IMPORTANT NOTE: In order to view our expanded digital channel lineup, you must have a TV that is capable of receiving digital QAM channels. If your television is an older analog model without a digital tuner, it will not receive any channels on our Cable TV system. If your television is digital with a QAM tuner, your channel numbers will have a dash or decimal within (119.4) and will be able to tune into the digital channels. If you need to purchase a new TV, remember to be sure that it has a "QAM" or "Clear QAM" tuner. TVs that only have digital "ATSC" tuners will not work on our cable system. If you have any questions or concerns, please contact the OIT Help Desk at x3000 for assistance.
