provide the student with the tools that are utilized in making personal financial decisions and how to apply those tools for a variety of financial needs. Students will be introduced to the financial planning process and how to analyze and prepare financial planning statements. Students will be expected to present 2 group case studies as part of the course.

Prerequisite(s): FIN 220.

FIN 307 Financial Markets & Institutions 3 Credits

This course provides an introduction to the organization and behavior of financial markets and institutions in the economy. The factors determining security prices and interest rates in the money and capital markets are analyzed. An overview of all major financial institutions is presented. In addition, market returns, the regulatory environment, and monetary policy are examined.

Prerequisite(s): FIN 220 or concurrent with FIN 220.

FIN 308 International Finance 3 Credits

Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.

Prerequisite(s): FIN 220.

FIN 309 Intermediate Corporate Finance 3 Credits

This course builds on and extends the concepts of financial management learned in FIN 220. The course examines long-term corporate financing and investment decisions and how those decisions interface with each other. Topics covered include: cost of capital, financial planning and analysis, capital budgeting, capital structure and dividend policy.

Prerequisite(s): FIN 220.

FIN 312 Investments 3 Credits

The fundamentals of investing in stocks, bonds, and other negotiable instruments are covered. Major topics include trading on securities markets, mutual funds, international investing, margin accounts, short sales, determinants of securities prices, and investment risks. Stock options, financial futures, convertible securities, and implications of taxes on investment decisions are also discussed.

Prerequisite(s): FIN 220.

FIN 315 Financial Modeling 3 Credits

Provides instruction in computer use beyond what is available in other finance courses. Topics include more sophisticated applications of computers in financial management, investments, and other areas of finance and business. Students work on cases and projects which require more advanced usage of spreadsheets and other software and databases.

Prerequisite(s): CIS 185 and FIN 220.

FIN 330 Corporate Cash Management 3 Credits

This course is designed for business students seeking an understanding of modern principles and techniques for corporate treasury management. The course material is useful for finance, accounting, and banking professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multi-national cash management, and other related topics.

Prerequisite(s): FIN 220.

FIN 340 Risk Management 3 Credits

This course examines the risk management process as applied to the firm as a whole. It integrates the management of all risks facing the firm: strategic, financial, hazard, and operational. Techniques for identifying risk, measuring and analyzing it, and selecting an appropriate treatment will be explored.

Prerequisite(s): FIN 220.

FIN 350 Entrepreneurial Finance 3 Credits

This course covers the techniques for acquiring financial resources as a firm advances through successive business stages: seed, start-up, struggling, growing, and stable. In addition, it examines recent trends in credit markets and the latest financial innovations as they impact the process of financing the venture's growth.

Prerequisite(s): FIN 220.

FIN 360 Fixed Income and Derivatives 3 Credits

This course centers on the quantitative portion of the Chartered Financial Analyst (CFA) level 1 curriculum, which includes materials on fixed-income risk and return, fundamentals of risk analysis, derivative instruments and risk management applications of option strategies. The goal is to help students prepare for the exam, as well as introduce them to a variety topics in finance.

Prerequisite(s): FIN 312.

FIN 370 Financial Analysis and Ethics 3 Credits

This course covers the topics of financial reporting and analysis and related ethical issues. The course would benefit students interested in augmenting their ability to understand, analyze and apply the information in financial statements. It provides essential knowledge for students seeking either the Certified Management Accountant (CMA) or Chartered Financial Analyst (CFA) certifications. Specifically, the course covers the Ethics and Professional Standards of the CFA curriculum, and materials on financial reporting quality and financial statement analysis for the CFA level 1 exam. Course goals are to help students prepare for the certification exams, as well as introduce all interested students to a variety of topics in financial analysis and ethics.

Prerequisite(s): FIN 312 or POI.

FIN 380 Real Estate 3 Credits

Real estate finance and related subjects in real estate are examined. Topics include measuring cash flows and taxes, valuation methods for real estate investment decisions, location and value in real estate, home ownership, legal matters, and financing methods and techniques.

Prerequisite(s): FIN 220.

FIN 399 The Co-Operative Experience 6 Credits

The co-op program provides students with an opportunity to work full-time in a company and apply what they have learned in their finance and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full¬ time employees. Eligible students include finance majors with at least junior status, a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in any finance coursework completed prior to the submission of the co-op application. Co-op credits can be applied toward business or free elective requirements but not toward finance elective requirements for majors. Grading is on a pass/fail basis.

Prerequisite(s): FIN 220.

FIN 405 Private Wealth Management 3 Credits

This course utilizes the Chartered Financial Analyst (CFA) curriculum and focuses on private asset management for high-net-worth investors. A wide range of topics including managing individual investor portfolios, taxes, estate planning, concentrated single-asset positions and individual risk management will be covered via lecture discussions. The main objective for the course is to help students develop the skills for a career in wealth management.

Prerequisite(s): FIN 305.

FIN 412 Investment Analysis 3 Credits

Real-world application of the concepts and techniques of investment analysis and portfolio theory introduced in FIN 312 (http://catalog.rider.edu/search/?P=FIN%20312). Students interact with and make recommendations to professional portfolio managers. Topics include analysis and forecasts of business conditions, market interest rates, international opportunities, and corporate profits. Emphasis is placed on the valuation of securities, stock selection, investment timing, technical analysis, and management of portfolio risk with options, futures, and other tools.

Prerequisite(s): FIN 312 or permission of instructor.

FIN 469 Special Topics in Finance 3 Credits

This course is occasionally offered, with the topics and prerequisites set by the finance program.

FIN 490 Independent Study: Research and Creative Expression 3 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation. This course can be used as a business or free elective, but with prior approval it can also be used as finance elective.

FIN 491 Finance Internship 1-3 Credits

The internship offers qualified junior and senior finance majors supervised employment with participating companies. The internship may be taken during the fall or spring semester or during the summer session. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a term paper that will be reviewed by the major's internship director. Internship credits can be applied toward business or free elective requirements but not toward finance elective requirements for majors. Grading is on a pass/fail basis.

Prerequisite)s): permission of instructor.

Finance Minor for Non-business Majors

Program Overview

The finance minor is designed to meet the needs of students who have a variety of career goals. For many types of jobs, it is essential that one understands the process of financial decision-making and the environment in which those decisions take place. To provide this understanding, the minor program consists of a well-rounded course of study in principles of macroeconomics, personal financial planning, management, entrepreneurial finance and other related courses.

This program is offered to all non-business students.

Fraud and Business Forensics Certificate

Program Overview

The Business Forensics certificate is designed to prepare students for a career in the field of fraud investigation and forensics. The curriculum encompasses fraud examinations, financial investigations, the psychology of white-collar crime, forensic interrogations and evidence management, and presentation for civil and criminal trials. A variety of teaching tools are employed including case studies, mock investigations, mock trials, guest speakers and professionals who are experts in their areas.

The program requires a track in either Accounting or Information Systems.

Admission

Current undergraduate Norm Brodsky College of Business students may choose to earn a certificate in Fraud and Business Forensics. Students who want to declare this certificate should do so through the Norm Brodsky College of Business Dean's Office in Sweigart Hall one semester prior to beginning coursework.

Degree Offered

Fraud and Business Forensics Requirements

(12 credits)

A certificate in Fraud and Business Forensics consists of four courses that can be completed as part of the undergraduate Accounting or Information Systems program. The certificate prepares students for a career in the field of fraud investigation and forensics by providing skills and tools to both prevent fraud from occurring and discovering fraud after it has occurred.

Code	Title	Credits
Required Courses		
ACC 321	Internal Auditing	3
ACC 325	Fraud Examination and Business Forensics	3
ACC 450	Business Forensic Application	3
Tracks		
Select one of the following:		**3**
Accounting Track		
ACC 320	Accounting Info Systems	
or ACC 400	Principles of Auditing	
Information Systems Track		
CIS 370	Systems Analysis and Design Project	
Total Credits		**12**

Students must achieve a minimum 2.5 GPA in the coursework required for the certificate, with no grade lower than a "C" in any course in the certificate.

Courses and Descriptions

ACC 320 Accounting Info Systems 3 Credits
This course provides an introduction to accounting information systems and enterprise-wide, process-focused information systems. Topics include quality of data for decision usefulness, internal control concepts and documentation tools, and database theory and applications.
Prerequisite(s): ACC 220 and CIS 185.

ACC 321 Internal Auditing 3 Credits
This course provides an introduction to the internal audit profession, including understanding the nature and activities associated with the internal audit process. Topics include: international auditing standards, risk assessment including internal control system evaluation, business processes, and the relationship of management and employee fraud to the internal audit process.
Prerequisite(s): ACC 220.

ACC 325 Fraud Examination and Business Forensics 3 Credits
This course provides an introduction to the prevalence of fraud in all forms of business, including the many methods used by employees and managers to perpetrate fraud. Topics include: the motivation of individuals to commit fraud, various types of fraud schemes perpetrated in the workplace, as well as the various tools and techniques that are used to investigate, detect and prevent fraud.
Prerequisite(s): ACC 210.

ACC 400 Principles of Auditing 3 Credits
This course provides an introduction to financial statement audits performed by certified public accountants. Topics include corporate governance, the audit environment, professional standards, audit methodology, and audit report preparation. The course also provides an overview of other types of assurance and non-assurance services provided by CPA firms.
Prerequisite(s): (ACC 310 with a minimum grade of C- or ACC 310P with a minimum grade of C-) or VL02 with a score of WV.

ACC 450 Business Forensic Application 3 Credits
This course provides an opportunity to perform complex investigative cases and analyses, thus demonstrating mastery of the knowledge and skills required to be effective forensic professionals. The course covers how to manage and present digital and technical evidence gathered for forensic litigation cases, including the ability to be an expert witness in court.
Prerequisite(s): ACC 325 and ACC 321.

CIS 370 Systems Analysis and Design Project 3 Credits
Topics include modeling techniques and methodologies to address the planning, analysis, design, and implementation of high quality systems, delivered on time and within budget. Using rapid application development tools, students will also construct an operational system within the span of a single semester. Issues and tools related to the management of project teams are also discussed.
Prerequisite(s): CIS 330.

French

Program Overview

Students of French students at Rider acquire an international perspective and a unique intercultural sensitivity. Advanced foreign language skills combined with intercultural expertise increase the employment prospects of our students in the global marketplace of the 21st century.

A minor in French offers students the opportunity to receive a practical grounding in the French language and culture through a challenging curriculum which may include study abroad. In addition, our language, literature, film, and culture courses prepare students to understand cultural diversity abroad and at home, to appreciate their own language and culture, and to gain global awareness. An individual fluent in another language acquires insight into the world in which we live. Faculty engagement in research and teaching excellence combines with our unique "accent on the individual" perspective through advisement and co-curricular opportunities to create a challenging yet supportive atmosphere in which students can realize their potential.

A minor in French will also complement many degree programs in business, education, music, and the liberal arts.

Students have access to the Foreign Language Media Center with 25 computer workstations with internet access for self-paced work and classroom instruction including interactive audio, video, and text-based materials.

Curriculum Overview

Classes in the French minor include an introduction to French literature, French composition and translation, French for Business and the professions, French culture and French phonetics, and conversation. Students also study literature, culture and liberal arts. Students are strongly encouraged to spend one semester abroad.

Student Learning Outcomes

Graduates with a minor in French will be able to:

1. demonstrate communicative competence in French;
2. discuss cross-cultural topics;
3. analyze and critique the products, practices, and perspectives of world cultures of the French and Francophone communities;
4. compare and contrast value systems across cultures.

Honors Programs in Languages, Literatures and Cultures

The department faculty will identify prospective honors students at the earliest possible moment and offer them challenges and encouragement to develop to their highest potential. A student who has a 3.25 cumulative average and a 3.5 in the major may be invited by the department, upon recommendation of a faculty member, to become a candidate for the 3-credit honors thesis or capstone project. Details of the thesis or capstone project will be arranged to accommodate the interests of the individual student.

The thesis/capstone project is completed during the senior year. It represents the culmination of a student's academic experience and is an irreplaceable learning experience for the development of research, writing, and critical thinking skills for graduate school admissions and success, as well as work in numerous careers. Students who successfully complete the thesis or capstone project and retain the required cumulative and major grade point average will graduate with honors.

Degree Offered

- Minor in French

French Minor Requirements

(18 credits)

Code	Title	Credits
FRE 200 & FRE 201	French III and French IV [1]	6
Select four French courses at the 300-level or above from the following list:		12
FRE 300	French Composition/Translation	
FRE 301	French for Business	
FRE 305	An Introduction to French Literature	
FRE 311	French Culture	
FRE 320	French Phonetics and Conversation	
FRE 422	Cultural Expression in French Film and Television	
FRE 425	Portrait of the Hero in French Fiction	
FRE 430	Mask & Reality in French Theater	
FRE 435	Self in French Prose & Poetry	
FRE 440	A Quest for Identity: Francophone Literature and Culture	
FRE 490	Independent Study: Research and Creative Expression	
FRE 491	Internship in Foreign Languages	
FRE 496	Special Studies	
Total Credits		**18**

[1] Two advanced (300- or 400-level) courses will be substituted upon demonstrated proficiency.

Some of the requirements for the minor may be met by Study Abroad by agreement with the department. Students must enroll in at least one upper-level course upon completion of a Study Abroad program.

Courses and Descriptions

FRE 100 French I 3 Credits
Conversational French is taught through basic vocabulary and grammar building. Students will enjoy an immersion-style method emphasizing real-life situations and vocabulary in authentic cultural context, through an interactive textbook, videos, on-line resources, and oral/aural skill building using the technology in the Foreign Language Media Center to enhance learning. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.
Prerequisite(s): Placement test if French has been studied elsewhere.

FRE 101 French II 3 Credits
Building on learning in French I, students will begin to converse using more complicated grammatical structures within immersion-style classroom interactions. While the focus is still on conversation and aural skill building, composition skills receive greater emphasis. Students will enjoy an interactive textbook, Internet usage, and authentic videos shot on location in France. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.
Prerequisite(s): FRE 100 or placement test.

FRE 200 French III 3 Credits
This course builds on linguistic skills previously acquired through an emphasis on conversation and oral comprehension, and through vocabulary building. Grammar study is continued at a more advanced level, and students begin to read short passages focusing mainly on francophone culture and civilization. Film clips, Internet resources, and other computer-aided learning tools are used to create a dynamic immersion-style learning experience. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.
Prerequisite(s): FRE 101 or placement test.

FRE 201 French IV 3 Credits
While continuing the emphasis on aural/oral production and grammar and vocabulary building, short passages of greater complexity taken from literary texts, newspapers, and magazines will become the focus of conversation/composition activities. Technological resources will continue to enhance the immersion-style learning experience consistent with a course in advanced French. Successful completion of this course, or its equivalent, serves as a prerequisite for French courses at the 300 and 400 level. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.
Prerequisite(s): FRE 200 or placement test.

FRE 300 French Composition/Translation 3 Credits
An in-depth study of style, shades of meaning, and correctness of expression. Translation of business/professional/scientific/political texts will receive emphasis, and students will continue to perfect their writing skills, and review and improve advanced grammatical structures.
Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 301 French for Business 3 Credits
The fundamentals needed to survive in the French professional and business world are taught. Students will continue to perfect oral/written/aural skills while learning about the cultural climate within which these skills will be used. Students will learn how to prepare effective business/professional correspondence and, through role-playing activities, will use their knowledge in such real-life situations as interviewing, telephone conversations, and business meetings.
Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 305 An Introduction to French Literature 3 Credits
A chronological overview of the evolution of French literature from the Middle Ages to the present. Study and interpretation of selected works, authors or literary movements through the Renaissance, the classical period, Enlightenment, romanticism, realism, naturalism to representative works by authors of our century from Proust to existentialism, the nouveau Roman, theatre absurde and beyond.
Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 311 French Culture 3 Credits
A study of modern France and French value orientations as they are rooted in tradition and history and continue to shape everyday life as well as institutions, social organizations, artistic expression, education, attitudes and human interaction. A comparative approach will examine the underlying differences between France and the United States. Classes are in English.

FRE 320 French Phonetics and Conversation 3 Credits
This course is an introduction to French phonetics and is designed to help students further develop their skills in speaking French accurately and fluently. The course requires students to learn basic linguistic symbols and the phonetic alphabet as a theoretical step toward improving articulation and pronunciation. Moreover, special emphasis will be placed on the development of vocabulary and of appropriate communication techniques to participate in discussions in French. The course will be a mix of lectures, class discussions, debates, face-to-face conversations, and role games requiring a strong active participation. Counts toward major and minor requirements.
Prerequisite(s):FRE 201 or above, or placement test at 300-level or above.

FRE 422 Cultural Expression in French Film and Television 3 Credits
A systematic analysis of selected French films and television broadcasts will reveal cultural value orientations as they relate to love, family, community, leisure, work, social, and political organization. A comparative approach will stress the underlying cultural differences between France and the United States. Course taught in French.
Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 425 Portrait of the Hero in French Fiction 3 Credits
This course deals with modern French fiction and its depiction of the role of the hero as a figure who gradually loses control over his fate (Stendhal, Balzac) and is changed into someone who struggles against ever increasing odds, only to be finally vanquished (Flaubert). The main character may find fulfillment in recollections of the past (Proust), explore the moral parameters of existence (Gide, Camus) or become the incapacitated anti-hero of Beckett's novels. Course taught in French
Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 430 Mask & Reality in French Theater 3 Credits
A study of theater through the optic of a unifying theme: the mask and reality. The goal is to gain a greater appreciation of the art of dramatic illusion whereby actors, while wearing the masks of the characters they play, allow us to examine ourselves and reality in true, unmasked form. Playwrights to be studied will range from the classical theater of Racine and Corneille, through the modern avant-garde, existentialist and Theater of the Absurd works of such playwrights as Ionesco and Beckett. Course taught in French.
Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 435 Self in French Prose & Poetry 3 Credits
Are we determining or pre-determined creatures? What is our essential nature? Is the quest for salvation justified? A study of the historical, political, and social realities in which the texts were composed will shed light on the concept of the self. Representative authors from the Renaissance to modern times will include: Montaigne, Descartes, Pascal, Montesquieu, Rousseau, Hugo, Baudelaire, Apollinaire, Sartre, Camus, Duras, Sarraute, Colette, de Beauvoir. Course taught in French.
Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 440 A Quest for Identity: Francophone Literature and Culture 3 Credits
This course introduces the cultures of countries or regions where French is used either as the (or one of the) official language(s) or, in a less official capacity, by a segment of the population. In readings, discussions, songs, film viewings, and written assignments, students will experience the Francophone cultures of specific areas and the amazing diversity of the Francophone world. They will also explore the difficult relation of the Francophone countries with France. The course considers issues of social status, history, resistance, and identity. Counts toward major and minor requirements. Course taught in French.
Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 490 Independent Study: Research and Creative Expression 1-4 Credits
Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

FRE 491 Internship in Foreign Languages 1-4 Credits
A supervised work experience in an approved organization to gain knowledge of the importance and interrelationship of foreign languages and cultures in the workplace. Placements can be made in international governmental agencies, international trade associations, multinational corporations, social service agencies, and other appropriate workplace environments both in the United States and abroad. With permission of the supervisor and faculty advisor, a three-credit internship may be substituted for a collateral requirement as credit toward the major.
Prerequisite(s): students should have completed at least one 300-level course in the foreign language.

FRE 496 Special Studies 3 Credits
Offered as needed to complement the program in French. A seminar open to a variety of topics treating a particular author, period, genre or critical approach.
Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

Game and Interactive Media Design

Overview

Students will learn to analyze, conceptualize, and create games and interactive media, in addition to exploring motion-capture, animation, audio, non-linear narrative, software interface design, and user experience design. All students will complete courses covering media theory,

interactive system design, basic software development, visual art and design, and general education. Additionally, they will select electives focusing on areas such as visual design, 3D, audio design, narrative design, or project management. The degree culminates in a multi-disciplinary, year-long project, equipping students with the skills, theoretical framework, experience, and portfolio necessary for entry into the gaming industry or related interactive media fields.

Degree Offered

Game and Interactive Media Design Program Requirements

(55 credits)

Courses with the **GAM** prefix required for this major build upon your growing knowledge and should be taken in the sequence displayed in the table below:

Code	Title	Credits
Required Courses:		
ART 150	Digital Foundations	3
ART 106	Survey of Art History II	3
COM 105	Communication, Culture and Media	3
COM 131	Fundamentals of Video Production	3
or FTV 135	Filmmaking I	
COM 302	Communication Ethics	3
GAM 100	Game & Interactive Media Forum	0
GAM 120	Introduction to Game Logic	3
GAM 150	Intro to Game Studies	3
GAM 200	Game Design	3
GAM 201	Game Development I	3
GAM 290	G&IMD Portfolio Workshop	1
GAM 301	Game Development II	3
GAM 310	Special Topics in Game Design [1]	6
GAM 401	Game Workshop I	3
GAM 402	Game Workshop II	3
Elective Courses		
Select 12 credits from the following:		12
ART 103	Fundamentals of Drawing	
ART 230	Three-Dimensional Design	
ART 352	Motion Graphics	
ART 493	Special Topics in Studio Art	
CIS 200	Application Development with JavaScript	
CIS 325	User Experience Design	
COM 202	Color Theory	
COM 213	Typography	
COM 265	3D Graphic Animation	
COM 365	Graphic Animation	
COM 367	3D Graphic Animation II	
ENG 304	Creative Writing: Fiction	
ENG 312	Creative Writing: Screenwriting	
FMS 286	Writing Short Screenplays for Digital Cinema	
FTV 235	Filmmaking II	
FTV 221	Animation: History, Art, Industry & Culture	
FTV 236	The Aesthetics of Filmmaking	
FTV 238	Screenplay Fundamentals	
FTV 241	Sound Design	
FTV 435	Filmmaking III	
GAM 491	Internship in Game Design	
MUS 113	Popular Music Theory I	
MUS 213	Digital Composition of Popular Music	
MUS 220	Songwriting	
MUS 313	Digital Synthesis	
MUS 316	Digital Mixing and Mastering	
SPT 250	Introduction to the Business of Sports	
Total Credits		**55**

[1] GAM 310 Special Topics in Game Design must be taken twice with different topics to meet the requirement.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Courses and Descriptions

ART 103 Fundamentals of Drawing 3 Credits
An intensive study of drawing techniques in charcoal, pencil, and pen and ink.

ART 106 Survey of Art History II 3 Credits
The history of Western art, architecture, sculpture, painting from the Renaissance to the present, emphasizing the relation between the arts and ideas of each period.

ART 150 Digital Foundations 3 Credits
Industry standard digital tools are used to explore the basic concepts of composition, form, texture, value, and color in two-dimensional design. Further consideration of digital formats and technologies in the visual arts will be highlighted.

ART 230 Three-Dimensional Design 3 Credits
Beginning problems in traditional sculptural materials (clay, wood, stone) and design-construction in mixed media.

ART 352 Motion Graphics 3 Credits
This course will provide an introduction to the use of industry standard tools and methods employed in motion and animation design. Concepts of composition, form, style, and continuity of motion will be key. Focus will be placed on 2D rendering with contemporary tools, as well as underlying theory and critique. Consideration of cross-media techniques utilized in game design, streaming media, film and television will be highlighted.
Prerequisite(s): ART 150.

ART 493 Special Topics in Studio Art 3 Credits
Study in drawing and painting of a particular style, such as abstraction or subject, such as still life; or particular aspects on a museum collection, such as the Metropolitan.
Prerequisite(s): ART 103 and ART 105 or Permission of Instructor.

COM 105 Communication, Culture and Media 3 Credits
Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 131 Fundamentals of Video Production 3 Credits
Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 202 Color Theory 3 Credits
Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 213 Typography 3 Credits
Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 265 3D Graphic Animation 3 Credits
Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation using Maya software. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 302 Communication Ethics 3 Credits
Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 365 Graphic Animation 3 Credits
Students receive an education in motion graphics and animation theories, development techniques, and preparation for various multimedia applications. Emphasis is placed on the design principles used in motion graphics and animated communication to effectively convey information in an entertaining and engaging manner. The course covers the integration of sound and imagery through graphic animation techniques, compression, rendering, input/output file formats, and delivery. Projects include the creation of web banner ads, title sequences, a music video, and an original final project. The primary software for this course is Adobe Photoshop, Adobe AfterEffects, and a taste of 3D animation using Maya. Students will be expected to participate in critiques of professional animation designs in order to learn to critically evaluate their own work and their fellow students' work.
Prerequisite(s): COM 262 or permission of instructor.

COM 367 3D Graphic Animation II 3 Credits
Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.
Prerequisite(s): COM 265.

CIS 200 Application Development with JavaScript 3 Credits
In the early 1990s, Tim Berners-Lee created a set of technologies to allow information sharing at the CERN particle accelerator in Europe. These technologies dramatically changed the face of computing and became what we know today as the Web. Understanding how to develop and manage applications for the Web is a requirement for the information system professional. Because of the ease of development, deployment, maintenance and general scalability of Web applications, this approach to building and managing applications has become the de facto standard for business application development. This class will examine Web application development in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications, how to develop Web pages using HTML and CCS, how to control user interaction with those pages using the JavaScript programming language. The programming basics of variable declaration and usage, program flow of control, function declaration and calling, and object usage and declaration will also be shown. The use of the JQuery Javascript library to ease the development of Web pages will also be shown.

CIS 325 User Experience Design 3 Credits
This course focuses on the critical role user experience plays in today's technology-driven business world. While technology advances make the design of functionality more readily in interactive products, usability plays a critical role in determining their success in the real world. Increasingly, business leaders realize the need to consider the emotional and social experiences as well as functional requirements and the steps users take to complete a task. This course explores User Experience Design (UXD), and its strategic importance in creating competitive advantage. Students will be able to discover, define, develop, and deliver a complete user experience. They will understand the role of usability and design principles, build innovative and pleasurable user experience prototypes, and validate them to achieve human, social, and business goals.

ENG 304 Creative Writing: Fiction 3 Credits
Students write original fiction and analyze the techniques of writing fiction in discussion of both their own drafts and published examples of the form.
Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 312 Creative Writing: Screenwriting 3 Credits
A workshop teaching and analyzing how students write for the screen, both television and film, that pays particular attention to the demands of the genre. Through reading and writing assignments, students will discuss and analyze the development of their own dramatic scripts for production. A portfolio of revisions will serve as a final for the course.

FMS 286 Writing Short Screenplays for Digital Cinema 3 Credits
Writing Short Screenplays for Digital Cinema will focus solely on the creation of a short screenplay for digital film. The course will ask that students conceive of and execute a viably producible screenplay, shooting script, and industry pitch for the modern market.

FTV 135 Filmmaking I 3 Credits
Filmmaking I introduces students to basic film and television production theories, techniques, and applications. Students will gain competency in a number of production areas including composition, lighting, filmic storytelling, sound, production planning and editing. As well as gaining practical production experience, students will also be introduced to basic art theory in relation to composition and visual storytelling.

FTV 221 Animation: History, Art, Industry & Culture 3 Credits
An introduction to the history of animation in film and television, this course will explore animation as art, industry, and purveyor of culture. Through this course, students will gain a greater appreciation for aesthetics, technology, and the cultural and communication theories impacting and influencing the genre, and gain a greater understanding of the role played by key individuals and companies in the development of both iconic characters and in the shaping of an industry. Students will view a variety of important animated films and television programs and discuss the artistic, technical and narrative developments in animation from the early 20th century to the present. This course will provide students with a more nuanced understanding of the magic of animation and its impact and influence on culture and society throughout the globe.

FTV 235 Filmmaking II 3 Credits
This course will build on the basic technical proficiency gained in COM 135 as applied to narrative filmmaking. Working as individuals and in groups, students will develop skills in narrative cinematic storytelling, and gain a basic proficiency in filmmaking theory, techniques and applications. Students will gain competency in a number of production areas including idea generation and scripting, production planning, cinematography, lighting, sound and editing.
Prerequisite(s): FTV 135 or COM 131.

FTV 236 The Aesthetics of Filmmaking 3 Credits
Introduces general students (other than FTV majors or FMS minors) to a greater appreciation of film art and the various generic and artistic approaches adopted by noteworthy filmmakers through the course of film history. Through film viewing, class discussion, readings, essay writing and creative responses, students will learn how formal choices in cinematography, production and sound design, screenwriting, and acting shape cinematic themes and atmosphere, while forging viewer identification and eliciting emotional response. Among readings will be those on introductory film theory, key works of film criticism, interviews with filmmakers, and scholarship on the aesthetics and ideological underpinnings within various film genres and in the work of selected filmmakers.

FTV 238 Screenplay Fundamentals 3 Credits
Screenplay Fundamentals will instruct students in how to write for the screen. Students will learn how to convey story and character through the medium of film and television, how to write effective dialogue, and understand the basics of dramatic writing and scene structure.
Prerequisite: COM 131.

FTV 241 Sound Design 3 Credits
This course is an introduction to sound design and editing for film, television and game design. The course examines the use and placement of sound and music in visual media from both an artistic and technological perspective, and discusses how sound and music might be used to convey meaning, enhance and strengthen visual elements, provide narrative cues, create a sense of depth and place, focus attention on actions and provide structure and ambience to the visual. Along with covering the basics of sound recording, microphone selection and use, and mixing techniques, topics such as ADR (Automatic Dialog Replacement), Foley, sound and music synchronization and sound in post-production are covered. Numerous examples of sound design for film, television and gaming will be analyzed and discussed in class.

FTV 435 Filmmaking III 3 Credits
This is an intensive hands-on course in advanced digital filmmaking. Students will gain proficiencies in a number of filmmaking areas including production planning, aesthetics, scripting, script breakdown, camera movement, selecting and directing talent, creating scenes and sequences, visualizing action, establishing mood and conflict, as well as advanced lighting, sound and digital editing techniques. The students' use of high definition digital imaging systems as a medium for narrative cinematography will be developed and refined. In addition, students will explore how filmmaking techniques and technology can impact the visual storytelling process. Students will work cooperatively in groups, modeling the interdependent structure of professional film crews. Throughout the class, there will be an important integration of theory and practice which will enable students to produce meaningful film projects that will not only be technically effective, but strong in content and context as well.
Prerequisite(s): FTV 235.

GAM 100 Game & Interactive Media Forum 0 Credits
Game & Interactive Media Forum is a once-per-month gathering of all Game majors from across the university's different Colleges. The forum will be an opportunity for students focusing on different backgrounds to engage together in industry-related topics and skills.

GAM 120 Introduction to Game Logic 3 Credits
This course introduces students to strategies for technical implementation of digital games. Students will learn design patterns for popular genres and formats through small game development projects and work toward a final project in the format of their choice. Weekly lessons will include a mix of technical demos, level design strategies, and lab time for troubleshooting and playtesting.

GAM 150 Intro to Game Studies 3 Credits
Intro to Game Studies surveys the history of video games and gaming culture against the social and political contexts that shape and are shaped by games.

GAM 200 Game Design 3 Credits
Game Design introduces students to the basic concepts of game design, covering game rules, iterations, and playtesting. Students will work with hands-on material to develop design techniques and instincts outside of digital work spaces.

GAM 201 Game Development I 3 Credits
Game Development I introduces students to industry-standard software and the basics of user experience and collaborative game design.
Prerequisite(s): ART 150, CIS 200 and GAM 200.

GAM 290 G&IMD Portfolio Workshop 1 Credits
This course is designed to help students prepare a typical portfolio for application in the game and interactive media design fields. Focus will be placed on delivery and communication skills. The course will culminate in a graded portfolio review session.
Prerequisite(s): GAM 201.

GAM 301 Game Development II 3 Credits
Game Development II extends students' knowledge of industry-standard software, building on GAM 201 and progressing toward advanced concepts of user experience and collaborative game design.
Prerequisite(s): GAM 201.

GAM 310 Special Topics in Game Design 3 Credits
Special Topics in Game Design applies students' knowledge of game design and the development software that helps them realize their design toward specific prototyping goals. The subject of GAM 310 will rotate each semester; GAM majors must complete two semesters of 310 without duplicating topics.
Prerequisite(s): GAM 200.

GAM 401 Game Workshop I 3 Credits
Game Workshop I places students in multidisciplinary project teams. Each team will create a game prototype over the course of the semester that demonstrates each student's mastery of their area of specialization and the team's ability to work together.
Prerequisite(s): GAM 301.

GAM 402 Game Workshop II 3 Credits
Game Workshop II places students in multidisciplinary project teams and builds on skills developed in Game Workshop I.
Prerequisite(s): GAM 310.

GAM 491 Internship in Game Design 3-6 Credits
Internship in Game Design places students in industry work environments, overseen by a site supervisor.
Prerequisite(s): GAM 310.

MUS 113 Popular Music Theory I 3 Credits
Popular Music Theory I covers basic elements of music, including the reading of music notation in traditional formats as well as in audio wave form and in the visualization of standard Digital Audio Workstations. Practice in scales and chords; ear-training in rhythm, pitch, and timbre. Techniques may be applied to the student's own instrument (e.g., guitar, piano, voice)
Corequisite(s): MUS 113L.

MUS 213 Digital Composition of Popular Music 3 Credits
This course is an introduction to making music in a Digital Audio Workstation (DAW). Students learn software techniques by composing in multiple genre styles.

MUS 220 Songwriting 3 Credits
The Songwriting course is an introduction to songwriting in popular music styles. Students will learn to compose music by themselves and collaboratively. This course will develop comprehensive musicianship and compositional techniques, as well as further software skill development.
Prerequisite(s): MUS 113.

MUS 313 Digital Synthesis 3 Credits
This course continues with the software composition techniques begun in MUS 213. Students will create their own sounds through digital synthesis and incorporate those sounds into music composed in a variety of genre styles.
Prerequisite(s): MUS 213.

MUS 316 Digital Mixing and Mastering 3 Credits
Digital Mixing and Mastering is a practical skills class focusing on post-production skills in software interfaces. Students will learn how to work with multiple editing softwares and plug-in tools to achieve balanced, lively, professional mixes.
Prerequisite(s): MUS 216.

SPT 250 Introduction to the Business of Sports 3 Credits
This course is designed to introduce the student to the business of sports. Business principles, such as management, marketing, law, finance and economics will be applied to the business of sports. The course will also explore the various career opportunities in the world of sports.

Gender and Sexuality Studies

Program Overview

The minor in gender and sexuality studies allows students to explore the complex interactions among race, class, ethnicity, gender, and sexuality. Courses consider current debates on some of the key issues such as reproductive rights, LGBTQ+ rights, and sex and gender in work, health, communication, and law. Students in this minor will benefit by furthering their understanding of how gender, race, class, ethnicity, and sexuality affect politics, economics, and the way that individuals think and act. The minor may be used as a complement to a degree in business, liberal arts, and the arts.

The Certificate in Gender and Sexuality Studies will include similar topics, including issues like pay equity, gender equality, and human rights, all of which are relevant in today's workplace and in our everyday lives. Individuals in fields as varied as law, medicine, social work, business, journalism, education, and the creative arts can benefit from and provide workplace leadership on their understanding of the roles gender and sexuality play in local and global society.

Courses and Descriptions

CHI 307 Images of Women in Chinese Literature and Film 3 Credits
This course will introduce students to the (change of) status of women in China through literature and film. Students will explore the rich Chinese literary traditions and examine how the images of women are represented by both male and female writers/directors in fiction and film of different historical periods. In the process of such exploration and examination, students will also examine how the literary movements and their historical, social, cultural and political contexts shape, and are shaped by, each other. They will learn to understand how diverse the experiences of Chinese women are. While students will be exposed to both classic and modern/contemporary literary traditions, the focus will be on the latter, such as May 4th New Culture Movement, Maoist revolutionary literature, (Post-Mao) Wound/Scar Literature, Root-Searching Literature, etc. Classes are in English.

ENG 350 Sex and Sin in Early American Literature 3 Credits
A seminar on literature in the United States from its beginnings to 1800, emphasizing the changing and conflicted nature of religious beliefs and sexual identities in Early America. Students will read and analyze diverse literary genres including diaries, letters, essays, novels, short stories, poems, and sermons.

ENG 375 Literature and Sexuality 3 Credits
The study and application of theories of gender and sexuality in various periods of British and/or American literature. Possible course topics include the literature of AIDS, the literary history of sexuality, Gothic literature and sexuality, colonialism and desire, and sensibility and sexuality in the later 18th century.

GSS 100 Introduction to Gender Studies 3 Credits
An introduction to the role of gender in human experience, examining the biological, historical, literary, artistic, and institutional manifestations of gender, and exploring the intersections of gender, sex, and sexuality.

GSS 110 Race, Class and Gender in Contemporary American Society 3 Credits
This interdisciplinary course analyzes the ways in which race, class, gender and ethnic relationships shape the experience of all persons in this society. It examines the categories of race, class and gender as social constructs that have been historically developed and sustained by economic, social, political, and cultural factors. Note: This course is cross-listed with MCS 110. Students may only get credit for one course: MCS 110 or GSS 110.

GSS 200 Introduction to Women's Studies 3 Credits
An interdisciplinary investigation of traditional and contemporary gender roles, and of women's status, identity, and potential. Required for minor.

GSS 212 Gender, War and Peace 3 Credits
Through readings in literature, history, political science, philosophy, and psychology, the course will explore critically the myths linking feminine gender with pacifism and masculine gender with aggression. Various perspectives on peace and war, the history of peace movements, and women's as well as men's participation in war will be considered.

GSS 230 Women In Literature 3 Credits
A range of literary presentations of the female experience and of the conditions of women's lives is explored. These works are placed in historical and social contexts in order to see behind and beyond traditional literary conventions. Cross-listed with ENG 230.

GSS 235 Current Feminist Issues 3 Credits
This course examines historical and contemporary debates about controversial issues involving women, gender, and equality. The course will highlight feminist concerns with race, class, sexuality, and gender norms, focusing broadly on society, culture, the economy, politics, and law. Students will learn to contextualize, analyze, and evaluate arguments on multiple sides of these controversies.

GSS 240 Sex and Human Nature 3 Credits
This course provides an introduction to the scientific study of human sexual behavior, mate choice, and reproduction. Questions of interest include: How is sex determined? How are males, females, and intersex individuals different biologically? How do individuals' sexual strategies tend to differ? Why do we experience sexual jealousy? Are humans actually evolved to form long-term pair-bonds? What determines sexual orientation? Answers to these questions will be considered in light of the reproductive science of humans and our evolutionary ancestors.

GSS 245 Popular Constructions of Gender and Sexuality 3 Credits
This course takes an interdisciplinary approach to investigate the constructs that society creates and maintains with relation to sexuality and gender. As we are increasingly confronted with images of gender and sexuality, it becomes vital to interrogate the origins of these images from a variety of disciplinary perspectives in order to analyze and critique these constructs. Students will be introduced to theoretical approaches to analyzing popular constructs of gender and sexuality from a variety of areas, including (but not limited to) the humanities, the physical sciences, and the social sciences.

GSS 300 Feminist Literary Criticism 3 Credits
This seminar explores the diversity within feminist literary analysis. Various national, ethnic and cultural standpoints are represented and the different as well as the common assumptions within feminist thought will be discussed.

GSS 309 Women in American History 3 Credits
Examines the roles, status, and influence of women from the colonial era to the present. Studies the origins and development of feminism, including legal, political, educational, economic, and sexual rights; and studies social feminism, including reform movements in such fields as abolition, prohibition, pacifism, child labor, and social welfare.

GSS 310 Special Topics 3 Credits
Studies in specialized areas of feminist scholarship. Topics change according to instructor and are listed in the course roster.
Prerequisite: one previous course in gender and sexuality studies or permission of instructor.

GSS 313 Gender and Ethics 3 Credits
An interdisciplinary seminar involving a concentrated study of recent works in feminist theory, with special attention to issues such as: Do men and women have different ethical perspectives and different styles of moral reasoning? How do the "ethics of care" differ from the traditional "ethics of justice?" Can the models of justice and care be integrated into a more comprehensive theory?.

GSS 318 Gender and Communication 3 Credits
Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GSS 318. Students may not get credit for both COM 318 and GSS 318.

GSS 319 Gender and Sexuality in American History 3 Credits
What makes a man, exactly, and what makes a woman? What kinds of sex are normal, and what kinds are abnormal? Who decides, and why? The answers to these questions are not fixed. Throughout American history, popular understandings of gender and sexual norms evolved in close relationship with the political, economic, racial, and social dictates of the time. This course will trace the evolution of ideas on sec and gender from the 18th century to the present using various historical sources including fiction and film, particular attention will be given to analyzing dominant models of proper behavior and the complex relationships of power enmeshed within them.

GSS 320 Sex, Gender, and Fairy Tales 3 Credits
From the early literary fairy tale by Italian authors, to 17th-century French women writers who named and popularized the genre, to the 18th- and 19th-century stories geared toward children, to Disney and beyond, students will analyze fairy tales to see what they tell us about gender and sexuality historically and today. Students will read classic fairy tales from around the world and look at feminist and queer retellings, examining how fairy tale themes and motifs permeate our culture.
Prerequisites: CMP 125 or BHP 150.

GSS 322 Witch Hunts: Femicide Through Centuries 3 Credits
We will look at the perceived definitions of "witch" and "witchcraft" in relation to establishing medieval to modern gender codes. Our detailed study of perceptions of witches and their practices will reveal the power dynamics, social constructions and definitions that aided in the demise of countless women labeled as "witches" throughout history. Considerable time will be spent in exploring the internal controversy within the field of witchcraft studies regarding the use of words such as "genocide," "femicide," and "gendercide.".

GSS 333 Gender and Sport 3 Credits
Typical thoughts of sport include ticket prices, player salaries, team rosters, and league standings; rarely is it viewed from a gender perspective. This course will go beyond the examination of Title IX to better understand the relationship between masculinity, femininity and sports. This course will examine various aspects of gender and sport, including media and gender representation, race and ethnicity, drugs and violence, men and masculinities, sexualities, policy and politics, the feminist critique of sport, the initiation rites and hazing in college sports, sports wagering, and the internationalization of sport, including but not limited to the Olympics and Paralympics.

GSS 350 Leadership and Community 3 Credits
Designed for all students whose future plans include community service, organizing, and leadership, this course will study organizing in response to domestic violence, discrimination on the basis of gender and sexuality, sexual harassment, and other issues that are significant for women and/or the LGBTQ community. Building coalitions, skills for leadership, and strategies for effective organization will be covered in readings and in class discussions and students will practice what they have learned by volunteering in a local nonprofit organization.

GSS 375 Transgender Narratives 3 Credits
An introduction for Gender and Sexuality Studies minors and other interested students to the interdisciplinary field of transgender studies. Students will learn to distinguish between transsexual, transgender, transvestite, and intersex identities; to explore cross-cultural gender diversity; to recognize diverse subcultural expressions of gender, such as cross-dressing, camp, and drag; to identify long-standing stereotypes about trans people; and to understand trans people's narratives about hormonal or surgical gender transition through literary and multimedia genres.

GSS 400 Seminar in Transcultural Gender and Sexuality 3 Credits
This seminar offers an opportunity for upper-level students to engage in a multidisciplinary study of the constructions of gender and sexuality in a variety of cultural contexts across the globe. Topics change according to instructor. Required for minor.
Prerequisite(s): Junior or senior standing.

GSS 490 Independent Study: Research and Creative Expression 1-4 Credits
Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

GSS 491 Internship 1-4 Credits

HIS 249 Women in Europe from Antiquity to the French Revolution 3 Credits
Traces the history of women in Europe from Rome to the French Revolution, covering the religious, social, political, and economic context in which women participated. Also offers a brief overview of theories and issues in women's history and gender history.

HIS 309 Women in American History 3 Credits
Examines the roles, status, and influence of women from the colonial era to the present. Studies the origins and development of feminism, including legal, political, educational, economic, and sexual rights; and studies social feminism, including reform movements in such fields as abolition, prohibition, pacifism, child labor, and social welfare.

HIS 342 Women in East Asia 3 Credits
Treats the history of the relationship between women and society in traditional East Asia and the modern transformation of their relationship.

MCS 110 Race, Class and Gender in Contemporary American Society 3 Credits
This interdisciplinary course analyzes the ways in which race, class, gender and ethnic relationships shape the experience of all persons in this society. It examines the categories of race, class and gender as social constructs that have been historically developed and sustained by economic, social, political, and cultural factors. Note: This course is cross-listed with GSS 110. Students may only get credit for one course: MCS 110 or GSS 110.

MGT 320 Managing Workforce Diversity 3 Credits
Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves. Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth. **Prerequisite**(s): MGT 201 or PSY 210.

PHL 230 Philosophy of the Sexes 3 Credits
Studies philosophical views of the differences between the sexes, sexual equality, love, marriage, and the family from ancient Greece to the 20th century. Texts from the contemporary women's and men's movements will also be examined. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

POL 280 Sex & Gender in International Politics 3 Credits
What's a student of political science, International Relations (IR), or another social science field to do about feminism? This is a question that has troubled IR for decades. While feminist debates engaged people in spaces outside the disciplines of political science and particularly IR, IR scholars did their best not to see the relevance of feminism for their own debates. That did not stop some feminists from rethinking key IR concepts like power, race and the state, but such contributions were largely ignored by IR scholars until very recently. It was only in the last decades, when feminist questions pushed their way onto the IR agenda through books, journals, and conferences, that feminism suddenly seemed attractive to IR scholars. Designed as an interdisciplinary course with a strong reference to Global and International Politics, this course will provide a basic introduction to some of the major global questions as seen through a feminist lens.

PSY 118 Psychology of Women 3 Credits
Examines the psychological development of women in our culture from birth to maturity, with an emphasis on the interaction of biological and social influences on personality, social behavior, and achievement of women. Investigates psychological sex differences in terms of current measurement approaches. Readings and text are drawn from psychological theory and research.

PSY 374 Psychology of the Family 3 Credits
This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the variety of ways family impacts development across the lifespan.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

SOC 205 Families 3 Credits
Examines families in the United States, past and present, emphasizing the variety of family experiences in different social contexts and the relationship between family life and social change. Includes comparative material on families in other countries and considers possible alternatives to current family forms.

SOC 304 Women and Law 3 Credits
Explores the social, economic, political and cultural context of laws relating to women and gender, such as workplace discrimination, divorce and child custody and reproductive rights. It examines how such laws have changed historically and the impact such laws have had on women as well as on men and on American social institutions, such as the family, politics, and the workplace. The course also examines women in the legal profession and their impact on the practice of law and legal reasoning.

SOC 312 Women in Society 3 Credits
Examines changes in women's roles and in male-female relationships. Focuses on impact of law, economy and social movements in shaping women's positions as wives and as workers. Explores theories and evidence concerning the nature and extent of sex differences. Attention to women's socialization through language, schools and media.
Prerequisite(s): SOC 101.

SOC 316 Feminist Social Thought 3 Credits
An introduction to feminist social theory, with emphasis on its breadth and variety. Special attention paid to the ways feminist theorists have analyzed the relationship of gender to other kinds of group differences.
Prerequisite(s): SOC 101.

General Business for Non-business Majors

Program Overview

Available to all non-business majors, the General Business minor at Rider University provides students an understanding of the language and basic concepts of business. A minor in business administration can complement any major and may expand career opportunities. Students outside of the Norm Brodsky College of Business can augment their understanding of business by joining business clubs, such as DAARSTOC (https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/programs-opportunities/clubs-organizations/), and participate in club events like the Accounting Society's guest speakers' nights.

Curriculum Overview

Students will learn foundational knowledge in business, including the fundamentals of economics and core concepts in financial accounting, management, finance and marketing. In addition, students will understand the legal environment in which business operates.

Degree Awarded:

- Minor in General Business

BUS 300	The Legal and Ethical Environment of Business	3
FIN 220	Introduction to Finance	3
Total Credits		**24**

A minimum of six courses must be taken in business administration and students must achieve a minimum GPA of 2.0 in the minor.

Courses and Descriptions

ACC 210 Introduction to Accounting 3 Credits
This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

BNS 250 Biostatistics 4 Credits
This course will assist students with acquiring the skills necessary to design, conduct, and interpret research studies. Emphasis will be on learning how to develop experimental designs to translate theoretical concepts into testable hypotheses. Experiments conducted during laboratory sessions will use laboratory mice and will use equipment for measuring animal behavior. Students will gain experience collecting, analyzing, writing and orally presenting their research results. Three hours of lecture and one three-hour lab per week. Prerequisite(s): MTH 105 or higher or placement into MTH 210, grade of "C" or better in one lab science course.
Corequisite(s): BNS 250L.

BUS 300 The Legal and Ethical Environment of Business 3 Credits
The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.
Prerequisite(s): 54 credits.

ECO 201 Principles of Microeconomics 3 Credits
Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output a re evaluated. Welfare, social control, monopoly, and income inequality a re explored in the light of price theory. The role of the United States in the world economy is explored.
Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits
This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.
Corequisite(s): ENV 200L.

FIN 220 Introduction to Finance 3 Credits
An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.
Prerequisite(s): ACC 210 and ECO 201.

MGT 201 Fund Management & Org Behavior 3 Credits
This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.
Prerequisite(s): minimum 30 credits completed.

MKT 200 Marketing Principles 3 Credits
This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.
Prerequisite(s): 15 credits.

MSD 105 Quantitative Methods for Business 3 Credits
The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.
Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

MSD 205 Business Statistics 3 Credits
This course is designed to provide students with fundamental concepts, knowledge and tools from statistics that may be useful in one's attempt to reach intelligent conclusions in real-world settings, particularly in business applications. The focus is on the normal random variable, sampling distributions, framework of estimation and hypothesis testing, as well as the one-way ANOVA and simple regression model.
Prerequisite(s): MSD 105.

MTH 102 Finite Mathematics 3 Credits
This mathematically rigorous course begins with a review of the rational numbers, repeating decimals, irrational numbers and non-repeating decimals. The elementary theory of sets is discussed with applications to surveys and data mining. This is followed by a discussion of the cardinality of infinite sets. An introduction to elementary number theory includes various applications. The Cartesian plane and the idea of a function and its graph are introduced with applications. Counting theory then precedes an elementary discussion of probability.

MTH 105 Algebra and Trigonometry 4 Credits
The course is an in depth and rigorous study of functions and graphs, equations and inequalities, polynomial and rational functions, exponential, and logarithmic functions, basic trigonometric functions and their inverses, trigonometric identities.
Prerequisite(s): A mathematics SAT score of 570, departmental placement or MTH 100 with a grade of C or higher.

MTH 120 Introduction to Applied Statistics 3 Credits
Collection and presentation of data. Measures of location and variation, sampling theory, hypothesis testing, confidence intervals, t-tests, chi-square tests, regression, and correlation. Emphasizes practical applications. Not open to business administration, chemistry, environmental, geosciences, marine sciences, math or liberal studies: marine ecological or environmental emphasis majors.
Prerequisite(s): MTH 102 or MTH 105.

MTH 210 Calculus I 4 Credits
Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.
Prerequisite(s): Math SAT 650 or higher or Math ACT score of 28 or higher or MTH 105 or MTH 106 with a grade of C or higher.

MTH 340 Probability & Statistical Analysis I 3 Credits
Theory of sets and probability; discrete and continuous random variables and probability distributions. Emphasizes foundations and utilizes the techniques of the calculus.
Prerequisite(s): MTH 212 or MSD 111.

PSY 201 Statistics and Research Design 3 Credits
Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.
Prerequisite(s): Grade of C or better in PSY 105/105L.

General Studies A.A.

Program Overview

This 60 credit program has been designed to provide both breadth and sufficient depth in the liberal arts at the associate degree (A.A.) level. Only 12 semester hours are allowed to be taken outside of the College of Arts and Sciences.

Students whose long-range goal is a bachelor's degree should consult with their advisor to determine the transferability of this program to one of the baccalaureate degrees offered by Rider.

Curriculum Overview

The flexible curriculum is designed to enable students to choose from a myriad of academic disciplines. Choosing an emphasis or concentrated area of study allows students to explore a specific discipline in depth.

Admissions Requirement

- Official transcripts from all institutions attended with a minimum 2.5 cumulative GPA

Degree Offered

- A.A. in General Studies

General Studies A.A. Program Requirements

(60 credits)

Code	Title	Credits
Liberal Studies Core		
LIB 200	Intro to Liberal Studies [1]	3
Basic Core		
CMP 120	Seminar in Writing and Rhetoric	3
CMP 125	Seminar in Writing and Research	3
COM 104	Speech Communication	3
Quantitative Course Elective [2]		3-4
Information technology [3]		3
Areas of Knowledge (p. 1126)		
Select courses from the Areas of Knowledge to complete the credit requirements for the Perspectives as shown below:		
Historical Perspective		6
Artistic and Intellectual Perspective		6
Contemporary Perspective		6
Natural World		3-4
Emphasis		

Students select a concentrated area of study from a liberal arts department. An appropriate introductory course from a department may be included. Students are encouraged to consult the CAS Dean's Office to select an emphasis	15
Free Electives	
Free elective hours may be taken in any department, provided the student meets any prerequisites and requirements imposed by the department offering the course.	6
Total Credits	**60-62**

1 LIB 200 is waived for students who transfer 30 or more credits in Liberal Arts. A free elective will be added.

2 The quantitative skills requirement can be met by successfully completing one course in college-level mathematics or statistics. For students who don't transfer such a course to Rider, popular offerings include MTH 102 Finite Mathematics, MSD 104 Intro to Quantitative Methods, MSD 105 Quantitative Methods for Business, MSD 205 Business Statistics, BDA 201 Introduction to Business Analytics, POL 230 Methods of Political Analysis, PSY 105 Introduction to Research in Psychology, PSY 201 Statistics and Research Design, or another mathematics course approved by an advisor.

3 The information technology requirement may be fulfilled by completing CIS 185 Information Systems Essentials. Students who possess sufficient computer experience can gain credit for CIS 185 through assessment (http://www.rider.edu/sites/default/files/docs/Credit_for_CIS_185.pdf).

Courses and Descriptions

CMP 120 Seminar in Writing and Rhetoric 3 Credits
Students will increase their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. This course counts towards the fulfillment of the Essential Competencies element of the CAS general education curriculum.

CMP 125 Seminar in Writing and Research 3 Credits
Introduces students to the process of library research and documented writing. Emphasis will be on the refinement of critical reading, thinking, and writing strategies applied to multiple sources and documented papers. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum. **Prerequisite**(s): CMP 120 or BHP 100.

LIB 200 Intro to Liberal Studies 3 Credits
Introduces students to the various perspectives and methods of the disciplines in liberal studies: natural and social sciences, humanities, and the arts. Students learn the multifaceted questions and answers offered by each discipline. They study the historical development of the university and the rise and transformation of liberal studies disciplines.

Global Supply Chain Management

Program Overview

Rider's award-winning global supply chain management program prepares students for one of the most in-demand specializations in today's business world.

Consistently honored as one of the top curriculums of its kind in the nation by research firm Gartner Inc., the GSCM program equips students with the skills and experiences needed for a career in the exciting field of global supply chain management.

Through every phase of a product's life cycle, global supply chain management professionals ensure that customers get the products and services they need and want — faster, better and more cost-effectively — from across town or around the world. They play a critical role to the successful functioning of businesses, healthcare, nonprofit agencies and governments.

Student Learning Outcomes

At the completion of the Global Supply Chain (GSC) Management degree, a GSC major will demonstrate the ability to:

- Apply knowledge of the components of global supply chains to address real world supply chain management (SCM) trade-offs and management problems.
- Develop appropriate SCM operating strategies.
- Recognize how organizations operate to comply with regional and international governing laws and cultural norms that affect the conduct of business.
- Develop SCM policies and procedures based on research.
- Apply SCM methods and concepts to real world problems through experience acquired in a required co-op or internship in SCM.

Curriculum Overview

Rider's interdisciplinary global supply chain management program combines theory and practice with hands-on internship and mentoring experiences to provide students with an understanding of the important role of supply chain management in domestic and international business.

Faculty include professors with expertise in supply chain management and logistics, information systems, marketing, international business and management science, as well as supply chain professionals from private industry and non-profits. Students learn the many dimensions of supply chain networks that businesses use to acquire, produce, and deliver goods and services across the global marketplace. They also gain skills that prepare them for success in this fast-growing field

Degree Offered

- B.S.B.A. in Global Supply Chain Management

Certificates Offered

- Certificate in Global Supply Chain Management
- Certificate in Supply Chain Analytics

Concentration Offered

- Concentration in Supply Chain Analytics

1 Students majoring in Global Supply Chain Management are required to take a 6-credit co-op OR a 3-credit Internship and a 3-credit business elective.

2 Students majoring in Global Supply Chain Management may not take CIS 385 Management Information Systems.

3 Students majoring in Global Supply Chain Management may take a maximum of one 200 level BDA, CIS or MKT course to count as a GSC Major Elective.

Students must achieve a grade of at least "C-" in each of the major courses with a minimum GPA of 2.0 in the major.

Global Supply Chain Certificate
Supply Chain Analytics Certificate (p. 277)

Global Supply Chain Certificate

(9 credits)

Overview

The Global Supply Chain Certificate (GSCC), housed within the Global Supply Chain Program, is a certificate-bearing program that is open to all undergraduate students in the Norm Brodsky College of Business and in the College of Liberal Arts and Sciences (except GSC majors)[1]. The GSCC is designed to complement students' major areas of study with relevant content from the supply chain discipline. In professional practice, supply chain management requires a high degree of interaction and collaboration with other major corporate functions. Managers in Finance, Marketing, Accounting, Human Resources and other functions need to understand and are often expected to work closely with corporate supply chain colleagues. The GSCC will provide students with the knowledge and skills to be effective in these cross-functional, interdisciplinary roles while the credential will provide differentiation and advantage in their job search.

Requirements

Upon successful completion of the requirements listed below, students will obtain a Global Supply Chain Analytics Certificate upon graduation from Rider. All GSCC participants must successfully complete and achieve grades of C- or better in each of three courses they take to complete the certificate, as described below:

Code	Title	Credits
Required Course for Certificate:		**3**
GSC 115	Introduction to Global Supply Chain Mgt.	
Choose 2 of the following:		**6**
GSC 235	Supply Chain External Focus: Customer and Supplier Logistics	
GSC 290	Strategic Sourcing and Procurement	
GSC 345	Customer Focus: The Customer Driven Supply Chain	
GSC 355	Supply Chain Internal Focus: Firm Operations	
Total Credits		**9**

[1] The GSC Certificate is open to and intended for all students except GSC majors.

Supply Chain Analytics Certificate

(9 credits)

Overview

The Supply Chain Analytics Certificate (SCAC) will be available to all GSC Certificate students in the Norm Brodsky College of Business. Students who exhibit strong technical skills and/or interest in analytic methods will be particularly encouraged to consider the SCA Certificate. Thus, this certificate offers an advanced "analytics study option" for GSC Certificate students.

The SCAC provides a meaningful and externally recognizable analytics credential for students without requiring the full effort of completing a major in Business Data Analytics (BDA), which requires the completion of six courses in the major. The credential will help these students differentiate themselves from peers at Rider and other universities as they compete for positions in the field of supply chain management.

Requirements

The SCAC is open to all Global Supply Chain (GSC) Certificate students in the Norm Brodsky College of Business. Upon successful completion of the requirements listed below, students will obtain a Supply Chain Analytics Certificate upon graduation from Rider.

The SCA Certificate is only awarded to students who have also completed the GSC Certificate. Students can work on both the SCA and GSC Certificates concurrently. However, the SCA Certificate will only be awarded upon the successful completion of the requirements for both the GSC Certificate and SCA Certificate by a student.

All SCAC participants must successfully complete and achieve grades of C- or better in each of three courses they take to complete the certificate, as described below:

Code	Title	Credits
Required Courses:		**6**
BDA 205	Introduction to Visual Data Analytics	
BDA 355	Business Analytics with Python	
Select one of the following:		**3**
CIS 330	Database Systems	
or CIS 360	Data Mining	
Total Credits		**9**

Supply Chain Analytics Concentration Requirements

(9 credits)

The SCA Concentration is open to all GSC Majors in the Norm Brodsky College of Business. Upon successful completion of the requirements listed below, students will obtain a Supply Chain Analytics Concentration upon graduation from Rider.

The SCA Concentration is only awarded to students who have also completed the GSC Major. Students can and are expected to work on both the SCA Concentration and the GSC Major concurrently. However, the SCA Concentration will only be awarded upon the successful completion of the requirements for both the GSC Major and SCA Concentration by a student.

All SCA Concentration participants must successfully complete and achieve grades of C- or better in each of three courses they take to complete the concentration, as described below:

Code	Title	Credits
Required Courses:		**6**
BDA 205	Introduction to Visual Data Analytics	
BDA 355	Business Analytics with Python	
Select one of the following:		**3**
CIS 330	Database Systems	
or CIS 360	Data Mining	
Total Credits		**9**

1 CIS 185 and CBA 110 can be taken in the Fall or Spring of year 1.

2 Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.

3 Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.

4 Students are required to complete 6 credits of International Business Electives, which for GSC majors will be fulfilled as major courses.

5 Students are required to complete 6 credits of GSC Major Electives. See the listing of GSC Major Electives on the Major Requirements page.

Notes:

- Business Honors students will have a different sequence.
- The above plan assumes no AP or other credits were transferred into Rider University.
- This plan assumes the student is taking a 3-credit GSC 491 Internship plus a 3-credit elective. GSCM majors can instead take a 6-credit GSC 399 Co-op. GSCM majors who choose the co-op option may have a different 4 year sequence of courses.
- For the Leadership Elective, choose from LDP 398 Co-op Experience Seminar, LDP 200 Foundations of Leadership, LDP 220 Service Learning Through MOB, MGT 355 Team Management, or MGT 363 Management Skills.

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Courses and Descriptions

GSC 115 Introduction to Global Supply Chain Mgt. 3 Credits
This course introduces students to components of global supply chains and issues of managing the global supply chain. It is designed as a survey course to give first or second year business students a general view of supply chain management at both domestic and international levels, as well as familiarize them with basic concepts and major challenges of supply chain management. Delivery of course material will include lectures and guest speakers from industry, and in-class logistics mini cases.

GSC 235 Supply Chain External Focus: Customer and Supplier Logistics 3 Credits
This course is a detailed discussion of some of the major issues and components of supply chain management that are mainly external to an organization. In other words, it provides an “outward looking” perspective of supply chain management. Topics to be covered include sourcing, procurement, transportation, customer logistics, and distribution. The linkages to internal issues and components of supply chain will be made. **Prerequisite**(s): GSC 115.

GSC 290 Strategic Sourcing and Procurement 3 Credits
Sourcing and procurement are vital components of a well-functioning and efficient supply chain. Obtaining raw materials, components, finished and semi-finished goods, critical technology, and essential services from different suppliers and countries with different languages, currencies, legal and cultural norms is a complex and risky task and made essential due to the value of these activities to the bottom-line of any global business today. Additionally, globalization raises issues involving not just costs but reliability, quality, credibility, product safety, product liability, and related social, ethical, governance, and environmental impact. In this course, students will learn and apply the concepts, principles, and techniques required to manage the sourcing process effectively. Topics include purchasing, outsourcing, materials management, inventory management, forecasting, price and cost analysis, transportation analysis, supplier selection, negotiation strategies, auctions, and legal framework. Students will apply the concepts covered in lectures, articles, case study analysis, a team project, and discussions. Additionally, a special component of this course will include participating in a multi-week real world procurement simulation where students will have an opportunity to interact in a purchasing process with senior industry procurement executives. The simulation will both teach and allow students to participate in developing and implementing bidding and negotiating strategies in real world vendor-customer relationships. Sophomore standing or higher.
Prerequisite(s): at least one of the following courses: ACC 210, or ECO 200, or ECO 201, or GSC 115.

GSC 315 International Business Tour 3 Credits

GSC 345 Customer Focus: The Customer Driven Supply Chain 3 Credits
Marketing and supply chain management programs are concerned with the creation and delivery of value to customers and organizations. No longer simply the domain of the warehouse manager or logistics director, supply chain management is viewed by most companies as a mission critical element. Marketing focuses on developing an understanding of customers and markets, creating products and services based on that understanding, and communicating and delivering the value added. This course will teach the student the essential role of marketing in all aspects of successful supply chain management - relationship management, technological and financial management - and it will help the student understand the structure, functions, principles and methods employed in discovering and translating consumer needs and wants into product and service specifications, and then transferring these goods and services from producers to consumers or end users.
Prerequisite(s): GSC 115 and MKT 200.

GSC 355 Supply Chain Internal Focus: Firm Operations 3 Credits
This course is a detailed discussion of some of the major issues and components of supply chain management that are mainly internal to an organization. In other words, it provides an "inward looking" perspective of supply chain management. Topics to be covered include: manufacturing, quality, product design, inventory, and warehousing. The linkages to external issues and components of supply chain will be made.
Prerequisite(s): GSC 115 and MSD 301.

GSC 375 Adv.Sem in Global Outsourcing 3 Credits
The course is aimed at generating a comprehensive understanding of the emergent domain of global business process outsourcing. Variously referred to as knowledge process outsourcing, IT-enabled services outsourcing, and business services outsourcing, the industry has seen enormous growth over the last decade and continues to grow. India commands the single largest share of this market but South Africa, Eastern Europe, Philippines, Morocco and Egypt have all emerged as other contenders in this global sector. The course is divided into four modules: the political economy of global outsourcing, process modeling, outsourcing management, and industry analysis. Please note: Students will not receive credit for both CIS 375 and GSC 375.
Prerequisite(s): junior standing.

GSC 385 Management Information Systems for Global Supply Chain Management 3 Credits
The purpose of this junior level management information systems course is to prepare students for today's dynamic business environment by increasing their understanding of IT-enabled global information processing and management. This course has a specific emphasis on the impact and effective utilization of information systems and technology for the global supply chain. Students will gain a solid understanding of the value of business process integration through a combination of conceptual learning, business process analysis, and collaborative decision-making. This will be facilitated through hands-on experience with SAP ERP and analytical software as well as Microsoft Excel.
GSC 385 is required for the Global Supply Chain Management major and can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.
Prerequisite(s): CIS 185 and junior standing.

GSC 399 GSC Co-op Program 6 Credits
The co-op program provides students with an opportunity to work full-time in an organization and apply what they have learned in their global supply chain and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first-step before they hire full-time employees. Eligible students include junior and senior global supply chain management majors with a minimum GPA of 3.0. The six credits are intended to be used as business electives, but it is also possible for them to be used as a combination of business and free electives.
Prerequisite(s): GSC 115 plus one additional course within the global supply chain management major, and permission of instructor.

GSC 445 Supply Chain Strategy and Design 3 Credits
This course introduces the student to the concepts and techniques necessary to design and operate global supply chains. It covers some of the strategic issues of managing a global supply chain and emphasizes the importance of understanding the organization, its value chain, industry, competitors, suppliers, and customers in a global framework. The course covers various strategies as well as different supply chain design models and approaches for efficient and effective supply chain operation.
Prerequisite(s): GSC 235 and GSC 355.

GSC 490 The GSC Consulting Elective 3 Credits

This is a special topics Independent Research and Study course. A Global Supply Chain professor will supervise a semester long project in which a team of students completes a consulting project for one or more local firms. The consulting project, which will be determined by the GSC faculty and local firm(s), provides valuable experience for students on the

team as they perform analysis of important supply chain and logistics problems that a local firm must address. The work includes analytic and research activities, and culminates in a recommendation on how the firm should address the logistics/supply chain issues that it had engaged the student team to evaluate. This experience also provides valuable lessons on how to work with clients, and how to develop and make presentations to effectively communicate recommendations.

Prerequisite(s): GSC 115 and permission of instructor.

GSC 491 GSC Internship 3 Credits
The Global Supply Chain Management (GSCM) Program formally sponsors an internship in global supply chain management. The intention of the course is to supplement theoretical foundations and other material introduced in the classroom with an opportunity to work in a sponsoring organization. Through the internship experience, the student will get a chance to see how supply chains are managed and will get a chance to apply supply chain concepts for themselves. If used in place of the co-op, internship credits will count toward GSCM major requirements, but can also be used as a business or free elective.
Prerequisite(s): GSC 115 plus one additional course within the GSCM major, and permission of instructor.

Graphic Design

Program Overview

Graphic design majors gain experience and develop skills in the field of visual communication. Through a blend of coursework and hands-on experience in digital studios and labs, students learn to become critical thinkers and creative designers. The program prepares them to successfully design graphics for branding, such as logos, and for professional publications such as brochures, magazines and newsletters. In their capstone courses, students have the opportunity to manage projects with real clients and create professional portfolios.

Students often work one-on-one with distinguished faculty who have extensive scholarly knowledge and professional experience in their fields of expertise. Student media organizations include the Graphic Design Club (https://linktr.ee/ridergraphicdesign/), the Public Relations Student Society of America (https://instagram.com/prssarider/), and award-winning media including The Rider News (https://www.theridernews.com), 107.7 The Bronc (https://www.1077thebronc.com) radio station, and Rider University Network R.U.N. TV (http://runetwork.weebly.com), each of which gives students a chance to practice their profession right on campus.

A thriving internship and co-op program routinely offers academic credit and professional experience in a number of prestigious locations.

Curriculum Overview

Classes in the graphic design major include color theory, typography, graphic imaging for digital media, history and principles of graphic design, digital publication design, writing for the professions, photography, project management, and advanced publication design and portfolio.

Recommended courses include fundamentals of drawing, web design, 3D graphic animation, game design, and others.

Degree Offered

- B.A. in Graphic Design
- Minor in Graphic Design

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits
Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits
Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 104 Speech Communication 3 Credits
Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 104S Intro to Speech Communication 1 Credits
As part of the EOP program, this course is designed to improve the speaking and language skills of new college students. Through directed practice, students have the opportunity to develop poise and confidence in oral communication, as well as competence in analyzing and synthesizing messages. Emphasis is placed on development, organization, and delivery of speeches. To receive credit, a grade of "C" or higher must be earned. Students who receive credit for COM 104S may not take COM 104.

COM 105 Communication, Culture and Media 3 Credits
Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 106 Writing for the Communication Professions 3 Credits
Provides students with written communication writing strategies and tools. Applies theory and practice in communication to targeted audiences. Emphasizes the critical role writing plays in the communication workplace and provides an opportunity to evaluate and respond to real-life writing samples and situations.

COM 107 Writing for the Media 3 Credits
Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 110 Digital Survival Skills: Media Literacy and Critical Thinking 3 Credits
This course is designed to help students critically engage with the digital media they encounter in their daily lives and build savvy skills to navigate this endless online world of information and proliferating disinformation. The course examines the digital communication, information, entertainment -- and even surveillance – that surrounds us all. Critical engagement includes understanding theories used to study the power of these media and practical techniques to assess the accuracy of digital content.

COM 131 Fundamentals of Video Production 3 Credits
Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 150 Introduction to Critical Media 3 Credits
In this course, media is understood as any communication outlet or tool used to deliver information or data to a large number of people. This includes various components of the mass media communications industry, such as print media, publishing, news media, photography, popular culture artifacts (such as movies and film), broadcasting, advertising, billboards, etc. As such, this course teaches students how to think critically about the power and influence of mass media in their daily lives and the lives of others. The course is designed to teach students how to analyze mass mediated messages through a variety of theoretical and analytical frameworks through the lens of hegemonic discourse and power dynamics. These perspectives and approaches include, but are not limited to: Marxist, queer, psychoanalytical, rhetorical and feminist perspectives. Emphasis will be placed on the ways the media produce and reproduce societal norms, expectations and taken-for-granted beliefs. This course will provide insights into our understanding of the relationship between media and one's attitudes, values and beliefs.

COM 201 Communication Theory 3 Credits
Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 202 Color Theory 3 Credits
Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 203 Introduction to Social Media 3 Credits
Introduces the tools and techniques of social media as an effective means of communication in a variety of organizational settings. Students will practice with a variety of social media platforms, explore the roles and responsibilities of a social media manager, discuss the importance of establishing social media policies, and learn how to develop a social media strategy as well as how to measure its effectiveness through social media analytics. In addition, students will discuss important issues such as how to handle an online crisis, and the legal and ethical implications of digital communication.

COM 204 Advanced Speech Communication 3 Credits
Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.
Prerequisite(s): COM 104 or COM 290.

COM 205 Persuasion 3 Credits
Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 207 Social Media and Social Change 3 Credits
Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 210 News Reporting and Writing 3 Credits
Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.
Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits
Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.
Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits
Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 213 Typography 3 Credits
Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 220 Voice and Articulation 3 Credits
Increases the student's knowledge of the vocal elements of oral communication and improves use of voice and articulation. Introduces anatomy and physiology for enhanced vocal production. Analyzes volume, rate, pitch, quality, phrasing, stress, and inflection. Presents the International Phonetic Alphabet as a means of developing correct articulation and pronunciation. Uses classroom exercises and tape recording for feedback and learning.

COM 221 Speaking for Broadcast and Digital Media 3 Credits
Introduces the principles and techniques of speaking in traditional and digital media through the preparation and presentation of copy for live television and radio as well as recorded video and audio for the web. Students will apply the principles and techniques to a number of contexts including television and radio news, music and sports announcing, interviewing and talk programs, as well as public service announcements.
Prerequisite(s): COM 104 or COM 290.

COM 230 Foundations of Film, Television and Radio 3 Credits
Examines film, television and radio industries, the programs they create and the powerful role they play in society. This course will examine the history, technology, structure, programming and regulation of these industries including issues, trends, and the impact of new and evolving technologies.

COM 232 Podcasting I 3 Credits
Podcasting I will offer students an innovative reading, research, discussion and creative lab experience. Using fictional storytelling, broadcast journalism and talk show formats, students will learn the basics of producing an original, creative podcast. They will gain insight on how to communicate and successfully market a podcast towards a mass audience. Students would also receive a basic overview of podcasting, so they can continue work to podcast on their own after taking Podcasting I.

COM 233 Writing for Broadcast 3 Credits
Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 234 Audio Production 3 Credits
Provides a laboratory study of audio production techniques, and performance. Introduces the fundamental properties of sound as applied in modern audio production at radio and television stations, sound studios, and production houses. Students conduct lab exercises in editing, mixing, and digital recording using ProTools. Students perform a variety of genres including news, commercials, dramas, and promos.

COM 237 Rhetoric in the Digital Age 3 Credits
Focuses on the critical examination of the major public discourses in digital media. Students will learn classical and modern rhetorical theory such as Aristotle's Rhetoric, power, publics and counterpublics, and argumentation. Students will apply these theoretical aspects to critically engage digital texts such as memes, emojis, hashtags, trolls, blogs/reviews, and video game narratives.

COM 239 Script Writing for Comic Books 3 Credits
The medium of comics presents a fascinating vehicle to communicate through a sequence of text and images. Comic books, graphic novels and other forms of the genre (web comics, comic strips, etc.) hold a significant place in modern society, history and culture. This course is designed to orient students towards writing comic book scripts. Focus will be placed on students creating and writing their own stories. Students will learn basic concepts around scripting for sequential art, story research, the relationship between text and image, comic panel theory, working within page-length restrictions and various scripting formats. Beyond learning how to write a comic book, students will explore topics such as: the different types of script formats, plot points, writing sound effects, story structure and outlining. No artistic experience needed.

COM 240 Public Relations 3 Credits
Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 247 Covering the Sports Betting Industry 3 Credits
This course will introduce students to the world of covering the sports betting landscape via traditional sports media. Emphasis will be placed on learning the jargon of sports betting, learning how to break down financial reports from both states and gambling operators, how to cover legislative action on the subject. In short: Covering the world of sports betting is quickly becoming akin to covering the world of financial markets, and students wishing to pursue a career in sports media will have to know how to navigate this world going forward.
Prerequisite(s): COM 104 or COM 290.

COM 251 Interpersonal Communication 3 Credits
Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 252 Intercultural Communication 3 Credits
Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application.

COM 253 Organizational Communication 3 Credits
Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 254 Intro to Health Communication 3 Credits
Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 261 Introduction to Web Design 3 Credits
Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 262 Graphic Imaging for Digital Media 3 Credits
Teaches students techniques for image development, and image preparation for various multimedia applications. Emphasis is placed on color calibration and palette issues, image manipulation, advanced image selection techniques, transparency and masking, multimedia authoring file formats, and dynamic image design. Students will be expected to participate in critiques of professional designs in order to learn to critically evaluate their work and their fellow students' work.

COM 263 History and Principles of Graphic Design 3 Credits
Covers the history and principles of graphic design from analog art through the digital revolution. The elements and principles of design will be used to study stylistic progressions, artistic techniques, design innovations, and mechanical inventions. Material will be presented through a combination of illustrated lectures and discussions.

COM 264 Digital Media: Theory and Practice 3 Credits
Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 265 3D Graphic Animation 3 Credits
Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation using Maya software. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 270 Sports Multimedia Reporting 3 Credits
COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.
Prerequisite(s): COM 102. Introduction to News Writing.

COM 280 Issues in Event Planning 3 Credits
Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.
Prerequisite(s): COM 240 or MKT 200.

COM 290 Professional/Strategic Speech 3 Credits
Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the Norm Brodsky College of Business.

COM 292 Content for Social Media 3 Credits
Focuses on creating social media content that will inform, entertain, and engage audiences within a variety of organizational and business contexts. Students will learn about message planning for specific platforms and creative ways to use digital content to support public relations, branding, customer, and media relations.

COM 301 Communication Law 3 Credits
Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits
Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 303 Radio Programming 3 Credits
As new listening opportunities, options and alternatives emerge in a world of constantly changing and developing new media options, the over 100-year-old radio broadcast medium has remarkably been able to quietly continue to dominate the media landscape with the highest audience share of any audio platform, including satellite radio and streaming audio. In this course, students will learn how radio reaches and keeps its audience as well as the impact its programming has on the local communities it serves daily.

COM 304 Rhetoric for Politics and Law 3 Credits
Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.
Prerequisite(s): COM 104 or COM 290.

COM 310 Crisis Communication 3 Credits
Students will learn how professionals define and prepare for various crises, including theory, techniques and applications. This course will teach students about the importance of planning for a crisis and defining key messages. Through case studies, students will assess the successes and failures of various organization's responses. Students will work in teams to develop the knowledge and skills to manage the messages surrounding crisis-related issues found in organizations.

COM 312 Special Topics in Journalistic Writing 3 Credits
Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.
Prerequisite(s): COM 102 or COM 107.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits
This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.
Prerequisite(s): COM 347 and MKT 280.

COM 315 Computer Assisted Reporting 3 Credits
Develops advanced reporting techniques for researching and writing in-depth news stories and investigative articles. Uses state-of-the-art computer-assisted reporting methods including finding and mining data bases on the Internet, creating spreadsheets to analyze data, and employing data base manager software to sort and summarize information in government documents and other specialized resources. Focuses on conceptualizing of story ideas, planning major projects, gathering information by means of data bases, participant-observation, interviews, and analysis of public documents. Emphasizes organizing large quantities of material and presenting it in a meaningful context, including with information graphics.
Prerequisite(s): COM 210 or permission of instructor.

COM 316 Feature Writing 3 Credits
Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.
Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 318 Gender and Communication 3 Credits
Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GSS 318. Students may not get credit for both COM 318 and GSS 318.

COM 320 Negotiations 3 Credits
This course provides students with the theory and skills for effective negotiations. Students will learn how to prepare for and participate in negotiations by applying various strategies and tactics. This course will be split between theoretical lecture/discussion and practical application / skill development, including in-class simulations.

COM 321 Stand Up Comedy 3 Credits
Explores the theory, history, and practice of stand up and comedy writing as a contemporary rhetorical practice. Students will learn the various mechanics of joke construction, the nature of comedic narratives, and how humor can be used to engage in personal, social, cultural, and political commentary through the analysis of comedic performances. The class will also feature workshops in which students create and refine their comedic performances and personae. The class will culminate with students performing their material in front of an audience.
Prerequisite(s): COM 104 or COM 290.

COM 322 Argumentation and Advocacy 3 Credits
Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.
Prerequisite(s): COM 104 or COM 290.

COM 323 Oral Interpretation of Literature 3 Credits
Provides an orientation to the field of oral performance. Students select literary texts, adapt the material to the audience and prepare it for presentation. Emphasizes the development of voice, articulation, and kinesic behavior. Presentations to the class are critiqued.
Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 324 Political Rhetoric and Democratic Culture 3 Credits
Explores how political rhetoric has shaped the democratic culture of the United States. Students will focus on the role political rhetoric plays in the struggle to contest and redefine the meaning of the Declaration of Independence's promise of life, liberty and the pursuit of happiness. In so doing this course attempts to develop an appreciation for the ways in which the challenges to extant laws and traditions—and in particular the language choices and modes of argument used in those challenges—have expanded the meanings of democracy.
Prerequisite(s): COM 105 or POL 100 or POL 102.

COM 325 Rhetoric of American Labor 3 Credits
This course examines speeches, tracts, lyrics, newspapers, posters, poems, and films of the labor movement in America. The course also examines the historical context of the labor movement to better understand and appreciate the public discourse of labor. The course explores how rhetoric has been used to give force to ideas and lead to actions, how we develop a sense of how the values and norms of our society were reflected and shaped, and we understand how that history influences our collective perception in the present. Special attention is paid to the nature and locus of power, the interplay of conflict and confrontation, and the speaker's attempt to maintain or change the allocation of that power.

COM 326 Social Media Analytics 3 Credits
Examines how social media analytics are used to improve and inform an organization's decision-making process to develop, manage, and evaluate the success of an organization's social media strategy. Students will learn how to use analytics tools, and analyze and use data to plan and evaluate the effectiveness of social media campaigns.
Prerequisite(s): COM 203.

COM 327 Career Development in the Sports Marketplace 3 Credits
This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. Prereq(s): COM 270, COM 347, and MKT 280.

COM 330 Documenting Cultures Through Travel 3 Credits
Offers students, through travel and study, a unique opportunity to gain firsthand experience of a foreign culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

COM 331 Television News Production 3 Credits
In this course, students will learn to write, shoot, edit and produce video news for television, the Internet and social media. Students will be introduced to the necessary video and digital production techniques, software and technologies for producing and reporting both individual news packages and entire news programs. Through this class, students will sharpen their news judgement and learn the roles and responsibilities of television news reporters and producers.
Prerequisite(s): COM 131 or COM 230.

COM 332 Topics in Advanced Podcasting and Radio 3 Credits
Develops advanced podcasting and radio techniques, allowing students to focus closely on researching, recording, script writing, producing and distributing podcast and/or radio content in specialized genres. Students produce complex, long-form audio features suitable either for terrestrial broadcast and online/mobile podcasts. Topics may include journalism and news; narrative storytelling; sports; politics; business; and the arts. Since topics will vary by semester and instructor, this course may be repeated once.

COM 333 Media Program Development and Distribution 3 Credits
Critically analyzes the theory, practice, structure, and function of media program development and distribution. Examines the structure of the field as it relates to programming, the industry and audiences. Studies program categories, formats, genres, trends, and audience measurement and analysis as well as the new and evolving technologies responsible for program development and distribution.
Prerequisite(s): COM 230.

COM 337 Music Production for Mass Media 3 Credits
Offers students education in audio production techniques for music and other advanced audio material. Building on theory and practice introduced in the prerequisite, the class will instruct students in the theory behind acoustics and electronics as well as the digital tools and media. Those theoretical studies will be put to practice through exercises in recording music, making selections from music libraries, multi-track recording, arranging, editing, mixing and mastering. Students will begin to develop both an engineer's attention to audio detail and a musician's sense of artistry. Putting these skills to use, the students will produce complete musical works of varying musical styles, working both individually and in teams.
Prerequisite(s): COM 234.

COM 338 Writing for Broadcast II 3 Credits
Building on COM 233 Writing for Broadcast, this course provides a hands-on approach to more sophisticated reporting and interviewing techniques and writing formats used in long-form radio and television programs. This course will expose students to the following broadcast script writing areas: features, documentaries and reality programs. It will also cover writing for interview/talk show programs, music, comedy and variety programs. Students will also be exposed to writing for corporate, educational and children's programming. Students will have hands-on experiences writing, producing and editing news pieces and webcasts for student and area media outlets and web sites.

COM 341 Public Relations Writing and Strategy 3 Credits
Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.
Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits
Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

COM 348 Communication Research Methods 3 Credits
Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.
Prerequisite(s): COM 105; junior or senior standing.

COM 350 Team & Group Communication 3 Credits
Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

COM 352 Chinese and American Intercultural Communication 3 Credits
Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator.

COM 353 Nonverbal Communication 3 Credits
Investigates studies in and theories of nonverbal communication. Lectures and experiential activities explore the effect of status, culture, and gender upon kinesics, physical characteristics, proxemics, tactile communication, paralanguages, artifacts, and environmental factors.
Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 355 Social Justice and Journalism 3 Credits
The best of American journalism is rooted in exploring issues of social justice and shining a spotlight on abuse. In this course, students will learn about the role journalism has played to expose social injustice in America by exploring powerful investigations by the mass media and also press organizations employing and representing non-white and marginalized groups. Students will examine both historical and contemporary journalism examples. The course also will include critical assessment of journalism's failings, including an exploration of the discrimination and disenfranchisement historically perpetuated by media.

COM 360 Advanced Publication Design and Presentation 3 Credits
Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.
Prerequisite(s): COM 212.

COM 361 Photography 3 Credits
Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 363 Converging Digital Media 3 Credits
Examines the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COM 364 Web Design II 3 Credits
Equips students with the theories and practical techniques required to produce effective digital text, graphics, and animations for the Web. Discusses theories behind the use of these media in terms of effective communication and interaction. Introduces students to different computer platforms and requirements for cross-platform media.
Prerequisite(s): COM 261 or permission of instructor.

COM 365 Graphic Animation 3 Credits
Students receive an education in motion graphics and animation theories, development techniques, and preparation for various multimedia applications. Emphasis is placed on the design principles used in motion graphics and animated communication to effectively convey information in an entertaining and engaging manner. The course covers the integration of sound and imagery through graphic animation techniques, compression, rendering, input/output file formats, and delivery. Projects include the creation of web banner ads, title sequences, a music video, and an original final project. The primary software for this course is Adobe Photoshop, Adobe AfterEffects, and a taste of 3D animation using Maya. Students will be expected to participate in critiques of professional animation designs in order to learn to critically evaluate their own work and their fellow students' work.
Prerequisite(s): COM 262 or permission of instructor.

COM 366 Project Management in Graphic Design 3 Credits
Explores the creative process of graphic design while developing an understanding of the methods employed in problem solving in the industry standard design software packages. Students learn how to create a hierarchy of information through the ordering of elements into a comprehensive visual unity. They consider the relationship between content and page size, proportion, grid and margins. Students learn about typography as a design element and how it works with other visual elements in design. In order to develop an understanding of the project-planning process for either printer or Web projects, students will develop and present a series of projects that will build on one another to develop their "visual voice." Students will be evaluated on their ability to apply course material to the projects to create professional-quality work; their ability to apply exchange ideas and accept and apply constructive criticism; and on their participation in class discussions, critiques and presentations.
Prerequisite(s): COM 262, COM 360.

COM 367 3D Graphic Animation II 3 Credits
Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.
Prerequisite(s): COM 265.

COM 370 Sports Television and Field Production 3 Credits
Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.
Prerequisite(s): COM 131.

COM 371 Sports Feature Content Creation 3 Credits
Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.
Prerequisite(s): COM 102, COM 270.

COM 380 Broadcast News Practicum 3 Credits
Provides a workshop dedicated to the planning and creation of professional caliber broadcast news content for the campus television network and beyond. This course will provide an opportunity for students to develop writing, graphic, audio, video design and production skills in an experiential setting. Students will create materials to be used by the Rider University Network and for broadcast, cable and Internet distribution. Students can be involved in any and all phases of creating content from project conception through implementation. Students will gain valuable experience with, a greater appreciation for, and increased competency in creating professional media content. This class will also prepare students to more effectively function in the communication industry as an effective member of a professional production team. Since topics will vary by semester and instructor, this course may be repeated once.
Prerequisite(s): Permission of instructor.

COM 390 Communication and Society 3 Credits
Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits
Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits
Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media.

COM 399 The Co-Operative Experience 3-12 Credits
This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faulty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; Pass/fail.
Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

COM 400 Senior Seminar Communication 3 Credits
Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 415 In-Depth Reporting 3 Credits
Utilizes advanced tools and techniques of contemporary in-depth reporting for print and multimedia. Covering multifaceted stories, students will learn how to do balanced multi-sourced field reporting and writing using primary and secondary sources including human sources, electronic documents and databases, both online and offline. Emphasis will be placed on writing stories that answer not only who, what, when and where questions but also the why, the how and the "so what?" questions. Students will also be exposed to some of the best investigative work of journalists past and present as models for analysis and discussion.
Prerequisite(s): COM 210.

COM 426 Social Media Capstone 3 Credits
A client-based social media campaign will be developed from conception to evaluation based on research and digital media strategies. Focus will be on engagement with audiences, managing social media, and evaluation using social media metrics. Permission of instructor required.
Prerequisite(s): COM 203, COM 292.

COM 431 Advanced Television News Production 3 Credits
This course will focus on writing, reporting and producing a video news magazine program. Students will research, write, shoot, edit and report feature stories that will be included in a bi-weekly news magazine program that students will produce. Emphasis will be placed on meeting deadlines and developing the professional skills required of reporters creating visual stories for television, the Internet and Social Media. During the course, students will learn to sharpen their video production, writing and leadership skills, as well as their news judgment in creating and reporting digital content.

COM 432 Radio Station Operations Capstone 3 Credits
Students will practice the advanced study of the internal workings of a radio station and the podcasting and radio industry through hands-on work at 107.7 FM The Bronc, participating in multiple facets of the operation, including: programming, on-air broadcast, podcasting, audio software editing, event planning, public relations, business of media and advertising. Seniors only. Permission of instructor required.

COM 434 Advanced Structure of Sound in Podcasting and Radio 3 Credits
Provides in-depth study of advanced techniques in audio recording and radio programming and production. Individual and group production of short and long-form radio projects including: promotional spots, features, music programming, and news. Students will be involved in all phases of programming and production for radio including: project conception, development, management, and implementation. Selected student projects will air on the student radio station, 107.7 The Bronc.
Prerequisite(s): C or better in COM 234 or COM 232.

COM 440 Cases & Campaigns in Public Relations 3 Credits
Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.
Prerequisite(s): COM 341 or permission of instructor.

COM 452 Seminar in Communication Studies 3 Credits
Offers an in-depth investigation of relational communication. Students explore the many complexities involved in human interaction and interpersonal dynamics. Social and psychological implications of various communicative relationships ranging from cross-gender communication to dysfunctional family systems to intercultural interactions are included.

COM 460 Web Design III 3 Credits
Builds on previous courses to refine students' understanding of theories and procedures of digital media development. Further develops Web site creation and project management theories. Students develop advanced Web creation techniques, including responsible site production.
Prerequisite(s): COM 364.

COM 462 Advanced Graphic Design and Portfolio 3 Credits
Explores the processes of graphic design by creating independent and creative solutions to a series of design problems. Students expand their proficiency in all aspects of the design process, including creative brainstorming, conceptualizing, critical thinking and presentation. Students take a design project to both print and digital formats using Photoshop, Illustrator, and InDesign. Students develop and present a balanced portfolio as the culmination of their experience in the course.
Prerequisite(s): COM 366.

COM 470 Live Sports Reporting Capstone 3 Credits
Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits
Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits
Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.
Prerequisite(s): 3.2 GPA and permission of instructor.

Health Administration

Program Overview

The Health Administration minor recognizes the diversity of skills required in the health care sector, and allows students from a variety of programs to minor in health care administration. Majors particularly well-suited to health administration are:

- **Sciences** (biology, chemistry, biochemistry, psychology)
- **Social sciences** (economics, sociology, social work, political science)
- **Business** (marketing, management, business administration, human resources management, business economics, finance, actuarial science, and information systems).

Classes include a diversity of student majors, which allows science, social science and business students to interact and learn alternative points of view. The health administration minor, combined with other initiatives of the integrated science and business curriculum at Rider, places graduates at a strong advantage in the employment marketplace.

Minor Offered

- Minor in Health Administration

PSY 365	Drugs and Human Behavior	
PSY 374	Psychology of the Family	
PSY 382	Aging, Brain, and Cognition	
PSY 385	Death, Dying and Suicide	
Non-business majors must select one of the following:		**0-3**
MGT 201	Fund Management & Org Behavior	
MKT 200	Marketing Principles	
Total Credits		**21-24**

Courses and Descriptions

BIO 100 Life Science 3 Credits
An introductory course for non-science majors in which students develop an understanding of the nature of science and are introduced to foundational topics in the biological life sciences and how they relate to human affairs. The course may emphasize human evolution, genetics, aging, disease, reproduction, bioethics or other topics in biology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CAS general education curriculum.

BIO 110 Life Science: Inquiry Approach 4 Credits
An introductory course for non-science majors in which students develop an understanding of biological evolution, the molecular basis of heredity, the cell, matter, energy and organization in living systems, and the interdependence of organisms. In addition, students will develop an understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives. Through investigative activities, students will develop an understanding about scientific inquiry and develop abilities necessary to do scientific inquiry. Three hours of lecture and one three-hour lab per week.
Corequisite(s): BIO 110L.

BIO 110L Life Science: Inquiry Approach Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 110.

BIO 115 Principles of Biology I 4 Credits
An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three- hour lab per week.
Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 115.

BIO 206 The Pharmaceutical Industry 3 Credits
An introduction to drug discovery and development. Topics include how drugs are used to diagnose, cure, treat, and prevent disease and how drugs affect body function. The origins of diseases and the early attempts at treatment are also covered. Designed for business majors; does not satisfy requirements for the biology major.
Prerequisite(s): any BIO1XX or BNS1XX or CHE 1XX.

BIO 221 Human Anatomy & Physiology I 4 Credits
A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training. Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor.
Corequisite(s): BIO 221L.

BIO 221L Human Anatomy & Physiology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 221.

BNS 107 Life Science: Brain and Behavior 3 Credits
An introduction to the biology of the human brain and the rest of the human nervous system. Topics in neuroscience are covered in molecular, cellular, and systematic terms. Additional material is presented on the origins and effects of neurological and psychiatric diseases. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

CHE 115 Chemistry & Society 3 Credits
Designed to give the nonscientist an appreciation of the role of chemistry in today's world. The approach is conceptual rather than mathematical. Topics include basic principles of chemical theory, energy sources, elementary organic chemistry, drugs, food additives, polymers, chemistry of living systems, inorganic solids in modern technology, and problems involving pollution of the environment. Three hours of lecture per week. This course satisfies the core requirements for education and business majors.

CHE 118 Exploration of Chemical Principles 4 Credits
A one-semester introduction to the principles of chemical sciences. Students will utilize inquiry-based learning methods to examine contextual problems as a means to explore introductory models and concepts of chemistry. Students will also gain an understanding of how scientific models are used to explain experimental observations. The laboratory component of this course is designed to provide students with an experimental context within which to develop some of the models described in the classroom. Three hours of lecture and one three-hour lab per week.

CHE 118L Exploration of Chemical Principles Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): CHE 118.

CHE 120 Principles of Chemistry 3 Credits
For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.
Corequisite(s): CHE 121.

HTH 205 Introduction to Health Care 3 Credits
This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 336 Economics of Health Care System 3 Credits
This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

HTH 450 Seminar in Health Research 3 Credits
Students in the course learn to conduct health administration-related research by engaging in an actual community-based research project. At the beginning of the semester, students are assigned to a health-related community-based organization. As a team, students meet with the client, devise a plan of action, collect and analyze data and other information, and write a report to the client. At the end of the semester, students present their findings to the client.
Prerequisite(s): Permission of instructor.

HTH 491 Health Management Internship 3 Credits
This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.
Prerequisite(s): HTH 205; junior or senior standing; and permission of faculty supervisor.

HTH 315 Health Care Law, Ethics and Policy 3 Credits
This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system. Students will not receive credit for completing both HTH 315 and BUS 315.

HTH 215 Population Health Care Management 3 Credits
In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.
Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

MGT 201 Fund Management & Org Behavior 3 Credits
This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.
Prerequisite(s): minimum 30 credits completed.

MKT 200 Marketing Principles 3 Credits
This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.
Prerequisite(s): 15 credits.

PSY 220 Psychological Disorders 3 Credits
This course covers the major forms of psychological disorders from childhood to adulthood. Topics include the etiology of disorders from biological, social, behavioral, cognitive, and cultural perspectives, as well as diagnostic and treatment considerations.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 345 Health Psychology 3 Credits
This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health-enhancing behaviors such as exercise and nutrition, as well as health-compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 365 Drugs and Human Behavior 3 Credits
Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 374 Psychology of the Family 3 Credits
This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the variety of ways family impacts development across the lifespan.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

PSY 382 Aging, Brain, and Cognition 3 Credits
This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131 and 45 credits.

Health Care Management

Program Overview

The B.S.B.A. in Health Care Management allows students to learn the business of health care – and prepare for a career in America's fastest growing sector. This program allows students to earn a well-rounded business degree from Rider's distinguished AACSB-accredited Norm Brodsky College of Business, hone their business skills and focus on health care management studies, explore different roles in the complex issues facing health care and benefit from ongoing advice and support from professionally well-connected and experienced faculty.

Student Learning Outcomes

A health care management graduate will demonstrate the ability to:

- Synthesize the major sectors in the US Health Care System and define jargon in health care administration to communicate with professionals.
- Apply knowledge of the health care system and the economic and policy environment to a real-world situation.
- Analyze the constraints and incentives facing an organization based on its placement within the health care sector.
- Analyze the effect of policies or economic factors on health care outcomes.
- Communicate effectively through strong written skills.
- Demonstrate oral communication skills.

Curriculum Overview

The curriculum provides a core education in business combined with critical topics in health care management. The program is designed to provide students with an understanding of both the business and health fields, including a deeper grasp of the legal, ethical, economic, social and managerial issues related to health care.

Faculty include professors with expertise in economics, finance, information systems, law, and marketing.

The courses are designed to provide real-world experiences and the program offers students the opportunity to learn through required participation in one of the following: a semester-long internship, large-data group project for a client and health care marketing courses where students design their own marketing plans.

Notes:

- The above plan assumes no AP or other credits were transferred into Rider University.
- Students are required to take 6 credits of International Business Electives.
- Business Honors students will have a different sequence.
- Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.
- Students may be required to take MSD 104 (http://catalog.rider.edu/search/?P=MSD%20104) Intro to Quantitative Methods based on placement. MSD 104 (http://catalog.rider.edu/search/?P=MSD%20104) counts as a 3-credit Free Elective.
- For the Leadership Elective, choose from LDP 200 Foundations of Leadership, LDP 220 Service Learning Through Minding Our Bus, LDP 398 The Co-op Experience Seminar, MGT 355 Team Management, or MGT 363 Management Skills.

Courses and Course Descriptions

BUS 315 Health Care Law, Ethics & Policy 3 Credits
This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.
Prerequisite(s): 24 credits.

ECO 336 Economics of Health Care Sys 3 Credits
This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomic tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.
Prerequisite(s): ECO 201 or HTH 205.

HTH 201 Excel for Healthcare Management and Administration 1 Credits
This course is a refresher on Excel designed to fill gaps in knowledge and application of skills for students who are preparing for their internships. Students will review the essentials of Microsoft Excel. Within seven weeks, students will learn to expertly navigate the Excel user interface, perform basic calculations with formulas and functions, professionally format spreadsheets, and create visualizations of data through charts and graphs. This course will provide students with a practical hands-on opportunity that is designed for students to gain the skills necessary to proficiently create pivot tables, analyze data, utilize more advanced Excel data tools, and interpret statistical results.

HTH 205 Introduction to Health Care 3 Credits
This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 215 Population Health Care Management 3 Credits
In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.
Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

HTH 225 Health Care Financing 3 Credits
The goals of this course are: (1) to provide a description of how Americans pay for health care; (2) to explain how payment arrangements affect the health care system; and (3) to evaluate newly emerging arrangements. Specifically, we will focus on insurance (both public and private) in the United States, provider payment reform, the incentives of the parties in these arrangements and how these incentives impact cost containment in health care.
Prerequisite(s): HTH 205 and sophomore standing.

HTH 365 Health Care Information Systems 3 Credits
The Electronic Health Record (EHR) is one of the most complex technological projects ever undertaken. EHR involves the shared management, potentially on a global scale, of a variety of private, time-sensitive, multimedia data across activities including capture, processing, storage and access. The purpose of this course is to provide the future Health Administration professional with specifics of the socio-technical issues involved in this effort. The goals of this course are to study data standards used in modern EHR systems, technology platforms used to implement EHR in various types of organizations, data governance and regulations associated with health data, analytics that support quality of care and evidence-based practice.
Prerequisite(s): HTH 205; CIS 385 or GSC 385; HTH 215 or CIS 360; and junior standing.

HTH 491 Health Management Internship 3 Credits
This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.
Prerequisite(s): HTH 205; junior or senior standing; and permission of faculty supervisor.

MKT 380 Health Care Marketing 3 Credits
The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.
Prerequisite(s): MKT 200; junior & senior standing.

HTH 450 Seminar in Health Research 3 Credits
Students in the course learn to conduct health administration-related research by engaging in an actual community-based research project. At the beginning of the semester, students are assigned to a health-related community-based organization. As a team, students meet with the client, devise a plan of action, collect and analyze data and other information, and write a report to the client. At the end of the semester, students present their findings to the client.
Prerequisite(s): Permission of instructor.

HTH 490 Independent Study in Health Admin 3 Credits
An independent study in health administration allows a student to conduct an in-depth exploration of a topic in health administration under the supervision of a faculty member. The project helps develop a student's research and written skills.
Prerequisite(s): JR or SR standing, Permission of Instructor.

Health Communication

Program Overview

There is an increasing need for greater awareness and knowledge of health communication. Health care reform, end-of-life care, and pharmaceutical marketing are just a few of the issues facing the nation that are dependent upon the ability to engage in productive, meaningful health communication. Effective health communication can directly impact local communities and personal lives. The individuals who participate in health care delivery, such as nurses, patient advocates,

family members, health administrators, and physicians, are increasingly being asked to communicate and collaborate more efficiently with colleagues, exchange information with patients, and address multiple audiences about health care.

A minor in health communication allows students to analyze different health contexts and accommodate increasingly diverse populations. Students can also learn about a symbiotic patient-provider relationship and the impact of technology in health care.

The health communication minor includes a curriculum of theory, research and application, focusing on health issues in the interpersonal, organizational, public, and mass-mediated contexts. The study of health communication can contribute to health promotion in areas such as patient-family communication, public health messages and campaigns, health in mass media, public health, and technology and health. This minor is designed to be a program for students from a wide variety of majors who may seek careers within health fields.

COM 490	Independent Study: Research and Creative Expression	
COM 491	Internship in Communication	
BIO 490	Independent Study: Research and Creative Expression	
BIO 491	Internship in Biology	
Total Credits		**25**

Coures and Descriptions

BIO 206 The Pharmaceutical Industry 3 Credits
An introduction to drug discovery and development. Topics include how drugs are used to diagnose, cure, treat, and prevent disease and how drugs affect body function. The origins of diseases and the early attempts at treatment are also covered. Designed for business majors; does not satisfy requirements for the biology major.
Prerequisite(s): any BIO1XX or BNS1XX or CHE 1XX.

BIO 490 Independent Study: Research and Creative Expression 1-4 Credits
Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BIO 491 Internship in Biology 1-4 Credits
A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and should include keeping a journal of activities, a term paper or project report and a poster presentation. 2.5 GPA required.
Prerequisite(s): Permission of the instructor.

COM 251 Interpersonal Communication 3 Credits
Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 254 Intro to Health Communication 3 Credits
Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 312 Special Topics in Journalistic Writing 3 Credits
Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.
Prerequisite(s): COM 102 or COM 107.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits
Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits
Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.
Prerequisite(s): 3.2 GPA and permission of instructor.

GLS 325 Global Perspectives on Health and Illness 3 Credits
Explores the different international perspectives on health and illness. Themes include how men, women, and children in respective civilizations are treated and viewed within their communities or nations, as they become ill. Particular attention is given to the contrast between various types of traditional healing and Western medical practices, and their interactions. Discussions will also compare the usefulness of national versus international health agencies in dealing with global health problems.

HTH 205 Introduction to Health Care 3 Credits
This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 215 Population Health Care Management 3 Credits
In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.
Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

HTH 315 Health Care Law, Ethics and Policy 3 Credits
This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system. Students will not receive credit for completing both HTH 315 and BUS 315.

HTH 336 Economics of Health Care System 3 Credits
This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

MKT 380 Health Care Marketing 3 Credits
The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.
Prerequisite(s): MKT 200; junior & senior standing.

Health Sciences

Program Overview

The Health Sciences major educates the next generation of health professionals by providing students with a foundation in the life sciences and other coursework, preparing them to join the workforce or to attend professional or graduate schools in health-related fields. Rider achieves this through small class and laboratory sizes allowing direct, hands-on instruction, and faculty accessibility. Students also have opportunities to do research with faculty via work study or independent study. Each student is assigned a faculty advisor who provides academic advice and career guidance tailored to the student's needs. The program is designed to provide a strong foundation in its curriculum while allowing flexibility for subsequent studies in allied health programs such as physical

therapy, athletic training, occupational therapy, nursing, radiological science, optometry, podiatry, epidemiology and public health. It prepares students for graduate studies leading to advanced degrees in the life sciences; and for entry-level positions in hospitals, health insurance, pharmaceutical sales, community health agencies and other related areas.

Graduates of the health sciences program have pursued their professional or graduate studies at prestigious institutions such as Rutgers University, Moravian University, Emory University, University of Utah, NY College of Medicine, Thomas Jefferson University, Widener University, among others.

Curriculum Overview

The curriculum for Health Sciences majors is structured to prepare students for a life of learning in the sciences. Students are expected to master content, develop technical skills, analytical skills and competency in oral and written communication. Foundational courses in biology, chemistry, mathematics and psychology prepare students for the rigor of upper-level science and math courses, complemented by a broad base of health-related coursework in other disciplines. Capstone experiences allow students to explore one area of the life sciences in depth through internships and seminars, as well as opportunities to engage in independent research with Rider's science faculty. Students also have the opportunity to take part in a three-week internship course through the Capital Health System Hospitals.

Student Learning Outcomes

Graduates of the Health Sciences major will be able to:

1. Explain foundational concepts in biological sciences.
2. Apply scientific methods of inquiry through testing of newly formed hypotheses with observation and experimentation.
3. Apply concepts from other disciplines in the analysis and interpretation of biological information.
4. Demonstrate the ability to locate, critically analyze, and communicate relevant scientific information.
5. Explain the ethical practice of scientific research and its societal applications.

Honors Programs

Honors in Health Sciences

The objective of the honors program in health sciences is to introduce talented undergraduate majors to the methods of basic research in the biological sciences. For consideration a student must have a 3.25 average at the end of their junior year. In the senior year, participating students must complete an independent research project and present a written honors thesis. At graduation, a student who has a 3.25 cumulative average, a 3.5 average in health sciences coursework, and who has completed an acceptable honors thesis will be awarded Honors in Health Sciences.

Beta Beta Beta Biological Honor Society

"Tri-Beta" is a national honor society affiliated with the American Association for Advancement of Science and the American Institute of Biological Sciences. Invitations for membership are extended to majors in the life sciences who have demonstrated superior academic achievement. Students are usually invited to join in their sophomore year when they have accumulated 12 credits in the sciences. Active membership is available to those with an overall grade point average of at least 2.8, and at least 3.0 in their science courses. The benefits of membership include academic recognition; a subscription to the journal *Bios*, to which members may submit research articles; opportunities to present papers at conventions; and research awards. Biology and behavioral neuroscience majors should make membership in *Tri-Beta* one of their goals.

Requirements for the Major

Course Repeat Policy (p. 301)
(64-68 credits)

Code	Title	Credits
Biology		**16**
Complete the following courses:		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab [1]	
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab [1]	
BIO 221 & 221L	Human Anatomy & Physiology I and Human Anatomy & Physiology I Lab	
BIO 222 & 222L	Human Anatomy & Physiology II and Human Anatomy & Phys II Lab	
Chemistry		**8**
Complete one of the following course sequences:		
CHE 120 & CHE 121	Principles of Chemistry and Principles of Chemistry Lab	
CHE 122 & CHE 123	Intro to Chemical Systems and Quantitative Methods Lab	

OR

CHE 110 & 110L	Survey of General Chemistry and Survey of Gen Chemistry Lab	
CHE 225 & 225L	Introduction to Organic and Biochemistry and Introduction to Organic and Biochemistry Lab	
Mathematics		**8-10**
Complete the following courses:		
MTH 105	Algebra and Trigonometry [2,3]	
BNS 250 & 250L	Biostatistics and Biostatistics Lab	
or PSY 105 & PSY 201	Introduction to Research in Psychology and Statistics and Research Design	
Psychology		**6**
Complete the following courses:		
PSY 100	Introduction to Psychology	
PSY 345	Health Psychology	
Category 1 Electives		**6-8**
Select two or more of the following courses:		
BCH 225 & 225L	Introduction to Organic and Biochemistry and Introduction to Organic & Biochemistry Lab [4]	
PHY 100 & 100L	Principles of Physics I and Principles of Physics I Lab	
or PHY 200 & 200L	General Physics I and General Physics I Lab	
PHY 101 & 101L	Principles of Physics II and Principles of Physics II Lab	
or PHY 201 & 201L	General Physics II and General Physics II Lab	
BIO 206	The Pharmaceutical Industry	
CHE 211 & 211L	Organic Chemistry I and Organic Chemistry I Lab	
CHE 214 & 214L	Organic Chemistry II and Organic Chemistry II Lab	
PSY 220	Psychological Disorders	
PSY 230	Child Development	
PSY 231	Youth and Adolescent Development	
Category 2 Electives		**8**
Select two or more of the following courses:		
BIO 260 & 260L	Principles of Biology: Evolution, Diversity, and Biology of Cells and Principle of Biology: Cells Lab	
BIO 215 & 215L	Medical Microbiology and Microbiology Lab	
BIO 265 & 265L	Genetics and Genetics Lab	
BIO 300 & 300L	Developmental Biology and Developmental Biology Lab	
BIO 305 & 305L	Animal Physiology and Animal Physiology Lab	
BNS 275 & 275L	Behavioral Neuroscience and Behavioral Neuroscience Lab	
BIO 370 & 370L	Immunology and Immunology Lab	
BNS 310 & 310L	Neurobiology and Neurobiology Lab	
BNS 360 & 360L	Neurochemistry and Neurochemistry Lab	
EXS 320 & EXS 321	Exercise Physiology and Exercise Physiology Laboratory	
HSC 302 & HSC 303	Kinesiology and Kinesiology Lab	
Category 3 Electives		**9**
Select three or more of the following courses:		
COM 240	Public Relations	
COM 254	Intro to Health Communication	
GLS 325	Global Perspectives on Health and Illness	
or NUR 407	Cultural Diversity in a Global Society	
HSC 110	Introduction to Human Nutrition	
HSC 150	Introduction to Public Health	
HSC 200	Environmental Health & Human Health	
HSC 250	Introduction to Epidemiology	
HTH 205	Introduction to Health Care	
HTH 215	Population Health Care Management	
NUR 402	Scholarship in Evidence-Based Practice	
NUR 403	Information Management and Application of Patient Care Technology	
NUR 404	Healthcare Policy, Finance, and Regulatory Environments	
NUR 405	Interprofessional Collaboration and Communication for Improving Healthcare Outcomes	
PHL 304	Medical Ethics [5]	
SOC 346	Health Care and Society	
Senior Capstone		**3**
Select one of the following:		
HSC 490	Independent Study: Research and Creative Expression	
or HSC 491	Internship in Health Sciences	
Total Credits:		**64-68**

1 Students must earn a grade of "C" or better in these courses in order to meet the major requirement and before enrolling in upper-level courses for which these courses are prerequisites.
2 Students must complete MTH 105 or higher.
3 Students must place into MTH 105 or a higher level mathematics course in order to register for BIO 115/BIO 115L and BIO 116/BIO 116L.
4 BCH 225/BCH 225L cannot be counted as both a Chemistry requirement and Category 1 Elective.
5 PHL 304 may also be used to satisfy the CAS Philosophical Perspectives core requirement.

Department of Health Sciences and Nursing Course Repeat Policy

The following guidelines apply to courses offered by the Department of Health Sciences and Nursing. Students may repeat any health sciences (HSC) or exercise science (EXS) course **once** without special permission unless they received an unsatisfactory grade (C-, D, F). With an unsatisfactory grade, students need permission from the dean's office to repeat a class. They can not register on their own on myRider. Students should email casdean@rider.edu and the department chair to request permission to repeat a course. A course will be considered

repeated if the student has previously earned a letter grade in the course, or if the student has previously withdrawn from the course after the Friday of the seventh week of classes (previously Withdrawal II or Withdrawal III). To take a health science, or exercise science course for a third time, written permission must be obtained from the dean's office and the department chair before the registrar will allow the student to enroll in that course.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab	4
MTH 105	Algebra and Trigonometry [1]	4
PSY 100	Introduction to Psychology	3
CMP 120	Seminar in Writing and Rhetoric	3
	Semester Credit Hours	**14**
Spring Semester		
HSC 105	Introduction to Health Professions	1
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	4
CMP 125	Seminar in Writing and Research	3
HSC Category 3 Elective #1 of 3		3
Social Perspectives		3
	Semester Credit Hours	**14**
Year 2		
Fall Semester		
BIO 221 & 221L	Human Anatomy & Physiology I and Human Anatomy & Physiology I Lab [2]	4
CHE 120 & 120 or CHE 110 ***and*** CHE 110L	Principles of Chemistry or Survey of General Chemistry ***and*** Survey of Gen Chemistry Lab	4
Foreign Language		3
Social Perspectives		3
	Semester Credit Hours	**14**
Spring Semester		
BIO 222 & 222L	Human Anatomy & Physiology II and Human Anatomy & Phys II Lab	4
CHE 122 & CHE 123 or CHE 225 ***and*** CHE 225L	Intro to Chemical Systems or Introduction to Organic and Biochemistry ***and*** Introduction to Organic and Biochemistry Lab	4
Foreign Language		3
HSC Category 3 elective #2 of 3		3
	Semester Credit Hours	**14**
Year 3		
Fall Semester		
BNS 250 & 250L	Biostatistics and Biostatistics Lab	4
HSC Category 1 Elective #1 of 2		3
HSC Category 2 elective with lab, #1 of 2		4
Social Perspectives		3
HIS 150	Pre-Modern World: Evolution to Revolution	3
	Semester Credit Hours	**17**
Spring Semester		
HSC Category 2 elective with lab, #2 of 2		4
PSY 345	Health Psychology	3
HIS 151 or HIS 152 or HIS 153	World in the Modern Era: Exploration to Globalization or Contemporary World: Historical Perspectives or Cold War: A Global History	3
Aesthetic Perspectives: Literature		3
HSC Category 3 elective #3 of 3		3
	Semester Credit Hours	**16**
Year 4		
Fall Semester		
HSC 491 or HSC 490	Internship in Health Sciences [4] or Independent Study: Research and Creative Expression	3
Three Elective Courses [3]		10
HSC Category 1 Elective #2 of 2		3
	Semester Credit Hours	**16**
Spring Semester		
Aesthetic Perspectives: Fine Arts		3
Four Elective Courses [3]		12
	Semester Credit Hours	**15**
	Total Credit Hours for Graduation	**120**

1. For course placement information see https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing (https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing/)
2. Scientific Perspectives general education requirements are included in major.
3. Elective credits may be used to complete requirements in a second major or minor.
4. HSC 490/491 (Capstone) can be completed Fall or Spring. Consult academic advisor for planning and requirements.

HSC 102 Medical Terminology 1 Credits
Medical terminology is the study of the principles of medical word building to help the student develop extensive medical vocabulary used in health care occupations. Students will gain an understanding of basic elements, rules of building and analyzing medical words, and medical terms associated with the body as a whole.
Prerequisite(s): Permission of instructor.

HSC 105 Introduction to Health Professions 1 Credits
Course Description: This course will provide a basic overview of the health science professions including but not limited to: athletic training, clinical exercise physiology & cardiac rehabilitation, chiropractic, physician assistant, occupational therapy, nursing, community health education specialist, and physical therapy. The course will also cover the professional activities (i.e. professional organizations, certifications, professional issues, and professional liabilities) that are related to these professional applications.

HSC 110 Introduction to Human Nutrition 3 Credits
This course is designed to offer the student an understanding of fundamental human nutrition concepts including, but not limited to, digestion, absorption, metabolism, functions, and sources of macronutrients and micronutrients. The theme of the course will align with human health and disease states and the important conceptions about the food industry and its relation to healthy dietetic choices.

HSC 150 Introduction to Public Health 3 Credits
Public Health is the science of protecting, promoting, and improving the health of people and the communities where they live, learn, work, and play. Students will gain an understanding of the history and functions of public health, strategies and methods used in public health research, and the determinants of health.

HSC 200 Environmental Health & Human Health 3 Credits
The health of any individual is a function of both our genetics and environmental factors. Environmental factors most broadly defined include the air we breathe, the water we drink and the food we eat. This course will focus on numerous examples of how bacteria, viruses, and exposure to environmental chemicals result in human diseases. Examples range from failures in public health infrastructure (cholera, diphtheria, river blindness, etc), failures to vaccinate (polio, measles, hepatitis, etc) and chemical exposures (birth defects, cancer, etc). There is also much known about how diet and nutrition can prevent diseases.
Prerequisite(s): BIO 10X Life Science course or any biology laboratory course or BIO 115 or 116 or 117.

HSC 210 Nutrition for Exercise and Physical Activity 3 Credits
An introductory exploration of evidence based nutritional theory and applications in sport and exercise.
Prerequisite(s): HSC 100 with a minimum grade of D or BCH 225 with a minimum grade of D.

HSC 250 Introduction to Epidemiology 3 Credits
Epidemiology is the study of distribution and determinants of defects, disease, and injury in human populations and the application of that study to assess the magnitude of health problems and the result of interventions designed to control them. This course is designed to introduce students to the basic principles, methods, and uses of epidemiology to better understand and characterize health and disease at a population level. The role of epidemiological evidence in planning and evaluation will be also be explored.
Prerequisite(s): MTH 102 or higher OR MSD 105 or higher OR POI.

HSC 302 Kinesiology 3 Credits
The purpose of this course is to explore human movement during performance of activities. This course will explore the relationship between anatomical structures and function in the production of movement. The application and relationships between the fundamental principles of mechanics and musculoskeletal system function will be addressed within the framework of clinical and research perspectives. Both qualitative and quantitative approaches will be applied towards a better understanding of human movement, the analysis of physical activity. Prerequisite(s): BIO 221 & MTH 105 (or equivalent) or POI.
Corequisite: HSC 303.

HSC 303 Kinesiology Lab 1 Credits
This lab is a co-requisite and must be taken with HSC 302.
Corequisites: HSC 302.

HSC 490 Independent Study: Research and Creative Expression 1-4 Credits
Immerses the student in health science-related research. The student learns to organize material, use relevant medical/scientific literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

HSC 491 Internship in Health Sciences 1-4 Credits
A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty member and should include keeping a journal of activities, a term paper or project report and an oral or poster presentation.
Prerequisite(s): 2.5 GPA required.

History

Program Overview

History allows us to understand ourselves and others and our shared world by exploring and analyzing the entire range of human experience. The study of history encompasses both the study of the record of the past and the discipline of investigating and interpreting the past. It develops critical habits of mind, provides training in the analysis and synthesis of evidence, and hones skills in effective communication both orally and in writing. The history major is an excellent preparation for careers in law, government, journalism, business, and the non-profit sector, as well as in public history and education at all levels. For more on jobs for history majors, consult the American Historical Association website at: https://www.historians.org/jobs-and-professional-development/career-resources/careers-for-history-majors (https://www.historians.org/jobs-and-professional-development/career-resources/careers-for-history-majors/)

Curriculum Overview

Rider University history students complete an innovative program that exposes them to the history of major world cultures as well as the United States. Students take seminars in their first semester, in their fourth or fifth semester, and in their senior year. Each seminar is capped at 16 students in order to foster deep personal engagement of students and faculty and to allow for individual development of analytical, research, and writing skills. For the senior capstone, students produce a substantial work of original research in the senior seminar or in an

Independent Study with a faculty mentor. Students also select from a range of topical courses drawing on faculty expertise in the history of Africa and the African diaspora, Latin America and the Caribbean, East Asia, South Asia and the Middle East, classical, medieval, early modern and modern Europe, as well as colonial America and the history of the United States in all periods. In addition, the department offers clusters of courses on women's history and the history of gender and sexuality, and on environmental history. Students can also explore history outside of the classroom through our internship program, which allows them to earn course credit while working in archives, museums, and historic sites.

History Major Requirements

(36-39 credits)

Code	Title	Credits
Category I: History Seminars		**6-9**
Select 6-9 credits from the following:		
HIS 160	Seminar in History [1]	
HIS 260	Craft of History (may be repeated for Category III credit with a different topic)	
HIS 460	Research Seminar	
Category II: U.S. and European Surveys		**6-9**
Select 6-9 credits with at least one course in U.S. history and one course in European history. Education students are strongly encouraged to take both U.S. surveys as well as one European survey.		
Note: Students who select only 2 courses (6 credits) in Category II must take 8 courses (24 credits) in Category III.		
HIS 180	U.S. History I	
or HIS 181	U.S. History II	
HIS 190	Europe to 1715	
or HIS 191	Europe Since 1715	
Category III: History Electives		**21-24**
Students who select two courses (6 credits) in Category II must select eight courses (24 credits) in Category III. Students who select three courses (9 credits) in Category II must select seven courses (21 credits) in Category III.		
At least two Category III courses (6 credits) must be at the 200 level and two courses (6 credits) at the 300 level. The remaining courses can include HIS 152 or HIS 153. At least two courses for Category III must be selected from the Diversity courses listed at the bottom of the list.		
HIS 152	Contemporary World: Historical Perspectives	
or HIS 153	Cold War: A Global History	
HIS 218	America Between the Wars	
HIS 220	America's Culture Wars	
HIS 224	American Environmental History	
HIS 225	A History of American Business	
HIS 226	History of New Jersey	
HIS 227	U.S. Cultural History I	
HIS 230	History on Screen	
HIS 240	History of Ancient Greece	
HIS 241	History of Ancient Rome	
HIS 243	Italy Middle Ages to Present	
HIS 245	Britain to 1688	
HIS 246	Modern Britain	
HIS 248	History of Ireland	
HIS 255	History Abroad	
HIS 298	Special Topics in History	
HIS 300	Economic History of the U.S.	
HIS 301	Constitutional History of U.S.	
HIS 302	American Worker: Social History	
HIS 303	American Urban History	
HIS 304	Civil War and Reconstruction	
HIS 306	U.S. Cultural History II	
HIS 307	The Immigrant in American Life	
HIS 318	The American Revolution	
HIS 320	The History of Christianity	
HIS 325	Church & Society in Med Europe	
HIS 326	Renaissance and Reformation	
HIS 333	20th-Century Europe	
HIS 334	The Era of World War II	
HIS 335	Nazi Germany & Hitler's Europe	
HIS 336	Modern European Intellectual History	
HIS 337	Post-1945 United States History	
HIS 351	Warfare in History	
HIS 352	Rise and Fall of Communism	
HIS 353	Oral History	
HIS 398	Special Topics in History	
Diversity Courses (select two):		
HIS 200	Native American History	
HIS 201	African American History	
HIS 249	Women in Europe from Antiquity to the French Revolution	
HIS 273	Imperial Russia	

HIS 274	Modern Russia
HIS 280	Vietnam in Peace and War
HIS 281	Modern Middle East
HIS 282	Colonial Latin America
HIS 283	Modern Latin America
HIS 284	Caribbean History
HIS 286	Modern East Asia
HIS 288	African History
HIS 289	History of Modern Japan
HIS 309	Women in American History
HIS 319	Gender and Sexuality in American History
HIS 341	China in Revolution
HIS 342	Women in East Asia
HIS 343	Ottoman Empire and the Balkans
Total Credits	**36-39**

Total Credits:

36-39

[1] Students who declare the history major after the freshman year should consult their advisor on the suitability of this course for their program.

History Minor Requirements

(21 credits)

Code	Title	Credits
Select seven courses from the list below: three at the introductory level (150-199) and four at the intermediate to advanced level (200-491).		21
HIS 150	World History to 1500	
HIS 151	World History Since 1500

1. For course placement information see https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing (https://www.rider.edu/student-life/first-year-experience/orientation/placement-testing/)
2. Program must include at least two courses at the 200 level and at least two at the 300 level. At least two courses must be Diversity courses.
3. Please note that elective credits may be used to complete requirements in a second major or minor.

Courses and Descriptions

HIS 150 Pre-Modern World: Evolution to Revolution 3 Credits
This course traces both regional histories and global interactions, and covers the development of societies and states in Africa, the Americas, Asia and Europe from prehistoric times until about 1500. Certain major topics will be pursued, including agriculture, great empires, the major world religions, long-distance trade, and early modern exploration. While learning about these topics, students will also gain an understanding of the practice of history, especially of the kinds of sources historians use and how they reconstruct and interpret the past.

HIS 151 World in the Modern Era: Exploration to Globalization 3 Credits
Learn what college students should know about history as a discipline and why history matters by tracing the development and interactions of the cultures of Europe, Africa, Asia and the Americas from 1500 to the present. Students will gain an appreciation for the value of historical thinking and a greater understanding of the relationships among modern nations so necessary for global citizenship.
Prerequisite(s): HIS 150.

HIS 152 Contemporary World: Historical Perspectives 3 Credits
The purpose of a world history course is to encourage students to think more coherently, systematically, and comparatively about the past. This course focuses on change and continuity within and across major regions of the world and between the modern and contemporary historical periods. We will make comparisons and connections to see how developments in different parts of the world affected one another. We will investigate causality to understand multiple causes of complex events in the recent past. We will investigate contingency, to see that historical outcomes in the 20th century are deeply interconnected with developments in the modern era and are not pre-determined. And we will learn context, to situate people, events, and sources in time and place. Several big picture questions will provide students with a better sense of the contemporary world and their place in it. Questions include: In what ways did the global world of the 18th and 19th century shape the patterns of change in the 20th century and beyond? Does the century since 1914 represent a separate phase of world history? What are the key continuities and transformations? How are ideologies such as nationalism, anti-imperialism, authoritarianism and neoliberalism interrelated and how have they influenced the present day? What have been the benefits and costs of the spread of industrial capitalism across much of the world? How has globalization promoted common values and interests, and an increasingly common material culture across the world, and how has it increased conflicts? Pre-requisite(s): HIS 150.

HIS 153 Cold War: A Global History 3 Credits
This course offers a dynamic and sweeping overview of the Cold War. It is intended for undergraduate students interested in a sharper awareness of today's world. Providing balanced coverage of the whole era, it takes a strictly global approach, demonstrating how at various times the focus of the West-East conflict shifted to new and surprising venues, from the Belgian Congo to Vietnam, from Angola to Cuba. Big ideas include the conflict of ideologies, nuclear ethics, the space race, and the influence of personality on world affairs. Throughout the course, we emphasize intelligence and public opinion, and highlight specific questions relevant to the present day: the environment, the influence of technology, and forms of authoritarian rule. An array of popular culture examples is used to show how the Cold War crisis was understood and perceived by people across the world. The course includes three 'snapshot' lessons, overviews of the state of play at pivotal moments – 1946, 1968, and 1980 – to illuminate the inter-connectedness between seemingly distinct situations. While learning about these topics, students also gain an understanding of the practice of history, especially of the kinds of sources historians use and how they reconstruct and interpret the past. The course provides a fundamental introduction for students studying Cold War, twentieth century or global history.
Prerequisite(s): HIS 150.

HIS 160 Seminar in History 3 Credits
This course introduces students to the discipline of history and to the skills needed for its pursuit. Students will learn to analyze and evaluate primary sources and to identify the thesis and argument of secondary sources, as well as to locate sources using library databases. They will complete a short research paper in which they put these skills into practice. The seminar is intended for History majors and minors and Social Studies majors in their freshman year. Transfer students with fewer than 45 credits should consult their advisor on the suitability of the course for their program. Enrollment limited to 16.

HIS 180 U.S. History I 3 Credits
A survey of American history from the early 17th century through 1877. Among the topics covered will be settlement and regional differences, the American Revolution and the formation of a national government by 1787. The beginning stages of industrialization, the rise of democratic and reform politics, westward expansion, the debate over slavery and growing sectional tensions through the Civil War and Reconstruction will be major themes in the 19th century. Included will be discussions of African Americans, Native Americans, and women.

HIS 181 U.S. History II 3 Credits
A survey of United States history from the end of the Civil War through the present. Included will be discussions of the maturing of an industrial economy, and expansion in the west and overseas. The role of the United States as a world power and the growth of presidential power will be shaped and sometimes challenged by movements designed to expand democratic institutions and human rights. Included will be discussions of African Americans, Native Americans, and women.

HIS 190 Europe to 1715 3 Credits
Examines the development of European civilization from late Roman times until 1715, stressing the Classical heritage, the main currents of European thought and letters, the Renaissance and Reformation, the Age of Discoveries, and the development of the Old Regime.

HIS 191 Europe Since 1715 3 Credits
Examines major political, economic, social, and cultural developments in Europe and the West from 1715 to the present.

HIS 200 Native American History 3 Credits
Traces the experiences of North American Indians from early colonial times to the present day, demonstrating how Indian life has varied and changed throughout our nation's history. Topics include strategies of resistance and accommodation to colonial powers, 19th- century impacts of U.S. government removal and cultural assimilation policies, and 20th-century cultural and political developments among the nation's surviving tribes. Rather than "vanishing," American Indians are a vital and expanding force in modern America.

HIS 201 African American History 3 Credits
Examines the actions and thought of peoples of African ancestry in the United States. Briefly considers Africa before the Atlantic slave trade, then concentrates on major themes in African-American history--the slave trade, slavery, and the genesis of African American society, emancipation and its consequences, urbanization and industrialization, Black Nationalism, the Civil Rights Movement, and African Americans today. Emphasizes African Americans' dynamic and creative role both in shaping their society and establishing their place in United States society. The on-going struggle for freedom and equality provides thematic continuity for analyzing nearly 400 years of African-American history.

HIS 218 America Between the Wars 3 Credits
This course will amplify the dynamic changes and deep challenges found in American society, politics, culture, and foreign policy in the years between 1918 and 1945. We will examine topics like America's purpose in WWI, immigration, antiradicalism, the "roaring twenties," the Harlem Renaissance, consumer culture, the Great Depression, the rise of unions, the New Deal, and the foreign and domestic juggernaut that was WWII.

HIS 220 America's Culture Wars 3 Credits
For much of the recent past Americans have lived in a state of "culture war." This course will examine the history of modern culture and the conflict that sprang up around it, focusing on the rise of cities, race and racism, shifting sex and gender norms, religion, pleasure, education, immigration, and politics. Students will assess cultural and political developments over the course of the twentieth century with an eye toward understanding the twenty-first.

HIS 224 American Environmental History 3 Credits
Surveys the history of the North American environment from pre-Columbian times through the 20th century. Topics include Native American uses of the environment; the reshaping of ecosystems under European colonization; U.S. frontier expansion; the ecological impact of industrialization and urbanization; and the rise of the environmental movement.

HIS 225 A History of American Business 3 Credits
Examines the history of business in the United States from the Colonial Era to the present. Emphasizes such themes as the changing capitalist system, the function of business institutions, the roles of the entrepreneur, the relationship between government and business, and the emergence of the corporation.

HIS 226 History of New Jersey 3 Credits
Explores the history of New Jersey from the colonial period to the present including the role of New Jersey in the American Revolution, the establishment of the Constitution, and the course of industrialization. Examines the impact of national and international developments on New Jersey and emphasizes the distinctive characteristics of the Garden State.

HIS 227 U.S. Cultural History I 3 Credits
Examines cultural developments in the United States through the Civil War. Topics include popular culture, the history of the body, reading and print culture, public celebrations and holidays, religion, race and ethnicity, and material culture. Some of the larger trends explored include the creation of American nationalism, the development of a consumer society, and the rise and decline of 19th-century family life and culture.

HIS 230 History on Screen 3 Credits
This course explores the ways in which feature films and documentaries construct the historical past and shape, reflect, or revise popular understandings and national or cultural myths about the past. We will consider films as products of particular moments in history (potential primary sources), as well as arguments about the moments they portray (potential secondary sources). We will explore how audiences take an active role in shaping the meaning of a film, and thus how that meaning may shift as audiences change over time. We will trace how and why filmed representations of our understanding and interpretation of the past have changed over time. The topics of the films analyzed in this course may vary.

HIS 240 History of Ancient Greece 3 Credits
Surveys the intellectual and cultural life of ancient Greek civilization against the background of its political, economic, and social history.

HIS 241 History of Ancient Rome 3 Credits
Studies the history and culture of Rome, emphasizing such topics as Roman law, government, literature, religion, art, and philosophy.

HIS 243 Italy Middle Ages to Present 3 Credits
Traces the history of Italy from the Middle Ages to the present, stressing the connection between culture, religion, politics, and wealth in successive historical periods. Students participating in the two-week travel component at the end of the course may receive four credits.

HIS 245 Britain to 1688 3 Credits
British history from pre-Roman times to the Glorious Revolution is examined, emphasizing the growth of royal government, parliament, and the origins of the British colonial empire.

HIS 246 Modern Britain 3 Credits
Examines British history from the Glorious Revolution to the present, stressing the reform movements of the 18th and 19th centuries, the Pax Britannica, the Industrial Revolution, imperialism, and the impact of the two world wars.

HIS 248 History of Ireland 3 Credits
Beginning with an overview of the Irish past, focuses upon the past century of the island's history--the problems, challenges, and accommodations that led to the present situation as one of the most protracted unresolved partitions in the modern nation-state system.

HIS 249 Women in Europe from Antiquity to the French Revolution 3 Credits
Traces the history of women in Europe from Rome to the French Revolution, covering the religious, social, political, and economic context in which women participated. Also offers a brief overview of theories and issues in women's history and gender history.

HIS 255 History Abroad 3 Credits
Two-week travel course to a destination chosen by the professor. Exposes students to historic and cultural sites and works of art that have been studied in class. Students must attend orientation sessions, read assigned writings, complete a travel journal, write a final paper on a topic relevant to the course, and attend all scheduled course activities abroad. Travel will take place in January or at the end of the spring semester.

HIS 260 Craft of History 3 Credits
This seminar focuses on historiography and research skills to further students' progress toward the major capstone experience of conducting independent historical research. Students will explore how historians approach, interpret, and write about a particular topic selected by the instructor, and discover how and why interpretations and methods have changed over time. Topics will vary by instructor. Course may be taken a second time on a different topic for 200-level credit. The course is required for History majors who are Sophomores or Juniors. Enrollment limited to 16.

HIS 273 Imperial Russia 3 Credits
Discusses the political, economic, social and cultural developments in Russia and its borderlands during the Imperial period, that is to say the 18th and 19th centuries from Peter the Great to the Revolutions of 1917. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 274 Modern Russia 3 Credits
Covers the background to the Russian revolutions of 1917, the revolutions themselves, and the evolution and dissolution of the Soviet regime. Cultural, social and economic aspects of this period receive as much attention as political aspects. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 280 Vietnam in Peace and War 3 Credits
Examines the history of modern Vietnam, with a focus on the struggle for independence from the late 18th century to the present. Discusses the traditional culture, French colonialism and the development of Vietnamese nationalism, the Japanese occupation in WWII, and the struggle against France and the U.S. in the First and Second Indochinese Wars, as well as the postwar period. Explores the American experience in Vietnam and the impact of the war in the United States.

HIS 281 Modern Middle East 3 Credits
Examines political, economic, social, and cultural developments in the Near East, from the rise of the Ottoman Empire to the present, stressing the impact of contacts with the West in the 19th and 20th centuries, and the emergence of the contemporary Arab World, Israel, Turkey, and Iran.

HIS 282 Colonial Latin America 3 Credits
Examines the pre-Columbian and colonial periods of Latin-American history. Discusses the Indian, African, and European peoples and pays particular attention to the colonial Spanish and Portuguese societies from their establishment up to the revolutions that brought about political independence.

HIS 283 Modern Latin America 3 Credits
Considers the post-independence history of Latin America, emphasizing the rise of export economies and external economic domination, modernization, and pan- Americanism. Examines the changes undergone by Latin-American nations in the 20th century through an analysis of Mexico, Argentina, Chile, Brazil, Peru, Cuba, and Central America.

HIS 284 Caribbean History 3 Credits
Analyzes the history of the West Indian islands and the lands bordering the Caribbean Sea from pre-Columbian times to the present.

HIS 286 Modern East Asia 3 Credits
Examines the disintegration of the Ch'ing dynasty in China and the Tokugawa Shogunate in Japan under internal stresses and foreign incursions, and the varied experience of those states in coming to terms with the challenges of modernization and westernization. Covers political, economic, social, and cultural factors in China, Japan, and East Asia.

HIS 288 African History 3 Credits
Traces the history of Africa, analyzing the unique problems of African historical evidence and the complexity of the continent's past. Examines the genesis of African culture, early African societies, and the character of African civilizations and empires, then considers external influences such as religion (especially Islam and Christianity), contacts with Europe, the slave trade, the colonial scramble for Africa, colonial rule, modernization and dependency, and concludes by assessing the rise of independent Africa after World War II, its present status and future prospects.

HIS 289 History of Modern Japan 3 Credits
Examines the history of modern Japan from the age of the samurai in the Tokugawa Shogunate to today's high-tech mass consumer society. It traces the interaction of elements of Japan's traditional culture with impacts from the outside to create a uniquely-Japanese modernity. It stresses social, economic, and cultural trends, as well as political history, and includes an examination of modern Japanese culture through fiction and film.

HIS 298 Special Topics in History 3 Credits
Exploration of special topics, themes or methodologies in history. This course may be repeated for credit on different topics.

HIS 300 Economic History of the U.S. 3 Credits
Studies the main currents in the economic growth of America from colonial times to the present. Stresses the process of economic development from an agrarian to an industrial society, and examines the challenges and dislocations resulting from economic change.

HIS 301 Constitutional History of U.S. 3 Credits
Surveys the English, Colonial, and Confederation backgrounds of American law and constitutionalism; the framing, adoption, and implementation of the Federal Constitution and its later development; the role of law in the nation's history; the changing interpretations of federalism; the growth of judicial review; and the increasing role of the Supreme Court.

HIS 302 American Worker: Social History 3 Credits
Investigates the American workers' varied social, cultural, religious, and ethnic environment from post-Civil War to the present. Emphasizes worker response to industrialization, urbanization, the technical revolution, and automation.

HIS 303 American Urban History 3 Credits
Traces the growth of urbanism in America from colonial times to the present. Focuses on the interaction between the city dweller and the urban environment and explores the problems confronting urban America today.

HIS 304 Civil War and Reconstruction 3 Credits
Considers the Civil War as a watershed in the development of the American republic. Analyzes antebellum sectional conflict, the war years, and the era of Reconstruction.

HIS 306 U.S. Cultural History II 3 Credits
Examines cultural developments in the United States from the late 19th century to the present. Topics include popular culture, intellectual history, gender history, literary history, film, institutions like museums and department stores, subcultures and counter- cultures, popular commemorations like World's Fairs, and political culture. Some of the larger trends explored include the development of the modern culture of consumption, the urban landscape, and the polarization of cultural values.

HIS 307 The Immigrant in American Life 3 Credits
Examines the experiences of immigrants in the United States, their assimilation, the reactions to them, and their contributions.

HIS 309 Women in American History 3 Credits
Examines the roles, status, and influence of women from the colonial era to the present. Studies the origins and development of feminism, including legal, political, educational, economic, and sexual rights; and studies social feminism, including reform movements in such fields as abolition, prohibition, pacifism, child labor, and social welfare.

HIS 318 The American Revolution 3 Credits
Examines the growing rift between the American colonies and the British Empire, the War for Independence, and the creation of a new American republic. Explores the political, economic, social and cultural history of the Revolutionary era, and includes the experiences of various groups such as Native Americans, slaves, and women.

HIS 319 Gender and Sexuality in American History 3 Credits
What makes a man, exactly, and what makes a woman? What kinds of sex are normal, and what kinds are abnormal? Who decides, and why? The answers to these questions are not fixed. Throughout American history, popular understandings of gender and sexual norms evolved in close relationship with the political, economic, racial, and social dictates of the time. This course will trace the evolution of ideas on sec and gender from the 18th century to the present using various historical sources including fiction and film, particular attention will be given to analyzing dominant models of proper behavior and the complex relationships of power enmeshed within them.

HIS 320 The History of Christianity 3 Credits
Examines Christianity's role in world history from the life and times of Jesus to the present. Emphasizes the quest for the historical Jesus, the emergence of Christianity after his death and triumph during the later Roman Empire, and Christian relations with pagans, Jews, heretics, witches and Muslims. Traces the various branches of Christianity, its spread throughout the world, church-state relations and responses to secularism, capitalism and communism.

HIS 325 Church & Society in Med Europe 3 Credits
Studies the role of the church in the shaping of early medieval society. Emphasizes the emergence of Christianity as a world force, its challenge from Islam, and the church's impact on the politics, thought, and economy of early medieval Europe.

HIS 326 Renaissance and Reformation 3 Credits
Studies the Renaissance, including the development of humanism and art as well as the political and economic changes of the period. Discusses the Renaissance church and movements for religious reform, leading to a consideration of the origins, development, and consequences of the Reformation. Examines the influence of the Renaissance and Reformation on the development of capitalism and the dynamic, secular nation-state.

HIS 333 20th-Century Europe 3 Credits
This course covers the history of twentieth-century Europe, a time when major wars brought Europe from the heights of prosperity and power to the brink of ruin. Europe's experience in war, social upheaval, and ideological conflict shaped the twentieth century not just in Europe but globally. We begin with a look at the condition of Europe at the turn of the century and assess why the European states plunged into what was a disastrous series of conflicts. We will consider the First World War and its impact, including the Russian Revolution and the peace settlement, and then focus on attempts to find stability and the emergence of radically new political movements that challenged the postwar order. Next we will examine the ways in which Europe embarked on the path of near self-destruction during World War Two. A discussion of the origins and consequences of the Cold War and the fate of the socialist and capitalist systems follows. Throughout the course we will touch upon European art and culture. We will conclude with a look at the events of 1989 and attempt to understand the meaning of the twentieth century. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 334 The Era of World War II 3 Credits
Investigates selected topics relating to the origins, events, and outcome of World War II, emphasizing the war's impact on 20th-century civilization. Traces the roots of the conflict back to the World War I peace settlements, and examines the rise of totalitarianism, pre-war aggression and appeasement, the immediate causes of the war's outbreak, the course of military actions, the diplomacy of the belligerents, the War's impact on civilian life, and factors that shaped the post-war world. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 335 Nazi Germany & Hitler's Europe 3 Credits
Examines the Nazi dictatorship in all its complex dimensions, from the early life of Adolf Hitler to total war and genocide. Students will explore how the Nazi movement arose in the context of modern German and European history, and how the Nazis were able to win the support of significant segments of the German population. We will study the Nazis' massive project of social and biological engineering – pronationalism, forced sterilization, extermination of "social and biological deviants," and, ultimately, the genocide of the Jews. Through memoirs, state documents, and historical accounts, the class will examine life from the vantage point of perpetrators, accommodators, victims, and resisters. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 336 Modern European Intellectual History 3 Credits
Examines the 17th-century revolution in scientific, philosophical, and political thought; the Enlightenment; Romanticism; the ideologies of Conservatism, Liberalism, and Socialism; Positivism; Darwinism; the crisis of European thought (1880-1914); and the major intellectual trends of the 20th century.

HIS 337 Post-1945 United States History 3 Credits
This course will magnify American society, politics, culture, and foreign policy from 1945 to the present, tracing the rise and fall of the "American Century". We will focus on topics such as the Red Scare, suburbanization, mass culture, the power of the presidency, the Civil Rights movement, Vietnam, disco, and the war on terror, offering students a unique opportunity to delve deeply into our recent past.

HIS 341 China in Revolution 3 Credits
Treats the Chinese Revolution in terms of political, economic, and social transformation.

HIS 342 Women in East Asia 3 Credits
Treats the history of the relationship between women and society in traditional East Asia and the modern transformation of their relationship.

HIS 343 Ottoman Empire and the Balkans 3 Credits
This course is divided into two parts. Part one examines the rise, zenith, and gradual disintegration of the Ottoman Empire, one of the greatest, most extensive, and long lasting empires in history, with special focus on the southeastern projection of Europe, known as the Balkan Peninsula. The second half of the course concentrates on Balkan history proper, from the First World War until the demise of communist regimes in the late 1980s. Lastly, we will consider contemporary developments, especially the breakup of Yugoslavia and its aftermath.This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 351 Warfare in History 3 Credits
Studies the evolution of international and intergroup conflict through the ages; principles, theories, and kinds of war; the great military practitioners and thinkers of world history. Briefly touches upon the American experience as a recent segment in world military and cultural history.

HIS 352 Rise and Fall of Communism 3 Credits
Considers the historical development of communist ideas from ancient times to the present, with emphasis on the comparison of movements including Utopian Socialism, Marxism, Stalinism, Maoism, and Anarchism. Specifically, the course explores the communist experiments of the 20th century as both utopian theory and institutional practice. This course counts towards the fulfillment of the Global Perspectives element of the CAS general education curriculum.

HIS 353 Oral History 3 Credits
A study of the theory and practice of oral history. Involves an examination of the methodology and functions of oral history, the nature and character of oral evidence, and the place of oral testimony within the historical discipline.

HIS 398 Special Topics in History 3 Credits
Advanced exploration of special topics, themes or methodologies in history. This course may be repeated for credit on different topics.

HIS 460 Research Seminar 3 Credits
Students produce a major research paper in this topical capstone seminar. Topics and themes vary by instructor. The seminar has a maximum enrollment of 16 students, so professors and students have an opportunity to work together closely over the course of a semester. **Prerequisite**(s): HIS 260, and permission of instructor.

HIS 490 Independent Study: Research and Creative Expression 1-4 Credits
Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Proposals must be approved by the Dean's Office no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours.
Prerequisite: Permission of instructor. When taken to substitute for HIS 460, HIS 260 and permission of instructor.

HIS 491 Internship in History 1-4 Credits
Internships to be offered each semester with such institutions as the New Jersey State Archives and the David Library of the American Revolution. Four credits may be taken for Category III History credit. Additional credits may be taken for Liberal Arts elective credit.
Prerequisite: Permission of internship coordinator.

Homeland Security Policy

Program Overview

Events of the past 30 years — including the first World Trade Center bombing in 1993, the terrorist attacks of September 11, 2001, and the Boston Marathon bombing in 2013 — have heightened America's awareness of terrorism and made homeland security a national focus. It is a subject, though, that has long been of concern to other countries around the world. Open to all majors, the minor offers students the opportunity to study a wide range of homeland security themes and challenges, including terrorism/counterterrorism, intelligence/counterintelligence, cybersecurity, disaster management, risk assessment, national security policy, foreign policy, war and migration/border control. Students will also learn how to critically evaluate practice and policy in these areas from the perspectives of civil liberties, human rights, and ethics. Students will grapple with vexing trade-offs in the field, between security and privacy; risk and cost; power and accountability; and more. They will consider how to balance competing interests and agendas and different perceptions of risk and danger. They will also assess how federal, state and local governments do or do not keep citizens safe, while also examining the role of the U.S. government and military on the international stage, today and in historical context. Homeland security is a rapidly growing field with a high demand for skilled professionals in both government and private industry. This minor is a valuable option for students considering careers in security, intelligence, policy, disaster management, and more.

Degree Offered

- Minor in Homeland Security Policy

Courses and Descriptions

HLS 202 The Political System - Theories/Theme 3 Credits
This course serves as a gateway to the subfields of comparative politics and international relations. The concept of the political system helps political scientists to organize political interrelations into patterns that allow systematic selection and interpretation of information and the study of processes and outcomes of politics in a variety of settings. The course introduces students to the main brands of normative theory prescribing the principles directing the operation of the political system, to some of the most important methods used to compare political systems and/or their components, and to the foremost approaches utilized in the study of the relations between political systems and their environments. Note: This course is cross-listed as POL 202. Students may not get credit for both HLS 202 and POL 202.

HLS 203 Homeland Security 3 Credits
The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective. Note: This course is cross-listed as POL 203. Students may not get credit for both HLS 203 and POL 203.

HLS 204 Development and Structure of the US Intelligence Community 3 Credits
This course provides a historical review of intelligence following World War II. It will examine the major functions of intelligence, as well as intelligence as a part of the foreign policy process: collection, analysis, counterintelligence, and convert action. Students will be introduced to a range of collection procedures: human, open source, electronic, photographic, and signal, with emphasis placed on interpreting and writing intelligence summaries. Note: This course is cross-listed as POL 204. Students may not get credit for both POL 204 and HLS 204.

HLS 205 Spies, Double Agents, and Moles: The World of Counterintelligence 3 Credits
This course provides in-depth exposure to historical, open-source investigations and concepts that illustrate the defensive, offensive, investigative, and collection efforts of counterintelligence (CI) activities. This course looks through the ideological and political prisms of how and why the Western and Eastern blocs fought the Cold War with agents, double agents, sleepers, and moles, and how MICE (money, ideology, compromise, and ego) and RASCALS (reciprocation, authority, scarcity, commitment, liking, and social proof) caused thousands to betray their countries and become the 'enemy within'. Counterintelligence (CI) is a critical element of US national security policy and interests both in the United States and abroad, and the course will focus on activities that comprise counterintelligence functional activities, including the detection of espionage and elicitation; counterintelligence interviews/debriefings; and the collection of counterintelligence information.
Prerequisite(s): POL 100 or POL 102.

HLS 220 Terrorism & Counter Terrorism 3 Credits
This course introduces students to the arguments about the definition of terrorism, the historical use of terrorism and the roles of ideology, religion, and psychological factors that help explain and predict it. The course seeks to identify the components of national security policy aimed at countering such elements and their cost, both in financial and civil right terms. Finally, to illuminate both the definition and the policies discussed, the course will offer brief comparisons with other states, especially Israel, the UK, and Russia. Note: This course is cross-listed as POL 220. Students may not get credit for both HLS 220 and POL 220.

HLS 270 Networking/Telecommunications 3 Credits
This course provides an introduction to business data communications and networking. The Internet and OSI models are discussed. Network technologies include local area networks, backbone, wide area networks, and the Internet. Introduction to network design, security, and network management are also provided.
Prerequisite(s): CIS 185.

HLS 295 Special Topics in Homeland Security 3 Credits
Specific topics will vary by semester and instructor, exploring current and emerging areas of importance in the interdisciplinary field of Homeland Security.

HLS 300 U.S. Constitutional Law 3 Credits
The role of the Supreme Court in the American political system is assessed. Topics include the staffing and functioning of the Supreme Court and the federal judicial bureaucracy, the origins and development of judicial review, and the role of the Supreme Court in national policy-making. Note: This course is cross-listed as POL 300. Students may not get credit for both HLS 300 and POL 300.

HLS 301 Civil Liberties in the US 3 Credits
The American doctrine of civil liberties in theory and practice. Emphasis on analyzing the freedoms of speech, press, assembly, and religion, the right of privacy, and the problem of discrimination in the context of contemporary issues and problems. Particular attention to the role of the Supreme Court in this area. Note: This course is cross-listed as POL 301. Students may not get credit for both HLS 301 and POL 301.

HLS 304 Political Behavior: Fear, Risk and Crisis 3 Credits
The course focuses on various analytical approaches in behavioral political science. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior-e.g., voting/non-voting, the formation of political partisanship and ideology, issue perceptions, responding to risk and uncertainty in the political environment, and engaging in civic political participation. Note: This course is cross-listed as POL 304. Students may not get credit for both HLS 304 and POL 304.

HLS 311 Borders and the State 3 Credits
Borders have a prominent place in politics and human history. In the twentieth century, the best-known barriers were the militarized Maginot Line and the Iron Curtain. Today, the political popularity of borders persists but the nature and quality of these borders and the threats they were created to repel have changed. Modern borders are designed not to keep militaries out, but to deter a perceived invasion of "undesirables"—with terrorists and unwanted immigrants leading the list of state concerns. Nowhere is this more evident than along the geographic fault lines dividing rich and poor regions, e.g. the Mediterranean Sea and the U.S.-Mexican border region. This course will examine the dynamic interactions between the question of how to govern borders and the twenty-first century liberal state with its diluted sovereignty— due to immigration, trade and international laws and regimes.

HLS 314 Congressional Power and National Security Policy 3 Credits
The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. Particular attention is paid to the role of the US government being able to balance individual rights and liberties within the national security state. Last, the course also takes an in-depth analysis of the U.S. Congress, looking comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror? Note: This course is cross-listed as POL 314. Students may not get credit for both HLS 314 and POL 314.

HLS 316 Presidential Power and National Security Policy 3 Credits
This course examines the development of the National Security State since the Second World War, and the ways in which it has affected, and been affected by, the Federal Executive. Topics to be covered will include the post-World War II redefinition of "national security", the Cold War (with a special focus upon war powers during Korea and Vietnam) and the changes that have occurred with the "War on Terror." Note: This course is cross-listed as POL 316. Students may not get credit for both POL 316 and HLS 316.

HLS 319 Terrorism, Revolutions and Political Violence 3 Credits
Revolutions are the mad inspiration of history. Trotsky's characterization calls attention to three important dimensions of violent political participation: the historical settings, ideology, and emotional fervor of the practitioners. The course focuses on these dimensions by analyzing revolutionary and terrorist movements in the 20th century. Special attention is given to the use of violence in the post-Cold War new world disorder. Note: this course is cross-listed as POL 319. Students may only get credit for one course: HLS 319 or POL 319.

HLS 320 Defense Policy and Analysis 3 Credits
The United States has been a world superpower for over 75 years, in a bipolar world alongside the Soviet Union after the end of World War II, as the sole superpower in a unipolar world after the collapse of communism in the 1990s, and today in a world that increasingly looks like it will become multipolar. America must contend with numerous risks to its national security: ongoing wars overseas, terrorist threats, rogue nations, a rising China, and the effects of climate change. Can the United States, through its military, retain primacy? How? In this class we will explore these challenges facing the country and consider possible solutions. The course begins with an overview of U.S. grand strategy and the structure and implementation of defense policy. Throughout the course, students will become familiar with issues, cases, data, institutions, actors, trends, and options in the strategic implementation of defense policy. The primary focus of the course is on the Department of Defense (DoD) as well as key actors in the White House, committees in Congress, State Department, Central Intelligence Agency (CIA), and North Atlantic Treaty Organization (NATO).

HLS 322 Countering Domestic Extremism in the United States 3 Credits
Domestic extremism is an issue the United States government has had to contend with since its inception, from Shay's and the Whiskey Rebellions in the 18th century, to the Ku Klux Klan throughout the 19th & 20th centuries, to the threat of domestic terrorism today. Broadly defined, extremism has profound and specific impacts on our government and everyday life. Given the limited, enumerated powers the U.S. Constitution grants the national government, cooperation between local, state, and federal agencies is essential to counter domestic threats arising from extremists across the political spectrum. This course will examine threats to U.S. domestic security both before and after the September 11th attacks with a focus on critiquing the ability of our federal system of government to prevent and respond to the evolving threats posed by individuals and groups within the United States.

HLS 325 Public Administration 3 Credits
Public administration in modern society, emphasizing the administrative formulation of public policy and its implementation. Attention on who gets what, when, and how from the decisions of administrative units; the role administrators have in policy-making compared to elected legislators, chief executives and judges; the effect administrators have on the benefits citizens receive from government; and the effect administrators have on citizens' behavior. Note: This course is cross-listed as POL 325. Students may not get credit for both HLS 325 and POL 325.

HLS 331 Critical Infrastructure 3 Credits
Overall the course draws on the fundamentals of risk management strategies and policies related to manmade and natural threats to critical infrastructure. The course provides students with tools and critical thinking skills in order to identify and analyze challenges and opportunities to the nation's infrastructure. The emphasis of this course is on "hands-on" experience whereby students will "learn by doing" analysis.

HLS 332 Disaster Management and Incident Response 3 Credits
This course provides an overview of various types of natural and manmade disasters that communities are vulnerable to, and how to develop corresponding preparedness, response, recovery, and mitigation strategies. Upon completing this course, students will be able to assess and develop preparedness plans for: disaster response, monitoring and evaluation plans for disaster response; early warning systems plans for risk reductions; and, response, recovery, and mitigation strategies. Students will also learn about existing and developing domestic and international Disaster Risk Reduction models. This includes, but is not limited to strategies that prevent and minimize casualties during disasters, and logistic and operational challenges. Special consideration will also be given to the impact of the social and political processes associated with disaster policy and planning.

HLS 334 Cyber Strategy 3 Credits
The course examines issues and challenges related to national security concerns and cybersecurity. The course provides students with tools and critical thinking skills in order to identify and analyze challenges and opportunities to the nation's cyber infrastructure. The emphasis of this course is on "hands-on" experience whereby students will "learn by doing" analysis.
Prerequisite(s): Completion or transfer of HLS 203 or HLS 204 or POL 100 or POL 102 or permission of instructor.

HLS 341 Cybersecurity Policy: Hacktivism and Cyberviolence 3 Credits
Hactivism is a process designed to be "the creative use of computer technology for the purposes of facilitating online protests, performing civil disobedience in cyberspace.
Prerequisite(s): Completion or transfer of HLS 203 or HLS 204 or POL 100 or POL 102 or permission of instructor.

HLS 346 The Politics and Ethics of Emergencies 3 Credits
This course explores historic and present day cases, ranging across Europe and the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, take on emergency powers to become so-called "states of exception." While in some cases such states have imposed mild and limited emergency measures, others have employed more draconian measures, suspending, if not dissolving, constitutionally guaranteed civil liberties, often for indeterminate and protracted periods. How various states have behaved in emergency situations will be the major content of this course. Note: This course is cross-listed as POL 346. Students may not get credit for both HLS 346 and POL 346.

HLS 350 U.S. Foreign Policy and Security Policy 3 Credits
Principles, institutions, and processes involved in the formulation and implementation of policies regarding the nation's military, economic, and environmental security within the global framework. Strands, trends, and problem areas in U.S. foreign policy, with focus on the changing global environment of the post-Cold War world. Note: This course is cross-listed as POL 350. Students may get credit only once.

HLS 351 Critical Views of Global Security 3 Credits
This course will examine the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspective on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (enviroment, population movements, terrorism), and concepts of security ranging from state survial, to societal security, to unit level-variables such as Human Security. Note: This course is cross-listed as HLS 351. Students may not get credit for both HLS 351 and POL 351.

HLS 353 Cyber War 3 Credits
Cyber-attacks are a growing concern for the international community. When does a cyber-attack constitute an act of war, or is it merely an inconvenience? Is cyber power military power? How prevalent are such attacks, and to what extent can cyber-attacks lead to conventional conflicts? Will cyber-attacks by non-state actors render more power to such players in destabilizing states? This course explores the different types of issues experienced in cyber wars, including mechanisms through which targeting of communication technology could escalate tensions and lead to an armed conflict, and ways through which states and international organizations could limit the destructive potential of cyber technology.

HLS 361 Courts, Judges and Politics 3 Credits
In-depth examination of the nature of judicial decision-making and the impact that judicial decisions have on society. Considers the sources of judicial authority, judicial fact-finding, statutory and constitutional interpretation, individual and collective processes of judicial decision-making, relations between judges and other government officials, and the political consequences of judicial decisions with particular emphasis on federal courts and judges. Note: This course is cross-listed as POL 361. Students may not get credit for both POL 361 and HLS 361.

HLS 363 Human Rights in Global Context 3 Credits
Examines human rights – droits de l'homme, derechos humanos, Menschenrechte, "the rights of man" – are, literally, the rights that one has because one is human. What does it mean to have a right? How are being human and having rights related? This course provides an introduction to theory and global practice of human rights. Human rights claims play an increasingly central role in political and social struggles across the world. The adoption of the Universal Declaration of Human Rights in 1948 signaled a proliferation of international human rights law and transnational non-governmental activism. While the promotion of human rights has become global, adherence to those standards remains highly uneven and gross violations and atrocities continue to occur. Given the breath and complexity of the human rights movement, including its engagement with law, politics and morals, in radically different cultures, this course is by its very nature multidisciplinary. Note: This course is cross-listed as POL 363. Students may not get credit for both HLS 363 and POL 363.

HLS 420 Enterprise Security 3 Credits
Students will be provided with complete coverage of computer security in all forms including hardware, network, and software program security. Through hands-on labs, students will learn firsthand how enterprise systems can be compromised and how computer professionals can prevent and provide counterattacks for security intrusions.
Prerequisite(s): CSC 260 with a minimum grade of D.

HLS 491 Internship in NJ Homeland Security 1-4 Credits
Students work under supervision in a public agency, political party, or public interest group. A minimum of 52 hours of field work per credit required, with regular reports and a concluding critique analyzing and evaluating the experience. Primarily for seniors and qualified juniors. No more than six credits allowed toward graduation.
Prerequisite(s): permission of instructor.

Human Resource Management

Program Overview

Human Resource Management (HRM) professionals perform many vital business activities in organizations. As both private and public sector organizations have become more concerned about such issues as corporate culture, talent development and retention, and employee engagement, the demand for well-trained HRM professionals has increased greatly -- providing our HRM majors with fulfilling career opportunities.

Practitioners in HRM are involved in a variety of important, interesting, and challenging activities. They establish and implement policies that affect such organizational functions as recruitment, selection, training and development, performance management, compensation, and benefits.

Our program has been ranked among the top 20 Human Resource Management programs in the U.S., and placed as the #3 undergraduate HRM program in New Jersey by College Factual. This connection to the profession, coupled with Rider's engaged learning program, makes Rider a great place to study Human Resource Management.

Curriculum Overview

Courses in the program include Introduction to Human Resource Management, Labor Relations, Employee Selection and Training, Employee Compensation Systems, Employee Engagement, Managing Workforce Diversity, International Management, Team Management, Management Skills, and more.

Degree Offered

- B.S.B.A. in Human Resource Management

Human Resource Management Major Requirements

(21 credits)

Code	Title	Credits
Business Core		
See Business Core Requirements (p. 564)		
MGT 310	Intro to Human Resource Mgmt	3
HRM 315	Employee Selection & Training	3
HRM 316	Employee Compensation Systems	3
MGT 375	International Management	3
Select three of the following, with at least one being an HRM course:		9
HRM 312	Intro to Labor Relations	
HRM 333	Employee Engagement	
HRM 441	Sel. Topics: Human Res Mgt	
MGT 320	Managing Workforce Diversity	
MGT 346	Negotiation	
MGT 355	Team Management [1]	
MGT 363	Management Skills [1]	
MGT 410	Ethical Management	
HRM 490	Independent Research and Study	
Total Credits		**21**

[1] Human Resource Management majors have the option of completing MGT 355 Team Management or MGT 363 Management Skills for their major requirements as well as for their Leadership Elective requirement. If a student chooses to count MGT 355 or MGT 363 toward both the major requirements and the Leadership Elective, the student must complete 3 credits of free elective for graduation.

An average of "C" or better is required in the 21 semester credit hours required of the human resource management major. Majors are encouraged to take HRM 491 Internship in Human Res Mgt or HRM 492 Internship in Human Res Mgt as a free elective.

4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester

[1] Students are required to complete 6 credits of International Business Electives which can be fulfilled as major courses (MGT 375 International Management) or as free elective courses.

[2] For the Leadership Elective, choose from LDP 200, LDP 398, MGT 355, or MGT 363. If a Human Resource Management major takes MGT 355 or MGT 363 as their Leadership Elective, they can also count it as a Major Course Elective, and they must take an additional 3-credit Free Elective.

Notes:

- This accelerated plan assumes no AP or other credits were transferred into Rider University.
- Business Honors students will have a different sequence.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448, ECO 450.)

Courses and Descriptions

HRM 312 Intro to Labor Relations 3 Credits
This course deals with the relationship of labor unions and management, the fundamentals of collective bargaining, and labor legislation. The structure and growth of unions as well as the relationships and problems that exist among private and public sector organizations, the labor force, and government are surveyed.
Prerequisite(s): MGT 310 or permission of instructor.

HRM 313 Legal Aspects of Human Res Mgt 3 Credits
This course deals with the various laws that affect human resource management, including social insurance, legislation, minimum wage laws, OSHA , ERISA, as well as equal employment opportunity legislation. This course is concerned not only with the provisions of these laws, but also with their constitutionality, their effects, and how they are administered.
Prerequisite(s): MGT 310 or permission of instructor.

HRM 315 Employee Selection & Training 3 Credits
This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.
Prerequisite(s): MGT 310.

HRM 316 Employee Compensation Systems 3 Credits
The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.
Prerequisite(s): MGT 310.

HRM 333 Employee Engagement 3 Credits
Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.
Prerequisite(s): MGT 310.

HRM 441 Sel. Topics: Human Res Mgt 3 Credits
Deals with one area of study in the field of human resource management such as protective labor legislation, mediation and arbitration, the administration of labor unions, or case problems in human resource management. The topic varies each semester and is announced at the time of registration.
Prerequisite(s): MGT 310 or permission of instructor.

HRM 490 Independent Research and Study 1-4 Credits
Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or HRM major elective.
Prerequisite(s): MGT 310 or permission of instructor.

HRM 491 Internship 1-4 Credits
Provides the student with the opportunity to supplement and apply human resource management coursework in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing work experiences. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.
Prerequisite(s): Junior or Senior; Major in human resource management and MGT 310; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

HRM 492 Internship in Human Res Mgt 3 Credits
Provides the student with the opportunity to supplement and apply their human resource management classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions. 2.75 GPA overall and 3.0 GPA in the major is required.
Prerequisite(s): major in human resource management or management and leadership, and MGT 310; senior status; and permission of instructor.

Information Systems

Program Overview

Students with a major in information systems develop a solid understanding of the use, design, development, and management of information systems and information technology. Rider's information systems courses are designed to give students the opportunity to develop and manage a variety of projects that can be applied to real business settings immediately.

Increasingly, organizations that seek individuals with an information systems specialization expect excellent organizational, communication, interpersonal and analytical skills. All information systems students are encouraged to participate in a full semester co-op or summer internship experiences during their junior year.

Student Learning Outcomes

An Information Systems graduate will demonstrate the ability to:

- Design and develop user-friendly applications, employing best practices in programming, including effective syntax, logical structure, and adherence to industry standards.
- Utilize and administer computer networking and telecommunication technologies, demonstrating proficiency in configuring, managing, and troubleshooting network infrastructure.
- Employ relational databases to effectively organize, query, and manage business data, considering data integrity, normalization, and security requirements.
- Analyze and evaluate emerging trends and issues in Information Systems, assessing their impact on businesses and society, and identifying opportunities for innovation.
- Apply ethical reasoning and ethical frameworks to guide the design, implementation, and use of Information Systems, considering privacy, security, and social implications.

Curriculum Overview

The required freshman-level information systems core course trains students to apply practical knowledge in their use of computer-based productivity tools. Core courses also allow students to develop an understanding of enterprise integration applications such as SAP R/3. The courses also explain the value of electronically integrating the major functional areas of an organization in order to facilitate more effective management decision-making.

Students gain an understanding of the enabling information technologies (IT) that organizations use to develop and sustain a strategic and competitive position in the marketplace. Students also learn about the benefits and drawbacks of adopting and using these information technologies.

Students with a major or a minor in information systems will be able to demonstrate their understanding of information technology by applying their technical knowledge and skills to provide a practical solution to a business problem, business need or business opportunity.

Students who satisfactorily complete a minimum of three courses with at least one-third SAP hands-on content in each course have the opportunity to earn the **SAP Student Recognition Award Certificate**. Click here (p. 488) to learn more about this certificate program.

Required Courses		**9**
Select three of the following six courses:		
CIS 200	Application Development with JavaScript	
CIS 240	Cloud Computing Infrastructure	
CIS 325	User Experience Design	
CIS 330	Database Systems	
CIS 345	Enterprise Security	
CIS 395	Ethical & Global Impacts of IT	
Electives		**6**
Select any two CIS courses from the list below or two additional courses from the list of IS minor required courses above to fulfill the remaining requirements:		
BDA 205	Introduction to Visual Data Analytics	
CIS 315	Integrated Business with SAP	
CIS 350	Practical Business Analytics with Excel and R	
CIS 360	Data Mining	
CIS 370	Systems Analysis and Design Project	
CIS 375	Business Process Design for a Global Economy	
CIS 377	Risk Management and Compliance for Information Security	
CIS 388	Design Thinking	
CIS 390	Project Management	
CIS 399	Information Systems Co-op Experience	
CIS 401	Artificial Intelligence for Business	
CIS 410	Selected Topics in Information Systems	
CIS 430	Enterprise Integration [1]	
CIS 491	Information Systems Internship	
Total Credits		**18**

[1] Permission of instructor required

Notes:

- The maximum number of credits students may use to count towards another minor (e.g., Business Analytics minor), is six (i.e., two courses including CIS 185).

4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
CBA 110	Business in Action [1]	3
CIS 185	Information Systems Essentials [1]	3
CMP 120	Seminar in Writing and Rhetoric	3
MSD 105	Quantitative Methods for Business [2]	3
Liberal Arts Elective 1 [3]		3
	Semester Credit Hours	**15**
Spring Semester		
CIS 200	Application Development with JavaScript	3
CMP 125	Seminar in Writing and Research	3
ECO 200	Principles of Macroeconomics	3
MKT 200	Marketing Principles	3
MSD 205	Business Statistics	3
	Semester Credit Hours	**15**
Year 2		
Fall Semester		
ACC 210	Introduction to Accounting	3
BDA 201	Introduction to Business Analytics	3
COM 290	Professional/Strategic Speech	3
ECO 201	Principles of Microeconomics	3
MGT 201	Fund Management & Org Behavior	3
	Semester Credit Hours	**15**

Spring Semester		
ACC 220	Managerial Uses of Accounting	3
CBA 212	Business Communications	3
CBA 236	Career Planning	3
CIS 240	Cloud Computing Infrastructure	3
FIN 220	Introduction to Finance	3
	Semester Credit Hours	**15**
Year 3		
Fall Semester		
BUS 300	The Legal and Ethical Environment of Business	3
CIS 325	User Experience Design	3
CIS 330	Database Systems	3
CIS 385 or GSC 385	Management Information Systems or Management Information Systems for Global Supply Chain Management	3
Leadership Elective		3
	Semester Credit Hours	**15**
Spring Semester		
MSD 301	Operations Management	3
CIS 345	Enterprise Security	3
CIS Major Elective		3
Free Elective (International Business) [4]		3
Liberal Arts Elective 2		3
	Semester Credit Hours	**15**
Year 4		
Fall Semester		
CIS Major Elective		3
Free Elective		3
Free Elective		3
Free Elective		3
Liberal Arts Elective 3		3
	Semester Credit Hours	**15**
Spring Semester		
BUS 400	Strategic Management and Policy	3
CIS 395	Ethical & Global Impacts of IT	3
Free Elective (International Business) [4]		3
Free Elective		3
Liberal Arts Elective 4 [3]		3
	Semester Credit Hours	**15**
	Total Credit Hours for Graduation	**120**

1. CIS 185 and CBA 110 can be taken in the Fall or Spring of year 1.
2. Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.
3. Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.
4. Students are required to complete 6 credits of International Business Electives which can be fulfilled as major courses or as free electives.

3 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

CIS 395	Ethical & Global Impacts of IT	3
Free Elective (International business)		3
Free Elective		3
Liberal Arts Elective 4		3
	Semester Credit Hours	**15**
	Total Credit Hours for Graduation	**120**

Notes:

- The above plan assumes no AP or other credits were transferred into Rider University.
- Students are required to take 6 credits of International Business Electives which can be fulfilled as major courses or as free elective courses.
- Business Honors students will have a different sequence.
- Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.
- Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.
- For the Leadership Elective, choose from CBA 320 Case Analysis & Presentation, LDP 398 Co-op Experience Seminar, LDP 200 Foundations of Leadership, LDP 220 Service Learning Through MOB, MGT 355 Team Management, or MGT 363 Management Skills.
- Students are strongly encouraged to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448 Seminar in Small Business Consulting, ECO 450 Seminar in Economic Research).

Courses and Descriptions

CIS 185 Information Systems Essentials 3 Credits
This course provides students with a conceptual understanding and hands-on practice with spreadsheets. At the completion of this course students will be able to apply the appropriate information systems technology tools within spreadsheets to a variety of quantitative data-centric analytic activities. This course assumes you have a basic knowledge of Microsoft Windows, Word, Excel, and Web browsers.

CIS 200 Application Development with JavaScript 3 Credits
In the early 1990s, Tim Berners-Lee created a set of technologies to allow information sharing at the CERN particle accelerator in Europe. These technologies dramatically changed the face of computing and became what we know today as the Web. Understanding how to develop and manage applications for the Web is a requirement for the information system professional. Because of the ease of development, deployment, maintenance and general scalability of Web applications, this approach to building and managing applications has become the de facto standard for business application development. This class will examine Web application development in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications, how to develop Web pages using HTML and CCS, how to control user interaction with those pages using the JavaScript programming language. The programming basics of variable declaration and usage, program flow of control, function declaration and calling, and object usage and declaration will also be shown. The use of the JQuery Javascript library to ease the development of Web pages will also be shown.

CIS 220 Application Development with JavaScript and Python 3 Credits
In the early 1990s, a set of network technologies was combined to create a platform for application development. These technologies are now referred to as the Web. Because of the ease of development, deployment, maintenance, and scalability of Web applications, this approach to building and managing applications has become the de facto standard for business application development. Understanding how to develop and manage applications for the Web is vital for information systems professionals. This class will examine Web application development in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications, how to develop Web pages using the Hypertext Markup Language (HTML) and Cascading Style Sheets (CSS), and managing user interaction in those pages using the JavaScript programming language. The process of creating dynamic web pages using the PHP programming language on the Web server will also be taught.
Prerequisite(s): CIS 200.

CIS 240 Cloud Computing Infrastructure 3 Credits
Cloud computing represents a form of utilizing hardware resources in a way which allows a business to be more responsive to a changing environment. Computer networks are a critical component of cloud computing. This class will cover the components of a computer network, the process of configuring networks, and the creation and provisioning a cloud computing environment. Students will also learn the process of computer operating system installation, configuration and maintenance. Virtualization, the process of creating multiple operating system environments on a single piece of hardware will also be covered using both the WIndows and Linux operating systems.
Prerequisite(s): CIS 185.

CIS 255 Intro to Game Design & Development 3 Credits
The basic concepts, logic, techniques, tools, and vocabulary associated with interactive, digital game and simulation development will be explored through a combination of lectures, discussions, and hands-on learning. Knowledge and skills derived can be applied to a wide variety of business and other organizational settings globally for interactive simulations, games, and education.

CIS 260 Business Graphics 3 Credits
Basic color theory, t ypography, and page/slide layout are presented. Students utilize presentation, word processing and photo editing applications to create and edit various documents through hands-on labs and projects.
Prerequisite(s): CIS 185 or permission of instructor.

CIS 270 Computer Networking 3 Credits
This course provides an introduction to business data communications and networking. The Internet and OSI models are discussed. Network technologies include local area networks, backbone, wide area networks, and the Internet. Introduction to network design, security, and network management are also provided.
Prerequisite(s): CIS 185.

CIS 300 Programming with Java 3 Credits
Students will learn the basic concepts of object-oriented programming as contrasted with traditionally structured programming and will develop applications using the Java programming language.
Prerequisite(s): CIS 200.

CIS 309 Data Structures & Cmptr Archit 3 Credits
An introduction to linked lists, stacks, queues, trees, pointers, and sorting and searching algorithms. Students will learn the technical details of data storage and manipulation along with the concepts of program execution, and will use tools such as hex-editors and debuggers.
Prerequisite(s): CIS 185 or permission of instructor.

CIS 315 Integrated Business with SAP 3 Credits
This course provides an introduction to enterprise resource planning (ERP) systems and addresses how integrated information systems improve business operations. Students will learn about functional business areas and business processes, and understand the problems inherent in un-integrated enterprise information systems. Using SAP software and case studies, students will learn how ERP systems are being used to facilitate integrated, real-time management decision making.
Prerequisite(s): CIS 185 and ACC 210.

CIS 319 Computer Forensics 3 Credits
Students will use computers to obtain and analyze evidence found on storage devices such as those confiscated under warrant, and learn how to trace digital activities. Criminal and investigative procedures will be explored in depth.
Prerequisite(s): CIS 185.

CIS 320 Cloud Computing Administration 3 Credits
Students will learn the process of creating or provisioning a cloud computing environment. Content will include the provisioning of operating system resources in a cloud environment, operating system installation, configuration and maintenance. Virtualization, the process of creating multiple operating system environments on a single piece of hardware will be covered in some detail. Troubleshooting problems in the virtualization environment and in the operating system environment will also be covered. Hands-on labs will be used throughout. Both Windows and Linux operating systems will be used.
Prerequisites: CIS 185.

CIS 325 User Experience Design 3 Credits
This course focuses on the critical role user experience plays in today's technology-driven business world. While technology advances make the design of functionality more readily in interactive products, usability plays a critical role in determining their success in the real world. Increasingly, business leaders realize the need to consider the emotional and social experiences as well as functional requirements and the steps users take to complete a task. This course explores User Experience Design (UXD), and its strategic importance in creating competitive advantage. Students will be able to discover, define, develop, and deliver a complete user experience. They will understand the role of usability and design principles, build innovative and pleasurable user experience prototypes, and validate them to achieve human, social, and business goals.

CIS 330 Database Systems 3 Credits
This course involves the study of computer databases. Major topics include relational databases, use of the structured query language (SQL) to query relational databases, and design and maintenance of relational databases.
Prerequisite(s): CIS 185.

CIS 340 Electronic Commerce 3 Credits
Students will learn about the most current e-commerce technologies and business models through readings, case studies, and hands-on projects. Students will gain experience using business data analytics tools to understand and evaluate the value of data that is generated and collected from various e-commerce platforms on the Internet.

CIS 345 Enterprise Security 3 Credits
This course introduces students to cybersecurity, the process of securing computers and the information they store. Coverage includes security attacks and attack prevention and mediation, security firewalls, PC and server security, authentication methods and procedures, and network security. Through lecture and hands-on labs students will learn how computer systems can be attacked and how computer professionals can manage the risks and potential damage from these attacks.

CIS 350 Practical Business Analytics with Excel and R 3 Credits
This is a required course for the Business Analytics major/minor. This course will provide the student with an opportunity to gain proficiency in analyzing and visualizing data using both Excel and R. The learning experience includes not only classic data tools, such as PivotTables, VLOOKUP, and data visualization, but also more advanced data tools such as descriptive statistics, inferential statistics, predictive analytics using R, and optimization using Excel Solver.
Prerequisite(s): BDA 201.

CIS 360 Data Mining 3 Credits
This course deals with modern technologies for data analysis. Hands-on exercises for data retrieval, data visualization and predictive analytics will be carried out using up-to-date methodologies and software tools. The full data mining life cycle will be covered from recognizing business problems and opportunities amenable to data mining analysis through deploying and monitoring solutions.
Prerequisite(s): CIS 185 with a minimum grade of D .

CIS 370 Systems Analysis and Design Project 3 Credits
Topics include modeling techniques and methodologies to address the planning, analysis, design, and implementation of high quality systems, delivered on time and within budget. Using rapid application development tools, students will also construct an operational system within the span of a single semester. Issues and tools related to the management of project teams are also discussed.
Prerequisite(s): CIS 330.

CIS 375 Business Process Design for a Global Economy 3 Credits
The course is aimed at generating a comprehensive understanding of the emergent domain of global business process outsourcing. Variously referred to as knowledge process outsourcing, IT-enabled services outsourcing, and business services outsourcing, the industry has seen enormous growth over the last decade and continues to grow. India commands the single largest share of this market but South Africa, Eastern Europe, Philippines, Morocco and Egypt have all emerged as other contenders in this global sector. The course is divided into four modules: the political economy of global outsourcing, process modeling, outsourcing management, and industry analysis. Please note: Students will not receive credit for both CIS 375 and GSC 375.
Prerequisite(s): junior standing.

CIS 377 Risk Management and Compliance for Information Security 3 Credits
This course will use a holistic approach to examine the management of information security risk in relation to the strategic goals of the business organization. Students taking this course will learn to identify threats, threat agents, potential exploits and the information assets which will be impacted by those exploits. The risk management process will specifically examine threat agents, and the amplifiers, catalysts, and inhibitors to those threats. Using a process which assigns a weight to various threats, and a comprehensive risk analysis model will be developed.

CIS 385 Management Information Systems 3 Credits
This course will enhance students' digital dexterity and familiarity with existing and emerging information technologies, emphasizing skills of abstraction in relation to digital strategy and organizational change, innovation, analytics, and ethics. This course will also provide hands-on experience with at least one essential business technology. At the completion of the course, students will have an understanding of the business-related, policy, societal, and ethical implications associated with modern information systems.
Prerequisite(s): CIS 185 and junior or senior standing.

CIS 388 Design Thinking 3 Credits
This undergraduate course on Design Thinking provides students with a framework for dealing with unstructured problems to create innovative business solutions. Students in this course will learn about the complex and iterative process of design thinking and its several phases, including problem finding, observation, visualization and sense making, ideation, prototyping and testing, and explore the value of design thinking for creating business solutions with lasting impact. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.
Prerequisite(s): JR/SR, 54+ credits, or POI.

CIS 390 Project Management 3 Credits
This course introduces students to general project management, the process of organizing resources to achieve business goals. Topics include the identification, approval, analysis, and general management of complex business projects. Project management tools, reports, techniques, and approaches will be covered.
Prerequisite(s): CIS 185.

CIS 395 Ethical & Global Impacts of IT 3 Credits
This course aims to help students realize the implications stemming from their use of technology as consumers, private citizens, and future employees, as well as those arising from the increasing use of data collection, automation, and artificial intelligence technologies by for-profit and governmental entities. Ethical, economic, social, political, and ecological impacts of technology are discussed.
Prerequisite(s): Junior or Senior standing.

CIS 399 Information Systems Co-op Experience 6 Credits
The co-op program provides students with an opportunity to work full-time in a company and apply what they have learned in their information systems and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Eligible students include junior computer information systems majors with a minimum overall GPA of 3.0. Three of the co-op credits can be applied toward the information systems major, and three credits can be applied toward business or free elective requirements.
Prerequisite(s): 60 credits; three of the following (CIS 200 or CIS 240 or CIS 325 or CIS 330 or CIS 345 or CIS 395), with a minimum GPA of 3.0.

CIS 401 Artificial Intelligence for Business 3 Credits
Artificial Intelligence (AI) is the broadest term used to classify machines that mimic human intelligence. It is used to predict, automate, and optimize tasks that humans have historically done, such as speech and facial recognition, decision-making, and translation (IBM.com). Undoubtedly, AI is one of the most transformative and disruptive technologies of our age, which has already had a direct impact on the value chain. Private investment in AI has significantly increased in recent years, more than doubling from $42.2 billion in 2020 to $93.5 billion in 2021 (AI Index report, 2022). A recent MIT paper predicts AI will cause significant innovations in the next ten years, creating many new jobs. However, there is currently a significant AI talent shortage in the U.S. and worldwide, and the AI skills gap is expected to widen in the future. Therefore, pursuing an AI/machine learning job is a solid choice specifically for recent university graduates to secure a high-paying position that will be in demand for decades. This course was designed for students within various disciplines, such as Information Systems, Business Analytics, Marketing, Finance, and Accounting, to learn the basics of Artificial Intelligence (AI) and how AI is applied to business. In addition, students learn how to work with SAS Viya, the SAS platform for AI and Machine Learning. This course could be the students' first yet most important step in preparing for the AI job market.

CIS 410 Selected Topics in Information Systems 3 Credits
Information and communication technologies are evolving rapidly and continually. The Special Topics course facilitates the exploration of a selected topic (or combination of topics) that represents a recent technological advance with important and direct implications in the field of computer information systems. Current research, readings, lectures, discussions and/or hands-on computer experience or other appropriate measures will be employed to stimulate student learning.
Prerequisite(s): to be determined by instructor.

CIS 430 Enterprise Integration 3 Credits
The major focus of this course includes the forces driving enterprise integration as well as the management decisions associated with the design and implementation of enterprise systems. Students will use SAP ERP extensively to configure, build, test, and implement an enterprise system for a real business environment from the ground up.
Prerequisite(s): CIS 315.

CIS 490 Independent Study: Research and Creative Expression 1-4 Credits
Topic to be approved by professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation.
Prerequisite(s): permission of instructor.

CIS 491 Information Systems Internship 3 Credits
This course provides the student with approximately two months of supervised employment with participating companies. Students are given a variety of information technology experiences. They are required to complete a term paper and/or make an oral presentation to the faculty.
Prerequisite(s): Permission of Instructor.

MSD 104 Intro to Quantitative Methods 3 Credits
The aim of this course is to give students the preparation in algebra needed for successful completion of other required courses in management sciences and the functional areas of business administration. Topics covered include linear and quadratic equations and functions, systems of linear equations, exponential functions, logarithms, linear inequalities, radicals, percent change, scientific notation and scientific digits.

MSD 105 Quantitative Methods for Business 3 Credits
The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.
Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

MSD 106 Quantative Methods for Business II 3 Credits
An introduction to calculus. The limit, derivative, optima and integral of a function of one variable, as well as optimization of a function of two variables, are covered. Applications to problems in business and economics are discussed.
Prerequisite: MSD 105 or equivalent.

MSD 110 Math for Actuarial Science I 3 Credits
The first of two courses designed to give the actuarial science student the necessary background in calculus. Topics include a brief review of a function, and introduces limits and continuity, the derivative and its applications, implicit differentiation, differentiating an inverse function, differentials, related rates, curve sketching, optimization problems, L'Hopital's rule, and an introduction to the indefinite integral. Fall.

MSD 111 Math for Actuarial Science II 3 Credits
A continuation of MSD 110. Topics include the definite integral and the fundamental theorem of calculus, change-of-variable theorems, the area between two graphs, integration by parts, improper integrals, infinite series, partial differentiation of a function of two variables and its optimization applications, and the double integral of a function of two variables.

MSD 205 Business Statistics 3 Credits
This course is designed to provide students with fundamental concepts, knowledge and tools from statistics that may be useful in one's attempt to reach intelligent conclusions in real-world settings, particularly in business applications. The focus is on the normal random variable, sampling distributions, framework of estimation and hypothesis testing, as well as the one-way ANOVA and simple regression model.
Prerequisite(s): MSD 105.

MSD 260 Principles of Risk Management 3 Credits
The objective of this course is to provide students with a broad framework for evaluating all types of risk, along with conceptual tools for making risk management decisions rationally. The course focuses on studying the risk assessment and management techniques, methods, and predictive models used in industry to minimize, control, and communicate risks, including conducting various risk management protocols. This course covers the fundamental knowledge for the Associate in Risk Management (ARM) Designation of Institutes.
Prerequisite(s): CIS 185.

MSD 301 Operations Management 3 Credits
This course introduces students to the concepts and techniques necessary to manage firm operations. The course emphasizes enhancing students' ability in problem-solving and decision-making by (1) identifying operations problems, (2) structuring decision-making process, (3) evaluating options that provide resolution of the problems using appropriate and proven techniques. It is well recognized that today's global business competition is among supply chains. Operations management concentrates on the supply side of the corporate strategy of a supply chain, where the bulk of the organization resources are committed. Good management of operations, which may also be called management of supply chain operations, is crucial in achieving an effective supply chain. The emphasis on systematic thinking and analytic decision model discussed the course will also provide students with necessary skills and useful tools in the emerging field of Business Analytics.
Prerequisite(s): MSD 200 or MSD 205 or MTH 341.

MSD 320 Statistics for Risk Modeling I 3 Credits
This is the first course in a two course sequence to prepare actuarial science students for the Society of Actuaries' (SOA) new exam "Statistics for Risk Modeling." This course (SRM I), together with the second course of the sequence SRM II, cover all the topics in the SOA's proposed syllabus for the exam. The course covers two major topics: (i) Generalized Linear Models, and (ii) Regression-based time series models and forecasting.
Prerequisite(s): MSD 205 or MTH 341.

MSD 325 Statistics for Risk Modeling II 3 Credits
This is the second course in the two course sequence to prepare actuarial science students for the Society of Actuaries (SOA) new exam "Statistics for Risk Modeling." This course, together with MSD 320, will cover all the topics in the SOA's proposed syllabus for the exam. This course examines the use of statistical learning methods to adequately model and understand complex datasets in business and economics. The use of the statistics software R to analyze realistic data sets is an important component of the course. Topics include: (i) Basics of Statistical Learning; (ii) Principal Components Analysis; (iii) Decision Trees; and (iv) Cluster Analysis.
Prerequisite(s): MSD 205 or MTH 341 or equivalent course.

MSD 330 Predictive Modeling and Applications 3 Credits
This course covers a broad range of predictive models in the areas of parametric and non-parametric statistical methods. Examples include time series models and data mining. It focuses on building theoretical foundations underlying these methods and their applications to empirical data such as forecasting time series and classifications. Students are expected to acquire advanced predictive modeling skills and be comfortable with using statistics software R after taking this course. This is a required course for Actuarial Science students in preparation for the Society of Actuaries' "Statistics for Risk Modeling" exam, and an elective course for Business Data Analytics major and minor students who are interested in deepening their skills in predictive analytics.
Prerequisite(s): MSD 205 or MTH 341.

MSD 350 Financial Mathematics 3 Credits
A thorough treatment of the theory and applications of compound interest. Topics include the measurement of interest, elementary and general annuities, amortization schedules and sinking funds, and bonds and other securities.
Prerequisite(s): MSD 205 or equivalent. Fall.

MSD 361 Risk Assessment and Analysis 3 Credits
This course teaches students how to evaluate, and successfully treat risk in different organizations with advanced techniques. Students will learn about risk assessment methodologies, and different tools for risk analysis to avoid, retain, transfer, and benefit from risk. By the end of the course, students will have the skills needed to apply risk assessment and analysis methods in real-world situations. This course provides additional knowledge and hands-on experience for the Associate in Risk Management (ARM) Designation of Institutes.
Prerequisite(s): MSD 260.

MSD 490 Independent Research and Study 3 Credits
Topic to be approved by professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

MSD 491 Management Sciences Internship 3 Credits
This Internship course will provide students with supervised employment (approximately two months) with participating companies. Students are given a variety of work experiences. They are required to complete a term paper for the faculty and receive feedback from the supervised employment.
Prerequisite(s): Permission of instructor.

International Business

Program Overview

The international business co-major is designed to enable students in the Norm Brodsky College of Business to expand the breadth and depth of their knowledge by combining international business with another business major.

Concurrent business majors include accounting, business administration, business analytics, entrepreneurial studies, finance, global supply chain management, health care management, human resource management, information systems, management and leadership, marketing, and sport management.

Student Learning Outcomes

An international business graduate will demonstrate the ability to:

- analyze cultural groups to discover how their differences affect their relation to one another;
- analyze cultural differences and rules regarding business practices;
- articulate how their own sense of culture has developed responsiveness to other cultures;
- identify culturally conscious communication practices with other cultures.

Curriculum Overview

Students in the international business co-major take four international business electives from a list including such courses as international advertising, international business law, business of global sport, business process design for a global economy, international trade and investment, comparative economic systems, international entrepreneurship, international finance, international management, and international marketing. Students may also use an independent research and study (CBA 490) with an international business focus to count as an international business elective.

Students also take an experiential elective such as a global business internship, a global business study tour, independent study or a study abroad program.

To further expand students' global perspective, international business co-majors are required to take a global liberal arts elective course. This can count as one of the four liberal arts electives required for the degree.

Degree Offered

- B.S.B.A. in International Business

[1] A semester-long study abroad program may be used to count toward this requirement.

[2] International Business majors can use IND 210 to fulfill the Experiential Elective requirement or the Global Liberal Arts requirement but not both.

Courses and Descriptions

BUS 375 International Business Law 3 Credits
This course considers the impact of international organizations and treaties on global business and examines the various methods of international dispute resolution. Important legal and ethical issues related to conducting business overseas are discussed including the topics of labor and employment rights, environmental law, and intellectual property.
Prerequisite(s): 54 credits.

CIS 375 Business Process Design for a Global Economy 3 Credits
The course is aimed at generating a comprehensive understanding of the emergent domain of global business process outsourcing. Variously referred to as knowledge process outsourcing, IT-enabled services outsourcing, and business services outsourcing, the industry has seen enormous growth over the last decade and continues to grow. India commands the single largest share of this market but South Africa, Eastern Europe, Philippines, Morocco and Egypt have all emerged as other contenders in this global sector. The course is divided into four modules: the political economy of global outsourcing, process modeling, outsourcing management, and industry analysis. Please note: Students will not receive credit for both CIS 375 and GSC 375.
Prerequisite(s): junior standing.

ECO 305 Internatl Trade and Investment 3 Credits
Studies the theory, institutions, and structures underlying the international flow of trade and investment. Topics are: the theory of international trade; balance of payment analysis; the international monetary system; adjustment to balance of payment disequilibrium; regional economic integration; the economic effects of trade restrictions; and trade and foreign investment problems of developing nations.
Prerequisite(s): ECO 200 and ECO 201.

ECO 315 Comparative Economic Systems 3 Credits
Provides a conceptual framework for classifying and comparing economic systems. Presents theory of the capitalist market economy and case studies of the U.S., Japanese, French, and Swedish economies. Examines theory of the centrally planned economy, its transition, and case studies of the Soviet and its successor states, Chinese, and East European economies. Case studies are necessarily limited, concentrating on selected topics, such as transition strategies, industrial policy, etc.
Prerequisite(s): ECO 200 and ECO 201.

ENT 375 International Entrepreneurship 3 Credits
Students will learn how new or small ventures enter international markets. Requirements include developing a case about starting or running a venture in a single country of the student's choice.
Prerequisite(s): MGT 201 and junior standing.

FIN 308 International Finance 3 Credits
Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.
Prerequisite(s): FIN 220.

GSC 115 Introduction to Global Supply Chain Mgt. 3 Credits
This course introduces students to components of global supply chains and issues of managing the global supply chain. It is designed as a survey course to give first or second year business students a general view of supply chain management at both domestic and international levels, as well as familiarize them with basic concepts and major challenges of supply chain management. Delivery of course material will include lectures and guest speakers from industry, and in-class logistics mini cases.

MGT 375 International Management 3 Credits
This course explores the ways in which culture impacts management practices and organizational behavior and dynamics. Topics include cross cultural communication, expatriate selection and training, leading and motivating cross cultural teams, developing organizational strategies to compete in a global market place, international business ethics, and current topics.
Prerequisite(s): MGT 201.

MKT 330 International Marketing 3 Credits
This course examines the global marketplace and the complexities of its environmental influences, and necessary adaptations in formulating the strategies for product, pricing, promotion, channel and supply chain management.
Prerequisite(s): MKT 200; 30 credits completed.

MKT 369 International Advertising 3 Credits
This course introduces students to the general landscape of international advertising with emphasis on understanding the opportunities and challenges entailed in international advertising management. The course will cover the subject from three aspects, including the international advertising environment, the international advertising industry, and international advertising strategies.
Prerequisite: MKT 200; 30 credits completed.

SPT 320 Business of Global Sport 3 Credits
The course explores the diverse challenges and issues facing the managers of sport enterprises in the context of the global marketplace. Issues of governance, cross-cultural interactions and business activities will be examined as they relate to modern sport at the international level. By evaluating case studies and examining current issues in the field, students will gain an understanding of the relationships and responsibilities associated with being a business professional in the global sport industry.

Journalism

Program Overview

Rider University journalism students learn news writing and reporting, editing, photography and publication design skills. These fundamentals are paired with video production tools and industry software, social media strategies and attention to computer-assisted reporting – the well-rounded basis to successfully enter careers in news, sports, features and investigative journalism.

Students also learn how to pitch stories to editors, how to find sources and conduct interviews, how to access key state and federal public records, and how to effectively present news content in today's multimedia world. In our state-of-the-art Mac journalism labs, students learn the Adobe design package including Photoshop and InDesign; they build audio-slideshows and video packages using Adobe Premier; and ultimately help build a journalism website using content management systems.

Many of our students participate in extracurricular activities at the university's fleet of award-winning media: The Rider News (http://www.theridernews.com) consistently wins state and regional journalism prizes from the Collegiate Press Association; The Rider University Network (http://runetwork.weebly.com) (R.U.N.) TV station has won numerous awards for audio management, video music entertainment, sports play-by-plays, and video documentaries; and in 2023, The Bronc 107.7 (http://www.1077thebronc.com) was named the best college radio station in the nation.

Curriculum Overview

Core classes in the journalism program include news reporting and writing, copy editing, publication design, feature writing, in-depth reporting, computer assisted reporting and advanced speech. Other classes include communication theory, writing for broadcast, public relations, organizational communication, photography, internal communication and more.

Degree Offered

- B.A. in Journalism
- Minor in Journalism

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits
Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits
Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 104 Speech Communication 3 Credits
Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 104S Intro to Speech Communication 1 Credits
As part of the EOP program, this course is designed to improve the speaking and language skills of new college students. Through directed practice, students have the opportunity to develop poise and confidence in oral communication, as well as competence in analyzing and synthesizing messages. Emphasis is placed on development, organization, and delivery of speeches. To receive credit, a grade of "C" or higher must be earned. Students who receive credit for COM 104S may not take COM 104.

COM 105 Communication, Culture and Media 3 Credits
Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 106 Writing for the Communication Professions 3 Credits
Provides students with written communication writing strategies and tools. Applies theory and practice in communication to targeted audiences. Emphasizes the critical role writing plays in the communication workplace and provides an opportunity to evaluate and respond to real-life writing samples and situations.

COM 107 Writing for the Media 3 Credits
Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 110 Digital Survival Skills: Media Literacy and Critical Thinking 3 Credits
This course is designed to help students critically engage with the digital media they encounter in their daily lives and build savvy skills to navigate this endless online world of information and proliferating disinformation. The course examines the digital communication, information, entertainment -- and even surveillance – that surrounds us all. Critical engagement includes understanding theories used to study the power of these media and practical techniques to assess the accuracy of digital content.

COM 131 Fundamentals of Video Production 3 Credits
Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 150 Introduction to Critical Media 3 Credits
In this course, media is understood as any communication outlet or tool used to deliver information or data to a large number of people. This includes various components of the mass media communications industry, such as print media, publishing, news media, photography, popular culture artifacts (such as movies and film), broadcasting, advertising, billboards, etc. As such, this course teaches students how to think critically about the power and influence of mass media in their daily lives and the lives of others. The course is designed to teach students how to analyze mass mediated messages through a variety of theoretical and analytical frameworks through the lens of hegemonic discourse and power dynamics. These perspectives and approaches include, but are not limited to: Marxist, queer, psychoanalytical, rhetorical and feminist perspectives. Emphasis will be placed on the ways the media produce and reproduce societal norms, expectations and taken-for-granted beliefs. This course will provide insights into our understanding of the relationship between media and one's attitudes, values and beliefs.

COM 201 Communication Theory 3 Credits
Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 202 Color Theory 3 Credits
Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 203 Introduction to Social Media 3 Credits
Introduces the tools and techniques of social media as an effective means of communication in a variety of organizational settings. Students will practice with a variety of social media platforms, explore the roles and responsibilities of a social media manager, discuss the importance of establishing social media policies, and learn how to develop a social media strategy as well as how to measure its effectiveness through social media analytics. In addition, students will discuss important issues such as how to handle an online crisis, and the legal and ethical implications of digital communication.

COM 204 Advanced Speech Communication 3 Credits
Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.
Prerequisite(s): COM 104 or COM 290.

COM 205 Persuasion 3 Credits
Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 207 Social Media and Social Change 3 Credits
Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 210 News Reporting and Writing 3 Credits
Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.
Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits
Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.
Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits
Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 213 Typography 3 Credits
Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 220 Voice and Articulation 3 Credits
Increases the student's knowledge of the vocal elements of oral communication and improves use of voice and articulation. Introduces anatomy and physiology for enhanced vocal production. Analyzes volume, rate, pitch, quality, phrasing, stress, and inflection. Presents the International Phonetic Alphabet as a means of developing correct articulation and pronunciation. Uses classroom exercises and tape recording for feedback and learning.

COM 221 Speaking for Broadcast and Digital Media 3 Credits
Introduces the principles and techniques of speaking in traditional and digital media through the preparation and presentation of copy for live television and radio as well as recorded video and audio for the web. Students will apply the principles and techniques to a number of contexts including television and radio news, music and sports announcing, interviewing and talk programs, as well as public service announcements.
Prerequisite(s): COM 104 or COM 290.

COM 230 Foundations of Film, Television and Radio 3 Credits
Examines film, television and radio industries, the programs they create and the powerful role they play in society. This course will examine the history, technology, structure, programming and regulation of these industries including issues, trends, and the impact of new and evolving technologies.

COM 232 Podcasting I 3 Credits
Podcasting I will offer students an innovative reading, research, discussion and creative lab experience. Using fictional storytelling, broadcast journalism and talk show formats, students will learn the basics of producing an original, creative podcast. They will gain insight on how to communicate and successfully market a podcast towards a mass audience. Students would also receive a basic overview of podcasting, so they can continue work to podcast on their own after taking Podcasting I.

COM 233 Writing for Broadcast 3 Credits
Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 234 Audio Production 3 Credits
Provides a laboratory study of audio production techniques, and performance. Introduces the fundamental properties of sound as applied in modern audio production at radio and television stations, sound studios, and production houses. Students conduct lab exercises in editing, mixing, and digital recording using ProTools. Students perform a variety of genres including news, commercials, dramas, and promos.

COM 237 Rhetoric in the Digital Age 3 Credits
Focuses on the critical examination of the major public discourses in digital media. Students will learn classical and modern rhetorical theory such as Aristotle's Rhetoric, power, publics and counterpublics, and argumentation. Students will apply these theoretical aspects to critically engage digital texts such as memes, emojis, hashtags, trolls, blogs/ reviews, and video game narratives.

COM 239 Script Writing for Comic Books 3 Credits
The medium of comics presents a fascinating vehicle to communicate through a sequence of text and images. Comic books, graphic novels and other forms of the genre (web comics, comic strips, etc.) hold a significant place in modern society, history and culture. This course is designed to orient students towards writing comic book scripts. Focus will be placed on students creating and writing their own stories. Students will learn basic concepts around scripting for sequential art, story research, the relationship between text and image, comic panel theory, working within page-length restrictions and various scripting formats. Beyond learning how to write a comic book, students will explore topics such as: the different types of script formats, plot points, writing sound effects, story structure and outlining. No artistic experience needed.

COM 240 Public Relations 3 Credits
Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 247 Covering the Sports Betting Industry 3 Credits
This course will introduce students to the world of covering the sports betting landscape via traditional sports media. Emphasis will be placed on learning the jargon of sports betting, learning how to break down financial reports from both states and gambling operators, how to cover legislative action on the subject. In short: Covering the world of sports betting is quickly becoming akin to covering the world of financial markets, and students wishing to pursue a career in sports media will have to know how to navigate this world going forward.
Prerequisite(s): COM 104 or COM 290.

COM 251 Interpersonal Communication 3 Credits
Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 252 Intercultural Communication 3 Credits
Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application.

COM 253 Organizational Communication 3 Credits
Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 254 Intro to Health Communication 3 Credits
Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 261 Introduction to Web Design 3 Credits
Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 262 Graphic Imaging for Digital Media 3 Credits
Teaches students techniques for image development, and image preparation for various multimedia applications. Emphasis is placed on color calibration and palette issues, image manipulation, advanced image selection techniques, transparency and masking, multimedia authoring file formats, and dynamic image design. Students will be expected to participate in critiques of professional designs in order to learn to critically evaluate their work and their fellow students' work.

COM 263 History and Principles of Graphic Design 3 Credits
Covers the history and principles of graphic design from analog art through the digital revolution. The elements and principles of design will be used to study stylistic progressions, artistic techniques, design innovations, and mechanical inventions. Material will be presented through a combination of illustrated lectures and discussions.

COM 264 Digital Media: Theory and Practice 3 Credits
Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 265 3D Graphic Animation 3 Credits
Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation using Maya software. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 270 Sports Multimedia Reporting 3 Credits
COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.
Prerequisite(s): COM 102. Introduction to News Writing.

COM 280 Issues in Event Planning 3 Credits
Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.
Prerequisite(s): COM 240 or MKT 200.

COM 290 Professional/Strategic Speech 3 Credits
Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the Norm Brodsky College of Business.

COM 292 Content for Social Media 3 Credits
Focuses on creating social media content that will inform, entertain, and engage audiences within a variety of organizational and business contexts. Students will learn about message planning for specific platforms and creative ways to use digital content to support public relations, branding, customer, and media relations.

COM 301 Communication Law 3 Credits
Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits
Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 303 Radio Programming 3 Credits
As new listening opportunities, options and alternatives emerge in a world of constantly changing and developing new media options, the over 100-year-old radio broadcast medium has remarkably been able to quietly continue to dominate the media landscape with the highest audience share of any audio platform, including satellite radio and streaming audio. In this course, students will learn how radio reaches and keeps its audience as well as the impact its programming has on the local communities it serves daily.

COM 304 Rhetoric for Politics and Law 3 Credits
Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.
Prerequisite(s): COM 104 or COM 290.

COM 310 Crisis Communication 3 Credits
Students will learn how professionals define and prepare for various crises, including theory, techniques and applications. This course will teach students about the importance of planning for a crisis and defining key messages. Through case studies, students will assess the successes and failures of various organization's responses. Students will work in teams to develop the knowledge and skills to manage the messages surrounding crisis-related issues found in organizations.

COM 312 Special Topics in Journalistic Writing 3 Credits
Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.
Prerequisite(s): COM 102 or COM 107.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits
This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.
Prerequisite(s): COM 347 and MKT 280.

COM 315 Computer Assisted Reporting 3 Credits
Develops advanced reporting techniques for researching and writing in-depth news stories and investigative articles. Uses state-of-the-art computer-assisted reporting methods including finding and mining data bases on the Internet, creating spreadsheets to analyze data, and employing data base manager software to sort and summarize information in government documents and other specialized resources. Focuses on conceptualizing of story ideas, planning major projects, gathering information by means of data bases, participant-observation, interviews, and analysis of public documents. Emphasizes organizing large quantities of material and presenting it in a meaningful context, including with information graphics.
Prerequisite(s): COM 210 or permission of instructor.

COM 316 Feature Writing 3 Credits
Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.
Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 318 Gender and Communication 3 Credits
Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GSS 318. Students may not get credit for both COM 318 and GSS 318.

COM 320 Negotiations 3 Credits
This course provides students with the theory and skills for effective negotiations. Students will learn how to prepare for and participate in negotiations by applying various strategies and tactics. This course will be split between theoretical lecture/discussion and practical application / skill development, including in-class simulations.

COM 321 Stand Up Comedy 3 Credits
Explores the theory, history, and practice of stand up and comedy writing as a contemporary rhetorical practice. Students will learn the various mechanics of joke construction, the nature of comedic narratives, and how humor can be used to engage in personal, social, cultural, and political commentary through the analysis of comedic performances. The class will also feature workshops in which students create and refine their comedic performances and personae. The class will culminate with students performing their material in front of an audience.
Prerequisite(s): COM 104 or COM 290.

COM 322 Argumentation and Advocacy 3 Credits
Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.
Prerequisite(s): COM 104 or COM 290.

COM 323 Oral Interpretation of Literature 3 Credits
Provides an orientation to the field of oral performance. Students select literary texts, adapt the material to the audience and prepare it for presentation. Emphasizes the development of voice, articulation, and kinesic behavior. Presentations to the class are critiqued.
Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 324 Political Rhetoric and Democratic Culture 3 Credits
Explores how political rhetoric has shaped the democratic culture of the United States. Students will focus on the role political rhetoric plays in the struggle to contest and redefine the meaning of the Declaration of Independence's promise of life, liberty and the pursuit of happiness. In so doing this course attempts to develop an appreciation for the ways in which the challenges to extant laws and traditions—and in particular the language choices and modes of argument used in those challenges—have expanded the meanings of democracy.
Prerequisite(s): COM 105 or POL 100 or POL 102.

COM 325 Rhetoric of American Labor 3 Credits
This course examines speeches, tracts, lyrics, newspapers, posters, poems, and films of the labor movement in America. The course also examines the historical context of the labor movement to better understand and appreciate the public discourse of labor. The course explores how rhetoric has been used to give force to ideas and lead to actions, how we develop a sense of how the values and norms of our society were reflected and shaped, and we understand how that history influences our collective perception in the present. Special attention is paid to the nature and locus of power, the interplay of conflict and confrontation, and the speaker's attempt to maintain or change the allocation of that power.

COM 326 Social Media Analytics 3 Credits
Examines how social media analytics are used to improve and inform an organization's decision-making process to develop, manage, and evaluate the success of an organization's social media strategy. Students will learn how to use analytics tools, and analyze and use data to plan and evaluate the effectiveness of social media campaigns.
Prerequisite(s): COM 203.

COM 327 Career Development in the Sports Marketplace 3 Credits
This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. Prereq(s): COM 270, COM 347, and MKT 280.

COM 330 Documenting Cultures Through Travel 3 Credits
Offers students, through travel and study, a unique opportunity to gain firsthand experience of a foreign culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

COM 331 Television News Production 3 Credits
In this course, students will learn to write, shoot, edit and produce video news for television, the Internet and social media. Students will be introduced to the necessary video and digital production techniques, software and technologies for producing and reporting both individual news packages and entire news programs. Through this class, students will sharpen their news judgement and learn the roles and responsibilities of television news reporters and producers.
Prerequisite(s): COM 131 or COM 230.

COM 332 Topics in Advanced Podcasting and Radio 3 Credits
Develops advanced podcasting and radio techniques, allowing students to focus closely on researching, recording, script writing, producing and distributing podcast and/or radio content in specialized genres. Students produce complex, long-form audio features suitable either for terrestrial broadcast and online/mobile podcasts. Topics may include journalism and news; narrative storytelling; sports; politics; business; and the arts. Since topics will vary by semester and instructor, this course may be repeated once.

COM 333 Media Program Development and Distribution 3 Credits
Critically analyzes the theory, practice, structure, and function of media program development and distribution. Examines the structure of the field as it relates to programming, the industry and audiences. Studies program categories, formats, genres, trends, and audience measurement and analysis as well as the new and evolving technologies responsible for program development and distribution.
Prerequisite(s): COM 230.

COM 337 Music Production for Mass Media 3 Credits
Offers students education in audio production techniques for music and other advanced audio material. Building on theory and practice introduced in the prerequisite, the class will instruct students in the theory behind acoustics and electronics as well as the digital tools and media. Those theoretical studies will be put to practice through exercises in recording music, making selections from music libraries, multi-track recording, arranging, editing, mixing and mastering. Students will begin to develop both an engineer's attention to audio detail and a musician's sense of artistry. Putting these skills to use, the students will produce complete musical works of varying musical styles, working both individually and in teams.
Prerequisite(s): COM 234.

COM 338 Writing for Broadcast II 3 Credits
Building on COM 233 Writing for Broadcast, this course provides a hands-on approach to more sophisticated reporting and interviewing techniques and writing formats used in long-form radio and television programs. This course will expose students to the following broadcast script writing areas: features, documentaries and reality programs. It will also cover writing for interview/talk show programs, music, comedy and variety programs. Students will also be exposed to writing for corporate, educational and children's programming. Students will have hands-on experiences writing, producing and editing news pieces and webcasts for student and area media outlets and web sites.

COM 341 Public Relations Writing and Strategy 3 Credits
Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.
Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits
Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

COM 348 Communication Research Methods 3 Credits
Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.
Prerequisite(s): COM 105; junior or senior standing.

COM 350 Team & Group Communication 3 Credits
Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

COM 352 Chinese and American Intercultural Communication 3 Credits
Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator.

COM 353 Nonverbal Communication 3 Credits
Investigates studies in and theories of nonverbal communication. Lectures and experiential activities explore the effect of status, culture, and gender upon kinesics, physical characteristics, proxemics, tactile communication, paralanguages, artifacts, and environmental factors.
Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 355 Social Justice and Journalism 3 Credits
The best of American journalism is rooted in exploring issues of social justice and shining a spotlight on abuse. In this course, students will learn about the role journalism has played to expose social injustice in America by exploring powerful investigations by the mass media and also press organizations employing and representing non-white and marginalized groups. Students will examine both historical and contemporary journalism examples. The course also will include critical assessment of journalism's failings, including an exploration of the discrimination and disenfranchisement historically perpetuated by media.

COM 360 Advanced Publication Design and Presentation 3 Credits
Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.
Prerequisite(s): COM 212.

COM 361 Photography 3 Credits
Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 363 Converging Digital Media 3 Credits
Examines the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COM 364 Web Design II 3 Credits
Equips students with the theories and practical techniques required to produce effective digital text, graphics, and animations for the Web. Discusses theories behind the use of these media in terms of effective communication and interaction. Introduces students to different computer platforms and requirements for cross-platform media.
Prerequisite(s): COM 261 or permission of instructor.

COM 365 Graphic Animation 3 Credits
Students receive an education in motion graphics and animation theories, development techniques, and preparation for various multimedia applications. Emphasis is placed on the design principles used in motion graphics and animated communication to effectively convey information in an entertaining and engaging manner. The course covers the integration of sound and imagery through graphic animation techniques, compression, rendering, input/output file formats, and delivery. Projects include the creation of web banner ads, title sequences, a music video, and an original final project. The primary software for this course is Adobe Photoshop, Adobe AfterEffects, and a taste of 3D animation using Maya. Students will be expected to participate in critiques of professional animation designs in order to learn to critically evaluate their own work and their fellow students' work.
Prerequisite(s): COM 262 or permission of instructor.

COM 366 Project Management in Graphic Design 3 Credits
Explores the creative process of graphic design while developing an understanding of the methods employed in problem solving in the industry standard design software packages. Students learn how to create a hierarchy of information through the ordering of elements into a comprehensive visual unity. They consider the relationship between content and page size, proportion, grid and margins. Students learn about typography as a design element and how it works with other visual elements in design. In order to develop an understanding of the project-planning process for either printer or Web projects, students will develop and present a series of projects that will build on one another to develop their "visual voice." Students will be evaluated on their ability to apply course material to the projects to create professional-quality work; their ability to apply exchange ideas and accept and apply constructive criticism; and on their participation in class discussions, critiques and presentations.
Prerequisite(s): COM 262, COM 360.

COM 367 3D Graphic Animation II 3 Credits
Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.
Prerequisite(s): COM 265.

COM 370 Sports Television and Field Production 3 Credits
Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.
Prerequisite(s): COM 131.

COM 371 Sports Feature Content Creation 3 Credits
Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.
Prerequisite(s): COM 102, COM 270.

COM 380 Broadcast News Practicum 3 Credits
Provides a workshop dedicated to the planning and creation of professional caliber broadcast news content for the campus television network and beyond. This course will provide an opportunity for students to develop writing, graphic, audio, video design and production skills in an experiential setting. Students will create materials to be used by the Rider University Network and for broadcast, cable and Internet distribution. Students can be involved in any and all phases of creating content from project conception through implementation. Students will gain valuable experience with, a greater appreciation for, and increased competency in creating professional media content. This class will also prepare students to more effectively function in the communication industry as an effective member of a professional production team. Since topics will vary by semester and instructor, this course may be repeated once.
Prerequisite(s): Permission of instructor.

COM 390 Communication and Society 3 Credits
Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits
Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits
Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media.

COM 399 The Co-Operative Experience 3-12 Credits
This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faulty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; Pass/fail.
Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

COM 400 Senior Seminar Communication 3 Credits
Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 415 In-Depth Reporting 3 Credits
Utilizes advanced tools and techniques of contemporary in-depth reporting for print and multimedia. Covering multifaceted stories, students will learn how to do balanced multi-sourced field reporting and writing using primary and secondary sources including human sources, electronic documents and databases, both online and offline. Emphasis will be placed on writing stories that answer not only who, what, when and where questions but also the why, the how and the "so what?" questions. Students will also be exposed to some of the best investigative work of journalists past and present as models for analysis and discussion.
Prerequisite(s): COM 210.

COM 426 Social Media Capstone 3 Credits
A client-based social media campaign will be developed from conception to evaluation based on research and digital media strategies. Focus will be on engagement with audiences, managing social media, and evaluation using social media metrics. Permission of instructor required.
Prerequisite(s): COM 203, COM 292.

COM 431 Advanced Television News Production 3 Credits
This course will focus on writing, reporting and producing a video news magazine program. Students will research, write, shoot, edit and report feature stories that will be included in a bi-weekly news magazine program that students will produce. Emphasis will be placed on meeting deadlines and developing the professional skills required of reporters creating visual stories for television, the Internet and Social Media. During the course, students will learn to sharpen their video production, writing and leadership skills, as well as their news judgment in creating and reporting digital content.

COM 432 Radio Station Operations Capstone 3 Credits
Students will practice the advanced study of the internal workings of a radio station and the podcasting and radio industry through hands-on work at 107.7 FM The Bronc, participating in multiple facets of the operation, including: programming, on-air broadcast, podcasting, audio software editing, event planning, public relations, business of media and advertising. Seniors only. Permission of instructor required.

COM 434 Advanced Structure of Sound in Podcasting and Radio 3 Credits
Provides in-depth study of advanced techniques in audio recording and radio programming and production. Individual and group production of short and long-form radio projects including: promotional spots, features, music programming, and news. Students will be involved in all phases of programming and production for radio including: project conception, development, management, and implementation. Selected student projects will air on the student radio station, 107.7 The Bronc.
Prerequisite(s): C or better in COM 234 or COM 232.

COM 440 Cases & Campaigns in Public Relations 3 Credits
Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.
Prerequisite(s): COM 341 or permission of instructor.

COM 452 Seminar in Communication Studies 3 Credits
Offers an in-depth investigation of relational communication. Students explore the many complexities involved in human interaction and interpersonal dynamics. Social and psychological implications of various communicative relationships ranging from cross-gender communication to dysfunctional family systems to intercultural interactions are included.

COM 460 Web Design III 3 Credits
Builds on previous courses to refine students' understanding of theories and procedures of digital media development. Further develops Web site creation and project management theories. Students develop advanced Web creation techniques, including responsible site production.
Prerequisite(s): COM 364.

COM 462 Advanced Graphic Design and Portfolio 3 Credits
Explores the processes of graphic design by creating independent and creative solutions to a series of design problems. Students expand their proficiency in all aspects of the design process, including creative brainstorming, conceptualizing, critical thinking and presentation. Students take a design project to both print and digital formats using Photoshop, Illustrator, and InDesign. Students develop and present a balanced portfolio as the culmination of their experience in the course.
Prerequisite(s): COM 366.

COM 470 Live Sports Reporting Capstone 3 Credits
Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits
Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits
Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.
Prerequisite(s): 3.2 GPA and permission of instructor.

Latinx Studies

Overview

Housed in the Multicultural Studies program, the Latinx Studies minor focuses on major social, cultural, and political events in the Latinx experience in the United States and across the Latinx diaspora. The coursework draws from many disciplines, including foreign languages, history, sociology, political science, literature, and cultural studies, providing a broad range of ideas and information through which students explore Latinx Studies.

Student Learning Outcomes

Upon completing the minor in Latinx Studies, students will be able to:

1. Describe major social, cultural, and political events in the Latinx experience.
2. Explore and analyze Latinx experiences through the lens of different disciplines.
3. Compare and contrast the different experiences of Latin American descent peoples within the United States and across the Latinx diaspora.
4. Identify major figures in Latinx history and understand their impact on global and American society.

Degree Offered

- Minor in Latinx Studies

Code	Title	Credits
Latinx Studies Required Courses:		
MCS 110	Race, Class and Gender in Contemporary American Society	3
MCS 210	Power and Privilege in a Multicultural Society	3
SPA 312	Latinx Cultures	3
Select three from the following:		**9**
AMS 307	Depictions of Racism in American Literature, Music, and Film	
SPA 311	Latin American Cultures	
SPA 325	Introduction to Latin-American/Latino Literature	
SPA 426	Latin American/Latino Film and Fiction	
SPA 430	Latinx Community Engagement	
HIS 283	Modern Latin America	
HIS 284	Caribbean History	
HIS 307	The Immigrant in American Life	
POL 235	Race and Ethnicity in American Politics	
POL 365	Politics of the Developing World	
SOC 207	Racial and Ethnic Relations	
SOC 345	Race and Crime	
Total Credits		**18**

Courses and Descriptions

AMS 307 Depictions of Racism in American Literature, Music, and Film 3 Credits
Depictions of Racism in American Literature, Music, and Film will study representations of racism in the American arts in historical context. Students will examine artistic representations of practices that disadvantage and disfranchise non-white Americans, with an eye toward understanding the ways America's history of racist practices has prompted responses from American writers, musicians, and filmmakers.
Prerequisites: CMP 125 or CMP 203 or BHP 150.

HIS 283 Modern Latin America 3 Credits
Considers the post-independence history of Latin America, emphasizing the rise of export economies and external economic domination, modernization, and pan- Americanism. Examines the changes undergone by Latin-American nations in the 20th century through an analysis of Mexico, Argentina, Chile, Brazil, Peru, Cuba, and Central America.

HIS 284 Caribbean History 3 Credits
Analyzes the history of the West Indian islands and the lands bordering the Caribbean Sea from pre-Columbian times to the present.

HIS 307 The Immigrant in American Life 3 Credits
Examines the experiences of immigrants in the United States, their assimilation, the reactions to them, and their contributions.

MCS 110 Race, Class and Gender in Contemporary American Society 3 Credits
This interdisciplinary course analyzes the ways in which race, class, gender and ethnic relationships shape the experience of all persons in this society. It examines the categories of race, class and gender as social constructs that have been historically developed and sustained by economic, social, political, and cultural factors. Note: This course is cross-listed with GSS 110. Students may only get credit for one course: MCS 110 or GSS 110.

MCS 210 Power and Privilege in a Multicultural Society 3 Credits
This course will examine how the intersection of power and privilege shapes race, gender and class relationships in the United States. Analyses will show how the legal, economic, political and social manifestations of power influence the assignments and distribution of privilege in the United States, both in historical and contemporary contexts. The impositions of power on identity in the social assignment of privilege will be an important component of the course. The two "big questions" to be examined in this course are: How do issues of race, ethnicity, class, age, religion, gender, and sexual orientation interact with privilege? How do the tensions between power, privilege, oppression and inequality lead to movements for social justice? Various interlocking systems of privileges—justice system, educational system, medical system, political system, economic system, etc.–will be examined, using the theoretical frameworks of inequality, oppression and dependency. Prominent public policies and social movements that have challenged the notions of power and privilege, both historically and contemporarily, will be examined: civil rights, women's suffrage, affirmative action, Occupy Wall Street, LGBT rights, Metoo movement, Equal Rights Amendment, Title IX, Lilly Ledbetter Fair Pay Act, etc.

POL 235 Race and Ethnicity in American Politics 3 Credits
Examines the changing political, economic, and social situation of racial and ethnic groups in American politics since the 1950s. Topics include the relationship between race/ethnicity and voting behavior, political parties, and election results. Includes an analysis of specific areas of contemporary racial and ethnic conflict, such as voting rights, immigration, and affirmative action.

POL 365 Politics of the Developing World 3 Credits
Studies the major political issues of the so-called "developing" world. Particular reference to political systems of Africa, Asia, Latin America, and the Middle East according to the relevance of the examples to large conceptual issues, and according to the major interests of the instructor. Typical issues include neocolonial dependency, the role of the state in newly developed countries, military rule and democratization.

SOC 207 Racial and Ethnic Relations 3 Credits
Examines the social origins of prejudice and discrimination, and analyzes intergroup trends in conflict, competition, and cooperation. Considers issues of immigration, economic and political power, and ethnic, racial, and religious pluralism.

SOC 345 Race and Crime 3 Credits
Examines the impact of crime policy on minority communities in the United States, with particular attention to the impact of "The War on Drugs", three-strike laws, and mandatory sentencing on minorities and minority communities. Drawing on sociological research, the course explores myths and realities concerning the relationship between race and crime. The relationship between racial attitudes, historical race relations, and mass incarceration are discussed.
Prerequisite(s): SOC 101.

SPA 311 Latin American and Latinx Cultures 3 Credits
This course offers a panoramic survey of Latin American culture and civilization, in light of the unique social, cultural and political history from the pre-Columbian period to the present. We will take a transdisciplinary approach, and thus we will consider literary texts (e.g., short stories, films, novels, essays, poems), historical and anthropological studies, and sociological works in our examination of Latin American and Latinx cultures. The analysis and discussion of selected texts will show how Latin American, Caribbean, and Latino/a/x artistic and creative endeavors express the social, cultural, and political context of the Americas. Videos and films will provide the sights and sounds of these complex and interconnected regions. This course is taught in English; no knowledge of Spanish is required. This course DOES NOT count for the General Education Foreign Language Proficiency requirement.

SPA 312 Latinx Cultures 3 Credits
This course focuses on the cultural formation of Latinos/as/x in the United States, as well as the social and political motivations for Latin American migration to this country. Our class will analyze and question how various Latinx communities are grouped into a single U.S.-Latino Diaspora. This course takes a transdisciplinary approach, thus we will consider literary texts (short stories, poems, films, novels), historical and anthropological studies, and sociological works in our examination of Latinx cultures. The main goals of the course are for students to begin to conceptualize: 1) how the United States has been shaped by the presence of Latino/a/x communities, and 2) how Latino/a/x experiences are reflected in literature and art. Classes are in English. No knowledge of Spanish is required.

SPA 325 Introduction to Latin-American/Latino Literature 3 Credits
A study of the development of Latin-American and Latino literature from its origins to the present through the reading, analysis and discussion of representative works by major authors. This course increases the understanding of how social, historical, and political events, together with native as well as foreign literary movements, create a unique literature, conveying the Hispanic-American reality. Required for majors. Course taught in Spanish.
Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 426 Latin American/Latino Film and Fiction 3 Credits
A study of the main trends in contemporary Hispanic fiction written in Latin America and the United States. Analysis and discussion of selected novels and short stories, and their cinematic representation on film. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Course taught in Spanish.
Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

Legal Studies

Program Overview

The Legal Studies minor provides students with an in-depth knowledge and understanding of the nature and development of law, legal institutions and processes, and the relationship ethical and social issues in the business world. Courses in the program include a wide spectrum of academic departments and programs so students may benefit from studying law from diverse perspectives. Students can focus their course of study around their specific career goals by completing the required courses and selecting from a range of elective courses within the program. In addition, the Legal Studies minor can often be combined with other major and minor programs.

Degree Offered:

- Minor in Legal Studies

POL 300	U.S. Constitutional Law	
Total Credits		**18**

Note:

Business majors may double-count a maximum of two courses toward another program.

Courses and Descriptions

BUS 210 Intro to Law: Contracts 3 Credits
An introduction to the origin of current law, with emphasis on the development of business law, students are exposed to legal terminology and acquainted with the system of application of rules of law to actual situations. The laws of contracts, particularly common-law developments, are considered in great detail.

BUS 211 Commercial Law 3 Credits
The law as related to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code is considered in depth. Warranties, guarantees, remedies, and product liability are explored. The laws of bankruptcy and insurance are also considered.
Prerequisite(s): BUS 210.

BUS 214 Advanced Business Law 3 Credits
This course provides students with an introduction to the fundamentals of individual and organizational forms of doing business. The laws governing agency, partnerships, corporations, and the purchase and sale of securities will be explored. The legal consequences of the relationships, and the rights and duties of the parties and entities will be discussed, as will the rules of law governing real, personal, and intellectual property, including the transfer of title to real property, the various types of bailments, the landlord-tenant relationship, and the laws concerning wills, trusts, and estates. The concerns of businesses that compete in the global environment through the study of international law will also be discussed. This course replaces the property (BUS 213) and business associations (BUS 212) courses; you may not take this course if you have taken either of these courses.
Prerequisite(s): BUS 210.

BUS 300 The Legal and Ethical Environment of Business 3 Credits
The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.
Prerequisite(s): 54 credits.

BUS 315 Health Care Law, Ethics & Policy 3 Credits
This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.
Prerequisite(s): 24 credits.

BUS 375 International Business Law 3 Credits
This course considers the impact of international organizations and treaties on global business and examines the various methods of international dispute resolution. Important legal and ethical issues related to conducting business overseas are discussed including the topics of labor and employment rights, environmental law, and intellectual property.
Prerequisite(s): 54 credits.

BUS 444 Selected Topics Business Policy 3 Credits
The study of a selected topic of contemporary interest related to one or more of the following: strategic management, business law, business ethics, social responsibility, legal environment of business. Readings, research, lectures, discussions, and other methods will be used.
Prerequisite(s): to be determined by instructor.

COM 301 Communication Law 3 Credits
Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

HIS 301 Constitutional History of U.S. 3 Credits
Surveys the English, Colonial, and Confederation backgrounds of American law and constitutionalism; the framing, adoption, and implementation of the Federal Constitution and its later development; the role of law in the nation's history; the changing interpretations of federalism; the growth of judicial review; and the increasing role of the Supreme Court.

HRM 312 Intro to Labor Relations 3 Credits
This course deals with the relationship of labor unions and management, the fundamentals of collective bargaining, and labor legislation. The structure and growth of unions as well as the relationships and problems that exist among private and public sector organizations, the labor force, and government are surveyed.
Prerequisite(s): MGT 310 or permission of instructor.

LAW 305 Trial Advocacy 3 Credits
Students will apply fundamental legal concepts and rules of evidence to specific cases. By engaging in trial simulations, students will evaluate various forms of evidence, identify legal principles and evidentiary rules that impact a criminal trial, learn about trial procedures, pursuit of case theories, and witness, exhibit and jury selection.

LAW 308 Conflict & Conflict Resolution 3 Credits
Focuses on understanding the meaning of conflict and strategies for its resolution. The course examines the ways conflict functions in various social contexts including professional, community, family, education, and international relations. Traditional models of adjudication will be compared to alternative forms of dispute resolution. Students will be introduced to research on the practice and effectiveness of various forms of conflict and conflict resolution. Students will participate in various class exercises, including role-plays, simulations, and case studies.

LAW 310 Cyberspace Law and Policy 3 Credits
Explores the legal and policy concerns raised by the Internet, nationally and globally. The course considers issues of legal regulation of the Internet, and consider the debate about whether cyberspace can or should be regulated. Attention will be given to the applicability of principles of law and models of regulation. Topics addressed will include jurisdiction, freedom of expression, intellectual property, privacy protection, safety concerns, equal access, electronic commerce, and computer crime.

LAW 355 Sports and the Law 3 Credits
Examines the legal, ethical, economic, social and managerial issues related to sports. Topics include liability issues, contracts, employment discrimination, antitrust law, and constitutional law. Note: This course is cross-listed as SPT 355. Students may not get credit for both LAW 355 and SPT 355.

LAW 450 Law & Justice Senior Seminar 3 Credits
Draws on and develops students' knowledge and understanding of law and legal institutions and applies it to a specific legal topic, method, institution, or controversy. Topics will vary. Students explore the social, political, ethical, and economic issues relevant to the topic. Students will be expected to contribute to seminar discussions and to complete projects related to the seminar theme. Required for seniors in law and justice minor and open to others by permission of the Director of the Law and Justice Program.

LAW 490 Independent Study: Research and Creative Expression 1-4 Credits
Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

LAW 491 Internship in Law and Justice 1-4 Credits
Provides supervised work experience in an institution, office, or agency related to law or law enforcement, such as courts, prosecutor/defense attorney offices, private law offices, state agencies, and local police departments. Students are expected to apply and broaden the knowledge obtained from law and justice minor courses to their fieldwork experience.
Prerequisite(s): 2.75 GPA and permission of the Director of the Law and Justice program.

POL 300 U.S. Constitutional Law 3 Credits
The role of the Supreme Court in the American political system is assessed. Topics include the staffing and functioning of the Supreme Court and the federal judicial bureaucracy, the origins and development of judicial review, and the role of the Supreme Court in national policy-making. Note: This course is cross-listed as HLS 300. Students may not get credit for both HLS 300 and POL 300.

Liberal Studies

Program Overview

This degree program enables students, through a variety of learning experiences, to consider life in the contemporary world. The curriculum provides for the development of writing, speaking, quantitative, and critical thinking skills and exposure to bodies of knowledge shared by educated persons. The program is offered through on-campus classes for adult Continuing Education students. Students have the opportunity to share common learning experiences and to develop personal plans of study for career advancement, personal growth, and graduate study.

Curriculum Overview

The Liberal Studies major provides a flexible curriculum, with on-campus or online coursework, for students whose goal is to further their personal interests and professional objectives. In addition to the **concentrations**

offered (p. 342), students may propose concentrations of individual design (which must be approved by the faculty committee on individual study and a CEP advisor).

Liberal Studies Program Requirements

(42 credits)

A candidate for graduation must complete a minimum of 120 credits. Of the required 120 credits, 36 must be in upper-level courses as determined by the respective department, including three credits from the liberal studies core and 18 from the concentration. A maximum of 30 credits from outside the arts and sciences may be presented for graduation.

Code	Title	Credits
Core Requirements		**48**
See Continuing Education Programs Core Requirements (p. 1126) [1, 2]		
Liberal Studies Core		**6**
LIB 200	Intro to Liberal Studies [3]	
LIB 400	Seminar in Liberal Studies	
Liberal Studies Concentration		**36**
Select from Humanities, Social Science, Applied Social Science, Applied Social Science with Business Studies Emphasis, Applied Social Science with Health Administration Emphasis, Global Studies, Law and Justice, Natural Science (p. 342)		
Free Electives		**30**
Total Credits		**120**

1. The quantitative skills requirement can be met by successfully completing one course in college-level mathematics or statistics. For students who don't transfer such a course to Rider, popular offerings include MTH 102, MSD 104, MSD 105, MSD 205, POL 201, PSY 201, or other mathematics courses approved by an advisor.
2. The information technology requirement may be fulfilled by completing CIS 185. Students who possess sufficient computer experience can gain credit for CIS 185 through assessment.
3. LIB 200 is waived for students who transfer 30 or more credits in liberal arts and sciences courses to Rider. Those students must complete an additional elective course.

LIB 200 Intro to Liberal Studies 3 Credits
Introduces students to the various perspectives and methods of the disciplines in liberal studies: natural and social sciences, humanities, and the arts. Students learn the multifaceted questions and answers offered by each discipline. They study the historical development of the university and the rise and transformation of liberal studies disciplines.

LIB 400 Seminar in Liberal Studies 3 Credits
A critical examination of the tradition of Western humanism and the way it has been transmitted through liberal arts education. Deals with a variable set of permanent problems in humanistic debate and learning e.g., specialization, the need for unifying theories of knowledge, the purpose of history, the place of intellectual life in mass society, the meaning of freedom, the modern problem of alienation, the responsibilities of the university, etc. Emphasis on why and how such problems have been addressed rather than any presumptive solutions.

LIB 490 Independent & Supervised Study 1-4 Credits
Independent and Supervised Study is available to CCS students for special study projects. Students much have completed a minimum of 45 credits applicable to a Rider degree and a minimum of 12 credit hours at Rider with a GPA of 2.5 or better. Each project may be taken for one-four credits and a maximum of six credits may be applied to the associate degree, 12 credits to the bachelor degree.

Areas of Concentration

For the Bachelor of Science in Liberal Studies, select one of the following concentration areas:

- Applied Social Science (p. 343) (http://catalog.rider.edu/undergraduate/colleges-schools/arts-sciences/continuing-education-programs/bachelors-degree-programs/liberal-studies/concentrations/#applied%20social%20science)
- Applied Social Science Concentration with Business Studies Emphasis (p. 343)
- Applied Social Science Concentration with Health Administration Emphasis (p. 343) (http://catalog.rider.edu/undergraduate/colleges-schools/arts-sciences/continuing-education-programs/bachelors-degree-programs/liberal-studies/concentrations/#applied%20social%20health)
- Global Studies (p. 344)
- Humanities (p. 344)
- Law and Justice (p. 345)
- Natural Science (p. 346)
- Natural Science Concentration with Health Administration Emphasis (p. 346)
- Social Science (p. 347)

For the Bachelor of Science in Liberal Studies Online, students may choose one of the following concentration areas:

- Applied Social Science (p. 343)
- Applied Social Science Concentration with Business Studies Emphasis (p. 343)
- Social Science (p. 347)

For assistance with concentration requirements please contact:

Liberal Studies Online (Online or Virtual Campus)

Program Overview

This degree program enables students, through a variety of learning experiences, to consider life in the contemporary world. The curriculum provides for the development of writing, speaking, quantitative, and critical thinking skills and exposure to bodies of knowledge shared by educated persons. The program is offered for adult Continuing Education students as a fully online program. Students have the opportunity to share common learning experiences and to develop personal plans of study for career advancement, personal growth, and graduate study.

Curriculum Overview

The Liberal Studies major provides a flexible curriculum through online coursework, for students whose goal is to further their personal interests and professional objectives. In addition to the **concentrations offered (p. 342)**, students may propose concentrations of individual design (which must be approved by the faculty committee on individual study and a CEP advisor).

Degrees Offered

- B.A. in Liberal Studies

Liberal Studies Online Program Requirements

(42 credits)

A candidate for graduation must complete a minimum of 120 credits. Of the required 120 credits, 36 must be in upper-level courses as determined

by the respective department, including three credits from the liberal studies core and 18 credits from the selected concentration. A maximum of 30 credits from outside the arts and sciences may be presented for graduation.

Code	Title	Credits
Core Requirements		**48**
See Continuing Education Programs Core Requirements (p. 1126) [1,2]		
Liberal Studies Core		
Complete the following courses:		
LIB 200	Intro to Liberal Studies [3]	3
LIB 400	Seminar in Liberal Studies	3
Liberal Studies Concentration		**36**
Select Social Science, Applied Social Science or Applied Social Science with Business Studies Emphasis (p. 342)		
Free Electives		**30**
Total Credits		**120**

Courses and Descriptions

LIB 200 Intro to Liberal Studies 3 Credits
Introduces students to the various perspectives and methods of the disciplines in liberal studies: natural and social sciences, humanities, and the arts. Students learn the multifaceted questions and answers offered by each discipline. They study the historical development of the university and the rise and transformation of liberal studies disciplines.

LIB 400 Seminar in Liberal Studies 3 Credits
A critical examination of the tradition of Western humanism and the way it has been transmitted through liberal arts education. Deals with a variable set of permanent problems in humanistic debate and learning e.g., specialization, the need for unifying theories of knowledge, the purpose of history, the place of intellectual life in mass society, the meaning of freedom, the modern problem of alienation, the responsibilities of the university, etc. Emphasis on why and how such problems have been addressed rather than any presumptive solutions.

LIB 490 Independent & Supervised Study 1-4 Credits
Independent and Supervised Study is available to CCS students for special study projects. Students much have completed a minimum of 45 credits applicable to a Rider degree and a minimum of 12 credit hours at Rider with a GPA of 2.5 or better. Each project may be taken for one-four credits and a maximum of six credits may be applied to the associate degree, 12 credits to the bachelor degree.

Areas of Concentration

For the Bachelor of Science in Liberal Studies, select one of the following concentration areas:

- Applied Social Science (p. 343) (http://catalog.rider.edu/undergraduate/colleges-schools/arts-sciences/continuing-education-programs/bachelors-degree-programs/liberal-studies/concentrations/#applied%20social%20science)
- Applied Social Science Concentration with Business Studies Emphasis (p. 343)
- Applied Social Science Concentration with Health Administration Emphasis (p. 343) (http://catalog.rider.edu/undergraduate/colleges-schools/arts-sciences/continuing-education-programs/bachelors-degree-programs/liberal-studies/concentrations/#applied%20social%20health)
- Global Studies (p. 344)
- Humanities (p. 344)
- Law and Justice (p. 345)
- Natural Science (p. 346)
- Natural Science Concentration with Health Administration Emphasis (p. 346)
- Social Science (p. 347)

For the Bachelor of Science in Liberal Studies Online, students may choose one of the following concentration areas:

- Applied Social Science (p. 343)
- Applied Social Science Concentration with Business Studies Emphasis (p. 343)
- Social Science (p. 347)

Management and Leadership

Program Overview

The management and leadership major encompasses the management of people and organizations. As a management major, you will learn the tools for effective leadership and teamwork -- setting you up for success in any career you choose to pursue.

Firms of all sizes and in all fields need good managers who know how to motivate and inspire employees, manage teams, resolve conflicts, and lead by example. Whether students are looking for a position with a medium to large organization or thinking of starting companies of their own, the management and leadership major provides the knowledge and skills they will need to be successful.

A 12-credit Certificate in Management and Leadership is offered to complement any major area of study. The ability to motivate and inspire others toward a common goal is a highly desirable skill that is relevant to any work context. The certificate will also provide students with an advantage in their job search as employers highly value students with superior leadership skills. Students will gain an understanding of important leadership and teamwork skills, which are valued in all work settings across all industries.

Curriculum Overview

Courses in the program include Team Management, Management Skills, Introduction to Human Resource Management, Managing Workforce Diversity, Ethical Management, Small Business Management, Negotiation, International Management, Advanced Leadership, and more.

Degree Offered

- B.S.B.A. in Management & Leadership
- Certificate in Management & Leadership

[1] Students are required to complete 6 credits of International Business Electives which can be fulfilled as major courses (MGT 375 International Management) or as free elective courses.

[2] The Leadership Elective requirement is not listed because MGT 355 Team Management and MGT 363 Management Skills (required for the Management major) both satisfy the Leadership Elective requirement. An additional 3-credit free elective has been added.

Additional Notes:

- This accelerated plan assumes no AP or other credits were transferred into Rider University.
- Business Honors students will have a different sequence.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448, ECO 450.)

MGT 201 Fund Management & Org Behavior 3 Credits
This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored. **Prerequisite**(s): minimum 30 credits completed.

MGT 310 Intro to Human Resource Mgmt 3 Credits
This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, t raining, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.
Prerequisite(s): MGT 201 or PSY 210.

MGT 320 Managing Workforce Diversity 3 Credits
Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves. Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth.
Prerequisite(s): MGT 201 or PSY 210.

MGT 329 Research Methods in Organizational Psychology 4 Credits
his course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 329L Research Methods: Org Psy Lab 0 Credits
This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 336 Career Management 3 Credits
How careers are shaped by individual needs and experience and assisted by organization systems and practices is the focus of this course. The meaning of work and the development of careers are discussed, and students undertake self-assessment for the purpose of career planning. Careers are examined in the context of important changes occurring today in the world of work. The impact of the executive, organizational counselors and trainers, and the educational system upon the development of human potential is examined, along with the techniques for human resource planning and development.
Prerequisite(s): MGT 201 or permission of instructor.

MGT 346 Negotiation 3 Credits
The purpose of this course is first, to explore the major concepts and theories behind effective negotiating practices and second, to develop negotiating skills applicable to a wide range of contexts. A knowledge of negotiation is a crucial requirement for anyone interested in a business career since it is a common mechanism for implementing change and for resolving conflict in the workplace. Topics will include two-party negotiations, power and politics, mediation, arbitration, and collective bargaining. A variety of teaching techniques will be used including readings, discussion, and role-playing.
Prerequisite(s): MGT 201 or permission of the instructor.

MGT 355 Team Management 3 Credits
This course prepares students to work in organizations that use teams as an integral part of their functioning-an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.
Prerequisite(s): MGT 201 or PSY 210.

MGT 363 Management Skills 3 Credits
The focus of this course is on specific skills necessary for success in a management role. These skills include leading, communicating effectively, delegating, conflict and time management and motivating others. Students will have opportunities to practice skills and to apply their knowledge to business cases.
Prerequisite(s): MGT 201 or permission of instructor.

MGT 375 International Management 3 Credits
This course explores the ways in which culture impacts management practices and organizational behavior and dynamics. Topics include cross cultural communication, expatriate selection and training, leading and motivating cross cultural teams, developing organizational strategies to compete in a global market place, international business ethics, and current topics.
Prerequisite(s): MGT 201.

MGT 399 Co-Op in Management and Leadership 6 Credits
This co-op program provides management students with an opportunity to work full-time in a company and apply what they have learned in their Management and Leadership classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a work journal and reflection paper. Supervising faculty will meet with the student regularly to discuss their progress and accomplishments in the co-op. Co-op credits can be applied toward business or free elective requirements.
Prerequisites: Junior status with a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in the major.

MGT 410 Ethical Management 3 Credits
Managers today face a broad range of ethically challenging situations. This course will help students to confront and analyze ethical dilemmas effectively in the workplace. Cases, simulations, hands-on content will engage students with the material, and will generate robust class discussion.
Prerequisite(s): Completion of MGT 201 and Leadership Requirement course.

MGT 421 Sel Topics:Mgt & Organztn Behv 3 Credits
The seminar focuses on an area of study announced at the time of registration (students should check the registration material). Examples of possible topics are: leadership, motivation, and organizational behavior research. Prerequisites vary according to the topic and are listed in the registration material.
Prerequisite(s): MGT 201 or permission of instructor.

MGT 450 Advanced Leadership 3 Credits
Leadership is the ability to influence a group of people towards a goal. In this course, students will increase their own leadership capacities so that they can become effective leaders of organizations and teams. They will integrate what they have learned from their experience and other coursework with diverse reading and writing assignments and team projects as they explore complex leadership issues related to vision, communication, motivation, ethics, team dynamics, power, and change management.
Prerequisite(s): MGT 201; Leadership elective (LDP 200, LDP 220, LDP 398, MGT 355, MGT 363).

MGT 490 Independent Research and Study 1-4 Credits
Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.
Prerequisite(s): MGT 201 or permission of instructor.

MGT 491 Intern Management/Org Behavior 3 Credits
Provides the student with the opportunity to supplement and apply their management and leadership classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.
Prerequisite(s): major in management and leadership or human resource management and MGT 363, or senior status; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

Management and Leadership/Human Resource Management Double Major

Program Overview

Rider's management and leadership major gives students the knowledge and tools for effective leadership and teamwork. Whether students are looking for a position with a medium to large organization or thinking of starting companies of their own, the management and leadership major provides the knowledge and skills they will need to be successful.

Human Resource Management (HRM) professionals are vital to organizations. With private and public-sector organizations becoming more concerned with issues such as corporate culture, talent development and retention, and employee engagement, the demand for well-trained HRM professionals is constantly growing. They establish and implement policies that affect organizational functions such as recruitment, selection, training and development, performance management, compensation and benefits.

Curriculum Overview
Management and Leadership

Rider's management and leadership major opens the possibility of becoming a manager and leader in any industry or field. Businesses want their new employees to handle themselves as subordinates, leaders, and team members. Our management and leadership major provides hands-on training in these people skills. The major also provides students with a comprehensive understanding of management theories that are applicable to real-world settings.

Human Resource Management

Human resource management professionals establish and implement policies that influence recruitment, selection, training and development of employees. They also work in areas of development, performance management, compensation, and benefits. HRM professionals may be involved with human resource planning, job design, and development and implementation of corporate strategy.

Our HRM program has been ranked among the top 20 Human Resource Management programs in the US, and placed as the #3 undergraduate HRM program in New Jersey by College Factual. The Society of Human Resource Management (SHRM) has acknowledged that our curriculum is fully aligned with SHRM's competency model for the HR profession. This connection to the profession, coupled with Rider's engaged learning program, makes Rider a great place to study Human Resource Management.

The department majors are valuable for students who want to pursue graduate studies in HRM, management, law, and psychology. The majors may be taken alone, together, or in combination with another major offered by the Norm Brodsky College of Business.

Degree Offered

- B.S.B.A. in Management and Leadership
- B.S.B.A in Human Resource Management

1 CIS 185 Information Systems Essentials can be taken in the Fall or Spring of Year 1.

2 Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.

3 Students are required to complete 6 credits of International Business Electives which can be fulfilled as major courses or as free electives.

Note: The Leadership Elective requirement is not listed becauseMGT 355 (Team Management) and MGT 363 (Management Skills), which are required for the Management & Leadership major, both satisfy the Leadership Elective requirement. An additional 3-credit free elective has been added.

HRM 312 Intro to Labor Relations 3 Credits
This course deals with the relationship of labor unions and management, the fundamentals of collective bargaining, and labor legislation. The structure and growth of unions as well as the relationships and problems that exist among private and public sector organizations, the labor force, and government are surveyed.
Prerequisite(s): MGT 310 or permission of instructor.

HRM 313 Legal Aspects of Human Res Mgt 3 Credits
This course deals with the various laws that affect human resource management, including social insurance, legislation, minimum wage laws, OSHA , ERISA, as well as equal employment opportunity legislation. This course is concerned not only with the provisions of these laws, but also with their constitutionality, their effects, and how they are administered.
Prerequisite(s): MGT 310 or permission of instructor.

HRM 315 Employee Selection & Training 3 Credits
This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.
Prerequisite(s): MGT 310.

HRM 316 Employee Compensation Systems 3 Credits
The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.
Prerequisite(s): MGT 310.

HRM 333 Employee Engagement 3 Credits
Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.
Prerequisite(s): MGT 310.

HRM 441 Sel. Topics: Human Res Mgt 3 Credits
Deals with one area of study in the field of human resource management such as protective labor legislation, mediation and arbitration, the administration of labor unions, or case problems in human resource management. The topic varies each semester and is announced at the time of registration.
Prerequisite(s): MGT 310 or permission of instructor.

HRM 490 Independent Research and Study 1-4 Credits
Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or HRM major elective.
Prerequisite(s): MGT 310 or permission of instructor.

HRM 491 Internship 1-4 Credits
Provides the student with the opportunity to supplement and apply human resource management coursework in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing work experiences. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.
Prerequisite(s): Junior or Senior; Major in human resource management and MGT 310; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

HRM 492 Internship in Human Res Mgt 3 Credits
Provides the student with the opportunity to supplement and apply their human resource management classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions. 2.75 GPA overall and 3.0 GPA in the major is required.
Prerequisite(s): major in human resource management or management and leadership, and MGT 310; senior status; and permission of instructor.

MGT 201 Fund Management & Org Behavior 3 Credits
This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.
Prerequisite(s): minimum 30 credits completed.

MGT 310 Intro to Human Resource Mgmt 3 Credits
This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, t raining, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.
Prerequisite(s): MGT 201 or PSY 210.

MGT 320 Managing Workforce Diversity 3 Credits
Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves. Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth.
Prerequisite(s): MGT 201 or PSY 210.

MGT 329 Research Methods in Organizational Psychology 4 Credits
his course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 329L Research Methods: Org Psy Lab 0 Credits
This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 336 Career Management 3 Credits
How careers are shaped by individual needs and experience and assisted by organization systems and practices is the focus of this course. The meaning of work and the development of careers are discussed, and students undertake self-assessment for the purpose of career planning. Careers are examined in the context of important changes occurring today in the world of work. The impact of the executive, organizational counselors and trainers, and the educational system upon the development of human potential is examined, along with the techniques for human resource planning and development.
Prerequisite(s): MGT 201 or permission of instructor.

MGT 346 Negotiation 3 Credits
The purpose of this course is first, to explore the major concepts and theories behind effective negotiating practices and second, to develop negotiating skills applicable to a wide range of contexts. A knowledge of negotiation is a crucial requirement for anyone interested in a business career since it is a common mechanism for implementing change and for resolving conflict in the workplace. Topics will include two-party negotiations, power and politics, mediation, arbitration, and collective bargaining. A variety of teaching techniques will be used including readings, discussion, and role-playing.
Prerequisite(s): MGT 201 or permission of the instructor.

MGT 355 Team Management 3 Credits
This course prepares students to work in organizations that use teams as an integral part of their functioning-an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.
Prerequisite(s): MGT 201 or PSY 210.

MGT 363 Management Skills 3 Credits
The focus of this course is on specific skills necessary for success in a management role. These skills include leading, communicating effectively, delegating, conflict and time management and motivating others. Students will have opportunities to practice skills and to apply their knowledge to business cases.
Prerequisite(s): MGT 201 or permission of instructor.

MGT 375 International Management 3 Credits
This course explores the ways in which culture impacts management practices and organizational behavior and dynamics. Topics include cross cultural communication, expatriate selection and training, leading and motivating cross cultural teams, developing organizational strategies to compete in a global market place, international business ethics, and current topics.
Prerequisite(s): MGT 201.

MGT 399 Co-Op in Management and Leadership 6 Credits
This co-op program provides management students with an opportunity to work full-time in a company and apply what they have learned in their Management and Leadership classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a work journal and reflection paper. Supervising faculty will meet with the student regularly to discuss their progress and accomplishments in the co-op. Co-op credits can be applied toward business or free elective requirements.
Prerequisites: Junior status with a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in the major.

MGT 410 Ethical Management 3 Credits
Managers today face a broad range of ethically challenging situations. This course will help students to confront and analyze ethical dilemmas effectively in the workplace. Cases, simulations, hands-on content will engage students with the material, and will generate robust class discussion.
Prerequisite(s): Completion of MGT 201 and Leadership Requirement course.

MGT 421 Sel Topics:Mgt & Organztn Behv 3 Credits
The seminar focuses on an area of study announced at the time of registration (students should check the registration material). Examples of possible topics are: leadership, motivation, and organizational behavior research. Prerequisites vary according to the topic and are listed in the registration material.
Prerequisite(s): MGT 201 or permission of instructor.

MGT 450 Advanced Leadership 3 Credits
Leadership is the ability to influence a group of people towards a goal. In this course, students will increase their own leadership capacities so that they can become effective leaders of organizations and teams. They will integrate what they have learned from their experience and other coursework with diverse reading and writing assignments and team projects as they explore complex leadership issues related to vision, communication, motivation, ethics, team dynamics, power, and change management.
Prerequisite(s): MGT 201; Leadership elective (LDP 200, LDP 220, LDP 398, MGT 355, MGT 363).

MGT 490 Independent Research and Study 1-4 Credits
Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.
Prerequisite(s): MGT 201 or permission of instructor.

MGT 491 Intern Management/Org Behavior 3 Credits
Provides the student with the opportunity to supplement and apply their management and leadership classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.
Prerequisite(s): major in management and leadership or human resource management and MGT 363, or senior status; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

Marine Sciences

Program Overview

The Marine Sciences minor, offered by the Department of Earth and Chemical Sciences, introduces students to fundamental biological and physical marine processes, as well as advanced topics through a selection of upper level electives. In these courses, students have the opportunity to visit coastal environments and aquariums to learn first-hand about marine processes as well as using the plankton lab and aquarium lab on campus. This minor enables students to learn more about the earth's oceans, how they are changing in response to human actions, and how students can help promote marine conservation and sustainable use.

Degree Offered

- Minor in Marine Sciences

Electives		**6-8**
Select two of the following:		
ENV 320 & 320L	Global Biogeochemistry and Global Biogeochemistry Lab	
ENV 340	Field Methods and Data Analysis	
GEO 306 & 306L	Sedimentology and Stratigraphy and Sedimentology and Stratigraphy Lab	
MAR 340	Marine Processes and Environments: Seminar	
MAR 401 & 401L	Marine Ecology and Marine Ecology Lab	
MAR 410	Physical Oceanography	
Total Credits		**22-24**

Courses and Descriptions

MAR 120 Oceanography 3 Credits
In this course, students will investigate the geological, chemical, physical, and biological processes that shape the ocean. Emphasis will be placed on how these processes interact with each other and with human populations. These interactions influence important global phenomena that impact all our lives, including weather and climate, the distribution of marine organisms and other natural resources, and coastal processes. Understanding these phenomena will enable students to make more informed decisions and contribute to serious global marine issues. Students will learn through a combination of hands-on exercises designed to foster a deeper understanding of the scientific content as well as the scientific process, practical experiences with real data, readings, and some lectures. CLAS general education areas addressed: DP & GP.

MAR 121 Introductory Oceanography Lab 1 Credits
This lab course introduces students to the fundamental aspects of geological, chemical, physical and biological oceanography. Students learn through inquiry-based, hands-on exercises and activities using actual data collected in the lab and in the field. Independent projects and local field trips during lab and on weekends may be required. One three-hour lab per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

MAR 340 Marine Processes and Environments: Seminar 3 Credits
This course is designed as a seminar course. Therefore, students will learn to lead class discussions, to analyze and critique peer-reviewed journal articles, and to enhance their presentation skills. Students will interpret graphical, spatial, and numerical data to support their positions. Content will emphasize the interactions among marine processes, biological features, and geologic landforms.
Prerequisite(s): A minimum grade of D in MAR 120 and GEO 100 or GEO 113.

MAR 401 Marine Ecology 4 Credits
The purpose of this course is to introduce students to fundamental principles in ecology, as it relates to marine systems. Topics include the marine environment and its influence on the organisms living there; biodiversity and speciation; factors regulating population dynamics in marine systems; larval and fisheries ecology; species interactions such as predation, competition, and symbiosis; factors regulating productivity and energy flow in marine systems; and marine conservation. Hands-on laboratory exercises will provide students with the opportunity to design and conduct experiments related to marine ecology, and to collect, analyze, and interpret data from those experiments. Ecosystem modeling will also be introduced. Three hours of lecture and one three-hour lab per week. Weekend field trips may be required.
Prerequisite(s): D or better in MAR 120 and either BIO 115 or 116.

MAR 401L Marine Ecology Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): MAR 401.

MAR 410 Physical Oceanography 3 Credits
Introduction to the physical aspects and processes of the oceans and their influence on marine ecosystems and Earth processes. Topics include distribution of salinity and water temperature and their effect on water movement, the oceanic heat budget, atmospheric and oceanic interactions, ocean currents including surface and deep water circulation, waves, tides, and medium- to small-scale circulation features. Throughout the course, emphasis is placed on how these physical processes affect the biology and chemistry of the ocean. Three hours of lecture per week. Weekend field trips may be required.
Prerequisite(s): MAR 120.

BIO 115 Principles of Biology I 4 Credits
An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three- hour lab per week.
Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits
An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.
Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 116.

BIO 272 Intro to Marine Biology 4 Credits
Introduces students to the study of marine environments, emphasizing the diversity, ecology, and physiology of marine animals, algae, and plants. Aspects of the human impact on marine environments are also discussed.
Prerequisite(s): BIO 115 with a minimum grade of C, or BIO 116 with a minimum grade of C.

BIO 272L Marine Biology Laboratory 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Course
Prerequisite(s): BIO 115 or BIO 116.

GEO 100 Earth Systems Science 3 Credits
Investigates the major global processes that occur on Earth. These processes can be grouped into four major systems: atmosphere, hydrosphere, lithosphere, and cosmosphere. Each system interacts with and affects the other systems creating, in a sense, a single Earth process. With this approach, the student will view the Earth as a whole, and understand that the many seemingly separate components that make up this planet are, in fact, a set of interacting processes, that operate in cycles through time, within a single global system. Three hours of lecture per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 102 Earth Materials and Processes Lab 1 Credits
This lab course introduces students to the origin, identification, and significance of geologic materials, processes, and landforms. Hands-on experiences with mineral and rock specimens, topographic and geologic maps, and GPS and other data collection techniques are emphasized, along with field trip and in-lab observations, measurements, and interpretations. One three-hour lab per week.
Prerequisite(s): concurrent enrollment in, or prior completion of, GEO 100 or GEO 113 is required.

GEO 306 Sedimentology and Stratigraphy 4 Credits
The principles of weathering, erosion, transportation, and deposition of sediment are the focus of this course. Sediment characteristics are examined to identify the processes involved in transporting grains and the specific environment in which the grains were deposited. Students will learn how to collect, analyze, and interpret sedimentary data and how to interpret surface and subsurface stratigraphic data using various techniques, such as lithostratigraphic, biostratigraphic, and geophysical, correlations. Field trips will expose students to different sedimentary environments and provide opportunities for students to learn how to conduct fieldwork. Three hours of lecture and one three-hour lab per week. Weekend field trips may be required. Prerequisite(s): GEO 100.
Corequisite(s): GEO 306L.

GEO 306L Sedimentology and Stratigraphy Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): GEO 306.

ENV 320 Global Biogeochemistry 4 Credits
This course introduces students to global biogeochemical processes in the earth system and their influences on marine and terrestrial ecosystems. With a focus on systems thinking and interdisciplinary science, students will learn about the interactions of the biosphere, lithosphere, hydrosphere and atmosphere through elemental cycling and energy transfers. The course extends from the origin of our planet to the modern earth system and considers the anthropogenic impacts of climate change and pollution on humans and other species. Students will analyze scientific data with examples in regulatory and research settings. Students will also gain first-hand experience with field methods including sampling ocean and freshwater using various techniques and equipment and interpreting chemical data. Field trips may be required for this course. Course
Prerequisites: GEO 100 or GEO 113; GEO 102; CHE 120 & 121.

ENV 320L Global Biogeochemistry Lab 0 Credits
This course introduces students to global biogeochemical processes in the earth system and their influences on marine and terrestrial ecosystems. With a focus on systems thinking and interdisciplinary science, students will learn about the interactions of the biosphere, lithosphere, hydrosphere and atmosphere through elemental cycling and energy transfers. The course extends from the origin of our planet to the modern earth system and considers the anthropogenic impacts of climate change and pollution on humans and other species. Students will analyze scientific data with examples in regulatory and research settings. Students will also gain first-hand experience with field methods including sampling ocean and freshwater using various techniques and equipment and interpreting chemical data. Field trips may be required for this course. Course
Prerequisites: GEO 100 or GEO 113; GEO 102; CHE 120 & 121.

ENV 340 Field Methods and Data Analysis 3 Credits
This course will provide students with practical experience in field methods and data analyses within environmental and marine sciences. The course will apply advanced scientific methods such as field-based exercises, GIS or coding analyses, statistical analyses, and database management. Students will also complete an independent or group project focused on a relevant topic. Local field trips during lab and potentially longer trips on weekends may be required. This course earns 3 Engaged Learning points in Civic and Community Engagement (CCE.)
Prerequisite(s): D or better in (MTH 105, or MTH 106, or MTH 210) and GEO 100, GEO 102, ENV 100, and MAR 120; or Permission of Instructor.

Marketing

Program Overview

A degree in marketing provides students with the knowledge they need to compete in today's global marketplace. Graduates from the marketing program enter the workforce with a strong background in business, a critical understanding of consumer behavior, ad trends and the know-how needed to reach target audiences and to promote services and products.

Student Learning Outcomes:

A marketing graduate will demonstrate the ability to:

- apply knowledge of the interaction of marketing mix variables with environmental variables and the resulting outcome;
- apply ethical thinking to decision making;
- work with others in team environment;
- use current and emerging technology in the field of marketing;
- demonstrate basic professional skills in oral communication;
- demonstrate basic professional skills in written communication.

Curriculum Overview

As a marketing major at Rider, students have the choice of pursuing one of five marketing tracks: general marketing, advertising, digital marketing, pharmaceutical and health care marketing, or professional selling. These tracks provide all marketing majors with the foundation of knowledge and skills necessary for a marketing career while offering students the opportunity to focus their curriculum on a path that best suits their career interests and goals.

Possible employment opportunities can be found with profit and non-profit and public or private organizations marketing goods or services to consumers, businesses or other organizations.

Degree Offered

Marketing Major Requirements

(24 credits)

Students are *required* to complete one of the five tracks shown below :

Tracks for the Marketing Major

- General Marketing
- Advertising
- Digital Marketing
- Professional Selling
- Health Care and Pharmaceutical Marketing

General Marketing Track

(24 credits)

Code	Title	Credits
MKT 320	Consumer Behavior	3
MKT 330	International Marketing [1]	3
or MKT 369	International Advertising	
MKT 366	Marketing Research	3
MKT 460	Marketing Management Seminar	3
Four additional Marketing Electives are required [2]		12
Total Credits		**24**

1. Only one of MKT 330 or MKT 369 can count in major. General Marketing majors must take a second International Business elective and count it as Free Elective only.
2. MKT 490 & MKT 491 cannot count as MKT electives.

Students are required to complete 6 credits of International Business electives. Marketing majors can only count 3 credits of International Business elective in their major.

Advertising Track

(24 credits)

Code	Title	Credits
MKT 205	Advertising Principles	3
MKT 320	Consumer Behavior	3
MKT 366	Marketing Research	3
MKT 369	International Advertising	3
or MKT 330	International Marketing	
MKT 375	Digital Advertising and Social Media	3
MKT 435	Advertising Campaigns	3
MKT 460	Marketing Management Seminar	3
COM 212	Digital Publication Design [1]	3
Total Credits		**24**

1. This course can count as a required social science elective. If you count it as a social science elective, you must complete an additional 3-credit free elective.

Digital Marketing Track

(24 credits)

Code	Title	Credits
BDA 205	Introduction to Visual Data Analytics	3
OR		
COM 212	Digital Publication Design [1]	
MKT 250	Retailing Management	3
or MKT 260	Service Marketing	
or MKT 310	Business to Business Marketing	
MKT 320	Consumer Behavior	3
MKT 330	International Marketing	3
or MKT 369	International Advertising	
MKT 366	Marketing Research	3
MKT 367	Marketing Web Analytics	3
MKT 375	Digital Advertising and Social Media	3
MKT 460	Marketing Management Seminar	3
Total Credits		**24**

1. This course can count as a required social science elective. If you count it as a social science elective, you must complete an additional 3-credit free elective.

Professional Selling Track

(24 credits)

Code	Title	Credits
MGT 346	Negotiation	3
MKT 250	Retailing Management	3
or MKT 260	Service Marketing	
or MKT 310	Business to Business Marketing	
MKT 320	Consumer Behavior	3
MKT 330	International Marketing	3
or MKT 369	International Advertising	

MKT 340	Personal Selling	3
MKT 366	Marketing Research	3
MKT 440	Sales Management	3
MKT 460	Marketing Management Seminar	3
Total Credits		**24**

Health Care and Pharmaceutical Marketing Track

(24 credits)

Code	Title	Credits
MKT 320	Consumer Behavior	3
MKT 330	International Marketing	3
or MKT 369	International Advertising	
MKT 340	Personal Selling	3
MKT 345/GSC 345	Customer Focus [1]	3
or MKT 310	Business to Business Marketing	
MKT 366	Marketing Research	3
MKT 380	Health Care Marketing	3
MKT 460	Marketing Management Seminar	3
Select one of the following:		3
HTH 205	Introduction to Health Care	
BUS 315	Health Care Law, Ethics & Policy	
Total Credits		**24**

[1] GSC 115 will be removed as a pre-requisite for marketing majors in order to take MKT 345.

Concentration in Financial Services

(12 credits)

This program is designed for students interested in the many careers requiring knowledge of finance as well as strong marketing skills, including banking, investment banking, and insurance.

The concentration is available to Finance or Marketing majors in the Norm Brodsky College of Business. Students majoring in Finance are required to complete 12 credit hours in marketing coursework; students majoring in Marketing are required to complete 12 credit hours in finance coursework.

Finance majors may only select this program as a second concentration after they select a primary concentration such as Private Wealth Management.

- for Finance Majors (p. 365)
- for Marketing Majors (p. 365)

Free Elective 5		3
	Semester Credit Hours	**15**
	Total Credit Hours for Graduation	**120**

1 CIS 185 Information Systems Essentials and CBA 110 Business in Action can be taken in the Fall or Spring of Year 1.

2 Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.

Notes:

- The plans above assume no AP or other credits were transferred into Rider University.
- Business Honors students may have a different sequence.
- For the Leadership Elective, select either LDP 398 Co-op Experience Seminar, LDP 200 Foundations of Leadership, LDP 220 Service Learning, MGT 355 Team Management, or MGT 363 Management Skills.
- **Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits may be any other course offered by the College of Arts and Sciences.**
- Students are required to complete 6 credits of International Business electives. Marketing majors may only count 3 credits of International Business electives in their major.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448 Seminar in Small Business Consulting, or ECO 450 Seminar in Economic Research.)

3 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Marketing General Concentration (p. 370)
Advertising Concentration (p. 371)
Digital Concentration (where COM 212 is selected) (p. 371)
Digital Concentration (where BDA 205 is selected) (p. 372)
Health Care and Pharmaceutical Concentration (p. 373)
Professional Selling Concentration (p. 374)

[1] CIS 185 Information Systems Essentials and CBA 110 Business in Action may be taken in the Fall or Spring of Year 1.

[2] Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.

Additional Notes:

- The above plans assume no AP or other credits were transferred into Rider University.
- Business Honors students may have a different sequence.
- For the Leadership Elective, select from LDP 398 Co-op Experience Seminar, LDP 200 Foundations of Leadership, LDP 220 Service

Learning, MGT 355 Team Management, or MGT 363 Management Skills.

- **Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits may be from any other course offered by the College of Arts and Sciences.**
- Students are required to complete 6 credits of International Business electives. Marketing majors may only count 3 credits of International Business electives in their major.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448 Seminar in Small Business Consulting, or ECO 450 Seminar in Economic Research.)

Courses and Descriptions

MKT 200 Marketing Principles 3 Credits
This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.
Prerequisite(s): 15 credits.

MKT 205 Advertising Principles 3 Credits
Basic theory, functions, principles, and applications of advertising are the focus of this course. The relation of advertising to our economy, the advertising department and the ad agency, selection of media, advertising practices, and the use of research to improve advertising techniques are covered.
Prerequisite: MKT 200.

MKT 250 Retailing Management 3 Credits
The principles underlying successful retailing are analyzed within the framework of the strategic-planning process. Topics covered include location, merchandise planning, customer service, image, atmosphere, layout, pricing, promotion, personnel and operations management.
Prerequisite(s): MKT 200.

MKT 260 Service Marketing 3 Credits
Focuses on the unique challenges of managing services and delivering quality service to customers. Emphasis is placed on the total organization, and how effective marketing and customer focus must be coordinated across multiple functions. The course is applicable to service organizations and to organizations that depend on service excellence for competitive advantage. Topics include customer-focused management, and customer satisfaction, retention, lifetime value and profitability. Students will learn to map services, understand customer expectations, and develop relationship marketing strategies.
Prerequisite(s): MKT 200.

MKT 280 Sports Marketing 3 Credits
The course focuses on the unique challenges of marketing sports at a variety of levels: youth, college, professional, and international. The challenges of attracting and retaining fans and participants as well as of building and maintaining strong brand identity are at the heart of the course content. By evaluating case studies and examining current issues in sports marketing, students will gain an understanding of what it means to be a professional marketer of a sports organization and/or event.
Prerequisite(s): MKT 200.

MKT 308 Conflict & Conflict Resolution 3 Credits
Focuses on understanding the meaning of conflict and strategies for its resolution. The course examines the ways conflict functions in various social contexts including professional, community, family, education, and international relations. Traditional models of adjudication will be compared to alternative forms of dispute resolution. Students will be introduced to research on the practice and effectiveness of various forms of conflict and conflict resolution. Students will participate in various class exercises, including role-plays, simulations, and case studies.

MKT 310 Business to Business Marketing 3 Credits
This course examines the business-to-business marketplace, and the planning and control tools used by its entities in managing the product, pricing, promotion, channel and supply chain management strategies.
Prerequisite(s): MKT 200; junior & senior standing.

MKT 316 Hospitality and Tourism Marketing 3 Credits
The Hospitality and Tourism Marketing course explores the diverse challenges and issues facing managers tasked with marketing hospitality and tourism organizations and destinations. Issues of identifying and developing strategic opportunities, creating and delivering value to customers, and managing the marketing function will be examined as they relate to a range of organizations within the hospitality and tourism industry. By evaluating case studies and examining current issues facing the industry, students will be better prepared to function as professionals in this industry who can analyze marketing opportunities and develop marketing strategies that deliver value to both the organization and its customers. Pre-requisite(s): MKT 200.

MKT 320 Consumer Behavior 3 Credits
The nature and determinants of consumer behavior are studied, with attention given to the influence of socio-psychological factors such as personality, small groups, demographic variables, social class, and culture on the formation of consumer attitudes, consumption patterns, and purchasing behavior.
Prerequisite(s): MKT 200.

MKT 330 International Marketing 3 Credits
This course examines the global marketplace and the complexities of its environmental influences, and necessary adaptations in formulating the strategies for product, pricing, promotion, channel and supply chain management.
Prerequisite(s): MKT 200; 30 credits completed.

MKT 340 Personal Selling 3 Credits
Examines persuasive techniques utilized in sales presentations conducted on a person-to-person basis. Major course emphasis is on developing effective selling techniques; understanding the company, its products and the role of the salesperson in implementing product/market strategies; understanding the customers and the selling environment; application of effective sales presentation techniques; recognizing selling opportunities and careers.
Prerequisite(s): MKT 200; 30 credits completed.

MKT 345 Customer Focus 3 Credits
Marketing supply chain management programs are concerned with the creation and delivery of value to customer and organizations. No longer simply the domain of the warehouse manager or logistics director, supply chain management is viewed by most companies as a mission-critical element. Marketing focuses on developing an understanding of customers and markets, creating products and services based on that understanding, and communicating and delivering the value added. This course will teach the student the essential role of marketing in all aspects of successful supply chain management - relationship management, technological and financial - and it will help the student understand the structure, functions, principles and methods employed in discovering and translating consumer needs and wants into product and service specifications and then transferring these goods and services from producers to consumers or end users.
Prerequisite(s): MKT 200; junior & senior standing.

MKT 350 Retailing Management 3 Credits
The principles underlying successful retailing are analyzed within the framework of the strategic-planning process. Topics covered include location, merchandise planning, customer service, image, atmosphere, layout, pricing, promotion, personnel and operations management.
Prerequisite(s): MKT 200; junior & senior standing.

MKT 366 Marketing Research 3 Credits
Topics include specific research procedures in gathering, processing, analyzing, and presenting information relevant to marketing problems: advertising planning and effectiveness; product development; distribution channels; sales techniques; consumer behavior; and forecasting. Student learning about research planning, implementation, and interpretation is facilitated by the use of projects or cases.
Prerequisite(s): MKT 200 and MSD 205; junior standing.

MKT 367 Marketing Web Analytics 3 Credits
This course teaches web analytics through practical applications with a focus on deriving actionable insights. It provides a broad overview of key web analytics strategies, concepts, issues, challenges and tools. Topics covered include: • How to choose a web analytics tool • Metrics and key performance indicators • Best ways to analyze effectiveness of blogs, marketing campaigns, SEO, SEM and emails • How to utilize quantitative, qualitative and competitive tools to derive actionable insights • How to optimize web sites by incorporating testing and experimentation • Analytics in social, mobile and video • Best practices and pitfalls in web analytics.
Prerequisite(s): MKT 200; junior or senior standing.

MKT 369 International Advertising 3 Credits
This course introduces students to the general landscape of international advertising with emphasis on understanding the opportunities and challenges entailed in international advertising management. The course will cover the subject from three aspects, including the international advertising environment, the international advertising industry, and international advertising strategies.
Prerequisite: MKT 200; 30 credits completed.

MKT 370 Internet Marketing 3 Credits
This course emphasizes the discipline of internet marketing, including practices of leading online marketing companies, state of the art online research and demonstrates how the Internet is creating value for customers and profits for businesses while also fitting into a firm's complete marketing strategy. This course will provide a strategic and tactical toolkit for the online marketer, help students understand how and why the Internet is changing traditional marketing and allow students to develop the skills, strategies and tactics important to develop successful Internet marketing plans.
Prerequisite(s): MKT 200 and CIS 185; junior & senior standing.

MKT 375 Digital Advertising and Social Media 3 Credits
This course surveys the concepts, principles, practices and industry standards of digital advertising, including standard display and rich media advertising, search advertising, email advertising, game advertising, and mobile advertising. It also introduces the strategies and tactics in social media marketing. The course emphasizes a strategic, holistic view of digital advertising and social media as marketing communication tools that are situated in the marketing strategic framework and employed to engage consumers in community building.
Prerequisite(s): MKT 200; junior & senior standing.

MKT 380 Health Care Marketing 3 Credits
The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.
Prerequisite(s): MKT 200; junior & senior standing.

MKT 435 Advertising Campaigns 3 Credits
This capstone course for advertising majors provides an opportunity for students to plan comprehensive advertising campaigns. Coverage includes segmentation research, creative development of the campaign, media planning, and determining advertising effectiveness. Integration of advertising into the marketing program will be emphasized.
Prerequisite(s): MKT 205 + additional 9 credits from the Marketing courses for the Advertising Concentration; senior standing.

MKT 440 Sales Management 3 Credits
By means of lectures, discussions, and case studies, the field of marketing management is analyzed from the viewpoint of sales executives. The responsibilities for planning and administering personal selling operations are emphasized. Considerable attention is given to other activities for which sales executives may be wholly or jointly responsible, such as decision making on promotion and brand management.
Prerequisite(s): MKT 200 and senior standing.

MKT 444 Special Topics in Marketing 3 Credits
The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations, as well as special applications of marketing decision-making, may be explored. Readings, research, lectures, discussions, or other appropriate methods are employed to stimulate student learning.
Prerequisite(s): MKT 200; any additional prereqs requested by the instructor.

MKT 460 Marketing Management Seminar 3 Credits
This capstone course for marketing majors employs a top management approach to the overall marketing task, including planning, organizing, controlling, and integrating all the activities of the marketing program. Integration of marketing with other operations of the business unit is emphasized. Major problems and current trends are identified and analyzed through case discussion. Required for marketing majors.
Prerequisite(s): 15 Marketing credits, senior standing.

MKT 469 Selected Topics in Marketing 3 Credits
The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision making may be explored. Readings, research, lectures, discussions, or other appropriate methods are employed to stimulate student learning.
Prerequisite(s): MKT 200 and senior standing.

MKT 490 Independent Research and Study 1-4 Credits
Topic to be approved by the professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation, which may be counted as a business or free elective.

MKT 491 Internship-Based Indep Study 3 Credits
Provides the student an opportunity to supplement and apply classroom work in supervised employment with participating marketing and advertising firms. Requirements include a journal with a log of daily activities, and a project or term paper presented to and evaluated by the internship sponsor. Evaluation will also include a report by the company on the intern's performance. Credits may be used to satisfy business or free elective requirements.
Prerequisite(s): permission of instructor.

Marketing Minor for Non-business Majors

Overview

Open to all non-business undergraduate students at Rider University, the minor is designed to complement students' major areas of study with relevant content from the marketing discipline. Many disciplines, such as Graphic Design, Public Relations, and Communication Studies, frequently collaborate with the Marketing department of various organizations. The minor offers students majoring in these fields the opportunity to acquire marketing knowledge and skills that are essential for their cross-functional and interdisciplinary roles. Moreover, the minor is also beneficial for students pursuing majors like Exercise Sciences and Dance, who have aspirations of starting their own businesses. These students will learn the necessary skills to effectively market their businesses and themselves in their respective industries.

MKT 440	Sales Management	
Total Credits		**15**

*Students will need the Marketing department's permission to enroll in any of the following courses as a part of the minor program: MKT 444, MKT 469, MKT 490, MKT 491.

Courses and Descriptions

MKT 200 Marketing Principles 3 Credits
This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.
Prerequisite(s): 15 credits.

MKT 205 Advertising Principles 3 Credits
Basic theory, functions, principles, and applications of advertising are the focus of this course. The relation of advertising to our economy, the advertising department and the ad agency, selection of media, advertising practices, and the use of research to improve advertising techniques are covered.
Prerequisite: MKT 200.

MKT 320 Consumer Behavior 3 Credits
The nature and determinants of consumer behavior are studied, with attention given to the influence of socio-psychological factors such as personality, small groups, demographic variables, social class, and culture on the formation of consumer attitudes, consumption patterns, and purchasing behavior.
Prerequisite(s): MKT 200.

MKT 330 International Marketing 3 Credits
This course examines the global marketplace and the complexities of its environmental influences, and necessary adaptations in formulating the strategies for product, pricing, promotion, channel and supply chain management.
Prerequisite(s): MKT 200; 30 credits completed.

MKT 340 Personal Selling 3 Credits
Examines persuasive techniques utilized in sales presentations conducted on a person-to-person basis. Major course emphasis is on developing effective selling techniques; understanding the company, its products and the role of the salesperson in implementing product/market strategies; understanding the customers and the selling environment; application of effective sales presentation techniques; recognizing selling opportunities and careers.
Prerequisite(s): MKT 200; 30 credits completed.

MKT 367 Marketing Web Analytics 3 Credits
This course teaches web analytics through practical applications with a focus on deriving actionable insights. It provides a broad overview of key web analytics strategies, concepts, issues, challenges and tools. Topics covered include: • How to choose a web analytics tool • Metrics and key performance indicators • Best ways to analyze effectiveness of blogs, marketing campaigns, SEO, SEM and emails • How to utilize quantitative, qualitative and competitive tools to derive actionable insights • How to optimize web sites by incorporating testing and experimentation • Analytics in social, mobile and video • Best practices and pitfalls in web analytics.
Prerequisite(s): MKT 200; junior or senior standing.

MKT 370 Internet Marketing 3 Credits
This course emphasizes the discipline of internet marketing, including practices of leading online marketing companies, state of the art online research and demonstrates how the Internet is creating value for customers and profits for businesses while also fitting into a firm's complete marketing strategy. This course will provide a strategic and tactical toolkit for the online marketer, help students understand how and why the Internet is changing traditional marketing and allow students to develop the skills, strategies and tactics important to develop successful Internet marketing plans.
Prerequisite(s): MKT 200 and CIS 185; junior & senior standing.

MKT 375 Digital Advertising and Social Media 3 Credits
This course surveys the concepts, principles, practices and industry standards of digital advertising, including standard display and rich media advertising, search advertising, email advertising, game advertising, and mobile advertising. It also introduces the strategies and tactics in social media marketing. The course emphasizes a strategic, holistic view of digital advertising and social media as marketing communication tools that are situated in the marketing strategic framework and employed to engage consumers in community building.
Prerequisite(s): MKT 200; junior & senior standing.

MKT 440 Sales Management 3 Credits
By means of lectures, discussions, and case studies, the field of marketing management is analyzed from the viewpoint of sales executives. The responsibilities for planning and administering personal selling operations are emphasized. Considerable attention is given to other activities for which sales executives may be wholly or jointly responsible, such as decision making on promotion and brand management.
Prerequisite(s): MKT 200 and senior standing.

MKT 444 Special Topics in Marketing 3 Credits
The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations, as well as special applications of marketing decision-making, may be explored. Readings, research, lectures, discussions, or other appropriate methods are employed to stimulate student learning.
Prerequisite(s): MKT 200; any additional prereqs requested by the instructor.

MKT 469 Selected Topics in Marketing 3 Credits
The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision making may be explored. Readings, research, lectures, discussions, or other appropriate methods are employed to stimulate student learning.
Prerequisite(s): MKT 200 and senior standing.

MKT 490 Independent Research and Study 1-4 Credits
Topic to be approved by the professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation, which may be counted as a business or free elective.

MKT 491 Internship-Based Indep Study 3 Credits
Provides the student an opportunity to supplement and apply classroom work in supervised employment with participating marketing and advertising firms. Requirements include a journal with a log of daily activities, and a project or term paper presented to and evaluated by the internship sponsor. Evaluation will also include a report by the company on the intern's performance. Credits may be used to satisfy business or free elective requirements.
Prerequisite(s): permission of instructor.

Mathematics

Program Overview

Students majoring in mathematics at Rider are met with rigorous and insightful instruction. Courses progress from foundational topics to advanced theories and techniques. Faculty members are active in

research and will invite, stimulate and support students' curiosity and understanding.

Graduates of Rider's mathematics program go on to careers in such fields as education, scientific and medical research, engineering, computer science, architecture, pharmaceutical research, actuarial science, and urban planning and development.

Curriculum Overview

Requirements for the mathematics major total 50 semester hours and include calculus I, II and III, linear algebra, differential equations, advanced calculus, modern geometry, probability and statistical analysis I, modern algebra, complex analysis, and mathematics electives. Also required are general physics I and II.

Student Learning Outcomes

Graduates of the Mathematics major will be able to:

1. Apply analytical skills and logical thinking to solve problems in a broad range of mathematics.
2. Explain and write mathematical arguments
3. Communicate mathematical ideas clearly and with proper notation and terminology.

Honors Program in Mathematics

Superior students majoring in mathematics may participate in a program leading to graduation with honors in mathematics. A candidate must submit a written application by March 1 of their junior year to the departmental honors committee. Admission to the program will be based on a 3.25 cumulative average in mathematics courses taken in the first five semesters and sponsorship by a member of the departmental faculty. During their senior year, the student will be enrolled in MTH 490 Independent Study: Research and Creative Expression. Honors in mathematics is based upon earning a 3.4 average in seven mathematics courses at the 300 and 400 levels (excluding MTH 490) and an acceptable senior thesis. Further information on the program can be obtained from the department.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Courses and Descriptions

MTH 102 Finite Mathematics 3 Credits

This mathematically rigorous course begins with a review of the rational numbers, repeating decimals, irrational numbers and non-repeating decimals. The elementary theory of sets is discussed with applications to surveys and data mining. This is followed by a discussion of the cardinality of infinite sets. An introduction to elementary number theory includes various applications. The Cartesian plane and the idea of a function and its graph are introduced with applications. Counting theory then precedes an elementary discussion of probability.

MTH 105 Algebra and Trigonometry 4 Credits

The course is an in depth and rigorous study of functions and graphs, equations and inequalities, polynomial and rational functions, exponential, and logarithmic functions, basic trigonometric functions and their inverses, trigonometric identities.

Prerequisite(s): A mathematics SAT score of 570, departmental placement or MTH 100 with a grade of C or higher.

MTH 210 Calculus I 4 Credits

Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.

Prerequisite(s): Math SAT 650 or higher or Math ACT score of 28 or higher or MTH 105 or MTH 106 with a grade of C or higher.

MTH 211 Calculus II 4 Credits
The definite integral, differentiation of transcendental functions, methods of integration and approximate integration, determination of area, volume, and surface area.
Prerequisite(s): MTH 210 with a grade of C or higher.

MTH 212 Calculus III 4 Credits
Infinite series; functions of two and three variables, vectors and tangent planes, partial derivatives, multiple integrals, determination of volume and density.
Prerequisite(s): MTH 211 with a grade of C or higher.

MTH 230 Discrete Mathematics 4 Credits
An introduction to topics in Discrete Mathematics. This course covers methods of proof, induction and recursion, and other topics in discrete mathematics. Topics may include graph theory, trees, and symmetry groups.
Prerequisite(s): MTH 102, MTH 105 or MTH 210.

MTH 240 Linear Algebra 3 Credits
Systems of linear equations; vector spaces; linear independence; determinants; orthogonality; linear maps; eigenvectors.
Prerequisite(s): MTH 210 or as corequisite; sophomore standing; or permission of instructor.

MTH 250 Differential Equations 3 Credits
First order differential equations, separable and exact; integrating factors; second order linear differential equations; series solutions of second order linear differential equations; higher order equations; existence and uniqueness theorems; systems of linear differential equations.
Prerequisite(s): MTH 240, MTH 211.
Corequisite(s): MTH 212 or as prerequisite.

MTH 308 Advanced Calculus 3 Credits
Vectors, gradients, and directional derivatives, Lagrange multipliers, Taylor's theorem, multiple integrals, change of variables, line and surface integrals, Stokes' theorem.
Prerequisite(s): "B" average in MTH 210 and MTH 211; MTH 212, MTH 240.

MTH 315 Modern Geometry 3 Credits
Covers geometry from a modern point of view, with emphasis on non-Euclidean geometry, particularly projective geometry.
Prerequisite(s): MTH 211, MTH 240.

MTH 340 Probability & Statistical Analysis I 3 Credits
Theory of sets and probability; discrete and continuous random variables and probability distributions. Emphasizes foundations and utilizes the techniques of the calculus.
Prerequisite(s): MTH 212 or MSD 111.

MTH 341 Probability & Statistical Analysis II 3 Credits
Continuation of MTH 340. Foundations of mathematical statistics: normal distributions, estimation, confidence intervals and hypothesis testing; topics chosen from student's t- test, chi-square tests, analysis of variance and regression analysis. Emphasizes foundations and utilizes the techniques of the calculus.
Prerequisite: MTH 340. Spring.

MTH 401 Modern Algebra 3 Credits
Provides an introduction to modern abstract algebra. It emphasizes the axiomatic method to analyze the major algebraic systems. The instructor will choose the topics to be studied from among the following algebraic structures: integral domains, fields, complete ordered fields, groups, polynomials, rings, ideals and modules.
Prerequisite(s): MTH 240.

MTH 402 Topics in Advanced Mathematics 3 Credits
Chosen from advanced pure or applied mathematics. Topics vary, depending on instructor.
Prerequisite(s): MTH 212 and MTH 240.

MTH 410 Complex Analysis 3 Credits
Analytic functions, conformal mapping, power series, Cauchy's theorem, calculus of residues.
Prerequisite(s): MTH 212 and MTH 240.

MTH 420 Number Theory 3 Credits
Covers topics including divisibility theory, the prime numbers, the theories of congruences and of quadratic reciprocity, and Fermat's Last Theorem. Other topics may also include applications to cryptography, Pell's equations, continued fractions, and the theory of partitions.
Prerequisite(s): MTH 240 or permission of instructor.

MTH 430 Introduction to Topology 3 Credits
A comprehensive introduction to elementary topology. The concepts of topological spaces and metric spaces will be introduced. Connectedness, compactness and properties of subsets of the real numbers rooted in topology will also be considered. The quotient topology will be used to construct surfaces as identification spaces, and tools will be developed to distinguish one surface from another.
Prerequisite(s): MTH 212.

MTH 440 Real Analysis 3 Credits
Covers the theory of sets, the real number system and its properties, convergence of sequences and series of numbers and functions, and the theory of integration, including: measure theory, the Riemann integral, and introduction to the Lebesque theory of integration.
Prerequisite(s): MTH 212 and MTH 240.

MTH 490 Independent Study: Research and Creative Expression 1-4 Credits
Immerses the student in research and mathematical literature. If possible, the student will publish the results or present them at a scientific meeting.

PHY 200 General Physics I 4 Credits
Introductory classical physics; Newtonian mechanics, including the conservation laws, wave motion, gravity, thermodynamics. Three hours of lecture and one three-hour lab per week. Prerequisite(s): MTH 210 or concurrent enrollment
Corequisite(s): PHY 200L.

PHY 201 General Physics II 4 Credits
A continuation of the concepts developed in Physics 200. Electricity, electrical circuits, magnetism, Maxwell's equations. Light and optics, including lenses, interference, and diffraction. Three hours of lecture and one three-hour lab per week. Prerequisite(s): PHY 200, MTH 211 or concurrent enrollment.
Corequisite(s): PHY 201L.

Movement Science Minor

Program Overview

The Movement Science minor is designed to foster a deeper knowledge and understanding of the fundamental aspects of human performance. Upon completion of the program, the student will be able to:

- Demonstrate knowledge of theoretical and practical scientific concepts of movement and movement science (i.e., anatomy, physiology, nutrition, biomechanics/kinesiology, and biopsychosocial and behavioral health.)
- Identify and explain disease which may result from and affect biological and behavioral health.
- Articulate a philosophy that demonstrates the role of movement in the development and maintenance of overall health and the prevention of disease.

Degree Offered

- Minor in Movement Science

Movement Science Minor Requirements

(21-22 credits)

Code	Title	Credits
Select one of the following:		
BIO 100	Life Science	3-4
or BIO 115/BIO 115L	Principles of Biology I	
or BIO 116/BIO 116L	Principles of Biology II	
or BNS 107	Life Science: Brain and Behavior	
BIO 221 & 221L	Human Anatomy & Physiology I and Human Anatomy & Physiology I Lab	4
BIO 222 & 222L	Human Anatomy & Physiology II and Human Anatomy & Phys II Lab	4
DAN 460	Movement Theory and Somatic Practice [1]	3
HSC 110	Introduction to Human Nutrition	3
HSC 302 & HSC 303	Kinesiology and Kinesiology Lab [2]	4
Total Credits		**21-22**

[1] DAN 460 is offered every other year. Work with your advisor to plan accordingly.

[2] Health Science majors who declare a Movement Science Minor may not count HSC 110 or HSC 302 / HSC 303 toward their major requirements.

Courses

BIO 100 Life Science 3 Credits
An introductory course for non-science majors in which students develop an understanding of the nature of science and are introduced to foundational topics in the biological life sciences and how they relate to human affairs. The course may emphasize human evolution, genetics, aging, disease, reproduction, bioethics or other topics in biology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CAS general education curriculum.

BIO 115 Principles of Biology I 4 Credits
An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three- hour lab per week.
Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits
An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.
Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 116.

BIO 221 Human Anatomy & Physiology I 4 Credits
A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training. Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor.
Corequisite(s): BIO 221L.

BIO 221L Human Anatomy & Physiology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): BIO 221.

BIO 222 Human Anatomy & Physiology II 4 Credits
A comprehensive survey of the organ systems of the body including special senses, cardiovascular, respiratory, digestive, excretory, reproduction and development. Physiological components include electrolytes, metabolism, nutrition, and the mechanisms of homeostasis and cell reception. Lab studies support lecture material through dissections, wet labs, computer-assisted learning, microscopy, and models. Assessment includes lab practicums, exams, and reports. Course emphasis supports allied health and pre-professional training. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): BIO 221.
Corequisite(s): BIO 222L.

BIO 222L Human Anatomy & Phys II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 221L.
Corequisite(s): BIO 222.

BNS 107 Life Science: Brain and Behavior 3 Credits
An introduction to the biology of the human brain and the rest of the human nervous system. Topics in neuroscience are covered in molecular, cellular, and systematic terms. Additional material is presented on the origins and effects of neurological and psychiatric diseases. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

HSC 110 Introduction to Human Nutrition 3 Credits
This course is designed to offer the student an understanding of fundamental human nutrition concepts including, but not limited to, digestion, absorption, metabolism, functions, and sources of macronutrients and micronutrients. The theme of the course will align with human health and disease states and the important conceptions about the food industry and its relation to healthy dietetic choices.

HSC 302 Kinesiology 3 Credits
The purpose of this course is to explore human movement during performance of activities. This course will explore the relationship between anatomical structures and function in the production of movement. The application and relationships between the fundamental principles of mechanics and musculoskeletal system function will be addressed within the framework of clinical and research perspectives. Both qualitative and quantitative approaches will be applied towards a better understanding of human movement, the analysis of physical activity. Prerequisite(s): BIO 221 & MTH 105 (or equivalent) or POI.
Corequisite: HSC 303.

HSC 303 Kinesiology Lab 1 Credits
This lab is a co-requisite and must be taken with HSC 302.
Corequisites: HSC 302.

Multicultural Studies

Program Overview

In the Multicultural Studies minor, students will learn how different cultures interact to shape individual identities and to structure U.S. society. Because organizations today need employees who can perform effectively in a diverse workplace environment, the minor can also enhance employment options.

For coursework, each student chooses a theme or thread within multicultural studies that suits his or her special interests. The minor also provides students with career-relevant knowledge and experience.

In various ways, the multicultural studies minor plays an important role in preparing Rider students, whatever their ethnic heritage, for an increasingly multicultural world.

Total Credits		**21**

Courses and Descriptions

MCS 109 Intro to Race, Class & Gender 3 Credits
This course introduces students to the concepts of race, class and gender as essential components in understanding how social identities are socially constructed in the United States. Using historical and contemporary references, the course explores the ways in which race, class, gender and ethnic relationships shape the experiences of people in the United States, and the implications of those experiences for social relationships. Part of this exploration is to expose students to inter-relatedness of race, class and gender, as identity markers, both historically and in contemporary society.

MCS 110 Race, Class and Gender in Contemporary American Society 3 Credits
This interdisciplinary course analyzes the ways in which race, class, gender and ethnic relationships shape the experience of all persons in this society. It examines the categories of race, class and gender as social constructs that have been historically developed and sustained by economic, social, political, and cultural factors. Note: This course is cross-listed with GSS 110. Students may only get credit for one course: MCS 110 or GSS 110.

MCS 110S Introduction to Race, Class and Gender in Contemporary Society 1 Credits
This course introduces students to the concepts of race, class and gender as essential components in understanding how social identities are socially constructed in the United States. Using historical and contemporary references, the course explores the ways in which race, class, gender and ethnic relationships shape the experiences of people in the United States, and the implications of those experiences for social relationships. Part of this exploration is to expose students to inter-relatedness of race, class and gender, as identity markers, both historically and in contemporary society.

MCS 210 Power and Privilege in a Multicultural Society 3 Credits
This course will examine how the intersection of power and privilege shapes race, gender and class relationships in the United States. Analyses will show how the legal, economic, political and social manifestations of power influence the assignments and distribution of privilege in the United States, both in historical and contemporary contexts. The impositions of power on identity in the social assignment of privilege will be an important component of the course. The two "big questions" to be examined in this course are: How do issues of race, ethnicity, class, age, religion, gender, and sexual orientation interact with privilege? How do the tensions between power, privilege, oppression and inequality lead to movements for social justice? Various interlocking systems of privileges—justice system, educational system, medical system, political system, economic system, etc.–will be examined, using the theoretical frameworks of inequality, oppression and dependency. Prominent public policies and social movements that have challenged the notions of power and privilege, both historically and contemporarily, will be examined: civil rights, women's suffrage, affirmative action, Occupy Wall Street, LGBT rights, Metoo movement, Equal Rights Amendment, Title IX, Lilly Ledbetter Fair Pay Act, etc.

MCS 220 Issues in Multicultural Studies 3 Credits
An examination of issues and questions posed by the existence of diversity in social life. Students build on what they have learned in MCS 110 by focusing in greater depth on selected aspects of multicultural interaction. Topics change each semester and are listed in the course roster. Recent topics include "Understanding Privilege," "The Meaning of Difference," and "Narratives of Human Difference: Science, Politics, Literature."
Prerequisite(s): MCS 110 or permission of instructor.

MCS 280 Directed Study in Multicultural Studies 1-4 Credits
An intensive study experience in multicultural studies. The student designs and carries out a course of focused study under the supervision of a multicultural studies faculty member. The student's proposed plan of work must be reviewed and approved by the faculty sponsor and by the multicultural studies advisory committee. May be repeated once for credit.

MCS 490 Independent Study: Research and Creative Expression 1-4 Credits
Individual program of study under close supervision by the instructor, with weekly meetings and reports. Topics to be approved by the department. Available to seniors who have a minimum of a 3.0 GPA. No more than six credits allowed toward graduation.

MCS 491 Internship in Multicultural Studies 1-4 Credits
A supervised community service of work experience at an approved site. Placements are made in accordance with each student's particular theme within multicultural studies. A minimum of three hours per week on site per credit (39 hours per semester); in addition, students complete readings and reports and meet weekly with the instructor. Primarily for multicultural studies minors in their junior or senior year.

Music - B.A.M

Program Overview

The Bachelor of Arts in Music is a liberal arts degree with a major in music. A broad foundation in liberal studies complements extensive studies in music.

All students in the B.A.M. degree select a minor or a concentration. Concentrations are offered in specialized areas of music and require 9-10 credits. These include Composition Studies, Music Theory, Music History, and Sacred Music, among others.

Minors are offered in most disciplines of the university and require 18-21 credits. Students may choose from any concentration or minor approved by Rider University (https://www.rider.edu/academics/program-finder/).

Typically this selection is made no later than the end of the sophomore year. Students are encouraged to make this decision earlier, if possible, as the date of the decision may affect progress towards a timely graduation. The declaration is made through the Registrar's office.

Courses taken to fulfill Arts and Sciences core requirements may be used to complete minor requirements. Interested students have the option to take elective composition lessons for an additional fee.

Sharon Mirchandani (chair) • Professor, Music History/Theory, 1997. B.M., Bowling Green State University; M.M., Temple University; Ph.D., Rutgers University.

Christian Carey • Associate Professor, Theory/Composition/Music History, 2004. B.M., Juilliard; M.M., Boston University; Ph.D., Rutgers University.

Ronald A. Hemmel • Emeritus Professor, Theory/Composition. B.M., Westminster Choir College; M.M., James Madison University; M.Phil., Ph.D., Rutgers University.

Jay Kawarsky • Emeritus Professor, Theory/Composition, 1989. B.M.E., Iowa State University; M.M., D.M., Northwestern University.

Anthony Kosar • Professor, Theory, 1984. B.M., West Liberty State College; M.M., Southern Illinois University; Ph.D., The Ohio State University.

Joel Phillips • Emeritus Professor, Theory/Composition, 1985. M.M., Eastman School of Music, University of Rochester; B.M., D.M.A., University of Alabama.

Stefan Young • Emeritus Professor, Theory/Composition, 1979. B.M., Rollins College; M.M., The Juilliard School; Ph.D., Rutgers University.

Bachelor of Art in Music (B.A.M.) Requirements

B.A.M. Requirements (p. 385) (56 credits)
Concentrations (9-10 credits)
Note: Students may choose a minor in place of a concentration.

CAS General Education Curriculum (p. 386) (43-50 credits)

B.A.M. Requirements
(56 credits)

Code	Title	Credits
Choirs		
CR 109	Chapel Choir (2 terms)	2
CR 209	Schola Cantorum (2 terms)	2
CR 509	Symphonic Choir (4 terms)	4
Applied Music and Diction		
Choose one primary from Organ, Piano or Voice.		
OR 168A	Applied Organ (Complete each semester for a total of 8 semesters) [1]	16
or PI 168A	Applied Piano	
or VC 168A	Applied Voice	
Piano or Voice secondary (4 terms)		**4**
PI 103	Piano Secondary I	
or PI 104	Piano Secondary II	
VC 103	Voice Secondary	
VC 115	English & Italian Diction [2]	2
VC 116	French & German Diction [2]	2
Theory and Music History		
TH 141	Musicianship I	4
TH 142	Musicianship II	4
TH 241	Musicianship III	4
MH 247	Music Historiography I	3
MH 248	Music Historiography II	3
MH 433	Seminar in Music History	3
TH 342	Contemporary Trends	3
or MH 345	Music Since 1900	
Total Credits		**56**

[1] The 8th semester may be waived in the event of an approved internship or off-site semester of study. Internship credits replace Arts and Sciences elective credits. A recital or lecture-recital is required.

[2] VC 115 and VC 116 are required for voice primary students only. Organ and piano primary students may substitute four additional credits of free electives.

Concentrations

(9-10 credits)

Code	Title	Credits
Select one of the following concentrations: [1]		**9-10**
Composition Studies Concentration		
TH 237	Composition Class	
Select two additional Theory (TH) courses from the following:		
TH 253	Orchestration	
or TH 255	Song Writing	
or TH 259	Electroacoustic Music	
or TH 424	Choral and Instrumental Arranging	
Music Education Concentration		
ME 161	Art of Teaching Music I	
Select 6 credits from the following courses:		
ME 187	Instrumental Music: Strings	
ME 188	Instrumental Music: Winds/Percussion	
ME 262	Art of Teaching Music II	
ME 471	Music and Hip Hop Culture	
ME 472	Teaching/Learning:Urban Schools	
ME 587	Music in Special Education	
Music History Concentration		
MH 345	Music Since 1900 [2]	
Select two additional Music History (MH) elective courses.		
Music Theory Concentration		
TH 342	Contemporary Trends [3]	
Select two additional Theory (TH) electives, one of which must be a Level II elective.		
Piano Accompanying Concentration		
Note: Students in this concentration must be Piano Primary.		
PI 413	Accompanying Class	
PI 512	Chamber Music	
VC 433	Song Literature I	
or VC 434	Song Literature II	
Select two of the following:		
VC 118	Italian Diction	
VC 119	French Diction	
VC 120	German Diction	
Piano Studies Concentration		
Note: Students in this concentration must be Piano Primary or approved by the department.		
PI 297	Fund of Piano Pedagogy I	
PI 435	Survey of Piano Literature I	
or PI 436	Survey of Piano Literature II	
Select one of the following:		
PI 298	Fund of Piano Pedagogy II	
PI 540	Keyboard Skills	
Sacred Music Concentration		
SM 121	Survey of Sacred Music Lit	
SM 122	Worship and Theology	
SM 541	Conducting Church Choirs: Pedagogy & Management	
Voice Studies Concentration		
Note: Students in this concentration must be Voice Primary.		
VC 433	Song Literature I	
VC 434	Song Literature II	
VC 408	Voice Science	
VC 118	Italian Diction	
or VC 119	French Diction	
or VC 120	German Diction	

[1] Students may choose a minor in place of a concentration.

[2] If MH 345 is selected as part of the core requirement, students must take TH 342 in place of MH 345 as part of their concentration.

[3] If TH 342 is selected as part of the core requirement, students must take MH 345 in place of TH 342 as part of their concentration.

CAS General Education Curriculum

(43-50 credits)

Code	Title	Credits
I. ESSENTIAL COMPETENCIES:		
Reading and Writing:		**6**
CMP 120	Seminar in Writing and Rhetoric

Select one of the following:		
CMP 125	Seminar in Writing and Research	
or BHP 150	Honors Seminar: Great Ideas II	
CMP 203	Literature and Composition	
Mathematical Reasoning: [1]		**3-4**
MTH 102	Finite Mathematics [6]	
MTH 105	Algebra and Trigonometry	
or MTH 106	Precalculus	
Foreign Language Proficiency: [2]		**3-6**
Select one language path below:		
Chinese		
Select one or two CHI courses below, depending on placement testing:		
CHI 100	Chinese I	
CHI 101	Chinese II	
CHI 200	Chinese III	
CHI 201	Chinese IV	
Or select one CHI 300-400 level course taught in the Chinese language		
French		

Select one or two FRE courses below, depending on placement testing:	
FRE 100	French I
FRE 101	French II
FRE 200	French III
FRE 201	French IV
Or select one FRE 300-400 level course taught in the French language	
German	
Select one or two GER courses below, depending on placement testing:	
GER 100	German I
GER 101	German II
GER 200	German III
GER 201	German IV
Italian	
Select one or two ITA courses below, depending on placement testing:	
ITA 100	Italian I
ITA 101	Italian II
ITA 200	Italian III
ITA 201	Italian IV
Spanish	
Select one or two SPA courses below, depending on placement testing:	
SPA 100	Spanish I
SPA 101	Spanish II [5]
or SPA 102	Elementary Spanish II Abroad
or SPA 103	Introductory Medical Spanish
SPA 200	Spanish III
SPA 201	Spanish IV
Or select one SPA 300-400 level course taught in the Spanish language	
Oral Communication	**3**
COM 104	Speech Communication
II. DISCIPLINARY PERSPECTIVES	
Scientific Perspectives: [3]	**4-6**
To fulfill the Scientific Perspectives requirement, students may take either a lecture/lab combination (4 credits) or two 3-credit non-lab courses (6 credits). Students who have taken a PSY course to fulfill the Social Perspectives requirement may not take a PSY course to fulfill the Scientific Perspective requirement.	
A. Lecture/Lab Combination Course	
CHE 114 & 114L	Chemistry in the Kitchen and Chemistry in the Kitchen Lab
ENV 100 & 100L	Introduction to Environmental Sciences and Introduction to Environmental Sciences Lab
GEO 100 & GEO 102	Earth Systems Science and Earth Materials and Processes Lab
MAR 120 & MAR 121	Oceanography and Introductory Oceanography Lab
SUS 100 & 100L	Introduction to Sustainability Studies and Intro to Sustainability Lab
B. 3-Credit Non-Lab Courses:	
BHP 240	Chemistry and Conflict [3]
BHP 251	Idea to Innovation [3]
BHP 259	Honors Seminar: The Environment: a Conflict of Interest [3]
BHP 281	The Rhetoric of Science [3]
BHP 340	Nature and Nurture [3]
BIO 100	Life Science [3]
BNS 107	Life Science: Brain and Behavior
CHE 115	Chemistry & Society
CSC 105	Fundamentals of Computer Science
ENV 110	Future of Natural Resources
ENV 120	Introduction to Climate Change
GEO 100	Earth Systems Science
GEO 110	Geology of National Parks
GEO 113	Environmental Geology
GEO 168	Mesozoic Ruling Reptiles
MAR 120	Oceanography
PHY 180	Astronomy
PSY 131	The Science of Mental Illness
SOC 150	Introduction to Forensics
Social Perspectives:	**6**
Select two of the following. The two courses selected in this category cannot be from the same academic discipline. Students who have taken a PSY course to fulfill the Scientific Perspectives requirement may not take a PSY course to fulfill the Social Perspectives requirement.	
BHP 203	Nineteen Eighty-Four in Context: George Orwell's Enduring Legacy [3]
BHP 205	Under the Influence: Drugs, Deviance, and Culture [3]
BHP 206	Honors Seminar:Politics/Literacy [3]
BHP 212	Children and the Media [3]
BHP 252	Creativity and Design Thinking [3]
BHP 253	A Cross-Cultural Comparison of Play [3]
BHP 259	Honors Seminar: The Environment: a Conflict of Interest [3]
BHP 261	The Online Explosion: Radical Changes in Business and Communication [3]
BHP 281	The Rhetoric of Science [3]
BHP 301	The Law and Racial Progress [3]
BHP 302	Mirrors of the Mind: The Interplay of Literature and Psychology [3]
BHP 315	Honors Seminar: 20th Century European Ideologies [3]

Total Credits	**43-50**

1 Students enrolled in MTH 102 (http://catalog.rider.edu/search/?P=MTH%20102) will be given a brief test, prepared by the Department of Mathematics, during the first five business days of the semester. Those placing below a minimum score set by the Department of Mathematics on the test will be required to participate in one hour of structured tutoring once per week concurrent with taking MTH 102 (http://catalog.rider.edu/search/?P=MTH%20102). All others enrolled in the class are strongly encouraged to participate in available tutoring.

2 Students who place at the 101-level or above are required to take a minimum of 3 credits at the level of placement. Students who are native speakers of languages not offered at Rider University may have their requirement waived upon documentation of proficiency. This documentation could be in the form of a transcript on letterhead sent by the accredited institution abroad, or fee-based proficiency tests. To initiate a request for a waiver, students should see the chairperson of the Department of Languages, Literatures, and Cultures (https://www.rider.edu/academics/colleges-schools/claes/liberal-arts-programs/foreign-language-literatures/). Students beginning a new language must complete the language placement form (https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/departments/languages-literatures-cultures/placement-testing/foreign-language-placement-form/) and are not required to take a placement test. Once completing the form, they will have met the prerequisites to register for CHI, FRE, GER, ITA, or SPA 100.

3 Due to the interdisciplinary nature of BHP classes, upper-level seminars may satisfy two different categories from the Disciplinary Perspectives. For courses that satisfy more than one DP category, BHP students must select which general education requirement they would like the course to fulfill.

Certificate in Music Composition Studies (9 credits)

The Certificate in Music Composition Studies is intended for any Rider undergraduate student who is not in the B.A.M. degree but who has an interest in composition, arranging, and orchestration.

Code	Title	Credits
Required course:		
TH 237	Composition Class	3
Select two of the following:		**6**
TH 253	Orchestration	
TH 255	Song Writing	
TH 259	Electroacoustic Music	
TH 424	Choral and Instrumental Arranging	
Total Credits		**9**

Note: Elective composition lessons are optional and are available for an additional fee.

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

	Total Credit Hours for Graduation	**120**

[1] VC 115 and VC 116 are required for Voice primary students only. Organ and piano primary students may substitute cour additional credits of free electives.

Courses and Descriptions

CR 109 Chapel Choir 1 Credits
Comprised of undergraduate students in their first year of study, Chapel Choir focuses on music for men's, women's, and mixed chorus. The ensemble provides the fundamentals of artistic choral ensemble singing and a foundation for all Westminster choral ensembles. Placement hearing required.

CR 209 Schola Cantorum 1 Credits
Comprised of undergraduate students in their second year of study, Schola Cantorum focuses on music for mixed chorus and continues to build and refine the skills developed in Chapel Choir. This ensemble presents campus, community, and regional performances. Placement hearing required.

CR 509 Symphonic Choir 1 Credits
A large mixed chorus comprised of students above the lower division, including graduate students from all disciplines. The ensemble regularly performs in the region and focuses on the major choral/orchestral repertoire along with a wide variety of repertoire for large mixed chorus. Placement hearing required.

ME 161 Art of Teaching Music I 3 Credits
Art of Teaching Music I (ATM I) is first in the sequence of Music Education courses designed to prepare undergraduate Music Education major students for their student teaching experience and completion of their teaching licensure. There will be field observations of master teachers under the aegis of a music education faculty that will allow students not only to observe, but to have guided experience in assessing how teaching and learning are experienced in real classrooms. Partnerships between local expert teachers and music education faculty will allow students to complete field observations as well as guided experience in teaching and assessing students in real classrooms.

ME 187 Instrumental Music: Strings 1 Credits
This course is designed as an introduction to the pedagogy of string instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring, and idiomatic writing are investigated. When available, instruments may be rented from the college. Rental fee, per instrument: $25.

ME 188 Instrumental Music: Winds/Percussion 2 Credits
This course is designed as an introduction to the pedagogy of brass, woodwind, and percussion instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring and idiomatic writing are investigated. When available, instruments may be rented from the college. Students must provide their own drum pads and sticks. Rental fee, per instrument: $60.

ME 262 Art of Teaching Music II 4 Credits
Art of Teaching Music II (ATM II) is designed to build on the knowledge, skills, and dispositions, introduced in ATM I. Students will expand their abilities in the domains of planning, teaching, assessing, reflecting, developing musicianship, and philosophy in context of teaching geneal music. Moreover, they will have the opportunity to put these abilities into practice when teaching peers and teaching elementary and middle general school students.
Prerequisite(s): ME 161.

ME 471 Music and Hip Hop Culture 3 Credits
Hip Hop in the United States is arguably the most lucrative, popular, and culturally challenging contemporary musical force. The narratives of Hip Hop go beyond the boundaries of race and class as well as those of music, poetry and dance. As such, Hip Hop is a phenomenon that presents problems as well as great possibilities. This course explores them from the standpoint of educational sociology, looking at their implications for music in schools as well as in daily life.

ME 472 Teaching/Learning:Urban Schools 3 Credits
This course offers students theoretical and practical insight into teaching in urban schools. The class will present an analysis and practical implications for what is needed in order to successfully engage in teaching in urban centers in the United States. Students will balance field experiences with critical analyses of issues such as multicultural teaching, race, class, and economics in urban schools as well as their curricular and pedagogical implications.
Prerequisite(s): ME 581, ME 582.

ME 587 Music in Special Education 1 Credits
This course is designed to acquaint the pre-service teacher with the special needs of exceptional children in music classes. Students learn to adapt instruction to accommodate a variety of exceptionalities that are both physical and emotional. Content includes categories of special students, characteristic behaviors, mainstreaming, and classroom methodology. Course content, activities and experiences in this course cover New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. It is recommended that students take this course before the student teaching semester. Restricted to Seniors only.

MH 247 Music Historiography I 3 Credits
Historiography I begins by exploring similarities and differences between various music cultures around the world, and continues with an examination of selected genres of Western Art Music of the Medieval, Renaissance and Baroque periods. Basic information literacy skills, such as searching library catalogs, databases and reading academic articles also will be covered.
Prerequisite(s): CMP 125.

MH 248 Music Historiography II 3 Credits
Examines Western Art Music since 1750 and includes a research assignment that builds upon the information literacy skills gained in MH 247.
Prerequisite(s): MH 247.

MH 345 Music Since 1900 3 Credits
Examines controversies and aesthetic movements in 20th and 21st century music. Emphasis is placed upon critical reading and writing skills.
Prerequisite(s): MH 248.

MH 433 Seminar in Music History 3 Credits
The contents of courses carrying this number will vary with the special interests and qualifications of the instructors teaching them. Possible topics include period courses, courses from a distinct perspective, composer courses and genre courses.
Prerequisite(s): MH 248.

OR 168A Applied Organ 2 Credits
One-hour, 2-credit required lesson. Included in tuition – no extra charge.

PI 103 Piano Secondary I 1 Credits
Establishes a solid foundation of piano playing through integration of musicianship skills in addition to building facile digital independence and bilateral hand coordination. Minimum grade of "B-" required to pass the course.
Prerequisite(s): Grade of "Y" in PI 045 or placement.

PI 104 Piano Secondary II 1 Credits
Continuation of PI 103; appropriate for the advanced beginner. Minimum grade of "B-" required to pass the course.
Prerequisite(s): PI 103 or placement.

PI 168A Applied Piano 2 Credits
One-hour, 2-credit required lesson. Included in tuition – no extra charge.

PI 297 Fund of Piano Pedagogy I 3 Credits
Fundamentals I is devoted to study of techniques, methods, and materials suitable for beginning through early intermediate level students. Other areas of study include motivational strategies, establishment of effective practice habits, recital preparation, technique, and elementary duet materials. Students analyze and demonstrate teaching from three different beginning piano methods. Observation of professional teaching is done in the context of class and private lessons at the Westminster Conservatory.

PI 298 Fund of Piano Pedagogy II 3 Credits
In Fundamentals II, students continue to apply their experience with piano methods to the teaching of students. In addition, the semester is devoted to the study of materials from all style periods for upper elementary and intermediate level students. Students observe private and group lessons appropriate to these levels. The course culminates in an individual lecture recital demonstrating music from a variety of style periods.
Prerequisite(s): PI 297.

PI 413 Accompanying Class 2 Credits
This course is designed with the twofold purpose of allowing undergraduate pianists to fulfill their piano ensemble elective requirement within the professional studies area as well as providing an opportunity for voice primary students to further their piano study in a challenging forum in situations directly related to their repertoire. The students in the class will receive instruction in the stylistic, technical, analytical and linguistic aspects of vocal literature. The many issues involved in vocal collaboration will be discussed along with in-depth study of the pianist's role in musical partnerships. Issues of musical freedom, language, and the varieties of sonic treatment unique to vocal literature will be discussed. Italian, French, German and English song repertoire from various style periods will provide the assignments for performance and discussion.

PI 435 Survey of Piano Literature I 3 Credits
A study of representative works from 1650-1800 by composers including J. S. Bach, C.P.E. Bach, J.C. Bach, Haydn, Mozart, and Beethoven.
Prerequisite(s): MH 248.

PI 436 Survey of Piano Literature II 3 Credits
A study of representative works from 1800 to the present by composers including Beethoven, Schubert, Mendelssohn, Schumann, Chopin, Liszt, Brahms, Debussy, Ravel, Prokofiev, and Bartók.
Prerequisite(s): MH 248.

PI 512 Chamber Music 2 Credits
Emphasis is placed upon rehearsal and performances of representative collaborative literature for strings and piano, and woodwinds and piano. Students will be assigned movements from major chamber works selected from different style periods. Professional instrumentalists will join them for rehearsals and performances in class. An overview of the development of this repertoire will be presented and listening assignments will augment the study of specific works. A project involving the study and presentation of a piano quartet or piano quintet will be included. Attendance at three concerts of instrumental chamber music is required. Permission of applied teacher and instructor is required.

PI 540 Keyboard Skills 3 Credits
The course includes in-depth study of numerous aspects of musicianship skills essential for all pianists within the broader categories of technique and practice strategies; memorization and sight reading; improvisation and lead sheet realization. All aspects of piano musicianship skills will be addressed from practical, pedagogical, and collaborative points of view. Assignments will include examples of studies from a wide range of levels all within the current and developing skill level of each student enrolled in the class.
Prerequisite(s): UG - Eight credits of applied keyboard study or permission of keyboard instructor or course instructor. GR - Permission of course instructor.

SM 121 Survey of Sacred Music Lit 3 Credits
Broad survey of Christian music. Through standard repertoire, major historical genres of sacred music are explored from biblical roots in the Old and New Testament to the postmodern expressions of our time.

SM 122 Worship and Theology 3 Credits
A study of the content, theology, and history of the Old and New Testament narratives that the church recounts and celebrates in its liturgical year.

SM 541 Conducting Church Choirs: Pedagogy & Management 3 Credits
A practical course devoted to the building and maintenance of church music programs serving persons of all ages.

TH 141 Musicianship I 4 Credits
This course assists students in learning and integrating aural, performance, analytical and composition skills involving diatonic melody and harmony. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade.
Prerequisite(s): TH 045 or passing a placement test.

TH 142 Musicianship II 4 Credits
A continuation of TH 141 involving chromatic melody and harmony with an introduction to binary and ternary form.
Prerequisite(s): minimum "C-" grade in TH 141.

TH 237 Composition Class 3 Credits
Class instruction in original composition. May be taken as a level I elective.
Prerequisite(s): For non Theory/Composition majors only, minimum "C-" grade in TH 142.

TH 241 Musicianship III 4 Credits
A continuation of TH 142 with an introduction to larger musical forms and counterpoint.
Prerequisite(s): minimum "C-" grade in TH 142.

TH 253 Orchestration 3 Credits
A study of the orchestra and its individual instruments from the standpoints of the composer, arranger and conductor. May be taken as a level I theory elective.
Prerequisite(s): minimum "C-" grade in TH 142.

TH 255 Song Writing 3 Credits
Solo vocal composition in various styles. May be taken as a level I theory elective.
Prerequisite(s): minimum "C-" grade in TH 142.

TH 259 Electroacoustic Music 3 Credits
An introduction to the history and literature of electroacoustic music emphasizing hands-on creative opportunities in sequencing and digital sound processing. May be taken as a level I theory elective.
Prerequisite(s): minimum "C-" grade in TH 142.

TH 342 Contemporary Trends 3 Credits
An analytical study of the compositional techniques of the 20th and 21st centuries.
Prerequisite(s): TH 241.

TH 424 Choral and Instrumental Arranging 3 Credits
Arranging for various ensembles of voices and instruments. May be taken as a level II theory elective.
Prerequisite(s): TH 241.

VC 103 Voice Secondary 1 Credits

VC 168A Applied Voice 2 Credits
One-hour, 2-credit required lesson. Included in tuition – no extra charge.

VC 115 English & Italian Diction 2 Credits
Introduction to the rules of singing English and Italian through the use of the International Phonetic Alphabet (IPA) with oral and written drill.

VC 116 French & German Diction 2 Credits
Introduction to the rules of singing French and German through the use of the International Phonetic Alphabet (IPA) with oral and written drill.
Prerequisite(s): VC 115.

VC 118 Italian Diction 2 Credits
Introduction to the rules for singing Italian through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.
Prerequisite(s): VC 114.

VC 119 French Diction 2 Credits
Introduction to the rules for singing French through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.
Prerequisite(s): VC 114.

VC 120 German Diction 2 Credits
Introduction to the rules for singing German through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.
Prerequisite(s): VC 114.

VC 408 Voice Science 3 Credits
Study of the physics and physiology of voice production. Musical and vocal acoustics are explored using the facilities of the Westminster Voice Laboratory. Anatomic and physiologic underpinnings of respiration, phonation, articulation, registration and hearing are explored in depth.

VC 433 Song Literature I 2 Credits
A survey of solo literature for voice and accompanying instrument including solo vocal music of the Baroque period and German lieder.
Prerequisite(s): MH 248.

VC 434 Song Literature II 2 Credits
A survey of solo literature for voice and accompanying instrument including French mélodie, songs by nationalist composers, English and American song.
Prerequisite(s): MH 248.

Music Education

Program Overview

The undergraduate Music Education degree normally takes four years to complete and includes courses in music education, musicianship studies, general education, and field experiences. Each year students engage in increasingly intensive field experiences, culminating with a semester of full-time student teaching in the last year.

All music education majors must maintain a portfolio of work providing evidence of their suitability for teaching. Portfolios are reviewed as part of the Sophomore Review taken near the completion of 60 credits. Music Education majors must maintain a minimum cumulative grade point average of 3.0. Students whose general progress is unsatisfactory or whose cumulative grade point average falls below a minimum 3.0 level may be dropped from the Music Education major. If a student is dropped from the major because of failure to maintain the minimum grade point average, s/he may apply for readmission to the Music Education department. Readmission will be dependent upon various criteria, including the G.P.A., current academic progress and the student's general standing. Decisions regarding retention or appeals will be made in a manner consistent with state and institutional non-discrimination policies.

At the time of the sophomore portfolio, students with a high GPA and excellent writing skills may be invited into the 4+1 Bachelor of Music/ Master of Music Education program. As part of this dual enrollment program, students can take master's level courses during their junior and senior years that can be applied toward their Master of Music Education degree. Many students can complete the MME degree in one additional year of study. Summer study and/or J-Term study may also be necessary. Students in this program are required to maintain a GPA of 3.0 or above and are provided a fifth year of funding equal to their undergraduate financial package.

To graduate, students must complete all requirements for New Jersey teacher certification for Certified Educator with Advanced Standing (CEAS). **Students who want to be able to apply for teaching positions in other states should become familiar with teacher certification requirements for states of interest ASAP to determine if additional coursework is needed.** In addition to successfully completing required coursework, the State of New Jersey requires students to:

1. Satisfy basic skills (reading, writing, math) proficiency as a prerequisite for taking the Sophomore Review. Proficiency is satisfied for students who score at or above the identified cut scores on the SAT or ACT. Students who do not have sufficient SAT or ACT test scores must pass the Praxis Core Academic Skills (https://praxis.ets.org/state-requirements/newjersey-tests.html) tests to satisfy basic skills proficiency.

2. Complete a minimum of 50 hours of clinical experience during the first four semesters and 175 hours of clinical practice before full-time clinical practice (student teaching).

3. Pass the Praxis Music Content Exam.

4. Pass the performance-based edTPA Exam.

For more information about non-course program requirements, see links on Undergraduate Music Education Homepage. (https://www.rider.edu/

academics/colleges-schools/college-arts-sciences/westminster-choir-college/undergraduate/music-education/)

Curriculum Overview

The Music Education curriculum includes courses in elementary and secondary general music education, choral music education, instrumental studies, music technology and creativity, and students with special needs. An innovative four-course sequence integrates theoretical foundations of planning, teaching, assessing, and musicianship development with practical application through peer teaching and field-based music teaching. The undergraduate Music Education curriculum is intended to develop teachers who are reflective, who acknowledge the connections music has to the child's world and who seek to promote an understanding of those connections in a social context.

Music Education Portfolios

All Music Education majors must maintain portfolios of work providing evidence of their suitability for teaching. Portfolios of undergraduates are reviewed by the department with students when they have earned at least 60 credits as well as upon completion of ME 492. Students must pass the portfolio review to continue in the department. Portfolios of graduate students are reviewed each year.

Student Teaching

Student teaching is a full semester in duration and is usually completed during the seventh or eighth semester of study. Students may not enroll for any applied or classroom courses during the semester of student teaching, except for ME 587. In addition, students may not present or participate in recitals or choral performances or ensembles during the semester of student teaching. Further departmental policies regarding the student teaching semester are contained in the Music Education Department Handbook. Students are referred to the paragraph above which relates to registering for the student teaching semester.

Practicums and Field-based Observations

In addition to the standard student teaching semester in the senior year, a special feature of the Westminster Choir College program is the experience of observation and teaching in the context of the Art of Teaching Music courses ME 161, ME 262, ME 563, and ME 563. These combine instruction in music methods with practical experience in public school contexts. Several music education courses require students to make observations of music classes in urban, suburban, public and/or private schools.

Students must be prepared to arrange for transportation to and from practicums at a reasonable distance from the college and to sustain related expenses.

Students will be required to obtain a background clearance in an assigned school district in order to participate in a field experience. Students who have been convicted of a felony may not be approved for field experiences, and are not able to receive New Jersey State Teacher Licensure.

Degrees Offered

- B.M. in Music Education
- Dual Degree Program: B.M. in Music Education/Master of Music Education
- Certificate in Music Education

Music Education Requirements		
Code	**Title**	**Credits**
Complete the following courses:		
Choirs and Conducting		
CR 109	Chapel Choir (2 terms)	2
CR 209	Schola Cantorum (2 terms)	2
CR 509	Symphonic Choir (3 terms)	3
CR 215	Fundamentals of Conducting	3
CR 315	Techniques of Conducting	3
Applied Music and Diction		
VC 115	English & Italian Diction	2
VC 116	French & German Diction	2
Select one of the following concentrations:		14
Organ Concentration (7 terms)		
OR 168A	Applied Organ	
Piano Concentration (7 terms)		
PI 168A	Applied Piano	
Voice Concentration (7 terms)		
VC 168A	Applied Voice	
Voice or Piano secondary (4 terms)		**4**
Option 1: for Organ and Piano Primaries (two semesters of each)		

VC 103 & VC 203	Voice Secondary and Voice Secondary	
Option 2: for Voice Primary		
PI 103 & PI 104 & PI 203 & PI 204	Piano Secondary I and Piano Secondary II and Piano Secondary III and Piano Secondary for Mus Ed & Sacred Music	
Theory and Music History		
TH 141 & TH 142 & TH 241	Musicianship I and Musicianship II and Musicianship III	12
MH 247 & MH 248	Music Historiography I and Music Historiography II	6
TH 342	Contemporary Trends	3
MH 345	Music Since 1900	3
Music History (MH) elective		
MH 433	Seminar in Music History	3
Theory (TH) level I elective		**3**
Select one of the following:		
TH 237	Composition Class	
TH 251	Analytical Studies I	
TH 253	Orchestration	
TH 255	Song Writing	
TH 259	Electroacoustic Music	
Theory (TH) level II elective		**3**
Select one of the following:		
TH 424	Choral and Instrumental Arranging	
TH 431	Form and Analysis	
TH 432	Contrapuntal Techniques	
TH 433	Special Topics in Theory	
TH 452	Analytical Studies II	
TH 550	Keyboard Harmony	
Professional Studies		
Complete all of the following courses:		
ME 111	Music Education Lab (7 terms)	0
ME 161	Art of Teaching Music I	3
ME 187	Instrumental Music: Strings	1
ME 188	Instrumental Music: Winds/Percussion	2
ME 262	Art of Teaching Music II	4
ME 492	Student Teaching	12
ME 563	Art of Teaching Music III	4
ME 564	Art of Teaching Music IV	4
ME 587	Music in Special Education	1
ME 592	Creativity & Music Technology	2
PSY 100	Introduction to Psychology	3
PSY 230 or PSY 231	Child Development Youth and Adolescent Development	3
Free electives		3
Total Credits		**110**

Notes

1. VC 115 and VC 116 are required for voice primary students only. Organ and piano primary students may substitute four additional credits of free electives for these two courses.
2. Students must successfully complete a portfolio review during the semester in which they will earn 58-60 credits in order to continue as music education majors. Transfer students with sophomore status must successfully complete the portfolio review at the end of the first year of study.

CAS General Education Curriculum

Code	Title	Credits
General Education Requirements		
Reading and Writing		**6**
CMP 120 or BHP 100	Seminar in Writing and Rhetoric Honors Seminar: Great Ideas I	
Select one of the following:		
CMP 125 or BHP 150	Seminar in Writing and Research Honors Seminar: Great Ideas II	
CMP 203	Literature and Composition	
Mathematical Reasoning [1]		**3-4**
Select one of the following:		
MTH 102	Finite Mathematics	
MTH 105 or MTH 106	Algebra and Trigonometry Precalculus	
Scientific Perspectives: [2]		**3-4**
To fulfill the Scientific Perspectives requirement, students may select either a lecture/lab combination (4 credits) or one 3-credit non-lab course (3 credits). Students who have taken a PSY course to fulfill the Social Perspectives requirement may not take a PSY course to fulfill the Scientific Perspective requirement.		
A. Lecture/Lab Combination Courses		
CHE 114 & 114L	Chemistry in the Kitchen and Chemistry in the Kitchen Lab	
ENV 100 & 100L	Introduction to Environmental Sciences and Introduction to Environmental Sciences Lab	
GEO 100 & GEO 102	Earth Systems Science and Earth Materials and Processes Lab	
MAR 120 & MAR 121	Oceanography and Introductory Oceanography Lab	
SUS 100 & 100L	Introduction to Sustainability Studies and Intro to Sustainability Lab	
B. 3-Credit Non-Lab Courses:		
BHP 240	Chemistry and Conflict [3]	
BHP 251	Idea to Innovation [3]	
BHP 259	Honors Seminar: The Environment: a Conflict of Interest [3]	
BHP 281	The Rhetoric of Science [3]	
BHP 340	Nature and Nurture [3]	
BIO 100	Life Science	
BNS 107	Life Science: Brain and Behavior	
CHE 115	Chemistry & Society	
CSC 105	Fundamentals of Computer Science	
ENV 110	Future of Natural Resources	

ENV 120	Introduction to Climate Change
GEO 100	Earth Systems Science
GEO 110	Geology of National Parks
GEO 113	Environmental Geology
GEO 168	Mesozoic Ruling Reptiles
MAR 120	Oceanography
PHY 180	Astronomy
PSY 131	The Science of Mental Illness
SOC 150	Introduction to Forensics

Social Perspectives (select one course) **3**

Students who have taken a PSY course to fulfill the Scientific Perspectives requirement may not take a PSY course to fulfill the Social Perspectives requirement.

BHP 203	Nineteen Eighty-Four in Context: George Orwell's Enduring Legacy [3]
BHP 205	Under the Influence: Drugs, Deviance, and Culture [3]
BHP 206	Honors Seminar:Politics/Literacy [3]
BHP 212	Children and the Media [3]
BHP 252	Creativity and Design Thinking [3]
BHP 253	A Cross-Cultural Comparison of Play [3]
BHP 259	Honors Seminar: The Environment: a Conflict of Interest [3]
BHP 261	The Online Explosion: Radical Changes in Business and Communication [3]
BHP 281	The Rhetoric of Science [3]
BHP 301	The Law and Racial Progress [3]
BHP 302	Mirrors of the Mind: The Interplay of Literature and Psychology [3]
BHP 315	Honors Seminar: 20th Century European Ideologies [3]
BHP 316	Modern European Ideologies: Social and Political Perspectives
BHP 340	Nature and Nurture [3]
BHP 351	Genocide, Human Rights & Literature
BHP 360	Moral Psychology [3]
COM 105	Communication, Culture and Media
FTV 202	Global Film & Media Industries
GSS 100	Introduction to Gender Studies
GSS 212	Gender, War and Peace
MCS 110/GSS 110	Race, Class and Gender in Contemporary American Society
MCS 210	Power and Privilege in a Multicultural Society
POL 100	U.S. Politics in Crisis
POL 102	Power, Politics and Justice
PSY 102	Explorations in Psychology Honors [2]
PSY 110	Psychology:The Science of Well-being [2]
PSY 117	Psychology of Creativity [2]
PSY 118	Psychology of Women [2]
SOC 101	Sociological Imagination
SOC 110	Cultural Anthropology
SOC 280	Social Movements Abroad

Historical Perspectives: **3**

Select one of the following:

HIS 150	Pre-Modern World: Evolution to Revolution
HIS 151	World in the Modern Era: Exploration to Globalization
or HIS 152	Contemporary World: Historical Perspectives
or HIS 153	Cold War: A Global History

Select one course from the Aesthetic Literature or Philosophical Perspective **3**

Aesthetic Perspectives: Literature

AMS 210	American Memoir and Autobiography
AMS 306	Poetry and Poetics in American Culture

PHL 336	Philosophy of Mind
PHL 343	Theories of Reality
PHL 348	Indian Philosophy
PHL 358	Chinese Philosophy
PHL 360	Contemporary Ethics
PHL 368	Japanese Philosophy
Total Credits	**21-23**

[1] Appropriate mathematics and science courses may be substituted if required by the major. Students may also fulfill this requirement by taking an upper-level MTH course (e.g., MTH 210 (http://catalog.rider.edu/search/?P=MTH%20210), MTH 211 (http://catalog.rider.edu/search/?P=MTH%20211)).

[2] Students who choose a Psychology (PSY) course to fulfill a requirement for Scientific Perspectives may not choose a Psychology (PSY) course to fulfill a requirement for Social Perspectives, and vice versa.

[3] Due to the interdisciplinary nature of BHP classes, upper-level seminars may satisfy two different categories for the Disciplinary Perspectives. For courses that satisfy more than one DP category, BHP students much choose which general education requirement they would like the course to fulfill.

Certificate in Music Education

(9 credits)

The certificate in Music Education is intended for undergraduate students in other degree programs, both within or outside of Westminster Choir College. Students who have an interest in teaching music or intend to teach music as part of their future careers as performers, church musicians, elementary educators, etc. will be provided with the foundational knowledge needed to pursue their chosen path. This certificate is not intended for students who will teach full-time in a public school. This certificate does not lead to any state teaching certification.

Code	Title	Credits
Required course:		
ME 161	Art of Teaching Music I	3

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from their academic advisor, will develop a personalized educational plan.

Courses and Descriptions

CR 109 Chapel Choir 1 Credits
Comprised of undergraduate students in their first year of study, Chapel Choir focuses on music for men's, women's, and mixed chorus. The ensemble provides the fundamentals of artistic choral ensemble singing and a foundation for all Westminster choral ensembles. Placement hearing required.

CR 209 Schola Cantorum 1 Credits
Comprised of undergraduate students in their second year of study, Schola Cantorum focuses on music for mixed chorus and continues to build and refine the skills developed in Chapel Choir. This ensemble presents campus, community, and regional performances. Placement hearing required.

CR 215 Fundamentals of Conducting 3 Credits
This course provides the foundation of conducting technique and philosophy as it relates to choral ensemble. Primarily, it deals with the development of basic pedagogical proficiencies, specifically alignment, Laban gestural vocabulary, breathing, beat patterns, consistent tempo, and the development of expressive gesture for relaying various styles of music, i.e., legato, staccato and marcato. Basic philosophical understandings concerning the human aspects of the music making process and the role the conductor plays in that process also are emphasized. Specific techniques for dealing with technical elements, e.g., fermata, dynamics, changes of tempo, contrasts in style, also are covered. The overall focus of the course is to establish the important relationship between ear, body, and the choral sound.
Prerequisite(s): TH 141.

CR 315 Techniques of Conducting 3 Credits
Continued development of conducting technique with emphasis on more complex styles and patterns, and on communication through appropriate gestures. Further improvement in conducting various dynamics and articulations, as well as more effective use of the left hand. Rehearsal procedures, repertoire programming, score preparation, and baton techniques are incorporated into the course.
Prerequisite(s): CR 215.

CR 509 Symphonic Choir 1 Credits
A large mixed chorus comprised of students above the lower division, including graduate students from all disciplines. The ensemble regularly performs in the region and focuses on the major choral/orchestral repertoire along with a wide variety of repertoire for large mixed chorus. Placement hearing required.

ME 111 Music Education Lab 0 Credits
Undergraduates must meet the weekly attendance and participation requirement for Music Education Lab during every semester of enrollment up to seven semester as an undergraduate Music Education major except for the student teaching semester. Grading is “P” (satisfactory) or “U” (unsatisfactory). As part of the Music Education Lab experience, students are required to complete 15 hours of professional development.

ME 161 Art of Teaching Music I 3 Credits
Art of Teaching Music I (ATM I) is first in the sequence of Music Education courses designed to prepare undergraduate Music Education major students for their student teaching experience and completion of their teaching licensure. There will be field observations of master teachers under the aegis of a music education faculty that will allow students not only to observe, but to have guided experience in assessing how teaching and learning are experienced in real classrooms. Partnerships between local expert teachers and music education faculty will allow students to complete field observations as well as guided experience in teaching and assessing students in real classrooms.

ME 187 Instrumental Music: Strings 1 Credits
This course is designed as an introduction to the pedagogy of string instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring, and idiomatic writing are investigated. When available, instruments may be rented from the college. Rental fee, per instrument: $25.

ME 188 Instrumental Music: Winds/Percussion 2 Credits
This course is designed as an introduction to the pedagogy of brass, woodwind, and percussion instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring and idiomatic writing are investigated. When available, instruments may be rented from the college. Students must provide their own drum pads and sticks. Rental fee, per instrument: $60.

ME 262 Art of Teaching Music II 4 Credits
Art of Teaching Music II (ATM II) is designed to build on the knowledge, skills, and dispositions, introduced in ATM I. Students will expand their abilities in the domains of planning, teaching, assessing, reflecting, developing musicianship, and philosophy in context of teaching geneal music. Moreover, they will have the opportunity to put these abilities into practice when teaching peers and teaching elementary and middle general school students.
Prerequisite(s): ME 161.

ME 492 Student Teaching 12 Credits
A full semester internship in directed full-time teaching supervised by department members and carried out in schools with approved cooperating teachers. In addition to the field experience, students attend a weekly seminar on campus to discuss current issues in music education as they relate to individual teaching situations. Students discuss classroom management strategies, action research, authentic instruction, critical thinking, feeling and action as well as teaching to focused questions, concepts and objectives. Throughout student teaching, students maintain a digital portfolio that demonstrates how they meet the New Jersey State and INTASC teaching standards. At the conclusion of the semester, students attend a portfolio review with members of the Music Education faculty to assess the success of the teaching experience. Students must provide their own transportation to student teaching site. Student Teaching fee: $245. Fees for the Praxis Examination and Teacher Certification are additional. Additional information regarding student teaching may be found in the department's Student Teaching Handbook at www.rider.edu/musiced.
Prerequisite(s): Minimum grade of B- in ME 564; Classification as a full senior; Satisfactory completion of music education courses numbered ME 161, ME 262, ME 563, ME 564, ME 187, ME 188, and either PSY 230 Child Developmental or PSY 231 Youth and Adolescent Development; Satisfactory completion of TH 241; For voice primary students, satisfaction of all requirements of PI 204; A minimum 3.0 cumulative GPA; Demonstrated aptitude, motivation and potential for success in teaching, as evidenced by the successful completion of portfolio reviews; Departmental approval; Students in the Master of Music Education (MME) degree program must take the following courses as prerequisites to student teaching; ME 563, ME 564, ME 725.

ME 563 Art of Teaching Music III 4 Credits
Through course assignments, discussion, and clinical practice in varied school and community choral settings, course participants learn how to create meaningful elementary music experiences that foster individual success, accountability, a sense of accountability, critical thinking, independence, and life-long engagement with choral music.
Prerequisite(s): Minimum grade of C- in ME 262, successful completion of Sophomore Review, and must obtain substitute teaching credentials.

ME 564 Art of Teaching Music IV 4 Credits
Through course assignments, discussion, and clinical practice in varied school and community choral settings, course participants learn how to create meaningful school singing experiences that foster individual success, accountability, a sense of community, critical thinking, independence, and life-long engagement with choral music.
Prerequisite(s): Minimum grade of C- in ME 262, successful completion of Sophomore Review, and must obtain NJ substitute teaching credentials.

ME 587 Music in Special Education 1 Credits
This course is designed to acquaint the pre-service teacher with the special needs of exceptional children in music classes. Students learn to adapt instruction to accommodate a variety of exceptionalities that are both physical and emotional. Content includes categories of special students, characteristic behaviors, mainstreaming, and classroom methodology. Course content, activities and experiences in this course cover New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. It is recommended that students take this course before the student teaching semester. Restricted to Seniors only.

ME 592 Creativity & Music Technology 2 Credits
Creativity and Technology in the Music Classroom is designed to prepare students to foster musical creativity using a variety of approaches and tools. In particular, students will use equipment such as digital audio workstations, MIDI controllers, microphones, and SmartBoards to facilitate rich and engaging creative experiences. Students will explore ways to structure learning experiences in response to the needs and interests of students, and will examine current thinking and trends related to the uses of creativity and technology in the music classroom.
Prerequisite(s): Junior status or permission of instructor.

MH 247 Music Historiography I 3 Credits
Historiography I begins by exploring similarities and differences between various music cultures around the world, and continues with an examination of selected genres of Western Art Music of the Medieval, Renaissance and Baroque periods. Basic information literacy skills, such as searching library catalogs, databases and reading academic articles also will be covered.
Prerequisite(s): CMP 125.

MH 248 Music Historiography II 3 Credits
Examines Western Art Music since 1750 and includes a research assignment that builds upon the information literacy skills gained in MH 247.
Prerequisite(s): MH 247.

MH 345 Music Since 1900 3 Credits
Examines controversies and aesthetic movements in 20th and 21st century music. Emphasis is placed upon critical reading and writing skills.
Prerequisite(s): MH 248.

MH 433 Seminar in Music History 3 Credits
The contents of courses carrying this number will vary with the special interests and qualifications of the instructors teaching them. Possible topics include period courses, courses from a distinct perspective, composer courses and genre courses.
Prerequisite(s): MH 248.

OR 168A Applied Organ 2 Credits
One-hour, 2-credit required lesson. Included in tuition – no extra charge.

PI 103 Piano Secondary I 1 Credits
Establishes a solid foundation of piano playing through integration of musicianship skills in addition to building facile digital independence and bilateral hand coordination. Minimum grade of "B-" required to pass the course.
Prerequisite(s): Grade of "Y" in PI 045 or placement.

PI 104 Piano Secondary II 1 Credits
Continuation of PI 103; appropriate for the advanced beginner. Minimum grade of "B-" required to pass the course.
Prerequisite(s): PI 103 or placement.

PI 168A Applied Piano 2 Credits
One-hour, 2-credit required lesson. Included in tuition – no extra charge.

PSY 100 Introduction to Psychology 3 Credits
This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 230 Child Development 3 Credits
Presents theory and research on the social, emotional and cognitive development of children birth to age 12.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 231 Youth and Adolescent Development 3 Credits
Presents theories, research and problems concerning development in youth and adolescence.
Prerequisite(s): Grade of C or better in PSY 100 or PSY 102 or PSY 110 or PSY 131.

TH 141 Musicianship I 4 Credits
This course assists students in learning and integrating aural, performance, analytical and composition skills involving diatonic melody and harmony. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade.
Prerequisite(s): TH 045 or passing a placement test.

TH 142 Musicianship II 4 Credits
A continuation of TH 141 involving chromatic melody and harmony with an introduction to binary and ternary form.
Prerequisite(s): minimum "C-" grade in TH 141.

TH 237 Composition Class 3 Credits
Class instruction in original composition. May be taken as a level I elective.
Prerequisite(s): For non Theory/Composition majors only, minimum "C-" grade in TH 142.

TH 241 Musicianship III 4 Credits
A continuation of TH 142 with an introduction to larger musical forms and counterpoint.
Prerequisite(s): minimum "C-" grade in TH 142.

TH 251 Analytical Studies I 3 Credits
An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain only the harmonic vocabulary and formal structures studied in TH 141 and TH 142, may vary each time the course is offered. May be taken as a level I theory elective.
Prerequisite(s): minimum "C-" grade in TH 142.

TH 253 Orchestration 3 Credits
A study of the orchestra and its individual instruments from the standpoints of the composer, arranger and conductor. May be taken as a level I theory elective.
Prerequisite(s): minimum "C-" grade in TH 142.

TH 255 Song Writing 3 Credits
Solo vocal composition in various styles. May be taken as a level I theory elective.
Prerequisite(s): minimum "C-" grade in TH 142.

TH 259 Electroacoustic Music 3 Credits
An introduction to the history and literature of electroacoustic music emphasizing hands-on creative opportunities in sequencing and digital sound processing. May be taken as a level I theory elective.
Prerequisite(s): minimum "C-" grade in TH 142.

TH 342 Contemporary Trends 3 Credits
An analytical study of the compositional techniques of the 20th and 21st centuries.
Prerequisite(s): TH 241.

TH 424 Choral and Instrumental Arranging 3 Credits
Arranging for various ensembles of voices and instruments. May be taken as a level II theory elective.
Prerequisite(s): TH 241.

TH 431 Form and Analysis 3 Credits
Study of the compositional process as observed in selected examples of music literature, predominantly from the tonal repertoire. May be taken as a level II theory elective.
Prerequisite(s): minimum "C-" grade in TH 241.

TH 432 Contrapuntal Techniques 3 Credits
18th century counterpoint with an emphasis on analysis and writing of original compositions. May be taken as a level II theory elective.
Prerequisite(s): minimum "C-" grade in TH 241.

TH 433 Special Topics in Theory 3 Credits
The content of the course carrying this number will vary with the special interests and qualifications of the professor teaching it. May be taken as a level II theory elective.
Prerequisite(s): minimum "C-" grade in TH 241.

TH 452 Analytical Studies II 3 Credits
An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain a more advanced harmonic vocabulary and larger formal structures than the music studied in TH 251, may vary each time the course is offered. May be taken as a level II theory elective.
Prerequisite(s): TH 241 with a minimum grade of C-.

TH 550 Keyboard Harmony 3 Credits
An intense exploration of and drill in musicianship-keyboard skills, including score reading, transposition, modulation, clef reading, figured bass realization, harmonizing melodies, improvising and lead sheet accompanying. Projects may include transposition of a number of songs (perhaps a complete set) into all keys, figured bass realization for a Bach cantata, improvisation of service music (prelude, offertory, interludes, chorale preludes, postlude), multiple re-harmonizations of hymns/chorales for a service and score reduction and performance of a movement of an orchestral work. May be taken as an undergraduate level II theory elective.
Prerequisite(s): Undergraduate, minimum "C-" grade in TH 241; Graduate, Removal of all theory deficiencies.

VC 103 Voice Secondary 1 Credits

VC 115 English & Italian Diction 2 Credits
Introduction to the rules of singing English and Italian through the use of the International Phonetic Alphabet (IPA) with oral and written drill.

VC 116 French & German Diction 2 Credits
Introduction to the rules of singing French and German through the use of the International Phonetic Alphabet (IPA) with oral and written drill.
Prerequisite(s): VC 115.

VC 168A Applied Voice 2 Credits
One-hour, 2-credit required lesson. Included in tuition – no extra charge.

VC 203 Voice Secondary 1 Credits

Music Production

Program Overview

The B.A. in Music Production provides students with the skills necessary to make music at every step of the process. Students will take courses that help them germinate ideas for songs, flesh them out in arrangements, work fluidly in digital software, generate their own unique sounds through digital synthesis, and apply mixing techniques that make their songs ready to be shared with the world.

The Music Production B.A. grounds all of this work in an understanding of popular music theory and an exploration of the social and political histories of popular music, fostering well-rounded, deeply knowledgeable musicians. Music Production students are also encouraged to take courses in departments across the university that cover skills in radio, podcasting, and multimedia, as well as music publishing and other aspects of the music industry. The degree culminates in a capstone project or internship where the student applies all that they've learned in a self-directed study or a work environment in their future field.

Degree Offered

- B.A. in Music Production
- Minor in Music Production

Courses and Descriptions

MUS 100 Popular Music Lab 0 Credits
Popular Music Lab is a required course for all Popular Music majors. Meetings include information sessions, guest speakers, and the sharing of student work.

MUS 105 Survey of Music History I 3 Credits
A chronological survey of Western music from the Medieval through the Baroque periods stressing the origin and evolution of musical forms, musical styles, and the important composers before 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 106 Survey of Music History II 3 Credits
A chronological survey of Western music from the classical through the contemporary periods stressing the origin and evolution of musical forms, musical styles, and the important composers since 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 113 Popular Music Theory I 3 Credits
Popular Music Theory I covers basic elements of music, including the reading of music notation in traditional formats as well as in audio wave form and in the visualization of standard Digital Audio Workstations. Practice in scales and chords; ear-training in rhythm, pitch, and timbre. Techniques may be applied to the student's own instrument (e.g., guitar, piano, voice)
Corequisite(s): MUS 113L.

MUS 113L Popular Music Theory Lab I 1 Credits
Taken in conjunction with Popular Music Theory I, the lab applies theoretical concepts in a performance context. Applied aural training and improvisation skills on primary and secondary instruments.
Corequisite(s): MUS 113.

MUS 114 Popular Music Theory II 3 Credits
A continuation of Popular Music Theory I, progressing to intermediate elements of music, including the reading of music notation in traditional formats as well as in audio wave form and in the visualization of standard Digital Audio Workstations. Practice in scales and chords, ear-training in rhythm, pitch, and timbre. Techniques may be applied to the student's own instrument (e.g., guitar, piano, voice).

MUS 114L Popular Music Theory Lab II 1 Credits
Taken in conjunction with Popular Music Theory II, the lab applies theoretical concepts in a performance context. Applied aural training and improvisation skills on primary and secondary instruments.

MUS 116 Digital DJing 3 Credits
Digital DJing is a software-based course that develops musical mixing skills for the purpose of creating the kinds of DJ sets one may play on the radio or at live events. Includes repertory building across several popular and dance genres.

MUS 127 Pop, Rock & Hip-Hop Ensemble 1 Credits
This is a dynamic group rehearsal, performance and discussion of contemporary popular music of any genre including but not limited to: the blues, soul, country, gospel, pop, prog. rock, reggae, disco, punk, grunge, new wave, dub, rap and hip hop.

MUS 129 Contemporary Vocal Ensemble 1 Credits
The objective of the contemporary vocal ensemble course is to allow students to experience the aesthetics of popular music through the study, interpretation and performance of the music. Students will develop their ensemble skills, independent part singing, as they experience a wide range of popular music genres (jazz, pop, R&B, world, etc.) Students must pass an audition to participate in this course.

MUS 131 Beginning Piano I 2 Credits
Class approach to learning to play the piano. How to read music, basic piano technique, and appropriate piano pieces and songs are studied.

MUS 132 Beginning Piano II 2 Credits
Continuation of MUS 131. Emphasis on further development of technique and the ability to interpret piano music from a variety of styles.
Prerequisite(s): MUS 131 or equivalent.

MUS 133 Class Voice I 2 Credits
Class approach to learning pop vocals. How to read music, basic vocal production technique and appropriate vocal pieces and songs are studied, especially in popular genres.

MUS 134 Class Voice II 2 Credits
Continuation of class approach to learning pop vocals started in Class Voice I. Intermediate vocal technique for popular music
Prerequisite(s): MUS 133 or placement exam.

MUS 135 Class Guitar I 2 Credits
Class approach to learning to play the guitar. How to read tablature, basic guitar technique, and appropriate guitar pieces and songs are studied, especially in popular genres. Students must provide their own guitars; if electric, they should provide their own amps, too.

MUS 136 Class Guitar II 2 Credits
Continuation of class approach to learning to play the guitar started in Class Guitar I. Intermediate guitar technique for popular music. Students must provide their own guitars; if electric, they should provide their own amps, too.
Prerequisite(s): MUS 135 or placement exam.

MUS 204 Jazz History 3 Credits
Survey from 19th C. roots to 21st C. styles. Development of listening skills and overview of musical skills used by jazz performers. Exploration of the relationship between jazz and poetry, race relations, and the reputation of jazz in popular culture.
Prerequisite(s): CMP 120 or CMP 125.

MUS 205 History of Pop and Rock Part I 3 Credits
This course charts the history of popular music from its origins until the 1960s. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music from its roots in the blues, early jazz, ragtime and military band marches to the music of Elvis, Chuck Berry, Little Richard, Buddy Holly, the Rolling Stones and the Beatles. We look at the recording industry and the advent of he gramophone record and the important role of radio and television in expanding the reach of popular music directly into the home, creating a vibrant soundtrack for peoples lives.

MUS 206 History of Pop and Rock Part 2 3 Credits
Description: This course charts the history of popular music from the 1960s to todays. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music through Acid Rock, Progressive (Prog) Rock, Hard Rock, Singer-Songwriters, Disco, Reggae, Funk, Punk, Heavy Metal, New Wave, Grunge, Electronica and Rap & Hip-Hop. We look at the development of analog and digital media and how new forms of delivery of product shapes the business model of the industry and beyond.

MUS 213 Digital Composition of Popular Music 3 Credits
This course is an introduction to making music in a Digital Audio Workstation (DAW). Students learn software techniques by composing in multiple genre styles.

MUS 214 Writing about Music 3 Credits
This course instructs students in the art of writing about music, from small-form criticism to large scale scholarship, focusing especially on the ability to translate what one hears into engaging prose.
Prerequisite(s): CMP 120 and 125, MUS 110, 110L, and MUS 213.

MUS 215 Music & Technology in a Mobile Society 3 Credits
This course compares the recent history of music technology to past innovations, focusing on the aesthetic implications and ideological influences of an increasingly mobilized musical milieu.

MUS 218 Postmodernism & Popular Culture 3 Credits
This course considers music in light of the ideological trends of postmodernism in order to better understand contemporary music in its cultural context.

MUS 220 Songwriting 3 Credits
The Songwriting course is an introduction to songwriting in popular music styles. Students will learn to compose music by themselves and collaboratively. This course will develop comprehensive musicianship and compositional techniques, as well as further software skill development.
Prerequisite(s): MUS 113.

MUS 221 Popular Music Arranging 3 Credits
Pop Music Arranging explores the fundamental arranging techniques for popular music styles. Students will learn to arrange popular music for the standard instrumentation found in a pop/rock ensemble (bass guitar, drumset, rhythm guitar, and keyboard) and other ensemble instrumentations, as well. This course will develop comprehensive musicianship and fundamental arranging techniques, as well as develop skills as they relate to composition software platforms.
Prerequisite(s): MUS 113.

MUS 225 Hip Hop and American Culture 3 Credits
Explores hip-hop culture via the music, dance, art, and poetry created in some of the poorest and most segregated neighborhoods in America. Students will examine the social conditions that fostered the creation of hip-hop and delve into a range of issues confronted in hip-hop music and culture.

MUS 304 Music of the Beatles 3 Credits
This course is a very in-depth analysis of the music and personalities of the Beatles. The student will gain in depth insight to the Beatles songs and albums as the course proceeds through the music chronologically. This will be contextualized historically and sociologically where required.

MUS 307 The Music of Radiohead 3 Credits
This course investigates the music, lyrics, art and marketing strategies of the British so called "alternative" band, Radiohead, moving song by song through their demos, videos and albums.

MUS 308 World Music 3 Credits
To understand world music as a means of appreciating and respecting our common inheritance as humans. To better understand in what ways music is a 'language' and how this functions within 'community' including aspect of ritual, celebration, religion and spirituality. The student will be expected to be able to discern between various genres of world music understanding the wider cultural context including, but not limited to, popular music within that same culture.

MUS 309 Film Music 3 Credits
A study of music in feature film, documentary film, and television. A chronological survey of film music from silent to contemporary film, animated shorts, and television, with emphasis on listening to recorded performance of representative works.

MUS 310 The Film Music of Stanley Kubrick 3 Credits
This course is an in-depth study of the way in which music impacts society through the art of film. Focusing on the films of Stanley Kubrick (e.g. The Shining; 2001: A Space Odyssey; A Clockwork Orange; Full Metal Jacket; Eyes Wide Shut; Dr. Strangelove; Lolita) we will study a variety of strategies within which music integrates, counterpoints or ironically resists themes such as war, sex, politics, religion, gender etc. Also we will observe how music interacts with other aesthetics in film such as light, camera methods, 1. diegetic/source, 2. non-diegetic/underscore and 3. metadiegetic (i.e. 1. music in the film; 2. music only the audience can hear; 3. music that seems to be coming from the mind of a character in the film) method as part of the narrative itself. In this way we will investigate the way film both integrates aspects of society and also radiates messages, indeed challenges, to society, both as a mirror but also didactically—with the direct intent of creating change.

MUS 311 Unpacking Bruce Springsteen 3 Credits
