Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1 to 4 Credits. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing; good academic standing.

MUS 491 Internship in Music 1-4 Credits

Provides junior or senior music majors with the opportunity to gain practical experience working within a professional music environment. Students must be sponsored by a music professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

MUS 493 Selected Topics in Music Perf 3 Credits

Intensive study of a particular topic in applied music for the intermediate to advanced student. Students are led to understand the historic and aesthetic elements in music through critical listening, performance, research, and class projects.

MUS 495 Selected Topics in Music 3 Credits

Studies specialized aspects of the literature, history, or theory of music, to supplement the established curriculum. Emphasis on creative investigative work and individual experiences in music.

MUS 498 Popular Music Culture Capstone 3 Credits

The capstone is an independent, student-led project resulting in a material product (recording/performance/event/presentation) that demonstrates a student's interests and skills in the area of popular music.

MUS 499 Senior Honors Program 3 Credits

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, planned under the direction of a faculty advisor, represents a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

Theatre (B.A.)

Program Overview

In addition to a full array of theatre coursework, six main-stage productions each year give students a wide variety of experiences and opportunities. As a theatre major at Rider, students have the choice of pursuing an acting, technical theatre or theatre studies track. Acting majors receive rich training in preparation for pursuing a career as a professional actor. Technical theatre majors are offered a wide range of courses in the various aspects of theatre production. Theatre studies majors use their degree to pursue careers as educators, directors, theatre scholars, and dramaturgs. All three tracks allow you the ability to add a second major or minor.

Audition or Interview

A satisfactory audition or interview must be completed before a student is accepted into this major. Audition and interview requirements may be found on the Admissions audition website (<http://www.rider.edu/ugauditions>).

Degrees Offered

- B.A. in Theatre: Acting
- B.A. in Theatre: Theatre Studies
- B.A. in Theatre: Technical Theatre

Courses and Descriptions

THE 105 Theatre History to 1700 3 Credits

The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras.

THE 106 Theater History Since 1700 3 Credits

The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements.

THE 107 Acting I: Intro to Acting 3 Credits

Exercises and improvisations developing the fundamental prerequisites for the actor are provided. The emphasis is on vocal and physical mobility and the ability to communicate emotional states from the stage.

THE 110 Acting II: Scene Study 3 Credits

Basic acting techniques. Emphasis on the ingredients of any action: what am I doing, where, why, who am I, what is my attitude toward partner?

Prerequisite(s): THE 107.

THE 111 Theatre Lab 0 Credits

This class serves as a forum for students to cultivate practical professional skills. Through seminars, guest speakers and master classes, this lab will give the students necessary tools to enter the professional theater. Theater majors must meet the weekly attendance and participation requirements during every semester up to a total of six.

THE 115 Stagecraft 3 Credits

The theory and practice of construction and rigging of stage scenery is offered. Emphasis is on actual productions and road show set-ups. One lecture and two labs per week.

THE 116 Stagecraft Practicum 1 Credits

Work in the various shops and stages specializing in different areas such as carpentry, scenic painting, lighting and electrics, costumes and props, assisting main stage productions under the supervision of the design or technical staff.

Prerequisite(s): THE 115.

THE 118 Visual Imagination 3 Credits

Introduction to the visual world of theater design. Visual examples, physical exercises and handcraft of composition and style, with dramatic input and meaning. The course explores how to translate ideas in a dramatic text into a visual context.

THE 120 Theater Appreciation 3 Credits

By exploration of dramatic literature, conclusions are drawn as to man's relationship to his particular period, style, political, social, and psychological environment. Appreciation of the theatrical event is included.

THE 127 Theatre Production 1 Credits

Students rehearse and perform roles in a play produced by the department and directed by a member of its faculty. Students may also prepare a major element of design or technology for the production. Maximum of eight credits are accepted in theatre production, band and/or choir.

THE 127T Theatre Production Tech 1 Credits**THE 199 The Arts in Contemporary Civil 3 Credits**

An integrated study of the arts and their place in contemporary American life. Includes attendance at several events in art, music, and drama.

THE 218 Stage Lighting 3 Credits

The theory and practice of stage lighting as utilized in concept, dance, and theatre. Considers the nature of light, controlling light, color theory, electricity, electrical safety, and lighting design.

Prerequisite(s): THE 115.

THE 219 Stage Management 3 Credits

Provide necessary tools to get started as a production stage manager (PSM), including management, leadership, communication and organizational skills. Providing guidelines to prepare production paperwork. Overview of the relationship between the PSM and other production personnel.

Prerequisite(s): THE 115.

THE 220 Movement for the Actor 3 Credits

This course is an introduction to movement training methodologies, and emphasizes physical awareness and expressivity as it relates to development of character.

Prerequisite(s): THE 107, Open to Theater majors or minor, or by permission of the instructor.

THE 221 Voice for the Actor 3 Credits

Focuses on exploration of the basic principles of vocal production and cultivating natural expressivity of the voice. Class work is based upon the classic progression of voice exercises of Kristin Linklater.

Prerequisite(s): THE 107; Open to Theatre majors or minor, or by permission of the instructor.

THE 222 Speech and Dialects for the Actor 3 Credits

Focuses on exploration of the International Phonetic Alphabet (IPA) and the use of the IPA in learning dialects (including Standard Neutral American) for the stage.

Prerequisite(s): THE 107; Open to Theater majors or minor, or by permission of the instructor.

THE 223 Costume Design 3 Credits

Introduction to tasks, skills and expertise of costume design and costuming techniques, relationship with other creative production and cast members. Students will create sketches and develop basic construction plans. Develop familiarity with fabrics, patterns, common challenges in costume design.

Prerequisite(s): THE 115, THE 118.

THE 224 Stage Make Up 3 Credits

Basic application of make up artistry and techniques for the stage. How it can help build a character, and how to apply to self and others.

THE 225 Sound Design 3 Credits

Introduction to sound design and its diverse use and practice for the staged productions, e.g. plays, musicals, operas and dance.

Prerequisite(s): THE 115.

THE 226 Drafting for the Stage 3 Credits

Covers essential drafting language for staged productions. Drafting of ground plans, sections, elevations, and renderings by hand and with computers.

Prerequisite(s): THE 115.

THE 227 Properties and Scenic Painting 3 Credits

Covers general aspects of scenic painting and props for the stage. Hands on exercises, needs and challenges of each area, how work is usually accomplished in the professional world. Explore different textures, materials and how to combine them.

Prerequisite(s): THE 115, THE 118.

THE 240 Script Analysis 3 Credits

This course provides students with a technique for analyzing any text by breaking down scenes into objectives, conflicts, beats, activities and subtext, allowing the actor to construct an approach to finding character.

Prerequisite(s): THE 107.

THE 300 Acting for the Camera 3 Credits

Focuses on the craft and artistry of acting in television and film. Examination of TV production and the styles needed for work in various media will be discussed. Physicalization, simplicity, listening, marking and other technical requirements will be explored. Staging involving different camera angles will be rehearsed. The emphasis of this class is on adapting the performance to the special needs of the camera.

Prerequisite(s): THE 107.

THE 306 American Theatre History 3 Credits

The history of the American theater from the colonial period to the present, emphasizing dramatic scripts and theatrical conventions. Examines important playwrights, theorists, and practitioners representative of each period of American history, emphasizing the 19th and 20th centuries.

THE 307 Contemporary American Theater 3 Credits

Today's most influential theatre artists are discussed. Focusing on playwrights, the form and content of dramatic literature considered most significant today are examined along with recent innovations in design and staging practices.

THE 308 Modern Drama 3 Credits

Surveys American and European drama from 1920 to 1970. All plays are read in English translation. In these plays, theatrical artists address the great themes of this century. While doing so, they also expand the limits of theatrical expression.

THE 310 Acting III 3 Credits

Students will study in-depth techniques for exploring characterization. They will be introduced to the "magic if" and study techniques for placing themselves in the circumstances of the characters they are portraying. They will learn the interior and exterior analysis of characters using "Adler" and "Practical Aesthetics" techniques.

Prerequisite(s): THE 107, THE 110.

THE 311 Acting IV 3 Credits

Students will learn the appropriate techniques to explore characters in the three styles of Elizabethan, Restoration, and Commedia dell'arte theatre. Sessions will include movement, effective speech, and finding appropriate actions for each style. Students will also learn proper research techniques to understand cultural influences on plays and characters.

Prerequisite(s): THE 107, THE 110, THE 310.

THE 312 The Arts Abroad 3 Credits

A two-week trip abroad that includes a critical study of the music and theatre. Students are required to attend all performances, guided tours, and classes before and after the trip. A travel journal and final paper is required. A travel fee is required. Travel sites and artistic disciplines may vary year to year. May be taken more than once for credit.

Prerequisite(s): Permission of instructor.

THE 317 Scenic Design 3 Credits

The study and application of design principles as related to the stage. Incorporates the design process, decor research, styles, materials, and construction technology.

THE 400 Directing 3 Credits

The technique of play directing and production management. Lectures present aesthetic and theoretical concepts that are explored in workshops. Each student is required to direct and analyze a one-act play.

Prerequisite(s): THE 107, THE 110, THE 115.

THE 410 Advanced Performance Workshop 3 Credits

An opportunity to work an entire semester on a specific style or period of theatre, e.g., Shakespeare, farce, Readers' Theater.

Prerequisite(s): THE 107, THE 110.

THE 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credits. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing, good academic standing.

THE 491 Internship in Theater 1-12 Credits

Provides junior or senior theatre majors the practical experience of working within a professional theater environment. Students must be sponsored by a theatre professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

THE 495 Selected Topics in Theatre His 3 Credits

Intensive study of a particular topic, such as the work of one dramatic movement, one period in dramatic history, or one nation's history. Students become deeply involved in an area through research, class discussions, and individual consultation with the instructor.

THE 496 Senior Internship 6-12 Credits**THE 498 Senior Capstone 3 Credits**

The senior capstone is intended for technical theatre students in their final year. Depending on the required abilities, students will be able to design sets, lights, costumes, props or sound for a mainstage show at Rider University, do research on topics related to technical Theatre, internships outside Rider University or work on projects that will improve the use of facilities, storage or equipment for Theater and Dance Department.

THE 499 Senior Honors Program 3 Credits

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, to be planned under the direction of a faculty advisor, will represent a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

Westminster Choir College

A division of Westminster College of the Arts, **Westminster Choir College of Rider University** is a professional college of music located on a 23-acre campus in Princeton, NJ, seven miles north of Rider's Lawrenceville campus. Here, the Bachelor of Music (B.M.) degree is offered with majors in music education, organ performance, piano, sacred music, theory/composition, and voice performance. The Master of Music (M.M.) degree is offered in American and Public Musicology choral conducting, composition, music education, organ performance, piano accompanying and coaching, piano pedagogy and performance, piano performance, sacred music, and voice pedagogy and performance. In addition, the college offers the Master of Music Education (M.M.E.), Master of Voice Pedagogy (M.V.P.), and Bachelor of Arts in Music degrees.

A Tradition of Excellence

Choral music performance lies at the heart of the Westminster program, which involves daily choir rehearsals and required voice study for all its students. Preparation and performance of the choral/orchestral works at times takes precedence over all other facets of campus life. All undergraduates sing in one of the large ensembles: Chapel Choir, Schola Cantorum or Symphonic Choir. Auditioned ensembles include the Westminster Choir, Williamson Voices, Westminster Kantorei, Jubilee Singers, and Concert Bell Choir.

The Symphonic Choir has performed hundreds of times and made many recordings with the principal orchestras of New York, Philadelphia, and Washington. It also has performed in New York with many touring orchestras such as the Atlanta Symphony, Los Angeles Philharmonic, Berlin Philharmonic, and Vienna Philharmonic. Virtually every major conductor of the 20th century, from Toscanini and Walter through Bernstein, Muti, and Masur, has conducted the Symphonic Choir during the 80 years of the college's history.

Private Study

Private study in voice, piano, or organ is available on the Westminster campus during the fall and/or spring terms. Travel to the Westminster campus is the responsibility of the student. Full-time students from Rider's Lawrenceville campus whose major program does not require private applied music study, or Westminster College of the Arts majors who have completed all applied music requirements, may apply to enroll in elective private study on a space available basis. Effective as of the fall 2009 semester for all new or readmitted Rider University students,

there is a fee for these half-hour private lessons. Qualified Lawrenceville students may audition for organ study, for elective choirs, or for advanced courses in music for which they meet the prerequisites at Westminster Choir College.

Visit the Westminster Choir College site for undergraduate and graduate catalog information.

Westminster Choir College

Westminster is a residential college of music located on a 23-acre campus in Princeton, N.J. Its typical student body includes 330 enrolled in the four-year undergraduate programs leading to the Bachelor of Music degree and the combined five-year Bachelor of Music/Master of Arts in Teaching degrees; 110 graduate students working toward the Master of Music and Master of Music Education degrees; and 20 non-degree candidates. Its programs of study are career-oriented and designed to prepare graduates for music leadership in churches, schools and communities. Concentrated performance study is offered in voice, organ, piano and conducting.

The choral music experience represents the most distinctive feature of Westminster. Daily rehearsals, supported by intensive musical skills development and by the study of voice and conducting, constitute the foundation of the choral program. At the center of all curricula are the large ensembles: the Chapel Choir, Schola Cantorum and Symphonic Choir. Smaller ensemble experience is afforded by Westminster Choir, Jubilee Singers, Kantorei, Williamson Voices, Master Singers, Concert Bell Choir and Opera Theater. Preparation of works for performance and touring takes precedence at times over all facets of collegiate life.

History

In the belief that a choir of volunteer singers could be trained to perform on a professional level, John Finley Williamson established the Westminster Choir in 1920 at the Westminster Presbyterian Church in Dayton, Ohio. The national prominence achieved by this choir and Dr. Williamson's conviction that churches could best be served by dedicated, professionally trained musicians led him to found Westminster Choir School at the Dayton church in 1926.

In 1929 the college moved to Ithaca, N.Y., and became associated with what is now Ithaca College, where a four-year program leading to the Bachelor of Music degree was instituted. Relocated in Princeton, N.J., in 1932, it added a master's program in 1934 and became known as Westminster Choir College in 1939.

The move to Princeton was motivated by a desire to provide ready access to the great metropolitan centers and orchestras of the eastern seaboard. Since then the Westminster Symphonic Choir has performed hundreds of times and made many recordings with the principal orchestras of New York, Philadelphia, Washington, Pittsburgh, Boston and Atlanta. Conductors of the choir have included Bernstein, Ormandy, Steinberg, Stokowski, Toscanini and Walter, and such contemporary figures as Abbado, Boulez, Chailly, Leinsdorf, Levine, Masur, Mehta, Muti, Ozawa, Robertson, Sawallisch and Shaw. The choir has also received numerous invitations over the years to sing with such touring orchestras as the Berlin Philharmonic, the Los Angeles Philharmonic, the Royal Concertgebouw and the Vienna Philharmonic.

The institution has expanded in more recent decades by adding programs in music education, performance, composition, music theater and a Bachelor of Arts in Music degree. In 2007 Westminster Choir College became a division of Rider University's Westminster College of the

Arts. Although it has never had a formal affiliation with any church, its programs draw students from most denominations of the Judeo-Christian heritage.

Mission Statements

Westminster College of the Arts

Westminster College of the Arts educates and trains aspiring performers, artists, teachers and students with artistic interests, to pursue professional, scholarly and lifelong personal opportunities in art, dance, music and theater. The College consists of three divisions: Westminster Choir College, the School of Fine and Performing Arts and Westminster Conservatory, a community music school. Through innovative and integrated programs and a commitment to discipline and excellence, the College serves as a cultural force within the university and community.

Westminster Choir College

Westminster Choir College is a professional college of music with a unique choral emphasis that prepares undergraduate and graduate students for careers in performance, teaching, sacred music and composition. In an atmosphere that encourages personal and musical growth and nurtures leadership qualities, Westminster Choir College complements professional training in music with studies in the liberal arts. Founded for Christian service, Westminster Choir College was a pioneer in establishing the highest standards in choral performance and church music. Today, the curriculum teaches pluralism and holds service through music to be ennobling, liberating and integral to a rewarding and productive life.

The School of Fine and Performing Arts

The School of Fine and Performing Arts focuses on art, dance, music, music theater, theater and arts administration. Through programs that provide a historical, aesthetic, practical and professional perspective, students develop the skills to excel in a professional career while growing intellectually from a broadly based liberal arts curriculum. The School fosters meaningful engagement in the arts to students who wish to become professional artists as well as students who view the arts as an integral part of overall intellectual growth. The School nurtures and challenges the artist within all students and prepares them to contribute to an ever-changing global society.

Westminster Conservatory of Music

For more than 40 years Westminster Conservatory of Music has served the Central New Jersey/Eastern Pennsylvania area with on-campus and community-based music instruction. The community music school of Westminster College of the Arts, it offers a superior faculty and tailors lessons, workshops and classes to the needs of the individual student.

Music study at the Conservatory provides a unique opportunity for musical growth and is available to students of all ages and stages of advancement. It also offers many opportunities to perform through its community choral, orchestral and theater ensembles. In addition to its program on the Westminster Choir College campus in Princeton, the Conservatory offers classes at extensions in Lawrenceville and South Brunswick, N.J. and in Newtown and Yardley, Pa.

Accreditation

Westminster has been fully accredited by the National Association of Schools of Music (NASM) since 1941. It has held accreditation by the Middle States Association of Colleges and Schools since 1966 and remains accredited as a college within Rider University. The undergraduate program in music education was approved by the State of New Jersey in 1961 and leads to certification to teach public school

music, K-12. This program was also approved in 1974 by the National Association of State Directors of Teacher Education and Certification (NASDTEC), facilitating transfer of teaching certificates to any of the participating states, and in 1995 by the National Council for the Accreditation of Teacher Education (NCATE), which now is known as the Council for Accreditation of Educator Preparation (CAEP).

Continuing Education

Westminster offers summer workshops and festivals covering a wide range of subjects and techniques within the field of music. Workshops are open to all Westminster students, to professional musicians and teachers and to the general public. Graduate credits may be earned through participation in workshops. The Office of Continuing Education also presents residential high school and middle school summer programs in the form of a two-week Vocal Institute and a series of one-week programs in voice, organ, piano, composition and music theater.

Westminster Conservatory

The Westminster Conservatory is the community music school division of the College of the Arts. It serves Central New Jersey and Eastern Pennsylvania with high quality music instruction in piano, voice, brass, woodwinds, strings, theory, composition, and percussion. Westminster Choir College students receive a discount on lessons through the Conservatory. Non-credit instruction is open to all ages and levels of ability from 12 months of age through senior citizens, for the serious musician and for the amateur. Students at the college have the opportunity to observe lessons, to study privately those instruments not taught within the college curriculum and, in some cases, to teach on the junior faculty of the Conservatory.

Buildings and Resources

Williamson Hall is named for the college founders, John Finley and Rhea B. Williamson. With Bristol, Taylor and Erdman Halls, it is one of the original buildings on the campus. Many faculty departmental offices and administrative offices may be found here. The first floor includes an informal recital facility.

Chapel services, convocations and recitals take place in Bristol Hall, jointly dedicated to Lee Hastings Bristol, Jr., the third president of Westminster Choir College, and to his father, Lee Hastings Bristol. Located on the upper level is Bristol Chapel with its Aeolian-Skinner organ, completely refinished tonally in 1983. The lower level houses Noack and Fisk organs, an electronic keyboard lab, and Sacred Music departmental offices.

Westminster's newest building, the Marion Buckelew Cullen Center, opened in September 2014, and is named in honor of the philanthropist who made a \$5 million bequest to Westminster Choir College. The signature space in the building is Hillman Performance Hall, a 3,000 square-foot performance and rehearsal space named in recognition of the Henry L. Hillman Foundation, which provided a \$3 million grant to support the project. The Center includes three flexibly configured classrooms, a large lobby and a green room.

Talbott Library Learning Center memorializes Katharine Houk Talbott, one of the leading benefactors of the college during its earliest days in Dayton, Ohio. A multi-purpose building, it includes classrooms as well as the Music Computing Center and the Arts and Sciences Media Center. The Music Computing Center includes fifteen Kurzweil PC88 synthesizers and fifteen Macintosh computers. The Media Center includes 25 Windows-based computers with notation and sequencing

capabilities. A complete description of library facilities is given at the end of this section.

The Robert L. Annis Playhouse is named for the Dean/Director of Westminster Choir College, who served from 1994-2014, and under whose leadership the Westminster College of the Arts was launched.

The Playhouse is an all-purpose building for rehearsals, recitals, classes, theatrical productions and a variety of social and special events. An extensive addition and renovation in 2015 resulted in a larger stage area, dressing rooms, and an extended thrust stage.

The Cottage provides several classrooms, a dedicated rehearsal room for handbell choirs and an electronic keyboard lab.

The dining commons and meeting rooms are on the second floor of the William H. Scheide Student Center, named for benefactor William H. Scheide. Student mailboxes, lounge areas, student government offices, the Office of the Associate Dean of Students and Westminster Music and Books, the campus store, are located on its main level.

Erdman Hall, following an extensive renovation and rededication in 1997, is named for Charles Erdman, former chaplain of the college. It houses The Presser Music Center at Erdman Hall and provides offices and studios for the Voice and Piano Departments. It also holds the Voice Resource Center and an electronic keyboard lab.

Taylor Hall is named for Sophia Strong Taylor, who underwrote the purchase of the original Princeton acreage and the construction of the first four buildings. Faculty offices and private teaching studios occupy its four floors.

Seabrook, Dayton and Ithaca Halls currently serve as residence halls with basement-level practice rooms. Seabrook Hall is named for Charles F. Seabrook, a trustee and a long-term supporter of the college.

Dayton, Ithaca, and Princeton Halls are named for the three historic locations of the college. Dayton Hall houses Scheide Recital Hall. Dayton Hall is the location of the Casavant and Ott organs and of the organ department offices, teaching studios and practice facilities. Ithaca Hall includes both organ and piano practice facilities. Princeton Hall serves as the central location for Westminster Conservatory.

Westminster Choir College enjoys an excellent relationship with area institutions, and regularly makes use of facilities at the Princeton Ballet School, Princeton High School, Princeton Theological Seminary, and Princeton University. Performances are given in a variety of on- and off-campus venues, including schools and churches throughout the area.

Westminster Choir College Library

The library at Westminster Choir College is housed in the Katharine Houk Talbott Library Learning Center. These collections comprise more than 67,000 music-related books, music scores and periodicals, approximately 5,400 choral music titles in performance quantities, a choral music reference collection of more than 80,000 titles, 200 current periodical titles in print, as well as access to more than 12,000 titles electronically. The library's 25,000 sound and video recordings are supplemented by more than 338,000 audio tracks available electronically from the Classical Music Library and the Naxos Music Library.

Special collections include the Erik Routley Collection of hymns and hymnological literature; the D. deWitt Wasson Research Collection of Organ Music; and the Archives of the Organ Historical Society, a comprehensive collection of organ research materials.

Talbott Library's score and sound recording collections cover all musical styles, genres and periods at a basic level, but are concentrated more heavily in the areas of choral, vocal, keyboard and sacred music. Of note are collected works of many individual composers, masterworks of music, an extensive piano pedagogy collection, instructional material for music education in primary and intermediate schools and holdings both broad and deep in choral music, keyboard music and hymnals. The library collects multiple print editions of many music titles for comparison of editing practices and multiple recordings of many titles for comparison of performance practices.

For more information about Talbott Library, access www.rider.edu/talbott (<http://www.rider.edu/talbott>) on the Internet.

Westminster Choir College Administration and Staff

Marshall Onofrio • Dean, Westminster College of the Arts
 Christopher Botti • Interim Associate Dean of Students
 Carol Conklin • Manager ITT and Finance, Westminster Conservatory
 Marybeth Consiglio • Assistant Registrar
 Roberta Butler • Residence Life Area Director
 Dax Finley • Manager, Creative Services
 Lauren Gilmore • Assistant Director of Admissions
 Scott Hoerl • Director of Westminster Conservatory and Continuing Education
 Marjory J. Klein • Academic Coordinator
 Marianne Lauffer • Assistant Director, Westminster Conservatory
 Faculty and Extensions
 Joe Miller • Director of Choral Activities
 Pamela Mingle • Associate Director of Major Gifts
 James Moore • Director of Performance Management
 Hester Null • Assistant Director, Westminster Conservatory
 Natalie Pollard • Director of Alumni Relations
 David Powell • Director of Admissions
 Carolyn Sauer • Production Coordinator
 Anne M. Sears • Director of External Affairs
 Brian Sengdala • Coordinator for Sacred Music and the Royal School of Church Music
 Judy Simmons • Assistant to the Dean and Director
 Evelyn J. Thomas • Director of Academic Support Services and Coordinator, Educational Opportunity Program
 Laura Wilson • Assistant Director of Performance Management and Box Office Manager

National Association of Schools of Music Code of Ethics

As a fully-accredited member of the National Association of Schools of Music, Westminster Choir College abides by the NASM Code of Ethics, which establishes deadlines for the consideration and acceptance of talent-based scholarship awards from member institutions. Having accepted a financial aid offer from Westminster Choir College, undergraduate students must receive written permission from Westminster to consider an offer of financial aid from another institution after May 1. Having accepted a financial aid offer from Westminster Choir College, graduate students must receive written permission from Westminster to consider an offer of financial aid from another institution after April 15. Students accepted into Westminster Choir College after those dates must inform Westminster of any offer(s) they have accepted.

Study Abroad

Study in a foreign country provides a unique opportunity for students to grow intellectually through exposure to the customs, habits, and languages of different cultures. Study abroad helps prepare students for the global community in which they will live and work, increasing their employment and earnings potential. Study abroad experiences are available in many locations through Rider exchange and affiliate programs. Westminster semester-long programs offer courses in a variety of subjects, including voice and theory. An exchange program with the University for Music and Dramatic Arts in Graz, Austria, allows Westminster Choir College students to do voice, composition, and keyboard courses abroad. Besides our semester programs, students can select summer programs through study abroad providers and faculty-led short-term international travel projects that are offered for credit during January intercession, spring break, and in the summer.

Additional information is available on the Rider University Study Abroad Web site (<http://www.rider.edu/academics/academic-programs/study-abroad>). Information is also available in the Center for International Education, located in the office of the Associate Dean of Students in the Scheide Student Center.

Academic Support Services

Rider University offers a wide array of academic support services. Additional information regarding each of these can be found on Rider's Web site (<http://www.rider.edu/academics/academic-support-services>). (<http://www.rider.edu/academics/academic-support-services>)

Registrar (<http://www.rider.edu/academics/academic-support-resources/registrar>)

Responsible for academic records, registration processing, degree and attendance verification, transcripts, grade reporting, veterans services, and maintenance of the student and course information system.

Career Services (<http://www.rider.edu/careerservices>)

Provides resume assistance, interview preparation, job search/postings, networking, career fairs, graduate school preparation, alumni services, employer partnerships and more.

Student Support Services (<http://www.rider.edu/academics/academic-support-resources/student-support-services>)

A comprehensive academic support program designed to increase performance, retention and graduation rates, primarily of first-generation college students.

Student Success Center (<http://www.rider.edu/academics/academic-support-resources/student-success-center>)

Offers free tutoring and other programs to enhance learning and development.

Services for Students with Disabilities (<http://www.rider.edu/academics/academic-support-resources/services-students-disabilities>)

Ensures equal access by providing services for all students with qualifying documented disabilities.

Math Skills lab (<http://www.rider.edu/academics/academic-support-resources/math-skills-lab>)

Offers peer tutoring in individual or group settings to help students develop stronger math concepts and strategies.

Reading Courses (<http://www.rider.edu/academics/academic-support-resources/reading-courses>)

Rider University offers two levels of reading courses: Introduction to Academic Reading and College Reading.

Academic Calendar

Fall Semester 2017 (p. 761)

Spring Semester 2018 (p. 762)

- Withdrawal Information (p. 762)
- Course Cancellations (p. 763)
- Commencement Information (p. 763)

Fall Semester 2017

August

29 Tuesday	Graduate Testing
30 Wednesday	New Student move-in
30 - Sept 3	Undergraduate Testing, Orientation, Choral
Wednesday - Sunday	Hearings/Ensemble Auditions
31 Thursday	Returning Student move-in

September

1 Friday	Registration
4 Monday	Labor Day - College Closed
5 Tuesday	Lawrenceville Convocation • SRC • 11 a.m.
	WCC Fall Convocation • Bristol Chapel • 4:30 p.m.
	Westminster Choir callbacks • 6:30 p.m.
6 Wednesday	Classes Begin
12 Tuesday	Last day to add courses
18 Monday	Unresolved Summer II Incomplete grades default to "F"
19 Tuesday	Last day to drop courses
Sept 20 - Oct 24	Withdrawal Period I, instructor signature not required

October

1 Saturday	Deadline to apply for December 2017 or January 2018 graduation
16 Monday	Spring 2018 course selection begins
23 Monday	PRINCETON CAMPUS FALL INTERMEZZO
	classes at or after 6:30 pm will be held - no weekend events on 10/21 or 10/22 except Sat. Seminar
24 Tuesday	Last day for course withdrawal without instructor's signature
	Midterm grades due
Oct 25 - Nov 21	Withdrawal Period II, instructor's signature required

November

1 Wednesday	Deadline to schedule fall oral examination
3 Friday	Spring 2018 course selection ends
3 - 5 Friday-Sunday	Family Weekend
21 Tuesday	Last day for course withdrawal with instructor's signature
Nov 22 - Dec 8	Withdrawal III, psychological or physiological incapacity (medical documentation required)
22 Wednesday	Residence halls close • 12 p.m.
22 - 26 Wednesday-Saturday	Thanksgiving Recess
26 Sunday	Residence halls reopen • 11 a.m.
27 Monday	Classes Resume

December

8 Friday	Last day to hold Graduate Oral Examination
8 - 9 Friday-Saturday	Readings and Carols
9 Saturday	Last day of classes (LAW)
11 Monday	Last day of classes (WCC)
	Exam date for Monday evening classes
12 - 15 Tuesday-Friday	Final Exams and Juries (WCC)
13 Wednesday	Exams for Monday WCC daytime and all Wednesday evening classes
16 - 17 Saturday-Sunday	Reading Days
18 - 19 Monday-Tuesday	Final Exams and Juries (WCC)
20 Wednesday	Residence halls close • 12 p.m.
22 Friday	Final grades due • 12 p.m.

Spring Semester 2018

January

15 Monday	Martin Luther King, Jr. Day (Closed)
18 - 19 Thursday-Friday	Orientation for new students
19 Friday	Registration for Spring 2018
	New student choral hearings
20 Saturday	Residence halls open • 11 a.m.
22 Monday	Classes begin
26 Friday	Last day to add courses
	Unresolved Fall 2017 Incomplete grades default to "F"

February

2 Friday	Last day to drop courses
5 Monday	Withdrawal Period I begins, instructor's signature not required

March

1 Thursday	Deadline to apply for May 2018 graduation
5 Monday	Fall 2018 course selection begins
9 Friday	Last day for course withdrawal without instructor's signature

10 Saturday	Residence halls close • 12 p.m.
12 - 16 Monday-Friday	Spring Break; no classes or lessons
March 12 - April 13	Withdrawal Period II, instructor's signature required
15 Thursday	Midterm grades due
18 Sunday	Residence halls reopen • 11 a.m.
19 Monday	Classes Resume
27 Tuesday	Fall 2018 Course Selection ends

April

1 Sunday	Deadline to apply for August 2018 Graduation
	Deadline for summer graduates to declare intent to participate in May commencement
	Deadline to schedule spring oral examination
13 Friday	Last day for course withdrawal with instructor's signature
16 - 27	Withdrawal III, psychological or physiological incapacity (medical documentation required)
19 Thursday	Westminster Spring Convocation • Bristol Chapel • 11:30 a.m.
21 Saturday	Spring Fling
27 Friday	Last day to hold Graduate Oral Examination
	Last day of classes
30 - Monday	Final Exams and Juries

May

1 Tuesday	Final Exams and Juries
2 Wednesday	Reading Day
3 - 4 Thursday-Friday	Final Exams and Juries
5 - 6 Saturday-Sunday	Reading Days
7 - 8 Monday-Tuesday	Final Exams and Juries
10 - 12 Thursday-Saturday	Alumni Week
11 Friday	Lawrenceville Commencement
	Final grades due • 12 p.m.
12 Saturday	Westminster Commencement • Princeton University Chapel • 10:30 a.m.
	Residence halls close • 8 p.m.
14 Monday	Summer Session I begins

June

1 Friday	Deadline to schedule summer oral examination
	Deadline to apply for August 2018 graduation
8 Friday	Unresolved Spring 2018 Incomplete grades default to "F".
	Last day of classes of Summer Session II is the last day to hold summer Graduate Oral Examination

Withdrawal Information

Please refer to www.rider.edu/offices-services/finaid/payments-billing-deposits/refunds (<http://www.rider.edu/offices-services/finaid/>)

payments-billing-deposits/refunds) for information regarding course withdrawals and refunds.

For additional information and updates, go to www.rider.edu (<http://www.rider.edu>)

Cancellation of Classes

In most cases, Westminster Choir College of Rider University will remain open and fully operational during snowstorms and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, and close certain buildings or take emergency actions.

If such circumstances should arise, a notice will be sent via the Rider Alert System.

Students may sign up for Rider Alert at www.rider.edu/rideralert (<http://www.rider.edu/rideralert>)

Cancellations will also be announced online at www.rider.edu (<http://www.rider.edu>) and on the Rider University information hotline at 609-219-2000, option 1.

Commencement Information

For Commencement ceremonies information, go to www.rider.edu/commencement (<http://www.rider.edu/commencement>)

General Requirements

General Requirements for the Bachelor of Music (B.M.), Bachelor of Arts in Music (B.A.M.), and Combined Bachelor of Music and Master of Arts in Teaching (B.M./M.A.T.)

- All entering undergraduate students take placement tests in order to determine the level of their skills in a variety of areas. Specifically, students must meet all musicianship, ELI/TOEFL, reading, writing, and mathematics proficiency requirements as determined by the college. Those whose scores on placement tests indicate that they are not prepared to undertake college-level work are required to complete remedial courses in order to bring their skills up to the minimum standards expected. Please see "Placement" in the Admissions and Arts and Sciences sections of this catalog. International students also should review the English language requirements listed under "Admission as an International Student" in the Admissions section of this catalog.
- Students must earn a minimum of 124 undergraduate credits. Of these, a minimum of 62 must be earned within Rider University, exclusive of credits transferred or earned by examination.
- Students must complete all degree requirements within ten years of initial enrollment. Students who have not satisfied requirements by this time may be required to repeat courses and/or to meet further requirements. If more than one year has elapsed since the date of last enrollment, students may be required to re-apply and re-audition for the program, and must meet all requirements in place at the time of their readmission.
- Students must earn a minimum cumulative grade point average of 2.00, except for Music Education majors who must, by state requirement, earn a minimum cumulative average of 3.00. Students dropped from a major because of failure to maintain the minimum

grade point average may apply for readmission to the respective department. Readmission will be dependent upon various criteria, including the G.P.A., current academic progress, and the student's general standing.

- Performance majors must earn a minimum grade of "B-" each semester in the primary applied music field in order to make satisfactory progress. If a grade of "C+" or lower is earned, the student must repeat the semester. All other students must earn a minimum grade of "C-" each semester in the primary applied music field. If a grade of "D" or lower is earned, a student must repeat the semester.
- Students must meet attendance and performance requirements in studio performance classes and labs, as set by each applied department and/or major field department.
- Keyboard students must pass a general progress jury at the end of one year of secondary voice study and a proficiency test to complete secondary voice study.
- All students must present a senior primary applied recital after qualifying according to departmental standards. Some major fields also require a junior recital. Students must enroll for primary applied study during the term when any recital is to be presented unless specifically excused from this requirement by the primary applied department.
- Students must participate in and earn credit for one of the required choirs (Chapel Choir, Schola Cantorum, Symphonic Choir) during every semester of enrollment, up to a maximum of eight semesters, except for Music Education majors, who must enroll up to a maximum of seven semesters.
- B.M./M.A.T. students should review the notes provided after the chart for that degree.
- Commencement: Academic year requirements extend through the annual spring Commencement. All students enrolled in required ensembles (Chapel Choir, Schola Cantorum, Symphonic Choir) are required to participate in Commencement unless excused under extraordinary and unavoidable circumstances, such as serious illness. All other students are encouraged to participate in Commencement. In particular, credit for spring semester choir participation is lost if a student does not attend and is not excused from Commencement. Students participating with the members of the graduating classes are required to purchase or rent appropriate academic regalia, available through the college store.
- In addition to the information given here and on the following pages, students are referred to individual department handbooks for additional information and requirements.

Honors Programs

- Baccalaureate Honors Program (p. 12)
- Business Honors Program (p. 12)
- Westminster Choir College Honors Program (p. 12)
- Fine Arts Honors Program (p. 13)

Baccalaureate Honors Program

The Baccalaureate Honors Program (BHP) is the University-wide honors program designed to enrich the educational opportunities available to Rider students of proven intellectual ability who choose to become Baccalaureate Scholars. Interdisciplinary in orientation, the program enables the Baccalaureate Scholars to explore diverse forms of thought,

expression, and institutions past and present—an exploration that will enable them to meet future challenges with confidence. Through a series of team-taught seminars and other honors courses, co-curricular experiences, personal contact with faculty, and completion of a senior honors capstone project, the scholars extend their ability to think critically about the great themes of their human heritage.

Students are invited to join the Baccalaureate Honors Program as entering freshmen and may apply as currently enrolled or as transfer freshmen or sophomores. In general, students in the top 10 percent of each College's entering class are invited. Students currently enrolled at Rider must have at least a 3.3 GPA at the time of application to the program.

Other qualified students with a 3.3 grade point average, including juniors and seniors, may enroll in particular honors seminar courses with the approval of the director.

Most BHP courses replace core or other academic requirements. In addition, Honors sections of single-discipline courses designated in the course roster assist in fulfilling BHP requirements.

In order to graduate with Baccalaureate Honors, the student must complete seven honors seminars and a senior baccalaureate honors capstone or a departmental honors capstone with a GPA of 3.3 or higher.

Honors seminars are designated on student transcripts, whether or not the student completes the BHP. Successful completion of the BHP is noted on the transcript and the commencement program.

For more information, please see: www.rider.edu/bhp (<http://www.rider.edu/BHP>).

Note: Students in CBA Honors can also complete BHP if they wish. They do not have to decide until after completing BHP 100 and BHP 150. They may count any 2 CBA Honors courses toward the BHP certificate, and their CBA senior thesis can be shaped to count for BHP as well.

Business Honors Program

The Business Honors Program is designed exclusively for business majors enrolled in the College of Business Administration. Entering students are automatically considered for the program based on their academic record. Continuing students are invited to join by the director of the program.

Rider's Business Honors Program features cohort learning, which teaches the framework of successful business environments by encouraging teamwork and critical thinking. Students participate in classes with the same group of students for all four years. The cohort creates a powerful learning environment where students gain crucial business skills: the ability to communicate and collaborate, problem-solve, analyze various perspectives, initiate discussions, network and delegate.

Business honors student receive special advising, the opportunity to live in a residential learning community in their freshman year, priority in course registration, and invitations to attend co-curricular events (e.g., art exhibits, film screenings, poetry slams, theater previews, etc.) which are planned by the faculty team.

To complete the Business Honors Programs, students must complete the required number of honors business core classes, write an honors thesis,

maintain a minimum overall GPA of 3.4, complete one non-core business honors class and complete a thesis.

Graduation as a Business Honors Scholar requires a minimum overall GPA of 3.4 and a minimum GPA of 3.4 in all business honors courses.

For more information, see the Business Honors section (p. 18) of the catalog under the College of Business Administration.

Westminster Choir College Honors Program

General Remarks

The Baccalaureate Honors Program (BHP) is a University-wide honors program designed to enrich the educational opportunities available to Rider students of proven intellectual capability who are invited to become Baccalaureate Scholars. Interdisciplinary in orientation, the Westminster Choir College program enables Baccalaureate Scholars at Westminster to expand their knowledge and interest in the liberal arts during their music study. Through a series of team-taught seminars, single discipline honors courses and other options for music honors study, as well as an honors thesis, scholars extend their ability to think critically, coherently, and systematically about the great themes, ideals and movements of their human heritage.

Students are invited to join the Westminster Baccalaureate Honors Program as entering freshmen and may apply as currently enrolled freshmen or sophomores. Generally, students with SAT and high school GPA scores in the top 20% of the entering Westminster freshmen class are considered for invitation into the WCC BHP program. Students currently enrolled at Rider University must have at least a 3.3 GPA at the time of application to the program. In order to remain in the Baccalaureate Honors Program, the student must maintain a minimum cumulative GPA of 3.3.

Non-honors students, including juniors and seniors, who have earned a minimum cumulative GPA of 3.5, including juniors and seniors, may enroll in a particular honors seminar course with approval of the Westminster Choir College Honors Program Director. Permission will be given on a space-available basis, with priority given to students in the Honors Program.

In order to graduate with Baccalaureate Honors, Westminster students must complete eight honors courses: at least four interdisciplinary (team-taught) honors seminars, a capstone (thesis) project, and three other honors courses, seminars, or contracts. The Program is supplemented by other honors opportunities at the college and department level, and some graduate courses in music may be allowed as honors courses. All freshman honors students take BHP 150 Honors Seminar: Great Ideas II, which substitutes for English Composition. Most honors courses fulfill core degree requirements. Students may enroll in honors courses on either campus of Rider University. Individual course descriptions are found in the Rider University catalog. Students should see the Westminster Choir College Honors Program Director regarding guidelines and options for completing honors studies.

Students enrolled at Rider University in the Honors Program may register for graduate courses on the Princeton campus according to the following policies:

Students who have earned at least 60 credits and hold a minimum cumulative GPA of 3.0 may register for 600-level graduate courses

upon permission of the instructor, the Honors Program Director, and the Associate Dean.

Students who have earned at least 90 credits and hold a minimum cumulative GPA of 3.80 may register for 700-level graduate courses upon permission of the instructor, the Honors Program Director, the Chair of the department offering the course, and the Associate Dean.

Approval is based upon criteria such as cumulative grade point average, courses taken, and preparation for the particular course requested.

Undergraduate students permitted to enroll in 600- or 700-level graduate courses must complete the same syllabus and requirements that pertain to the graduate students in the course. The grade for the course will be recorded on a graduate transcript.

If a grade of “B-” or higher is earned, the course will be permitted to substitute for an undergraduate honors course. For any course used to meet undergraduate requirements, should the student later decide to enroll in a graduate program of the Westminster College of the Arts, the course cannot be used to meet graduate program requirements. In the event the course is required in the graduate program, the department sponsoring the program will identify a suitable substitution.

Honors seminars are designated on student transcripts, whether or not the student completes the Baccalaureate Honors Program. Upon successful completion of the program, an honors student receives an appropriate certificate. Successful completion also is recorded on the transcript and listed in the commencement program.

Honor Program in Fine Arts

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a cumulative average of 3.5 in fine arts courses and cognates. The program, to be planned under the direction of a faculty advisor, represents a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

Core Curriculum

General Skills Requirements

The University community believes that essential to the college experience is the development of skills in critical thinking, communication, and computation. These skills are developed throughout students' academic programs to provide links among academic disciplines and to support students' intellectual progress and academic and career success. Principles of critical thinking are embedded in Rider University courses across the disciplines and are supported by curriculum development workshops for faculty. Core curriculum requirements are stated below.

All students entering the University as freshmen as of September 1, 1996, and thereafter, are required to fulfill the general skills requirements of the core by completing the following:

Reading

Those students scoring 470 or lower on the reading comprehension portion of the SAT are required to successfully complete CRC 100 College Reading in the first semester of their Freshman year.

Writing

CMP 115 Intro to Expository Writing¹; CMP 120 Expository Writing (or BHP 100P: Honors Seminar: Great Ideas I) and CMP 125 Research Writing (or CMP 203 Literature and Composition or BHP 150 Honors Seminar: Great Ideas II): 6–9 credits²

Computation

As required by student's college: 3–6 credits²

- ¹ CMP 115 Intro to Expository Writing will be waived for students who attain a score of 550 or above on the writing section of the SAT or a specified qualifying score on the English Department Placement Test.
- ² Preparatory courses (bearing supplemental education units rather than graduation credits) may be required in reading and computation, as determined by placement testing. Supplemental education units count toward a student's academic load and corresponding tuition charges, but do not affect the student's grade point average or credits toward graduation.

The Academic Programs A to Z Chart (<http://catalog.rider.edu/undergraduate/majors-minors-certificates>) lists Rider University's majors, minors and certificates alphabetically, along with the college or school (<http://catalog.rider.edu/undergraduate/majors-minors-certificates/#programsbycollegetext>) that grants each degree, major, minor and certificate. The following definitions explain the difference between majors, minors, tracks, concentrations, and emphases:

Program	Definition
Major	An organized group of courses ranging from introductory through advanced levels. Typically most if not all courses are in a single primary area of study, although some majors include study in multiple disciplines. Undergraduate majors require between 18 and 90 credits, depending upon the liberal arts or professional focus. Graduate majors require between 30 and 45 credits. Entrance into some majors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the major is listed on the official transcript.

Minor An organized group of courses, typically involving introductory through intermediate levels. While most minors are in a single discipline, Rider University offers several interdisciplinary minors, such as Law and Justice, and Sustainability Studies. Minors are offered at only the undergraduate level, and require between 15-24 credits. Some departments have restrictions on the connection between major and minor options. Entrance into some minors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the minor is listed on the official transcript.

Track A choice of specialty within a degree, tracks comprise an organized group of courses serving a particular focus within a major. In undergraduate and graduate majors that represent multiple disciplines, tracks indicate a particular disciplinary focus. In a single discipline major with tracks, each track represents a singular focus, often representing a liberal arts or professional path. In some cases, a track represents a sub-specialization within the major field. Entrance into some tracks, particularly those that represent a particular disciplinary focus, may require prerequisites, portfolios, auditions, or other forms of assessment. Tracks require between 21 and 52 credits. Upon completion of all requirements, the track is listed on the official transcript along with the major field of study.

Concentration Concentrations, such as English Literature or English Writing, represent a specialty or focus within an undergraduate or graduate major field of study. Typically, a concentration unites courses around content or a particular theme. Concentration requirements are a portion of a major, not the entire major itself. In some cases, concentrations refer to an interdisciplinary combination. Entrance into some concentrations may require prerequisites, portfolios, auditions, or other forms of assessment. Undergraduate concentrations require between 15 and 36 credits; graduate concentrations range from 9 to 18 credits. Upon completion of all requirements, the concentration is listed on the official transcript along with the major field of study.

Emphasis Typically an organized group of courses in a single discipline, the emphasis represents a subset of credits within an undergraduate or graduate major. The emphasis provides a coherent focus of study within a discipline, which may or not be in the major field. Typically an emphasis represents less than a third of the total major credits, mostly ranging from 15 to 19 credits. Entrance into some areas of emphasis may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the emphasis is listed on the official transcript along with the major field of study.

All students in the B.A.M. degree must select a minor or concentration. Typically this selection is made no later than the end of the sophomore year. Students are encouraged to make this decision earlier, if possible, as the date of the decision may affect progress towards a timely graduation. The declaration is made through the Registrar's office.

Students may choose from any minor approved by Rider University. Minors are offered in most disciplines of the university and require 18-21 credits. Courses taken to fulfill Arts and Sciences core requirements may be used to complete minor requirements. Courses required in minor programs may be offered at the Princeton campus. Information about minors may be found on the university website (www.rider.edu/academics/majors-minors-programs) (<http://www.rider.edu/academics/majors-minors-programs>).

Bachelor of Arts in Music (B.A.M.)

Program Overview

Bachelor of Arts in Music

The Bachelor of Arts in Music is a liberal arts degree with a major in music. A broad foundation in liberal studies complements extensive studies in music. The curriculum is designed for students whose academic/and or career interests extend beyond music.

Total Credits 125

Notes

¹ With the permission of the Conducting Department, the 8th semester may be waived in the event of an approved internship or off-site semester of study. Internship credits replace Arts and Sciences elective credits.

² The 8th semester may be waived in the event of an approved internship or off-site semester of study. Internship credits replace Arts and Sciences elective credits. A recital or lecture-recital is required.

³ VC 115 and VC 116 are required for voice primary students only. Organ and piano primary students may substitute four additional credits of free electives.

⁴ Honors Students will substitute BHP 150 for LL 131.

⁵ Completion of French, German, Spanish, Italian, or Latin II is required. If students are exempted from one or more semesters of foreign language study, they must replace the missing credits with other Arts & Sciences electives.

⁶ Music History or Art History courses do not fulfill history elective requirements.

⁷ Social/behavioral/natural science electives exclude history courses.

⁸ Chosen from COM 107, ENG 321, ENG 322, ENG 323, or LL 285.

⁹ If you choose to complete a minor, the hours required to complete the minor are taken from these 24 credits.

¹⁰ If students select MH 345 as part of their core requirement, they must take TH 342 in place of MH 345 as part of their concentration.

¹¹ If students select TH 342 as part of their core requirement, they must take MH 345 in place of TH 342 as part of their concentration.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who

change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

AR 111 Survey of Art History I 3 Credits

A survey of Western art - architecture, sculpture, painting - from prehistoric times, is presented against the background of chronological and intellectual history.

AR 112 Survey of Art History II 3 Credits

Crucial artistic tendencies in Western art of the 19th and 20th centuries are introduced and discussed against their historical and intellectual setting. A brief background of art history from previous centuries is presented in order to appreciate these developments.

AR 216 Acting I 3 Credits

This course provides an introduction to basic techniques of realistic acting using exercises, improvisation and scene study. The emphasis is on honesty and commitment to action in order to be able to create real life in an imaginary world.

AR 217 Improvisation & Movement 3 Credits

Using theater games, students explore themselves as individuals and members of a group. The course uses scenes, skits, dances and games to help students overcome their fears and insecurities, enabling them to develop their creativity, spontaneity, honesty, concentration, and commitment to action. The class also explores body movement as a means of heightening dramatic expression.

AS 490 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

AS 491 Arts & Science Internship 1-12 Credits

This course requires 95 hours for each three credits for which the student enrolls. The student is required to spend 13 weeks of on-site participation in a broad range of daily operations at an internship site. In addition, there are group meetings with all students participating in internships and site-analysis assignments given under the direction of Arts and Sciences faculty. Students may enroll for a maximum of 12 credits of internships.

Prerequisite(s): at least junior level standing.

LL 037 College Reading and Writing 3 Credits

Required for students placed into this course as a result of the basic skills English testing program. This intensive course reviews effective reading, writing, and study processes and leads students to the level of mastery required to begin LL 131 English Composition the following semester.

LL 131 English Composition 3 Credits

An intensive essay writing course that provides students with the analytical, rhetorical and research skills needed to write well in many disciplines. Source-based writing is emphasized, culminating in a significant research project. In-class and outside-class writing methods are explored, leading students to master their individual writing processes.

Prerequisite(s): LL 037 or satisfactory score on basic skills English test.

LL 141 French I 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 142 French II 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 141.

LL 145 Italian I 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 146 Italian II 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 145.

LL 151 German I 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

LL 152 German II 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 151.

LL 243 French III 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 142.

LL 244 French IV 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 243.

LL 247 Italian III 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 146.

LL 248 Italian IV 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 247.

LL 253 German III 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 152.

LL 254 German IV 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 253.

LL 280 Sacred Texts and Literature 3 Credits

Explore the cultural, theological, and artistic contexts of key themes (e.g. creation, journey, forgiveness, love) in the sacred texts of the major historical world religions as they are portrayed in contemporary poetry and drama, and in novels that have been adapted to film

Prerequisite(s): LL 131 or CMP 120.

LL 282 Major Poets 3 Credits

This course introduces students to poetry via the reading and analysis of different poetic forms. While reading, listening to, performing and discussing poems from a wide cultural spectrum, students learn to evaluate and appreciate poetry by understanding such elements as metaphor and persona.

Prerequisite(s): LL 131.

LL 285 Writing About Music: A Seminar for Performers, Teachers, and Academics 3 Credits

A writing intensive course focusing on the essential writing tasks encountered by musicians in their roles as performers, teachers, and scholars.

Prerequisite(s): LL 131, BHP 150 or CMP 125.

LL 327 Dante's Commedia 3 Credits

An introduction to Dante Alighieri's *Commedia* ("Inferno", "Purgatorio" and "Paradiso") exploring key ethical and aesthetic elements of the poem through close reading and critical analysis of the primary text.

Prerequisite(s): LL 131, BHP 150 or CMP 125.

LL 490 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

RP 265 Lit of New Testament 3 Credits

An introduction to the thought of the early Christian church as expressed in the New Testament, this course will emphasize a literary and historical reading of the Gospels and Epistles. It will introduce students to the Jewish and Greco-Roman religious, political and cultural worlds in which Jesus and his disciples lived and within which earliest Christianity arose.

RP 268 Hebrew Bible & Old Testament 3 Credits

This course introduces students to the writings of the Hebrew Bible/Old Testament within their historical and literary contexts. By critically reading these books, students will become aware of the history, culture and religion of ancient Israel - all of which contributed to the traditions of Judaism and Christianity.

SP 171 Western Civ I 3 Credits

This survey history course presents a cohesive picture of the development of Western societies from prehistoric times to the early Renaissance. Social, political and economic aspects are covered; intellectual and cultural developments are emphasized. Familiarity with primary sources and critical reading are integral to the course.

SP 172 Western Civ II 3 Credits

Continuation of SP171. This survey history course covers developments in Western societies from the Renaissance to the present. Major intellectual and cultural trends and movements are presented, along with historical progress and socio-economic expansion.

SP 273 Developmental Psychology 3 Credits

The physical and psychological growth of the individual from infancy through adolescence is studied, with emphasis on cognitive, emotional, and social processes.

Prerequisite(s): SP 175.

SP 274 Educational Psychology 3 Credits

The psychological foundations of education, based on the findings of experimental research in learning, transfer, motivation, reinforcement, and behavioral modification.

Prerequisite(s): PSY 100.

SP 286 Life in Middle Ages 3 Credits

A seminar in which the life styles of medieval Europeans are studied. Students will develop an understanding of particular social organizations and problems of the period by examining the conditions and events of everyday medieval life. Offered in rotation with other History courses.

SP 408 Voice Science 3 Credits

Study of the physics and physiology of voice production. Musical and vocal acoustics are explored using the facilities of the Westminster Voice Laboratory. Anatomic and physiologic underpinnings of respiration, phonation, articulation, registration and hearing are explored in depth.

Corequisite(s): CR 509.

Bachelor of Music: Music Education

Program Overview

The undergraduate Music Education degree normally takes four years to complete and includes courses in music education, musicianship studies, general education, and field experiences. Each semester, students increasingly engage in field experiences, culminating with a semester of full-time student teaching in the last year.

All music education majors must maintain a portfolio of work providing evidence of their suitability for teaching. Portfolios are reviewed as part of the Sophomore Review taken near the completion of 60 credits. Music Education majors must maintain a minimum cumulative grade point average of 3.0. Students whose general progress is unsatisfactory or whose cumulative grade point average falls below a minimum 3.0 level may be dropped from the Music Education major. If a student is dropped from the major because of failure to maintain the minimum grade point average, s/he may apply for readmission to the Music Education department. Readmission will be dependent upon various criteria, including the G.P.A., current academic progress and the student's

general standing. Decisions regarding retention or appeals will be made in a manner consistent with state and institutional non-discrimination policies.

To graduate, students must complete all requirements for New Jersey teacher certification for Certified Educator with Advanced Standing (CEAS). **Students who want to be able to apply for teaching positions in other states should become familiar with teacher certification requirements for states of interest ASAP to determine if additional coursework is needed.** In addition to successfully completing required coursework, the State of New Jersey requires students to:

Students must:

1. Satisfy basic skills (reading, writing, math) proficiency as a prerequisite for taking the Sophomore Review. Proficiency is satisfied for students who score at or above the identified cut scores on the SAT or ACT. Students who do not have sufficient SAT or ACT test scores must pass the Praxis Core Academic Skills (<https://www.ets.org/praxis/nj/> requirements) tests to satisfy basic skills proficiency.
2. Complete a minimum of 50 hours clinical experience during the first four semesters and 175 hours of clinical practice before full-time clinical practice (student teaching).
3. Pass the Praxis Music Content Exam.
4. Pass the performance-based edTPA Exam.

For more information about non-course program requirements, see links on Undergraduate Music Education Homepage. (<http://www.rider.edu/wcc/academics/undergraduate-programs/music-education>)

Curriculum Overview

The Music Education curriculum includes courses in elementary and secondary general music education, choral music education, instrumental studies, music technology and creativity, and students with special needs. An innovative four-course sequence integrates theoretical foundations of planning, teaching, learning, musicianship development with practical application through peer teaching and field-based music teaching. The undergraduate Music Education curriculum is intended to develop teachers who are reflective, who acknowledge the connections music has to the child's world and who seek to promote an understanding of those connections in a social context.

Degrees Offered

- B.M. in Music Education
- B.M. in Music Education/M.A.T in Teaching

Bachelor of Music/Master of Arts in Teaching (B.M./M.A.T.) 5-year Combined Degree Program (p. 777)

The Bachelor of Music/Master of Arts in Teaching is a five-year, dual-degree University program whereby students earn a Bachelor of Music degree with a major in Music Education from Westminster Choir College and a Master of Arts in Teaching degree from the School of Education. Students who demonstrate a high level of success on the Sophomore Portfolio Review are invited to join the 5-year program beginning in the junior year. NJ teacher certification applications are submitted upon completion of the dual degree program.

Notes

- ¹ VC 115 and VC 116 are required for voice primary students only. Organ and piano primary students may substitute four additional credits of free electives for these two courses.
- ² Students must successfully complete a portfolio review at the end of the sophomore year in order to continue as music education majors. Transfer students with sophomore status must successfully complete the portfolio review at the end of the first year of study.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

ME 111 Music Education Lab 0 Credits

Undergraduates must meet the weekly attendance and participation requirement for Music Education Lab during every semester of enrollment up to seven semester as an undergraduate Music Education major except for the student teaching semester. Grading is "P" (satisfactory) or "U" (unsatisfactory). As part of the Music Education Lab experience, students are required to complete 15 hours of professional development.

ME 161 Art of Teaching Music I 3 Credits

Art of Teaching Music I (ATM I) is a first in the sequence of Music Education courses designed to prepare the undergraduate Music Education major students for their student teaching experience and completion of their teaching licensure. There will be field observations of master teachers under the aegis of a music education faculty that will allow students not only to observe, but to have guided experience in assessing how teaching and learning are experienced in real classrooms. Partnerships between local expert teachers and music education faculty will allow students to complete field observations as well as guided experience in teaching and assessing students in real classrooms.

ME 171 Critical Pedagogy I 2 Credits

This course provides undergraduate music education majors with a foundation in issues related to teaching music in public schools. This course will engage students in diverse ways of thinking about music teaching practice and social theory that transforms the relationships among classroom music teaching, performance and the production of musical knowledge. In addition to the social and political contexts of schooling in general, the course will explore the moral and ethical dilemmas music teachers face in the day-to-day routines of their classroom teaching. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. Music Education majors will receive priority registration.

ME 172 Guitar & Recorder in the Classroom 1 Credits

This course provides undergraduate music education majors with a foundation for teaching and playing the guitar and recorder. Students will gain technical proficiency in both instruments while learning appropriate repertoire of a multicultural and diverse nature. Students will also learn efficient pedagogy practices for teaching both instruments, learning of their application in educational settings. Students are expected to provide their own acoustic guitar for this course. Recorders are available for purchase in the college bookstore.

ME 187 Instrumental Music: Strings 1 Credits

This course is designed as an introduction to the pedagogy of string instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring, and idiomatic writing are investigated. When available, instruments may be rented from the college. Rental fee, per instrument: \$25.

ME 188 Instrumental Music: Winds/Percussion 2 Credits

This course is designed as an introduction to the pedagogy of brass, woodwind, and percussion instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring and idiomatic writing are investigated. When available, instruments may be rented from the college. Students must provide their own drum pads and sticks. Rental fee, per instrument: \$60.

ME 262 Art of Teaching Music II 4 Credits

Art of Teaching Music II (ATM II) is designed to build on the knowledge, skills, and dispositions, introduced in ATM I. Students will expand their abilities in the domains of planning, teaching, assessing, reflecting, developing musicianship, and philosophy in context of teaching general music. Moreover, they will have the opportunity to put these abilities into practice when teaching peers and teaching elementary and middle general school students.

Prerequisite(s): ME 161.

ME 271 Critical Pedagogy II 2 Credits

Critical Pedagogy II explores the theories that provide a psychology of learning to frame Critical Pedagogy for Music Education. Grounded in experiential learning, constructivism and multiple intelligences theory, the course content honors the diversity of gifts and challenges children present inside the music classroom. Students learn strategies for the teaching of literacy that integrate into a teaching model to empower musicianship, meet National Standards for Music Education, New Jersey Core Curriculum Content Standards in Music and align to INTASC standards and the New Jersey Core Curriculum Content Standards in Music. Students design instruction that yields transformational experiences for both the children and their music teacher. This course includes required off-campus field observation in the schools. It is recommended that students complete SP 175 before taking this course. Music Education majors will receive priority registration for this course.

Prerequisite(s): ME 171.

ME 271H Critical Pedagogy II Honors 1 Credits

Primary source readings, expanded assignment and additional content that supplements ME 271. Capstone project consists of a significant paper based upon original ideas that reflect the tenets of the coursework.

Prerequisite(s): ME 171, BHP status.

Corequisite(s): ME 271; Online only.

ME 371 Critical Pedagogy III 2 Credits

Through dialogue and small group discussion, students analyze the principal sociological and philosophical discourses that influence education in general and music education specifically. Historical and post-modern perspectives as well as international perspectives are considered within the context of a Critical Pedagogy for Music Education. Students, with their teacher, look critically at the role and purpose of education and music education in American society and learn to critique theory and practice in the field with the goal of informing their own teaching practice. Students compose a personal philosophy of music education. This culminating paper reflects their ability to synthesize and process the ideas presented and discussed throughout the course and to present and develop their own original thoughts with depth and significance. It also provides evidence that students can participate in a community of scholarly discourse on topics germane to music education. Music Education majors will receive priority registration for this class. **Prerequisite(s):** ME 271 and junior status. **Corequisite(s):** ME 581 or ME 582. 201910.

ME 371H Critical Pedagogy III Honors 1 Credits

Primary source readings, expanded assignment and additional content that supplements ME 371. Students will demonstrate the ability to synthesize and process complex ideas, and develop original thoughts with depth and significance. **Prerequisite(s):** ME 271, BHP status.

Corequisite(s): ME 371; Online only.

ME 471 Music and Hip Hop Culture 3 Credits

Hip Hop in the United States is arguably the most lucrative, popular, and culturally challenging contemporary musical force. The narratives of Hip Hop go beyond the boundaries of race and class as well as those of music, poetry and dance. As such, Hip Hop is a phenomenon that presents problems as well as great possibilities. This course explores them from the standpoint of educational sociology, looking at their implications for music in schools as well as in daily life.

Prerequisite(s): ME 271.

ME 472 Teaching/Learning:Urban Schools 3 Credits

This course offers students theoretical and practical insight into teaching in urban schools. The class will present an analysis and practical implications for what is needed in order to successfully engage in teaching in urban centers in the United States. Students will balance field experiences with critical analyses of issues such as multicultural teaching, race, class, and economics in urban schools as well as their curricular and pedagogical implications.

Prerequisite(s): ME 581, ME 582.

ME 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

ME 491 Kodaly Music Reading 2 Credits**ME 492 Student Teaching 12 Credits**

ME 492 - Student Teaching A full semester internship in directed full-time teaching supervised by department members and carried out in schools with approved cooperating teachers. In addition to the field experience, students attend a weekly seminar on campus to discuss current issues in music education as they relate to individual teaching situations. Students discuss classroom management strategies, action research, authentic instruction, critical thinking, feeling and action as well as teaching to focusing questions, concepts and objectives. Throughout student teaching, students maintain a digital portfolio that demonstrates how they meet the New Jersey State and INTASC teaching standards. At the conclusion of the semester, students attend a portfolio review with members of the Music Education faculty to assess the success of the teaching experience. Students must provide their own transportation to student teaching site. Student Teaching fee: \$245. Fees for the Praxis Examination and Teacher Certification are additional. Additional information regarding student teaching may be found in the department's Student Teaching Handbook at www.rider.edu/musiced

Prerequisite(s): Classification as a full senior; Satisfactory completion of music education courses numbered 171, 172, 271, 187 and 188, 581, 582 and either Developmental or Educational Psychology; Satisfactory completion of TH 241; For voice primary students, satisfaction of all requirements of PI 204; A minimum 2.75 cumulative grade point average; Demonstrated aptitude, motivation and potential for success in teaching, as evidenced by the successful completion of portfolio reviews; Departmental approval; Students in the Master of Music Education (MME) degree program must take the following courses as prerequisites to student teaching; ME 581, ME 582, ME 587, ME 595, ME 725.

ME 499 Special Topics Music Education 2 Credits

The content of this course and the number of credits will vary with the special interests and qualifications of the professor teaching it.

ME 540 Choir Train for Young Singers 3 Credits

This course focuses on children's choirs in school, church and community. Students learn strategies to teach children good vocal technique and to build musical literacy through the study of appropriate repertoire. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

Prerequisite(s): Junior status.

ME 563 Art of Teaching Music III 4 Credits

Through course assignments, discussion, and clinical practice in varied school and community choral settings, course participants learn how to create meaningful elementary music experiences that foster individual success, accountability, a sense of accountability, critical thinking, independence, and life-long engagement with choral music.

Prerequisite(s): ME 262, Sophomore Review.

ME 564 Art of Teaching Music IV 4 Credits**ME 581 Praxis in Elementary Music 3 Credits**

This course prepares students to teach music in elementary schools. Consistent with the department's commitment to Critical Pedagogy for Music Education, the course covers materials and methodologies to engage young children in musical experiences that are significant, transformational, and that connect to the social context in which they teach. Students learn to write and evaluate curriculum and to integrate curriculum with academic core subjects. An off campus field experience in local elementary schools is an integral part of this course. Students must provide their own transportation to practicum sites. It is recommended that students complete Developmental or Educational Psychology before taking ME 581. course content, activities and experiences in this course connect to the New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. Music Education majors will receive priority registration for this class. A minimum 2.75 cumulative GPA is required.

Prerequisite(s): For undergraduates only; ME 171, ME 172 ME 271; two semesters of Piano Secondary, not including PI 045; TH 142.

ME 582 Praxis in Secondary Music 3 Credits

This course prepares students to teach music in secondary schools. Consistent with the department's commitment to Critical Pedagogy for Music Education, the course covers materials and methodologies to engage middle school and high school students in musical experiences that are significant, transformational, and that connect to the social context in which they teach. Students learn to write and evaluate curriculum and to integrate curriculum with academic core subjects. An off campus field experience in local middle and high schools is an integral part of this course. Students must provide their own transportation to practicum sites. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. It is recommended that students complete ME 581 and either Developmental or Educational Psychology before taking ME 582. Music Education majors will receive priority registration for this class.

Prerequisite(s): completion of two semesters of Piano Secondary, not including PI 045, TH 142, and a minimum 2.75 cumulative grade point average.

ME 587 Music in Special Educ 1 Credits

This course is designed to acquaint the pre-service teacher with the special needs of exceptional children in music classes. Students learn to adapt instruction to accommodate a variety of exceptionalities that are both physical and emotional. Content includes categories of special students, characteristic behaviors, mainstreaming, and classroom methodology. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. It is recommended that student take this course before the student teaching semester.

Prerequisite(s): Senior status.

ME 588 Dalcroze Studies 2 Credits

The purpose of this elective course is to provide students with an intensive experience in eurhythmics and eurhythmics pedagogy leading to an understanding of Dalcroze's principles regarding movement, solfège, improvisation and their uses in the classroom. An important focus of the class will be to provide an insight into kinesthetic-based learning as a conduit to inform and deepen the musical experience. Opportunities for lesson planning and curriculum development in the Dalcroze model will be offered. Students will write and present practice lessons. In addition, students will develop improvisation skills necessary to integrate eurhythmics into private applied instruction.

ME 591 Choral Music Grades 5-12 3 Credits

This course is designed to acquaint the music educator with repertoire suitable for use with middle and senior high school choral ensembles. Representative repertoire from all periods of music will be discussed, analyzed and performed in class. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

Prerequisite(s): Junior status.

ME 592 Creativity & Music Technology 2 Credits

Creativity and Technology in the Music Classroom is designed to prepare students to foster musical creativity using a variety of approaches and tools. In particular, students will use equipment such as digital audio workstations, MIDI controllers, microphones, and SmartBoards to facilitate rich and engaging creative experiences. Students will explore ways to structure learning experiences in response to the needs and interests of students, and will examine current thinking and trends related to the uses of creativity and technology in the music classroom.

Prerequisite(s): Junior status or permission of instructor.

ME 595 Assessing Music Learning 1 Credits

This course provides pre-service music teachers with the strategies to assess music learning. Students study various testing models and learn to write and grade traditional tests such as true/false, multiple choice and essay. In addition, students examine authentic assessment, performance assessment and portfolio assessment models. Topics such as validity, reliability, standardized tests and testing bias will be included. In addition, students will learn how to read and interpret quantitative test data and examine the literature on grading. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. The content of this course conforms to the recommendations of the Professional Teaching Standards adopted by the State of New Jersey in 2002. In some semesters, this course may be offered in an on-line format.

Prerequisite(s): Senior status.

ME 650 Thesis 1 Credits

Independent research under faculty supervision leading to the writing of a master's thesis. Students register for this course in every semester or summer term in which assistance is provided by the thesis advisor.

Prerequisite(s): ME 685 (preferred) or MH 731; Permission of the Chair for Music Education is required to register for this course.

ME 671 Music and Hip Hop Culture 3 Credits**ME 672 Teaching/Learning: Urban Sch 3 Credits****ME 682 Choral Music Education 3 Credits**

This course is designed to assist choral music educators to improve their pedagogical effectiveness. This course will provide students with the knowledge, skills and dispositions necessary for developing comprehensive musicianship in the choral ensemble setting through the study of creating original music, responding to music, connecting to students and performing vocal/choral music with a primary focus on choral pedagogy, curriculum development, unit and rehearsal planning, programming, vocal development, program management, music literacy pedagogy, music technology and assessment.

Prerequisite(s): CR 621, ME 692, ME 721, ME 723.

ME 685 Research in Music Education 3 Credits

Intended for students in the M.M.E. and BM/MAT degree programs, this course provides students with the tools necessary to write a qualitative master's thesis. Specific objectives include an overview of qualitative research paradigms, selecting a research topic, developing a literature review, designing an appropriate methodology and collecting and analyzing data. Additionally, students explore a broad variety of research topics in music education, specialization in a chosen research topic in music education, the ability to review music education research literature and to synthesize findings in a scholarly paper using the appropriate style manual. Students master APA and Chicago styles and complete the thesis proposal during this course. The departmental Thesis Manual is available at www.rider.edu/musiced. ME 685, 692 and 791 are offered in rotation. One course is offered every semester.

ME 686 Teaching Music in the 21st Century 3 Credits

Critical theory and critical pedagogy provide the framework for advanced study in post-modern teaching philosophies and teaching strategies as applied to music education. Techniques to engage students in diverse ways of thinking about music teaching and learning that transform both student and teacher will be presented. Always in the context of the social and political structures of schooling and the place schooling has in society, students will be empowered to create a dialoguing and problem-posing pedagogy for teaching music to children at all grade levels.

ME 690 Independent Research and Study 3 Credits

An elective course providing an opportunity to pursue a topic of special interest under the guidance of a music education faculty member. The proposal must be approved prior to registration for the course.

ME 692 Hist & Phil of Music Educ 3 Credits

The course will survey the major philosophical approaches to music education from their context in history. Relationships to developments in general education as well as the political climate of the period will be explored. A major paper investigating one of the philosophical thinkers will be required in addition to a well developed personal philosophy of music education. ME 685, 692 and 791 are offered in rotation. One course is offered every semester.

ME 693 Seminar in Music Educ 3 Credits

While the topics vary from year to year, international perspectives in music education form the foundation for this seminar.

ME 721 Curric Development & Eval 3 Credits

This course examines the relationship between curriculum theory and philosophy of music education. Through the study of traditional and contemporary models of curriculum development and evaluation, students broaden their understanding of curriculum as it impacts the learning process. Post modern theory consistent with the Department's commitment to Critical Pedagogy for Music Education provide the focal point for the development of curricula that enhance and support quality music education. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

ME 723 Psychology for Music Tch 3 Credits

This course merges the science of psychology with the teaching of music. It helps the student to understand the applications of psychological principles to the music learning process. The course will identify and discuss variables that affect a student's learning of music. Open to all graduate students. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

ME 725 Teaching Instrumental Music 3 Credits

A graduate level survey of the pedagogy necessary to teach instrumental music (woodwinds, brass, string and percussion instruments) and to develop and maintain beginning string and wind ensembles. While the class will include some playing and performance, it is not designed to develop proficiency on the individual instruments. Students must demonstrate sufficient competencies to provide beginning instruction. Instruments will be available for rental. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. Rental fee, per instrument: \$20.

ME 727 Teaching College 3 Credits

This course is designed for the graduate student who will be teaching at the college level. The content combines the theory of college teaching with praxis. Topics covered include: the psychology of the undergraduate, teaching graduate students, designing a syllabus, presenting course content, strategies for student-centered learning and assessment. Whenever possible, students will have the opportunity to intern with college faculty and will observe, present demonstration lessons, be coached and mentored. Open to all graduate students.

ME 750 BM/MAT Capstone 3 Credits

Independent research leading to a completed capstone project, which may be a thesis, action research, or another project or research initiative. The project must be approved by the department.

Prerequisite(s): ME 685; Permission of the Chair for Music Education is required to register for this course.

ME 771 Critical Pedagogy for Music Ed 3 Credits

This course presents the fundamental concepts, contexts and constructs that define Critical Pedagogy for Music Education. It focuses on the application of critical theory as a philosophical perspective to inform decisions teachers make when planning instruction for their students.

ME 775 MME Capstone 1 Credits

Independent research leading to a completed capstone project, such as curriculum and assessment development, pedagogical publication or presentation, instructional materials, etc. The project must be approved by the department.

ME 791 Internship in Music Teaching 3 Credits

A field-based experience consisting of three hours per week of internship teaching at a public or private school. Students may be placed in one of the residency programs of Westminster Academy. They will work with a cooperating teacher and be supervised by the instructor of the internship. Students will meet with the instructor periodically through the semester. In addition, they will prepare and teach lessons and submit documentation to chronicle the internship experience. International students in music education are strongly encouraged to take this course. ME 685, 692 and 791 are offered in rotation. One course is offered every semester.

AS 490 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

AS 491 Arts & Science Internship 1-12 Credits

This course requires 95 hours for each three credits for which the student enrolls. The student is required to spend 13 weeks of on-site participation in a broad range of daily operations at an internship site. In addition, there are group meetings with all students participating in internships and site-analysis assignments given under the direction of Arts and Sciences faculty. Students may enroll for a maximum of 12 credits of internships.

Prerequisite(s): at least junior level standing.

AS 691 Arts & Science Internship 1-3 Credits

This course requires 15 hours for each credit for which the student enrolls. The internship requires on-site participation at a pre-approved site. Students may enroll for a maximum of 3 credits.

Prerequisite(s): graduate standing.

Bachelor of Music in Music Education: Master of Arts in Teaching (dual degree program)

Program Overview

The Bachelor of Music-Master of Arts in Teaching (M.A.T.) is a five-year, dual-degree University program whereby students earn a Bachelor of Music degree with a major in Music Education from Westminster Choir College and a Master of Arts in Teaching degree from the School of Education. Admission is by faculty invitation and based on demonstration of high academic achievement over the first four semesters and performance on the Sophomore Review, including portfolio evidence of satisfactory growth. Students complete graduate music education courses to fulfill most of the M.A.T. Degree program requirements. A supervised capstone project is the culminating experience for the program.

Bachelor of Music in Music Education Program Requirements

The undergraduate Music Education degree program includes courses in music education, musicianship studies, general education, and field experiences. Each semester, students increasingly engage in field

experiences, culminating with a semester of full-time student teaching in the last year.

All music education majors must maintain a portfolio of work providing evidence of their suitability for teaching. Portfolios are reviewed as part of the Sophomore Review taken near the completion of 60 credits. Music Education majors must maintain a minimum cumulative grade point average of 3.0. Students whose general progress is unsatisfactory or whose cumulative grade point average falls below a minimum 3.0 level may be dropped from the Music Education major. If a student is dropped from the major because of failure to maintain the minimum grade point average, s/he may apply for readmission to the Music Education department. Readmission will be dependent upon various criteria, including the G.P.A., current academic progress and the student's general standing. Decisions regarding retention or appeals will be made in a manner consistent with state and institutional non-discrimination policies.

To graduate, students must complete all requirements for New Jersey teacher certification for Certified Educator with Advanced Standing (CEAS). **Students who want to be able to apply for teaching positions in other states should become familiar with teacher certification requirements for states of interest ASAP to determine if additional coursework is needed.** In addition to successfully completing required coursework, the State of New Jersey requires students to:

1. Students must satisfy basic skills (reading, writing, math) proficiency as a prerequisite for taking the Sophomore Review. Proficiency is satisfied for students who score at or above the identified cut scores on the SAT or ACT. Students who do not have sufficient SAT or ACT test scores must pass the Praxis Core Academic Skills (<https://www.ets.org/praxis/nj/requirements>) tests to satisfy basic skills proficiency. For more information, go to the Music Education website (<http://www.rider.edu/wcc/academics/undergraduate-programs/music-education>).
2. Complete a minimum of 50 hours clinical practice during the first four semesters and 175 hours of clinical practice leading up to the semester of full-time clinical practice (student teaching).
3. Pass the Praxis Music Content Exam.
4. Pass the performance-based edTPA Exam.

For more information about non-course program requirements, see links on Undergraduate Music Education Homepage. (<http://www.rider.edu/wcc/academics/undergraduate-programs/music-education>)

Curriculum Overview

The Master of Arts in Teaching program provides in-depth learning experiences in music education research, psychology, history, curriculum, assessment, supportive electives, and a culminating capstone project.

Footnotes

- ¹ VC 115 and VC 116 are required for voice primary students only. Organ and piano primary students may substitute four additional credits of free electives for these two courses.

Notes

- The BM/MAT program normally requires five years of study. In order to gain admission, undergraduates must meet the admission requirements set by the School of Education and must be recommended by the Music Education Department of Westminster Choir College. Candidates will be evaluated during the Sophomore Review and if invited, may begin during the first semester of the junior year.
- Upon completion of 124 credit hours and the student teaching experience, individuals are classified as graduate students.
- Seven semesters of ensemble credits must be completed at the undergraduate level.
- Some graduate-level courses may be offered only on the Lawrenceville campus of Rider University.
- Upon completion of all requirements of the dual degree program, students receive the Bachelor of Music degree from Westminster Choir College and the Master of Arts in Teaching degree from the School of Education of Rider University. Recipients of the two degrees are then recommended for New Jersey teacher certification.
- Students complete a capstone project in this program. Information and guidelines can be found on the Music Education Department website. The course that accompanies this project must be taken in the fifth year of the program.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

¹ VC 115 and VC 116 are required for voice primary students only. Organ and piano primary students may substitute four additional credits of free electives for these two courses.

² A student may not enroll in any other courses, ensembles or lessons during the semester of student teaching.

Courses and Descriptions**ME 111 Music Education Lab 0 Credits**

Undergraduates must meet the weekly attendance and participation requirement for Music Education Lab during every semester of enrollment up to seven semester as an undergraduate Music Education major except for the student teaching semester. Grading is "P" (satisfactory) or "U" (unsatisfactory). As part of the Music Education Lab experience, students are required to complete 15 hours of professional development.

ME 161 Art of Teaching Music I 3 Credits

Art of Teaching Music I (ATM I) is a first in the sequence of Music Education courses designed to prepare the undergraduate Music Education major students for their student teaching experience and completion of their teaching licensure. There will be field observations of master teachers under the aegis of a music education faculty that will allow students not only to observe, but to have guided experience in assessing how teaching and learning are experienced in real classrooms. Partnerships between local expert teachers and music education faculty will allow students to complete field observations as well as guided experience in teaching and assessing students in real classrooms.

ME 171 Critical Pedagogy I 2 Credits

This course provides undergraduate music education majors with a foundation in issues related to teaching music in public schools. This course will engage students in diverse ways of thinking about music teaching practice and social theory that transforms the relationships among classroom music teaching, performance and the production of musical knowledge. In addition to the social and political contexts of schooling in general, the course will explore the moral and ethical dilemmas music teachers face in the day-to-day routines of their classroom teaching. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. Music Education majors will receive priority registration.

ME 172 Guitar & Recorder in the Classroom 1 Credits

This course provides undergraduate music education majors with a foundation for teaching and playing the guitar and recorder. Students will gain technical proficiency in both instruments while learning appropriate repertoire of a multicultural and diverse nature. Students will also learn efficient pedagogy practices for teaching both instruments, learning of their application in educational settings. Students are expected to provide their own acoustic guitar for this course. Recorders are available for purchase in the college bookstore.

ME 187 Instrumental Music: Strings 1 Credits

This course is designed as an introduction to the pedagogy of string instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring, and idiomatic writing are investigated. When available, instruments may be rented from the college. Rental fee, per instrument: \$25.

ME 188 Instrumental Music: Winds/Percussion 2 Credits

This course is designed as an introduction to the pedagogy of brass, woodwind, and percussion instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring and idiomatic writing are investigated. When available, instruments may be rented from the college. Students must provide their own drum pads and sticks. Rental fee, per instrument: \$60.

ME 262 Art of Teaching Music II 4 Credits

Art of Teaching Music II (ATM II) is designed to build on the knowledge, skills, and dispositions, introduced in ATM I. Students will expand their abilities in the domains of planning, teaching, assessing, reflecting, developing musicianship, and philosophy in context of teaching general music. Moreover, they will have the opportunity to put these abilities into practice when teaching peers and teaching elementary and middle general school students.

Prerequisite(s): ME 161.

ME 271 Critical Pedagogy II 2 Credits

Critical Pedagogy II explores the theories that provide a psychology of learning to frame Critical Pedagogy for Music Education. Grounded in experiential learning, constructivism and multiple intelligences theory, the course content honors the diversity of gifts and challenges children present inside the music classroom. Students learn strategies for the teaching of literacy that integrate into a teaching model to empower musicianship, meet National Standards for Music Education, New Jersey Core Curriculum Content Standards in Music and align to INTASC standards and the New Jersey Core Curriculum Content Standards in Music. Students design instruction that yields transformational experiences for both the children and their music teacher. This course includes required off-campus field observation in the schools. It is recommended that students complete SP 175 before taking this course. Music Education majors will receive priority registration for this course.

Prerequisite(s): ME 171.

ME 271H Critical Pedagogy II Honors 1 Credits

Primary source readings, expanded assignment and additional content that supplements ME 271. Capstone project consists of a significant paper based upon original ideas that reflect the tenets of the coursework.

Prerequisite(s): ME 171, BHP status.

Corequisite(s): ME 271; Online only.

ME 371 Critical Pedagogy III 2 Credits

Through dialogue and small group discussion, students analyze the principal sociological and philosophical discourses that influence education in general and music education specifically. Historical and post-modern perspectives as well as international perspectives are considered within the context of a Critical Pedagogy for Music Education. Students, with their teacher, look critically at the role and purpose of education and music education in American society and learn to critique theory and practice in the field with the goal of informing their own teaching practice. Students compose a personal philosophy of music education. This culminating paper reflects their ability to synthesize and process the ideas presented and discussed throughout the course and to present and develop their own original thoughts with depth and significance. It also provides evidence that students can participate in a community of scholarly discourse on topics germane to music education. Music Education majors will receive priority registration for this class.

Prerequisite(s): ME 271 and junior status. **Corequisite(s):** ME 581 or ME 582. 201910.

ME 371H Critical Pedagogy III Honors 1 Credits

Primary source readings, expanded assignment and additional content that supplements ME 371. Students will demonstrate the ability to synthesize and process complex ideas, and develop original thoughts with depth and significance.

Prerequisite(s): ME 271, BHP status.

Corequisite(s): ME 371; Online only.

ME 471 Music and Hip Hop Culture 3 Credits

Hip Hop in the United States is arguably the most lucrative, popular, and culturally challenging contemporary musical force. The narratives of Hip Hop go beyond the boundaries of race and class as well as those of music, poetry and dance. As such, Hip Hop is a phenomenon that presents problems as well as great possibilities. This course explores them from the standpoint of educational sociology, looking at their implications for music in schools as well as in daily life.

Prerequisite(s): ME 271.

ME 472 Teaching/Learning:Urban Schools 3 Credits

This course offers students theoretical and practical insight into teaching in urban schools. The class will present an analysis and practical implications for what is needed in order to successfully engage in teaching in urban centers in the United States. Students will balance field experiences with critical analyses of issues such as multicultural teaching, race, class, and economics in urban schools as well as their curricular and pedagogical implications.

Prerequisite(s): ME 581, ME 582.

ME 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

ME 491 Kodaly Music Reading 2 Credits**ME 492 Student Teaching 12 Credits**

ME 492 - Student Teaching A full semester internship in directed full-time teaching supervised by department members and carried out in schools with approved cooperating teachers. In addition to the field experience, students attend a weekly seminar on campus to discuss current issues in music education as they relate to individual teaching situations. Students discuss classroom management strategies, action research, authentic instruction, critical thinking, feeling and action as well as teaching to focusing questions, concepts and objectives. Throughout student teaching, students maintain a digital portfolio that demonstrates how they meet the New Jersey State and INTASC teaching standards. At the conclusion of the semester, students attend a portfolio review with members of the Music Education faculty to assess the success of the teaching experience. Students must provide their own transportation to student teaching site. Student Teaching fee: \$245. Fees for the Praxis Examination and Teacher Certification are additional. Additional information regarding student teaching may be found in the department's Student Teaching Handbook at www.rider.edu/musiced

Prerequisite(s): Classification as a full senior; Satisfactory completion of music education courses numbered 171, 172, 271, 187 and 188, 581, 582 and either Developmental or Educational Psychology; Satisfactory completion of TH 241; For voice primary students, satisfaction of all requirements of PI 204; A minimum 2.75 cumulative grade point average; Demonstrated aptitude, motivation and potential for success in teaching, as evidenced by the successful completion of portfolio reviews; Departmental approval; Students in the Master of Music Education (MME) degree program must take the following courses as prerequisites to student teaching; ME 581, ME 582, ME 587, ME 595, ME 725.

ME 499 Special Topics Music Education 2 Credits

The content of this course and the number of credits will vary with the special interests and qualifications of the professor teaching it.

ME 540 Choir Train for Young Singers 3 Credits

This course focuses on children's choirs in school, church and community. Students learn strategies to teach children good vocal technique and to build musical literacy through the study of appropriate repertoire. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

Prerequisite(s): Junior status.

ME 563 Art of Teaching Music III 4 Credits

Through course assignments, discussion, and clinical practice in varied school and community choral settings, course participants learn how to create meaningful elementary music experiences that foster individual success, accountability, a sense of accountability, critical thinking, independence, and life-long engagement with choral music.

Prerequisite(s): ME 262, Sophomore Review.

ME 564 Art of Teaching Music IV 4 Credits**ME 581 Praxis in Elementary Music 3 Credits**

This course prepares students to teach music in elementary schools. Consistent with the department's commitment to Critical Pedagogy for Music Education, the course covers materials and methodologies to engage young children in musical experiences that are significant, transformational, and that connect to the social context in which they teach. Students learn to write and evaluate curriculum and to integrate curriculum with academic core subjects. An off campus field experience in local elementary schools is an integral part of this course. Students must provide their own transportation to practicum sites. It is recommended that students complete Developmental or Educational Psychology before taking ME 581. course content, activities and experiences in this course connect to the New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. Music Education majors will receive priority registration for this class. A minimum 2.75 cumulative GPA is required.

Prerequisite(s): For undergraduates only; ME 171, ME 172 ME 271; two semesters of Piano Secondary, not including PI 045; TH 142.

ME 582 Praxis in Secondary Music 3 Credits

This course prepares students to teach music in secondary schools. Consistent with the department's commitment to Critical Pedagogy for Music Education, the course covers materials and methodologies to engage middle school and high school students in musical experiences that are significant, transformational, and that connect to the social context in which they teach. Students learn to write and evaluate curriculum and to integrate curriculum with academic core subjects. An off campus field experience in local middle and high schools is an integral part of this course. Students must provide their own transportation to practicum sites. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. It is recommended that students complete ME 581 and either Developmental or Educational Psychology before taking ME 582. Music Education majors will receive priority registration for this class.

Prerequisite(s): completion of two semesters of Piano Secondary, not including PI 045, TH 142, and a minimum 2.75 cumulative grade point average.

ME 587 Music in Special Educ 1 Credits

This course is designed to acquaint the pre-service teacher with the special needs of exceptional children in music classes. Students learn to adapt instruction to accommodate a variety of exceptionalities that are both physical and emotional. Content includes categories of special students, characteristic behaviors, mainstreaming, and classroom methodology. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. It is recommended that student take this course before the student teaching semester.

Prerequisite(s): Senior status.

ME 588 Dalcroze Studies 2 Credits

The purpose of this elective course is to provide students with an intensive experience in eurhythmics and eurhythmics pedagogy leading to an understanding of Dalcroze's principles regarding movement, solfège, improvisation and their uses in the classroom. An important focus of the class will be to provide an insight into kinesthetic-based learning as a conduit to inform and deepen the musical experience. Opportunities for lesson planning and curriculum development in the Dalcroze model will be offered. Students will write and present practice lessons. In addition, students will develop improvisation skills necessary to integrate eurhythmics into private applied instruction.

ME 591 Choral Music Grades 5-12 3 Credits

This course is designed to acquaint the music educator with repertoire suitable for use with middle and senior high school choral ensembles. Representative repertoire from all periods of music will be discussed, analyzed and performed in class. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

Prerequisite(s): Junior status.

ME 592 Creativity & Music Technology 2 Credits

Creativity and Technology in the Music Classroom is designed to prepare students to foster musical creativity using a variety of approaches and tools. In particular, students will use equipment such as digital audio workstations, MIDI controllers, microphones, and SmartBoards to facilitate rich and engaging creative experiences. Students will explore ways to structure learning experiences in response to the needs and interests of students, and will examine current thinking and trends related to the uses of creativity and technology in the music classroom.

Prerequisite(s): Junior status or permission of instructor.

ME 595 Assessing Music Learning 1 Credits

This course provides pre-service music teachers with the strategies to assess music learning. Students study various testing models and learn to write and grade traditional tests such as true/false, multiple choice and essay. In addition, students examine authentic assessment, performance assessment and portfolio assessment models. Topics such as validity, reliability, standardized tests and testing bias will be included. In addition, students will learn how to read and interpret quantitative test data and examine the literature on grading. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. The content of this course conforms to the recommendations of the Professional Teaching Standards adopted by the State of New Jersey in 2002. In some semesters, this course may be offered in an on-line format.

Prerequisite(s): Senior status.

ME 650 Thesis 1 Credits

Independent research under faculty supervision leading to the writing of a master's thesis. Students register for this course in every semester or summer term in which assistance is provided by the thesis advisor.

Prerequisite(s): ME 685 (preferred) or MH 731; Permission of the Chair for Music Education is required to register for this course.

ME 671 Music and Hip Hop Culture 3 Credits**ME 672 Teaching/Learning: Urban Sch 3 Credits****ME 682 Choral Music Education 3 Credits**

This course is designed to assist choral music educators to improve their pedagogical effectiveness. This course will provide students with the knowledge, skills and dispositions necessary for developing comprehensive musicianship in the choral ensemble setting through the study of creating original music, responding to music, connecting to students and performing vocal/choral music with a primary focus on choral pedagogy, curriculum development, unit and rehearsal planning, programming, vocal development, program management, music literacy pedagogy, music technology and assessment.

Prerequisite(s): CR 621, ME 692, ME 721, ME 723.

ME 685 Research in Music Education 3 Credits

Intended for students in the M.M.E. and BM/MAT degree programs, this course provides students with the tools necessary to write a qualitative master's thesis. Specific objectives include an overview of qualitative research paradigms, selecting a research topic, developing a literature review, designing an appropriate methodology and collecting and analyzing data. Additionally, students explore a broad variety of research topics in music education, specialization in a chosen research topic in music education, the ability to review music education research literature and to synthesize findings in a scholarly paper using the appropriate style manual. Students master APA and Chicago styles and complete the thesis proposal during this course. The departmental Thesis Manual is available at www.rider.edu/musiced. ME 685, 692 and 791 are offered in rotation. One course is offered every semester.

ME 686 Teaching Music in the 21st Century 3 Credits

Critical theory and critical pedagogy provide the framework for advanced study in post-modern teaching philosophies and teaching strategies as applied to music education. Techniques to engage students in diverse ways of thinking about music teaching and learning that transform both student and teacher will be presented. Always in the context of the social and political structures of schooling and the place schooling has in society, students will be empowered to create a dialoguing and problem-posing pedagogy for teaching music to children at all grade levels.

ME 690 Independent Research and Study 3 Credits

An elective course providing an opportunity to pursue a topic of special interest under the guidance of a music education faculty member. The proposal must be approved prior to registration for the course.

ME 692 Hist & Phil of Music Educ 3 Credits

The course will survey the major philosophical approaches to music education from their context in history. Relationships to developments in general education as well as the political climate of the period will be explored. A major paper investigating one of the philosophical thinkers will be required in addition to a well developed personal philosophy of music education. ME 685, 692 and 791 are offered in rotation. One course is offered every semester.

ME 693 Seminar in Music Educ 3 Credits

While the topics vary from year to year, international perspectives in music education form the foundation for this seminar.

ME 721 Curric Development & Eval 3 Credits

This course examines the relationship between curriculum theory and philosophy of music education. Through the study of traditional and contemporary models of curriculum development and evaluation, students broaden their understanding of curriculum as it impacts the learning process. Post modern theory consistent with the Department's commitment to Critical Pedagogy for Music Education provide the focal point for the development of curricula that enhance and support quality music education. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

ME 723 Psychology for Music Tch 3 Credits

This course merges the science of psychology with the teaching of music. It helps the student to understand the applications of psychological principles to the music learning process. The course will identify and discuss variables that affect a student's learning of music. Open to all graduate students. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

ME 725 Teaching Instrumental Music 3 Credits

A graduate level survey of the pedagogy necessary to teach instrumental music (woodwinds, brass, string and percussion instruments) and to develop and maintain beginning string and wind ensembles. While the class will include some playing and performance, it is not designed to develop proficiency on the individual instruments. Students must demonstrate sufficient competencies to provide beginning instruction. Instruments will be available for rental. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. Rental fee, per instrument: \$20.

ME 727 Teaching College 3 Credits

This course is designed for the graduate student who will be teaching at the college level. The content combines the theory of college teaching with praxis. Topics covered include: the psychology of the undergraduate, teaching graduate students, designing a syllabus, presenting course content, strategies for student-centered learning and assessment. Whenever possible, students will have the opportunity to intern with college faculty and will observe, present demonstration lessons, be coached and mentored. Open to all graduate students.

ME 750 BM/MAT Capstone 3 Credits

Independent research leading to a completed capstone project, which may be a thesis, action research, or another project or research initiative. The project must be approved by the department.

Prerequisite(s): ME 685; Permission of the Chair for Music Education is required to register for this course.

ME 771 Critical Pedagogy for Music Ed 3 Credits

This course presents the fundamental concepts, contexts and constructs that define Critical Pedagogy for Music Education. It focuses on the application of critical theory as a philosophical perspective to inform decisions teachers make when planning instruction for their students.

ME 775 MME Capstone 1 Credits

Independent research leading to a completed capstone project, such as curriculum and assessment development, pedagogical publication or presentation, instructional materials, etc. The project must be approved by the department.

ME 791 Internship in Music Teaching 3 Credits

A field-based experience consisting of three hours per week of internship teaching at a public or private school. Students may be placed in one of the residency programs of Westminster Academy. They will work with a cooperating teacher and be supervised by the instructor of the internship. Students will meet with the instructor periodically through the semester. In addition, they will prepare and teach lessons and submit documentation to chronicle the internship experience. International students in music education are strongly encouraged to take this course. ME 685, 692 and 791 are offered in rotation. One course is offered every semester.

Bachelor of Music: Organ Performance

Program Overview

The Organ Department at Westminster Choir College educates students in many facets of organ playing and related topics. Courses in performance, collaborative skills, choral conducting, improvisation, and literature are offered each semester. Westminster is home to a collection of 18 pipe organs built by Aeolian-Skinner, Beckerath, Casavant, Flentrop, Noack, and others. Students are encouraged to seek church employment during their time at Westminster; the organ faculty and sacred music office maintain a list of available positions in the area. For more information, including audition requirements and instrument specifications, visit the Organ Department website (<http://www.rider.edu/organ>).

Curriculum Overview

The undergraduate curriculum includes eight semesters of applied lessons, two semesters of organ literature, two semesters of organ improvisation, and courses in choral conducting, worship planning, and accompanying.

Degree Recital Requirements

- Two recitals: Memorization is encouraged, but not required.
- A recital of at least 45 minutes at the conclusion of the Junior year.
- A recital of at least 60 minutes at the conclusion of the Senior year.
- Students are required to be enrolled in organ lessons at Westminster during the semester of a degree recital, without exception.

Performance Class Requirements

For each semester a student is enrolled in organ lessons as a performance major, these requirements must be met:

- Three solo works, one of which must be memorized.
- Two hymns, one of which must be memorized.
- One collaborative work (i.e. anthem, vocal/instrumental solo, concerto, etc.)

Jury Requirements

- All freshman performance majors must pass a qualifying jury that includes:

- Five Orgelbüchlein Chorales, by J. S. Bach; a Leipzig, Schübler, or Clavierübung III chorale can be substituted for one of these. (This requirement may be met in any jury or performance class during the first year.)
- A Prelude and Fugue of J.S. Bach or Präludium of Dietrich Buxtehude, or Nicolas Bruhns
- Three contrasting pieces from the 19th, 20th, or 21st centuries.
- A complete hymn performed creatively (introduction, alternative harmonizations, etc.)
- All major and minor scales (harmonic and melodic); four octaves

Note: One of these works must be memorized

- A jury must be performed at the conclusion of any semester that does not include a degree recital.

Degree Offered

- B.M. in Organ Performance

Notes

- ¹ Four terms of one-credit, half-hour lessons (suffix B) are covered under full-time tuition. Students wishing to take a full-hour lesson register for Suffix G, and are billed for one half-hour. After four terms are complete, all harpsichord or piano lessons are considered elective.
- ² Completion of French, German, Italian, Latin, or Spanish IV is required. If students are exempted from one or more semesters of foreign language study, they must replace the missing credits with other Arts & Sciences electives.
- ³ Attendance at weekly studio classes is required during all semesters of applied study.
- ⁴ A half recital must be presented in the junior year. A full recital must be presented in the senior year. All recitals must receive prior departmental approval.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

OR 401F Organ Primary 1 Credits

OR 401G Organ Primary 2 Credits

OR 433 Organ Literature I 3 Credits

Historical study of organ literature coordinated with a study of the development of the organ as a musical instrument.

OR 434 Organ Literature II 3 Credits

Continuation of OR 433.

OR 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

OR 587 Organ Improvisation 2 Credits

A laboratory in the keyboard disciplines of modulation, transposition, improvisation and vocal score reading. Required for undergraduate Organ Performance majors; others may elect the course by permission of the instructor.

OR 588 Organ Pedagogy 2 Credits

Pedagogical approaches to organ playing. Required for undergraduate Organ Performance majors; others may elect the course by permission of the instructor.

OR 589 Organ Improvisation II 2 Credits

Continuation of OR 587.

OR 590 Accompanying at the Organ 2 Credits

Development of accompanying techniques essential to the professional organist. Arranging and transcription from piano reductions and orchestral scores; standard choral/organ literature. Leading congregational song; appropriate methods of instrumental registration.

OR 623 Organ Music of J.S. Bach 3 Credits

A study by genre of Bach's organ compositions will include background, overview of the influences of Buxtehude, Pachelbel and Böhm, and performance practice issues. The question of the "Bach organ" will be explored. Prerequisite(s): MH 731, OR 433.

Corequisite(s): MH 731, OR 433.

OR 629 Seminar in Organ Literature 2 Credits

An intensive study of an area of organ literature or its performance practice. Specific content will change with each semester. Emphasis upon in-depth study of the works of a selected composer or genre.

OR 641A Organ Primary 2 Credits

OR 641B Organ Primary 1 Credits

OR 641C Organ Elective 2 Credits

OR 641D Organ Elective 1 Credits

OR 641E Organ Primary 2 Credits

OR 641F Organ Primary 1 Credits

OR 690 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

OR 723 Organ Literature Before 1800 3 Credits

Historical study of the organ literature coordinated with a study of the development of the organ as a musical instrument.

OR 724 Organ Literature since 1800 3 Credits

Study and research into the style, form, and interpretation of representative organ works composed after 1800. Study and research into national styles of organ composition and construction in France, Germany, England and North America.

Bachelor of Music: Piano

Program Overview

Piano at Westminster Choir College has multiple dimensions at both the undergraduate and graduate levels. It fosters the development of students who perform on a high level as soloists, as artist-teachers and as collaborators with other performing artists.

Our program helps to develop a strong foundation of technique and knowledge of piano literature and style. The department also provides instruction for undergraduate students who need keyboard skills in order to function effectively throughout their professional careers.

Curriculum Overview

Undergraduate Piano Primary: Piano primary students majoring in sacred music, B.A. in music, music education, or theory/composition are expected to play once each semester in a performance class. Seniors

give a full or half recital. Freshmen have required juries at the end of each semester; sophomores and juniors, at the end of each year.

Undergraduate Piano Secondary: All undergraduate voice primary students must enroll for piano secondary study until completing the undergraduate piano secondary curriculum course sequence. Instruction is in the form of piano classes. Placement in the class by level is determined at the beginning of each semester. Instruction entails study and performance of piano literature from the Baroque through the 21st Century as well as development of proficiency in areas of functional keyboard skills.

Piano as an Elective: Students may elect private instruction in piano for credit. There are no audition requirements, but an extra fee is charged.

Piano Pedagogy Lab: This is a required graduate Piano Pedagogy course for the purpose of problem solving related to piano teaching. The class format includes open discussion of observations, supervised and independent teaching, questions relating to repertoire, materials, and technique, comparative philosophies and psychologies and their applications, group and private teaching, business issues (e.g. studio policies), use of technology, professional organizations and publications, recital and audition preparation, and parent education.

Piano Studio and Performance Class: This is a weekly recital and lecture hour during which performances are given by students, faculty members, and guest performers. Attendance and participation at weekly studio and performance classes is required for all undergraduate and graduate piano primary students. All Westminster students are invited to attend.

Courses and Descriptions

PI 101A Piano Primary 2 Credits

PI 201A Piano Primary 2 Credits

PI 297 Fund of Piano Pedagogy I 3 Credits

Fundamentals I is devoted to study of techniques, methods, and materials suitable for beginning through early intermediate level students. Other areas of study include motivational strategies, establishment of effective practice habits, recital preparation, technique, and elementary duet materials. Students analyze and demonstrate teaching from three different beginning piano methods. Observation of professional teaching is done in the context of class and private lessons at the Westminster Conservatory.

PI 298 Fund of Piano Pedagogy II 3 Credits

In Fundamentals II, students continue to apply their experience with piano methods to the teaching of students. In addition, the semester is devoted to the study of materials from all style periods for upper elementary and intermediate level students. Students observe private and group lessons appropriate to these levels. The course culminates in an individual lecture recital demonstrating music from a variety of style periods.

Prerequisite(s): PI 297.

PI 301A Piano Primary 2 Credits

PI 397 Fund of Piano Pedagogy III 3 Credits

Fundamentals III involves supervised private and group teaching of beginning students. Emphasis is placed on lesson planning, presentation of concepts, use of technology, and the relationship between technique and musicianship skills. The course further addresses the different psychological and methodological approaches to teaching adults and children in class and private settings, and includes an overview of materials for the adult student and group classes. The course culminates in a lecture recital on a pedagogical subject of the students choice.

PI 401A Piano Primary 2 Credits

PI 413 Accompanying Class 2 Credits

This course is designed with the twofold purpose of allowing undergraduate pianists to fulfill their piano ensemble elective requirement within the professional studies area as well as providing an opportunity for voice primary students to further their piano study in a challenging forum in situations directly related to their repertoire. The students in the class will receive instruction in the stylistic, technical, analytical and linguistic aspects of vocal literature. The many issues involved in vocal collaboration will be discussed along with in-depth study of the pianist's role in musical partnerships. Issues of musical freedom, language, and the varieties of sonic treatment unique to vocal literature will be discussed. Italian, French, German and English song repertoire from various style periods will provide the assignments for performance and discussion.

PI 435 Survey of Piano Literature I 3 Credits

A study of representative works from 1650-1800 by composers including J. S. Bach, C.P.E. Bach, J.C. Bach, Haydn, Mozart, and Beethoven.

Prerequisite(s): MH 248.

PI 436 Survey of Piano Literature II 3 Credits

A study of representative works from 1800 to the present by composers including Beethoven, Schubert, Mendelssohn, Schumann, Chopin, Liszt, Brahms, Debussy, Ravel, Prokofiev, and Bartók.

Prerequisite(s): MH 248.

PI 512 Chamber Music 2 Credits

Emphasis is placed upon rehearsal and performances of representative collaborative literature for strings and piano, and woodwinds and piano. Students will be assigned movements from major chamber works selected from different style periods. Professional instrumentalists will join them for rehearsals and performances in class. An overview of the development of this repertoire will be presented and listening assignments will augment the study of specific works. A project involving the study and presentation of a piano quartet or piano quintet will be included. Attendance at three concerts of instrumental chamber music is required. Permission of applied teacher and instructor is required.

PI 513 Jazz Keyboard/Improv 3 Credits

This course will enable pianists and organists to become familiar with the theory, harmony, and improvisational techniques of jazz piano. Emphasis will be placed upon getting each student to create spontaneous improvisations. The fundamental goal will be that of enabling students accustomed to following a score to move beyond it. Extensive exposure to material from the "Great American Songbook" as well as to jazz standards will provide a structural basis for the course.

Prerequisite(s): TH 142 and PI 201, or equivalent knowledge and technical proficiency.

PI 516 Physical/Psych Aspects Piano 2 Credits

The two major emphases of this course are: (1) the pianist as athlete and 2) the pianist as performer. The first includes a study of appropriate exercise, nutrition, anatomy and physiology as they relate to piano technique, implications for injury prevention, and how to deal with injuries should they occur. The second includes the reading process, strategies for practicing, memorizing techniques, and ways of coping with the behavioral, physical and cognitive manifestations of performance anxiety.

PI 540 Keyboard Skills 3 Credits

The course includes in-depth study of numerous aspects of musicianship skills essential for all pianists within the broader categories of technique and practice strategies; memorization and sight reading; improvisation and lead sheet realization. All aspects of piano musicianship skills will be addressed from practical, pedagogical, and collaborative points of view. Assignments will include examples of studies from a wide range of levels all within the current and developing skill level of each student enrolled in the class.

Prerequisite(s): UG - Eight credits of applied keyboard study or permission of keyboard instructor or course instructor. GR - Permission of course instructor.

PI 585 Piano Ensemble 1 Credits

Study and performance of piano duets, two-piano works, and works for combinations of three or more pianists. The emphasis is on ensemble techniques for rehearsal and performance.

Bachelor of Music: Sacred Music

Program Overview

Students who choose to major in sacred music at Westminster have access to education of the highest quality and broadest scope. The major brings together students from all faiths and interests and seeks

to explore the excellence of various traditions of sacred music. Faculty members have wide experience and expertise in such traditions as Anglican, Lutheran, Methodist, Presbyterian, Reformed, Roman Catholic, the Synagogue and Temple tradition, and others.

Underlying all the offerings of the department is the understanding that sacred music is neither an optional extra nor merely a spiritual entertainment within the service of the church. It is rather an essential part of the liturgy and worship and therefore must have integrity and quality appropriate for its twin functions of carrying the word of God to us, and our words of praise to God.

Undergirding the sacred music program are the offerings of the other Westminster academic and performance departments, the specialized collections containing sacred music materials in Talbott Library, and the vast network of affiliate churches in the greater New York-Philadelphia metropolitan area in which Westminster students gain personal experience in a wide range of sacred music practice.

Curriculum Overview

The curriculum aims, on the one hand, to explore how familiar tradition can be blended with unfamiliar contemporary creativity in choral, congregational, and instrumental music for worship; and, on the other hand, to provide a balanced study of theoretical matters and practical concerns. Technique, repertoire, and performance practice are therefore considered with theology, biblical and post-biblical religious history, and the development and practice of liturgy and worship.

Sacred Music Lab provides an opportunity for students to experience a wide variety of denominational traditions and worship styles. In this context students are immersed in extensive congregational, choral, vocal, organ and instrumental works, which comprise the basic corpus of sacred repertoire. New trends in theology, hymnody and composition are also explored through practical and creative liturgies.

Additional Opportunities

A reciprocal arrangement with Princeton Theological Seminary allows Westminster graduate students to take certain courses offered by the Seminary. Enrollment in such courses is arranged after consultation with

Sacred Music faculty. Speer Library at the Seminary, housing one of the nation's most important theological collections, is another invaluable resource for Westminster students.

Faculty

Steve Pilkington • Associate Professor, Sacred Music, and Director of Chapel, 1992. B.A., St. Olaf College; M.M., University of Illinois; Ph.D., Drew University.

Amanda Quist • Associate Professor and Chair, Conducting, 2010. B.M., Western Michigan University; M.M., Western Michigan University; D.M.A., University of North Texas.

Kathleen Ebling Shaw • Adjunct Instructor, Sacred Music, 1991. B.M., Westminster Choir College.

Tom T. Shelton, Jr. • Assistant Professor II, Sacred Music, 2012. B.M., M.M., University of North Carolina at Greensboro.

Courses and Descriptions

SM 121 Survey of Sacred Music Lit 3 Credits

Broad survey of Christian music. Through standard repertoire, major historical genres of sacred music are explored from biblical roots in the Old and New Testament to the postmodern expressions of our time.

SM 122 Worship and Theology 3 Credits

A study of the content, theology, and history of the Old and New Testament narratives that the church recounts and celebrates in its liturgical year.

SM 142 Intro to Music Ministry 2 Credits

An introduction to the vocational needs, professional relationships, administration styles and teaching roles of the church musician. In addition to an overview of professional standards, emphasis will also be placed on music engraving skills, budgeting, recruitment, endowments and fundraising.

SM 158 Intro Handbell Leadership 1 Credits

A hands-on course providing a strong foundation for the beginning director/ringer. It will include information about ringing instruments, maintenance, ringing and damping techniques, articulations, part assignments, a survey of handbell literature, and rehearsal planning and directing.

SM 250 Contemporary Worship 2 Credits

This course is an exploration of the various forms of worship being practiced in urban churches across America. Practical and skill-based, it is designed to allow the student to explore praise and worship music, different styles of gospel, and other forms of music used in non-traditional worship.

SM 340 Church Field Education 1 Credits

A practical program in which students take responsibility for the music program of an assigned affiliate church. Under supervision, students exercise the skills and concepts learned in the classroom. Enrolled students also meet in a weekly preceptorial. Sacred Music majors must take two consecutive semesters, normally in the junior year.

Prerequisite(s): SM 121, SM 122.

SM 354 Hymnody & Psalmody 3 Credits

A study of the origins and development of Christian song. The first part of the course deals with the nature of the Psalms in their Biblical setting and their use in the worship of different traditions. The second part of the course deals with the history of congregational hymnody - texts, tunes, styles and functions - from the 16th century to the present. The course aims to develop an awareness of the textual and musical treasures available for both congregational and choral use.

SM 360 History of American CM 3 Credits

A broad survey of American church music beginning with colonial psalm-singing and continuing through four centuries of musical development leading up to and including the vast panorama musical practices found in post-modern Christianity. A special emphasis will be placed on the development and influence of African-American church music on contemporary musical practices. Prerequisite(s): SM 121.

SM 410 African Amer Choral Lit 3 Credits

This course is designed to give students a better understanding of the choral literature, historical context and text analysis of African American composers.

SM 454 German Church Music 3 Credits

A study of church choral literature by German composers from the 16th century to the present focusing on the pre-Bach and post-Bach cantata. Class performances of selected works. Complements SM 455. Offered in rotation with other Sacred Music electives.

SM 455 Bach Cantatas 3 Credits

A study of the history, performance practices, and liturgical setting of the cantatas of J.S. Bach. Class performances of selected cantatas. Complements SM 454. Offered in rotation with other Sacred Music electives.

SM 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 is required.

Prerequisite(s): junior or senior standing.

SM 491 SM Internship 1 Credits

A practical program in which students take responsibility for the music program of a local church or work as an intern in an assigned affiliate church. Under faculty supervision, students exercise the skills and concepts learned in the classroom. Enrolled students also meet in a weekly preceptorial. Sacred music majors must take two consecutive semesters, normally in the junior year.

Prerequisite(s): CR 215.

SM 509 Jubilee Singers 1 Credits

This auditioned ensemble is devoted to the performance of sacred music from the African-American tradition.

SM 510 Conducting Adult Church Choirs: Pedagogy and Management 2 Credits

A practical, skill-based course devoted to the building and maintenance of church music programs serving adults.

SM 511 Sacred Music Lab 0 Credits

Series of classes that addresses a variety of experiences in Sacred Music while rotating principal themes and ideas. Student preparation of monthly worship settings will put studied concepts into practice.

SM 512 Conducting Children and Youth Church Choirs: Pedagogy and Management 2 Credits

A practical, skill-based course devoted to the building and maintenance of church music programs serving children and youth.

SM 517 Concert Handbell Choir II 1 Credits

Open to students who have had previous handbell experience. Intermediate to advanced repertoire, with opportunities for concert performance.

SM 519 Concert Handbell Choir I 1 Credits

A choir selected by audition from the most experienced and capable bell ringers among the student body at large. This ensemble utilizes advanced repertoire and techniques, aiming primarily at presenting concerts both on and off campus, including a two-week annual tour.

SM 525 Conductors' Repertoire Ensemble 1 Credits

An auditioned chamber ensemble, offered every semester, which provides conducting podium time and coaching to all interested members. It additionally serves the conducting needs of graduate Sacred Music majors.

Prerequisite(s): CR 215 or permission of instructor.

SM 531 Colloquium in Sacred Music 2 Credits

A lecture series/colloquium intended to address a wide variety of concerns in the field of Sacred Music while rotating principal themes and ideas.

SM 541 Conducting Church Choirs: Ped & Mgt 3 Credits

A practical course devoted to the building and maintenance of church music programs serving persons of all ages.

SM 610 Foundations of Music Ministry 2 Credits

This graduate level course surveys the vocational needs, professional relationships, administrative styles, and teaching roles of the practicing church musician. In addition to an overview of professional standards, emphasis will also be placed on music engraving skills (music notation software), budgeting, recruitment, endowments and fundraising.

SM 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity. Offered in rotation with other Sacred Music electives. 3 Credit hours.

SM 624 Choral Music for Children 1 Credits

This course is designed to acquaint the church choral director with repertoire suitable for use with children's and youth choirs. Representative repertoire from all periods of music will be discussed and analyzed. Focus will be on repertoire that can be used during special services throughout the liturgical church year.

SM 625 Choral Music for Adults 1 Credits

This course is designed to acquaint the church choral director with repertoire suitable for use with adult choirs and adult ensembles. Representative repertoire from all periods of music will be discussed and analyzed. Focus will be on repertoire that can be used during special services throughout the liturgical church year.

SM 630 Conducting Coaching 1-2 Credits

Structured preparation and faculty coaching of the culminating choral recital in the graduate Sacred Music curriculum.

SM 631 Worship Planning/21st Cent. 3 Credits

Designed to facilitate the planning of worship, this practical course will be an immersion in the musical and theological materials available to those who create worship.

SM 632 Collaborative Prep for Worship 1 Credits

Through seminars, readings and common participation in chapel services, Westminster Choir College and Princeton Theological Seminary students will explore models for pastors and church musicians to prepare collaboratively for worship.

SM 635 Choir Training For Children/Youth 3 Credits

A practical course designed to teach students how to organize and direct a comprehensive music program from preschool through high school in the church setting. The course focuses on teaching excellent vocal techniques for each level as well as appropriate music skill development. Other areas of focus include: musical readiness skills; working with preschool singers; understanding the child's voice; the changing voice; and appropriate repertoire for all ages.

SM 640 Liturgies 3 Credits

A study of the origins of liturgy, its development in the main Christian traditions, and its relation to ecclesiastical history, with particular attention given to the differing styles and traditions of liturgical music. Contemporary liturgies are viewed against this historical background.

SM 641 Hymnology 3 Credits

A study of the origins and development of Christian hymnody, with reference to the theological emphases of various periods from the beginnings to the present, aiming to arouse interest in the textual and musical content of hymns and in their effective use in worship.

SM 654 German Church Music 3 Credits

A study of church choral literature by German composers from the 16th century to the present focusing on the pre-Bach and post-Bach cantata. Class performances of selected works. Complements SM 655. Offered in rotation with other Sacred Music electives.

SM 655 Bach Cantatas 3 Credits

A study of the history, performance practices, and liturgical setting of the cantatas of J.S. Bach. Class performances of selected cantatas.

SM 690 Independent Study and Research 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

SM 710 Panorama of Sacred Music 3 Credits

This graduate-level course is a one-semester survey of those masterworks and significant musical movements that have shaped the evolution of Western Sacred Music. Beginning with the Old Testament, this course will move through all eras, highlighting important composers and liturgical trends, placing them in their appropriate cultural and theological contexts.

SM 712 Hist of Sacred Music I 3 Credits

Study and research into the history of Western Christian music and its most important genres beginning with the Old Testament and continuing until the death of J.S. Bach in 1750.

SM 713 Hist of Sacred Music II 3 Credits

Continuation of SM 712, beginning with the Classical Viennese Mass and continuing until today. Emphasis on the development of the American church and its worship music.

SM 722 Theology, Liturgy & Worship 3 Credits

A detailed study of the Bible. Principal thematic and narrative elements are correlated to the development of the church's historic liturgies and the theological principles behind them.

Bachelor of Music: Theory/Composition

Overview

The program in composition, music history and theory aims to develop the aural skills needed by all musicians to provide the necessary theoretical knowledge for the continuing study and performance of music, to develop analytical and esthetic understanding of music forms and styles, and to foster the creative impulse in music.

Students also have access to Westminster's music computing center, where they can compose, orchestrate, and print their compositions in publishable quality using computers interfaced with sampler/synthesizers as well as sequencing and music printing software.

Curriculum Overview

Required musicianship and historiography courses, contemporary trends, music since 1900, and elective theory and music history courses form the core of undergraduate study. All baccalaureate candidates must elect an additional music history course and a level I theory course; bachelor of music candidates, must also elect a level II theory course.

Elective courses provide students with opportunities to apply their skills to specific areas of inquiry after satisfying specific prerequisites. The core requirements for bachelor of music students include one music history elective and two music theory electives.

Notes

- Eight terms of one-credit, half-hour lessons (suffix B) are covered under full-time tuition. Students wishing to take a full-hour lesson register for suffix G, and are billed for one half-hour.
- VC 115 and VC 116 are required for voice primary students only. Organ and piano primary students may substitute four additional credits of free electives for these two courses.
- If students are exempted from one or more semesters of foreign language study, they must replace the missing credits with other Arts & Sciences electives.
- Students must present a public recital in the senior year that includes both compositions written by the student and performance on the applied primary instrument. Recitals must be approved in advance by both the Music Composition, History & Theory Department and the applied primary department.
- Attendance requirements at monthly departmental forums must be met.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Year 1

Free elective	3

Composition recital	
Semester Credit Hours	14
Total Credits	126

¹ VC 115 and VC 116 are required for voice primary students only. Organ and piano primary students may substitute four additional credits of free electives for these courses.

Courses and Descriptions

MH 247 Music Historiography I 3 Credits

Historiography I begins by exploring similarities and differences between various music cultures around the world, and continues with an examination of selected genres of Western Art Music of the Medieval, Renaissance and Baroque periods. Basic information literacy skills, such as searching library catalogs, databases and reading academic articles also will be covered.

Prerequisite(s): LL 131.

MH 248 Music Historiography II 3 Credits

Examines Western Art Music since 1750 and includes a research assignment that builds upon the information literacy skills gained in MH 247.

Prerequisite(s): MH 247.

MH 345 Music Since 1900 3 Credits

Examines controversies and aesthetic movements in 20th and 21st century music. Emphasis is placed upon critical reading and writing skills.

Prerequisite(s): MH 248.

MH 433 Seminar in Music History 3 Credits

The contents of courses carrying this number will vary with the special interests and qualifications of the instructors teaching them. Possible topics include period courses, courses from a distinct perspective, composer courses and genre courses.

Prerequisite(s): MH 248.

MH 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

MH 608 Graduate Music History Review 3 Credits

Required for graduate students who are admitted with deficiencies in music history, as determined by the graduate placement test in music history. It is strongly recommended that this course be taken at the outset of graduate study.

MH 635 Public Musicology 3 Credits

A graduate-level introduction to the many ways musicology can engage with communities and events outside the academy. Topics include music criticism, oral history, museum education, archives, and cultural tourism.

Prerequisite(s): Graduate Standing; removal of all Music History deficiencies.

MH 690 Independent Research & Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

MH 731 Intro to Musicology 3 Credits

Introduction to the basic tools of research in historical musicology in order to foster: (1) an awareness of the nature and scope of historical musicology as a scholarly discipline; (2) familiarity with the techniques of musicological research; (3) an understanding of the relationship between musicological research and performance practice; and (4) experience in the application of musicological techniques to specific musical works and issues. It is strongly recommended that this course be taken at the outset of graduate study. Required for all Master of Music candidates.

MH 733 Seminar in Music History 3 Credits

The content of the course will vary with the special interests and qualifications of the professor teaching it.

Prerequisite(s): Removal of all music history deficiencies, it is strongly recommended that MH 731 be taken prior to this course.

MH 734 Proseminar in Music USA 3 Credits

A graduate-level introduction to the scholarly study of music in the U.S. Readings will cover music in Colonial/Early America, Western art music, popular music, and music of various ethnic communities.

Prerequisite(s): Graduate standing; removal of all Music History deficiencies.

MH 750 Thesis I 3 Credits

Independent research under faculty supervision leading to a master's thesis. Students register for this course in their first term of thesis research.

Prerequisite(s): Graduate standing, removal of all Music History deficiencies.

MH 751 Thesis II 3 Credits

Independent research under faculty supervision leading to a master's thesis. Students register for this course beginning in their second term of thesis research.

Prerequisite(s): Graduate Standing, removal of all Music History deficiencies, MH 750.

TH 045 Introduction to Musicianship 4 Credits

Integration of the basic elements of music, scales, intervals, key signatures, triads and rhythmic notation with the practical skills of sight singing, rhythmic reading, keyboard harmony and dictation. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade; 0 credits toward graduation, counts as 4 credits in the semester load.

TH 101A Composition Primary 2 Credits**TH 101C Composition Elective 2 Credits****TH 101D Composition Elective 1 Credits****TH 101E Composition Primary 2 Credits****TH 101F Composition Primary 1 Credits****TH 141 Musicianship I 4 Credits**

This course assists students in learning and integrating aural, performance, analytical and composition skills involving diatonic melody and harmony. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade.

Prerequisite(s): TH 045 or passing a placement test.

TH 142 Musicianship II 4 Credits

A continuation of TH 141 involving chromatic melody and harmony with an introduction to binary and ternary form.

Prerequisite(s): minimum "C-" grade in TH 141.

TH 201A Composition Primary 2 Credits**TH 201E Composition Primary 2 Credits****TH 201F Composition Primary 1 Credits****TH 237 Composition Class 3 Credits**

Class instruction in original composition. May be taken as a level I elective.

Prerequisite(s): For non Theory/Composition majors only, minimum "C-" grade in TH 142.

TH 241 Musicianship III 4 Credits

A continuation of TH 142 with an introduction to larger musical forms and counterpoint.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 251 Analytical Studies I 3 Credits

An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain only the harmonic vocabulary and formal structures studied in TH 141 and TH 142, may vary each time the course is offered. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 253 Orchestration 3 Credits

A study of the orchestra and its individual instruments from the standpoints of the composer, arranger and conductor. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 255 Song Writing 3 Credits

Solo vocal composition in various styles. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 259 Electroacoustic Music 3 Credits

An introduction to the history and literature of electro-acoustic music emphasizing hands-on creative opportunities in sequencing and digital sound processing. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 301A Composition Primary 2 Credits**TH 301E Composition Primary 2 Credits****TH 301F Composition Primary 1 Credits****TH 342 Contemporary Trends 3 Credits**

An analytical study of the compositional techniques of the 20th and 21st centuries.

Prerequisite(s): TH 241.

TH 401A Composition Primary 2 Credits**TH 401E Composition Primary 2 Credits****TH 401F Composition Primary 1 Credits****TH 424 Choral/Instru Arranging 3 Credits**

Arranging for various ensembles of voices and instruments. May be taken as a level II theory elective.

Prerequisite(s): TH 241.

TH 431 Form and Analysis 3 Credits

Study of the compositional process as observed in selected examples of music literature, predominantly from the tonal repertoire. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 432 Contrapuntal Techniques 3 Credits

18th century counterpoint with an emphasis on analysis and writing of original compositions. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 433 Special Topics in Theory 3 Credits

The content of the course carrying this number will vary with the special interests and qualifications of the professor teaching it. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 452 Analytical Studies II 3 Credits

An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain a more advanced harmonic vocabulary and larger formal structures than the music studied in TH 251, may vary each time the course is offered. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 480 Senior Project 3 Credits

Independent study in theory or composition resulting in either a paper comparable to a substantial journal article or a composition in one of the larger forms.

Prerequisite(s): Five semesters of private composition study.

TH 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

TH 511 New Music Ensemble 1 Credits

This course provides an opportunity to perform new music, primarily works of fellow students. It will also provide instrumentalists an opportunity to develop their performance skills more fully.

TH 550 Keyboard Harmony 3 Credits

An intense exploration of and drill in musicianship-keyboard skills, including score reading, transposition, modulation, clef reading, figured bass realization, harmonizing melodies, improvising and lead sheet accompanying. Projects may include transposition of a number of songs (perhaps a complete set) into all keys, figured bass realization for a Bach cantata, improvisation of service music (prelude, offertory, interludes, chorale preludes, postlude), multiple re-harmonizations of hymns/chorales for a service and score reduction and performance of a movement of an orchestral work. May be taken as an undergraduate level II theory elective.

Prerequisite(s): Undergraduate, minimum "C-" grade in TH 241; Graduate, Removal of all theory deficiencies.

TH 608 Graduate Musicianship Review 4 Credits

Required for graduate students admitted with deficiencies in musicianship as determined by the graduate placement test in musicianship. This course assists students in learning and integrating aural, performance, analytical and composition skills. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade. It is strongly recommended that this course be taken at the outset of graduate study.

TH 622 Electroacoustic Music 3 Credits

Advanced opportunities for creative activities utilizing the resources of Westminster's Music Computing Center. Previous experience with sequencers and/or digital audio is expected.

Prerequisite(s): Removal of all music theory deficiencies.

TH 623 Seminar in Music Theory 3 Credits

The content of the course bearing this number will vary with the special interests and qualifications of the professor teaching it.

Prerequisite(s): Undergraduate, minimum "C-" grade in TH 241 and permission of instructor, or graduate student standing and removal of all music theory deficiencies.

TH 625 Composition 3 Credits

Class instruction in original composition. Projects and presentations.

Prerequisite(s): Graduate student standing and removal of all music theory deficiencies.

TH 645A Composition Primary 3 Credits**TH 645C Composition Elective 2 Credits****TH 645D Composition Elective 1 Credits****TH 645E Composition Primary 3 Credits****TH 645F Composition Primary 1 Credits****TH 655 Composition Project 3 Credits**

Graduate-level private study in composition culminating in a major composition in one of the larger forms.

Prerequisite(s): three semesters of TH 645.

TH 690 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

TH 726 Analysis 3 Credits

A study of the compositional process as observed in selected tonal works, using the analytical approach of Heinrich Schenker.

Prerequisite(s): Removal of all music theory deficiencies.

Bachelor of Music: Voice Performance

Program Overview

The voice performance program seeks to develop the musician by establishing a sound vocal technique and a thorough understanding of the singing voice, its literature and pedagogy. These tools are essential for the study and performance of vocal and choral literature and for training students as solo performers, professional teachers or choral conductors.

Students will build and demonstrate a healthy vocal technique, become acquainted with voice literature, and develop an understanding of the complex relationships between music and poetry. They will also learn how to sing with correct diction in English, Italian, French and German, as well as to understand both the general meaning and specific nuances of their sung texts.

As they progress in the program, students will integrate musicianship skills and use their increasing understanding of musical structure and form to communicate musically, with stylistic and textual understanding. Students will also build vocal and performance skills that equip them for the demands of solo and ensemble singing.

Curriculum Overview

Every undergraduate must satisfy departmental requirements for graduation. Juries and other tests are conducted periodically for the purpose of evaluating progress; details may be obtained from the Voice Department.

Instruction for voice performance majors entails private lessons, recitals, diction, voice literature, performance/opera classes and voice pedagogy. Weekly studio and performance classes offer regular performing opportunities. Two fully-staged operas, one with orchestra, are presented each year, along with an additional undergraduate-only opera offering. Private vocal coaching is available for upperclassmen and graduate students.

The curriculum has been revised for the class entering in the fall of 2015. Current students may continue to follow their original curriculum, or adopt the new curriculum.

Faculty

Margaret Cusack (chair) • Professor, Voice, and Chair of Voice and Piano Faculties, 1994. B.M., M.M.T., Oberlin College.

Christopher Arneson • Associate Professor, Voice, 2003. B.A., M.M., Binghamton University; D.M.A., Rutgers University.

Susan S. Ashbaker • Adjunct Professor, Voice, 2006. B.M., M.M., Southern Illinois University; M.M., University of Illinois.

Lauren Athey-Janka • Adjunct Assistant Professor, Voice. B.M. Boston University, M.M., Westminster Choir College of Rider University.

Dalton Baldwin • Adjunct Professor, Piano, 1984. B.A., Oberlin Conservatory.

Tracy Chebra • Adjunct Instructor, Voice, 1995. B.M., M.M., University of North Carolina, Greensboro.

Elem Eley • Professor, Voice, 1987. B.M., Baylor University; M.M., Southwestern Baptist Theological Seminary.

Rochelle Ellis • Adjunct Assistant Professor, Voice, 1995. B.M.E., University of Missouri, Kansas City; M.M.E., Westminster Choir College of Rider University.

Faith Esham • Adjunct Assistant Professor, Voice, 2000. B.A., Columbia Union College; B.M., M.M., The Juilliard School.

Harold Evans • Adjunct Assistant Professor, Voice, 2007. B.S., West Chester State College; M.M., Indiana University.

Thomas Faracco • Associate Professor, Voice. 1983. B.M., M.M., Westminster Choir College.

Theodora Hanslowe • Adjunct Assistant Professor, Voice, 2016. B.A. Cornell University, A.D. Peabody Conservatory.

William Hobbs • Assistant Professor, Voice/Opera, 2011. B.M., University of Colorado; M.M., Eastman School of Music.

Nancy Froyland Hoerl • Adjunct Assistant Professor, Voice, 1995. B.A., Moorhead State University; M.M., Westminster Choir College of Rider University.

Katherine Johnson • Adjunct Assistant Professor, Voice, 2006. B.M., University of Calgary; M.M., Manhattan School of Music.

Rachelle Jonck • Adjunct Associate Professor, Voice, 2007. B.M., University of Stellenbosch (South Africa)

Robin Massie • Adjunct Assistant Professor, Voice, 2008. B.M., Westminster Choir College; M.M., Yale University.

Sean McCarther • Assistant Professor, Voice, 2012. B.M., Baylor University; M.M., D.M., Indiana University.

Mark Moliterno • Adjunct Associate Professor, Voice, 2005. B.M., M.M., Oberlin College Conservatory of Music.

Carolann Page • Adjunct Assistant Professor, Voice, 2008. B.M., Curtis Institute of Music.

J.J. Penna • Associate Professor, Piano, 1996. B.M., Binghamton University; D.M.A., University of Michigan.

Kathy Kessler Price • Assistant Professor, Voice, 2012. B.A., University of Richmond; M.M., University of Maryland; Ph.D., University of Kansas, Lawrence.

Laura Brooks Rice • Professor, Voice, 1985. B.M., Georgia Southern College; M.M., Indiana University.

Eric Rieger • Assistant Professor, Voice, 2012. B.M., Eastman School of Music; M.M., Royal Scottish Academy of Music and Drama

Debra Scurto-Davis • Adjunct Assistant Professor, Voice, 2004. B.M.E., Evangel College; M.M., Baylor University; S.M., University of Michigan.

Elizabeth Sutton • Adjunct Assistant Professor, Voice, 2005. B.A., Bowling Green State University; M.M., College-Conservatory of Music, University of Cincinnati.

Sharon Sweet • Professor, Voice, 1999. B.S., Roberts Wesleyan College; M.M., Ithaca College.

Nova Thomas • Associate Professor, Voice, 2004. B.M., University of North Carolina, Chapel Hill; M.M., Indiana University.

Charles J. Walker • Adjunct Instructor, Voice, 1995. B.M., University of Delaware.

Sally Wolf • Adjunct Assistant Professor, Voice, 2001. B.M., Kent State University; Artist Diploma, Curtis Institute of Music.

Amy Zorn • Adjunct Assistant Professor, Voice, 1996. B.M., University of Wisconsin, Madison; M.M., Boston University.

Notes

- ¹ Students must complete six semesters of foreign language study. Students must complete Italian I and II. They must complete additional semesters of either French or German. Semesters five and six may be of a third language (French or German) or additional semesters of Italian, French or German. If students are exempted from one or more semesters of foreign language study, they must replace the missing credits with other Arts and Sciences electives.
- ² Attendance at weekly studio classes is required during all semesters of applied study.
- ³ A half recital must be presented in the junior year. A full recital must be presented in the senior year.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Introduction to the rules of singing English and Italian through the use of the International Phonetic Alphabet (IPA) with oral and written drill.

VC 116 French & German Diction 2 Credits

Introduction to the rules of singing French and German through the use of the International Phonetic Alphabet (IPA) with oral and written drill.

Prerequisite(s): VC 115.

VC 118 Italian Diction 2 Credits

Introduction to the rules for singing Italian through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 119 French Diction 2 Credits

Introduction to the rules for singing French through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 120 German Diction 2 Credits

Introduction to the rules for singing German through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 191 Movement for the Performer 2 Credits

Movement exercises and etudes help students develop proper alignment, physical freedom, unification of voice, breath, and body, and help them explore the body as an expressive instrument.

VC 201A Voice Primary 2 Credits**VC 201B Voice Primary 1 Credits****VC 201E Voice Primary 2 Credits****VC 201F Voice Primary 1 Credits****VC 201G Voice Primary 2 Credits****VC 203 Voice Secondary 1 Credits****VC 291 The Singing Actor 2 Credits**

The introduction to vocal performance entails coaching of selected songs, arias or repertoire from music theater and techniques for performance preparation through intensive research. A final written project involves a musical and dramatic analysis of all chosen repertoire.

Prerequisite(s): successful completion of Level I voice jury.

VC 301A Voice Primary 2 Credits**VC 301B Voice Primary 1 Credits****VC 301E Voice Primary 2 Credits****VC 301F Voice Primary 1 Credits****VC 301G Voice Primary 2 Credits****VC 305 Singing in Italian and French 2 Credits**

Master class and private coaching in vocal performance of Italian and French language song, recitative and opera arias. The class will focus on pronunciation, inflection and nuances of sung Italian and French.

Prerequisite(s): Successful completion of Level I jury; VC 118, VC 119.

VC 306 Singing in German and English 2 Credits

Master class and private coaching in vocal performance of German and English language song, recitative and opera arias. The class will focus on pronunciation, inflection and nuances of sung German and English.

Prerequisite(s): Successful completion of Level I Jury; VC 120.

VC 401A Voice Primary 2 Credits**VC 401B Voice Primary 1 Credits****VC 401E Voice Primary 2 Credits****VC 401F Voice Primary 1 Credits****VC 401G Voice Primary 2 Credits****VC 408 Voice Science 3 Credits**

Study of the physics and physiology of voice production. Musical and vocal acoustics are explored using the facilities of the Westminster Voice Laboratory. Anatomic and physiologic underpinnings of respiration, phonation, articulation, registration and hearing are explored in depth.

VC 433 Song Literature I 2 Credits

A survey of solo literature for voice and accompanying instrument including solo vocal music of the Baroque period and German lieder.

Prerequisite(s): MH 248.

VC 434 Song Literature II 2 Credits

A survey of solo literature for voice and accompanying instrument including French mélodie, songs by nationalist composers, English and American song.

Prerequisite(s): MH 248.

VC 457 Private Coaching 2 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 457 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 458 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 458 Private Coaching 1 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 457 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 458 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 467 Private Dramatic/Role Coaching 2 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 467 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 468 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 468 Private Dramatic/Role Coaching 1 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 467 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 468 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

VC 591 Performing in Lyric Theater 2 Credits

Performing in Lyric Theater offers techniques for the preparation of lyric roles in a theatrical setting. It will develop elements of stagecraft, systematize a process for preparations and exploration, and introduce the working relationship with director and conductor.

Prerequisite(s): Undergraduates, VC 291 and the successful completion of Level II jury, or permission of the Chair.

VC 592 Opera Workshop 2 Credits

Introduction to opera performance. Acting exercises, character development, dramatic exploration and musical coaching culminating in a workshop-format presentation. It is recommended that VC 491 or 691 be taken before this course. This course may be repeated for credit.

Prerequisite(s): Undergraduates, successful completion of the level II voice test or permission of the chair.

VC 593 Opera Theater 2 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593E Opera Theater (Ensemble) 1 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593N Opera Theater (Opera NJ) 1 Credits**VC 593R Opera Theater (Role) 2 Credits**

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593T Opera Theater (Tech) 1 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions, and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity.

VC 627 Opera Literature I 3 Credits

Study of the development of opera from 1600 through the Napoleonic era (ca. 1815), with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 628 Opera Literature II 3 Credits

Study of the development of opera from the early 19th century to the present, with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 633 Seminar in Opera Literature 3 Credits

An intensive study of an area of opera literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the works of a selected composer or of a specific genre of opera.

VC 635 Seminar in Song Literature 3 Credits

An intensive study of some area of art song history and literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the selected repertoire.

VC 641A Voice Primary 2 Credits**VC 641B Voice Primary 1 Credits****VC 641C Voice Elective 2 Credits****VC 641D Voice Elective 1 Credits****VC 641E Voice Primary 2 Credits****VC 641F Voice Primary 1 Credits****VC 650 Pedagogy Thesis 1 Credits**

Under faculty supervision, students design and execute a significant research project exploring an aspect of voice that can be measured and evaluated through the analysis instruments in the Westminster Voice Laboratory. Students with special interests in speech pathology or voice therapy may elect to visit the clinics of medical voice specialists in the area who have an association with Westminster. Students register for this course in every semester or summer term in which assistance is provided by the thesis advisor.

VC 655A Voice Primary 2 Credits**VC 655B Voice Primary 1 Credits****VC 655E Voice Primary 2 Credits****VC 655F Voice Primary 1 Credits****VC 657 Private Coaching 2 Credits**

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 657 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 658 involves weekly half-hour lessons and a fee of \$600. Open to graduate Voice Pedagogy and Performance majors.

VC 658 Private Coaching 1 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 657 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 658 involves weekly half-hour lessons and a fee of \$600. Open to graduate Voice Pedagogy and Performance majors.

VC 661 German Lieder 3 Credits

This survey of the German Lieder begins with its roots in the 17th and 18th centuries and continues into the 20th century. Classes will involve study of Romanticism, including philosophers and poets of the 18th and 19th centuries who were important for German Lieder. The bulk of the class involves in-depth study of the Lieder of the important composers of the genre: Haydn, Mozart, Schubert, Robert and Clara Schumann, Mendelssohn, Liszt, Brahms, Wolf, Strauss, Mahler, Schoenberg, Berg, and Webern. Class sessions will involve a balance of lecture, discussion, and student performance.

VC 662 French Melodie 3 Credits

This course is designed as a survey of the song literature of France. Students examine works for voice and piano/instruments by Berlioz, Gounod, Saint-Saëns, Bizet, Faure, Duparc, Chausson, Debussy, Ravel, Messiaen, Milhaud, Poulenc, and others, analyzing their relationship to larger stylistic, social, and musicological trends. Investigation will include matters of prosody, scansion, and compositional organization, with particular attention given to matters of text setting and poetic treatment. Special emphasis will be placed on important French language poets whose literary works serve as the basis for this material. Poets will include Baudelaire, Verlaine, Hugo, Rimbaud, Mallarmé, LaForgue, Maeterlinck, and others. Poetic history and form will be covered as well as important composer/poet partnerships. Class sessions will involve a balance of lecture and discussion. Works by both well-known and lesser-known composers will be included.

VC 667 Private Dramatic/Role Coaching 2 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 667 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 668 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

VC 668 Private Dramatic/Role Coaching 1 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 667 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 668 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

VC 690 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

VC 705 Grad Voice Rep:Italian/French 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 706 Grad Voice Rep:German/English 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 722 Literature for Teaching 3 Credits

A survey of graduated teaching literature for beginning, intermediate and advanced voice students. Literature will be explored that is particularly well-suited to specific vocal issues (e.g. legato, coloratura, staccato, etc.)

Prerequisite(s): VC 723, VC 724.

VC 723 Voice Ped I: Voice Science 3 Credits

Study of voice anatomy and physiology with concentration on respiration, phonation, articulation, hearing and vocal health. Through hands-on experience in the Westminster Voice Laboratory, students explore the physics of sound, the fundamentals of musical acoustics, and acoustical elements that are unique to the human voice. Priority registration is given to M.V.P. majors and M.M. students majoring in Voice Performance and Pedagogy. Other students may enroll on a space-available basis.

VC 724 Voice Ped II: Methods 3 Credits

A comparative study of various pedagogical methods and ideals. A wide range of important historical and contemporary pedagogy treatises is reviewed. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student.

Prerequisite(s): VC 723.

VC 725 Voice Ped III:Tchnng Practicum 3 Credits

Communication skills are explored and students develop a systematic approach to studio voice instruction. Each student is assigned at least two voice students (one adult and one teenager) to be taught both inside and outside of class. Emphasis is placed on becoming familiar with all voice classifications and basic vocal literature.

Prerequisite(s): VC 723.

VC 726 Voice Research 3 Credits

Peer reviewed research in voice is evaluated and research methodologies are explored. Class projects include research in historical, qualitative, quantitative, and mixed methods approaches.

VC 730 The Singing Actor: Opera 3 Credits

This course entails coaching of selected songs, arias or repertoire from music theater, and techniques for performance preparation through intensive research. A final written project involves a musical and dramatic analysis of all chosen repertoire.

VC 731 Opera Auditions: Prep & Tech 2 Credits

This class will explore the many facets of preparing an audition for an opera role, apprentice program, or competition. At least three to four arias in contrasting styles and languages should be prepared for work in class. Areas to be addressed include vocal and dramatic presentation, networking, resume building, make-up, and photo advice. In coordination with the Office of Career Services, panel discussions with invited guests that will explore specific career-related topics will be scheduled.

Prerequisite(s): permission of the applied instructor.

VC 753 Spec Topics in Voice Perf Prac 3 Credits

Intensive performance coaching and lectures in the form of master classes where performance practice in selected topics will be taught by current faculty or distinguished alumni and specialists in their fields.

Prerequisite(s): permission of the applied instructor.

VC 791 Teaching Internship 2 Credits

Teaching internship with a master teacher(s). The student will teach under faculty observation and supervision, including follow-up private discussion with the observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. May be offered on an intensive basis in conjunction with Westminster Summer Session events, such as The High School Solo Vocal Artist and/or Vocal Institute.

Arts Administration Minor

Program Overview

Arts administration combines passion for the arts with the business know-how that keeps the arts an active and integral part of communities. A wide variety of opportunities abound for satisfying and rewarding careers in managing the arts, whether in the growing nonprofit sector or in for-profit entertainment, including: entertainment law, venue management, artist management and representation, producing, producing management, stage management, touring management, fundraising, marketing, educational programming, artist research and development, advocacy, policy development, outreach and gallery management.

Courses and Descriptions

AAD 121 Intro to Arts Administration 3 Credits

A survey course that covers topics relevant to administering the arts, and includes reviewing state and federal legislation to non-profit organizations, non-profit agency structure, long range planning, board development, marketing, fundraising, public relations, advocacy, budget, human resources and ongoing compliance issues. Students will have opportunities to interact with professionals in the field and explore career options.

AAD 202 Commun/Marketing in Arts 3 Credits

Intended for arts or business majors interested in arts management, this course immerses students in the fundamentals of promoting the arts, from grassroots public relations to basic marketing concepts and applications. Students will have opportunities to interact with professionals in the field and explore career options.

Prerequisite(s): AAD 121 and LL 131, or permission of instructor.

AAD 203 Arts Fundraising 3 Credits

Provides students with an understanding of the ethics, strategies and practices of fundraising for non-profit arts agencies. Students gain an understanding of the role of the development office in a non-profit arts agency, prepare for careers in arts management by increasing the skills necessary to function, and learn to plan a multi-faceted fundraising campaign effectively.

Prerequisite(s): CMP 120 or LL 131.

AAD 305 The Business and Art of Music Publishing 3 Credits

Detailed overview of music publishing procedures, including acquisition, market development and administration of copyrighted musical compositions. Copyright registration/renewal, composer contracts, domestic and international licensing, and performance rights.

Prerequisite(s): AAD 121.

AAD 306 Business and Art of Recording 3 Credits

Survey of the recording industry. Responsibilities of the label and producer, copyrights, royalties, residuals, publishing, contracts and artist development, promotion, distribution, product management, domestic and international licensing, and related technology.

Prerequisite(s): AAD 121 and CBA 110 Introduction to Business.

AAD 307 Touring and Production Management 3 Credits

Organizing, marketing and managing tours. Responsibilities of the booking agent, tour manager, and performers. Case studies, relationships, contracts with venues, transportation companies, housing, and unions, budgeting, press kits, and insurance.

Prerequisite(s): AAD 121, CBA 110.

AAD 350 Arts Venue and Patron Services Management 3 Credits

Integrating workplace with organizational mission: administration, staff, general public, artists. Internal control, artist/employee contracts, collective bargaining, health and safety issues, facilities operation, inventory, cultivation and maintenance of clientele and audience.

Prerequisite(s): AAD 121.

AAD 351 Crossing Cultural Borders 3 Credits

Course includes two weeks at an international arts organization, meeting and shadowing administrative staff, studying management styles, finance, and operational procedures, and attending all possible events during the visit. Travel fee required. May be repeated.

Prerequisite(s): Junior standing.

AAD 490 Independent Research and Study 1-4 Credits

This self-motivated, self-directed course culminates in a complete project. The student and the faculty advisor will mutually develop the scope of each project. It will be designed to demonstrate the student's entrepreneurial skills and provide an opportunity for practical application of the curriculum.

Prerequisite(s): AAD 202, AAD 203, and either AAD 121 or CBA 110.

AAD 491 Arts Management Internship 3-12 Credits

Arts Administration majors are required to spend 13 weeks of on-site participation in a broad range of daily operations at an internship site. In addition, there are group meetings with all students participating in internships and site-analysis assignments given under the direction of Arts and Sciences faculty. Students may enroll for a maximum of 6 credits of internships.

Prerequisite(s): Junior standing.

Piano Pedagogy Minor

The Piano Pedagogy minor is open to Westminster Choir College undergraduates other than Piano majors. Interested students must be accepted by the Piano Faculty and should then declare the minor by completing a form available in the Assistant Registrar's Office.

Acceptance to Minor

- For piano primary – by recommendation of the applied piano teacher
- For non-piano primary – by recommendation of the applied teacher, advisor, audition, and interview with the Piano Faculty

Degree Offered

- Minor in Piano Pedagogy

Courses and Descriptions

PI 297 Fund of Piano Pedagogy I 3 Credits

Fundamentals I is devoted to study of techniques, methods, and materials suitable for beginning through early intermediate level students. Other areas of study include motivational strategies, establishment of effective practice habits, recital preparation, technique, and elementary duet materials. Students analyze and demonstrate teaching from three different beginning piano methods. Observation of professional teaching is done in the context of class and private lessons at the Westminster Conservatory.

PI 298 Fund of Piano Pedagogy II 3 Credits

In Fundamentals II, students continue to apply their experience with piano methods to the teaching of students. In addition, the semester is devoted to the study of materials from all style periods for upper elementary and intermediate level students. Students observe private and group lessons appropriate to these levels. The course culminates in an individual lecture recital demonstrating music from a variety of style periods.

Prerequisite(s): PI 297.

PI 397 Fund of Piano Pedagogy III 3 Credits

Fundamentals III involves supervised private and group teaching of beginning students. Emphasis is placed on lesson planning, presentation of concepts, use of technology, and the relationship between technique and musicianship skills. The course further addresses the different psychological and methodological approaches to teaching adults and children in class and private settings, and includes an overview of materials for the adult student and group classes. The course culminates in a lecture recital on a pedagogical subject of the students choice.

PI 413 Accompanying Class 2 Credits

This course is designed with the twofold purpose of allowing undergraduate pianists to fulfill their piano ensemble elective requirement within the professional studies area as well as providing an opportunity for voice primary students to further their piano study in a challenging forum in situations directly related to their repertoire. The students in the class will receive instruction in the stylistic, technical, analytical and linguistic aspects of vocal literature. The many issues involved in vocal collaboration will be discussed along with in-depth study of the pianist's role in musical partnerships. Issues of musical freedom, language, and the varieties of sonic treatment unique to vocal literature will be discussed. Italian, French, German and English song repertoire from various style periods will provide the assignments for performance and discussion.

PI 435 Survey of Piano Literature I 3 Credits

A study of representative works from 1650-1800 by composers including J. S. Bach, C.P.E. Bach, J.C. Bach, Haydn, Mozart, and Beethoven.

Prerequisite(s): MH 248.

PI 436 Survey of Piano Literature II 3 Credits

A study of representative works from 1800 to the present by composers including Beethoven, Schubert, Mendelssohn, Schumann, Chopin, Liszt, Brahms, Debussy, Ravel, Prokofiev, and Bartók.

Prerequisite(s): MH 248.

PI 512 Chamber Music 2 Credits

Emphasis is placed upon rehearsal and performances of representative collaborative literature for strings and piano, and woodwinds and piano. Students will be assigned movements from major chamber works selected from different style periods. Professional instrumentalists will join them for rehearsals and performances in class. An overview of the development of this repertoire will be presented and listening assignments will augment the study of specific works. A project involving the study and presentation of a piano quartet or piano quintet will be included. Attendance at three concerts of instrumental chamber music is required. Permission of applied teacher and instructor is required.

PI 540 Keyboard Skills 3 Credits

The course includes in-depth study of numerous aspects of musicianship skills essential for all pianists within the broader categories of technique and practice strategies; memorization and sight reading; improvisation and lead sheet realization. All aspects of piano musicianship skills will be addressed from practical, pedagogical, and collaborative points of view. Assignments will include examples of studies from a wide range of levels all within the current and developing skill level of each student enrolled in the class.

Prerequisite(s): UG - Eight credits of applied keyboard study or permission of keyboard instructor or course instructor. GR - Permission of course instructor.

PI 585 Piano Ensemble 1 Credits

Study and performance of piano duets, two-piano works, and works for combinations of three or more pianists. The emphasis is on ensemble techniques for rehearsal and performance.

Faculty

Ellen Abrahams

Adjunct Instructor, Music Education, 2003. B.M.E., Temple University.

Frank Abrahams

Professor, Music Education, 1992. B.M.E., Temple University; M.M., New England Conservatory; Ed.D., Temple University.

Christopher Arneson

Associate Professor, Voice, 2003. B.A., M.M., Binghamton University; D.M.A., Rutgers University.

Denise Asfar

Adjunct Assistant Professor, Arts and Sciences, 2001. B.A., Princeton University; M.A.T., Brown University.

Susan S. Ashbaker

Adjunct Professor, Voice, 2006. B.M., M.M., Southern Illinois University; M.M., University of Illinois.

Lauren Athey-Janka

Adjunct Assistant Professor, Voice, 2016. B.M., Boston University; M.M., Westminster Choir College of Rider University.

Dalton Baldwin

Adjunct Professor, Piano, 1984. B.A., Oberlin Conservatory.

Ena Bronstein Barton

Adjunct Associate Professor, Piano, 1983. Artist Diploma, Escuela Moderna de Musica and Conservatorio Nacional de Musica, Santiago, Chile.

Ryan Brandau

Adjunct Assistant Professor, Conducting, 2012. A.B., Princeton University; M.Ph., University of Cambridge; M.M., D.M.A., Yale University.

Rachel Brashier

Visiting Professor, Music Education, B.M.E. Eastern Illinois University; M.A. Eastman School of Music; M.M., Southern Illinois University.

Elly Sparks Brown

Adjunct Assistant Professor, Arts and Sciences, 2013. B.A., Seton Hill University; M.A., The Catholic University of America; M.Div., Virginia Theological Seminary; D.Min., Wesley Theological Seminary.

Victoria Browsers

Adjunct Assistant Professor, Voice, 2016. B.M., Ohio Wesleyan University; M.M. Westminster Choir College of Rider University.

Janet Cape

Assistant Professor, Music Education, 2010. B.M., University of Victoria; M.M., Arizona State University; D.M.A., Arizona State University.

Christian Carey

Associate Professor, Theory, 2004. B.M., Juilliard; M.M., Boston University; Ph.D., Rutgers University.

Mi-Hye Chyun

Associate Professor-Librarian and Chair, Talbott Library faculty, 1991. B.A., Sungkunkwan University, Korea; M.A. in L.S., University of Maryland.

Ingrid Clarfield

Professor, Piano, 1982. B.M., Oberlin College; M.M., Eastman School of Music, University of Rochester.

Margaret Cusack

Professor, Voice, and Chair of Voice and Piano Faculties, 1994. B.M., M.M.T., Oberlin College.

Elem Eley

Professor, Voice, 1987. B.M., Baylor University; M.M., Southwestern Baptist Theological Seminary.

Miriam Eley

Adjunct Assistant Professor, Piano, 1995. B.M., Baylor University; M.M. Indiana University.

Rochelle Ellis

Adjunct Assistant Professor, Voice, 1995. B.M.E., University of Missouri, Kansas City; M.M.E., Westminster Choir College of Rider University.

Faith Esham

Adjunct Assistant Professor, Voice, 2000. B.A., Columbia Union College; B.M., M.M., The Juilliard School.

Harold Evans

Adjunct Assistant Professor, Voice, 2007. B.S., West Chester State College; M.M. Indiana University.

Thomas Faracco

Associate Professor, Voice. 1983. B.M., M.M., Westminster Choir College.

Charles Frantz

Adjunct Assistant Professor, Theory/Music History, 2000. B.M., M.M., Temple University; Ph.D., Rutgers University.

Daniel Gallagher

Adjunct Lecturer-Librarian, 2000. B.M., Westminster Choir College of Rider University.

James Goldsworthy

Professor, Piano, 1996. B.M., M.M., Southern Methodist University; D.M.A., Stanford University.

Hugh R. Goodheart

Adjunct Assistant Professor, English, 2005. B.A., Harvard University; M. Ed., The College of New Jersey.

Theodora Hanslowe

Adjunct Assistant Professor, Voice, 2016. B.A., Cornell University; Artist Diploma, Peabody Conservatory of Music.

R. Douglas Helvering

Adjunct Assistant Professor, Theory, 2009. B.M., University of Nebraska; M.M., Westminster Choir College; D.M.A., University of Kansas.

Ronald A. Hemmel

Professor, Theory, and Director, Music Computing Center, 1994. B.M., Westminster Choir College; M.M., James Madison University; M.Phil., Ph.D., Rutgers University.

William Hobbs

Assistant Professor, Voice/Opera, 2011. B.M., University of Colorado; M.M., Eastman School of Music.

Nancy Froyland Hoerl

Adjunct Assistant Professor, Voice, 1995. B.A., Moorhead State University; M.M., Westminster Choir College of Rider University.

Al Holcomb

Associate Professor, Music Education, and Chair of Music Education, 2011. B.A., B.M.E., Texas Christian University; M.M.E., Ph.D., The Hartt School.

Eric Hung

Associate Professor, Music History, 2004. A.R.C.T., Royal Conservatory of Music; B.A., Wesleyan University; Ph.D., Stanford University.

Katherine Johnson

Adjunct Assistant Professor, Voice, 2006. B.M., University of Calgary; M.M., Manhattan School of Music.

Rachelle Jonck

Adjunct Associate Professor, Voice, 2007. B.M., University of Stellenbosch (South Africa)

James Jordan

Professor, Conducting, 1991. B.M., Susquehanna University; M.M., Ph.D., Temple University.

Kenneth Kauffman

Assistant Professor I-Librarian, 2011. B.A., Goshen College; M.M., University of Illinois; M.L.I.S., University of Wisconsin-Milwaukee.

Jay Kawarsky

Professor, Theory, 1989. B.M.E., Iowa State University; M.M., D.M., Northwestern University.

Amy K. Kimura

Assistant Professor I-Librarian, 2011. B.M., Skidmore College; M.S.I.S., SUNY Albany; M.A., University of Michigan.

Anthony Kosar

Professor, Music Composition, History, & Theory, 1984. B.M., West Liberty State College; M.M., Southern Illinois University; Ph.D., The Ohio State University.

Phyllis Lehrer

Professor, Piano, 1975. A.B., University of Rochester; M.S., Juilliard School.

Matthew Lewis

Adjunct Assistant Professor, Organ, 2005. B.S., B.M., Philadelphia Biblical University; M.M., D.M.A., Juilliard School.

Elena Livingstone-Ross

Adjunct Assistant Professor, Arts and Sciences, 1995. Graduate, Polytechnic Institute of Leningrad; B.A., Grinnell College; M.A., Princeton University.

Robin Massie

Adjunct Assistant Professor, Voice, 2008. B.M., Westminster Choir College of Rider University; M.M., Yale University.

Carmen Mateiescu

Adjunct Assistant Professor, Theory/Music History, 2007. B.M., M.M., University of Music (Bucharest); Ph.D., Rutgers University.

John McBride

Adjunct Assistant Professor-Librarian, 1999. M.A., Trenton State College; B.A., M.L.S., Rutgers University.

Sean McCarther

Assistant Professor, Voice, 2012. B.M., Baylor University; M.M., D.M., Indiana University.

Ute Mehnert

Adjunct Assistant Professor, Arts and Sciences, 2011. M.A., Ph.D., University of Cologne.

Joe Miller

Professor, Conducting, Organ and Sacred Music, 2006. B.S., University of Tennessee; M.M., D.M.A., College-Conservatory of Music, University of Cincinnati.

Sharon Mirchandani

Professor, Theory, 1997. B.M., Bowling Green State University; M.M., Temple University; Ph.D., Rutgers University.

Mark Moliterno

Adjunct Associate Professor, Voice, 2005. B.M., M.M., Oberlin College Conservatory of Music.

Alan Morrison

Adjunct Associate Professor, Organ, 2006. B.M., M.M., Curtis Institute of Music.

Sharon Morrow

Adjunct Associate Professor, Music Education, 2008. B.F.A., California State University at Fullerton; M.M., University of Wisconsin-Madison.

Maureen Murphy-Fernandez

Adjunct Instructor, Music Education, 2016. B.S., West Chester University.

Jane Nowakowski

Associate Professor-Librarian, 1990. B.M., Westminster Choir College; M.L.S., Rutgers University.

Colin M. Oettle

Adjunct Instructor, Music Education, 2013. B.M., Ithaca College; M.M., Rutgers University.

Marshall Onofrio

Professor, Music Education, 2007. B.M., B.S., University of Connecticut; M.M., University of Illinois; M.M., University of Nebraska-Lincoln; D.M.A., The Ohio State University.

Carolann Page

Adjunct Assistant Professor, Voice, 2008. B.M., Curtis Institute of Music.

Thomas Parente

Associate Professor, Piano, 1993. B.A., Jersey City State College; B.M., Manhattan School of Music; M.A., Rutgers University; Dalcroze Eurhythms License, Longy School of Music; Ed.D., Teachers College, Columbia University.

J.J. Penna

Associate Professor, Piano, 1996. B.M., Binghamton University; D.M.A., University of Michigan.

Joel Phillips

Professor, Theory, 1985. M.M., Eastman School of Music, University of Rochester; B.M., D.M.A., University of Alabama.

Steve Pilkington

Associate Professor, Sacred Music, and Director of Chapel, 1992. B.A., St. Olaf College; M.M., University of Illinois; Ph.D., Drew University.

Eric Plutz

Adjunct Assistant Professor, Organ. B.M., Westminster Choir College; M.M., Eastman School of Music.

Agnes Poltorak

Adjunct Assistant Professor, Piano, 2000. B.M., University of British Columbia, Canada; M.M., Westminster Choir College of Rider University.

Kathy Kessler Price

Assistant Professor, Voice, 2012. B.A., University of Richmond; M.M., University of Maryland; Ph.D., University of Kansas, Lawrence.

Amanda Quist

Assistant Professor, Conducting, 2010. B.M., Western Michigan University; M.M., Western Michigan University; D.M.A., University of North Texas.

Laura Brooks Rice

Professor, Voice, 1985. B.M., Georgia Southern College; M.M., Indiana University.

Eric Rieger

Assistant Professor, Voice, 2012. B.M., Eastman School of Music; M.M., Royal Scottish Academy of Music and Drama; D.M.A., Eastman School of Music.

Elizabeth Scheiber

Professor, Voice, 2002. B.A., Western Kentucky University; M.A. Indiana University; Ph.D. Indiana University.

Kathleen Scheide

Adjunct Assistant Professor, Harpsichord, 2006. B.M., M.M., New England Conservatory, D.M.A., University of Southern California.

Debra Scurto-Davis

Adjunct Assistant Professor, Voice, 2004. B.M.E., Evangel College; M.M., Baylor University; S.M., University of Michigan.

Kathleen Ebling Shaw

Adjunct Instructor, Sacred Music, 1991. B.M., Westminster Choir College.

Paul Sheftel

Adjunct Professor, Piano, 2010. B.M., M.M., Juilliard School.

Tom T. Shelton, Jr.

Assistant Professor, Sacred Music, 2012. B.M., M.M., University of North Carolina at Greensboro.

Betty Handelman Stoloff

Adjunct Associate Professor, Piano, 1978. B.M.A., University of Michigan; M.A., Columbia University.

Elizabeth Sutton

Adjunct Assistant Professor, Voice, 2005. B.A., Bowling Green State University; M.M., College-Conservatory of Music, University of Cincinnati.

Sharon Sweet

Professor, Voice, 1999. B.S., Roberts Wesleyan College; M.M., Ithaca College.

Robert Terrio

Associate Professor-Librarian, 2002. B.M., Berklee College of Music; M.M., University of Massachusetts; M.L.S., Rutgers University.

Nova Thomas

Associate Professor, Voice, 2004. B.M., University of North Carolina, Chapel Hill; M.M., Indiana University.

Timothy Urban

Adjunct Assistant Professor, Theory, 2005. B.M., M.S., State University of New York Environmental Science & Forestry; M.M., State University of New York, Binghamton; M.S.A., Sarah Lawrence College; M.A., Ph.D., Rutgers University.

Charles J. Walker

Adjunct Instructor, Voice, 1995. B.M., University of Delaware.

Sally Wolf

Adjunct Assistant Professor, Voice, 2001. B.M., Kent State University; Artist Diploma, Curtis Institute of Music.

Stefan Young

Professor, Theory, 1979. B.M., Rollins College; M.M., The Juilliard School; Ph.D., Rutgers University.

Amy Zorn

Adjunct Assistant Professor, Voice, 1996. B.M., University of Wisconsin, Madison; M.M., Boston University.

Faculty Emeriti

Barton Bartle

Professor Emeritus, Theory, 1973. B.M., M.M., University of Michigan; Ph.D., University of Illinois.

Robert Carwithen

Adjunct Professor Emeritus, Organ. B.M., Curtis Institute of Music; M.M., Westminster Choir College of Rider University.

Harriet Chase

Professor Emerita, Theory. B.M., University of Wisconsin; M.M., Eastman School of Music, University of Rochester; Ph.D., Indiana University.

Diana Crane

Professor Emerita, Voice, 1986. B.A., Leicester University, England; M.Ed., London University.

William Dalglish

Associate Professor Emeritus, Music History. B.M., Southeastern Louisiana College; M.M., Indiana University.

Robert Evans

Professor Emeritus, Arts and Sciences. B.A., Stanford University; B.D., Princeton Theological Seminary; D.Theol., University of Basel, Switzerland.

Ronald Filler

Professor Emeritus, Music Education, 1985. B.A., Union College; M.A., Rider College; M.S., D.Ed., University of Tennessee.

Joseph Flummerfelt

Professor Emeritus, Conducting. B.S.M., DePauw University; M.M., Philadelphia Conservatory of Music; D.M. (hon.), DePauw University; D.M.A., University of Illinois.

Anne Ackley Gray

Professor Emerita, Voice, 1982. B.A., Sarah Lawrence College; M.M., New England Conservatory.

Jeannette Jacobson

Associate Professor-Librarian Emerita. B.S., University of Wisconsin, Stevens Point; M.S. in L.S., University of Wisconsin.

Helen Kemp

Professor Emerita, Church Music and Voice. B.M., D.M. (hon.), Westminster Choir College of Rider University.

Marvin Keenze

Professor Emeritus, Voice, and Co-Director, Voice Resource Center, 1976. B.M., M.M., Westminster Choir College of Rider University.

Lois Lavery

Professor Emerita, Voice. B.M., M.M., Westminster Choir College; Artist's Diploma, Vienna Academy of Music, Austria.

Robin A. Leaver

Professor Emeritus, Sacred Music, 1984. Dipl. in Theol., Trinity College, Bristol, England; D.Theol., State University of Groningen, Netherlands.

Donald McDonald

Professor Emeritus, Organ. B.M. Curtis Institute of Music; M.S.M., S.M.D., Union Theological Seminary.

Joan Hult Lippincott

Professor Emerita, Organ. B.M., M.M., Westminster Choir College of Rider University.

Frances Poe

Professor Emerita, Music Education. B.M., University of Georgia; M.M., Ph.D., Indiana University.

Nancy Wicklund

Professor-Librarian Emerita, 1970. B.M., Westminster Choir College; M.S. in L.S., Drexel University.

Peter D. Wright

Professor Emeritus, Theory/Music History, 1965. B.S., Juniata College; M.A., Ph.D., Eastman School of Music, University of Rochester.

David Stanley York

Professor Emeritus, Theory. B.M., Yale University; M.M., Westminster Choir College of Rider University.

Undergraduate Courses and Descriptions

Arts (AR)

AR 111 Survey of Art History I 3 Credits

A survey of Western art - architecture, sculpture, painting - from prehistoric times, is presented against the background of chronological and intellectual history.

AR 112 Survey of Art History II 3 Credits

Crucial artistic tendencies in Western art of the 19th and 20th centuries are introduced and discussed against their historical and intellectual setting. A brief background of art history from previous centuries is presented in order to appreciate these developments.

AR 216 Acting I 3 Credits

This course provides an introduction to basic techniques of realistic acting using exercises, improvisation and scene study. The emphasis is on honesty and commitment to action in order to be able to create real life in an imaginary world.

AR 217 Improvisation & Movement 3 Credits

Using theater games, students explore themselves as individuals and members of a group. The course uses scenes, skits, dances and games to help students overcome their fears and insecurities, enabling them to develop their creativity, spontaneity, honesty, concentration, and commitment to action. The class also explores body movement as a means of heightening dramatic expression.

Arts and Sciences (AS)

AS 490 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

AS 491 Arts & Science Internship 1-12 Credits

This course requires 95 hours for each three credits for which the student enrolls. The student is required to spend 13 weeks of on-site participation in a broad range of daily operations at an internship site. In addition, there are group meetings with all students participating in internships and site-analysis assignments given under the direction of Arts and Sciences faculty. Students may enroll for a maximum of 12 credits of internships.

Prerequisite(s): at least junior level standing.

Conducting (CR)

CR 109 Chapel Choir 1 Credits

Comprised of undergraduate students in their first year of study, Chapel Choir focuses on music for men's, women's, and mixed chorus. The ensemble provides the fundamentals of artistic choral ensemble singing and a foundation for all Westminster choral ensembles. Placement hearing required.

CR 209 Schola Cantorum 1 Credits

Comprised of undergraduate students in their second year of study, Schola Cantorum focuses on music for mixed chorus and continues to build and refine the skills developed in Chapel Choir. This ensemble presents campus, community, and regional performances. Placement hearing required.

CR 215 Fundamentals of Conducting 3 Credits

This course provides the foundation of conducting technique and philosophy as it relates to choral ensemble. Primarily, it deals with the development of basic pedagogical proficiencies, specifically alignment, Laban gestural vocabulary, breathing, beat patterns, consistent tempo, and the development of expressive gesture for relaying various styles of music, i.e., legato, staccato and marcato. Basic philosophical understandings concerning the human aspects of the music making process and the role the conductor plays in that process also are emphasized. Specific techniques for dealing with technical elements, e.g., fermata, dynamics, changes of tempo, contrasts in style, also are covered. The overall focus of the course is to establish the important relationship between ear, body, and the choral sound.

Prerequisite(s): TH 141.

CR 315 Techniques of Conducting 3 Credits

Continued development of conducting technique with emphasis on more complex styles and patterns, and on communication through appropriate gestures. Further improvement in conducting various dynamics and articulations, as well as more effective use of the left hand. Rehearsal procedures, repertoire programming, score preparation, and baton techniques are incorporated into the course.

Prerequisite(s): CR 215.

CR 490 Independent Study and Research 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Harpsichord (HP)

HP 101B Harpsichord Primary 1 Credits

HP 101C Harpsichord Elective 2 Credits

HP 101D Harpsichord Elective 1 Credits

HP 101E Harpsichord Elective 2 Credits

HP 101F Harpsichord Elective 1 Credits

HP 101G Harpsichord Elective 2 Credits

Language/Literature (LL)

LL 037 College Reading and Writing 3 Credits

Required for students placed into this course as a result of the basic skills English testing program. This intensive course reviews effective reading, writing, and study processes and leads students to the level of mastery required to begin LL 131 English Composition the following semester.

LL 131 English Composition 3 Credits

An intensive essay writing course that provides students with the analytical, rhetorical and research skills needed to write well in many disciplines. Source-based writing is emphasized, culminating in a significant research project. In-class and outside-class writing methods are explored, leading students to master their individual writing processes.

Prerequisite(s): LL 037 or satisfactory score on basic skills English test.

LL 141 French I 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 142 French II 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 141.

LL 145 Italian I 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 146 Italian II 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 145.

LL 151 German I 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

LL 152 German II 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 151.

LL 243 French III 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 142.

LL 244 French IV 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 243.

LL 247 Italian III 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 146.

LL 248 Italian IV 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 247.

LL 253 German III 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 152.

LL 254 German IV 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 253.

LL 280 Sacred Texts and Literature 3 Credits

Explore the cultural, theological, and artistic contexts of key themes (e.g. creation, journey, forgiveness, love) in the sacred texts of the major historical world religions as they are portrayed in contemporary poetry and drama, and in novels that have been adapted to film

Prerequisite(s): LL 131 or CMP 120.

LL 282 Major Poets 3 Credits

This course introduces students to poetry via the reading and analysis of different poetic forms. While reading, listening to, performing and discussing poems from a wide cultural spectrum, students learn to evaluate and appreciate poetry by understanding such elements as metaphor and persona.

Prerequisite(s): LL 131.

LL 285 Writing About Music: A Seminar for Performers, Teachers, and Academics 3 Credits

A writing intensive course focusing on the essential writing tasks encountered by musicians in their roles as performers, teachers, and scholars.

Prerequisite(s): LL 131, BHP 150 or CMP 125.

LL 327 Dante's Commedia 3 Credits

An introduction to Dante Alighieri's *Commedia* ("Inferno", "Purgatorio" and "Paradiso") exploring key ethical and aesthetic elements of the poem through close reading and critical analysis of the primary text.

Prerequisite(s): LL 131, BHP 150 or CMP 125.

LL 490 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Music Education (ME)

ME 111 Music Education Lab 0 Credits

Undergraduates must meet the weekly attendance and participation requirement for Music Education Lab during every semester of enrollment up to seven semester as an undergraduate Music Education major except for the student teaching semester. Grading is "P" (satisfactory) or "U" (unsatisfactory). As part of the Music Education Lab experience, students are required to complete 15 hours of professional development.

ME 161 Art of Teaching Music I 3 Credits

Art of Teaching Music I (ATM I) is a first in the sequence of Music Education courses designed to prepare the undergraduate Music Education major students for their student teaching experience and completion of their teaching licensure. There will be field observations of master teachers under the aegis of a music education faculty that will allow students not only to observe, but to have guided experience in assessing how teaching and learning are experienced in real classrooms. Partnerships between local expert teachers and music education faculty will allow students to complete field observations as well as guided experience in teaching and assessing students in real classrooms.

ME 171 Critical Pedagogy I 2 Credits

This course provides undergraduate music education majors with a foundation in issues related to teaching music in public schools. This course will engage students in diverse ways of thinking about music teaching practice and social theory that transforms the relationships among classroom music teaching, performance and the production of musical knowledge. In addition to the social and political contexts of schooling in general, the course will explore the moral and ethical dilemmas music teachers face in the day-to-day routines of their classroom teaching. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. Music Education majors will receive priority registration.

ME 172 Guitar & Recorder in the Classroom 1 Credits

This course provides undergraduate music education majors with a foundation for teaching and playing the guitar and recorder. Students will gain technical proficiency in both instruments while learning appropriate repertoire of a multicultural and diverse nature. Students will also learn efficient pedagogy practices for teaching both instruments, learning of their application in educational settings. Students are expected to provide their own acoustic guitar for this course. Recorders are available for purchase in the college bookstore.

ME 187 Instrumental Music: Strings 1 Credits

This course is designed as an introduction to the pedagogy of string instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring, and idiomatic writing are investigated. When available, instruments may be rented from the college. Rental fee, per instrument: \$25.

ME 188 Instrumental Music: Winds/Percussion 2 Credits

This course is designed as an introduction to the pedagogy of brass, woodwind, and percussion instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring and idiomatic writing are investigated. When available, instruments may be rented from the college. Students must provide their own drum pads and sticks. Rental fee, per instrument: \$60.

ME 262 Art of Teaching Music II 4 Credits

Art of Teaching Music II (ATM II) is designed to build on the knowledge, skills, and dispositions, introduced in ATM I. Students will expand their abilities in the domains of planning, teaching, assessing, reflecting, developing musicianship, and philosophy in context of teaching general music. Moreover, they will have the opportunity to put these abilities into practice when teaching peers and teaching elementary and middle general school students.

Prerequisite(s): ME 161.

ME 271 Critical Pedagogy II 2 Credits

Critical Pedagogy II explores the theories that provide a psychology of learning to frame Critical Pedagogy for Music Education. Grounded in experiential learning, constructivism and multiple intelligences theory, the course content honors the diversity of gifts and challenges children present inside the music classroom. Students learn strategies for the teaching of literacy that integrate into a teaching model to empower musicianship, meet National Standards for Music Education, New Jersey Core Curriculum Content Standards in Music and align to INTASC standards and the New Jersey Core Curriculum Content Standards in Music. Students design instruction that yields transformational experiences for both the children and their music teacher. This course includes required off-campus field observation in the schools. It is recommended that students complete SP 175 before taking this course. Music Education majors will receive priority registration for this course.

Prerequisite(s): ME 171.

ME 271H Critical Pedagogy II Honors 1 Credits

Primary source readings, expanded assignment and additional content that supplements ME 271. Capstone project consists of a significant paper based upon original ideas that reflect the tenets of the coursework. **Prerequisite(s):** ME 171, BHP status.

Corequisite(s): ME 271; Online only.

ME 371 Critical Pedagogy III 2 Credits

Through dialogue and small group discussion, students analyze the principal sociological and philosophical discourses that influence education in general and music education specifically. Historical and post-modern perspectives as well as international perspectives are considered within the context of a Critical Pedagogy for Music Education. Students, with their teacher, look critically at the role and purpose of education and music education in American society and learn to critique theory and practice in the field with the goal of informing their own teaching practice. Students compose a personal philosophy of music education. This culminating paper reflects their ability to synthesize and process the ideas presented and discussed throughout the course and to present and develop their own original thoughts with depth and significance. It also provides evidence that students can participate in a community of scholarly discourse on topics germane to music education. Music Education majors will receive priority registration for this class. Prerequisite(s): ME 271 and junior status. Corequisite(s): ME 581 or ME 582. 201910.

ME 371H Critical Pedagogy III Honors 1 Credits

Primary source readings, expanded assignment and additional content that supplements ME 371. Students will demonstrate the ability to synthesize and process complex ideas, and develop original thoughts with depth and significance. Prerequisite(s): ME 271, BHP status. Corequisite(s): ME 371; Online only.

ME 471 Music and Hip Hop Culture 3 Credits

Hip Hop in the United States is arguably the most lucrative, popular, and culturally challenging contemporary musical force. The narratives of Hip Hop go beyond the boundaries of race and class as well as those of music, poetry and dance. As such, Hip Hop is a phenomenon that presents problems as well as great possibilities. This course explores them from the standpoint of educational sociology, looking at their implications for music in schools as well as in daily life.

Prerequisite(s): ME 271.

ME 472 Teaching/Learning:Urban Schools 3 Credits

This course offers students theoretical and practical insight into teaching in urban schools. The class will present an analysis and practical implications for what is needed in order to successfully engage in teaching in urban centers in the United States. Students will balance field experiences with critical analyses of issues such as multicultural teaching, race, class, and economics in urban schools as well as their curricular and pedagogical implications.

Prerequisite(s): ME 581, ME 582.

ME 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

ME 491 Kodaly Music Reading 2 Credits**ME 492 Student Teaching 12 Credits**

ME 492 - Student Teaching A full semester internship in directed full-time teaching supervised by department members and carried out in schools with approved cooperating teachers. In addition to the field experience, students attend a weekly seminar on campus to discuss current issues in music education as they relate to individual teaching situations. Students discuss classroom management strategies, action research, authentic instruction, critical thinking, feeling and action as well as teaching to focusing questions, concepts and objectives. Throughout student teaching, students maintain a digital portfolio that demonstrates how they meet the New Jersey State and INTASC teaching standards. At the conclusion of the semester, students attend a portfolio review with members of the Music Education faculty to assess the success of the teaching experience. Students must provide their own transportation to student teaching site. Student Teaching fee: \$245. Fees for the Praxis Examination and Teacher Certification are additional. Additional information regarding student teaching may be found in the department's Student Teaching Handbook at www.rider.edu/musiced

Prerequisite(s): Classification as a full senior; Satisfactory completion of music education courses numbered 171, 172, 271, 187 and 188, 581, 582 and either Developmental or Educational Psychology; Satisfactory completion of TH 241; For voice primary students, satisfaction of all requirements of PI 204; A minimum 2.75 cumulative grade point average; Demonstrated aptitude, motivation and potential for success in teaching, as evidenced by the successful completion of portfolio reviews; Departmental approval; Students in the Master of Music Education (MME) degree program must take the following courses as prerequisites to student teaching; ME 581, ME 582, ME 587, ME 595, ME 725.

ME 499 Special Topics Music Education 2 Credits

The content of this course and the number of credits will vary with the special interests and qualifications of the professor teaching it.

Music History (MH)

MH 247 Music Historiography I 3 Credits

Historiography I begins by exploring similarities and differences between various music cultures around the world, and continues with an examination of selected genres of Western Art Music of the Medieval, Renaissance and Baroque periods. Basic information literacy skills, such as searching library catalogs, databases and reading academic articles also will be covered.

Prerequisite(s): LL 131.

MH 248 Music Historiography II 3 Credits

Examines Western Art Music since 1750 and includes a research assignment that builds upon the information literacy skills gained in MH 247.

Prerequisite(s): MH 247.

MH 345 Music Since 1900 3 Credits

Examines controversies and aesthetic movements in 20th and 21st century music. Emphasis is placed upon critical reading and writing skills.

Prerequisite(s): MH 248.

MH 433 Seminar in Music History 3 Credits

The contents of courses carrying this number will vary with the special interests and qualifications of the instructors teaching them. Possible topics include period courses, courses from a distinct perspective, composer courses and genre courses.

Prerequisite(s): MH 248.

MH 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation.

Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Music Theory (TH)

TH 045 Introduction to Musicianship 4 Credits

Integration of the basic elements of music, scales, intervals, key signatures, triads and rhythmic notation with the practical skills of sight singing, rhythmic reading, keyboard harmony and dictation. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade; 0 credits toward graduation, counts as 4 credits in the semester load.

TH 101A Composition Primary 2 Credits**TH 101C Composition Elective 2 Credits****TH 101D Composition Elective 1 Credits****TH 101E Composition Primary 2 Credits****TH 101F Composition Primary 1 Credits****TH 141 Musicianship I 4 Credits**

This course assists students in learning and integrating aural, performance, analytical and composition skills involving diatonic melody and harmony. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade.

Prerequisite(s): TH 045 or passing a placement test.

TH 142 Musicianship II 4 Credits

A continuation of TH 141 involving chromatic melody and harmony with an introduction to binary and ternary form.

Prerequisite(s): minimum "C-" grade in TH 141.

TH 201A Composition Primary 2 Credits**TH 201E Composition Primary 2 Credits****TH 201F Composition Primary 1 Credits****TH 237 Composition Class 3 Credits**

Class instruction in original composition. May be taken as a level I elective.

Prerequisite(s): For non Theory/Composition majors only, minimum "C-" grade in TH 142.

TH 241 Musicianship III 4 Credits

A continuation of TH 142 with an introduction to larger musical forms and counterpoint.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 251 Analytical Studies I 3 Credits

An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain only the harmonic vocabulary and formal structures studied in TH 141 and TH 142, may vary each time the course is offered. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 253 Orchestration 3 Credits

A study of the orchestra and its individual instruments from the standpoints of the composer, arranger and conductor. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 255 Song Writing 3 Credits

Solo vocal composition in various styles. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 259 Electroacoustic Music 3 Credits

An introduction to the history and literature of electro-acoustic music emphasizing hands-on creative opportunities in sequencing and digital sound processing. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 301A Composition Primary 2 Credits**TH 301E Composition Primary 2 Credits****TH 301F Composition Primary 1 Credits****TH 342 Contemporary Trends 3 Credits**

An analytical study of the compositional techniques of the 20th and 21st centuries.

Prerequisite(s): TH 241.

TH 401A Composition Primary 2 Credits**TH 401E Composition Primary 2 Credits****TH 401F Composition Primary 1 Credits****TH 424 Choral/Instru Arranging 3 Credits**

Arranging for various ensembles of voices and instruments. May be taken as a level II theory elective.

Prerequisite(s): TH 241.

TH 431 Form and Analysis 3 Credits

Study of the compositional process as observed in selected examples of music literature, predominantly from the tonal repertoire. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 432 Contrapuntal Techniques 3 Credits

18th century counterpoint with an emphasis on analysis and writing of original compositions. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 433 Special Topics in Theory 3 Credits

The content of the course carrying this number will vary with the special interests and qualifications of the professor teaching it. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 452 Analytical Studies II 3 Credits

An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain a more advanced harmonic vocabulary and larger formal structures than the music studied in TH 251, may vary each time the course is offered. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 480 Senior Project 3 Credits

Independent study in theory or composition resulting in either a paper comparable to a substantial journal article or a composition in one of the larger forms.

Prerequisite(s): Five semesters of private composition study.

TH 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Organ (OR)

OR 101A Organ Primary 2 Credits

OR 101B Organ Primary 1 Credits

OR 101C Organ Elective 2 Credits

OR 101D Organ Elective 1 Credits

OR 101E Organ Primary 2 Credits

OR 101F Organ Primary 1 Credits

OR 101G Organ Primary 2 Credits

OR 201A Organ Primary 2 Credits

OR 201B Organ Primary 1 Credits

OR 201E Organ Primary 2 Credits

OR 201F Organ Primary 1 Credits

OR 201G Organ Primary 2 Credits

OR 301A Organ Primary 2 Credits

OR 301B Organ Primary 1 Credits

OR 301E Organ Primary 2 Credits

OR 301F Organ Primary 1 Credits

OR 301G Organ Primary 2 Credits

OR 401A Organ Primary 2 Credits

OR 401B Organ Primary 1 Credits

OR 401E Organ Primary 2 Credits

OR 401F Organ Primary 1 Credits

OR 401G Organ Primary 2 Credits

OR 433 Organ Literature I 3 Credits

Historical study of organ literature coordinated with a study of the development of the organ as a musical instrument.

OR 434 Organ Literature II 3 Credits

Continuation of OR 433.

OR 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Piano (PI)**PI 045 Introduction to Piano Secondary 1 Credits**

Designed for student with little to no background in piano study or music reading. Students will develop a foundation (basic elements) of pianism/musicianship skills and will focus on the most fundamental aspects of music study at the piano. 0 credits toward graduation, counts as 4 credits in the semester load.

Prerequisite(s): placement; Students must pass this course with a grade of "Y" to progress to PI 103: Piano Secondary I.

PI 101A Piano Primary 2 Credits

PI 101B Piano Primary 1 Credits

PI 101C Piano Elective 2 Credits

PI 101D Piano Elective 1 Credits

PI 101E Piano Primary 2 Credits

PI 101F Piano Primary 1 Credits

PI 101G Piano Primary 2 Credits

PI 103 Piano Secondary I 1 Credits

Establishes a solid foundation of piano playing through integration of musicianship skills in addition to building facile digital independence and bilateral hand coordination. Minimum grade of "B-" required to pass the course.

Prerequisite(s): Grade of "Y" in PI 045 or placement.

PI 104 Piano Secondary II 1 Credits

Continuation of PI 103; appropriate for the advanced beginner. Minimum grade of "B-" required to pass the course.

Prerequisite(s): PI 103 or placement.

PI 201A Piano Primary 2 Credits

PI 201B Piano Primary 1 Credits

PI 201E Piano Primary 2 Credits

PI 201F Piano Primary 1 Credits

PI 201G Piano Primary 2 Credits

PI 203 Piano Secondary III 1 Credits

Establishes fluidity in piano playing through integration of musicianship skills, digital independence and bilateral hand coordination. Minimum grade of "B-" needed to pass the course.

Prerequisite(s): minimum grade of "B-" in PI 104 or placement.

PI 204 Piano Secondary for Mus Ed & Sacred Music 1 Credits

Development of practical keyboard skills: sight-reading; playing vocal lines and piano parts of choral works; playing individual lines/parts of small-scale instrumental works; harmonizing and transposing melodies with accompaniments.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 205 Piano Secondary VCPER 1 Credits

Development of practical keyboard skills: sight-reading; playing vocal lines and piano parts of songs and arias; warm-up exercises; transposing vocal lines and portions of accompaniments; harmonizing melodies.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 206 Piano Secondary for Music Theater Majors 1 Credits

Development of practical keyboard skills: sight-reading; playing vocal lines and piano parts of songs and arias; warm-up exercises; transposing vocal lines and portions of accompaniments; harmonizing melodies.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 207 Piano Secondary for Theory Comp Majors 1 Credits

Development of practical keyboard skills in the areas of score reading (including one's own works), use of piano as a tool for composition, and realizing chord progressions.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 208 Piano Secondary BAM 1 Credits

Development of practical keyboard skills: sight-reading; playing vocal lines and piano parts of songs and arias; warm-up exercises; transposing vocal lines and portions of accompaniments; harmonizing melodies.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 297 Fund of Piano Pedagogy I 3 Credits

Fundamentals I is devoted to study of techniques, methods, and materials suitable for beginning through early intermediate level students. Other areas of study include motivational strategies, establishment of effective practice habits, recital preparation, technique, and elementary duet materials. Students analyze and demonstrate teaching from three different beginning piano methods. Observation of professional teaching is done in the context of class and private lessons at the Westminster Conservatory.

PI 298 Fund of Piano Pedagogy II 3 Credits

In Fundamentals II, students continue to apply their experience with piano methods to the teaching of students. In addition, the semester is devoted to the study of materials from all style periods for upper elementary and intermediate level students. Students observe private and group lessons appropriate to these levels. The course culminates in an individual lecture recital demonstrating music from a variety of style periods.

Prerequisite(s): PI 297.

PI 301A Piano Primary 2 Credits**PI 301B Piano Primary 1 Credits****PI 301E Piano Primary 2 Credits****PI 301F Piano Primary 1 Credits****PI 301G Piano Primary 2 Credits****PI 397 Fund of Piano Pedagogy III 3 Credits**

Fundamentals III involves supervised private and group teaching of beginning students. Emphasis is placed on lesson planning, presentation of concepts, use of technology, and the relationship between technique and musicianship skills. The course further addresses the different psychological and methodological approaches to teaching adults and children in class and private settings, and includes an overview of materials for the adult student and group classes. The course culminates in a lecture recital on a pedagogical subject of the students choice.

PI 401A Piano Primary 2 Credits**PI 401B Piano Primary 1 Credits****PI 401E Piano Primary 2 Credits****PI 401F Piano Primary 1 Credits****PI 401G Piano Primary 2 Credits****PI 413 Accompanying Class 2 Credits**

This course is designed with the twofold purpose of allowing undergraduate pianists to fulfill their piano ensemble elective requirement within the professional studies area as well as providing an opportunity for voice primary students to further their piano study in a challenging forum in situations directly related to their repertoire. The students in the class will receive instruction in the stylistic, technical, analytical and linguistic aspects of vocal literature. The many issues involved in vocal collaboration will be discussed along with in-depth study of the pianist's role in musical partnerships. Issues of musical freedom, language, and the varieties of sonic treatment unique to vocal literature will be discussed. Italian, French, German and English song repertoire from various style periods will provide the assignments for performance and discussion.

PI 435 Survey of Piano Literature I 3 Credits

A study of representative works from 1650-1800 by composers including J. S. Bach, C.P.E. Bach, J.C. Bach, Haydn, Mozart, and Beethoven.

Prerequisite(s): MH 248.

PI 436 Survey of Piano Literature II 3 Credits

A study of representative works from 1800 to the present by composers including Beethoven, Schubert, Mendelssohn, Schumann, Chopin, Liszt, Brahms, Debussy, Ravel, Prokofiev, and Bartók.

Prerequisite(s): MH 248.

PI 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Religion/Philosophy (RP)

RP 265 Lit of New Testament 3 Credits

An introduction to the thought of the early Christian church as expressed in the New Testament, this course will emphasize a literary and historical reading of the Gospels and Epistles. It will introduce students to the Jewish and Greco-Roman religious, political and cultural worlds in which Jesus and his disciples lived and within which earliest Christianity arose.

RP 268 Hebrew Bible & Old Testament 3 Credits

This course introduces students to the writings of the Hebrew Bible/Old Testament within their historical and literary contexts. By critically reading these books, students will become aware of the history, culture and religion of ancient Israel - all of which contributed to the traditions of Judaism and Christianity.

Sacred Music (SM)

SM 121 Survey of Sacred Music Lit 3 Credits

Broad survey of Christian music. Through standard repertoire, major historical genres of sacred music are explored from biblical roots in the Old and New Testament to the postmodern expressions of our time.

SM 122 Worship and Theology 3 Credits

A study of the content, theology, and history of the Old and New Testament narratives that the church recounts and celebrates in its liturgical year.

SM 142 Intro to Music Ministry 2 Credits

An introduction to the vocational needs, professional relationships, administration styles and teaching roles of the church musician. In addition to an overview of professional standards, emphasis will also be placed on music engraving skills, budgeting, recruitment, endowments and fundraising.

SM 158 Intro Handbell Leadership 1 Credits

A hands-on course providing a strong foundation for the beginning director/ringer. It will include information about ringing instruments, maintenance, ringing and damping techniques, articulations, part assignments, a survey of handbell literature, and rehearsal planning and directing.

SM 250 Contemporary Worship 2 Credits

This course is an exploration of the various forms of worship being practiced in urban churches across America. Practical and skill-based, it is designed to allow the student to explore praise and worship music, different styles of gospel, and other forms of music used in non-traditional worship.

SM 340 Church Field Education 1 Credits

A practical program in which students take responsibility for the music program of an assigned affiliate church. Under supervision, students exercise the skills and concepts learned in the classroom. Enrolled students also meet in a weekly preceptorial. Sacred Music majors must take two consecutive semesters, normally in the junior year.

Prerequisite(s): SM 121, SM 122.

SM 354 Hymnody & Psalmody 3 Credits

A study of the origins and development of Christian song. The first part of the course deals with the nature of the Psalms in their Biblical setting and their use in the worship of different traditions. The second part of the course deals with the history of congregational hymnody - texts, tunes, styles and functions - from the 16th century to the present. The course aims to develop an awareness of the textual and musical treasures available for both congregational and choral use.

SM 360 History of American CM 3 Credits

A broad survey of American church music beginning with colonial psalm-singing and continuing through four centuries of musical development leading up to and including the vast panorama musical practices found in post-modern Christianity. A special emphasis will be placed on the development and influence of African-American church music on contemporary musical practices. **Prerequisite(s):** SM 121.

SM 410 African Amer Choral Lit 3 Credits

This course is designed to give students a better understanding of the choral literature, historical context and text analysis of African American composers.

SM 454 German Church Music 3 Credits

A study of church choral literature by German composers from the 16th century to the present focusing on the pre-Bach and post-Bach cantata. Class performances of selected works. Complements SM 455. Offered in rotation with other Sacred Music electives.

SM 455 Bach Cantatas 3 Credits

A study of the history, performance practices, and liturgical setting of the cantatas of J.S. Bach. Class performances of selected cantatas. Complements SM 454. Offered in rotation with other Sacred Music electives.

SM 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 is required.

Prerequisite(s): junior or senior standing.

SM 491 SM Internship 1 Credits

A practical program in which students take responsibility for the music program of a local church or work as an intern in an assigned affiliate church. Under faculty supervision, students exercise the skills and concepts learned in the classroom. Enrolled students also meet in a weekly preceptorial. Sacred music majors must take two consecutive semesters, normally in the junior year.

Prerequisite(s): CR 215.

Social/Physical Science (SP)

SP 171 Western Civ I 3 Credits

This survey history course presents a cohesive picture of the development of Western societies from prehistoric times to the early Renaissance. Social, political and economic aspects are covered; intellectual and cultural developments are emphasized. Familiarity with primary sources and critical reading are integral to the course.

SP 172 Western Civ II 3 Credits

Continuation of SP171. This survey history course covers developments in Western societies from the Renaissance to the present. Major intellectual and cultural trends and movements are presented, along with historical progress and socio-economic expansion.

SP 273 Developmental Psychology 3 Credits

The physical and psychological growth of the individual from infancy through adolescence is studied, with emphasis on cognitive, emotional, and social processes.

Prerequisite(s): SP 175.

SP 274 Educational Psychology 3 Credits

The psychological foundations of education, based on the findings of experimental research in learning, transfer, motivation, reinforcement, and behavioral modification.

Prerequisite(s): PSY 100.

SP 286 Life in Middle Ages 3 Credits

A seminar in which the life styles of medieval Europeans are studied. Students will develop an understanding of particular social organizations and problems of the period by examining the conditions and events of everyday medieval life. Offered in rotation with other History courses.

SP 408 Voice Science 3 Credits

Study of the physics and physiology of voice production. Musical and vocal acoustics are explored using the facilities of the Westminster Voice Laboratory. Anatomic and physiologic underpinnings of respiration, phonation, articulation, registration and hearing are explored in depth.

Corequisite(s): CR 509.

Voice (VC)

VC 101A Voice Primary 2 Credits

VC 101B Voice Primary 1 Credits

VC 101C Voice Elective 2 Credits

VC 101D Voice Elective 1 Credits

VC 101E Voice Primary 2 Credits

VC 101F Voice Primary 1 Credits

VC 101G Voice Primary 2 Credits

VC 103 Voice Secondary 1 Credits

VC 114 Introduction to Lyric Diction 2 Credits

Introduction to the International Phonetic Alphabet (IPA) and the sounds of all major sung languages through oral and written drill. Open to Voice Performance majors only.

VC 115 English & Italian Diction 2 Credits

Introduction to the rules of singing English and Italian through the use of the International Phonetic Alphabet (IPA) with oral and written drill.

VC 116 French & German Diction 2 Credits

Introduction to the rules of singing French and German through the use of the International Phonetic Alphabet (IPA) with oral and written drill.

Prerequisite(s): VC 115.

VC 118 Italian Diction 2 Credits

Introduction to the rules for singing Italian through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 119 French Diction 2 Credits

Introduction to the rules for singing French through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 120 German Diction 2 Credits

Introduction to the rules for singing German through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 191 Movement for the Performer 2 Credits

Movement exercises and etudes help students develop proper alignment, physical freedom, unification of voice, breath, and body, and help them explore the body as an expressive instrument.

VC 201A Voice Primary 2 Credits

VC 201B Voice Primary 1 Credits

VC 201E Voice Primary 2 Credits

VC 201F Voice Primary 1 Credits

VC 201G Voice Primary 2 Credits

VC 203 Voice Secondary 1 Credits

VC 291 The Singing Actor 2 Credits

The introduction to vocal performance entails coaching of selected songs, arias or repertoire from music theater and techniques for performance preparation through intensive research. A final written project involves a musical and dramatic analysis of all chosen repertoire.

Prerequisite(s): successful completion of Level I voice jury.

VC 301A Voice Primary 2 Credits

VC 301B Voice Primary 1 Credits

VC 301E Voice Primary 2 Credits

VC 301F Voice Primary 1 Credits

VC 301G Voice Primary 2 Credits

VC 305 Singing in Italian and French 2 Credits

Master class and private coaching in vocal performance of Italian and French language song, recitative and opera arias. The class will focus on pronunciation, inflection and nuances of sung Italian and French.

Prerequisite(s): Successful completion of Level I jury; VC 118, VC 119.

VC 306 Singing in German and English 2 Credits

Master class and private coaching in vocal performance of German and English language song, recitative and opera arias. The class will focus on pronunciation, inflection and nuances of sung German and English.

Prerequisite(s): Successful completion of Level I Jury; VC 120.

VC 401A Voice Primary 2 Credits

VC 401B Voice Primary 1 Credits

VC 401E Voice Primary 2 Credits

VC 401F Voice Primary 1 Credits

VC 401G Voice Primary 2 Credits

VC 408 Voice Science 3 Credits

Study of the physics and physiology of voice production. Musical and vocal acoustics are explored using the facilities of the Westminster Voice Laboratory. Anatomic and physiologic underpinnings of respiration, phonation, articulation, registration and hearing are explored in depth.

VC 433 Song Literature I 2 Credits

A survey of solo literature for voice and accompanying instrument including solo vocal music of the Baroque period and German lieder.

Prerequisite(s): MH 248.

VC 434 Song Literature II 2 Credits

A survey of solo literature for voice and accompanying instrument including French mélodie, songs by nationalist composers, English and American song.

Prerequisite(s): MH 248.

VC 457 Private Coaching 2 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 457 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 458 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 458 Private Coaching 1 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 457 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 458 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 467 Private Dramatic/Role Coaching 2 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 467 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 468 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 468 Private Dramatic/Role Coaching 1 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 467 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 468 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Department Information

- Arts and Sciences (p. 821)
- Baccalaureate Honors Program (p. 822)
- Conducting (p. 823)
- Music Composition, History and Theory (p. 824)
- Music Education (p. 825)
- Organ/Harpischord (p. 828)
- Piano (p. 828)
- Sacred Music (p. 829)
- Voice (p. 830)

Arts and Sciences

General Remarks

Arts and Sciences courses seek to provide those elements of a liberal arts education that will furnish undergraduates with an intelligent grasp of their cultural heritage and of the world in which they live. A thorough and ongoing contact with the humanities and an appreciation for the behavioral, social and physical sciences are indispensable to the development of musical leadership. Arts and Sciences courses are taught on the Westminster campus by faculty from all departments of the University. Westminster students may enroll in classes at the Princeton and Lawrenceville campuses. Please see the section, "Princeton University Program" for additional information.

Music History and Art History courses cannot be used to fulfill the Arts and Sciences history elective requirement.

Bachelor of Arts in Music

The Bachelor of Arts in Music (p. 766) is a liberal arts degree with a major in music. A broad foundation in liberal studies complements extensive studies in music. The curriculum is designed for students whose academic/and or career interests extend beyond music.

Reading, Writing and Mathematics Skills

All entering undergraduates take placement tests in order to determine the level of their English reading and writing abilities and the level of their mathematics skills. Students exempted from any required Arts and Sciences course(s) must replace the credits with additional Arts and Sciences electives.

As a result of SAT scores and/or the English placement test, students may be required to take LL 037 during their first fall semester. LL 037, if required, must be completed satisfactorily as a prerequisite to all other Arts and Sciences courses. All students should complete LL 131 or CMP 203 during their first year of study.

English Placement

Students who have earned an AP score of 4 on either the Composition and Literature or the Language and Literature examination will receive credit for LL 131. Students who have earned an AP score of 5 on either the Composition and Literature or the Language and Literature examination will receive three additional credits.

Students with a combined score on the SATW and SATR of 1300 or higher are eligible to enroll in CMP 203 or LL 131. Students may enroll in BHP 100 by invitation of the Westminster Choir College Honors Program.

Students with an SATW score of 550 or higher OR an essay score of 8 or higher will be placed into LL 131.

Students with an SATW below 550 AND an essay score below 8 will be placed into LL 037.

Students with an SATW score lower than 500 OR an essay score lower than 7 may not challenge their placement into LL 037.

Students with an SATW score between 500-550 and an essay score of 7 may challenge their placement into LL 037 by taking the English Placement Test.

Mathematics Placement

As a result of the SAT scores and/or the mathematics placement test, students may be required to take MTH 100S Math Skills Lab.

Failing grade on the Mathematics Placement Test, OR SAT Math < 550: MTH 100S Math Skills Lab.

Passing grade on the Mathematics Placement Test, OR SAT Math \geq 550 OR completion of MTH 100S Math Skills Lab: MTH 102 Finite Mathematics.

Foreign Languages

Foreign language study is sequential, each course being prerequisite to the next. A minimum grade of C is required for advancement to the next level. Grades of C- or below will not be accepted. Placement tests are offered for students who have backgrounds in French, German or Italian. Advanced standing may be approved, but credit is not awarded except by transfer of credits earned in foreign language study at the college level for undergraduate students only.

- Foreign language placement tests are intended to determine appropriate placement only for students that have had prior instruction in the language and intend to take further courses in the language at Rider University. Undergraduate students whose test results place them into 200 or 300-level must take at least one semester of the language in order to fulfill an undergraduate language requirement.

- Foreign language placement tests do not result in credit awarded.
- Undergraduate students who have earned a minimum grade of C in a language course at another college or university will receive credit after supplying transcript evidence. Grades of C- or below are not sufficient.
- Students who have earned a minimum score of 3 on the AP (Advanced Placement) test, may receive three to six credits for each language exam.
- Undergraduate students who would like to receive credit for one or more language courses may take the College Level Examination Program (<https://clep.collegeboard.org/exam>) (CLEP) in that language at their own expense. (There is currently no CLEP exam for Italian.) Students who earn a score of at least 65 on CLEP exams may earn credits towards graduation.
- Native speakers may be exempted from taking a course in their native language by the Dean or by recommendation from the appropriate language instructor. This exemption does not receive credit, but fulfills undergraduate language requirements in that language.

For undergraduates exempted from language courses, the language credits are replaced by electives in Arts and Sciences.

AP, IB, and CLEP Credit

Students who have earned a minimum score of 3 may receive three to six credits for each Advanced Placement (AP) test. A minimum score of 4 is required on the Music Theory AP test. Specific course and credit information is available at www.rider.edu/admissions/undergraduate-admission/how-apply/first-year-college-students/ap-credits (<http://www.rider.edu/admissions/undergraduate-admission/how-apply/first-year-college-students/ap-credits>)

Students who have completed International Baccalaureate (IB) courses must submit appropriate transcripts and scores. Incoming students may be granted up to 20 credits on the basis of their International Baccalaureate (IB) coursework. Credits are awarded for Higher Level IB courses based on the student receiving a score at or above the level approved by the department that evaluated the course (in no case less than a score of five). In order to grant credit, Rider's Office of Undergraduate Admission must be sent an official IB transcript. Specific course and credit information may be found at www.rider.edu/admissions/undergraduate-admission/how-apply/ib-course-equivalency (<http://www.rider.edu/admissions/undergraduate-admission/how-apply/ib-course-equivalency>)

In the case of the College Level Examination Program (CLEP) (<https://clep.collegeboard.org/exam>), students who have earned scores of at least 65 on tests prior to entering Westminster Choir College may apply these courses toward graduation. Students are limited to three credits per course unless additional credit is specifically authorized by the department. After enrolling at Westminster, students must obtain advance written approval from the department in order to earn credit through CLEP.

The following policies govern the awarding of academic credit for CLEP Examinations:

1. Credit will be provided for the successful completion of CLEP Subject Examinations, provided the student has not already received credit for corresponding courses.

2. A college course may not be taken for credit if the student has already received credit for the course through CLEP.

3. Continuing students must obtain approval from their academic dean prior to taking CLEP examinations.

4. Awarding of CLEP credits, like credit transferred from other colleges and universities, is subject to the approval of the student's academic dean.

5. Juniors or seniors generally may not obtain CLEP credits. Students having CLEP credits or contemplating CLEP exams should consult with their academic dean.

Faculty

Elly Sparks Brown • Adjunct Assistant Professor, Arts and Sciences, 2013. B.A., Seton Hill University; M.A., The Catholic University of America; M.Div., Virginia Theological Seminary; D.Min., Wesley Theological Seminary.

Baccalaureate Honors Program

Westminster Choir College Honors Program

General Remarks

The Baccalaureate Honors Program (BHP) is a University-wide honors program designed to enrich the educational opportunities available to Rider students. It is available to those students of proven intellectual capability who are invited to become Baccalaureate Scholars. Interdisciplinary in orientation, the Westminster Choir College program enables Baccalaureate Scholars at Westminster to expand their knowledge and interest in the liberal arts during their music study. Through a series of team-taught seminars, single discipline honors courses and other options for music honors study, as well as an honors thesis, scholars extend their ability to think critically, coherently, and systematically about the great themes, ideals and movements of their human heritage.

Students are invited to join the Westminster Baccalaureate Honors Program as entering freshmen and may apply as currently enrolled freshmen or sophomores. Generally, students with SAT and high school GPA scores in the top 20% of the entering Westminster freshmen class are considered for invitation into the WCC BHP program. Students currently enrolled at Rider University must have at least a 3.3 GPA at the time of application to the program. In order to remain in the Baccalaureate Honors Program, the student must maintain a minimum cumulative GPA of 3.3.

Non-honors students, including juniors and seniors, who have earned a minimum cumulative GPA of 3.5, including juniors and seniors, may enroll in a particular honors seminar course with approval of the Westminster Choir College Honors Program Director. Permission will be given on

a space-available basis, with priority given to students in the Honors Program.

In order to graduate with Baccalaureate Honors, Westminster students must complete eight honors courses: at least 4 interdisciplinary (team-taught) honors seminars, a capstone (thesis) project, and 3 other honors courses, seminars, or contracts. The Program is supplemented by other honors opportunities at the college and department level, and some graduate courses in music may be allowed as honors courses. All freshman honors students take BHP 150 Honors Seminar: Great Ideas II, which substitutes for English Composition. Most honors courses fulfill core degree requirements. Students may enroll in honors courses on either campus of Rider University. Students should see the Westminster Choir College Honors Program Director regarding guidelines and options for completing honors studies.

To view a list of all BHP courses and the category of requirement for which they count, click here:

<http://www.rider.edu/academics/academic-programs/honors-programs/baccalaureate-honors-program/core-substitutions>

Students enrolled in the Honors Program may register for graduate courses on the Princeton campus and request that they count as honors courses according to the following policies:

- 1) Students who have earned at least 45 credits and hold a minimum cumulative GPA of 3.5 may register for 600-level graduate courses upon permission of the instructor, the Honors Program Director, and the Associate Dean.
- 2) Students who have earned at least 45 credits and hold a minimum cumulative GPA of 3.80 may register for 700-level graduate courses upon permission of the instructor, the Honors Program Director, the Chair of the department offering the course, and the Associate Dean.
- 3) Approval is based upon criteria such as cumulative grade point average, courses taken, and preparation for the particular course requested.
- 4) Undergraduate students permitted to enroll in 600- or 700-level graduate courses must complete the same syllabus and requirements that pertain to the graduate students in the course. The grade for the course will be recorded on a graduate transcript.
- 5) If a grade of "B-" or higher is earned, the course will be permitted to substitute for an undergraduate honors course. For any course used to meet undergraduate requirements, should the student later decide to enroll in a graduate program of the Westminster College of the Arts, the course cannot be used to meet graduate program requirements. In the event the course is required in the graduate program, the department sponsoring the program will identify a suitable substitution.

Honors seminars are designated on student transcripts, whether or not the student completes the Baccalaureate Honors Program. Upon successful completion of the program, an honors student receives an appropriate certificate. Successful completion also is recorded on the transcript and listed in the commencement program.

Conducting

Program Overview

The reputation of Westminster Choir College rests in large part upon the excellence of the choirs and the success of its graduates. The nation's leading critics and orchestra conductors continue to find the choirs worthy of the highest praise. Choral music is therefore the focus of all curricula. Westminster alumni are employed by schools, universities, churches, professional choruses and orchestras and opera houses throughout the world. Opportunities for choral performance on a professional level are unparalleled, and students acquire a strong foundation in conducting technique and knowledge of choral literature.

Ensemble Grading Policy

A. Attendance

- Two absences are allowed per semester. No absences are allowed for dress rehearsals or performances.
- All events on the syllabus are required.
- Any absences over two will result in a lowered letter grade.
- Extenuating circumstances should be discussed with the director before they occur.
- Be on time. Two tardies will count as one absence.
- Missing a dress rehearsal or concert will result in a failing grade for the semester.

B. Participation/General Information

- Positive participation factors into your grade.
- Music and pencil are required at each rehearsal.
- Memorization, written translations and other analytical study may be required.

Required Ensembles

Required ensembles are the essence of Westminster Choir College. These experiences enrich the entire student body and create the opportunity to form a creative musical core.

Chapel Choir and Schola Cantorum are designed to meet the needs of freshmen and sophomores. Each ensemble provides a dynamic and focused experience to build a strong foundation of rehearsal skills, choral tone, language and musicianship. Both ensembles use a variety of repertoire to build a strong foundation for each student.

The Symphonic Choir is at the heart of the college choral community. The ensemble appears with symphony orchestras of the United States and Europe. Students above the lower division sing in the Symphonic Choir, preparing choral/orchestral repertoire for performance at major venues along with local and regional concerts.

Elective Ensembles

Elective ensembles are open to students by audition only. Auditions are held in the fall semester, and students perform in that ensemble for the academic year. The elective ensembles are Westminster Choir,

Williamson Voices, Kantorei, Jubilee Singers and Concert Handbell Choir I.

Conducting Major: Graduate

The graduate choral conducting program, generally a two-year program, trains conductors to be marketable and effective musicians. Westminster offers a balance of academic and performance opportunities. Graduate conducting majors take a core of research, literature, conducting, pedagogy and ensemble. Applied study and ensemble conducting offer each candidate the opportunity to work with the conducting faculty. Candidates must successfully complete a comprehensive oral exam before a degree is conferred. Graduate Conducting majors are admitted by audition in order to assure quality conducting experiences and contact with the graduate faculty.

Conducting Concentration: Graduate

Graduate students majoring in Sacred Music and those Master of Music Education majors admitted with conducting as the performance field participate in Symphonic Choir for two semesters and in Master Singers for two to three semesters. A half recital in conducting is presented at the culmination of study. For Sacred Music majors, the conducting recital is a requirement in addition to the solo recital.

Music Composition, History and Theory

General Remarks

The program in composition, music history and theory aims to develop the aural skills needed by all musicians, to provide the necessary theoretical knowledge for the continuing study and performance of music, to build an understanding of music's function in society, to develop analytical and esthetic understanding of music forms and styles and to foster the creative impulse in music.

The Undergraduate Music History Curriculum

Music history is concerned with why music matters to us both aesthetically and socially, what the past can teach us about ourselves,

and how we arrive at our understandings of the past. It asks such questions as: why did this style or trend occur at this time? Why do we consider this composer to be more important than another composer? What social or political ideas are incorporated into this music? How can music communicate social or political ideas and change society for the better or the worse?

All undergraduates are required to take the two-semester Historiography sequence, Music Since 1900 and a music history elective at or above the 400 level. After completing the required courses, students will have:

- gained a working knowledge of the history of Western Art Music,
- some exposure to music of several other music cultures,
- acquired information literacy skills that will allow them to conduct further research in music history,
- improved their ability to read and critique academic writings and
- completed at least one major research project.

Undergraduate Music Theory Curriculum

Required musicianship courses, Contemporary Trends, and elective theory courses form the core of the undergraduate music theory curriculum. All baccalaureate candidates must elect a level I theory course; Bachelor of Music candidates also must elect a level II theory course. All theory electives are defined as level I or level II under course descriptions. Also see "Music Theory Electives" below.

Incoming undergraduates take placement tests and may be required to take Introduction to Musicianship before beginning the core sequence of studies in musicianship. Exemption from and credit for required college-level courses may be earned by passing examinations administered by the department. These examinations are intended for entering freshmen and transfer students only.

Incoming undergraduates who hold scores of 4 or 5 on the Advanced Placement Examination in Music Theory will receive credit by examination for TH 141 Musicianship I. Students receiving credit for TH 141 are eligible to take a placement test to determine if credit by examination may be granted for additional theory courses.

Theory/Composition Major: Undergraduate

The curriculum for the undergraduate Theory/Composition major is designed to foster individual creative ability and to develop a broad and informed musicianship along with a knowledge of the literature of all periods. The department welcomes diversity of compositional styles and esthetic viewpoints and encourages exploration on the part of its students. The program culminates with a recital of original music written while a student is enrolled at Westminster.

Composition Major: Graduate

Composition majors are expected to write works for soloists, for chamber ensembles, and for large wind or orchestral ensembles. The department welcomes diversity of compositional styles and esthetic viewpoints and encourages exploration on the part of its students. The program culminates with a recital of original music written while a student is enrolled at Westminster.

Composition Primary: Graduate

Graduate students majoring in Sacred Music or Music Education may be admitted with a composition primary. Such a student must complete three semesters of Composition Primary and must present a composition recital as a conductor, accompanist, soloist, or ensemble performer. For

Sacred Music majors, the composition recital is distinct from the required conducting recital.

Music History Elective

The Music History elective (MH 433, MH 733) is an in-depth exploration of a single topic (e.g., a composer, a genre, a country). Topics will vary from year to year. Generally, offerings include at least one course in Western Art Music before 1800, one course in Western Art Music since 1800, one course in Asian, Latin American or African music, and one course in Popular Music (broadly defined) each year. The goal of the elective is not only to teach students about the specific topic of the course, but also to develop students' research skills so that they can teach themselves about any topic in music history in the future. The Music History elective includes a significant research paper (2000+ words at the 400 level; 3000+ words at the 700 level).

Music Theory Electives

Elective courses provide students with opportunities to apply their skills to specific areas of inquiry after satisfying specific prerequisites. The core requirements for Bachelor of Music students include two music theory electives. Bachelor of Music students may meet the theory requirement by taking one level I elective (preferably after completing TH 142 and before taking TH 241) and one level II elective, or else by taking two level II electives.

Level I theory electives include:

TH 237	Composition Class	3
TH 251	Analytical Studies I	3
TH 253	Orchestration	3
TH 255	Song Writing	3
TH 259	Electroacoustic Music	3

Level II theory electives include:

TH 424	Choral/Instru Arranging	3
TH 431	Form and Analysis	3
TH 432	Contrapuntal Techniques	3
TH 433	Special Topics in Theory	3
TH 452	Analytical Studies II	3
TH 550	Keyboard Harmony	3

Music Computing Center

Westminster maintains a music computing facility in which students can compose, orchestrate, and print their compositions in publishable quality using computers interfaced with sampler/synthesizers as well as sequencing and music printing software.

Jay Kawarsky • Professor, Theory, 1989. B.M.E., Iowa State University; M.M., D.M., Northwestern University.

Anthony Kosar • Professor, Theory, and Chair of Music Composition, History, & Theory, 1984. B.M., West Liberty State College; M.M., Southern Illinois University; Ph.D., The Ohio State University.

Carmen Mateiescu • Adjunct Assistant Professor, Theory/Music History, 2007. B.M., M.M., University of Music (Bucharest); Ph.D., Rutgers University.

Joel Phillips • Professor, Theory, 1985. M.M., Eastman School of Music, University of Rochester; B.M., D.M.A., University of Alabama.

Stefan Young • Professor, Theory, 1979. B.M., Rollins College; M.M., The Juilliard School; Ph.D., Rutgers University.

Music Education

Music Education Major: Undergraduate

The undergraduate Music Education curriculum is planned to develop teachers who are reflective, who acknowledge the connections music has to the child's world and who seek to promote an understanding of those connections in a social context. As a result of a curriculum based on Critical Pedagogy for Music Education they come to know and understand:

- the central concepts, tools of inquiry and structures of music education as they relate to the New Jersey Core Curriculum Content Standards for the Visual and Performing Arts and how to design appropriate learning experiences that connect to the students' world and help students to broaden their perceptions of the world around them;
- how children learn and adapt to instruction that meets a diversity of learning styles and special learning needs in a variety of school contexts;
- the importance of teaching that is culturally responsive;
- instructional planning and curriculum design that promote critical thinking, action and feeling through teaching constructivist and other appropriate strategies;
- how to engage students in problem solving, problem posing and meaningful dialogue;
- the appropriate use of multiple assessments;
- sound principles of effective classroom management;
- effective verbal, nonverbal and written communication techniques and the tools of information literacy;
- the importance of being articulate advocates for music education in the schools;
- the importance of schooling within the context of the community and of learning to build partnerships with parents, families and agencies within the community to support students' learning and well-being;
- the importance of on-going professional development.

The curriculum includes a state-approved music education program that leads to a letter of certification eligibility for teaching vocal and instrumental music at all levels in New Jersey. Transfer of certificates to other states is greatly facilitated by accreditation of the program by the National Council for the Accreditation of teacher Education (NCATE) and

by membership of the State of New Jersey in the National Association of State Directors of Teacher Education and Certification program (NASDTEC) and the Interstate New Teacher Assessment and Support Consortium (INTASC).

Music Education Majors must maintain a minimum cumulative grade point average of 2.75. Students whose general progress is unsatisfactory or whose cumulative grade point average falls below a minimum 2.75 level may be dropped from the Music Education major. If a student is dropped from the major because of failure to maintain the minimum grade point average, s/he may apply for readmission to the Music Education department. Readmission will be dependent upon various criteria, including the G.P.A., current academic progress and the student's general standing. Decisions regarding retention or appeals will be made in a manner consistent with state and institutional non-discrimination policies.

Applications for certification are processed each year on November 15 And April 15 and at no other time.

Music Education Lab

Undergraduates must meet the weekly attendance and participation requirements for Music Education Lab during every semester of enrollment up to seven semesters as an undergraduate Music Education major except for the senior student teaching semester. Grading is "P" (satisfactory) or "U" (unsatisfactory). As part of the Music Education Lab experience, students are required to complete 15 hours of professional development. Students propose their own Professional Development Activity (PDA) to be approved by the lab instructor each semester.

Graduate students have no departmental requirements in Music Education Lab.

National Association for Music Education

Music Education majors are encouraged to join the Westminster student chapter of the National Association for Music Education (NAfME.org (<http://www.NAfME.org>)). Membership enables them to attend state, regional and national meetings, providing them with a connection to active members of the profession. Members also receive the Music Educators Journal, Tempo and Teaching Music, which are used as supplementary texts in several courses.

Music Education Portfolios

All Music Education majors must maintain portfolios of work providing evidence of their suitability for teaching. Portfolios of undergraduates are reviewed by the department with students when they have earned at least 60 credits as well as upon completion of ME 492 Student Teaching. Students must pass the portfolio review to continue in the department. Portfolios of graduate students are reviewed each year.

Practicums and Field-based Observations

In addition to the standard student teaching semester in the senior year, a special feature of the Westminster program is the experience of observation and teaching in the context of the elementary and secondary praxis courses, ME 581 and ME 582. These combine instruction in music methods with practical experience in public school contexts. Several music education courses require students to make observations of music classes in urban, suburban, public and private schools.

Students must be prepared to arrange for transportation to and from practicums at a reasonable distance from the college and to sustain related expenses.

Students will be required to obtain a background clearance in an assigned school district in order to participate in a field experience. Students who have been convicted of a felony may not be approved for field experiences, and are not able to receive New Jersey State Teacher Licensure.

Priority Registration

Because of the demand for these courses, ME majors will receive priority registration for:

ME 111	Music Education Lab	0
ME 171	Critical Pedagogy I	2
ME 271	Critical Pedagogy II	2
ME 371	Critical Pedagogy III	2
ME 581	Praxis in Elementary Music	3
ME 582	Praxis in Secondary Music	3

Students who register after pre-registration are not assured places in these classes. Students need permission of the chair to register for student teaching. All pre-requisites for student teaching must be completed before permission is granted. Therefore, students are urged to complete pre-requisites (including PI 204) by the end of the spring semester of their junior year. It is recommended that students meet piano proficiency requirements by the end of their sophomore year.

Student Teaching

Student teaching is a full semester in duration and is usually completed during the seventh or eighth semester of study. Students may not enroll for any applied or classroom courses during the semester of student teaching, except for ME 587 and ME 595. In addition, students may not present or participate in recitals or choral performances or ensembles during the semester of student teaching. Further departmental policies regarding the student teaching semester are contained in the Music Education Department Handbook. Students are referred to the paragraph above which relates to registering for the student teaching semester.

Bachelor of Music/Master of Arts in Teaching (B.M./M.A.T.) 5-year Combined Degree Program

The Bachelor of Music/Master of Arts in Teaching is a five-year, dual-degree University program whereby students earn a Bachelor of Music degree with a major in Music Education from Westminster Choir College and a Master of Arts in Teaching degree from the School of Education. The State of New Jersey letter of eligibility with advanced standing, commonly called "certification", is granted upon completion of the dual degree program. Students may apply for this program upon successful completion of their sophomore portfolio review and, if accepted, may begin the program in their junior year. Students must have the recommendation of the Music Education Department and meet specific requirements for admission that are included elsewhere in this catalog as well as the Rider University catalog.

Music Education Major: Graduate (M.M.)

This program is designed for students who wish to major in music education with a concentration in applied music or composition. It is generally expected that students interested in the Master of Music

program will hold state teaching certification and will have taught for at least one year prior to initial enrollment at Westminster. Applicants are sometimes accepted without this experience, but the Music Education Department reserves the right to require that a year of successful teaching be completed before the Master of Music degree in this major field is granted. Applicants must complete an audition as part of the admission process.

The Master of Music degree in music education does not itself include courses leading to New Jersey certification; applicants should therefore normally possess certificates before beginning master's work.

The Master of Music program reflects the Westminster philosophy that the music educator must be a fully capable musician. Consequently, there is a decided emphasis on performance or composition in the curriculum, with several options available. The professional sequence of courses conjoins philosophy of music education, psychology of music learning and praxis. The course content is presented in the context of post-modern critical theory and connects to the social, cultural and political tensions found in schooling. Students acquire habits of mind to challenge the status quo and complete the program as agents of change—advocating a critical pedagogy for music education that is transformational.

For more information on this program please visit Graduate Programs: Music Education (<http://www.rider.edu/wcc/academics/graduate-programs/music-education>)

Master of Music Education (M.M.E)

The Master of Music Education program is for music teachers who wish to complete graduate study in four summers or in two academic years. Students may also combine summer and academic terms to accelerate completion. Students wishing to pursue K-12 music certification concurrently with this degree may do so through the Graduate Level Teacher Certification Program (GLTP) offered by Rider University's School of Education.

This program includes music education courses, music core courses, choral ensemble performance and a self-designed, 12-credit area of focus proposed by the student to the department. The degree culminates in the completion of a master's thesis. Students in the certification program must plan to include study during the academic year in order to complete required field experiences, including student teaching. Like the Master of Music (M.M.) degree, the professional sequence of courses conjoins philosophy of music education, psychology of music learning and praxis. The course content is presented in the context of post-modern critical theory and connects to the social, cultural and political tensions found in schooling. Students acquire habits of mind to challenge the status quo and complete the program as agents of change—advocating a critical pedagogy for music education that is transformational.

For more information on this program please visit Graduate Programs: Music Education (<http://www.rider.edu/wcc/academics/graduate-programs/music-education>)

Music Education Courses Online

The following music education courses are offered in traditional (fall, spring and summer terms) and online formats throughout the year. The online versions may be offered in 13-week, 8-week and 3-week formats. Students in the MM, MME or BM/MAT programs may take either the traditional or online format to complete their degree. Students in other degree programs may take these courses as free electives:

ME 685	Research in Music Education	3
ME 692	Hist & Phil of Music Educ	3
ME 693	Seminar in Music Educ	3
ME 721	Curric Development & Eval	3
ME 723	Psychology for Music Tchr	3

The following courses are offered by the College of Continuing Studies and may be used as electives in graduate music education programs. They are taught quarterly, online in 8-week modules throughout the year:

CP-600 Creative Practices in Music Teaching and Learning
 CP-620 Creative Practices in Vocal Science
 CP-640 Creative Practices in Choral Pedagogy
 CP-660 Creative Practices in Classroom

Westminster Academy

The Westminster Academy is the laboratory school of the Music Education Department and the Westminster Conservatory. Classes are taught in a residency program at John Witherspoon Middle School, located in Princeton, and to home-schooled students at Westminster Conservatory, located on the Westminster campus. Opportunities for teaching internships are provided for graduate students in music education as well as practicum experience for undergraduate Music Education majors. The teaching philosophy at Westminster Academy embraces Critical Pedagogy for Music Education, connecting music teaching in the context of social change. Lessons are designed to meet individual student learning styles and the teaching strategies are framed in constructivist ideology. The curriculum seeks to affect transformative learning for both students and their teachers.

Westminster Partnership with the Federal University of Rio Grande do Sul, Porto Alegre, Brazil

The music education department at Westminster has a partnership with the graduate music education program at the Universidade Federal do Rio Grande do Sul (UFRGS) in Porto Alegre, Brazil. Faculty members from the music education department at Westminster regularly teach at UFRGS and professors from Porto Alegre present seminars as visiting scholars at Westminster. Opportunities are under exploration for students to study in Brazil as part of their graduate degree. In addition, the Department offers instruction in O Passo (The Step), a Brazilian music education method developed by Lucas Ciavatta of Rio de Janeiro who is an adjunct assistant professor in music education at Westminster. Courses in O Passo are offered in alternate summers and special workshops are planned at various times during the academic year as appropriate. O Passo is taught at Westminster Academy to sixth grade students at Witherspoon Middle School.

Faculty

Al Holcomb (chair) • Associate Professor, Music Education, and Chair of Music Education, 2011. B.A., B.M.E., Texas Christian University; M.M.E., Ph.D., The Hartt School.

Sharon Morrow • Associate Professor, Music Education, 2008. B.F.A., California State University at Fullerton; M.M., University of Wisconsin-Madison.

Maureen Murphy-Fernandez • Adjunct Instructor, Music Education, 2016, B.S. West Chester University.

Colin M. Oettle • Adjunct Instructor, Music Education, 2013. B.M., Ithaca College; M.M., Rutgers University.

Marshall Onofrio • Professor, Music Education, 2007. B.M., B.S., University of Connecticut; M.M., University of Illinois; M.M., University of Nebraska-Lincoln; D.M.A., The Ohio State University.

Organ/Harpischord

General Remarks

The purpose of organ study at Westminster is that of equipping students for church work, teaching and recitals. Thorough training and study of technique, service playing, organ literature and the instrument itself are integral to the total organ program. Details of jury, repertoire and recital requirements may be obtained from the Organ faculty.

There are currently 19 organs for student and faculty use on the campus. These include an Aeolian-Skinner, 1935, completely refinished tonally in 1983 by Mark Brombaugh and Kenneth Wolfe; a Casavant, 1968; a Fisk, 1977; and others by von Beckerath, Casavant, Flentrop, Hildebrandt, Holtkamp, Möller, Noack, Ott, Phelps, and Schantz.

Organ Major: Undergraduate

Undergraduate Organ Performance majors are required to play six times each semester in performance class as outlined in the Organ Department Handbook. A half recital in the junior year and a full recital in the senior year, each partially memorized, are required. Juries are required at the end of each semester unless a recital is successfully completed during the semester.

Organ Primary: Undergraduate

Organ primary students majoring in Sacred Music, Music Education, or Theory/Composition are expected to play five times each semester in performance class as outlined in the Organ Department Handbook. Seniors must present a half or full recital, as determined by the instructor and with the approval of the department chair. Juries are required at the end of each semester unless a recital is successfully completed during the semester.

Organ Major: Graduate

Graduate Organ Performance majors are required to play six times each semester in performance class as outlined in the Organ Department Handbook. Semester juries are required unless a recital is successfully performed during the semester. The degree program is culminated by one fully memorized or two non-memorized recitals. The entrance audition may be waived for current Westminster seniors and, in some cases as determined by the department chair, for recent Westminster graduates. Students must take OR 433 and OR 434 (carrying no graduate credit) or pass an exemption examination.

Organ Primary: Graduate

Graduate students majoring in Sacred Music or Music Education may study organ as a primary instrument to satisfy degree requirements.

Graduate organ primary students are required to play five times each semester in performance class as outlined in the Organ Department Handbook. Semester juries and a half recital are required.

The entrance audition may be waived as described for Organ Performance major applicants. Students must take OR 433 and OR 434 (carrying no graduate credit) or pass an exemption examination.

Organ as an Elective

Undergraduate and graduate students who qualify by audition may study organ as an elective if it is not otherwise a specific requirement. An extra tuition fee is assessed for such study. Elective lessons are provided on a space-available basis to qualified Princeton and Lawrenceville students.

Organ Performance Class

Attendance and participation at weekly studio and performance classes is required for all organ primary students. All Westminster students are invited to attend.

Harpischord Study

Under the auspices of the Organ Department, private harpsichord instruction is available for elective credit at an extra tuition fee. The college owns two harpsichords: a one-manual Dupree and a two-manual Dowd.

Faculty

Matthew Lewis • Adjunct Assistant Professor, Organ, 2005. B.S., B.M., Philadelphia Biblical University; M.M., D.M.A., Juilliard School.

Alan Morrison • Adjunct Associate Professor, Organ, 2006. B.M., M.M., Curtis Institute of Music.

Kathleen Scheide • Adjunct Assistant Professor, Harpsichord, 2006. B.M., M.M., New England Conservatory, D.M.A., University of Southern California.

Piano

General Remarks

Piano at Westminster Choir College has multiple dimensions at both the undergraduate and graduate levels. It fosters the development of students who perform on a high level as soloists, as artist-teachers and as collaborators with other performing artists. A strong foundation of technique and knowledge of piano literature and style are essential to all of these aspects of pianism. The department also provides instruction for undergraduate students who need keyboard skills in order to function effectively throughout their professional careers.

Piano Major: Undergraduate

Undergraduate Piano majors are encouraged to play at least twice in performance classes each semester. Semester juries, a recital in either the sophomore or junior year and a senior recital are required.

Piano Primary: Undergraduate

Piano primary students majoring in Sacred Music, Bachelor of Arts in Music, Music Education or Theory/Composition are expected to play once each semester in performance class. Seniors give a full or half recital, as determined by the instructor and the department following the jury examination at the end of the junior year. Freshmen have required juries at the end of each semester; sophomores and juniors, at the end of each year.

Piano Major: Graduate

Students majoring in Piano receive private lessons and play in weekly studio and are expected to play at least twice in performance classes. The program culminates with a full recital. Semester juries are required.

Piano Pedagogy and Performance Major: Graduate

Students majoring in Piano Pedagogy and Performance receive private lessons, study major teaching methodologies, and undertake observation and practice teaching. The program includes a two-semester teaching internship and culminates in a full recital or in a combination lecture/performance recital. Students are encouraged to play at least twice in performance class each semester. Semester juries are required. A weekly Pedagogy Lab is required for two semesters, but recommended for all four semesters.

Piano Accompanying and Coaching Major: Graduate

Majors in Piano Accompanying and Coaching receive private lessons in vocal accompanying repertoire and are assigned to collaborative roles in working with undergraduate and graduate voice primary students. Two degree-specific recitals as an accompanist are required.

Piano Primary: Graduate

Graduate piano primary students majoring in Sacred Music or Music Education receive private lessons and are required to present a half recital. Students are expected to play at least twice in performance class each semester. Annual juries are required.

Piano Secondary: Undergraduate

All undergraduate voice primary students must enroll for piano secondary study until the capstone course (PI 204, PI 205, PI 207, or PI 208) is passed. Instruction is in the form of piano classes. Incoming undergraduates take a placement test and may be required to take and pass PI 045PI 045 before beginning the sequence of Piano Secondary courses. The sequence consists of four courses: PI 103, PI 104, PI 203 and the capstone course, each of which must be passed with a grade of B- or higher.

For any student with a double major that includes the Bachelor of Music in Music Education or the Bachelor of Music in Music Education/Master of Arts in Teaching degree program, that student must take the PI 204PI 204, Music capstone course. For any other student with a double major, not including the B.M. in Music Education or the B.M. in Music Education/M.A.T. degree program, the capstone course required for that student will be determined by the piano secondary faculty and coordinator of Piano Secondary in consultation with the Associate Dean.

Instruction entails study and performance of piano literature from the Baroque through the 21st Century as well as development of proficiency in areas of functional keyboard skills. If the capstone is passed in fewer than four semesters, further study is not required.

Piano as an Elective

Students may elect private instruction in piano for credit. There are no audition requirements, but an extra fee is charged. Elective lessons are provided on a space-available basis to qualified Princeton and Lawrenceville campus students.

Piano Pedagogy Lab

PI 611 is a required graduate Piano Pedagogy course for the purpose of problem-solving related to piano teaching. The class format includes discussion of observations, supervised and independent teaching, questions relating to repertoire, materials, and technique, comparative philosophies and psychologies and their applications, group and private teaching, business issues (e.g. studio policies), professional organizations and publications, use of technology, career planning, recital and audition planning. Preparation for graduate oral examination is included. The weekly lab is required for two semesters, but recommended for all four semesters.

Piano Performance Class

This is a weekly recital and lecture hour during which programs are given by students and guest performers. Attendance and participation at weekly studio and performance classes is required for all undergraduate and graduate piano major and primary students. All Westminster students are invited to attend.

Faculty

Dalton Baldwin • Adjunct Professor, Piano, 1984. B.A., Oberlin Conservatory.

Ena Bronstein Barton • Adjunct Associate Professor, Piano, 1983. Artist Diploma, Escuela Moderna de Musica and Conservatorio Nacional de Musica, Santiago, Chile.

Ingrid Clarfield • Professor, Piano, 1982. B.M., Oberlin College; M.M., Eastman School of Music, University of Rochester

Miriam Eley • Adjunct Assistant Professor, Piano, 1995. B.M., Baylor University; M.M. Indiana University.

James Goldsworthy • Professor, Piano, 1996. B.M., M.M., Southern Methodist University; D.M.A., Stanford University.

Phyllis Lehrer • Professor, Piano, 1975. A.B., University of Rochester; M.S., Juilliard School.

Thomas Parente • Associate Professor, Piano, 1993. B.A., Jersey City State College; B.M., Manhattan School of Music; M.A., Rutgers University; Dalcroze Eurhythmics License, Longy School of Music; Ed.D., Teachers College, Columbia University.

J.J. Penna • Associate Professor, Piano, 1996. B.M., Binghamton University; D.M.A., University of Michigan.

Agnes Poltorak • Adjunct Assistant Professor, Piano, 2000. B.M., University of British Columbia, Canada; M.M., Westminster Choir College of Rider University.

Paul Sheftel • Adjunct Professor, Piano, 2010. B.M., M.M., Juilliard School.

Betty Handelman Stoloff • Adjunct Associate Professor, Piano, 1978. B.M.A., University of Michigan; M.A., Columbia University.

Sacred Music

General Remarks

The Sacred Music Department offers education of the highest quality and broadest scope to Sacred Music majors who aspire to be leaders of the future.

The department is inter-denominational and seeks to explore the excellence of various traditions of sacred music. The faculty have wide experience and expertise in such traditions as Anglican, Lutheran, Methodist, Presbyterian, Reformed, Roman Catholic, the Synagogue and Temple tradition, and others.

The curricula at both undergraduate and graduate levels aim, on the one hand, to explore how familiar tradition can be blended with unfamiliar contemporary creativity in choral, congregational, and instrumental music for worship and, on the other hand, to provide a balanced study of theoretical matters and practical concerns. Technique, repertoire, and performance practice are therefore considered with theology, Biblical and post-Biblical religious history, and the development and practice of liturgy and worship.

Underlying all the offerings of the department is the understanding that sacred music is neither an optional extra nor merely a spiritual entertainment within the service of the church. It is rather an essential part of the liturgy and worship and therefore must have integrity and quality appropriate for its twin functions of carrying the Word of God to us, and our words of praise to God.

Undergirding the sacred music program are the offerings of the other Westminster academic and performance departments, the specialized collections containing sacred music materials in Talbott Library, and the vast network of affiliate churches in the greater New York-Philadelphia metropolitan area in which Westminster students are enabled to gain personal experience of a wide range of sacred music practice.

Sacred Music Lab

All full-time undergraduate Sacred Music majors are expected to enroll in and meet the requirements for SM 511 Sacred Music Lab to a total of eight semesters. All full-time graduate Sacred Music majors are expected to enroll in and meet the requirements for SM 511 Sacred Music Lab to a total of two semesters. Grading is "P" (satisfactory) or "U" (unsatisfactory).

Handbell Program

The Westminster handbell program was instituted in 1979 to fill the need to train church musicians in the art of handbell ringing. It became the first curriculum of handbell ringing in an institution of higher learning. Concert Handbell Choir I, open to students by audition, goes on tour annually, has appeared on national television, and has five recordings to its credit.

Jubilee Singers

The Westminster Jubilee Singers is an auditioned ensemble dedicated to the performance of repertoire from the rich body of sacred music from the African-American tradition. Jubilee Singers performs regularly on- and off-campus.

Sacred Music Internship

All undergraduate Sacred Music majors are placed in local churches during the junior year as part of the requirement for church field education. The placement decision is made at the end of the sophomore year to permit planning over the summer before employment begins in the fall. Church field education gives the opportunity for students to exercise their skills in a church setting under faculty supervision and guidance.

Sacred Music Major: Undergraduate

The undergraduate sacred music program is designed for students who are preparing for professional careers in church music. The curriculum provides courses in theological, liturgical, sociological, and practical dimensions of music ministry and requires at least one year of supervised field education in an affiliate church.

Sacred Music Major: Graduate

The graduate sacred music program provides advanced training for church musicians from a wide variety of educational, professional, and denominational backgrounds. It is expected that applicants for this program will bring a thorough grounding of musical knowledge and significant experience in full- or part-time music ministry. The curriculum includes general as well as specialized courses in sacred music studies, theology, history, musicology, and applied skills.

Special Performance Option for Graduate Students

Graduate applicants who have outstanding promise in sacred music as conductors but who have limited backgrounds in voice, organ or piano may apply for special consideration as performers in an instrumental field not normally part of the graduate sacred music program. A candidate should have an undergraduate major or emphasis or the equivalent on the instrument. A recommendation from the undergraduate applied music instructor is required. The candidate will audition for a committee composed of an associate dean, the faculty chair, and an appropriate member of the Westminster Conservatory faculty.

An admitted student will choose an instrumental teacher with whom to study, subject to the approval of the auditioning committee. The student is required to complete satisfactorily the equivalent of two semesters of study (at least 12 hours of lessons per semester) and to present a 30-minute recital under the instrumental teacher's supervision. All fees and expenses for this study are separate from those charged by the college and are the responsibility of the student. The requirement of three semesters of voice, organ or piano study, with satisfactory completion of an appropriate jury, remains for a student admitted under this option, but audition and recital requirements in these areas are waived.

Princeton Theological Seminary

A reciprocal arrangement with Princeton Theological Seminary allows Westminster graduate students to take certain courses offered by the Seminary. Enrollment in such courses is arranged after consultation with Sacred Music faculty. Speer Library at the Seminary, housing one of the nation's most important theological collections, is another invaluable resource for Westminster students.

Faculty

Steve Pilkington • Associate Professor, Sacred Music, and Director of Chapel, 1992. B.A., St. Olaf College; M.M., University of Illinois; Ph.D., Drew University.

Kathleen Ebling Shaw • Adjunct Instructor, Sacred Music, 1991. B.M., Westminster Choir College.

Tom T. Shelton, Jr. • Associate Professor, Sacred Music, 2012. B.M., M.M., University of North Carolina at Greensboro.

Voice

General Remarks

Since its founding, Westminster Choir College has made a unique contribution to the world of music because of its emphasis upon vocal training. All undergraduates are required to study voice in order to become well grounded in the fundamentals of singing. Many graduate students also study voice as a major, primary, or elective.

The Voice Department seeks to develop the musician by establishing a sound vocal technique and a thorough understanding of the singing

voice, its literature, and pedagogy. These tools are essential for the study and performance of vocal and choral literature and for training students as solo performers, professional teachers, or choral conductors. Every undergraduate must satisfy departmental requirements for graduation. Juries and other tests are conducted periodically for the purpose of evaluating progress; details may be obtained from the Voice Department.

Voice Primary: Undergraduate

Voice primary students majoring in Sacred Music, Music Education, Theory/Composition, Music Theater, or the Bachelor of Arts in Music receive instruction which includes private lessons, diction, vocal pedagogy, voice literature and recitals. Weekly studio and performance classes offer regular performing opportunities.

Voice Major: Undergraduate

Instruction for Voice Performance majors entails private lessons, coaching, recitals, diction, voice literature, opera, and vocal pedagogy. Weekly studio and performance classes offer regular performing opportunities.

Voice Performance Repertoire List

(This requirement is effective as of the Fall 2010 semester for all students who entered or were readmitted into the Bachelor of Music, Voice Performance major for Fall 2008 or later.)

Students will document and present a Voice Performance Repertoire List demonstrating that they have satisfied the repertoire requirements stated in the Voice Handbook. The completed Voice Performance Repertoire List, signed by the voice teacher, must be submitted to the Academic Coordinator, along with documentation of the senior recital. Failure to complete the requirements of the Voice Performance Repertoire List will result in failure to graduate.

Secondary Voice: Undergraduate

Organ and piano primary students are required to study voice as a secondary applied field until they pass the Voice Proficiency Test. The test may be passed at the end of any semester, but those who do not pass it after four semesters of instruction are required to continue study until the test is passed. If the test is passed in fewer than four semesters, further voice secondary study is not required. Instruction includes class and private lessons as well as optional diction and vocal pedagogy courses. Qualified students may sing in performance classes at the discretion of their teachers or may request departmental approval to present voice recitals.

Voice Pedagogy and Performance Major: Graduate

This program has two emphases or tracks. The pedagogy emphasis entails private lessons, voice literature, opera, vocal pedagogy, supervised student teaching and a full recital. The performance emphasis entails private lessons, voice literature, opera, vocal coaching, vocal pedagogy, and a full recital supported by carefully researched program notes. For students whose undergraduate work has not included a public recital, presentation of a 30-minute recital is required before work on the graduate recital may begin. Weekly coaching classes as well as studio and performance classes offer frequent performance opportunities.

Voice Primary: Graduate

Graduate students majoring in Sacred Music or Music Education may study voice as a primary instrument. The program culminates in a graduate recital of 30 to 50 minutes of singing. Weekly studio and performance classes offer frequent performance opportunities.

Voice as an Elective

Undergraduate and graduate students may elect to study voice for credit toward their degrees if it is not otherwise a specific requirement. Instruction is in the form of private lessons and an extra tuition fee is assessed. There are no specific entrance or jury requirements. Elective lessons are provided on a space-available basis to qualified Princeton and Lawrenceville students.

Voice Performance Class

Attendance and participation at weekly studio and performance classes is required for all voice primary students. All Westminster students are invited to attend. The class functions primarily to provide performance opportunities, to acquaint students with a wide variety of vocal literature, and to equip them to teach voice to others.

Master of Voice Pedagogy (M.V.P.)

The Master of Voice Pedagogy program is designed for summer study. It includes courses in vocal pedagogy and literature, music core courses, and choral ensemble participation. The program culminates in a vocal pedagogy project completed under the guidance of a Westminster voice faculty member.

Presser Voice Laboratory

The Presser Voice Laboratory at Westminster is a state-of-the-art lab for voice analysis and research. It is used as a tool for students and their teachers to work interactively with visual and acoustical feedback, and for them to engage in individual research interests. Open Lab Days encourage everyone at Westminster to explore the lab's technology, and classes routinely work on lab assignments there to gain knowledge and experience in voice science.

Laboratory equipment includes KayPENTAX's Computerized Speech Laboratory (CSL), the Phonatory Aerodynamic System (PAS) for airflow analysis, VoceVista software and electroglottograph, and professional-quality microphones, recorders, and sound level meters. Various models and teaching aids are also housed in the lab, and the Talbott Library collaborates with the Presser Lab to provide access to books, journals, recordings, and Visible body software.

Faculty

Margaret Cusack (chair) • Professor, Voice, and Chair of Voice and Piano Faculties, 1994. B.M., M.M.T., Oberlin College.

Christopher Arneson • Professor, Voice, 2003. B.A., M.M., Binghamton University; D.M.A., Rutgers University.

Susan S. Ashbaker • Adjunct Professor, Voice, 2006. B.M., M.M., Southern Illinois University; M.M., University of Illinois.

Lauren Athey-Janka • Adjunct Assistant Professor, Voice, 2016. B.M., Boston University, M.M., Westminster Choir College of Rider University.

Dalton Baldwin • Adjunct Professor, Piano, 1984. B.A., Oberlin Conservatory.

Tracy Chebra • Adjunct Instructor, Voice, 1995. B.M., M.M., University of North Carolina, Greensboro.

Elem Eley • Professor, Voice, 1987. B.M., Baylor University; M.M., Southwestern Baptist Theological Seminary.

Rochelle Ellis • Adjunct Assistant Professor, Voice, 1995. B.M.E., University of Missouri, Kansas City; M.M.E., Westminster Choir College of Rider University.

Faith Esham • Adjunct Assistant Professor, Voice, 2000. B.A., Columbia Union College; B.M., M.M., The Juilliard School.

Harold Evans • Adjunct Assistant Professor, Voice, 2007. B.S., West Chester State College; M.M., Indiana University.

Thomas Faracco • Associate Professor, Voice. 1983. B.M., M.M., Westminster Choir College.

Theodora Hanslowe • Adjunct Assistant Professor, Voice, 2016. B.M., M.V.P., Westminster Choir College of Rider University.

William Hobbs • Assistant Professor, Voice/Opera, 2011. B.M., University of Colorado; M.M., Eastman School of Music.

Nancy Froysland Hoerl • Adjunct Assistant Professor, Voice, 1995. B.A., Moorhead State University; M.M., Westminster Choir College of Rider University.

Katherine Johnson • Adjunct Assistant Professor, Voice, 2006. B.M., University of Calgary; M.M., Manhattan School of Music.

Rachelle Jonck • Adjunct Associate Professor, Voice, 2007. B.M., University of Stellenbosch (South Africa)

Robin Massie • Adjunct Assistant Professor, Voice, 2008. B.M., Westminster Choir College; M.M., Yale University.

Sean McCarther • Assistant Professor, Voice, 2012. B.M., Baylor University; M.M., D.M., Indiana University.

Mark Moliterno • Adjunct Associate Professor, Voice, 2005. B.M., M.M., Oberlin College Conservatory of Music.

Carolann Page • Adjunct Assistant Professor, Voice, 2008. B.M., Curtis Institute of Music.

J.J. Penna • Associate Professor, Piano, 1996. B.M., Binghamton University; D.M.A., University of Michigan.

Kathy Kessler Price • Assistant Professor, Voice, 2012. B.A., University of Richmond; M.M., University of Maryland; Ph.D., University of Kansas, Lawrence.

Laura Brooks Rice • Professor, Voice, 1985. B.M., Georgia Southern College; M.M., Indiana University.

Eric Rieger • Assistant Professor, Voice, 2012. B.M., Eastman School of Music; M.M., Royal Scottish Academy of Music and Drama

Debra Scurto-Davis • Adjunct Assistant Professor, Voice, 2004. B.M.E., Evangel College; M.M., Baylor University; S.M., University of Michigan.

Elizabeth Sutton • Adjunct Assistant Professor, Voice, 2005. B.A., Bowling Green State University; M.M., College-Conservatory of Music, University of Cincinnati.

Sharon Sweet • Professor, Voice, 1999. B.S., Roberts Wesleyan College; M.M., Ithaca College.

Nova Thomas • Associate Professor, Voice, 2004. B.M., University of North Carolina, Chapel Hill; M.M., Indiana University.

Charles J. Walker • Adjunct Instructor, Voice, 1995. B.M., University of Delaware.

Sally Wolf • Adjunct Assistant Professor, Voice, 2001. B.M., Kent State University; Artist Diploma, Curtis Institute of Music.

Amy Zorn • Adjunct Assistant Professor, Voice, 1996. B.M., University of Wisconsin, Madison; M.M., Boston University.

policies are also listed within each of the colleges/schools in the Academic Catalog.

Significance of Accepting Admission to Rider University

By the act of accepting admission to Rider University, students acknowledge and agree to the following:

1. that they will be bound by and comply with all University standards and policies, including but not limited to, those standards and policies set forth in this catalog and in the student handbook (The Source (<http://www.rider.edu/offices-services/handbooks-policies/thesource>)). **Primary and ultimate responsibility for knowing and conforming to these standards and policies and degree requirements resides with the individual student.**
2. that the ultimate authority to regulate and maintain order on the University campuses resides with the President and the Board of Trustees; and,
3. that the University retains ownership and the exclusive right to use any and all promotional, publicity, and entertainment products (including those produced as course requirements), creations, and activities engaged in by the student while at the University, including but not limited to photographs, television, audio and video recordings, motion pictures, artistic performances and presentations, internet/web-based productions and sales, and athletic events and all proceeds therefrom. The student has no right to any payment for participation therein.

Students further agree to execute any documents required to confirm or convey to the University all rights outlined in subpart (3) above.

Rider University's Right to Change Catalog Content

This Academic Catalog is not a contract nor is it an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this catalog, it must be understood that all policies and procedures (as well as courses, course descriptions, curricular and degree requirements and other academic information) described in this catalog are subject to change or elimination at any time without prior notice.

Primary and ultimate responsibility for knowing and conforming to the standards, policies and degree requirements outlined in the Academic Catalog resides with the individual student.

While every effort will be made to inform students of any changes as soon as is practical, students should consult the appropriate academic or administrative department, school, college, or other service provider for currently accurate information on any matters described in this catalog. Changes affecting degree requirements will take into account the applicability of the change to currently matriculated students.

Rider University also reserves the right to vary the policies and procedures in the Academic Catalog on a case-by-case basis, as fair and reasonable treatment of interested parties requires in the University's best judgment.

- Withdrawal from the University (p. 849)

Academic Classification

Students must carry 12 credit hours or more (or their equivalent) in a fall or spring semester to be considered a full-time student. Normal progress toward a degree and academic classification consists of the following credit advancement:

- **Freshman:** 0 – 23 hours
- **Sophomore:** 24 – 53 hours
- **Junior:** 54 – 89 hours
- **Senior:** 90 or more hours

On the Lawrenceville campus, a minimum of 120 hours and on the Princeton campus, a minimum of 124 hours are necessary for baccalaureate degree completion. On both campuses, some degrees require more. College of Continuing Studies students require 60 credits for associate degree completion.

Students receiving financial aid from any source need to be particularly concerned with their full-time status and making normal progress toward a degree.

In **Westminster College of the Arts**, special (non-degree) students are not enrolled in a program that will lead to a degree, although they may have previously completed a degree in the college. They may enroll in courses at or below the 500-level at the discretion of appropriate academic personnel. Those holding baccalaureate degrees who wish to take courses at the 600 or 700-level may be asked to qualify by means of completing the graduate application process or by satisfying other criteria.

Academic Concern, Conditional Standing/Dismissal and Readmission

- Academic Concern
- Conditional Academic Standing (p.)
- Academic Dismissal from the University (p.)
- Dismissal from a Major within Westminster College of the Arts (p.)
- Undergraduate Education Minimum Standards (p.)
- Readmission after Academic Dismissal (p. 835)

All students permitted to enroll at Rider University are in good standing and are qualified to be bona fide students. Decisions regarding academic progress, conditional standing, and dismissal for poor scholarship are the responsibility of the Committee on Academic Standing within each college or school. These committees may establish and apply criteria in addition to the minimum university cumulative grade point average (GPA). Using approved academic criteria, the Committee on Academic Standing within each college or school may review the academic record of any student.

Because a minimum 2.0 cumulative grade point average (GPA) is required for graduation, students are expected to maintain a minimum 2.0

cumulative GPA while enrolled at Rider. Students who fail to maintain at least a 2.0 cumulative GPA will be reviewed by the appropriate Committee on Academic Standing and may receive a letter of academic concern, be placed on conditional standing, or be dismissed from the University.

Students who maintain a minimum 2.0 cumulative GPA but who are dismissed from a specific college or school for other reasons are eligible to apply to another college or school of Rider University.

Undergraduate education students are required to maintain a minimum 3.0 cumulative GPA in all courses taken at Rider University and must receive a grade of 'C+' or higher in all education courses. It is the individual student's responsibility to re-take any education course in which a grade lower than 'C+' has been earned. Undergraduate education students will be permitted to undertake student teaching only if they have received 'C+' or higher in all education courses and have a minimum 3.0 cumulative GPA. See the Undergraduate Education section below for further information.

Undergraduate music education students are required to maintain a minimum 3.0 cumulative GPA in all courses taken at Rider University and must pass the sophomore portfolio to remain in good standing in the major. See the Undergraduate Education section below for further information.

Academic Concern

Upon review of a student's academic record, a Committee on Academic Standing may issue a letter of concern, which responds to academic progress that does not meet college, school or university expectations, and describes an academic plan of study that must be met in the subsequent semester. Students who fail to pursue a course of study prescribed by an academic standing committee, who do unsatisfactory work in the prescribed course of study, or who fail to meet other academic standards may be placed on Conditional Academic Standing or dismissed.

Conditional Academic Standing

Upon review of a student's academic record, a Committee on Academic Standing may place a student on Conditional Academic Standing. In reaching this decision, the committee may require a student who does unsatisfactory work to pursue a specific course of study during a particular academic session. Students who fail to pursue a course of study prescribed by an academic standing committee, who do unsatisfactory work in the prescribed course of study, or who fail to meet other academic standards may be continued on Conditional Academic Standing or may be dismissed without further right of appeal. There must be substantial evidence of proper motivation and a capacity for doing college level work to warrant maintaining a student in school with a record of continued conditional status as opposed to dismissal.

Students on conditional academic standing may not register for an academic overload. Additionally, students must be removed from conditional status in order to be approved for graduation.

Academic Dismissal from the University

Students who have not done satisfactory work may be dismissed from the University for poor scholarship at the end of any semester after an appropriate review of their scholastic records by the Committee on Academic Standing within their college or school. Students may also be subject to academic dismissal if their cumulative GPA falls below the required minimum for two or more consecutive semesters, or the GPA falls below the required averages established at the freshman,

sophomore, junior and senior levels. Academic dismissal at the end of the fall semester is effective prior to the beginning of the spring semester.

Academic dismissal at the end of the spring semester is effective prior to the beginning of summer session II.

Students who wish to appeal a dismissal must submit a written statement of appeal to the academic dean of their college or school within 10 days from the date on their letter of dismissal. All appeals submitted by the deadline will receive consideration by the appropriate academic standing committee.

Dismissal for academic reasons terminates a student's relationship with Rider. Dismissed students may not enroll for courses nor participate in university-sponsored activities or ensembles at either campus for a period of one year following their dismissal. Students dismissed for academic reasons normally will not be eligible for readmission within one calendar year of the dismissal date. Although some students will apply for readmission, there is no real or implied right to such readmission.

Students dismissed by the School of Fine and Performing Arts (SFPA) or Westminster Choir College (WCC) but not Rider University may apply for enrollment in other colleges of the University. Students dismissed by WCC but not Rider University may not enroll in WCC courses, ensembles or activities until they have been readmitted to WCC with the exception of courses, ensembles or activities that are delivered by or at WCC and are required in music degrees housed within the School of Fine and Performing Arts (SFPA). Students dismissed by SFPA but not Rider University may not enroll in SFPA courses, ensembles or activities until they have been readmitted to SFPA.

Dismissal from a Major within Westminster College of the Arts

Academic departments within Westminster College of the Arts reserve the right to dismiss a student from a major following notification that their standing in the major is in jeopardy and the passage of a suitable amount of time permitted to address stated issues, typically one semester. Such dismissal may be based upon any of the following conditions: failure to maintain a satisfactory or minimum GPA; failure to sustain academic progress in the courses of the major; conduct in violation of the standards of the department or profession; failure to meet conditions or requirements as stated in university catalogs, The Source, or the departmental handbook; or the student's general standing at Rider University. Such dismissal will become effective at the end of the semester in which the decision is reached. Students dismissed from Music Education are not permitted to enroll in Music Education courses until readmitted into the Music Education major.

Undergraduate Education Minimum Standards

Undergraduate education students are required to have a minimum 3.0 cumulative GPA by the time they register for student teaching and must receive a grade of 'C+' or higher in any Education course (a) that is specifically required for a major or minor in Education and (b) in which enrollment is limited to Education majors. It is the individual student's responsibility to re-take any required education course in which a grade lower than 'C+' has been earned. Undergraduate education students will be permitted to undertake student teaching only if they have received 'C+' or higher in all required education courses and have a minimum 3.0 cumulative GPA. See the Undergraduate Education section below for further information.

The undergraduate education department also reviews the professional development of all students to ensure that they meet departmental

standards for professional conduct and that they show promise of success in teaching. This review is in addition to the grade requirements listed above. Student must earn a passing score on all sections (reading, writing, math) of the Core Academic Skills for Educators Test before registering for any methods courses. This is a NJ Department of Education rule that applies to all elementary, secondary and business education students.

Undergraduate music education majors are required to maintain a minimum 3.0 cumulative GPA in all courses taken at Rider University, must pass the sophomore portfolio to remain in good standing in the major, and must earn a passing score on all sections (reading, writing, math) of the Core Academic Skills for Educators Test.

All undergraduate education and music education students must present evidence of a passing score on the Praxis Subject Assessments test (formerly Praxis II) in their specialization area one month prior to the beginning of the student teaching semester (by March 1 for those applying for student teaching in the fall semester and July 1 for those students applying for student teaching in the spring). This is the same Praxis Subject Assessments (formerly Praxis II) test score students will need for certification.

As appropriate, students who fail to meet the undergraduate education department's standards will be counseled on ways to improve their performance or will be asked to leave the program.

Readmission after Academic Dismissal

Dismissed students seeking readmission must first contact the Dean of Students Office, Bart Luedeke Center, on the Lawrenceville campus or the Associate Dean of Students Office, Scheide Student Center, on the Princeton campus to obtain appropriate forms. Once the Dean of Students or his/her designee approves the readmission application, the application is forwarded to the dean of the college to which the student seeks reentry. Students dismissed for academic reasons must submit with their readmission application a personal letter to the Academic Standing Committee which will make decisions concerning their readmission. They should also provide evidence, usually in the form of a transcript from another institution, of formal study and/or accomplishment. If possible, such work should have been done in specific areas of deficiency in the student's academic record.

Academically dismissed students must meet all academic requirements in place at the time of their readmission. Readmission will be dependent upon various criteria including GPA, current academic progress, and the student's general standing. Students in the Westminster College of the Arts may be required to reapply or re-audition.

If readmission is granted, the student is placed on conditional academic standing until the cumulative GPA reaches a satisfactory level of at least 2.0. A readmitted student is responsible for curriculum requirements in effect at the time of readmission.

Students should refer to The Source at www.rider.edu/thesource (<http://www.rider.edu/thesource>) for information regarding readmission following a voluntary or judicial dismissal.

Academic Load/Overload

Students who exceed the normal load are required to pay an overload per credit fee for each credit over 18, except in the case of non-billable hours.

Students on Conditional Academic Standing may not register for an academic overload.

Students may enroll for a maximum of 14 credits during Summer I and II combined with no more than 7 credits in any combination of I sessions or II sessions. These maximums may be exceeded only with the permission of the student's academic dean.

Students should understand that for every hour spent in class, they are expected to spend two to three hours studying outside of class time, and should therefore plan their academic load accordingly. Study time may vary based on the student's background knowledge and class difficulty.

Lawrenceville Students

The normal maximum academic load for Lawrenceville students shall not exceed 17 semester credit hours per semester. The normal maximum academic load for Princeton students shall not exceed 18 semester credit hours per semester. Permission to exceed these loads must be obtained from the student's academic dean's office.

Lawrenceville students may exceed the normal maximum academic load after passing 45 semester credit hours and attaining a cumulative grade point average of 3.0 or higher.

Princeton Students

Princeton students may exceed the normal maximum academic load after passing 24 semester credit hours and attaining a cumulative grade point average of 3.0 or higher.

Academic Programs

The Academic Programs A to Z Chart (<http://catalog.rider.edu/undergraduate/majors-minors-certificates>) lists Rider University's majors, minors and certificates alphabetically, along with the college or school (<http://catalog.rider.edu/undergraduate/majors-minors-certificates/#programsbycollegetext>) that grants each degree, major, minor and certificate. The following definitions explain the difference between majors, minors, tracks, concentrations, and emphases:

Program	Definition
Major	An organized group of courses ranging from introductory through advanced levels. Typically most if not all courses are in a single primary area of study, although some majors include study in multiple disciplines. Undergraduate majors require between 18 and 90 credits, depending upon the liberal arts or professional focus. Graduate majors require between 30 and 45 credits. Entrance into some majors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the major is listed on the official transcript.
Minor	An organized group of courses, typically involving introductory through intermediate levels. While most minors are in a single discipline, Rider University offers several interdisciplinary minors, such as Law and Justice, and Sustainability Studies. Minors are offered at only the undergraduate level, and require between 15-24 credits. Some departments have restrictions on the connection between major and minor options. Entrance into some minors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the minor is listed on the official transcript.

Track A choice of specialty within a degree, tracks comprise an organized group of courses serving a particular focus within a major. In undergraduate and graduate majors that represent multiple disciplines, tracks indicate a particular disciplinary focus. In a single discipline major with tracks, each track represents a singular focus, often representing a liberal arts or professional path. In some cases, a track represents a sub-specialization within the major field. Entrance into some tracks, particularly those that represent a particular disciplinary focus, may require prerequisites, portfolios, auditions, or other forms of assessment. Tracks require between 21 and 52 credits. Upon completion of all requirements, the track is listed on the official transcript along with the major field of study.

Concentration Concentrations, such as English Literature or English Writing, represent a specialty or focus within an undergraduate or graduate major field of study. Typically, a concentration unites courses around content or a particular theme. Concentration requirements are a portion of a major, not the entire major itself. In some cases, concentrations refer to an interdisciplinary combination. Entrance into some concentrations may require prerequisites, portfolios, auditions, or other forms of assessment. Undergraduate concentrations require between 15 and 36 credits; graduate concentrations range from 9 to 18 credits. Upon completion of all requirements, the concentration is listed on the official transcript along with the major field of study.

Emphasis Typically an organized group of courses in a single discipline, the emphasis represents a subset of credits within an undergraduate or graduate major. The emphasis provides a coherent focus of study within a discipline, which may or not be in the major field. Typically an emphasis represents less than a third of the total major credits, mostly ranging from 15 to 19 credits. Entrance into some areas of emphasis may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the emphasis is listed on the official transcript along with the major field of study.

Academic Records

Academic records are maintained by the Registrar and the dean's office of each college or school for a minimum of 10 years from the date of last attendance. Records may be kept longer at the sole discretion of the University. All other official records of Rider University pertaining to students are kept in files maintained by the Dean of Students Office. Further information regarding these records can be found in *The Source* (<http://www.rider.edu/offices-services/handbooks-policies/thesource>).

Access to student academic and other records may be accorded to Rider personnel with a legitimate educational interest in the records. Information may be released to other agencies and individuals according to these policies in compliance with the Family Educational Rights and Privacy Act (FERPA) of 1974 (as amended):

- Rider may release the following information without written permission from the student: fact of enrollment, dates of enrollment, degree candidacy, degree awarded, and major field.
- Rider may release the following information unless the student has requested in writing by the end of the second week of classes

each semester that the information not be released: name, email, home and local address, and home and local telephone number, participation on athletic teams and organizations, dates of attendance and honors and awards received.

No other information concerning a student will be released without that student's written permission.

Students having a complaint or question regarding FERPA may write to: Family Education Rights and Privacy Act Office, US Department of Education, Room 4512, Switzer Building, Washington, DC 20202.

Students may request to view their academic record by making an appointment with the appropriate dean's office.

Accompanying Costs for Voice Students

Any student studying individual voice at Rider University should expect in most cases to hire an accompanist. Students may choose to hire a college-approved accompanist. The per-semester fee is not refundable in any part if a student discontinues voice study or decides to seek out another accompanist. For additional information, see Tuition and Fees on Rider's website (<http://www.rider.edu/offices-services/financial-aid/tuition-fees/undergraduate-tuition-fees>).

Advanced Placement (AP) Credit

Students who have taken an AP exam may submit official scores to obtain credit. For a complete listing of courses and credits and other information, see AP Credits on Rider's website (<http://www.rider.edu/admissions/undergraduate-admission/how-apply/first-year-college-students/ap-credits>).

Applied Music - Westminster College of the Arts

Individual applied music lessons for academic credit are available to all Rider University students with prior experience, regardless of major. Lessons are available in brass, composition, conducting, guitar/bass, harpsichord, organ, percussion, piano, strings, woodwinds, and voice. For all students whose major or minor program does not require applied music lessons, and for those students who have completed the applied music requirements for their degree program, fees for this elective (non-required) study will apply. Elective lessons are provided on a space-available basis. All part-time students are charged an applied music fee.

Students may earn 1 or 2 credits per semester, with the exception of graduate applied composition courses, which carry 3 credits per semester. Each fall, spring, or summer applied course consists of twelve private lessons, or the equivalent instructional time, and may require participation in studio classes, performance classes, and/or an end-of-semester jury or performance review. Applied lessons completed during the January term follow specific departmental requirements regarding instructional time.

All applied music students must observe departmental applied requirements listed in the catalog and in departmental handbooks.

Applied lesson fees are described on the Tuition and Fees section of Rider's website.

All applied music students must observe departmental applied requirements listed elsewhere in this catalog and in departmental handbooks. Students for whom applied music lessons are not required

may register for lessons on a space-available basis. Interested students should consult the Associate Dean.

Applied lesson fees are described on the Undergraduate Tuition and Fees (<http://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees>) section of Rider's website.

Effective as of the fall 2009 semester for all new or readmitted Rider University students on both campuses. For all students whose major or minor program does not require applied music study, or for those students who have completed applied music requirements, elective fees will apply. All part-time students are charged an applied music fee.

Registration for applied music study follows this table of suffixes. Students will register for the appropriate course number and suffix, as indicated in the curriculum pages found elsewhere in this catalog.

Full-time Students

A – One-hour, 2-credit required lesson. Included in tuition – no extra charge.

- Lawrenceville example: Musical Theatre major
- Princeton example: All undergraduate majors

B – Half-hour, 1-credit required lesson. Included in tuition – no extra charge.

- Lawrenceville example: Popular Music Culture, up to 3 semesters
- Princeton example: Theory/Composition major (half-hour voice or keyboard lesson)

C – One-hour, 2-credit elective lesson. Not included in tuition – fee charged per semester.

- Both campuses: Student who has completed all required lessons in their major. Student whose major does not require lessons.

D – Half-hour, 1-credit elective lesson. Not included in tuition – fee charged per semester.

- Both campuses: Student who has completed all required lessons in their major. Student whose major does not require lessons.

G – One-hour, 2-credit required/elective lesson. Half-hour is required and is included in tuition. The second half-hour is elective and is not included in tuition – fee charged per semester.

- Lawrenceville example: Popular Music Culture, up to 3 semesters
- Princeton example: Theory/Composition major (full-hour voice or keyboard lesson)

Part-time Students

(all students, both campuses, regardless of major or requirements)

- Suffix E – One-hour, 2-credit required or elective lesson – fee charged per semester.
- Suffix F – Half-hour, 1-credit required or elective lesson – fee charged per semester.

Change of Applied Teacher

Students wishing to change their applied teacher must apply to the chair of the appropriate department. Any change requested after the beginning of a semester will require the permission of both applied teachers and

the department chair. If either applied teacher is the department chair, permission of the Associate Dean also is required.

Change of Major or Applied Primary Area

Students wishing to change their major or the applied primary instrument must complete the appropriate form. Permission of the old and new major departments is required.

Class Attendance/Absence

It is the prerogative as well as the responsibility of each faculty member to establish a clear policy for each course of instruction in regard to the nature and extent of student participation that will be expected and required.

The effect of absences upon the student's standing in a particular class will be left to the determination of the instructor in the course. However, it is expected that faculty members will be fair and reasonable concerning validated absences due to field trips, practicum, religious observance, participation in varsity athletics, placement interviews for graduating seniors,

Westminster College of the Arts rehearsals or performances, and illnesses sufficiently serious to be certified by either the University Health Center or the student's physician. The faculty member should consult with the Dean of Students in instances where doubts arise regarding the course to follow in evaluating student absences.

It is the student's responsibility to inform instructors of the nature and extent of an actual or anticipated absence. If that is impossible, or if the absence is or will be more than three (3) consecutive class session (seven (7) calendar days), the student should contact the Office of the Dean of Students at 609-896-5101. Then the dean's office will notify the appropriate faculty member.

Class Cancellation Policy and Excused Absences for Princeton Campus Students Only

During run-outs involving Westminster ensembles, private lessons for those students not involved in the run-out continue to meet. When a college-sponsored performance necessitates that 30% or more of the students in a class be absent, the class may be cancelled at the discretion of the faculty member.

The dean will excuse individuals or groups of students who are participating in college-sponsored events. Only students registered for the class or ensemble participating in an activity will be excused from class. Students excused from class(es) under these circumstances remain responsible for all class work.

Class Cancellation – Both Campuses

In most cases, Rider will remain open and fully operational during inclement weather and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, close certain buildings or take other emergency actions.

If such circumstances should arise, a notice will be sent via the Rider Alert System, Rider's mass electronic messaging system. Students may sign up for Rider Alert (<http://www.rider.edu/rideralert>).

Cancellations will also be announced online at www.rider.edu and on the Rider University information hotline at 609-219-2000, option 1.

College Level Examination Program (CLEP)

In certain cases, Rider University accepts credits earned through the College Level Examination Program.

Lawrenceville Students

Lawrenceville students should consult with the academic dean to determine if credit may be awarded. Typically, a minimum score of 50 is required on any individual examination.

Princeton Students

Princeton students who have earned scores of at least 65 on tests prior to entering Westminster Choir College may apply these courses toward graduation. Students are limited to three credits per course unless additional credit is specifically authorized by the department. After enrolling at Westminster, students must obtain advance written approval from the department in order to earn credit through CLEP.

The following policies govern the awarding of academic credit for CLEP Examinations for Princeton students:

1. Credit will be provided for the successful completion of CLEP Subject Examinations, provided the student has not already received credit for corresponding courses;
2. A college course may not be taken for credit if the student has already received credit for the course through CLEP;
3. Continuing students must obtain approval from their academic dean prior to taking CLEP examinations;
4. Awarding of CLEP credits, like credit transferred from other colleges and universities, is subject to the approval of the student's academic dean;
5. Juniors or seniors generally may not obtain CLEP credits. Students having CLEP credits or contemplating CLEP exams should consult with their academic dean.

Students having CLEP credits or contemplating CLEP exams should consult with their academic dean.

Commencement Requirements – Westminster Choir College only

Academic year requirements at Westminster Choir College extend through the annual spring Commencement. All students enrolled in required ensembles (Chapel Choir, Schola Cantorum, Symphonic Choir) are required to participate in Commencement unless excused under extraordinary and unavoidable circumstances, such as serious illness. In particular, credit for spring semester choir participation is lost if a student does not attend and is not excused from Commencement. All other students are encouraged to participate in Commencement.

Students participating with the members of the graduating classes are required to purchase or rent appropriate academic regalia, available through the college store.

Course Credits

Rider University has a 13-week semester, followed by seven days of examinations.

Rider uses the true number of minutes per hour-long session; i.e., a one-hour meeting is actually 60 minutes. Three-credit classes meet for 60, 90, or 180 minutes, corresponding to, respectively and typically, 3, 2, or 1 meetings per week.

In the Westminster College of the Arts all performance courses receive credit:

- All ensembles receive 1 credit
- Other performance-based courses receive 1-3 credits
- A full-semester Student Teaching experience receives 12 credits.
- Westminster Choir College students enrolled in LL 037, MTH 100S, PI 045, or TH 045 receive credit toward their semester course load, but such credits do not count toward graduation.

Applied music instruction receives 1-3 credits.

Course Level Numbering

Courses numbered below 100 are taught at pre-college level and carry no credit. Courses numbered at the 100- to 400-level carry only undergraduate credit. The course number indicates the anticipated audience for a course; 100 level courses are designed for freshmen, 200 level for sophomores, etc.

On the Princeton campus:

1. Courses at the 500-level are open to undergraduate and graduate students. Undergraduate students who have earned at least 60 credits and a minimum cumulative GPA of 3.0 may enroll in a 600-level course upon permission of the instructor and the Associate Dean. Undergraduate students who have earned at least 90 credits and a minimum cumulative GPA of 3.8 may enroll in a 700-level course upon permission of the instructor, the Director of Graduate Studies and the Associate Dean.
2. Students with undergraduate status in the five-year B.M./M.A.T. program may take graduate courses required in that curriculum at the 500- or 600-level. Students in the B.M./M.A.T. program may take required 700-level courses in the senior year or upon successfully completing 124 credits and the student teaching semester. Students in the B.M./M.A.T. program who have not attained graduate status may enroll in non-required 700-level courses according to the restrictions stated in the previous paragraph.
3. Special students who have completed a baccalaureate degree may apply for permission to take 600- or 700-level courses. Undergraduate students in the Baccalaureate Honors Program (BHP) should see the Assistant Registrar regarding enrollment in graduate courses.

Course Repeats - Westminster College of the Arts

All undergraduate and graduate students who are enrolled in a major or minor offered by the Westminster College of the Arts may enroll for a second or subsequent time in any *non-repeatable* WCA course from which they have withdrawn, in which they have earned an "F," or in which they have failed to earn the required minimum grade ¹ according to the following rules:

- 1) Students who have withdrawn from, failed, or failed to achieve the required minimum grade in a required course ¹ in their first attempt at

the course may enroll for a second time without permission. All other students must have the permission of the Associate Dean.

2) Permission of the dean or associate dean of the college (FPA or WCC) offering the course in question is required in order to enroll in a course for the third time.

3) Permission of the Academic Standing Committee of the college (FPA or WCC) offering the course in question is required in order to enroll in a course for the fourth time. Permission for a fourth enrollment will be granted only in rare, extenuating, and documented circumstances.

In all instances, the most recent grade is calculated into the grade point average, and all listings and grades will remain on the transcript.

¹ Examples include: a minimum grade of "B-" is required in Piano Secondary, a minimum grade of "C" is required in foreign language study in order to progress to the next level in that language.

Courses – Adding, Dropping, Withdrawing, Repeating, Auditing

Timetables and deadlines given below pertain to fall and spring semesters. Students should consult the Registrar's web page (<http://www.rider.edu/academics/academic-support-resources/registrar>) for summer session deadlines.

Adding Courses

Students may add courses through the first week of the regular semester at their own discretion provided the course is still open for registration.

Dropping Courses

Students may drop courses through the second week of the regular semester at their own discretion. In such cases, the courses are deleted from the student's record. After the second week of the semester, a withdrawal from the course is necessary and a 'W' is recorded on the transcript.

Course Withdrawals

Students may withdraw from courses and receive a grade of 'W' during the third through seventh weeks of the semester. In the semester's eighth through eleventh weeks, students may withdraw from courses with the written consent of the course instructor and receive a grade of 'W.' Differing subject matters, instructional methodologies and course objectives make it likely that instructors will have differing criteria for giving consent to withdrawal in this period.

After the end of the eleventh week of the semester, students may withdraw from courses and receive a grade of 'W' only for validated reasons of physical or psychological incapacity. Validated reasons of physical or psychological incapacity serve as justification for a student to withdraw from courses with a grade of 'W' at any time beyond the add/drop period. Reasons must be validated by the Dean of Students and approved by the academic dean of the college in which the student is enrolled.

Students are required to notify Student Financial Services when withdrawing from courses as these circumstances may impact financial aid eligibility.

Student-athletes are required to notify the Associate Director of Athletics for Compliance and Academic Support or the Director of Athletics prior to withdrawing from courses.

Students receiving veterans benefits must report such changes to the Registrar's Office immediately.

Course withdrawal forms are available in the Registrar's and College of Continuing Studies offices.

Withdrawal policies during special sessions (summer session, J-term) observe time limits proportional to the time limits of a regular semester.

Repeating Courses

Students may request permission from the academic dean to repeat a course to earn a better grade provided that the course is one that cannot be repeated for additional credit (e.g., applied music lessons, acting courses, coaching, ensembles and productions, stagecraft, studio dance, and other related classes). The grade first earned will remain on the transcript but only the latest grade will be used in computing grade point average and determining whether or not degree requirements have been met.

Students who fail a required course must repeat the course until a passing grade is received. Students do not have to repeat a failed elective, but must pass another acceptable elective of comparable credit in order to meet graduation requirements.

Students receiving financial aid should consult with Student Financial Services before repeating a course already passed to determine the possible impact upon the student's continuing eligibility for financial aid.

Auditing Courses

Students who want to attend classes without taking examinations or receiving grades may audit courses subject to space availability and the permission of the instructor. No credit is earned for audited courses. Transcripts will record an audit with the notation of 'AU.'

Performance based courses cannot be audited (e.g., applied music lessons, acting courses, coaching, ensembles and productions, stagecraft, studio dance, and other related classes). For a complete list of performance-based classes, please see the Assistant Registrar on the Princeton campus.

The extent to which an auditor may take part in a course's activities is determined by the student and the instructor. In addition to the audit fee, students auditing a course carrying separate fees must pay all such required fees.

Lawrenceville students in the College of Continuing Studies (<http://www.rider.edu/academics/colleges-schools/college-continuing-studies>) who wish to audit courses should apply and register in the College of Continuing Studies office during the first week of class. Other Lawrenceville students should apply and register through their dean's office and the Registrar.

Princeton students who wish to audit courses should apply and register in the office of the Assistant Registrar during the first week of class.

Students who register on an audit basis may not change from audit to credit during a semester. However, students who have audited a course may take that same course for credit in a later semester at full tuition.

Students who register on an audit basis may not change from audit to credit during a semester, except during the add period. Students originally registered for credit may change to audit status during the add / drop period. Students should refer to the academic calendar (<http://www.rider.edu/academics/academic-support-services/registrar/academic-calendars>) of each term (Spring, Summer, Fall, or JTerm) for specific add and drop / add dates.

Credit by Examination

Credit for certain undergraduate courses may be earned by examination. Please see the chairperson of the department offering the course to determine if a course is available for credit by examination.

Dance Study

Effective as of the fall 2014 semester for all new or readmitted Rider University students on both campuses: All students whose major or minor program does not require applied dance study under the DAN prefix, or for those students who have completed dance requirements, elective fees will apply. All part-time students are charged a dance fee.

Registration for applied dance study follows this table of courses. Students will register for the appropriate course number, as indicated in the curriculum pages found elsewhere in this catalog. Maximum enrollment under full-time tuition:

- In **B.A.-Dance/Performance Track**, a total of 15 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School (PBS).
- In **B.A.-Dance/Dance Studies Track**, a total of 14 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School.
- In **Dance Minor**, a total of 8 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School.
- **Registration for DAN 100, 101, 300 and 301** require a placement completed with dance faculty.

Full-time Students

DAN 100-01 – 1-credit required course taken at PBS. Included in tuition – no extra charge.

Example: B.A./Dance majors and minors up to the maximum stated above.

DAN 100-EF – 1-credit elective course taken at PBS. Not included in tuition – fee charged per semester.

Examples: Student who has completed all required applied dance study in their major, student who has completed all required applied dance study in their minor, or student whose major or minor does not require lessons.

DAN 151 (Pilates and Modern) – 1-credit course taken at Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

DAN 152 (World Dance & Improvisation) – 1-credit course taken at Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

DAN 300-01 – 2-credit required course taken at PBS. Included in tuition – no extra charge. Example: B.A./Dance majors and minors up to the maximum stated above.

DAN 300-EF – 1-credit elective course taken at PBS. Not included in tuition – fee charged per semester.

Examples: Student who has completed all required applied dance study in their major, student who has completed all required applied dance study in their minor, or student whose major or minor does not require lessons.

Note: Students choosing to register for both DAN 100-EF and 300-EF as elective study in the same semester will be charged an inclusive fee.

Part-time Students

(all students, both campuses, regardless of major or requirements)

DAN 100-EP – 1-credit course taken at PBS. Not included in tuition – fee charged per semester. For majors and minors, course counts toward the maximum stated above.

DAN 300-EP – 2-credit course taken at PBS. Not included in tuition – fee charged per semester.

For majors and minors, course counts toward the maximum stated above.

Note: Part-time students choosing to register for both DAN 100-EP and 300-EP in the same semester will be charged an inclusive fee.

Dean's List

The **Dean's list** is prepared at the end of the fall and spring semesters to recognize students who have earned academic honors.

Eligibility for the Dean's list is as follows:

In the College of Business Administration, College of Liberal Arts and Sciences, College of Education and Human Services, and School of Fine and Performing Arts, a student must be enrolled full-time, have no grade lower than "C" and must achieve a minimum semester grade point average of 3.50.

In Westminster Choir College, a student must be enrolled full-time, have no grade lower than "C," have no "Z" grades, and must achieve a minimum semester grade point average of 3.70.

In the College of Continuing Studies, student must have no grade lower than "C" and must achieve a minimum grade point average based on the number of credits earned in a given semester as follows – 6 to 8 credits: 3.75 GPA; 9 to 11 credits: 3.60 GPA; 12 or more credits: 3.50 GPA.

Degree Completion

Students who have not completed all requirements within 10 years of initial enrollment may be required to repeat courses and/or meet further requirements. Students for whom more than one year has elapsed since the date of last enrollment may be required to re-apply and/or re-audition for the program, and must meet all requirements in place at the time of their readmission.

Credits earned at another institution or through Westminster Continuing Education outside the 10 year period that commenced with initial enrollment in a degree program must be approved for transfer into that program by the department offering the degree.

Diploma Conferral

Diplomas are conferred three times each year: May, August, and December.

Students must submit a degree application form, available online via MyRider (<http://myrider.rider.edu>) or in their academic dean's office, in order to be eligible to receive a diploma on any date. Students must apply for graduation by the deadlines established each year by the Registrar's Office. More information is available on the Commencement Candidates (<http://www.rider.edu/academics/academic-support-resources/registrar/commencement-candidates>) web page.

Diplomas are conferred only upon those who have met 100% of all degree requirements. Students in the combined B.M./M.A.T. program receive both diplomas upon the completion of all requirements.

Disabilities – Policy for Assisting Students with Disabilities

Rider University supports the protections available to students with disabilities under Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended, and the New Jersey Law Against Discrimination.

Services for Students with Disabilities (SSD) facilitates equal access to the programs and activities at Rider University for students with disabilities, as defined by the Americans with Disabilities Act (ADA).

Students must initiate contact with SSD in order to receive services and to arrange reasonable accommodations, such as course adjustments, course substitutions and auxiliary aids. Any Rider student who supplies SSD with appropriate documentation of a disability is eligible on a case-by-case basis for reasonable accommodations. Students with disabilities should contact SSD (Joseph P. Vona Academic Annex, Room 8, 609-895-5492) to discuss available services and reasonable accommodations, including academic adjustments.

Only students with documented disabilities that prevent equal access to an academic course or program are entitled to reasonable accommodations, which may include course adjustments, course substitutions and auxiliary aids. A reasonable accommodation is an accommodation that provides the student with equal access to the academic course or program, including all course or program materials, but does not impose an undue burden on the University or constitute a fundamental alteration to the course or program in question. Knowledge of the essential course and program standards resides primarily with the individual faculty member and/or the academic department.

SSD evaluates the disability documentation provided by the student, collects additional information from the student, and gathers information from relevant educational support personnel (e.g., high school guidance counselors), medical and psychological professionals, and other pertinent sources outside of Rider University. When the student's disability has been sufficiently documented and potential reasonable accommodations have been identified, the student is provided a Notice of Academic Adjustments specific to each course and encouraged to present that Notice of Academic Adjustments to the relevant faculty member and to discuss, in a private setting, how the reasonable accommodations will be implemented.

If any such faculty member has concerns that the accommodations constitute a fundamental alteration to the course or program in question,

that faculty member shall promptly contact SSD to initiate discussion and resolution of those concerns.

If the faculty member does not demonstrate to SSD that the accommodation constitutes a fundamental alteration of the course or program in question, the accommodation shall be put in place. If the faculty member demonstrates to SSD that the accommodation constitutes a fundamental alteration of the course or program in question, alternate accommodations, to the extent available, shall be made. If SSD and the faculty member are unable to mutually agree on this issue, they shall appeal it to the Provost or his/her designee, who shall hear both positions, review any necessary documents, and render a final decision.

If such an appeal is taken to the Provost or his/her designee, and the semester has already begun, the Provost or his/her designee shall determine at the outset of the appeal process whether or not the student will suffer an immediate negative impact, if the proposed accommodation is not yet in place. If the determination is that the student will suffer such an immediate negative impact, then the proposed accommodation will be put into place pending resolution of the appeal. If no such immediate negative impact is apparent, the proposed accommodation will be withheld, pending resolution of the appeal. In either case, the Provost or his/her designee will make every reasonable effort to render his/her decision within four working days of the initiation of the appeal.

This policy is designed to ensure the University's compliance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended and the New Jersey Law Against Discrimination, and to enable every Rider student with a disability to enjoy an equal opportunity to achieve his/her full potential while attending this University.

Double Major

Students wishing to pursue two majors within a college or school (or majors in different colleges or schools), each of which leads to the same baccalaureate degree (e.g., B.A. or B.M.) may do so provided they receive requisite approvals, satisfy the general education or core requirements for the degree they designate as primary, satisfy all of the major area requirements for each program, and satisfy all other requirements for each major. Upon completion of all requirements, the student will be awarded one degree but the transcript will indicate two majors.

Dual Degrees

Students wishing to pursue two majors within a college or school (or majors in different colleges or schools), each of which leads to a separate and distinct baccalaureate degree may do so provided they receive requisite approvals, satisfy all of the requirements for each major, and satisfy all other requirements for each degree. Upon completion of all requirements, the student will be awarded a second baccalaureate degree.

Employment Opportunities – Westminster Choir College

In addition to general opportunities provided by the University, there are arts-specific opportunities both on-campus and in the general community. For example, many Westminster Choir College students are employed in area churches as organists, directors and singers on a part-time basis. These assignments provide laboratory experiences in which knowledge and techniques can be applied and tested. Inquiries and

requests should be addressed to the Office of Church Field Education on the Princeton campus.

Engaged Learning Policy

Definition

"Engaged Learning" refers to activities in which students apply their knowledge in educational settings beyond the classroom; delve further with independent scholarship and creative expression; broaden their horizons with study abroad or cross-cultural encounters; become problem solvers, leaders and team members in their communities; and prepare for professional and civic lives that make a difference. Rider's students are required to complete at least two high-impact Engaged Learning Experiences that reflect the University's strategic themes of leadership, ethics and social responsibility, and global and multicultural perspectives. These experiences will help students build bridges between their courses of study and the world in which they live.

Requirements

All Rider University undergraduate students^{1,2} are required to earn a minimum of six points, spread across at least two of the following Engaged Learning categories. The six categories of Engaged Learning experiences are:

1. Leadership and Mentoring
2. Study Abroad and Cultural Exploration
3. Guided Research and Scholarship
4. Civic and Community Engagement
5. Internship, Co-Op, and Field Work
6. Arts, Media and Creativity

- ¹ Transfer students who bring less than 31 credits to Rider will be required to earn 6 Engaged Learning points. Transfer students who bring 31 or more credits to Rider will be required to earn a minimum of 3 points spread across at least two of the Engaged Learning categories.
- ² All NCAA Division I athletes will receive 3 points of engaged learning credit as a result their athletic participation. The remaining 3 points will be completed from the approved list of Engaged Learning experiences or courses.

Earning Points

Academic courses

Credit bearing courses approved as Engaged Learning Experiences need not be submitted by students. Once a student completes a course that has been designated as Engaged Learning, points equal to the number of credits (no course will be awarded more than 3 points), will be automatically assigned by the Registrar's Office. The Registrar's Office will insert the course on the Engaged Learning Transcript. A full list of the eligible courses is available on the Engaged Learning webpage.

Experiences

When students engage in experiences that are not connected to academic courses, they must initiate the approval process themselves. Forms for student submissions of eligible experiences are available in BroncNation (<https://brconcnation.rider.edu>). Guidelines for such submissions as well as the full list of eligible experiences are found on the Engaged Learning webpage.

Submitted experiences will be reviewed by designated approvers and upon approval will be listed on the student's Engaged Learning

Transcript. For experiences not approved, students may appeal to their academic dean.

Ensembles/Productions - Attire and Registration

Attire

Students must purchase official ensemble attire for choirs in which they are enrolled. Freshman/transfer students at the Princeton campus must be fitted during orientation and purchase a red robe which will be charged to their student account by the Bursar's Office.

Registration

Students participating in music ensembles or artistic productions must be registered for the course that accompanies that activity. It is the responsibility of the student to ensure proper registration in the appropriate course. Excused absences are granted only to registered students.

Each semester, the official personnel roster for each ensemble will be finalized for that semester at the end of the schedule adjustment period, typically two weeks after the first day of classes.

Freshman class eligibility for non-required ensembles or productions is determined by the appropriate department/program/applied area, with the approval of the appropriate Academic Policy Committee.

Full-Time Tuition Inclusion

Please see the table of applied lesson suffixes in the Applied Music (p. 836) section in the Undergraduate Academic Policies section of this catalog. Registration for the incorrect suffix may result in an incorrect bill.

Lawrenceville Students

Full-time tuition charges are incurred by students who enroll for credit loads, including credit equivalents for non-credit and audited courses, which fall within the ranges indicated below. Further charges are incurred when full-time students exceed maximum load levels, excluding recital credits or participation in auditioned choirs or productions for School of Fine and Performing Arts majors.

For School of Fine and Performing Arts students, full undergraduate tuition includes:

1. For School of Fine and Performing Arts students, full undergraduate tuition includes:
2. A minimum of 12 and maximum of 18 credits per semester or the equivalent including non-credit courses.
3. Primary applied music study (p. 836) to the maximum required credits/semesters.
4. Applied dance study to the maximum required credits/semesters. (see below)
5. Once all applied music or dance requirements have been completed, all additional lessons or courses will be billed at the elective rate.
6. Music students in double major programs with two different primary instruments will be billed for the second applied lesson at the elective rate.

Please see the table of applied lesson suffixes in the "Applied Music (p. 836)" section in the Undergraduate Academic Policies section

of this catalog. Registration for the incorrect suffix may result in an incorrect bill.

Princeton Students

Full-time tuition charges are incurred by students who enroll for credit loads, including credit equivalents for non-credit and audited courses, which fall within the ranges indicated below. Further charges are incurred when full-time students exceed maximum load levels, excluding VC593 or participation in auditioned choirs.

Please see the Tuition and Fees Table (<http://www.rider.edu/offices-services/finaid/tuition-fees/undergraduate-tuition-fees>) on Rider's website for elective and part-time charges for elective music and dance study.

Full undergraduate tuition includes:

A minimum of 12 and maximum of 18 credits per semester or the equivalent including non-credit courses. Exception: during the senior student teaching semester for Music Education majors, full-time tuition covers only the course ME492. For primary applied music study, one hour per week of applied music instruction each semester, except during the student teaching semester for Music Education majors or a full-time (12 cr) internship semester for Bachelor of Arts in Music majors. Composition majors receive one hour per week of private composition instruction and one half-hour per week of either private voice or private keyboard instruction. Once all applied requirements have been completed, all additional applied lessons will be billed at the elective rate. Students in double major programs with two different primary instruments will be billed for the second applied lesson at the elective rate. Any non-required private lesson will be billed at the elective rate.

Please see the table of applied lesson suffixes in the Applied Music (p. 836) section in the Undergraduate Academic Policies section of this catalog. Registration for the incorrect suffix may result in an incorrect bill.

Dance Study

Effective as of the fall 2014 semester for all new or readmitted Rider University students on both campuses: For all students whose major or minor program does not require applied dance study under the DAN prefix, or for those students who have completed dance requirements, elective fees will apply. All part-time students are charged a dance fee. Please see below. Registration for applied dance study follows this table of courses. Students will register for the appropriate course number, as indicated in the curriculum pages later in this section.

Maximum enrollment under full-time tuition: In B.A.-Dance/Performance Track, a total of 15 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School (PBS); in B.A.-Dance/Dance Studies Track, a total of 14 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School; in Dance Minor, a total of 8 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School.

Registration for DAN 100 and DAN 300 require a placement completed with dance faculty.

Full-Time Students

DAN 100

- DAN-100-01 – 1-credit required course taken at PBS. Included in tuition – no extra charge. Example: B.A./Dance majors and minors up to the maximum stated above.
- DAN-100-01F – 1-credit elective course taken at PBS. Not included in tuition – \$740 extra per semester. Examples: Student who has completed all required applied dance study in their major, student who has completed all required applied dance study in their minor, or student whose major or minor does not require lessons.

DAN 151 Pilates and Modern – 1-credit course taken at Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

DAN 152 World Dance & Improvisation – 1-credit course taken at Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

DAN 300

- DAN-300-01 – 2-credit required course taken at PBS. Included in tuition – no extra charge. Example: B.A./Dance majors and minors up to the maximum stated above.
- DAN-300-01F – 2-credit elective course taken at PBS. Not included in tuition – \$1,500 extra per semester. Examples: Student who has completed all required applied dance study in their major, student who has completed all required applied dance study in their minor, or student whose major or minor does not require lessons.

Note: Students choosing to register for both DAN 100-01F and DAN 300-01F as elective study in the same semester will be charged a total fee of \$2,000.00.

Part-Time Students

(all students, both campuses, regardless of major or requirements)

DAN 100

- DAN-100-01P – 1-credit course taken at PBS. Not included in tuition – \$1,050 extra per semester. For majors and minors, course counts toward the maximum stated above.

DAN 300

- DAN-300-01P – 2-credit course taken at PBS. Not included in tuition – \$2,090 extra per semester. For majors and minors, course counts toward the maximum stated above.

Note: Part-time students choosing to register for both DAN 100-01P and 300-01P in the same semester will be charged a total fee of \$3,050.00.

Grades – Grade Reports, Grade Point Average, Incomplete Grades, Grade Appeals

- Grade Reports (p.)
- Grade Point Average (GPA) (p. 844)
- Incomplete Grades (p. 844)
- Grade Appeals (p. 845)

Grade Reports

Members of the faculty are officers of instruction at Rider University.

Among their responsibilities as such is the evaluation of students' academic accomplishments in courses of instruction. These evaluations

ultimately are expressed in grades that are recorded in the students' academic record. Members of the faculty, judging the competencies and performances of students, assign grades based on their professional experience and training. Grades assigned by the faculty follow practices and procedures within the standards established by Rider and within the standards established by individual course requirements.

Letter grades are used at Rider University for recording faculty evaluations of final student achievement in individual courses and are entered on the permanent academic record of a student's academic performance.

The academic grades used by faculty for recording evaluations of student achievement are as follows. For determining grade point averages (GPAs), grades have weighted values called variously honor points, quality points, or grade points as follows:

A (Excellent)	4.0
A-	3.7
B+	3.3
B (Good)	3.0
B-	2.7
C+	2.3
C (Fair)	2.0
C-	1.7
D (Poor, minimum passing grade)	1.0
F	0.0

(Failing academic work; fail to abide by standards of academic honesty and integrity; unauthorized withdrawal, and fail to complete work in prescribed time.)

Each instructor of a course will inform the student of the course objectives, procedures, and applicable grading standards. Upon a student's written request, members of the faculty will provide a review of the student's course standing at least once each term by the mid-point of that term. Each student may also review material submitted to the instructor for evaluation such as papers, examinations, and the like. In these ways, students will be able to assess their own progress in a course before final grades are assigned.

NOTE: Faculty members are not required to maintain student course materials more than four months after the end of an academic term.

A student grade report may also show the following transcript notations, which carry no grade point value:

I	Incomplete
L	Late grade
N	Registered: Did not attend
AU	Audit
P	Pass
S	Satisfactory progress

U	Failure in pass/fail course
W	Withdrawal
Y	Satisfactory completion of supplemental education course
Z	Insufficient progress in supplemental education course

"N" and "W" notations are included in the total semester hours attempted, as far as tuition payment is concerned.

Grade Point Average (GPA)

Grade point averages (GPA) are used to establish academic standing. In order to compute the grade point average, students must first determine the number of quality points earned for each course. The total number of quality points for a course is derived by multiplying the number of credits for the course by the number of quality points for each letter grade. The grade point average (GPA) is determined by dividing the number of quality points by the number of GPA hours.

Incomplete Grades

Students who, as a result of extenuating circumstances, are unable to complete the required work of a course within the term, may request an extension of time from a faculty member. Such extensions of time can be granted only in cases in which illness or another serious emergency has prevented the student from completing the course requirements or from taking a final examination. The request for extension of time must be made prior to the last scheduled class meeting, except in those unusual situations in which prior notification is impossible.

The faculty member shall determine whether to grant the request for a time extension and the type of verification (if any) required to support the request. The faculty member shall specify the time, up to four weeks from the last day of the term, as specified in the academic calendar, by which work must be completed by the student. If the faculty member does agree to the request, the notation "I" (Incomplete) shall be submitted on the grade roll. In those situations where the faculty member has not received a request for an extension of time, the notation "I" (Incomplete) may be submitted on the grade roll by the faculty member when, in his or her judgment, such a determination appears justified. Upon submission of completed required work the faculty member shall submit a Change of Grade form to the Registrar.

Students who, as a result of extenuating circumstances, are unable to submit the completed required work at the end of the four-week period may request an extension of the incomplete grade. The request for an extension of the incomplete must be made prior to the expiration of the four-week period. If the faculty member agrees to the request for an extension of the incomplete, the faculty member shall specify the time, up to a maximum of two weeks from the date of expiration of the four-week period (i.e., six weeks from the last day of the term) by which work must be completed by the student and shall submit an Extension of Incomplete form to the Registrar.

Upon submission of completed required work, the faculty member shall submit a Change of Grade form to the Registrar and assign the course grade. Failure of the Registrar to receive from the faculty member a Change of Grade form or an Extension of Incomplete form at the end of the four-week period, or a Change of Grade form at the end of the six-

week period shall result in the automatic assignment of the grade "F," "Z," or "U" by the Registrar.

Students who receive an incomplete in a course that is part of a course sequence must obtain permission from the department chairperson to remain enrolled in the next course in the sequence or they will be removed from that next course.

Grade Appeals

Basis for Grade Appeal

A final course grade may be changed only at the initiative of the faculty member who originally assigned the grade or as the result of a decision made in the hearing of a grade appeal by the Faculty Grade Review Panel. It is assumed that the final course grade is assigned in good faith and based on the professional expertise of the faculty member.

A student may appeal a final course grade only on the grounds that it represents an arbitrary, capricious, and/or unreasonable evaluation of his or her performance.

A grade appeal may not be based on a disagreement with the faculty member's professional academic evaluation of the student's work. The burden of proof rests with the student. A grade appeal shall be supported only when a student convincingly demonstrates that an arbitrary, capricious, and/or unreasonable evaluation occurred. Changes and appeals for grades on written comprehensive graduate examinations are subject to the same requirements and procedures as course grades.

The Faculty Grade Review Panel may return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process; may decline to hear an appeal when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading; and shall decline an appeal if it is based on failure to accommodate a disability covered by the University Disability Policy.

Faculty Grade Review Panel

The Faculty Grade Review Panel has final authority concerning all grade appeal questions. **The panel consists of the following nine members:**

1. Six tenured faculty members including one tenured faculty member elected by the bargaining unit members of each of the five college/school academic policy committees and one selected by the bargaining unit members of the University Academic Policy Committee, who shall serve as chairperson of the panel;
2. A seventh faculty member selected jointly by the Provost and Vice President for Academic Affairs and the academic deans;
3. Two full-time students selected by the Student Government Association who, at the time of their service, must be seniors who have attained a grade point average of at least 3.25.

Each of the above appointing groups shall also designate an alternate for each member they appoint to the panel. Faculty members of the panel shall serve two-year terms and may be reappointed.

A quorum of the Faculty Grade Review Panel shall consist of any five members. The failure or inability of any appointing body to fulfill its responsibility to appoint any member or members to the panel shall not prevent the panel from organizing itself and exercising its duties.

The chairperson of the panel will serve as the hearing coordinator and has the following duties and responsibilities:

1. Inform the members of the panel that a grade appeal has been received and set a date for the hearing,
2. Distribute documentary materials pertaining to the appeal to members of the panel,
3. Maintain a permanent record of the panel's proceedings,
4. Prepare and distribute any decision made by the panel to the appropriate parties.

Prior to Initiating a Grade Appeal

A student who believes that his or her final course grade represents an arbitrary, capricious, and/or unreasonable evaluation of his or her work is strongly encouraged to talk with the faculty member in an effort to resolve the issue before filing a formal grade appeal. However, it must be emphasized that this informal discussion does not constitute the initiation of a grade appeal and does not extend the time limits specified in the next paragraph.

Initiating a Grade Appeal

To initiate a grade appeal, the student must forward a letter to the faculty member which clearly and precisely describes the student's reasons for believing that the final course grade constitutes an arbitrary, capricious, and/or unreasonable evaluation of his or her performance. A copy of this letter shall also be sent to the faculty member's department chairperson. (If the faculty member taught the relevant course in another department, the letter shall be sent to the chair of that other department. If the relevant course is in a program and is not cross-listed, the letter shall be sent to the chair of the program director's home department.)

For appeal of fall semester grades, the letter must be postmarked or hand-delivered within seven (7) days of the start of the upcoming spring semester. For appeal of spring semester grades, it must be postmarked or hand-delivered within thirty (30) days of the last regularly scheduled spring semester examination. For appeal of summer grades, it must be postmarked or hand-delivered within seven (7) days of the start of the upcoming fall semester. For appeal of grades on written comprehensive graduate examinations, it must be postmarked or hand-delivered within thirty (30) days of the date that grades were issued for the examination.

If a change of grade occurs after the aforementioned deadlines, the grade appeal must be filed within thirty (30) days of the submission of the changed grade to the registrar.

If the faculty member who assigned the grade in question is no longer at Rider or is away from Rider on an extended basis and not available for consultation, the initial review shall be conducted by the appropriate department chairperson, and the schedule may be extended at the appropriate dean's discretion.

If the faculty member who assigned the grade in question is the department chairperson, the chairperson's dean or that dean's designee shall replace the chairperson in all the procedures that follow.

Failure to submit a written statement of the appeal within the time guidelines established above shall constitute grounds for denying a student access to the grade appeal process. Failure to provide a clear and precise statement shall constitute grounds for denying the appeal at any step in the process. Once a grade appeal is initiated, the basis of all subsequent proceedings must be limited to the allegations appearing in the initial written statement. This limitation does not exclude the introduction of new evidence directly related to the initial allegations.

The chairperson of the Faculty Grade Review Panel, upon written request of any party, may extend any deadline contained in this policy if he or she believes that circumstances beyond the control of a party to the appeal have prevented compliance with stated deadlines. The decision of the panel chairperson to extend or not to extend a deadline shall not be subject to appeal.

The Grade Appeal Process

Step One

In the letter of appeal, the student may request a formal meeting with the faculty member. If the faculty member agrees to such a meeting, the meeting shall be held no later than fourteen (14) days after the beginning of the fall or spring semester following the semester or session in which the grade was given. However, the parties are encouraged to schedule such a meeting at an earlier date if mutually convenient.

The faculty member shall render a decision on the appeal within seven (7) days of such a meeting and shall notify the student and the department chairperson in writing of the decision. If the faculty member agrees to change the final course grade of the student, he or she shall submit a Change of Grade form to the Registrar.

If the faculty member believes that a meeting with the student would not be productive, he or she shall make a decision on the appeal based on the student's letter and shall communicate the decision in writing to the student and the department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given.

If the student accepts the decision of the faculty member at Step One, no further action is required. If the student does not accept the faculty member's decision at Step One, he or she may appeal the decision to Step Two in writing to the department chairperson with a copy to the faculty member's dean. This letter must be postmarked or hand-delivered within seven (7) days of the postmark date of the faculty member's Step One decision.

If the student does not receive a written response from the faculty member or department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given, the student may, within twenty-one (21) days of the beginning of that semester, proceed to Step Two as indicated below. All such written responses shall be mailed to the student's campus address, if the student resides on campus, or otherwise to the student's home address on record.

Step Two

Within fourteen (14) days of the receipt of a student's letter of appeal to Step Two, the department chairperson shall schedule a meeting with the student and the faculty member. At such meeting, the student and the faculty member will have the opportunity to explain their positions with respect to the grade in question, but they shall be limited to the allegations raised in the student's initial written statement.

The department chairperson shall render an opinion on the matter within seven (7) days of the Step Two meeting and shall provide explanatory language for this opinion in writing to the student, the faculty member and the faculty member's dean.

If the department chairperson's opinion supports the position of the faculty member, the student shall have seven (7) days from the postmark date of the letter from the department chairperson to continue his or her appeal to the Faculty Grade Review Panel as described in Step Three.

If the department chairperson's opinion supports the student's position in the appeal, the faculty member shall have seven (7) days from the postmark date of the department chairperson's letter opinion either to accept that opinion and submit a Change of Grade form to the registrar, or to reject the opinion and notify the student, department chairperson, and faculty member's dean that the faculty member is making an appeal pursuant to the Step Three process.

If the student does not receive notification of a change of grade within twenty-one (21) days of the date of the department chairperson's written decision, the student may carry the appeal to Step Three.

Step Three

To carry the appeal to Step Three, the student must submit a letter expressing that intent to the chairperson of the Faculty Grade Review Panel with copies to the faculty member, the department chairperson, the dean, and the Provost and Vice President for Academic Affairs.

Within seven (7) days (excluding vacation and examination periods) of the receipt of this letter, or the letter from the faculty member who has appealed, whichever the case may be, the chairperson of the Faculty Grade Review Panel shall schedule a meeting of the panel to consider the appeal.

The student and the faculty member shall have the right to appear before the panel to present information pertaining to the allegations made in the student's initial written statement.

The Faculty Grade Review Panel may, if it deems it desirable, request attendance by the chairperson, the dean, and/or any other representatives of the University. Attorneys or advisors to the participants may attend but not participate in the meeting of the panel.

The unwillingness of the faculty member or student to appear before the panel shall not prevent the panel from proceeding with its deliberations. In those deliberations, the panel shall have access to written documents pertaining to the appeal, pertinent records of student performance, and such verbal presentations as may be made during panel deliberations.

On the basis of careful consideration of the available information, the Faculty Grade Review Panel will determine if an arbitrary, capricious, and/or unreasonable evaluation of the student's performance has occurred. This determination will be made in writing and provided to all affected parties.

If the panel determines that no such action occurred, the case will be closed with no further right of appeal. If the panel determines that an arbitrary, capricious, and/or unreasonable evaluation has occurred, it will direct the faculty member's department (or will establish an evaluation committee of faculty members in the field of the course offered) to re-evaluate the student's performance based upon the panel's decision, the records and documentary materials.

Within fourteen (14) days of the receipt of the panel's directive, the department or evaluation committee shall recommend to the panel a grade that it deems appropriate, whether higher than, lower than, or the same as the original grade. Normally, the panel will accept the revised evaluation by the department or committee and will subsequently notify the Registrar of any change of grade. Should the panel feel that the department or committee has not conducted its review in an appropriate manner and that, as a result, the suggested substitute grade is not appropriate, it shall have the authority to direct the Registrar to enter the grade that the panel judges appropriate.

Decisions of the panel are not subject to further appeal. The panel may also return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process, or when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading. The panel shall decline an appeal if it is based on failure to accommodate a disability covered by the University Disability Policy.

Expediting a Grade Appeal

When a student's graduation is affected by the outcome of a grade appeal in a semester, term, or session immediately preceding such graduation, faculty members shall make reasonable efforts to expedite the process.

Grade Changes Made at Initiative of Faculty Member

The individual faculty member may determine that it is appropriate to change a recorded academic grade. Such changes must be made within four (4) months of the date that the original grade was assigned. Any change of grade initiated by a faculty member more than four (4) months after the date the original grade was assigned must be approved by the faculty member's dean. Faculty members, using forms supplied by the Office of the Registrar, will prepare a written change of grade stating the reasons for the grade change with a copy to the student, the department chairperson and the faculty member's dean. Upon receipt of this form by the Office of the Registrar, the grade will be changed on the official records of the University.

Graduation with Honors

Graduation with distinction (sometimes referred to as Latin honors) depends upon the achievement of exceptionally high scholastic averages and completion of all requirements. This distinction is reflected by the awarding of degrees cum laude, magna cum laude, and summa cum laude. All grade point averages are computed on work completed at Rider University only.

For Lawrenceville-based degrees, graduation with distinction is awarded on the following basis:

Summa Cum Laude – averages between 3.75 and 4.00

Magna Cum Laude – averages between 3.50 and 3.74

Cum Laude – averages between 3.25 and 3.49

For Princeton-based degrees, graduation with distinction is awarded on the following basis:

Summa Cum Laude - averages between 3.80 and 4.00

Magna Cum Laude - averages between 3.60 and 3.79

Cum Laude - averages between 3.40 and 3.59

Health and Safety – Westminster College of the Arts

Westminster Choir College/Westminster College of the Arts of Rider University, as required by the National Association of Schools of Music, is obligated to inform students and faculty of health and safety issues, hazards, and procedures inherent in practice, performance, teaching, and listening both in general and as applicable to their specific specializations. This includes but is not limited to information regarding

hearing, vocal and musculoskeletal health, injury prevention, and the use, proper handling, and operation of potentially dangerous materials, equipment, and technology.

It is important to note that health and safety depends largely on personal decisions made by informed individuals. Rider University has health and safety responsibilities, but fulfillment of these responsibilities cannot and will not ensure any individual's health and safety. Too many factors beyond the University's control are involved.

Each individual is personally responsible for avoiding risk and preventing injuries to themselves before, during, and after study or employment at Rider University. The policies, protocols, and operational procedures developed do not alter or cancel any individual's personal responsibility, or in any way shift personal responsibility for the results of any individual's personal decisions or actions in any instance or over time to the University.

All members of the Westminster College of the Arts community are encouraged to visit Health and Safety Recommendations (<http://www.rider.edu/student-life/health-wellness/student-health-services/health-safety-sfpa-wcc-students>) on Rider's website for a series of recommendations and resources designed to help each individual to become aware of and attend to various issues.

Independent Study

In order to challenge students of exceptional talents and interests and to provide opportunities for individual study and research, independent study is available for credit to qualified students under the terms stated below. Each project must be directed by a Rider University faculty member.

The advisor-student relationship is one of mutual agreement between the faculty member and the student. The choice of project is limited primarily by the availability of an advisor who has some knowledge and interest in the field. Application forms are available in the office of the dean of the student's college or school.

The following policies apply to independent study courses:

1. Students must be a junior or senior in good academic standing with a cumulative grade point average of 3.00 or better
2. Approval for an independent study course must be secured in writing, normally during the term prior to that in which the study will be carried out, but in any case in advance of the first day of classes of the applicable term. All proposals must be approved by the faculty/advisor, department chair, and by the office of the instructor's dean and the office of the student's dean. Upon approval, the student must enroll by the end of the third week of class.
3. A student may not enroll for more than one independent study course per term. Courses usually carry two or three credits, with a maximum of six allowable in special cases involving a full year of work.
4. A maximum of 18 credits may be earned in all independent study courses.
5. A student is expected to earn a minimum grade of "B" in any independent study course, as assigned by the faculty advisor for the project. A grade of "B-" or lower may result in ineligibility for future independent study courses.

International Baccalaureate (IB) Credits

Incoming students may be granted up to 20 credits on the basis of their International Baccalaureate coursework. Credits are awarded for Higher Level IB courses based on the student receiving a score at or above the level approved by the department that evaluated the course (in no case less than a score of five).

In order to grant credit, Rider's Office of Undergraduate Admission must be sent an official IB transcript. For further information, please see International Baccalaureate (IB) Course Equivalency (<http://www.rider.edu/admissions/undergraduate-admission/how-apply/ib-course-equivalency>) on Rider's website.

International Student Status

Federal regulations require that all F-1 and J-1 international students maintain full-time status. Students may request part-time status under specified, limited circumstances, including their final semester. Prior approval of the Center for International Education (<http://www.rider.edu/offices-services/center-for-international-education>) is required.

Outside Activities – Westminster Choir College only

Westminster Choir College students are expected to give priority to all officially scheduled classes, lessons, rehearsals, on- and off-campus performances (including tours), and other official functions involving music students. Outside activities, such as employment, church or volunteer work, or other professional engagements should not conflict with college requirements or those listed on course syllabi. Students employed outside of the college should inform employers of their commitment to their education and their obligation to college classes and ensembles.

Placement Testing Information

English Placement Test

Incoming freshmen scoring 530 or above on the Writing section and 500 or above on the Critical Reading section of the SAT will be placed in CMP 120. Students scoring below 530 on the Writing or below 500 on the Critical Reading section of the SAT will take the mandatory English Department Placement Test to determine their placement. As in the past, students scoring 4 or above on the Departmental test will be placed in CMP 120, and those scoring 3 or below on the Departmental test will be placed in CMP 115. As in the past, the test will be comprised of a 40-minute writing prompt and will be scored by two separate readers, with a third reader called in to resolve conflicting scores.

Reading Placement Test

First year students with verbal SAT scores of 470 and below will be placed into the core course, Introduction to Academic Reading (CRC-101S). Students may take a "challenge test" if they wish to attempt to test out of this reading requirement.

Math Placement Test

Placement in some Mathematics classes and all Management Sciences classes is based upon the Mathematics score on the SAT. Business majors with an SAT-M score of 550 or greater are permitted to enroll in MSD 105. Business students with an SAT-M score of 540 or less are

placed in MSD 104. Science majors with an SAT-M score of 540 or less are placed in MTH 100S.

Scoring thresholds may be adjusted upwards and course requirements may be adjusted by individual college/school Academic Policy Committees. Students enrolled into MTH 102 will be given a brief test, prepared by the Mathematics Department, during the first five business days of the semester. Those placing below a minimum score set by the Mathematics Department on the test will be required to participate in one hour of structured tutoring¹ per week concurrent with taking the course. All others enrolled in the class will be encouraged to participate in tutoring.

In Fall 2017, all MTH 102 sections will be assessed to ascertain the students' success². Based upon this assessment, if the approach outlined above does not result in a success rate at least equivalent to the current success rate of students who passed MTH 100S and subsequently took MTH 102, assessed in Spring 2017, the Mathematics Department will reevaluate this approach and potentially propose revisions to this policy.

Business Students:

- Students with an SAT Math score of 550 taken before March, 2016 or an SAT Math score of 570 taken in March, 2016 or later, or ACT Math score of 23 or higher are placed in Quantitative Methods I MSD 105 for 3 credits. No placement test is required.
- Students with an SAT Math score of 540 taken before March, 2016 or an SAT Math score of 560 taken in March, 2016 or later, or ACT Math score of 22 or lower are required to take the Math Placement Test.

Footnotes

- ¹ Mandated structured tutoring will:
 - include an embedded tutor in each class section
 - include a one-hour per week group study session
 - impact the student's grade as determined by individual faculty.
- ² "Student success" is defined as demonstrating mastery of the following student learning goals:
 - Students will demonstrate a mastery of basic arithmetic and algebra.
 - Students will demonstrate a mastery of the elementary theory of sets, operations on sets, and the interpretation of data available in surveys.
 - Students will demonstrate a well-developed sense of number including prime factorization, greatest common factor, least common multiple and applications to practical problems.
 - By solving unstructured practical problems, students will demonstrate an ability to interpret the information available in the graphs of functions and other representations of mathematical data in the Cartesian plane.
 - Students will demonstrate and apply an ability to connect mathematical concepts to real-world issues.

Recital Scheduling – Westminster Choir College only

Students wishing to give applied music or graduate conducting recitals, whether or not for the purpose of fulfilling degree requirements, must schedule the recitals in the Office of Performance Management. Either prior or subsequent approval or confirmation by a department may be required in order to confirm the recital date. A recital date not confirmed by departmental authorization may be released by Performance

Management. No required recitals may be scheduled during examination or reading days during the final examination period in any semester.

Transfer Appeals

An appeal process for transfer course equivalency is open to students who have attended an accredited community college **or four-year institution** and have been admitted to a Rider degree program. ***Course appeals will only be considered prior to the completion of the last 30 credits in the bachelor degree.***

All communication regarding appeal[s] will be communicated to the student through Rider email.

The appeal process is as follows:

1. For each course being appealed the student should submit the following information/documentation:
 - a. Program the student is pursuing
 - b. Course[s] the student wishes to appeal (include course number, title and the name of the transfer institution)
 - c. Supporting documentation [course syllabus, course work] to justify appeal[s]
 - d. Desired outcome of appeal[s] [please check one]:
 - Substitution for a required course in the major, list course[s]: _____
 - Substitution for a required course in the minor, list course[s]: _____
 - Substitution for a core course, list course[s]: _____
 - Transfer as a general or free elective
 - Transfer as a business elective [CBA only], list discipline or course prefix (e.g. MKT, ECO) _____
 - Other: _____
2. All appeals must be submitted electronically through the student's Rider email address to the Office of the Registrar at transferappeal@rider.edu.
3. Appeals will be reviewed by the Transfer Appeals Committee. A member of the Transfer Appeals Committee will respond to the student's petition fifteen [15] days after receipt of the appeal.

The Transfer Appeals Committee is comprised of the relevant department chair(s) or program director(s), as well as the dean or associate/assistant dean of the college/school in which the program resides.

Transfer Credit While Currently Enrolled at Rider

Students seeking permission to transfer credit from another accredited college after matriculating at Rider University:

1. must complete an off-campus approval form at least 30 days in advance of the start of the proposed off-campus course, to be approved by the student's academic dean's office. If prior approval is not obtained, there is no guarantee that transfer credit will be granted;
2. must have a cumulative grade point average of at least 2.00;
3. may not be within the final 30 credits of the Rider baccalaureate degree program.

Baccalaureate degree-seeking students with less than 60 credits may enroll in courses in either two-year or four-year accredited postsecondary institutions for transfer to a program of study at Rider as long as prior approval is obtained as described above.

Baccalaureate degree-seeking students with more than 60 credits may only enroll in courses in four-year accredited postsecondary institutions for transfer to a program of study at Rider as long as prior approval is obtained as described above.

Upon the completion of 21 credits, students pursuing a two-year (A.A.) program will not be permitted to enroll in courses at other institutions for transfer to that program of study at Rider University.

Credit by transfer from other institutions may be applied toward baccalaureate degrees under these conditions:

1. An official transcript must be forwarded directly from the sending institution to the student's academic dean's office.
2. A minimum grade of "C" or its equivalent is required for transfer of courses. Grades such as "pass" or "credit" are also acceptable. **Grades of "C-" or below are not acceptable.**
3. Courses taken 10 or more years prior to entering Rider University are subject to individual evaluation for contemporary transfer applicability.
4. Transfer credits are not associated with grades and are not included in grade point average calculation, except for courses taken at other colleges of Rider University or under the cooperative program between Westminster Choir College and Princeton University.

At the Princeton campus:

1. Transfer credit is equivalent to the credit earned at the sending institution, except that credit by transfer may not exceed three credits per course.
2. Many non-music courses may be transferred to satisfy Arts and Science requirements; excluded are courses dealing with highly technical or scientific subjects, specialized professional school courses, physical education courses and others determined by the college. The Arts and Science Program has the final authority in determining whether or not a specific course may transfer.
3. Music courses are not transferable. Credit will be awarded, however, for all college-level music courses exempted by examinations, which are given only after a student has enrolled at Westminster.

Withdrawal from the University

Students should refer to **The Source** at www.rider.edu/thesource (<http://www.rider.edu/thesource>) for information regarding the circumstances and procedures related to withdrawing from the University.

In addition, students should refer to Rider's website at <http://www.rider.edu/offices-services/financial-payments-billing-deposits-refunds> for refund and other related information as it concerns withdrawal from the University.

Graduate

Rider University's Vision and Mission

Rider's Vision

Rider University will be a premier, forward-looking university known for its Engaged Learning Program that, together with dynamic academic programs, enriching co-curricular experiences and a vibrant living and learning community, challenges students, excites their imaginations and instills in them excellence in thought and action, preparing them for highly engaged and fulfilling professional and personal lives.

Rider's Mission

Rider University welcomes students from throughout the region, across the nation, and around the world who seek to be challenged and supported as active members of our inclusive and vibrant living and learning community. Committed to student growth, transformation and leadership, we connect rigorous academic, artistic and professional programs of study with a rich array of learning experiences that engage students inside and outside the classroom. We prepare graduates to thrive professionally and to be lifelong independent learners and responsible citizens who embrace diversity, support the common good, and contribute meaningfully to the changing world in which they live and work.

Our students, alumni, faculty, staff and administrators live the **RIDER PROMISE** by being forever:

Prepared to contribute meaningfully to the changing world in which they live and work

Respectful of all people, rights, freedoms and individual differences

Open to a life of independent learning

Motivated to be responsible citizens who support the common good

Innovative, creative and resourceful

Skilled and thriving professionals, educators, artists and performers

Engaged in their communities as leaders and role models

Accreditations

Rider University is regionally accredited by the Middle States Commission on Higher Education.

The University also holds many specialized accreditations that attest to the quality of its academic programs. Rider is among the select business schools to have attained AACSB International (Association to Advance Collegiate Schools of Business) accreditation. Elementary and secondary education programs and their applicable graduate programs on both campuses are accredited by the National Council for the Accreditation of Teacher Education (NCATE) and Council for the Accreditation of Educator Preparation (CAEP). The undergraduate and graduate music programs of Westminster Choir College are accredited by the National Association of Schools of Music (NASM). In addition, Rider's graduate counseling services program in the School of Education holds the Council for Accreditation of Counseling and Related Education Programs (CACREP) national accreditation, and its school psychology program holds the National Association of School Psychologists (NASP) accreditation. Rider's B.S. Chemistry program is approved by the Professional Training of the American Chemical Society.

Rider University is a member of the National Collegiate Athletic Association (NCAA) Division I for both men's and women's athletics. The University offers 20 sports—10 men's and 10 women's teams. Rider is a member of the Metro Atlantic Athletic Conference (MAAC), Eastern Wrestling League (EWL) and the Eastern College Athletic Conference (ECAC).

Notice of the Title IX Coordinator

As a community of educators and learners, Rider University is committed to fostering an environment dedicated to learning and mutual respect as reflected in the University's mission, Statement of Community Values, Anti-Harassment and Non-Discrimination Policy and Title IX. All students, faculty, administrators and staff at the University have the right to expect an environment that allows them to enjoy the full benefits of their work or learning experience. The University, therefore, does not condone violations of its Anti-Harassment and Non-Discrimination Policy and treats all allegations about violations very seriously. As outlined in the Anti-Harassment and Non-Discrimination Policy ([www.rider.edu/ahnd](http://www.rider.edu/sites/default/files/docs/anti-harassment-non-discrimination-2015-16_v08012016.pdf)) (http://www.rider.edu/sites/default/files/docs/anti-harassment-non-discrimination-2015-16_v08012016.pdf), the University prohibits all forms of discrimination, harassment, sexual assault, sexual misconduct, sexual harassment, dating violence, domestic violence and stalking.

Rider University is an Equal Opportunity and Affirmative Action Employer.

No one will be denied employment at, admission to, or the opportunity to participate in educational programs and activities at the University on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation, gender identity, national origin, ethnicity, status as a Vietnam-era qualified disabled veteran or other protected veteran, or status as a member of any other protected class under federal or state law. The University does not discriminate on the basis of any of the aforementioned protected bases in the recruitment and admission of students, the recruitment and employment of faculty, administrators and staff, and the operation of any of its programs and activities.

The Associate Vice President for Human Resources serves as both the Affirmative Action Officer and the Title IX Coordinator for the University, and is the resource available to anyone seeking additional information or wishing to file a complaint related to Affirmative Action and discrimination on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation, gender identity, national origin, ethnicity, status as a Vietnam-era, qualified disabled veteran or other protected veteran, or status as a member of any other protected class under federal or state law.

The Affirmative Action Officer and the Title IX Coordinator for the University may be contacted as follows:

Robert Stoto

Associate Vice President for Human Resources/Title IX Coordinator and Affirmative Action Officer
Moore Library, Room 108
609-895-5683

Summer Session 2018

Students interested in calendar and course offerings for the summer sessions should consult the summer session catalog, available from the College of Continuing Studies at 609-896-5033 or go to www.rider.edu/summer (<http://www.rider.edu/summer>).

Commencement Information

For Commencement ceremonies information, go to www.rider.edu/commencement (<http://www.rider.edu/commencement>)

Cancellation of Classes

In most cases, Rider will remain open and fully operational during snowstorms and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, and close certain buildings or take emergency actions.

If such circumstances should arise, a notice will be sent via the Rider Alert System.

Students may sign up for Rider Alert at www.rider.edu/rideralert (<http://www.rider.edu/rideralert>)

Cancellations will also be announced online at www.rider.edu (<http://www.rider.edu>) and on the Rider University information hotline at 609-219-2000, option 1.

College of Business Administration

The College of Business Administration (CBA) seeks to develop in students the skills needed to perform effectively in a variety of organizational settings—small business, multinational corporations, service industry, not-for-profits, family companies, government, or Wall Street—depending upon the student's interests and goals. Each graduate degree program is designed to provide an educational experience for the whole person by combining theory and practice. Since most of the students in our degree programs are employed in professional or managerial positions, they bring a wealth of business experience to share with their peers as part of the networking and learning process.

Professional Accreditation

Rider University's College of Business Administration graduate and undergraduate programs are accredited by AACSB International – The Association to Advance Collegiate Schools of Business. The initial accreditation was achieved in 1993 and reaffirmed regularly thereafter. In addition, the accounting program was further recognized for excellence with AACSB International Accounting Accreditation in 2000 and also is reaffirmed on a regular basis.

Faculty

Courses are taught in small sections, usually by full-time faculty holding doctorates. Faculty members are engaged in research in their fields, and many have relevant business experience as well. Adjunct faculty come to Rider from the ranks of executives from major corporations and thought leaders in business and service organizations.

Graduate Degree Programs and Certificate Summary

Introduction

The College of Business Administration offers five degree programs and a certificate program that provide individuals seeking a graduate degree in business or accounting with options to fit their career goals. The various programs offer students the flexibility to balance school with on-going professional and life demands. Whether a student is a full-time professional wanting to complete the degree on a part-time basis or is looking to pursue a degree on a full-time basis, there is a program and a mode of delivery to suit every students' needs.

The Master of Accountancy (MAcc)

The MAcc program prepares individuals for a flexible career path and, ultimately, leadership positions in the accounting profession. Those students who wish to pursue a career in public accounting will develop specialized technical competencies to meet the 150 credit-hour requirement for licensure. Accounting career paths in corporate, financial or governmental sectors are facilitated through the core curriculum and specialized elective courses. The comprehensive curriculum focuses on development of analytical and professional skills necessary for success in today's global business environment.

Required courses emphasize an integration and synthesis of accounting theories and concepts. Course work assumes that students have established a basic foundation level of accounting at the undergraduate level. Students without an undergraduate accounting degree are required to complete preliminary courses prior to beginning the MAcc core curriculum.

Students have the option to personalize their MAcc degree by creating a skill set from a menu of MBA and MAcc electives. Students may also elect to concentrate in one of the following areas: finance, business analytics, global business, or fraud and forensic accounting.

Graduate accounting courses are offered in the evening, Monday through Thursday, in the fall, spring and summer semesters, with some courses offered in the late afternoons, and online. While most students pursue the program on a part-time basis, courses are scheduled to allow a student to fast track a degree full-time by enrolling in up to four courses each semester.

Please see the MAcc website at www.rider.edu/macc (<http://www.rider.edu/macc>) for up-to-date information on the program and faculty.

The Online Master of Accountancy (OL MAcc)

Similar to the on-campus MAcc, the Online MAcc program prepares individuals for a range of careers in the accounting profession, using the online educational format. Students may enter the Online MAcc as part of a cohort, which begins every fall and follows a structured progression of courses and guarantees completion in 16-months. Students may also select to pursue the Online MAcc's flexible option, which begins any semester and allows students to go through the program at their own pace on a part-time basis. Students who have both academic and professional backgrounds in accounting can earn the same graduate degree as our on-campus Master of Accountancy.

The OL MAcc supports students in developing their competencies and knowledge to sit for the CPA examination in all states and to meet the education credit-hour requirements for licensure. Accounting career

paths in corporate, financial or governmental entities are facilitated through the core MAcc curriculum and specialized elective courses. These electives, built into the curriculum, include courses that address some of the required topic areas on the CPA examination such as Business Law and Governmental Accounting. In addition, in the Online MAcc program, students can achieve a concentration in fraud and forensic accounting.

Required courses emphasize an integration and synthesis of accounting theories and concepts. Course work assumes that students have established a basic foundation level of accounting at the undergraduate level.

The Online MAcc program requires an online orientation before a student can begin in the program. Students in the cohort option follow a set course schedule, which is shown in the detailed curriculum description, allowing them to complete their program on a part-time basis over 16 months with no tuition increases for the duration of their program.

Please see the Online MAcc website at www.rider.edu/onlinemacc (<http://www.rider.edu/onlinemacc>) for up-to-date information on the program and faculty.

The Master of Business Administration (MBA)

The MBA program prepares individuals for career advancement as business professionals, managers and leaders of organizations. Structured around contemporary business knowledge and the development of strong analytical and leadership skills, Rider has developed a forward-looking MBA program built on a long tradition of business education excellence. The curriculum provides a distinctive and effective business learning environment that emphasizes advanced business theory, interpersonal and communication skills, cross-functional integration of business theory and practice, and the ability to manage in a changing environment.

MBA program flexibility is supported by a variety of MBA and MAcc electives. MBA students have the option to pursue a general MBA that allows them to select graduate level business electives based on individual professional needs. Students also may elect to concentrate in one of the following areas: business analytics, finance, or global business. Additionally, MBA students with an undergraduate accounting education can complete a concentration in forensic accounting.

Graduate business courses are offered in the evening, Monday through Thursday, in the fall, spring and summer semesters and online. While most students pursue the program on a part-time basis, courses are scheduled to allow a student to fast track a degree full-time by enrolling in up to four courses each semester.

Please see the MBA website at www.rider.edu/mba (<http://www.rider.edu/mba>) for up-to-date information on the program and faculty.

The Online Master of Business Administration (OL MBA)

The Online MBA program prepares individuals for career advancement as business professionals, managers and leaders of organizations, offering the same high quality graduate degree as our on-campus MBA, but in a flexible, online educational format.

Course work assumes that students have established a basic foundation level of business courses at the undergraduate level. For those students who do not have this foundation, pre-program courses are available in an

online format to satisfy this requirement before joining a cohort to begin the Online MBA curriculum.

The Online MBA courses may be completed within a 12-month period for full-time students and in as little as 21-months for part-time students.

An online orientation is required for all students entering the program. A sample course schedule is shown in the detailed curriculum description.

Please see the Online MBA website at www.rider.edu/onlineMBA (<http://www.rider.edu/academics/colleges-schools/college-business-administration/graduate-business-programs/online-mba-master-of-business-administration>) for up-to-date information on the program and faculty.

The Executive Master of Business Administration (EMBA)

The Executive MBA program is a cohort-based program for experienced business professionals that offers courses in an accelerated program format across 14 months. Classes are held on Saturdays and selected Friday evenings so students can continue to work full-time. Students enter the program, complete classes and graduate with the same integrated group of up to 25 students. The program consists of two parts: the first part sets expectations concerning what it means to operate at an executive level and then delivers a solid foundation in business concepts and basic leadership and team skills. The second part of the program provides advanced executive sessions on a variety of current business topics of relevance to today's executive. A personal, professional coaching program called Leadership Edge also is included in the curriculum.

In addition, there is a seminar on international business, which includes up to two weeks of travel in a key economic region of the globe. Other program highlights include: learning advanced business theory from the faculty while receiving practical insights from executives who work alongside the faculty in the classroom.

Please see the Executive MBA website at www.rider.edu/emba (<http://www.rider.edu/emba>) for unique admission requirements, program schedules and other relevant information.

Business Analytics Graduate Certificate Program

The Graduate Certificate Program in Business Analytics has been developed in response to the overwhelming demand from corporations and organizations for employees with skills and knowledge of technologies, applications and processes to analyze data in order to better inform the decisions of the organization. This skill set is applicable in all aspects of business including finance, marketing, accounting and operations. Designed with the valuable input of executives in the field of analytics, the program is endorsed by SAS Institute, the leader in business analytics software and services.

Rider's Graduate Certificate Program in Business Analytics allows students to follow one of two tracks:

- one for business professionals (<http://www.rider.edu/academics/colleges-schools/cba/graduate-business/business-analytics-certificate/business-professionals-track>)
- one for Information Technology (IT) professionals (<http://www.rider.edu/academics/colleges-schools/cba/graduate-business/business-analytics-certificate/it-professionals-track>) with advanced skills in programming, data management and a working knowledge of SAS software.

The program, comprised of five graduate level courses, is structured so it can be completed within one year on a part-time basis. Students can start the Certificate in any semester, with courses being taught in the evenings on Rider's Lawrenceville campus and online.

Please see the Business Analytics Graduate Certificate Program website at www.rider.edu/businessanalytics (<http://www.rider.edu/academics/colleges-schools/college-business-administration/graduate-programs/business-analytics-certificate>) for unique admission requirements, program schedules and other relevant information.

Policies

Admission Requirements

MBA, MAcc, and Online MAcc

No decision is made on an application for admission to the graduate programs of business administration until all required documents have been submitted. These include a completed application form, the \$50 application fee, official notification by GMAC as to the score achieved on the Graduate Management Admissions Test (GMAT), your resume, statement of aims and objectives, and an official transcript from every institution of higher learning attended. To be admitted to the programs, an applicant must show evidence that he or she has earned a bachelor's degree or equivalent from an accredited institution of higher learning and has the potential to perform satisfactorily at the graduate level. The primary criteria used in making admission decisions are the undergraduate grade point average, the score achieved on the GMAT, professional experience, and graduate level GPA (if applicable). The Graduate Record Examination (GRE) is acceptable as an admissions examination in place of the GMAT.

MBA Applicant GMAT/GRE Waiver Guidelines

MBA applicants who meet one of the following criteria established by the Rider University College of Business Administration would qualify for a waiver for the standardized test requirement (GMAT or GRE):

1. Has graduated from an AACSB accredited business program AND has one of the following:
 - a. a minimum cumulative undergraduate GPA of 3.3;
 - b. a minimum cumulative undergraduate GPA of 3.0 with 3 years of professional experience;
 - c. 5 or more years of professional experience.

NOTE: Graduate Admissions and the Associate Dean of Graduate Programs of the College of Business Administration will evaluate an applicant's professional experience.
2. Has been inducted into Beta Gamma Sigma.
3. Has passed the CPA certifying exam.
4. Has earned a master's degree or higher with a cumulative GPA of 3.0 or higher from a program that is accredited in its discipline (e.g., NCATE for education, ABET for engineering.)
5. Has earned a graduate certificate in a business-related discipline from an accredited institution with a minimum GPA of 3.3.
6. Has earned a Ph.D. from an accredited university in the United States.
7. Has been admitted as a non-matriculated student (see below for description of this academic standing) into a Rider University graduate business program and has completed 12 credit hours of graduate business coursework with a cumulative GPA of 3.3 with no grades below a B.
8. Has completed a minimum of 90 credits at an AACSB accredited institution with a minimum cumulative GPA of 3.3. Such applicants

will be granted conditional acceptance into the MBA program. The conditions of admission are to complete their undergraduate program and maintain a minimum GPA of 3.3. After these conditions are met, applicants will be fully admitted into the MBA program.

9. Is a student in Rider's 3+1 or 4+1 program in business administration with the benefit of fixed tuition and has a GPA of 3.3 overall.

MAcc Applicant GMAT/GRE Waiver Guidelines

MAcc applicants who meet one of the following criteria established by the Rider University College of Business Administration would qualify for a waiver for the standardized test requirement (GMAT or GRE):

1. Passed the CPA certifying exam
2. Hold a Ph.D. from an accredited university in the United States.
3. Passed the CMA exam.
4. Have completed at least 90 undergraduate credits in an accounting program from a U.S. AACSB-accredited university in the last five years AND at the time of application, have an overall GPA of at least 3.3 and a 3.3 GPA in accounting. Students who meet the criteria will be accepted conditionally into the MAcc program. The conditions of admission will be to maintain the minimum GPA requirement throughout the remainder of the undergraduate program and successfully complete the undergraduate program. After the conditions are met, students will be formally admitted into the MAcc. Accounting graduates, who meet the above criteria, will be directly admitted to the MAcc program.
5. Is a student in Rider's 3+1 or 4+1 program in accounting with the benefit of fixed tuition and has a GPA of 3.3 overall.
6. Is an accounting student at Rider, not in the formal 4+1 or 3+1 program, with a GPA of 3.0 overall and in accounting.

International students are required to present evidence of completion of a university degree equivalent to, or higher than, a bachelor's degree in the United States. A program equivalency evaluation by a recognized evaluation service is required. World Education Services (<http://www.wes.org>) in New York City is suggested for this service. International applicants must also provide a notarized financial resource statement or notarized bank statement demonstrating their ability to pay the total cost of program attendance at Rider.

If a student is conditionally admitted, (i.e., not satisfying one of the requirements above), he/she has no more than four months to satisfy the conditions. An exception to satisfying the conditions can only be approved by the Associate Dean of Graduate Programs.

EMBA

To qualify for the program, you must demonstrate the following:

Academic Background

- Bachelor's degree from an accredited university;
- Minimum 3.0 GPA (if the student's GPA is less than 3.0, the GMAT may be required.)

Business-Related Background

- Full-time employment;
- Minimum five years of work experience;
- Three years managerial/supervisory experience;
- Two work-related recommendations (employer or another business-related source.)

Interview

- Students will also have a personal interview with the EMBA Program Director to assess their academic and professional qualifications and readiness for the program.

Admission Classifications

Each student admitted to the MBA or MAcc program is assigned to one of the following classifications:

Full Standing

Students who have full standing are permitted to register for any pre-program courses that have not been waived or for certain breadth courses, if those courses are needed by the student.

Special

Special student status is granted to those students enrolled in a graduate program at another institution who have been granted permission to take graduate business courses at Rider.

Non-matriculated MBA and MAcc Students

Students are allowed to take up to a total of 12 credit hours (a maximum of 6 credit hours in any one semester or summer session, a total of 12 in one and one-half years) as non-matriculated students if they meet ONE of the following criteria:

- They have had two years of work experience after the completion of their undergraduate studies and they have achieved a 3.0 GPA in their last 60 credits hours or a 3.0 overall GPA for their undergraduate degree at an accredited university;
- They four or more years of professional work experience, as assessed by the Associate Dean for Graduate Programs.

Non-matriculated students must meet the prerequisites for the specific classes they take and they may not take classes that could be waived if they were admitted to the program.

At any point up to four years after successful course completion (defined as "B" or better), should the student decide to apply to the MBA or MAcc program and be accepted, these courses will be "transferred" and count towards the completion of the degree.

For any student who achieves a 3.3 or higher for the twelve (12) credit hours of CBA graduate course work completed as a non-matriculated student, with no grades below a B, we will waive the GMAT (or GRE) requirement, and evaluate their admission to our program based on their professional and academic record.

Non-Degree Students

Prospective students may take MBA classes as non-degree students under the following conditions:

- graduated with an undergraduate degree from an accredited university with a minimum 3.0 GPA OR has earned a graduate degree
- meets prerequisite requirements for desired course(s).

Non-degree students will only be allowed to take 9 credits in the graduate business program. If a non-degree student desires to take more than 9 credits in the graduate business program, he/she will need to fully apply to the program.

Executive MBA students are admitted as "full standing" only.

Transfer of Courses

A student may request the transfer of a graduate course taken at an AACSB-accredited institution. Such a request may be granted if the course was taken within the past three years, was passed with a grade of "B" or higher, and was taken before admission to the MBA program at Rider. Once a student has been admitted to the program, graduate courses taken at other AACSB-accredited institutions must have prior approval of the Associate Dean for Graduate Programs before transfer credit will be allowed. A maximum of six semester hours of transfer credit may be granted for application against the elective requirements. No academic credit will be granted for corporately-sponsored management or professional development courses.

As the EMBA program is cohort-based, the transfer of courses does not apply.

Advising

The Academic Coordinator of Graduate Programs is the advisor to students in the MBA and MAcc programs and tracks program progress. The Director of the Executive MBA Program is the advisor to the EMBA students. Students are also encouraged to contact members of the faculty and the program's executives-in-residence for career and related advising.

Note: The most significant policies and procedures for the graduate business programs are covered in this catalog. Questions and issues not addressed here default to *The Source* and other University-wide policy statements.

Course Repeat Policy

With the written permission of the Associate Dean for Graduate Programs, MBA and MAcc students may repeat graduate courses for which they received grades of "C+" or lower. Both grades will appear on the student's transcript, but only the second grade will count in the GPA.

Academic Integrity

Students are expected to conduct themselves professionally and with the highest standards of academic integrity. See Rider's Code of Academic Integrity (p. 1036) in this catalog for further information.

Dismissal

Rider University reserves the right to dismiss any student when, in the judgment of the faculty or officers of Rider, such action seems advisable. A student in a graduate business program will be subject to dismissal based on academic standing for any of the following reasons:

- Receiving more than two grades of "C+" or below in graduate-level work;
- Completing graduate course work with a cumulative grade point average of less than 3.0; or,
- Failure to complete the MAcc or MBA program in the required six years.

In all cases of dismissal, graduate business students have the right of appeal. Academic standing dismissal is a progressive process with student participation and advising designed to help students regain good academic standing. Students approaching the six-year time limit to complete the MBA or MAcc may request a time limit extension prior to actual dismissal. The request should be based on unique work requirements, personal, or other reasons. Time limit appeals will be

reviewed and acted on by the Associate Dean for Graduate Business Programs.

Honors Graduates

Students who graduate with an overall grade point average of 3.85 or better are designated as graduating with distinction. This term appears on the student's official transcript, below the student's name in the commencement program and on the diploma.

Graduation Requirements and Application

To graduate from the MAcc or MBA program, students must have completed all of the course requirements as described above, within the six-year time frame, and have a cumulative Grade Point Average (GPA) of 3.0 or above. In addition, a candidate for graduation:

- Cannot have received more than two grades of "C+" or below; or,
- Cannot have any grades below a "C."

A student who expects to graduate must complete and file a degree application form no later than the date indicated on the calendar for each semester, found at the front of this publication.

Undergraduate Students Taking Graduate Business Courses

Seniors enrolled in any business major can take one or two graduate business courses (MBA or MAcc) in their senior spring (or equivalent) semester if the following conditions are met:

For taking an MBA course:

- Students must have at least a 3.5 GPA;
- Students may take an elective or MBA breadth course if all prerequisites have been met.

For taking a MAcc course:

- Students must have at least a 3.3 GPA or higher;
- Students may take either MACC 654 or a MAcc elective, if all prerequisites have been met.

A graduate business course taken as an undergraduate can fulfill the requirements of only one program, either graduate or undergraduate. There is no "double dipping" of coursework between graduate and undergraduate programs. Permission to take such courses will be granted by the Associate Dean for Graduate Business Programs based on a review of a student's academic record.

Business Analytics Graduate Certificate Program

Program Overview

Rider's Graduate Certificate program in Business Analytics helps business professionals develop the skills and gain the knowledge of the technologies, applications and processes used by organizations to analyze data and drive their decision making across all aspects of business including finance, marketing, accounting and operations.

Endorsed by SAS (http://www.sas.com/en_us/home.html?gclid=CLPH-MX7m8UCFuk6gQodGTEAvg&keyword=sas&matchtype=e), the leader in business analytics software and services, this certificate program has been designed with the valuable input of executives in the analytics field to ensure that the program meets the needs of employers.

Curriculum Overview

Rider's Graduate Certificate Program in Business Analytics allows students to follow one of two tracks:

- one for business professionals (<http://www.rider.edu/academics/colleges-schools/cba/graduate-business/business-analytics-certificate/business-professionals-track>)
- one for Information Technology (IT) professionals (<http://www.rider.edu/academics/colleges-schools/cba/graduate-business/business-analytics-certificate/it-professionals-track>) with advanced skills in programming, data management and a working knowledge of SAS software.

Each track requires five graduate-level courses (15 credit hours) that are highly applied in nature, integrating project-based learning, simulations, case studies, and field experience with industry partnerships.

The program is structured so it can be completed within a year on a part-time basis. Students can start the certificate in any semester and courses are taught in the evening on Rider's Lawrenceville campus and online.

Completion of the Certificate

To complete this certificate program, students must meet the following requirements:

- Overall GPA of 3.0 in the Business Analytics Certificate Program; and,
- Cannot have any grades below a "C".

Current MAcc or MBA students at Rider

Current MAcc and MBA students can easily work the Business Analytics Graduate Certificate Program into their graduate degree program. Please contact the Academic Coordinator to plan how the Business Analytics Graduate Certificate will fit into your MBA or MAcc program.

Associated Department: College of Business Administration, Graduate Programs (<http://www.rider.edu/academics/colleges-schools/college-business-administration/graduate-business-programs>)

Program Requirements

The Business Analytics Graduate Certificate allows students to follow one of two tracks; one for business professionals and one for information technology (IT) professionals with advanced skills in programming, data management, and a working knowledge of SAS software. Each track requires five graduate-level courses (15 credit hours.)

Business Professionals Track

Code	Title	Credits
PMBA 8051	Fund of Statistical Analysis ¹	3
PMBA 8312	Business Intelligence Tech-Data Mining	3
PMBA 8317	Applied Data Mgt for Bus Users	3
PMBA 8357	Bus Analytics for Managers	3
PMBA 8380	Business Analytics Optimizatio	3
Total Credits		15

¹ PMBA 8051 may be waived if the student meets one of the following requirements:

- Earn a grade of "B" or better in statistics coursework equivalent to Rider's MSD 200 - Statistical Methods I and MSD 201 - Statistical Methods II at an accredited four-year institution within six years prior to the semester admitted; OR
- Complete PMBA 8051 Fundamentals of Statistical Analysis with a grade of "B" or better.
- Students in the IT track must be proficient in the use of SAS in the foundation statistics course(s).

Information Technology Professionals Track

Code	Title	Credits
PMBA 8051	Fund of Statistical Analysis ²	3
PMBA 8312	Business Intelligence Tech-Data Mining	3
PMBA 8317	Applied Data Mgt for Bus Users	3
PMBA 8357	Bus Analytics for Managers	3
PMBA 8902	Independent Studies in Business Adm. ¹	3
Total Credits		15

¹ This independent study in Business Analytics will teach students to write SAS programs, to manipulate data using SAS DATA and the procedure steps to access, transform, and summarize SAS data sets. The course also provides a review of the five exam content areas in the SAS Base Programmer Certification Exam, including importing and exporting raw data files; manipulating and transforming data, combining SAS data sets, creating basic detail and summary reports using SAS procedures, and identifying and correcting data syntax and programming logic errors.

² PMBA 8051 may be waived if the student meets one of the following requirements:

- Earn a grade of "B" or better in statistics coursework equivalent to Rider's MSD - 200 - Statistical Methods I and MSD - 201 - Statistical Methods II at an accredited four-year institution within six years prior to the semester admitted; OR
- Complete PMBA 8051 Fundamentals of Statistical Analysis with a grade of "B" or better.
- Students in the IT track must be proficient in the use of SAS in the foundation statistics course(s).

Certificate Completion

To complete the BA Certificate Program, students must meet the following requirements:

- Overall GPA of 3.0 in the Business Analytics Certificate Program;
- Cannot have any grades below at "C".

Business Analytics Graduate Certificate Program Policies

Prerequisites

To be admitted to the Business Analytics Graduate Certificate Program in either track, students must meet the following requirements:

1. **Completion of at least a bachelor's degree or equivalent from an accredited institution of higher learning with a GPA of 3.0 or better.**
2. **Demonstrated technology proficiency by satisfying ONE of the following conditions:**
 - Earn a grade of "B" or better in course work equivalent to Rider's CIS 185 Information Systems Essentials at an accredited four-year institution within six years prior to the semester admitted; OR
 - Complete PMBA 8010 Information Technology Proficiency with a grade of "B" or better; OR
 - Take the proficiency exam for PMBA 8010 with a grade of "B" or better.

Courses and Descriptions

PMBA 8051 Fundamentals of Statistical Analysis 3 Credits

Covers basic statistical techniques useful in business decision making. Includes descriptive statistics, event probability, random variables, sampling distributions, regression analysis and topics in statistical inference.

Prerequisite(s): MSD 105 (or equivalent).

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered. This course applies to the Business Analytics, Forensic Accounting and Fraud & Forensic Accounting concentrations. This course applies to the graduate certificate in Business Analytics.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

PMBA 8357 Business Analytics for Managers 3 Credits

Business Analytics, the data driven approach to management, is essential to achieve effective business decision-making and competitive advantage. All business managers need to analyze data and make quantitative-based decisions in their business careers. The focus of this course is to equip students with a variety of data analysis methods and tools that are useful to uncover trends, patterns, relationships, and other useful information. The course will take a hands-on, example-based approach and introduce fundamental concepts as they are needed. Students will be using both Excel and SAS software. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

PMBA 8380 Business Analytics Optimization 3 Credits

This course has been designed to provide professional MBA students with the current knowledge and practice of optimization business analysts use. Optimization aims at selecting the best alternative from among available alternatives according to a predetermined objective. In general it involves building a mathematical model and finding the best alternative through a mathematical procedure. Optimization techniques help decision-makers make fact (i.e. data) based decisions and offer the potential of making significant profits or cost savings. The main focus of this course will be on developing modeling skills to gain insight into a wide variety of business decision problems. In other words, the emphasis in this course will be on modeling practical business decision problems, use of relevant software for optimal solution, interpretation of results, and sensitivity analysis rather than the theory of mathematical solution techniques. Coverage of course material will follow the typical sequence of (1) identification and discussion of a business decision problem; (2) developing a graphical model (e.g. influence diagram); (3) developing a mathematical model; (4) computer solution; (5) interpretation of results and sensitivity analysis; (6) discussion of insights gained from the experience; (7) discussion of implementation issues. In addition, heuristics will be discussed when optimization techniques are not available or too costly. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

Prerequisites: PMBA 8010 and PMBA 8051.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study. Prerequisite(s): Completion of MBA pre-program courses and permission of the associate Dean of Graduate Programs.

NOTE: PMBA 8902 Independent Study in Business Administration will be in Business Analytics and will involve teaching students to write SAS programs, manipulate data using SAS DATA and procedure steps to access, transform, and summarize SAS data sets. The course also provides a review of the five exam content areas in the SAS Base Programmer Certification Exam, including importing and exporting raw data files; manipulating and transforming data, combining SAS data sets, creating basic detail and summary reports using SAS procedures, and identifying and correcting data syntax and programming logic errors.

Executive MBA (EMBA)

Program Overview

The Executive MBA is a 46.5-credit, 14-month program taught in an integrated group setting. While there are many students with undergraduate business degrees in the EMBA program, it is especially appropriate for individuals who have non-business educational backgrounds and those who are transitioning to positions requiring higher levels of business, management, and leadership skills. A key goal of the program is to emphasize application of the information and skills being taught; therefore, students will find this emphasis throughout all aspects of the program.

The program consists of two parts: the first part sets expectations concerning what it means to operate at an executive level and then delivers a solid foundation in business concepts and basic leadership and team skills; the second part provides “advanced executive sessions” on a variety of current business topics of relevance to the business executive.

The EMBA program also has multiple coaches who work with students individually throughout the 14-month program to develop essential management, leadership, time management, stress management, and personal career development skills.

Waiver of Program Coursework

There are no course waivers granted for the EMBA program.

Executive-in-Residence Program

Successful business executives, each with their own specialization, are brought in to work alongside Rider faculty to lend their personal insight to classroom discussion during several of the courses in the “advanced executive session” portion of the program.

International Experience

The international experience includes up to two weeks traveling in one or more countries around the world. The actual location for each integrated group is partially dependent upon the interests and needs of the group. Through a series of site visits, the group will meet with business leaders, develop relationships with overseas firms, and get a up-close look at how business is handled in some of the world’s most dynamic markets.

Cost

The cost of the program is all-inclusive, covering tuition, food, fees, and the international study experience. Students have the option of purchasing their own textbooks or paying the College of Business Administration to purchase all books on their behalf.

Application Procedures

To apply for admission to the Executive MBA program, the procedures are:

- Obtain and complete an application for admission from the Office of Graduate Admission or online at www.rider.edu/gradadmission (<http://www.rider.edu/gradadmission>).
- Return or submit electronically the application with your resume, statement of aims and objectives, and the nonrefundable \$50 application fee to the Office of Graduate Admission.
- Submit two work-related recommendations (employer or another business-related resource) to the Office of Graduate Admission.
- Arrange to have an official transcript(s) sent to the Office of Graduate Admission from every institution of higher learning attended (including Rider University). A transcript should be sent even if only one course was taken at the institution. Only official transcripts will be accepted. Transcripts sent to the student are not acceptable unless they are sealed in the original envelope when received by the Office of Graduate Admission.
- International students are asked to have their transcripts evaluated (and translated, if necessary) for program equivalency by a recognized credential evaluation service. World Education Services in New York City is suggested for this evaluation.
- For international students, a notarized financial resource statement or notarized bank statement is required to demonstrate the student’s ability to pay the total cost of attendance.
- Upon submission of all application materials, applicants will be asked to take part in an admissions interview with the Director of the Executive MBA Program.

Application Deadlines

The application deadline for application to the EMBA program is July 1. Applications received after the official deadlines may be given consideration at the discretion of the College of Business Administration.

EMBA 9001 Top Management Perspective 3 Credits

This team-taught course will serve as the initial course of the EMBA program. The course will take place over three weekends. Top managers will also attend and provide their perspectives to students and faculty in attendance. This course will explore the “art” of case study analysis. Students will focus on identifying, analyzing, and resolving issues from a top management perspective. This course will consider various issues confronted by top managers and heavily emphasizes contemporary cases that illustrate a wide range of management issues. By having the course team-taught by a faculty member and an Executive-in-Residence, both the academic and applied aspects of business will be represented in the classroom. This sets the tone for the approach and philosophy of the entire program - a blending of business theory with real world application. Another of the course’s purposes is to allow the students to get to know one another, become acquainted with the faculty who will be teaching in the program, and receive an overview of the material that will be covered.

EMBA 9220 Financial Accounting 3 Credits

This course provides a managerially-oriented focus on the aspects of financial accounting most relevant to business decision makers. Students will develop the ability to read, analyze, and interpret financial information for decisions regarding operating, investing, and financing activities as well as serving as a foundation for more advanced analysis in areas such as credit and equity decisions.

EMBA 9230 Economics Principles 1.5 Credits

This course focuses on how markets work in different settings (structures). The course begins by establishing basic relationships between consumer behavior and demand, and production costs and supply. The remainder of the course focuses on profit-maximizing strategies in different market structures (perfect competition, monopoly, and imperfect competition). Also, this course provides an introduction to the basic economic concepts to prepare students for EMBA 9231, Economic Analysis and Decision Making.

EMBA 9231 Economic Analysis and Decision Making 3 Credits

This course focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

EMBA 9240 Corporate Finance 3 Credits

This course introduces modern corporate finance principles that today’s managers should know. Its purpose is to give students a thorough introduction to the theory and practice of financial management. The course reviews the principles executives need to acquire to manage for value creation. Topics covered include valuation of securities, capital budgeting, cost of capital, capital structure, and value-creating decisions in a global environment.

EMBA 9250 Statistical Analysis for Bus 3 Credits

This course introduces students to basic concepts and methodologies in probability theory and statistics. Emphasis is on real-world application of reasoning techniques used for interpreting data for decision criteria of managerial decision making. Topics include probability, variables, estimation, hypothesis, regression, and sampling. Concepts of learning are facilitated through real-world practices.

EMBA 9251 Service/Product Management 3 Credits

This course focuses on the issues, concepts, skills, and techniques related to the management of operations of organizations. Students are introduced to various techniques of operations research and management science as they are applied to decision making in the management of operations. Topics include productivity, supply chain management, manufacturing strategies, and competitiveness.

EMBA 9260 Strategic Marketing 3 Credits

The focus of this course is to provide students with the analytical skills required to understand and assess complex marketing situations in order to develop and implement appropriate marketing strategies. Identifying individual case factors and understanding the relationship between developments of strategies is emphasized. Students will apply the material using real-world cases faced by organizations.

EMBA 9270 Management/Team Skills 3 Credits

This course is based on the assumption that management and team skills can be learned. To learn skills requires active involvement in the classroom exercises and many learning opportunities come from group activities. To develop these skills, students will need to set personal goals and experiment with new behavior. This course will involve a variety of in-class exercises including self-assessments, interpersonal activities, and a team project.

EMBA 9271 Leadership 3 Credits

This course has been designed to provide students with an understanding of leadership from both a scholarly and a practitioner perspective. The purpose is to help students understand what it means to be a leader in general and in the current business environment specifically. Students will be encouraged to consider their own leadership aspirations, to observe others in leadership roles, and to test their own leadership acumen.

EMBA 9301 Corp Governance Legal Ethical Issues 3 Credits

This team-taught course provides an overview of corporate governance. The governance structure specifies the distribution of rights and responsibilities among different participants in the corporation, such as the board of directors, managers, shareholders, and other stakeholders. In this course, students will discuss the importance of corporate governance and the roles of various stakeholders in the governance structure. Conflicts of interest that arise between the stakeholders and approaches to mitigate those conflicts will be a central focus of the course. Because corporate governance plays an integral role in creating a culture in which ethical behavior is the norm, this course will also focus on identifying, analyzing, and resolving ethical dilemmas in business. The course will consider ethical issues confronted by managers and heavily emphasizes contemporary cases that illustrate a wide range of ethical issues.

EMBA 9302 Corporate Performance Evaluation 3 Credits

This team-taught course emphasizes to executives that shareholder value creation should be an enduring focus of concern because value is the foundation of survival and prosperity for the enterprise. The course introduces multiple perspectives in evaluating the performance of the firm. Among them are management control systems, financial statement analysis, cash flow analysis, and the balanced score card (BSC) including Economic Value Added. The nature of these approaches to evaluation draws from the disciplines of accounting and finance. Structuring the course as a team-taught course in which instructors from both of these disciplines will be present helps to ensure that students will receive a comprehensive and integrated understanding of the course topics. Students will experience using real-world cases in evaluation.

EMBA 9303 Intl Bus Seminar W/ Travel Exp 3 Credits

The purpose of this course is to examine the intricacies of conducting business internationally. With each offering, the course will focus on parts of the world where emerging economies are becoming influential players in international business. Examples of these emerging economies include China, South America, Argentina and Chile in particular, and Eastern Europe or Southeast Asia. The influence of external forces resulting from the socio-cultural, economic, technological and political aspects of the macro-environment will be examined. The competitive environment will be examined from the perspective of both multinational and domestic corporations. Finally, consideration will be given to the corporate level strategies and the functional operation of these corporations as they compete for market share, financial investment and human resources.

EMBA 9309 Special Topics 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9310 Information Technology and Management 3 Credits

This course enables current and future senior executives to gain a strategic perspective of information technology resources within the organization. The focus is on opportunities and challenges associated with managing technological resources as well as how the effective management of information technology can improve competitive positioning and operational performance. Course format will be a combination of lectures, guest speakers, case studies, and hands-on exercises. Experiential learning opportunities will allow students to work with real-world case studies using relevant technologies.

EMBA 9362 Product Development and Commercialization 3 Credits

The purpose of this course is to provide an in-depth overview of the Product Development and Commercialization (PD&C) process. This will be done through the analysis of cases that describe actual PD&C as well as innovation problems faced by a variety of organizations (e.g. consumer, health care service). Topics covered include innovation funding, opportunity analysis, common PD&C challenges and issues, and the interface among various disciplines to achieve best-in-class PD&C strategies.

EMBA 9880 Strategic Management: a Capstone Course 3 Credits

The capstone course focuses on the elements required to make effective strategic decisions in organizations with reference to the impact these decisions have on all stakeholders. The purpose of this course is to provide students with an understanding of the strategy process through an analysis of how a firm develops a mission, vision, and establishes a sense of purpose while simultaneously monitoring the external environment for emerging opportunities and threats. Topics focus on real-world cases, the evolution of strategic management processes, and strategies for a global world.

EMBA 9900 Leadership Edge 0 Credits

This course is structured as pass/fail. It provides students at, or aspiring to, executive positions within their organization's career, leadership and management development with a real-time, practical approach to leadership. This differentiator and developmental component is referred to as "The Leadership Edge." Students will reflect on self-assessments completed as part of the program. They are then able to leverage the Leadership Edge experience by pursuing different methods of developing career, leadership, and management competencies to fill identified gaps. Opportunities for development are met through group sessions and student participation in individual (private) coaching or group seminars to discuss personal career and organizational situations. The choice of which avenue is taken (individual or group) is made on an integrated group basis.

EMBA 9906 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9907 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9908 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9909 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Master of Accountancy (MAcc)

Program Overview

The Master of Accountancy develops technical skills and competencies for a successful career path and meets the 150 credit-hour requirements for CPA licensure. Students may choose to develop a career path in public accounting or in accounting for corporate, financial or governmental entities through elective course offerings.

Most full-time students enter the MAcc directly after completing their undergraduate degree and take sections of the CPA exam during their graduate studies. Most part-time students in the program are employed in professional or managerial positions and bring business experience to share. In addition, there are numerous internship opportunities for MAcc students.

Curriculum Overview

Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well. The program has earned the AACSB Accounting accreditation, the international standard of excellence in accounting and business education that is held by less than 3% of accounting programs worldwide.

Classes are offered in the evening, Monday through Thursday, with some afternoon and online sessions. All pre-required courses are offered during the fall, spring and summer semesters. Students can pursue the MAcc on a full or part-time basis.

Students may also select electives to concentrate in a particular area of interest, though concentrations are not required. This approach allows MAcc students to customize their degree.

Degree Offered

Master of Accountancy

Associated Department: Department of Accounting

Related Concentrations

- Business Analytics (p. 27)
- Finance (p. 38)
- Forensic Accounting (p. 140)
- International Business (p. 66)

Master of Accountancy Program Requirements

The MAcc program consists of 30 semester hours at the graduate level, (MAcc and PMBA only). At least fifteen semester hours are in accounting courses and the remaining semester hours are to be taken as MBA or MAcc electives. Please refer to the MBA course descriptions for a listing of PMBA elective courses. MAcc students may elect to use both MAcc and MBA electives to create concentrations. See the "Concentration" section provided in this catalog. Required graduate accounting courses

are offered each semester. Graduate accounting electives are typically offered on a three-semester rotational basis. Students may also be required to take an additional 27 credit hours of pre-program requirement based on their educational and professional experience.

Code	Title	Credits
Upper Level Required Accounting Courses		
MAcc 650	Seminar in Federal Taxes	3
MAcc 652	Analysis of Accounting Data	3
MAcc 654	Issues in Financial Reporting	3
MAcc 656	Interntnl Dimensions of Acct	3
Elective Courses		
Students must take 18 credit hours of graduate business electives (MBA and MAcc) with at least one MAcc elective from those listed below.		18
MAcc 658	Govt & Not for Profit Acctng	
MAcc 662	Auditing Practice & Problems	
MAcc 663	Fraud and Forensic Accounting	
MAcc 664	Issues in Managerial Accountng	
MAcc 665	Fraud Detection and Deterrence	
MAcc 667	Bus Val:fund, Tech & Theories	
MAcc 670	Accounting Internship (requires prior approval of the Accounting Department Chairperson)	
MAcc 690	Special Topics: Entrp Risk Mgt	
Total Credits		30

Note: Because Rider has earned AACSB Accounting accreditation, students who graduate with the MAcc degree are deemed to have met educational requirements to sit for the CPA exam in any state. We strongly encourage students planning to take the exam to consider the following elective courses: Business Law (PMBA 8491), Govt & Not for Profit Acctng (MAcc 658), Issues in Managerial Accountng (MAcc 664) and Auditing Practice & Problems (MAcc 662).

Preliminary Requirements

MAcc students who hold an undergraduate degree in an area other than business will need to complete all of the Business Core Requirements and Accounting Core Requirements before taking any Upper Level Accounting Courses.

MAcc students who hold an undergraduate business degree in an area outside of accounting may be eligible to waive the Business Core Requirements but must complete the Accounting Core Requirements before taking any Upper Level Accounting Courses.

MAcc students who hold an undergraduate degree in accounting may be eligible to waive the Business Core Requirements and the Accounting Core Requirements.

Waiver of these courses follows the guidelines defined under the Waiver of Courses section.

Business Core Requirements

7.5 credits (for students with a non-business undergraduate degree or outdated course work that does not meet the waiver requirements). See the communications requirement noted below.

Code	Title	Credits
PMBA 8020	Fundamentals of Accounting	3

PMBA 8030	Economic Analysis	3
PMBA 8040	Basic Financial Principles	1.5
Total Credits		7.5

Business Writing Requirement

One objective of the MAcc program is to develop strong written communication skills. This will be done both formally, through a class for those not demonstrating a level of proficiency expected for business professionals, and informally for all students through faculty review of student-prepared course materials such as research reports, case study write-ups and papers.

Each student who enters the MBA or MAcc program must have their writing skills formally assessed in one of the following ways:

1. Through the writing portion of the GMAT or GRE. A score of 4.5 or better on the GMAT writing section or a score of 4 or better on the GRE Analytical Writing section would rate the student as proficient.
2. Through the Graduate Business Writing Assessment, a 30-minute test in which students write a passage in response to a prompt. The passage is graded using a rubric that assesses Voice/Tone; Organization; Ideas, Support and Development; and Grammar and Mechanics. Students must score a 3 (adequate) on all four of the writing elements for a passing grade.

Students who fall below the proficient levels as identified above on any of the specified assessments will be required to do one of the following:

- Complete a business/workplace writing course at a U.S.-accredited university. The student must achieve a "C" or better in the course, demonstrating basic proficiency. Courses must be approved by the Associate Dean for Graduate Programs. ENG 321 is not included as an approved course for this purpose.
- Retake either of the above assessments until a proficient level is reached. Students will be provided with a directory of resources to improve their business writing skills prior to retaking the assessments including Rider writing lab, online tutorials and not-for-credit courses.

Students need to satisfy the above requirement within the first 6 credit hours of taking breadth and elective courses in the graduate business program. Students who do not satisfy the above requirement within the specified time frame will not be allowed to take additional breadth or elective courses in the graduate business program until the requirement is satisfied; he or she may continue to enroll in pre-program courses.

Accounting Core Requirements

18 credits (for non-accounting business undergraduate degree or course work that does not meet the waiver requirements)

Code	Title	Credit
ACC 302	Cost Management	3
ACC 310	Acct Theory & Concepts I	3
ACC 311	Acct Theory & Concepts II	3
ACC 400	Principles of Auditing	3
ACC 405	Acct Problems & Practice	3
ACC 410	Fund of Federal Taxation	3
Total Credits		18

The Master of Accountancy (MAcc)–Waiver of Courses

A waiver of a course from the "Business Core Requirements" may be granted under the following conditions:

- If the student has graduated from an AACSB-accredited business program within five years prior to the semester admitted, and the student achieved a "B" or better in the equivalent course or sequence of courses.
- If the student has achieved a "B" or better in an equivalent undergraduate course (at an accredited four-year institution) or graduate course (at an AACSB-accredited university) within six years prior to the semester admitted.
- Based on a combination of education and work experience at the discretion of the Associate Dean of Graduate Programs.
- With the approval of the Associate Dean for Graduate Programs, students may take proficiency exams to test out of the Business Core Requirements courses if the above criteria are not met. A grade of "B" or better is required on the proficiency exams. Within the first year of matriculation, a student is able to take the proficiency exam once on one of the six specified dates. Students may not repeat any proficiency exams.

Waivers of courses for the "Accounting Preliminary Requirements" may be granted as outlined in the first two conditions above, provided the student receives a "C" or better for these courses. There are no waiver examinations for the "Accounting Preliminary Requirements" for the MAcc program.

When the MAcc "Accounting Preliminary Requirements" or the MBA "Pre-Program Requirements" are waived, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

The Rider MAcc is designed to be completed in one year by the student who has met all the prerequisite requirements with previous coursework in business and plans to attend the program on a full-time basis. The following educational plan is provided as a sample only. Each student, with the guidance from the Graduate Academic Coordinator, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
MAcc 650	Seminar in Federal Taxes	3
MAcc 654	Issues in Financial Reporting	3
MAcc Elective*		3
MAcc or PMBA Elective*		3
Semester Credit Hours		12
Spring Semester		
MAcc 652	Analysis of Accounting Data	3
MAcc or PMBA Elective*		3
MAcc or PMBA Elective*		3
MAcc or PMBA Elective*		3
Semester Credit Hours		12

Summer Semester

MACC 656	International Dimensions of Accounting	3
MAcc or PMBA Elective*		3
Semester Credit Hours		6
Total Credits		30

* Students planning to take the CPA exam should consider the following elective courses:

- MACC 662 Auditing Practice & Problems
- MACC 658 Governmental and Not-for-Profit Accounting
- PMBA 8491 Business Law
- MACC 664 Issues in Managerial Accounting

Students may also choose to earn a concentration by taking three of their electives in one of the following areas.

- Fraud and Forensic Accounting
- Business Analytics
- Global Business
- Finance

Courses and Descriptions

MACC 650 Seminar in Federal Taxes 3 Credits

The course is designed (1) to expand a student's tax research skills, (2) to examine tax compliance and basic planning concepts available to C corporations, S corporations, partnerships, gifts, estates, and trusts, (3) to explore the tax issues involved in the decision to select a particular form of business organization, (4) to provide an introduction to fundamental concepts of interstate, international, and New Jersey taxation, and (5) to expose the student to a variety of common tax returns, applicable to the above topics.

Prerequisite(s): completion of ACC 410 Fundamentals of Federal Taxation.

MACC 652 Analysis of Accounting Data 3 Credits

Employs appropriate information technology and analytical techniques to pursue data collection and analysis needs commonly faced by accounting professionals. Uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics. MACC 654 should be taken before this course.

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 654 Issues in Financial Reporting 3 Credits

Examines accounting theories and the development of a conceptual framework for financial reporting. Theoretical and conceptual assessments of current reporting issues pertaining to asset valuation and income measurement are addressed through cases, readings, and projects. Topics to be investigated from term to term vary depending on their importance and timeliness to the profession. This course should be taken first or early in the program.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MACC 656 International Dimensions of Accounting 3 Credits

This course examines the global applications of accounting principles and practices, including the relationship between international accounting issues and company strategy. Topics include theoretical and societal considerations of international accounting issues, the identification of transnational accounting practices, and attempts at harmonization.

Prerequisite(s): completion of the Preliminary Accounting Requirements; this course applies to the Global Business concentration.

MACC 658 Governmental and Not-for-Profit Accounting 3 Credits

This course provides an in-depth study of the concepts, objectives and techniques of the evolving field of accounting for nonprofit institutions and organizations. Areas emphasized include municipal and state governmental units, hospitals, colleges and universities and service organizations. Problems, cases and selected readings are employed.

Prerequisite(s): completion of PMBA 8020 or Preliminary Accounting requirements.

MACC 662 Auditing Practice & Problems 3 Credits

Uses cases to examine current auditing issues, including professional ethics, internal control, materiality and risk assessment. Students will complete a simulated audit from start to finish, including audit planning, audit fieldwork and preparation of an audit opinion.

Prerequisite(s): ACC 400 Principles of Auditing.

MACC 663 Fraud and Forensic Accounting 3 Credits

A course designed to provide a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

Prerequisite(s): completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

MACC 664 Issues in Managerial Accounting 3 Credits

Examines current management accounting practices with an emphasis on world class developments and strategic implications to the firm. Integrates current management accounting literature with considerations of planning, control, decision-making and information needs of the firm.

Prerequisite(s): completion of ACC 302 Cost Management or PMBA 8220 Strategic Accounting for Managers; this course applies to the Corporate Accounting for Managers concentration.

MACC 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

Prerequisite(s): MACC 663 and completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

A course in the fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

Prerequisite(s): completion of PMBA 8240 or the Preliminary Accounting Requirements; this course applies to the Corporate Accounting for Managers, Forensic Accounting and Fraud & Forensic Accounting concentrations.

MACC 668 Enterprise Risk Management 3 Credits

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

Prerequisites: ACC 302 or PMBA 8220.

MACC 670 Accounting Internship 3 Credits

This course provides on-site experiential learning through supervised employment with a participating company. Students will be reviewed periodically by senior staff. Academic assignments, including a formal report, will be developed in conjunction with a faculty member. Permission of the instructor is required.

MACC 690 Special Topics 3 Credits

The study of a timely topic that represents a dimension of business administration or accounting that not covered in a regular course. Such a topic may be offered by the Accounting Department. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Master of Business Administration (MBA)

Program Overview

The Rider MBA program provides advanced preparation for successful participation in a rapidly changing world. Students are exposed to real-world situations that encourage them to question and analyze. The MBA program is accredited by the AACSB International (<http://www.aacsb.edu>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 5% of business programs worldwide.

Business Writing Requirement

One objective of the MBA program is to develop strong written communication skills. This will be done both formally, through a class for those not demonstrating a level of proficiency expected for business professionals, and informally for all students through faculty review of student-prepared course materials such as research reports, case study write-ups and papers.

Each student who enters the MBA or MAcc program must have their writing skills formally assessed in one of the following ways:

1. Through the writing portion of the GMAT or GRE. A score of 4.5 or better on the GMAT writing section or a score of 4 or better on the GRE Analytical Writing section would rate the student as proficient.
2. Through the Graduate Business Writing Assessment, a 30-minute test in which students write a passage in response to a prompt.
The passage is graded using a rubric that assesses Voice/Tone; Organization; Ideas, Support and Development; and Grammar and

Mechanics. Students must score a 3 (adequate) on all four of the writing elements for a passing grade.

Students who fall below the proficient levels as identified above on any of the specified assessments will be required to do one of the following:

- Complete a business/workplace writing course at a U.S.-accredited university. The student must achieve a "C" or better in the course, demonstrating basic proficiency. Courses must be approved by the Associate Dean for Graduate Programs. ENG 321 is not included as an approved course for this purpose.
- Retake either of the above assessments until a proficient level is reached. Students will be provided with a directory of resources to improve their business writing skills prior to retaking the assessments including online tutorials and not-for-credit courses.

Students need to satisfy the above requirement within the first 6 credit hours of taking breadth and elective courses in the graduate business program. Students who do not satisfy the above requirement within the specified time frame will not be allowed to take additional breadth or elective courses in the graduate business program until the requirement is satisfied; he or she may continue to enroll in pre-program courses.

The Master of Business Administration (MBA) – Waiver of Courses

A waiver of a course from pre-program requirements may be granted under the following conditions:

- If the student has graduated from an AACSB-accredited business program within five years prior to semester admitted, and the student has achieved a "B" or better in the equivalent course or sequence of courses.
- If the student has achieved a "B" or better in an equivalent course (at an accredited four-year institution) or a graduate course within six years prior to the semester admitted.
- Based on a combination of previous education and work experience at the Associate Dean for Graduate Programs' discretion.
- With the approval of the Associate Dean for Graduate Programs, students may take proficiency exams to test out of the pre-program courses if the above criteria are not met. A grade of "B" or better is required on proficiency exams. Within the first year of matriculation, a student is able to take a proficiency exam once on one of the six specified dates. Students may not repeat any proficiency exams.

If a student is granted a waiver for any pre-program requirements, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

PMBA 8000 Executive Communications

All students in the MBA program are required to take the Executive Communications course, PMBA 8000 or take the waiver exam. The waiver exam is offered two times a year. Students graded as proficient on their speaking and presentation skills will have PMBA 8000 waived, though they may choose to take the course for their professional development. Students must complete this requirement within one year of their entering semester.

MBA Breadth Course Waivers

It is possible for students to substitute an elective for an MBA Breadth course in the following situations, so as not to duplicate course work that may have been done as undergraduates:

- Students who graduated in the last five years as marketing majors and had at least a 3.0 in their marketing courses will not need to take PMBA 8260 Mkt Analysis & Decision Making. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years as accounting majors who graduated with at least a 3.0 in their accounting courses, will not need to take PMBA 8220 Strategic Accounting for Manager. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years with an undergraduate degree in Information Systems/Technology, Computer Science or Electrical Engineering with at least a 3.0 GPA in their major area courses and have at least five years professional experience in IS/IT and strategy, OR for students with a graduate degree in Information Systems/Technology, Computer Science or Electrical Engineering and over five years professional experience in IS/IT and strategy will not need to take PMBA 8210 Information Technology Management. In its place, students must take an elective from either the MBA or MAcc program.
- Students who graduated in the last five years as supply chain majors and had at least a 3.0 in their supply chain courses will not need to take PMBA 8250 Operations & Supply Chain Management. In its place, students must take an additional elective from the MBA or MAcc programs.

Program Requirements

Course Requirements

The MBA Program requires a core of 27 credit hours of Breadth course requirements and 6 credit hours of elective courses. Students may also be required to take up to an additional 19.5 credit hours of Pre-Program requirements based on their educational and work experience. A student must complete between 33 and 52.5 semester hours for the MBA, depending on the number of Pre-Program courses that are waived.

To enrich the MBA degree, students may take electives in the areas of global business, finance, computer information systems, management, entrepreneurship, business analytics, or forensic accounting.

Breadth Course Requirements

Code	Title	Credits
PMBA 8210	Information Technology Management	3
PMBA 8220	Strategic Accounting for Manager	3
PMBA 8230	Managerial Economics	3
PMBA 8240	Applied Corporate Finance	3
PMBA 8250	Operations & Supply Chain Management	3
PMBA 8260	Mkt Analysis & Decision Making	3
PMBA 8270	Adv. Organizational Behavior	3

PMBA 8290	Legal and Ethical Aspects of Management	3
PMBA 8880	Strategic Management	3
Elective Courses		
Students are required to complete 6 semester hours of electives to complete the program requirements. ¹		6
Total Credits		33

¹ Students pursuing a concentration as part of their degree will need to complete 9 semester hours of electives by taking an additional elective.

Pre-Program Requirements – Courses

(19.5 credits for non-business undergraduates or business undergraduates with outdated course work or course work that did not meet waiver standards)

Code	Title	Credits
PMBA 8000	Executive Communications	1.5
PMBA 8010	Information Technology Proficiency	1.5
PMBA 8020	Fundamentals of Accounting	3
PMBA 8030	Economic Analysis	3
PMBA 8040	Basic Financial Principles	1.5

PMBA 8880 Strategic Management	3

PMBA or MAcc Elective	3
Semester Credit Hours	9
Total Credits	34.5

Course Descriptions

PMBA 8000 Executive Communications 1.5 Credits

This course will provide students with knowledge, skills, and techniques to further develop their presentation skills. This course, which is taught in a workshop style, challenges the students to improve their formal presentation skills, increase the impact of their presentations, and strengthen their confidence. Students will be introduced to different media tools that will support them in advancing their speaking and presentation skills.

PMBA 8010 Information Technology Proficiency 1.5 Credits

Computing proficiency requires understanding implications of advanced information technologies and the ability to successfully apply these technologies in an increasingly global society. This course will enable students to effectively use specific information systems tools (spreadsheet and database management) to begin to design applications for effective decision making.

PMBA 8020 Fundamentals of Accounting 3 Credits

For those students having no previous knowledge of accounting. Subject is approached from the point of view of the user of accounting information rather than that of the accountant who supplies the information. Surveys mechanics of accounting as a means to an end, emphasizing accounting as a tool of management and the language of business. Problems and cases bring out the managerial implications of accounting.

PMBA 8030 Economic Analysis 3 Credits

An intensive exposition of the essentials of price theory and income and employment theory. For students with less than a year of introductory economics at the undergraduate level. Topics include an analysis of markets, the nature and characteristics of producer behavior, the theory of pricing in competitive and non competitive markets, and their welfare effects. At the macro level, coverage of the economy in the short run deals with economic fluxuations, fiscal policy, and monetary policy. An examination of the economy in the long run covers factors effecting economic growth.

PMBA 8040 Basic Financial Principles 1.5 Credits

The central unifying theme of this course is valuation. Valuation is the basis for decisions in all major areas of finance. This course begins with a discussion of basic concepts including time value of money and its application for valuation of stocks and bonds and analysis of risk and return. Further application of valuation for capital investment projects made by a firm is explored by introducing the techniques of capital budgeting.

PMBA 8050 Introduction to Calculus 1.5 Credits

This course has been designed to prepare students for courses in the MBA program in which calculus is used. Topics include limits, derivatives, functions of two or more independent variables and maxima and minima in one and two independent variable(s).

PMBA 8051 Fundamentals of Statistical Analysis 3 Credits

Covers basic statistical techniques useful in business decision making. Includes descriptive statistics, event probability, random variables, sampling distributions, regression analysis and topics in statistical inference.

Prerequisite(s): MSD 105 (or equivalent).

PMBA 8052 Models and Methods of Operations Management 1.5 Credits

This course provides students with some of the most frequently used quantitative tools necessary in analyzing and resolving issues and problems in managing service and/or manufacturing operations. These tools are required in PMBA 8250 Operations and Supply Chain Management, and may also be used in other PMBA courses such as Economic Analysis and Decision Making, and Business Intelligence.

PMBA 8060 Basic Marketing Principles 1.5 Credits

The purpose of this course is to provide students with an operational understanding of basic marketing principles and concepts. This will be done through interactive exercises and discussions based both on primary source and textbook readings as well as discussions and critical examinations of current marketing practices in companies and industries of interest to the students. Topics covered include environmental analysis, target marketing, product and service strategy, integrated marketing communications, channels of distribution, pricing practices, and the interface between marketing and corporate strategic planning.

PMBA 8070 Management: Theory & Application 1.5 Credits

A foundation course that provides an introduction to the theory and practice of management. The management functions of planning, organizing, leading, and controlling provide an organizing framework for examining current management challenges (e.g. globalization, ethics, diversity, and multidimensional organizational structures).

PMBA 8210 Information Technology Management 3 Credits

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

Prerequisite(s): Completion of PMBA 8010.

PMBA 8220 Strategic Accounting for Manager 3 Credits

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8230 Managerial Economics 3 Credits

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8240 Applied Corporate Finance 3 Credits

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

Prerequisite(s): Completion of PMBA 8040 and PMBA 8220.

PMBA 8250 Operations & Supply Chain Management 3 Credits

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8260 Mkt Analysis & Decision Making 3 Credits

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8303 International Business Study Tour 3 Credits

This course provides a cross-cultural perspective for conducting business outside of the United States. Students will gain a better appreciation of how culture, history, and politics influence organizational dynamics, transactions and business customs. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered. This course applies to the Business Analytics, Forensic Accounting and Fraud & Forensic Accounting concentrations. This course applies to the graduate certificate in Business Analytics.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

in our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

PMBA 8319 Selected Topics in CIS 3 Credits

The study of a topic (or combination of topics) that represents some dimensions of computer information systems or has important and direct implications for CIS management. Topics recently covered include project management, data mining and data privacy. Theoretical foundations as well as applications may be explored. Readings, research, lectures, projects, discussions or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8321 Managerial Taxation and Strategy 3 Credits

This course is designed for students who are embarking on (or already in) careers in investment banking, corporate finance, strategy consulting, money management, or venture capital. The focus of the course comes from integrating the tax law with the fundamentals of corporate finance and microeconomics.

Prerequisite(s): PMBA 8020.

PMBA 8324 Financial Accounting & Report 3 Credits

Focus is on analysis and evaluation of alternative accounting methods and the relationship to company policy. Insight is gained through the reading of articles in leading accounting and financial periodicals and Internet research. Cases demonstrating financial reporting methods are assigned and discussed in class. Term project required. Topics include financial instruments, earnings per share, deferred taxes, post-retirement benefits and the accounting rule-making process.

Prerequisite(s): PMBA 8020 and PMBA 8040.

PMBA 8341 Corporate Treasury Management 3 Credits

This course is designed to provide an understanding of modern principles and techniques for corporate treasury management. The course materials are useful for finance, banking, accounting and information system professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multinational cash management, and other related topics. Success in this course will help students preparing for the Certified Cash Manager (CCM) exam. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8343 Investment Instruments and Strategies 3 Credits

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8345 International Financial Management 3 Credits

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions. This course applies to the Finance and Global Business concentrations.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8346 Financial Modeling 3 Credits

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8347 Portfolio Management 3 Credits

Real-world application of the concepts and techniques of investment analysis and portfolio theory. Students interact with and make recommendations to professional portfolio managers. Topics include stock valuation methods, major forces driving movements in current equity markets, international investment opportunities, industry analysis, technical analysis and investment timing, evaluation of portfolio performance, analysis of business conditions and interest rates, and hedging portfolio risk with stock index options and financial futures. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8348 Fixed Income Securities and Alternative Investments 3 Credits

This is an introductory course in fixed income securities and alternative investments. The first part of the course covers the markets for fixed income securities and their derivatives. Valuation of these securities and determination of the risk inherent in these securities are discussed. Methods for managing that risk, such as hedging and credit derivatives, are also discussed. The second part of the course covers a variety of alternative investments, including real estate funds, venture capital, hedge funds, and commodities. Valuation of these investments and determination of their risk are discussed. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8349 Personal Financial Planning 3 Credits

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8357 Business Analytics for Managers 3 Credits

Business Analytics, the data driven approach to management, is essential to achieve effective business decision-making and competitive advantage. All business managers need to analyze data and make quantitative-based decisions in their business careers. The focus of this course is to equip students with a variety of data analysis methods and tools that are useful to uncover trends, patterns, relationships, and other useful information. The course will take a hands-on, example-based approach and introduce fundamental concepts as they are needed. Students will be using both Excel and SAS software. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

PMBA 8365 International Marketing Management 3 Credits

Examination of the nature and scope of global marketing activities, including the theoretical framework of international marketing, foreign marketing environments, multinational markets, MNC information systems, strategic marketing decisions, and organization for transnational marketing. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8369 Selected Topics in Marketing 3 Credits

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision-making may be explored. Readings, research, lectures, discussions or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8371 Human Resource Management 3 Credits

This course is an introduction to the field of human resource management (HRM). The goal is to provide students with an understanding of current corporate HR practices. Common HR problems and the tools and procedures for dealing with them will be discussed. Contemporary topics such as strategic HR planning, international staffing, career planning, workforce diversity, work/family balance, and work motivation will be examined. EEO guidelines and their implications for human resource functions will be discussed as well. A combination of conceptual and experiential approaches include discussions, case studies, exercises, small group activities, and lectures.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8372 Management Skills 3 Credits

This is a practicum in interpersonal skills that are useful for practicing managers. Topics include motivating oneself and others, persuasive communication, creative problem-solving, managing conflict, using power constructively, managing change, and team management. Students are given opportunities to practice these skills in class and are asked to apply them to their current lives and report on the results of their applications. The course will provide students with a better understanding of the art of managing and of themselves as current or future managers.

Prerequisite(s): Completion of MBA pre- program courses.

PMBA 8375 International Management 3 Credits

This course focuses on the complexities of working and managing in a global business environment. Emphasis is placed on cross-cultural awareness, international communication, and negotiations. Students will explore the effect of culture on organizational behavior, managerial decision making, and global leadership. This course applies to the Global Business concentration.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8380 Business Analytics Optimization 3 Credits

This course has been designed to provide professional MBA students with the current knowledge and practice of optimization business analysts use. Optimization aims at selecting the best alternative from among available alternatives according to a predetermined objective. In general it involves building a mathematical model and finding the best alternative through a mathematical procedure. Optimization techniques help decision-makers make fact (i.e. data) based decisions and offer the potential of making significant profits or cost savings. The main focus of this course will be on developing modeling skills to gain insight into a wide variety of business decision problems. In other words, the emphasis in this course will be on modeling practical business decision problems, use of relevant software for optimal solution, interpretation of results, and sensitivity analysis rather than the theory of mathematical solution techniques. Coverage of course material will follow the typical sequence of (1) identification and discussion of a business decision problem; (2) developing a graphical model (e.g. influence diagram); (3) developing a mathematical model; (4) computer solution; (5) interpretation of results and sensitivity analysis; (6) discussion of insights gained from the experience; (7) discussion of implementation issues. In addition, heuristics will be discussed when optimization techniques are not available or too costly. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

Prerequisites: PMBA 8010 and PMBA 8051.

PMBA 8383 Entrepreneurship 3 Credits

The course deals with new business venture start-up. Topics include entrepreneurship concepts and characteristics, new venture types and pros/cons, choice of products/services, market study, marketing planning, financing, and business plan preparation. Practical exercises in developing business plans for new business ventures are part of the course.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8384 Consulting for New and Small Ventures 3 Credits

This course provides experience-based learning to students through the use of student teams to assist area small businesses/organizations. These small firms could have a variety of needs ranging from market research, improving financial reporting and bookkeeping, business planning, streamlining operational procedures, etc. This course will provide students the opportunity to experience in-depth analysis of an individual organization. The emphasis is on student consultants generating immediate, actionable recommendations for the client. Thus, this course is useful not only for those considering small business ownership, but provides an opportunity to students to learn entrepreneurial thinking.

Prerequisite(s): Completion of MBA pre-program courses and permission of instructor.

PMBA 8385 New Venture Launch 3 Credits

Students will start and run a new venture while under the supervision and guidance of faculty. Students will take a business plan they have developed and execute it. This is an opportunity to experience the launch process and learn hands-on how to adapt to the marketplace. Some businesses started in this class may also be eligible to receive venture funding from Rider.

PMBA 8386 Green Entrepreneurship 3 Credits

This course is both a traditionally academic graduate course and a practical, case study based, business development course. Lectures will present the scientific, technical, financial, and business underpinnings required to understand the rationale for and the range of solutions possible that businesses can utilize when initiating or developing sustainable practices or new entrepreneurs can consider as they develop new businesses. Students will be learning about real business examples and discussing how the technical aspects of sustainability interact with the more practical and immediate demands of running a business – making a profit and maintaining positive cash flow while acting ethically.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8491 Business Law 3 Credits

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement; this course applies to the Entrepreneurship concentration.

Prerequisite(s): BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

PMBA 8880 Strategic Management 3 Credits

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

Prerequisite(s): All other MBA breadth courses.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study. **Prerequisite(s):** Completion of MBA pre-program courses and permission of the associate Dean of Graduate Programs.

PMBA 8905 Internship 3 Credits

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be done at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and during the semester he/she receives credit for the internship is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Associate Dean of Graduate Programs.

PMBA 8906 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8907 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8908 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

P MBA 8909 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

Online Master of Accountancy (OL MACC)

Program Overview

The Online Master of Accountancy (MAcc) is designed for working professionals with a background in accounting who seek advanced credentials and education for CPA or other professional licensures but want the flexibility and convenience of an online program. The Online MAcc program offers the same course work as the in-person MAcc program, with which it shares the prestigious AACSB Accounting accreditation, the international standard of excellence in accounting and business education. The accounting faculty who teach in the program publish research in top accounting publications and are actively involved in the professional community.

Curriculum Overview

The Online MAcc program enhances the knowledge and skills required of accounting professionals while meeting the educational requirements for CPA licensure. Students have the option to complete the program in one of two ways:

1. Cohort Program: The cohort program begins each fall and follows a prescribed course progression that finishes the MAcc in 16 months. This option provides the added benefits of no tuition increases while in the program and guaranteed placement in classes each semester.
2. Flexible Program: The flexible program allows you to come into the Online MAcc in fall, spring or summer and go at your own pace on a part-time basis. The benefit of this option is that it lets you tailor the program to fit with your life commitments.

Acceptance into the online program assumes that students have mastered the basic foundation of accounting at the undergraduate level. In addition to four required courses, the MAcc requires the completion of 6 electives, which include the courses for a concentration in forensic accounting as well as a CPA track. There is a required online orientation before a student can begin in the program.

Course work and connections with fellow students and faculty are facilitated through our user friendly technology platform. Students also have access to the MAcc resource center including webinars from leading accounting professionals on matters in the profession and CPA licensure.

Online MAcc Program Requirements

The Online MAcc program is designed for students who have completed an undergraduate accounting major or have completed a series of both business and accounting prerequisite courses as part of an undergraduate/graduate program or independently at a four year university. The program consists of 30 semester hours at the graduate level and can be completed in either a structured, 16-month, cohort-based program with students following a set course schedule or on a flexible basis with students taking the online courses at their own pace.

For students who do not have an undergraduate degree in accounting or business the following courses must be taken prior to enrolling in the online MAcc.

Business Core Requirement Courses

- Macroeconomics and Microeconomics (6 Undergraduate Credits)
- Basic Financial Principles (3 Undergraduate Credits)
- General Accounting and Managerial Accounting (6 Undergraduate Credits)

Accounting Core Requirement Courses

- Intermediate Accounting I & II (6 Credits)
- Advanced Accounting (3 Credits)
- Cost Accounting (3 Credits)
- Federal Taxation (3 Credits)
- Auditing (3 Credits)

Business Writing Requirement

One objective of the MBA program is to develop strong written communication skills. This will be done both formally, through a class for those not demonstrating a level of proficiency expected for business professionals, and informally for all students through faculty review of student-prepared course materials such as research reports, case study write-ups and papers.

Each student who enters the MBA or MAcc program must have their writing skills formally assessed in one of the following ways:

1. Through the writing portion of the GMAT or GRE. A score of 4.5 or better on the GMAT writing section or a score of 4 or better on the GRE Analytical Writing section would rate the student as proficient.
2. Through the Graduate Business Writing Assessment, a 30-minute test in which students write a passage in response to a prompt. The passage is graded using a rubric that assesses Voice/Tone; Organization; Ideas, Support and Development; and Grammar and Mechanics. Students must score a 3 (adequate) on all four of the writing elements for a passing grade.

Students who fall below the proficient levels as identified above on any of the specified assessments will be required to do one of the following:

- Complete a business/workplace writing course at a U.S.-accredited university. The student must achieve a "C" or better in the course, demonstrating basic proficiency. Courses must be approved by the Associate Dean for Graduate Programs. ENG 321 is not included as an approved course for this purpose.
- Retake either of the above assessments until a proficient level is reached. Students will be provided with a directory of resources to improve their business writing skills prior to retaking the assessments including online tutorials and not-for-credit courses.

Students need to satisfy the above requirement within the first 6 credit hours of taking breadth and elective courses in the graduate business program. Students who do not satisfy the above requirement within the specified time frame will not be allowed to take additional breadth or elective courses in the graduate business program until the requirement is satisfied; he or she may continue to enroll in pre-program courses.

MAcc and Online MAcc–Waiver of Courses

A waiver of a course from the "Business Core Requirements" may be granted under the following conditions:

- The Preliminary Requirements (business core courses) may be waived if the student has graduated from an AACSB-accredited business program within five years prior to semester admitted, and the student achieved a "B" or better in the equivalent courses or sequence of courses.
- One or more Business Core Requirement courses may be waived if the student has achieved a "B" or better in an equivalent undergraduate course (at an accredited four-year institution or graduate course (at an AACSB-accredited university) within six years prior to the semester admitted.
- One or more Business Core Requirement courses may be waived based on a combination of education and work experience at the Associate Dean for Graduate Programs' discretion.
- With the approval of the Associate Dean for Graduate Programs, students may take proficiency exams to test out of the Business Core Requirements courses if the above criteria are not met. A grade of "B" or better is required on the proficiency exams. Within the first year of matriculation, a student is able to take any of the proficiency exams once. They will be offered on specified dates throughout the year. Students may not repeat any proficiency exams.

Waivers of courses for the "Accounting Core Requirements" may be granted as outlined in conditions 1 and 2, if the student receives a "C" or better for these courses. There are no waiver examinations for the "Accounting Core Requirements" for the MAcc program. When the MAcc "Accounting Core Requirements" or the MBA "Pre-Program Requirements" are waived, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

Plan of Study for a Fall Start in the Online MAcc

PMBA 8312 Business Intelligence Tech-Data Mining		
Semester Credit Hours		6
Total Credits		30

MACC 650 Seminar in Federal Taxes 3 Credits

The course is designed (1) to expand a student's tax research skills, (2) to examine tax compliance and basic planning concepts available to C corporations, S corporations, partnerships, gifts, estates, and trusts, (3) to explore the tax issues involved in the decision to select a particular form of business organization, (4) to provide an introduction to fundamental concepts of interstate, international, and New Jersey taxation, and (5) to expose the student to a variety of common tax returns, applicable to the above topics.

Prerequisite(s): completion of ACC 410 Fundamentals of Federal Taxation.

MACC 652 Analysis of Accounting Data 3 Credits

Employs appropriate information technology and analytical techniques to pursue data collection and analysis needs commonly faced by accounting professionals. Uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics. MACC 654 should be taken before this course.

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 654 Issues in Financial Reporting 3 Credits

Examines accounting theories and the development of a conceptual framework for financial reporting. Theoretical and conceptual assessments of current reporting issues pertaining to asset valuation and income measurement are addressed through cases, readings, and projects. Topics to be investigated from term to term vary depending on their importance and timeliness to the profession. This course should be taken first or early in the program.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MACC 662 Auditing Practice & Problems 3 Credits

Uses cases to examine current auditing issues, including professional ethics, internal control, materiality and risk assessment. Students will complete a simulated audit from start to finish, including audit planning, audit fieldwork and preparation of an audit opinion.

Prerequisite(s): ACC 400 Principles of Auditing.

MACC 663 Fraud and Forensic Accounting 3 Credits

A course designed to provide a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

Prerequisite(s): completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

MACC 664 Issues in Managerial Accounting 3 Credits

Examines current management accounting practices with an emphasis on world class developments and strategic implications to the firm. Integrates current management accounting literature with considerations of planning, control, decision-making and information needs of the firm.

Prerequisite(s): completion of ACC 302 Cost Management or PMBA 8220 Strategic Accounting for Managers; this course applies to the Corporate Accounting for Managers concentration.

MACC 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

Prerequisite(s): MACC 663 and completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

A course in the fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

Prerequisite(s): completion of PMBA 8240 or the Preliminary Accounting Requirements; this course applies to the Corporate Accounting for Managers, Forensic Accounting and Fraud & Forensic Accounting concentrations.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered. This course applies to the Business Analytics, Forensic Accounting and Fraud & Forensic Accounting concentrations. This course applies to the graduate certificate in Business Analytics.

PMBA 8491 Business Law 3 Credits

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MACc program and in anticipation of CPA law requirement; this course applies to the Entrepreneurship concentration.

Prerequisite(s): BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

Online MBA

Program Overview

The Rider Online MBA program is designed to offer flexibility, convenience, and value to students preparing for advanced careers as decision makers in a rapidly changing world. Students are provided with a broad understanding of overall business concepts and operations, moving from the "one-dimensional focus" of the traditional MBA to one that mirrors the complexity of today's business enterprise. By utilizing the case study approach to analyze real-world situations, students are encouraged to question, apply business knowledge and develop informed decisions.

With the same curriculum as the in-person MBA, this program is accredited by the AACSB International (<http://www.aacsb.edu>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 5% of business programs worldwide. The business faculty who teach in the program publish research in top business publications and are actively involved in the professional community.

Curriculum Overview

The MBA Program requires a core of 27 credit hours of Breadth course requirements and 6 credit hours of elective courses. Acceptance into the online program assumes that students have established a solid foundation level of business courses at the undergraduate level. Students who do not have an undergraduate degree in business or who do not meet the waiver requirements for each of the pre-program courses listed below must complete those courses prior to enrolling in the online MBA. These pre-program courses are all offered in the online format.

This cohort-based program provides options to start in either September or February each year. Students follow a set course schedule, which is shown under the "1 year plan" tab, allowing for the completion of the program on a full-time basis over 12 months. The program also may be completed on a part-time basis in 21 months. There is a required online orientation before a student can begin in the program.

To enrich the MBA degree, students may take electives in the areas of global business, finance, computer information systems, management, entrepreneurship, business analytics, or forensic accounting.

Degree Offered

- MBA Master of Business Administration

Related programs

- Executive MBA (p. 860)
- Master of Accountancy (p. 863)

The Online MBA program is designed for students who have completed an undergraduate business major or have completed a series of both business and accounting prerequisite courses as part of the Rider undergraduate/graduate program or independently at a four year university. The program consists of 34.5 semester hours at the graduate level and is structured as a 12-month cohort-based program with students following a set course schedule on a full-time basis. Students may also participate in the program on a part-time basis, completing the course schedule in 21 months.

For students who have not taken equivalent undergraduate courses, achieving a grade of B or better, as part of a degree in accounting or business, the following courses must be taken prior to enrolling in the online MBA.

Pre-Program Requirements – Courses

(19.5 credits for non-business undergraduates or business undergraduates with outdated course work or course work that did not meet waiver standards)

Code	Title	Credits
PMBA 8000	Executive Communications	1.5
PMBA 8010	Information Technology Proficiency	1.5
PMBA 8020	Fundamentals of Accounting	3
PMBA 8030	Economic Analysis	3
PMBA 8040	Basic Financial Principles	1.5
PMBA 8050	Introduction to Calculus	1.5
PMBA 8051	Fund of Statistical Analysis	3
PMBA 8052	Models and Methods of Operations Mgt	1.5
PMBA 8060	Basic Marketing Principles	1.5
PMBA 8070	Management: Theory & Application	1.5

Business Writing Requirement

One objective of the MBA program is to develop strong written communication skills. This will be done both formally, through a class for those not demonstrating a level of proficiency expected for business professionals, and informally for all students through faculty review of student-prepared course materials such as research reports, case study write-ups and papers.

Each student who enters the MBA or MAcc program must have their writing skills formally assessed in one of the following ways:

1. Through the writing portion of the GMAT or GRE. A score of 4.5 or better on the GMAT writing section or a score of 4 or better on the GRE Analytical Writing section would rate the student as proficient.
2. Through the Graduate Business Writing Assessment, a 30-minute test in which students write a passage in response to a prompt.
The passage is graded using a rubric that assesses Voice/Tone; Organization; Ideas, Support and Development; and Grammar and Mechanics. Students must score a 3 (adequate) on all four of the writing elements for a passing grade.

Students who fall below the proficient levels as identified above on any of the specified assessments will be required to do one of the following:

- Complete a business/workplace writing course at a U.S.-accredited university. The student must achieve a "C" or better in the course, demonstrating basic proficiency. Courses must be approved by the Associate Dean for Graduate Programs. ENG 321 is not included as an approved course for this purpose.
- Retake either of the above assessments until a proficient level is reached. Students will be provided with a directory of resources to improve their business writing skills prior to retaking the assessments including Rider writing lab, online tutorials and not-for-credit courses.

Students need to satisfy the above requirement within the first 6 credit hours of taking breadth and elective courses in the graduate business program. Students who do not satisfy the above requirement within the specified time frame will not be allowed to take additional breadth or elective courses in the graduate business program until the requirement is satisfied; he or she may continue to enroll in pre-program courses.

The Master of Business Administration (MBA) – Waiver of Courses

Waiver of Pre-Program Courses

A waiver of a course from pre-program requirements may be granted under the following conditions:

- If the student has graduated from an AACSB-accredited business program within five years prior to semester admitted, and the student has achieved a "B" or better in the equivalent course or sequence of courses.
- If the student has achieved a "B" or better in an equivalent course (at an accredited four-year institution) or a graduate course within six years prior to the semester admitted.
- Based on a combination of previous education and work experience at the Associate Dean for Graduate Programs' discretion.
- With the approval of the Associate Dean for Graduate Programs, students may take proficiency exams to test out of the pre-program courses if the above criteria are not met. A grade of "B" or better is required on proficiency exams. Within the first year of matriculation, a student is able to take a proficiency exam once on one of the six specified dates. Students may not repeat any proficiency exams.

If a student is granted a waiver for any pre-program requirements, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

PMBA 8000 Executive Communications

All students in the MBA program are required to take the Executive Communications course, PMBA 8000 or take the waiver exam. The waiver exam is offered two times a year. Students graded as proficient on their speaking and presentation skills will have PMBA 8000 waived, though they may choose to take the course for their professional development. Students must complete this requirement within one year of their entering semester.

MBA Breadth Course Waivers

It is possible for students to substitute an elective for an MBA Breadth course in the following situations, so as not to duplicate course work that may have been done as undergraduates:

- Students who graduated in the last five years as marketing majors and had at least a 3.0 in their marketing courses will not need to take PMBA 8260 Mkt Analysis & Decision Making. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years as accounting majors who graduated with at least a 3.0 in their accounting courses, will not need to take PMBA 8220 Strategic Accounting for Manager. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years with an undergraduate degree in Information Systems/Technology, Computer Science or Electrical Engineering with at least a 3.0 GPA in their major area courses and have at least five years professional experience in IS/IT and strategy, OR for students with a graduate degree in Information Systems/Technology, Computer Science or Electrical Engineering and over five years professional experience in IS/IT and strategy will not need to take PMBA 8210 Information Technology Management. In its place, students must take an elective from either the MBA or MAcc program.

The Rider Online MBA is designed to be completed in one year by the student who has met all the prerequisite requirements with previous coursework in business and plans to attend the program on a full-time basis. Given that this is a cohort-based program, with Online MBA students progressing through the program together, all students in the cohort will follow this plan of study in order to complete the program within 12 months.

Year 1

Fall Semester		Credits

PMBA 8290	Legal and Ethical Aspects of Management	3
PMBA or MAcc Elective		3
Semester Credit Hours		12

Summer Semester

PMBA 8210	Information Technology Management	3
PMBA 8880	Strategic Management	3
PMBA or MAcc Elective		3
Semester Credit Hours		9
Total Credits		34.5

PMBA 8210 Information Technology Management 3 Credits

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

Prerequisite(s): Completion of PMBA 8010.

PMBA 8220 Strategic Accounting for Manager 3 Credits

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8230 Managerial Economics 3 Credits

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8240 Applied Corporate Finance 3 Credits

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

Prerequisite(s): Completion of PMBA 8040 and PMBA 8220.

P MBA 8250 Operations & Supply Chain Management 3 Credits

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

Prerequisite(s): Completion of MBA pre-program courses.

P MBA 8260 Mkt Analysis & Decision Making 3 Credits

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

Prerequisite(s): Completion of MBA pre-program courses.

P MBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): Completion of MBA pre-program courses.

P MBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

P MBA 8303 International Business Study Tour 3 Credits

This course provides a cross-cultural perspective for conducting business outside of the United States. Students will gain a better appreciation of how culture, history, and politics influence organizational dynamics, transactions and business customs. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

Prerequisite(s): Completion of MBA pre-program courses.

P MBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered. This course applies to the Business Analytics, Forensic Accounting and Fraud & Forensic Accounting concentrations. This course applies to the graduate certificate in Business Analytics.

P MBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

P MBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

P MBA 8315 Globalization and Technology 3 Credits

The emergence and growth of the global economy constitutes an epochal shift in the organization of the world. Technology has been a key component in the production and acceleration of these phenomena. This course introduces students to the latest theoretical and empirical literature on globalization as shaped by technology. This course applies to the Information Systems and Global Business concentrations. This course will satisfy the International elective requirement.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

PMBA 8319 Selected Topics in CIS 3 Credits

The study of a topic (or combination of topics) that represents some dimensions of computer information systems or has important and direct implications for CIS management. Topics recently covered include project management, data mining and data privacy. Theoretical foundations as well as applications may be explored. Readings, research, lectures, projects, discussions or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8341 Corporate Treasury Management 3 Credits

This course is designed to provide an understanding of modern principles and techniques for corporate treasury management. The course materials are useful for finance, banking, accounting and information system professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multinational cash management, and other related topics. Success in this course will help students preparing for the Certified Cash Manager (CCM) exam. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8343 Investment Instruments and Strategies 3 Credits

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8345 International Financial Management 3 Credits

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions. This course applies to the Finance and Global Business concentrations.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8346 Financial Modeling 3 Credits

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8347 Portfolio Management 3 Credits

Real-world application of the concepts and techniques of investment analysis and portfolio theory. Students interact with and make recommendations to professional portfolio managers. Topics include stock valuation methods, major forces driving movements in current equity markets, international investment opportunities, industry analysis, technical analysis and investment timing, evaluation of portfolio performance, analysis of business conditions and interest rates, and hedging portfolio risk with stock index options and financial futures. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8349 Personal Financial Planning 3 Credits

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8357 Business Analytics for Managers 3 Credits

Business Analytics, the data driven approach to management, is essential to achieve effective business decision-making and competitive advantage. All business managers need to analyze data and make quantitative-based decisions in their business careers. The focus of this course is to equip students with a variety of data analysis methods and tools that are useful to uncover trends, patterns, relationships, and other useful information. The course will take a hands-on, example-based approach and introduce fundamental concepts as they are needed. Students will be using both Excel and SAS software. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

PMBA 8365 International Marketing Management 3 Credits

Examination of the nature and scope of global marketing activities, including the theoretical framework of international marketing, foreign marketing environments, multinational markets, MNC information systems, strategic marketing decisions, and organization for transnational marketing. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8371 Human Resource Management 3 Credits

This course is an introduction to the field of human resource management (HRM). The goal is to provide students with an understanding of current corporate HR practices. Common HR problems and the tools and procedures for dealing with them will be discussed. Contemporary topics such as strategic HR planning, international staffing, career planning, workforce diversity, work/family balance, and work motivation will be examined. EEO guidelines and their implications for human resource functions will be discussed as well. A combination of conceptual and experiential approaches include discussions, case studies, exercises, small group activities, and lectures.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8372 Management Skills 3 Credits

This is a practicum in interpersonal skills that are useful for practicing managers. Topics include motivating oneself and others, persuasive communication, creative problem-solving, managing conflict, using power constructively, managing change, and team management. Students are given opportunities to practice these skills in class and are asked to apply them to their current lives and report on the results of their applications. The course will provide students with a better understanding of the art of managing and of themselves as current or future managers.

Prerequisite(s): Completion of MBA pre- program courses.

PMBA 8380 Business Analytics Optimization 3 Credits

This course has been designed to provide professional MBA students with the current knowledge and practice of optimization business analysts use. Optimization aims at selecting the best alternative from among available alternatives according to a predetermined objective. In general it involves building a mathematical model and finding the best alternative through a mathematical procedure. Optimization techniques help decision-makers make fact (i.e. data) based decisions and offer the potential of making significant profits or cost savings. The main focus of this course will be on developing modeling skills to gain insight into a wide variety of business decision problems. In other words, the emphasis in this course will be on modeling practical business decision problems, use of relevant software for optimal solution, interpretation of results, and sensitivity analysis rather than the theory of mathematical solution techniques. Coverage of course material will follow the typical sequence of (1) identification and discussion of a business decision problem; (2) developing a graphical model (e.g. influence diagram); (3) developing a mathematical model; (4) computer solution; (5) interpretation of results and sensitivity analysis; (6) discussion of insights gained from the experience; (7) discussion of implementation issues. In addition, heuristics will be discussed when optimization techniques are not available or too costly. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

Prerequisites: PMBA 8010 and PMBA 8051.

PMBA 8383 Entrepreneurship 3 Credits

The course deals with new business venture start-up. Topics include entrepreneurship concepts and characteristics, new venture types and pros/cons, choice of products/services, market study, marketing planning, financing, and business plan preparation. Practical exercises in developing business plans for new business ventures are part of the course.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8384 Consulting for New and Small Ventures 3 Credits

This course provides experience-based learning to students through the use of student teams to assist area small businesses/organizations. These small firms could have a variety of needs ranging from market research, improving financial reporting and bookkeeping, business planning, streamlining operational procedures, etc. This course will provide students the opportunity to experience in-depth analysis of an individual organization. The emphasis is on student consultants generating immediate, actionable recommendations for the client. Thus, this course is useful not only for those considering small business ownership, but provides an opportunity to students to learn entrepreneurial thinking.

Prerequisite(s): Completion of MBA pre-program courses and permission of instructor.

PMBA 8386 Green Entrepreneurship 3 Credits

This course is both a traditionally academic graduate course and a practical, case study based, business development course. Lectures will present the scientific, technical, financial, and business underpinnings required to understand the rationale for and the range of solutions possible that businesses can utilize when initiating or developing sustainable practices or new entrepreneurs can consider as they develop new businesses. Students will be learning about real business examples and discussing how the technical aspects of sustainability interact with the more practical and immediate demands of running a business – making a profit and maintaining positive cash flow while acting ethically.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8491 Business Law 3 Credits

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement; this course applies to the Entrepreneurship concentration.

Prerequisite(s): BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

PMBA 8880 Strategic Management 3 Credits

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

Prerequisite(s): All other MBA breadth courses.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study.

Prerequisite(s): Completion of MBA pre-program courses and permission of the associate Dean of Graduate Programs.

PMBA 8905 Internship 3 Credits

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be done at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and during the semester he/she receives credit for the internship is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Associate Dean of Graduate Programs.

PMBA 8906 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

x

Concentrations for MBA, MACC & EMBA Students

Concentration Overview

The required courses in the MBA, MAcc and EMBA provide a distinct and consistent advanced business knowledge and skill structure for all students in the programs. The electives allow the student to tailor the graduate educational experience to fit individual needs by pursuing a general management option with two electives or a specific concentration with three electives.

Concentrations are comprised of three-course elective (nine credit hours) sequences defined from a menu of electives by either the functional area (business analytics, finance, forensic accounting or fraud and forensic accounting) or interdisciplinary area (global business).

Electives counted toward a concentration must carry a grade of "B" or better, and students must achieve a 3.2 GPA in those electives.

Faculty

Barry D. Ashmen

Assistant Professor, Department of Marketing, Sport Management and Legal Studies
B.S. Rider University; M.A. Rider University; Ed.D. Temple University

College of Continuing Studies

Whether you are a current and aspiring coach or athletic administrator, Rider University's new M.A. in Athletic Leadership (p. 883) offers you the credentials and training needed to advance in your chosen career. Meet the challenges of today — and tomorrow — with a graduate degree focused on such practical issues as leadership, policies and governance, ethics and coaching development. The program offers access to Rider's extensive D-I program in 20 men's and women's sports (<http://www.rider.edu/athletics>), as well as the University's diverse academic expertise in the subject, including business, communication and psychology.

Rider's Master of Arts in Athletic Leadership is a 36-credit graduate program. Candidates can hold an undergraduate degree in any field of study. Class times are designed around the busy schedules of working coaches, administrators and athletes. Lessons learned in the classroom can immediately be applied on the job.

Students are required to successfully complete 10 courses designed specifically for this degree, plus two 3-credit internships in either coaching or administration — a hallmark of the program.

Athletic Leadership M.A.

Overview

The Master of Arts in Athletic Leadership is to provides current and aspiring coaches and administrators, at all levels, the opportunity to obtain a graduate education focused on leadership, ethics, and coaching development within the current landscape of athletics. This graduate program is designed to promote personal and professional growth in leadership, coaching integrity, and community influence using most of the standards of the National Association for Sport and Physical Education (N.A.S.P.E.) (<http://pgpedia.com/n/national-association-sport-and-physical-education>) and the university's commitment to preparing caring, competent, and connected graduates. This program will promote the university mission of educating students to meet the challenges of

our times. Intercollegiate athletics is a core component of the college experience and developing leaders within context this promotes multiple aspects of the Rider mission that include good decision-making, ethical lifestyles, and tolerance and respect for others.

Curriculum Overview

There are two models for the degree program, both requiring 36 credit hours. The first model is a "4+1" program for undergraduates in which the four (4) courses (501, 502, 504, and 513) can be completed by rising seniors; the remaining 27 hours will be completed post-graduation. The second model is a traditional master's program consisting of 36 credits. The program allows the possibility of receiving credit for up to six (6) hours of the coaching/athletic administrative depending upon prior professional experience (e.g., 2 years of full-time coaching or athletic administrative experience).

Courses and Descriptions

ATHL 501 Seminar in Sport Psychology 3 Credits

This course covers psychological and social-psychological antecedents and consequences of exercise, physical activity, and sports participation. Emphasizes theory and research on personality, motivation, arousal, cognition, attributions, attitudes, self-efficacy, leadership effectiveness, and group dynamics. Emphasis is placed on applications for maximizing effectiveness while serving in the position of coach or administrator.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 502 Evaluating Athletic Interventions 3 Credits

This course in research methods prepares the student to understand materials and issues associated with but not limited to the logic of the scientific method, research design, and qualitative and statistical analysis of data. Students will be afforded the opportunity to conduct research in the course on topics.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 503 Seminar in Strength, Speed, and Conditioning 3 Credits

Emphasis will be placed upon assessment, description, and analysis of sport movement and designing training programs to enhance performance variables. While this course will assist those who desire to sit for the National Strength and Conditioning Association's (NSCA) Certified Exam, it is NOT a preparation course for the NSCA-CSCS exam.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 504 Seminar in Athletic Training 3 Credits

Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 505 Seminar in Sports Media and Communication 3 Credits

Seminar in Sports Media and Communication is a critical examination of the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 506 Seminar in Facility Management 3 Credits

Seminar in Facilities Management and Event Planning provides an examination of principles and techniques of planning and operating sport facilities. Emphasizes the principles and concepts of organization and administration including communication, personnel management, management of physical resources, and risk management. Examines a variety of sport operations such as indoor stadiums, athletic field complexes, and managing recreation and intramural activities.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 507 Seminar in Athletic Governance and Policy 3 Credits

Students in this course will explore principles, techniques, and process related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students value effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. Studying collegiate athletic administration involves interpreting NCAA By-laws, including a comparison between Division I, II, and III compliance regulations. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will characterize the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level. At the end of the course, students will understand the primary duties of the athletic director and the intricacies of managing an intercollegiate athletic program.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 508 Seminar in Athletics and Risk Management 3 Credits

Students in this course will explore proactive approaches to managing risks associated with conducting health, physical education, recreation and outdoor education programs. This course will emphasize safety as a foundation of quality program planning. Students will study governing associations and leadership/management skills required to be successful in the world of college athletics.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 509 Seminar in Legal and Ethical Issues in Athletics 3 Credits

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues which will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 510 Seminar in Athletic Coaching 3 Credits

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching; integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 511 Athletic Coaching Internship 3 Credits

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching; integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 512 Athletic Administrative Internship 3 Credits

The internship affords students professional experience with an organization where the course theory can be applied to best practices. The internship is developed in consultation with the student, the student's academic advisor and the Internship. A learning/work plan is prepared by the student for approval by the site supervisor, both of whom share responsibility for the internship.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 513 Special Topics Seminar 3 Credits

This course will provide students the opportunity to survey the various sub-disciplines related to coaching and athletic administration, and their methods of inquiry. The course will place emphases on critically appraising research literature, and data collection, data organization and analyses for various research questions.

Prerequisite(s): Permission of Program Director or approval by CCS.

College of Education and Human Services

<http://www.rider.edu/soe>

The College of Education and Human Services prepares students to be effective educators. Rider was the first private New Jersey institution to hold the highest accreditation possible in teaching from the National Council for the Accreditation of Teacher Education (NCATE/CAEP). This in turn offers graduates added value and recognition nationwide when seeking employment or admission to graduate study. The College has created partnerships with local schools, businesses, and government and community agencies so that students work collaboratively to develop high-quality programs. Professors value excellence in teaching,

scholarship and service and serve as devoted advisors and mentors who relate well to each and every student.

College of Education and Human Services: Graduate Education, Leadership, and Counseling

The **Department of Graduate Education, Leadership, and Counseling** strives to provide quality programs with personal attention. Our full-time faculty, all of whom have doctoral degrees, teach the majority of our courses. Our College of Education and Human Services is accredited by the National Council for the Accreditation of Teacher Education (NCATE/CAEP) and our Master's degree in Counseling Services is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). Other programs that have received national accreditation include: School Psychology; Educational Leadership.

Classes are scheduled to enable those who work full-time to complete their programs. Class sizes are moderate to small, and many degree programs have internships.

The department offers educational specialist degrees, master's degrees, and certifications and endorsements in a variety of areas. These degree programs of study, their descriptions, and the certifications associated with them appear under programs and certificates. Course descriptions for each program can be found in this catalog and on the Registrar's Office website. All programs require an application available from the Office of Graduate Admission.

You may also apply to be a special student in some programs. Students enrolled in graduate programs elsewhere or students seeking course work for professional development not leading to a degree, certification or endorsement from Rider University may take courses as a special student. Apply to the Office of Graduate Admission. A bachelor's degree and two letters of recommendation are required.

Mission Statement

- The College of Education of Education and Human Services prepares undergraduate and graduate students for professional careers in education, organizations, and agencies in the diverse American society.
- The College of Education and Human Services fosters the intellectual, personal, and social development of each student for a changing world by creating and providing programs that embody the highest academic and professional standards.
- The College of Education and Human Services develops students who are committed, knowledgeable, professional, and reflective and who value service, ethical behavior and the improvement of one's self and profession.
- The College of Education and Human Services promotes a climate of scholarly inquiry, high expectations for achievement, and best professional practices, while establishing beneficial relationships with the public and exchanging relevant ideas and services that speak to emerging needs.

College of Education and Human Services Conceptual Framework

Knowledgeable

The College of Education and Human Services emphasizes content and pedagogical knowledge, which candidates implement in supervised classroom and field experiences. Candidates use acquired technological expertise and reference relevant standards for planning and reflecting on their classroom work.

Professional

Novice and experienced educators enrolled in the College of Education and Human Services are on a career-long path toward professionalism that does not end with graduation. We encourage candidates to become thoughtful, creative problem-solvers.

Reflective

The College of Education and Human Services defines reflection as the process of thinking clearly and deliberately to promote understanding about professional practice. Reflection, grounded in active experience, has value for developing educators, through classroom observation, self-assessment, and journal writing.

Committed

Commitment, highly prized by the College of Education and Human Services, serves as an essential cornerstone for teaching and learning. Commitment is a set of connected attitudes, values, and beliefs that result in professional behaviors expected of dedicated educators.

Admission Status

Upon completion of the steps in the application procedures described below, the applicant will be assigned to one of the following classifications once admitted:

Graduate Standing

The student is qualified to undertake graduate study and is recognized as a degree or certification candidate upon admission;

Conditional Standing

Students who do not satisfy all of the admission requirements or have not completed all of the undergraduate preparatory requirements or both may be permitted to enroll in studies during a probationary period not exceeding 12 graduate credits with a minimum grade point average of 3.0. Students who fail to attain a 3.0 grade point average upon completion of up to 12 graduate credits will be subject to dismissal.

Special Standing

The student does not plan to be a degree candidate or certification candidate in a department/graduate program. Certification students enter the program under this classification. (If a certification student applies for admission to a master's or specialist degree program and is accepted, the student may apply for transfer of certificate course credits according to the policy guidelines of the department.)

Transfer of Credit

Upon application to and before admission to any graduate degree program in education, leadership, and counseling, students may request transfer of up to 12 semester hours of graduate credits completed at an accredited institution. These credits must have been earned within six

years of the date of credit transfer approval. All transfer credits must be approved by the advisor and the department chair. Courses accepted for transfer must be similar to required or elective courses that are approved for the respective programs, and a grade of at least "B" must have been earned in each of these courses.

Students who are eligible to transfer graduate credits from other institutions must submit official transcripts of these credits. The Department of Graduate Education, Leadership, and Counseling will consider specific written requests for appropriate transfer credits. Official transcripts covering courses submitted for transfer must accompany the written request for such transfer if the transcripts have not already been filed.

Transfer of Credit for Educational Specialist (Ed.S.) Students

The Department of Graduate Education, Leadership, and Counseling recognizes that students enrolled in an educational specialists program may enter after completing an appropriate master's program. Consideration is typically given to their prior graduate training and its application to the current degree. The program director/designee and the department chairperson will determine the number of credits to be transferred given the following guidelines.

Guidelines for Transfer of Credits for Ed.S. Students

- All transfer credits must carry a letter grade of at least "B."
- Transfer credits must be taken within the six years from the date of acceptance into the program. Exceptions may also be granted by the program director/designee for courses where content remains consistent over time and supports current program objectives.
- For students in the School Psychology Program up to 18 credits may be transferred so long as course equivalency can be thoroughly documented. Students in the Counseling Services Program may transfer up to 48 credits from a CACREP approved program. Students admitted from a non-CACREP approved program may transfer up to 36 credits.
- Official transcripts must accompany the request for transfer of credit. The program director/designee must approve the credits to be transferred upon admission.
- Credits approved for transfer will be added to the student's transcript at the time of admission to the program.
- Course descriptions and/or syllabi of the courses being requested for transfer may be required.

Guidelines for Transfer of Credits for MA in Organizational Leadership Students

- All requests for transfer credits must be made at the time of application.
- Courses accepted for transfer to fulfill core or concentration requirements must be substantially similar to those students would take at Rider University.
- Courses accepted for transfer to fulfill elective requirements must be approved by the program director/designee.
- Course syllabi for transfer requests must be provided.
- Decisions for accepting courses for transfer credit will be made by the program director/designee and appropriate faculty subject experts.
- Not all concentrations allow transfer credit.

- If not already filed, official transcripts must accompany the application for transfer of credits.
- All courses used for transfer of credit must be “B” or better.
- Courses used for transfer of credit must have been taken within six years from the date of admission to the program.

Course Repeat Policy

Students may not repeat any graduate course for credit that they have already taken, except a course in which they have received a grade lower than “B” or one from which they withdrew. Any exceptions must be approved by the department chair.

Comprehensive Examination

Students who are pursuing a graduate program leading to the Master of Arts in counseling services; clinical mental health counseling; reading/literacy education; or special education, must successfully pass a comprehensive examination covering knowledge of a specialized field; major concepts, theories and ideas; techniques for applying to a problem area knowledge of the specialized field and/or the related areas of foundations and research; adequate communication of ideas in light of the question(s) posed.

The comprehensive examination is administered once each regular semester during the academic year. Only those students who have achieved the following requirements for the MA degree are eligible to sit for this exam:

- A cumulative average of 3.0 or better by the time of application for the comprehensive exam.
- In the last semester of the program; or, may take the examination in the spring if only one course remains and will be taken in the summer. Permission of program director/designee is required.

Application for Comprehensive Examination and Graduation

A student who plans to take the comprehensive examination and graduate must fill out and file an Application for Comprehensive Examination and Graduation form on or before the date specified in the graduate calendar for his or her final semester. This form must be filed with the chair of the Department of Graduate Education, Leadership, and Counseling.

Dismissal

Any of the following situations will result in the automatic dismissal of a student working toward a graduate degree or certification program in the Department of Graduate Education, Leadership, and Counseling:

- Receiving two grades of “F” in graduate course work;
- Receiving any grade of “C” (C+, C, or C- or lower) in more than two graduate courses;
- Not attaining a grade point average of 3.0 after taking twelve or more graduate credits at Rider University;
- Failing the comprehensive examination for the second time (pertains only to students enrolled in degree programs that require the examination);
- Failure to complete degree requirements in six years;
- The Department of Graduate Education, Leadership, and Counseling reserves the right to dismiss any student when, in the judgment of the faculty or the officers of Rider, such action seems advisable.

Honors Graduates

Students who graduate with an overall grade point average of 3.85 or better are designated as graduating with distinction. This term appears on the student’s official transcript, below the student’s name in the commencement program, and on the diploma.

Programs of Study

Degrees and Certifications Offered

The Educational Specialist (Ed.S.) degree is offered in the following areas:

- Counseling Services (p. 900)
- School Psychology (p. 938)

The Master of Arts (M.A.) degree is offered in the following areas:

- Clinical Mental Health Counseling (p. 892)
- Counseling Services (p. 897)
- Educational Leadership (p. 915)
- Organizational Leadership (p. 930)
- Special Education (p. 945)
- Teaching (p. 961)
- Teacher Leadership (p. 950)

In addition, the department provides opportunity for study leading to teacher certification and other types of educational and human services certification.

Educational Certificates

The Department of Graduate Education, Leadership, and Counseling provides opportunity for study leading to teacher certification and other types of educational certification in the following areas:

- Bilingual Education (p. 889)
- Business Education Teacher (p. 891)
- Director of Counseling Services (p. 908)
- Elementary Teacher (K–6) (p. 919)
- English as a Second Language (ESL) (p. 922)
- English Teacher (p. 921)
- Mathematics Teacher (p. 927)
- Music Teacher (p. 928)
- Early Childhood Preschool–Grade 3 Teacher (P–3) (p. 913)
- Reading Specialist (p. 936)
- School Administrator (Principal) (p. 934)
- School Counselor (p. 897)
- School Psychologist (p. 938)
- Science Teacher (Biological Sciences, Chemistry, Physics, Earth Science) (p. 941)
- Social Studies Teacher (p. 943)
- Supervisor of Instruction (p. 949)
- Teacher Leadership (p. 958)
- World Languages Teacher–French, German, Spanish (K–12) (p. 964)

Endorsement to Existing Teaching Certificates

- Bilingual Education (p. 889)
- English as a Second Language (ESL) (p. 924)

- Early Childhood Preschool–Grade 3 Teacher (P–3) (p. 913)
- Teacher-Coordinator of Cooperative Vocation/Technical Education (p. 896)
- Teacher of Students with Disabilities (p. 960)

General Master's Degree Application Requirements

All programs require an application available from the Office of Graduate Admission. A decision is made about an application for admission only when all required credentials have been submitted. Applications must be received by April 1 for summer session, May 1 for fall session, and November 1 for spring session unless otherwise specified for specific programs. Completed applications received after the official deadline may be given consideration pending program capacity.

The faculty encourages prospective students from diverse ethnic and cultural backgrounds to apply. The following are due by the application due date:

- A completed application form, with a non-refundable \$50 application fee;
- Official transcripts from all colleges and universities attended;
- Other such admission requirements as specified within the particular program to which you are applying;
- If the due dates are different, they will be specified within the program requirements.

General Master's Degree Requirements

To qualify for the degree of Master of Arts, the candidate must:

- Comply with the general requirements concerning graduate study;
- Enroll in graduate study at Rider for no fewer than two academic semesters or the equivalent thereof;
- Complete at least 33–60 semester hours of graduate credit in an approved program of studies;
- Complete an internship/practicum as required by individual programs;
- Successfully pass a written comprehensive examination except for the Master of Arts in Teaching degree; Educational Leadership degree; and Teacher Leadership degree;
- Maintain a grade point average of "B" (3.0) or better for work submitted for the master's degree with no more than two "C"s; and
- Complete the program within six years of the date the student enrolled in his/her first course unless an extension is approved by the Department of Graduate Education, Leadership, and Counseling. Students in the Clinical Mental Health Counseling program have ten years and students in Counseling Services program have eight years to complete the program.

Bilingual Education Certificate

Program Overview

Rider's bilingual endorsement program trains future educators to be sensitive to the cultural, sociological, linguistic, and psychological diversities that ELL students bring with them to school. The mission of the bilingual program is to provide the skills, attitudes and understandings necessary to teach non-native speakers of English in order for them to achieve their greatest potential through education for life. Furthermore, the program introduces future educators to the different laws and programs that influence the bilingual classroom.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 961).

Curriculum Overview

This is a 27 credit program requiring six courses taken in late afternoons/evenings followed by a full semester of full-time student teaching in a host school in the region.

Certificate Offered

- Bilingual Education Endorsement

Additional requirements for completion

- Completion of all courses before the clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes, and learning products for students with disabilities and strengths.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531 and CURR 538.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. *NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. The candidate gradually assumes a full load of teaching responsibility. These experiences test and strengthen the translation of educational theory and research into meaningful practice. An on-campus or site-based seminar accompanies the clinical experience. Seminars emphasize reflective development toward professionalism through sharing and analyses of experiences, and in-depth reports on teaching learners with disabilities and instructional modifications employed to meet their needs. Additional analyses of student learning and reflective assignments require candidates to connect their clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars, which include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning, and agencies available for students with disabilities; classroom management strategies; awareness of methods for strengthening student achievement and career readiness, panel sessions with veteran teachers who graduated from this program; panel sessions with principals and superintendents who provide advice about long-term professional development; interviews with special education teachers who provide advice about meeting the needs of students with disabilities; and wrap-up reflective sessions at the conclusion of the semester.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

CURR 771 Supervised Clinical Experience in Teaching 3 Credits

This practicum is a condensed version of the Internship in Teaching. It is available only to interns seeking teacher certification who already have a year of successful, full-time teaching experience or its equivalent. A special application must be made and approved for enrollment in the course. The practicum requires six weeks of full-time, supervised daily participation in a school setting. After a brief period of orientation to the school and classroom, the intern assumes a full load of teaching responsibility at the school. The experience finetunes the teaching abilities of interns and enables them to demonstrate competence in the specialty for which they seek certification.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

Business Education/Marketing Education Comprehensive (K-12) Certificate

Program Overview

The Business Education/Marketing Education Comprehensive (K-12) graduate-level certificate program is designed for college graduates seeking initial certification as a teacher of business education. The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The teaching internship (student teaching) at the end of the program requires full-time enrollment for one semester. The program is state approved and nationally accredited.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 961).

Curriculum Overview

This is a 21 credit program requiring four courses taken in late afternoons/evenings followed by a full semester of full-time student teaching in a host school in the region.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes, and learning products for students with disabilities and strengths.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 703.

BSED 530 Emerging Instructional Strategies in Business Education 3 Credits

Emphasis is placed on the enhancement of teaching effectiveness in business education as emerging instructional strategies are reviewed and studied. Special attention is devoted to the new technology and its use in business education while focusing attention to the present and future needs of the employer. Current instructional materials are presented and utilized. Master practicing business education teachers will augment the instructor's presentations.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. The candidate gradually assumes a full load of teaching responsibility. These experiences test and strengthen the translation of educational theory and research into meaningful practice. An on-campus or site-based seminar accompanies the clinical experience. Seminars emphasize reflective development toward professionalism through sharing and analyses of experiences, and in-depth reports on teaching learners with disabilities and instructional modifications employed to meet their needs. Additional analyses of student learning and reflective assignments require candidates to connect their clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars, which include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning, and agencies available for students with disabilities; classroom management strategies; awareness of methods for strengthening student achievement and career readiness, panel sessions with veteran teachers who graduated from this program; panel sessions with principals and superintendents who provide advice about long-term professional development; interviews with special education teachers who provide advice about meeting the needs of students with disabilities; and wrap-up reflective sessions at the conclusion of the semester.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

CURR 771 Supervised Clinical Experience in Teaching 3 Credits

This practicum is a condensed version of the Internship in Teaching. It is available only to interns seeking teacher certification who already have a year of successful, full-time teaching experience or its equivalent. A special application must be made and approved for enrollment in the course. The practicum requires six weeks of full-time, supervised daily participation in a school setting. After a brief period of orientation to the school and classroom, the intern assumes a full load of teaching responsibility at the school. The experience finetunes the teaching abilities of interns and enables them to demonstrate competence in the specialty for which they seek certification.

Clinical Mental Health Counseling (M.A.)

Program Overview

The Master of Arts in Clinical Mental Health Counseling is a 60-credit program that prepares students for counseling positions in community agencies, mental health agencies, hospitals, government facilities, institutions of higher education, industry and private practice. This program meets the academic requirements for the Licensed Professional Counselor (LPC) (<http://www.njconsumeraffairs.gov/pc/Pages/default.aspx>) in New Jersey, Pennsylvania, and most other states. It also meets all educational requirements for certification as a National Certified Counselor (NCC), (<http://www.nbcc.org/Certification/NationalCertCounselor>) Approved Clinical Supervisor (ACS) (<http://www.cce-global.org/ACS>), Board Certified Coach (BCC) (<http://www.cce-global.org/bcc>) and Licensed Clinical Alcohol and Drug Counselor (LCADC) (<http://certbd.org>) and Certified Alcohol and Drug Counselor (CADC) (<http://certbd.org>) in New Jersey. Students

may take two additional courses and a SAC practicum in a school to qualify for the Student Assistance Coordinator (SAC) CEAS (<http://www.state.nj.us/education/educators/license/endorsements/3461CEAS.pdf>). (<http://www.state.nj.us/education/educators/license/endorsements/3461CEAS.pdf>) Master's students in their final year are provided with preparation for the National Counselor Exam (NCE) (<http://www.nbcc.org/Exam/NationalCounselorExaminationForLicensureAndCertification>) which is taken during their last semester at Rider.

In keeping with the University's core mission, all degree and certification programs are student-centered, created to be flexible to meet the needs of returning and professional students with busy lives, provide cutting-edge instruction, hands-on practice in mental health organizations and agencies, and supportive faculty who are dedicated to mentoring students. The faculty and training are focused on wellness counseling and positive psychology, with an emphasis on clients' strengths, rather than on deficits.

Curriculum Overview

All students in this area of study are required to complete 60 credits of coursework and to participate in at least 700 hours of counseling fieldwork in an agency. An appropriate agency for the intern is one which provides a program of services designed to help individuals function to their optimal capacity. Such programs exist in a wide variety of settings, such as mental health clinics, correctional facilities, hospital settings, family service centers, comprehensive rehabilitation centers, social service organizations, vocational counseling programs, private counseling programs, substance abuse treatment programs, employee assistance programs, college counseling centers, and other appropriate sites.

All degree candidates must purchase student professional liability insurance.

¹ For SAC students, this course or COUN 516 must be taken prior to practicum

² Some electives may have prerequisites

Highly qualified undergraduate psychology majors are eligible to apply in their junior year for the accelerated BA-MA program in Clinical Mental Health Counseling. This program enables students to take graduate courses during their senior year that count toward both the bachelor's and master's degrees.

Applicants for this accelerated program must have a GPA of at least 3.0 and must meet the same admission requirements as all other applicants. Students must apply by February 10 of their junior year. Those admitted must maintain a 3.0 GPA throughout the bachelor's part of the program. In addition, performance in graduate-level courses is subject to all academic policies and requirements of the Department of Graduate Education, Leadership, & Counseling.

Students accepted into the CMHC accelerated program who would like to complete the BA/MA in 5 ½ years will take the following 15 credits of graduate courses during their senior year, in addition to the necessary undergraduate courses:

COUN 500	Introduction to Counseling and Helping Professions	3
COUN 503	Group Counseling	3
COUN 550	Counseling Techniques Laboratory	3
CNPY 502	Theories of Counseling and Helping Professions	3
CNPY 514	Psychopathology	3

* Undergraduate students who would like to take fewer than 15 graduate credits during their senior year are also eligible to apply for the accelerated program. Taking fewer than 15 courses as an undergraduate student may mean that it will take longer than 5 ½ years to complete the BA/MA.

Following successful completion of the undergraduate program, students will automatically be matriculated into the Clinical Mental Health Counseling MA-degree program, where they will complete the remaining MA-level coursework.

Note: The graduate credits taken during the student's senior year would appear in the GPA and credit hours of the undergraduate transcript *until* the student matriculates as a graduate student into the counseling program. This ensures that all decisions about the undergraduate student while he/she is still in the psychology program will be on the basis of his/her complete academic performance. After the student receives the bachelor's degree and matriculates into the Master's program, all graduate courses will then be included on the graduate transcript in the GPA and credit hours, and a note to that effect will appear on the undergraduate transcript. Course credits will not be counted on both transcripts.

Courses and Descriptions

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

CNPY 516 Advanced Psychopathology 3 Credits

An in-depth study of psychopathology with emphasis on developmental and personality disorders, and physiological disturbances. Includes assessment, classification, and treatment with emphasis on utilization in a variety of counseling and school settings. Biological, pathological, pharmacological bases of mental disorders are introduced and discussed in relationship to specific disorder classifications.

Prerequisite(s): CNPY514 or permission of instructor.

CNPY 518 Counseling Children, Adolescents and Families 3 Credits

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 503 Group Counseling 3 Credits

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

Prerequisite(s): COUN 500, CNPY 502.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

COUN 510 Approaches to Family Counseling 3 Credits

Presents a basic understanding of major approaches of family counseling. Family counseling approaches covered include structural, systems, Ackerman, Satir, and analytical. These approaches are presented as related to major problem centered family concerns—child-rearing concerns, alcohol, drugs, child abuse, dysfunctional marriage, divorce, etc. Emphasizes self-awareness as related to family development.

Prerequisite(s): COUN 500, CNPY 502, or permission of instructor or advisor.

COUN 515 Substance Abuse Counseling 3 Credits

Analyzes the development, intervention, and treatment of drug abuse and alcoholism. Designed to assist counselors in identifying drug abuse and alcoholism, examining the specialized approaches of counseling with these clients and reviewing the related elements; i.e., family participation, physical problems, effects on school or job, etc.

COUN 516 Strategies in Addiction Counseling 3 Credits

Analyzes the development, intervention and treatment of co-dependents. Designed to focus on the characteristics of co-dependency and how they were initiated in alcoholic families as well as other dysfunctional families. Symptoms will be discussed in terms of problems with intimacy, trust, eating disorders, assertiveness, love relationships and the differences among co-dependents. Specialized approaches to treating these areas will be discussed. (Classes will involve lecture, discussion and students will learn and experience group exercises for co-dependency treatment.)

Prerequisite(s): COUN 515 or permission of instructor.

COUN 520 Multicultural Counseling and Relationship Development 3 Credits

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships.

Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

COUN 525 Gender Issues in Counseling 3 Credits

Examines the psychological, physiological, historical, and socio-cultural factors that affect the development of women and men across the life span and discusses implications for counseling. Focuses on relevant gender issues including gender bias and equity, misdiagnosis, self-esteem, depression, violence and sexual abuse, the feminization of poverty, and the importance of relationship for women. Presents an overview of feminist psychotherapy and explores the context of the behavioral, emotional and biological problems that impact on mental health. Also discusses the emerging men's movement and trends in counseling men; introduces gay and lesbian issues, the issues of minority women, and factors in counseling the HIV/AIDS client.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

COUN 535 Holistic Wellness Counseling 3 Credits

Based on current methods and research, students will explore holistic wellness (e.g., spirituality, self-direction, work and leisure, friendship, and love) positive psychology (e.g., hope, forgiveness, etc.), and human change from personal and interpersonal perspectives.

Prerequisite(s): CNPY 502.

COUN 550 Counseling Techniques Laboratory 3 Credits

A basic laboratory pre-practicum for counseling services majors which provides opportunities for both observation of and participation in counseling activities. The purpose of this course is to provide students with their initial counseling experience under closely supervised conditions. The focus of this course is the development of basic counseling skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling process), and self development (the student as counselor) grounded in professional counseling theories.

COUN 585 Clinical Mental Health Counseling Practicum 3 Credits

A supervised experience in counseling and consulting techniques in mental health facility, community counseling agency, or college setting. Includes seminar discussions, interview analyses or audiotape/videotape observations, and individual supervision with the instructor. For the experienced counselor or the advanced counselor in training who desires to review and/or strengthen individual counseling and consulting techniques. A field placement of 100 hours is required with a minimum of 40 direct contact hours with clients. Students registering for this course should contact the instructor the semester prior to the course being offered.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 590 Internship in Counseling I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

Prerequisite(s): all other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

COUN 591 Internship in Counseling II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

COUN 660 Counseling Supervision: Issues, Concepts and Methods 3 Credits

This course introduces and critically examines issues and concepts that arise in the supervision of counseling and psychotherapy practitioners and trainees. Methods and techniques of supervision are presented to enable students to become knowledgeable and skilled providers of proficient clinical supervision. Psychotherapeutic, behavioral, integrative, systems, experiential, and developmental models of supervision are studied. The unique problems encountered in group, family, and couples counseling supervision are raised as well as legal, ethical, and multicultural issues. Administrative and contemporary issues such as inter- and intra-agency supervision, inter-agency communication, record keeping, evaluation, and taping of counseling sessions are examined.

Prerequisites: COUN 590.

EDPS 502 Psychological Development of the Child and Adolescent 3 Credits

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDPS 521 Statistics and Quantitative Analysis 3 Credits

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

Prerequisite(s): EDPS 520, EDUC 500.

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

Cooperative Education Coordinator Certificate

Program Overview

Rider University offers the two required graduate courses for this certificate. The applicant should refer to the certification requirements on the NJDOE website (<http://www.state.nj.us/cgi-bin/education/license/endorsement.pl?string=999&maxhits=1000&field=2>).

Certificate Offered

COUN 505	Vocational/Career Development	3
Total Credits		6

Courses and Descriptions

BSED 508 Organizing and Administering Cooperative Work Experience Programs 3 Credits

An overview of the current administrative and instructional strategies used in organizing and administering cooperative work experience programs at the secondary and post-secondary levels. Up-to-date concepts are reviewed relative to program approval, teacher coordinator certification, work agreements, labor laws, funding, reporting supervision of student learners, related instruction, student wages, and vocational student organizations. Current instructional materials are reviewed and evaluated. Improvement in the organization and administration of cooperative work experience programs is the primary goal.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

Counseling Services (M.A.)

Program Overview

The Master of Arts in Counseling Services (*school counseling concentration*) is a 48-credit program that prepares students for school counseling positions in elementary and secondary public and private schools. This program meets the educational requirements for state certification as a K-12 school counselor in New Jersey (<http://www.state.nj.us/education/educators/license/endorsements/2702S.pdf>), and meets the certification requirements of most other states. In addition, the program prepares students for the eight core content areas of the National Counselor Exam (NCE) (<http://www.nbcc.org/Exam/NationalCounselorExaminationForLicensureAndCertification>), required by the National Board of Certified Counselors (NBCC) in order to become a National Certified Counselor (<http://www.nbcc.org/Certification/NationalCertCounselor>). Students completing this program will also have met the educational requirements for Board Certified Coach (BCC) (<http://www.cce-global.org/bcc>) and, with two additional courses, for the Student Assistance Coordinator (SAC) (<http://www.state.nj.us/education/educators/license/endorsements/3461CEAS.pdf>) certificate.

In keeping with the University's core mission, this program is student-centered. Courses are offered in the evenings with full-time and part-time enrollment options available to meet the needs of returning and professional students with busy lives. Cutting-edge instruction, hands-on practice in schools, and supportive faculty who are dedicated

to mentoring students are core program components. The faculty and training are focused on wellness counseling and positive psychology, with an emphasis on the strengths of the individuals served, rather than on deficits.

Curriculum Overview

All students in this area of study are required to complete 48 credits of coursework and to take classes that cover the theories of counseling and psychotherapy, ethical and legal issues, counseling children, adolescents and their families, along with an elementary school counseling or secondary school counseling practicum and two internships. The practicum and internships require 700 hours of fieldwork in preparation for professional practice. Fieldwork placement occurs through close collaboration with Rider's clinical coordinator and is supervised by both practitioners in the field and professors in the classroom.

All degree candidates must purchase student professional liability insurance once they enter the field.

Highly qualified undergraduate psychology majors are eligible to apply in their junior year for the accelerated BA-MA program in School Counseling. This program enables students to take graduate courses during their senior year that count toward both the bachelor's and master's degrees.

Applicants for this accelerated program must have a GPA of at least 3.0 and must meet the same admission requirements as all other applicants. Students must apply by February 10 of their junior year. Those admitted must maintain a 3.0 GPA throughout the bachelor's part of the program. In addition, performance in graduate-level courses is subject to all academic policies and requirements of the Department of Graduate Education, Leadership, & Counseling.

Students accepted into the School Counseling accelerated program who would like to complete the BA/MA in 5 years will take the following 15

credits of graduate courses during their senior year, in addition to the necessary undergraduate courses:

COUN 500	Introduction to Counseling and Helping Professions	3
CNPY 502	Theories of Counseling and Helping Professions	3
COUN 503	Group Counseling	3
COUN 550	Counseling Techniques Laboratory	3
EDSO 501	Foundations of Counseling in Edu Settings: Referral Sources for Studetns /Students with Special Need	3

* Undergraduate students who would like to take fewer than 15 graduate credits during their senior year are also eligible to apply for the accelerated program. Taking fewer than 15 courses as an undergraduate student may mean that it will take longer than 5 years to complete the BA/MA.

Following successful completion of the undergraduate program, students will automatically be matriculated into the School Counseling MA-degree program, where they will complete the remaining MA-level coursework.

Note: The graduate credits taken during the student's senior year would appear in the GPA and credit hours of the undergraduate transcript *until* the student matriculates as a graduate student into the counseling program. This ensures that all decisions about the undergraduate student while he/she is still in the psychology program will be on the basis of his/her complete academic performance. After the student receives the bachelor's degree and matriculates into the Master's program, all graduate courses will then be included on the graduate transcript in the GPA and credit hours, and a note to that effect will appear on the undergraduate transcript. Course credits will not be counted on both transcripts.

Courses and Descriptions

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

CNPY 518 Counseling Children, Adolescents and Families 3 Credits

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

CNSC 580 Elementary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students will apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 581 Secondary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 503 Group Counseling 3 Credits

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

Prerequisite(s): COUN 500, CNPY 502.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

COUN 550 Counseling Techniques Laboratory 3 Credits

A basic laboratory pre-practicum for counseling services majors which provides opportunities for both observation of and participation in counseling activities. The purpose of this course is to provide students with their initial counseling experience under closely supervised conditions. The focus of this course is the development of basic counseling skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling process), and self development (the student as counselor) grounded in professional counseling theories.

COUN 580 Elementary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 581 Secondary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor-in-training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 590 Internship in Counseling I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

Prerequisite(s): all other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

COUN 591 Internship in Counseling II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDSO 501 Foundations of Counseling in Edu Settings: Referral Sources for Studetns /Students with Special Need 3 Credits

The course provides overview of the foundations of counseling in educational settings, including the historical roots; current and future trends, roles, and functions in multicultural schools and higher education settings; comprehensive developmental counseling programs; ethical school and higher education counseling practices; and individual and group counseling and consultation strategies, and evidence-based interventions and evaluations. In addition, the course will address community social services and educational-based programs (including special education and disability laws and accommodations) available to special needs students, other individuals and groups experiencing learning disabilities, and other temporary or chronic maladjustment. Reviews principles and methods utilized by social agencies, schools, and higher education settings.

EDSO 510 Sociological and Cultural Foundations of Education 3 Credits

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

Counseling Services, Educational Specialist

Program Overview

The Ed.S. in Counseling Services is a 66-credit program that meets the academic requirements for the Licensed Professional Counselor (LPC) (<http://www.njconsumeraffairs.gov/pc/Pages/default.aspx>) in New Jersey, Pennsylvania, and most other states. It also meets all educational requirements for certification as an Approved Clinical Supervisor (ACS) (<http://www.cce-global.org/ACS>) as per N.J.A.C. 13:34-10.2 and 13.1 and as a National Certified Counselor (NCC) (<http://www.nbcc.org/Certification/NationalCertCounselor>). Students may also qualify for the Student Assistance Coordinator (SAC) CEAS (<http://www.state.nj.us/education/educators/license/endorsements/3461CEAS.pdf>). It also provides opportunity for candidates whose masters degree in counseling was completed with 48 or less credits, to complete the 60 credits now required for LPC by many state counseling licensure boards. Such candidates may apply to the Ed.S. program as advanced students and apply their already-completed MA credits toward the Ed.S. degree. Candidates who wish to qualify for Licensed Clinical Alcohol and Drug Counselor (LCADC) (<https://www.certbd.org>) or Certified Alcohol and Drug Counselor (CADC) (<https://www.certbd.org>), may do so by completing all the educational requirements through the Ed.S. program.

Flexibilities built into the Ed.S. degree program allow for career change for both LPC's and school counselors. LPC's who wish to become school counselors can complete courses required to become certified school counselors and master's-level school counselors can complete the courses required for LPC's in many states. Practicing counselors who wish to become certified as Director of School Counselor Services (<http://www.state.nj.us/education/educators/license/endorsements/0602S.pdf>) or as Student Assistance Coordinators may also complete these through the EdS program. Clinical supervised hours obtained during the Ed.S. post-Master's program may count toward satisfying a portion of the supervised professional counseling experience requirement as per N.J.A.C. 13:34-11.2. Program faculty work with students to develop a customized plan of study necessary to accomplish their desired career goals.

Curriculum Overview

The Ed.S. in Counseling Services is a 66-credit program that is customized to the student's career goals. Some candidates may require more than 66 credits to achieve their desired professional objectives.

There are three concentrations:

- school counseling
- community counseling
- director of school counseling services

Individualized advising helps candidates develop and grow professionally in the following specialty areas:

- multicultural counseling issues
- college counseling and higher education affairs
- group counseling and process
- special needs of at-risk students
- legal and ethical issues in counseling
- career counseling and development
- substance abuse
- geriatrics/hospice issues
- probation/parole counseling
- elementary/secondary school counseling
- family and marital issues in counseling
- grief and crisis counseling
- grant writing/management

Counseling Services, Educational Specialist Requirements

- A minimum of 66 graduate credits including appropriate master's level work.
- Eighteen credits must be completed after admission to the Ed.S. for candidates from CACREP approved master's programs.

- Thirty credits must be completed after admission to the Ed.S. for all non-CACREP approved program graduates.
- Degree completion requires a minimum of 3.3 GPA.

The program will be individualized to allow students to meet their career goals and to provide in-depth training and experience in a specialized area.

Courses and Descriptions

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 503 Group Counseling 3 Credits

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

Prerequisite(s): COUN 500, CNPY 502.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

COUN 510 Approaches to Family Counseling 3 Credits

Presents a basic understanding of major approaches of family counseling. Family counseling approaches covered include structural, systems, Ackerman, Satir, and analytical. These approaches are presented as related to major problem centered family concerns--child-rearing concerns, alcohol, drugs, child abuse, dysfunctional marriage, divorce, etc. Emphasizes self-awareness as related to family development.

Prerequisite(s): COUN 500, CNPY 502, or permission of instructor or advisor.

COUN 515 Substance Abuse Counseling 3 Credits

Analyzes the development, intervention, and treatment of drug abuse and alcoholism. Designed to assist counselors in identifying drug abuse and alcoholism, examining the specialized approaches of counseling with these clients and reviewing the related elements; i.e., family participation, physical problems, effects on school or job, etc.

COUN 516 Strategies in Addiction Counseling 3 Credits

Analyzes the development, intervention and treatment of co-dependents. Designed to focus on the characteristics of co-dependency and how they were initiated in alcoholic families as well as other dysfunctional families. Symptoms will be discussed in terms of problems with intimacy, trust, eating disorders, assertiveness, love relationships and the differences among co-dependents. Specialized approaches to treating these areas will be discussed. (Classes will involve lecture, discussion and students will learn and experience group exercises for co-dependency treatment.)

Prerequisite(s): COUN 515 or permission of instructor.

COUN 520 Multicultural Counseling and Relationship Development 3 Credits

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

COUN 525 Gender Issues in Counseling 3 Credits

Examines the psychological, physiological, historical, and socio-cultural factors that affect the development of women and men across the life span and discusses implications for counseling. Focuses on relevant gender issues including gender bias and equity, misdiagnosis, self-esteem, depression, violence and sexual abuse, the feminization of poverty, and the importance of relationship for women. Presents an overview of feminist psychotherapy and explores the context of the behavioral, emotional and biological problems that impact on mental health. Also discusses the emerging men's movement and trends in counseling men; introduces gay and lesbian issues, the issues of minority women, and factors in counseling the HIV/AIDS client.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

COUN 535 Holistic Wellness Counseling 3 Credits

Based on current methods and research, students will explore holistic wellness (e.g., spirituality, self-direction, work and leisure, friendship, and love) positive psychology (e.g., hope, forgiveness, etc.), and human change from personal and interpersonal perspectives.

Prerequisite(s): CNPY 502.

COUN 550 Counseling Techniques Laboratory 3 Credits

A basic laboratory pre-practicum for counseling services majors which provides opportunities for both observation of and participation in counseling activities. The purpose of this course is to provide students with their initial counseling experience under closely supervised conditions. The focus of this course is the development of basic counseling skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling process), and self development (the student as counselor) grounded in professional counseling theories.

COUN 580 Elementary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 581 Secondary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor-in-training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 585 Clinical Mental Health Counseling Practicum 3 Credits

A supervised experience in counseling and consulting techniques in mental health facility, community counseling agency, or college setting. Includes seminar discussions, interview analyses or audiotape/videotape observations, and individual supervision with the instructor. For the experienced counselor or the advanced counselor in training who desires to review and/or strengthen individual counseling and consulting techniques. A field placement of 100 hours is required with a minimum of 40 direct contact hours with clients. Students registering for this course should contact the instructor the semester prior to the course being offered.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 586 Practicum II 1 Credits

The continuation of Practicum, this 1-credit course is required for those students who were unable to complete the 100-fieldwork hours of Practicum in the fall or spring semester. Students will continue at their Practicum fieldwork site and will be responsible for completing the remainder of their 100-hours. A grade will not be granted in Practicum until the successful completion of Practicum II. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor, director, and professor permission and a comprehensive plan for fieldwork- hour completion to the clinical coordinator. **Prerequisite(s):** COUN or CNSC 580, 581, or 585 and all other required course work must be completed or in progress. **Comments/Restrictions:** Program director approval with professor of record approval is required.

COUN 590 Internship in Counseling I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

Prerequisite(s): all other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

COUN 591 Internship in Counseling II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

COUN 600 Independent Study and Research in Counseling Services 1-3 Credits

Students may take two independent studies. However, under special circumstances, such as students seeking certifications (e.g., Student Assistance Coordinator), students may be approved by their advisor to take up to six COUN 600 3-credit courses for a total of 18 credits.

COUN 660 Counseling Supervision: Issues, Concepts and Methods 3 Credits

This course introduces and critically examines issues and concepts that arise in the supervision of counseling and psychotherapy practitioners and trainees. Methods and techniques of supervision are presented to enable students to become knowledgeable and skilled providers of proficient clinical supervision. Psychotherapeutic, behavioral, integrative, systems, experiential, and developmental models of supervision are studied. The unique problems encountered in group, family, and couples counseling supervision are raised as well as legal, ethical, and multicultural issues. Administrative and contemporary issues such as inter- and intra-agency supervision, inter-agency communication, record keeping, evaluation, and taping of counseling sessions are examined.

Prerequisites: COUN 590.

COUN 690 Internship in Counseling Speciality I 3-6 Credits

This internship provides on-the-job clinical experience in approved settings. Placement is selected based on students' specialty area goals and must be approved by the faculty advisor the semester prior to actual placement. Students must also submit in writing a description of clinical activities available in the field site before the placement is approved. Students will be required to attend a weekly seminar during which time each student will present and/or discuss legal, ethical, multicultural, contemporary, and clinical issues in her/his specialty area.

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 503 Psychological Development of the Adult and Aging 3 Credits

Surveys psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human adult development and transitions throughout the adult life span. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the adult and aging will be examined.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

CNPY 515 Consultation in School and Agency Settings 3 Credits

This course provides an introduction to school and agency based consultation theories and practices. Contemporary models of consultation are presented with students' emphasis on mental health, behavioral, and systems approach. In addition to the study of conceptual models, the development of skills in the consultation process in school and/or agency settings is emphasized. Students engage in behavioral consultations with consultees in approved placements.

CNPY 516 Advanced Psychopathology 3 Credits

An in-depth study of psychopathology with emphasis on developmental and personality disorders, and physiological disturbances. Includes assessment, classification, and treatment with emphasis on utilization in a variety of counseling and school settings. Biological, pathological, pharmacological bases of mental disorders are introduced and discussed in relationship to specific disorder classifications.

Prerequisite(s): CNPY514 or permission of instructor.

CNPY 518 Counseling Children, Adolescents and Families 3 Credits

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

CURR 531 Strategies for Curriculum Development, Design, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDPS 502 Psychological Development of the Child and Adolescent 3 Credits

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDPS 521 Statistics and Quantitative Analysis 3 Credits

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

Prerequisite(s): EDPS 520, EDUC 500.

EDSO 501 Foundations of Counseling in Edu Settings: Referral Sources for Studetns /Students with Special Need 3 Credits

The course provides overview of the foundations of counseling in educational settings, including the historical roots; current and future trends, roles, and functions in multicultural schools and higher education settings; comprehensive developmental counseling programs; ethical school and higher education counseling practices; and individual and group counseling and consultation strategies, and evidence-based interventions and evaluations. In addition, the course will address community social services and educational-based programs (including special education and disability laws and accommodations) available to special needs students, other individuals and groups experiencing learning disabilities, and other temporary or chronic maladjustment. Reviews principles and methods utilized by social agencies, schools, and higher education settings.

EDSO 510 Sociological and Cultural Foundations of Education 3 Credits

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

Dance Education (K-12) Certificate

Program Overview

The graduate-level Dance Education Teacher Certification Program is designed for college graduates seeking initial certification as a teacher of dance in school settings. This is a streamlined, rigorous, and sequential program of professional studies that combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching) at the end of the program requires full-time enrollment for one semester. The program is state approved and nationally accredited.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 961).

Curriculum Overview

This is a 21-credit program requiring courses taken in late afternoons/evenings followed by a full semester of full-time student teaching in a host school in the region.

Certificate Offered

- Teacher of Dance (K-12) Certificate

Additional Requirements for Completion of the Certificate:

- Completion of all courses before final clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade of better.

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes, and learning products for students with disabilities and strengths.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 703.

CURR 711 Pedagogy and Methodology in Dance 3 Credits

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. Crosslisting the existing methods course in Dance for beginning teachers offered at the undergraduate level (DAN 450).

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. The candidate gradually assumes a full load of teaching responsibility. These experiences test and strengthen the translation of educational theory and research into meaningful practice. An on-campus or site-based seminar accompanies the clinical experience. Seminars emphasize reflective development toward professionalism through sharing and analyses of experiences, and in-depth reports on teaching learners with disabilities and instructional modifications employed to meet their needs. Additional analyses of student learning and reflective assignments require candidates to connect their clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars, which include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning, and agencies available for students with disabilities; classroom management strategies; awareness of methods for strengthening student achievement and career readiness, panel sessions with veteran teachers who graduated from this program; panel sessions with principals and superintendents who provide advice about long-term professional development; interviews with special education teachers who provide advice about meeting the needs of students with disabilities; and wrap-up reflective sessions at the conclusion of the semester.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

CURR 771 Supervised Clinical Experience in Teaching 3 Credits

This practicum is a condensed version of the Internship in Teaching. It is available only to interns seeking teacher certification who already have a year of successful, full-time teaching experience or its equivalent. A special application must be made and approved for enrollment in the course. The practicum requires six weeks of full-time, supervised daily participation in a school setting. After a brief period of orientation to the school and classroom, the intern assumes a full load of teaching responsibility at the school. The experience finetunes the teaching abilities of interns and enables them to demonstrate competence in the specialty for which they seek certification.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

Developing People and Organizations Certificate

Program Overview

This track is aimed at preparing students to be successful, strategic and impactful professionals who are able to work effectively through others.

The program offers insight into:

- human and organizational relationships;
- enhances the capacity for sound analytical judgment; and
- encourages the ability to see the "big picture" as it relates to an organization and its environment.

Curriculum Overview

Coursework focuses on applied action grounded in theory, and embraces principles applicable to administrative issues in the private, public

and nonprofit sectors. The courses enable students to enhance their knowledge and skills in:

- employee recruitment
- leadership development
- group dynamics
- organizational change
- conflict management
- succession planning
- training and development
- adult learning theory

Courses and Descriptions

LEAD 510 Organizations: Design and Dynamics 3 Credits

This course will provide students with foundational knowledge in the area of organization studies. Students will gain insight into organizational structure and how it affects interdepartmental behaviors, communication and work flow. The course emphasizes how organizational environment and culture generate and reinforce the way organizational systems work and how leaders operate within these organizational contexts.

LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 512 Forms of Diversity in Organizations 3 Credits

Increasingly, leaders and employees are part of a more diverse, multiethnic and globally influenced workforce. Students will become more conversant with forms of diversity, such as different cultural traditions, as well as differences in generational sensibilities, ableness, gender, and level of adult development. Students will learn about the different “worldviews” which organizational members bring into the organization, and how that affects their ability to work together. The course develops students’ knowledge of and skills in practicing: principles for optimizing human performance in organizations, cultural intelligence, human diversity, and leading multicultural organizations.

LEAD 531 Developing The Human Side of Organizations 3 Credits

This course examines Strategic Human Resources Management (SHRM) within today’s organizations, and is designed to provide students with a comprehensive understanding of SHRM practices from a systemic and strategic perspective. Students learn approaches leaders use to recruit, select, evaluate, and develop employees and strategies to create a positive work environment.

LEAD 532 Program Design for Training and Development in Organizations 3 Credits

This course provides a full circle approach to workforce training and development that is applicable to professionals in human resources, organizational development, or other leaders who see themselves as trainers, mentors and coaches. The course is designed for students to explore “real world” applications for programs, services and operations in a training environment, and covers key principles such as adult learning theory, facilitation skills, curriculum development, needs assessment, training methodology and techniques, resources and constraints, as well as learning how to evaluate and improve the efficacy of training programs.

LEAD 533 Conflict and Crisis Resolution in Organizations 3 Credits

Leaders face conflict and crisis in their organizations. Being effective in their resolution is an important leadership attribute. Skills that support positive and integrative outcomes include mediation, negotiation and crisis resolution skills. This course will use multiple case studies and role-playing assignments to engage students in understanding how individuals and teams handle mediation and negotiation scenarios. The course will also use multiple case studies to enhance students’ understanding of the components of effective and ineffective leadership for crisis.

LEAD 534 Facilitation and Team Leadership 3 Credits

This course examines the characteristics and behaviors of teams that produce good results and/or generate new ideas. The focus of the course is on how to lead high functioning teams and the development of facilitation capabilities, so that students can effectively lead teams and organizations.

Director of School Counseling Services Certificate

Program Overview

The program is designed for school counselors who wish to be certified as director of school counseling services. The Director of School Counseling Services endorsement authorizes the holder to serve as a director, administrator or supervisor of school counseling services, including the supervision of educational activities in areas related to and within the counseling program in grades preschool through 12.

Curriculum Overview

The applicant’s academic and professional background are assessed in terms of state certification requirements (<http://www.state.nj.us/education/educators/license/endorsements/0602S.pdf>) in order to determine an appropriate plan of study, however, three courses are typically required.

EDAD 505	Supervisor/Teacher Leadership for Improved Instruction and Student Learning	3

or coun 660

Courses and Descriptions

CURR 531 Strategies for Curriculum Development, Design, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/ research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

COUN 660 Counseling Supervision: Issues, Concepts and Methods 3 Credits

This course introduces and critically examines issues and concepts that arise in the supervision of counseling and psychotherapy practitioners and trainees. Methods and techniques of supervision are presented to enable students to become knowledgeable and skilled providers of proficient clinical supervision. Psychotherapeutic, behavioral, integrative, systems, experiential, and developmental models of supervision are studied. The unique problems encountered in group, family, and couples counseling supervision are raised as well as legal, ethical, and multicultural issues. Administrative and contemporary issues such as inter- and intra-agency supervision, inter-agency communication, record keeping, evaluation, and taping of counseling sessions are examined.

Prerequisites: COUN 590.

Doctor of Educational Leadership

Rider's Doctor of Educational Leadership brings together passionate and experienced educators to collaboratively study the complex and pressing issues facing students and teachers today — and to develop practical, evidence-based solutions to respond to those issues through action research.

The **36-month, 51-credit program** involves two years of coursework and a year of dissertation research and analysis. Hybrid (online and on-campus) studies and summer residencies enable education professionals to pursue the degree without career interruption.

The goal of Rider's Ed.D. program is to prepare skilled professionals who use research and scholarship to inform their leadership and decision making. Through the required coursework, you will develop a greater understanding and sense of context for today's major educational challenges, including:

- Educational reform
- Instructional leadership
- Educational accountability and assessment
- Research methods and data analysis
- Social context of education
- Politics and governance
- Teachers and teaching
- Resource allocation and deployment

Much of the program's coursework will relate to issues facing your own school, district or college, giving you practical knowledge and insights that you can apply every day to your work. Early in the program, you will learn how action research can be used to determine needs and options, and begin working with members of the doctoral faculty to identify a potential problem, issue or opportunity of interest to you. You will then implement and evaluate your own dissertation change project.

Standards-Based Studies

The curriculum is built around the National Policy Board for Educational Administration's student-centric **2015 Professional Standards for Educational Leaders** (formerly known as the ISLLC Standards).

Prepared for and by educational leaders, the standards focus on 10 high-impact areas that drive and measure excellence in professional practice:

1. Mission, Vision and Core Values

2. Ethics and Professional Norms
3. Equity and Cultural Responsiveness
4. Curriculum, Instruction and Assessment
5. Community of Care and Support for Students
6. Professional Capacity of School Personnel
7. Professional Community for Teachers and Staff
8. Meaningful Engagement of Families and Community
9. Operations and Management
10. School Improvement

Program Format

A defining element of this innovative doctoral program is its cohort model of 10 to 12 students. This design creates a highly supportive and interactive learning environment that promotes peer-to-peer learning and networking, as well as close mentoring relationships between faculty and students. The coursework is progressive, with each class building the knowledge base.

Program Features

- **Flexibly designed** around the schedules of working professional educators
- **Asynchronous online classes** throughout each semester
- **Three on-campus Saturday sessions** (9 a.m. – 4 p.m.) each fall and spring semester
- **8-day summer residencies in July** (2 consecutive weeks, Monday through Thursday)

The Online Experience

Your online courses will be asynchronous, enabling you to complete most of your course assignments and activities at the time and place that's best for you. For example, discussion board question responses can be posted and assignments submitted at a time that is convenient (as long as the activity is completed by the stated due date).

Real-time, interactive e-sessions will be scheduled periodically. Over the course of your studies, peer-to-peer and faculty interactions will include such activities as team projects and special presentations. (*Note: Web cam access will be needed for these sessions.*)

One-to-one access to our doctoral faculty is a critical part of the program. Your professors will be available for meetings on-campus, as well as by phone or streaming video. Each semester, your professors will interact with you by phone and email, participate actively in discussion boards and webinars, and provide feedback on assignments.

You will be assisted in all your scheduling and registration needs, as well as planning your coursework and maintaining academic progress based on your goals (a minimum 3.0 GPA is required for the doctoral program). You also will have full access to services and resources of the University.

Courses

EDLD 800 Strategic Management, Organizational and Moral Leadership Behavior in a Cultural of Learning 3 Credits

This course will challenge students to embrace a system view of leadership and organizational change at the organizational level. Students will compare, contrast and critique theories and models of organizational learning, knowledge creation, and organizational capacity building and apply them to their own organizational settings. The course will focus on three leadership standards: instructional leadership, operational and managerial leadership, and professional culture. While the course will focus on conceptual frameworks and theory, it is a practice-based course. The course will enhance student ability to think systematically and develop comprehensive understanding of core competencies required to lead, initiate and sustain change in organizations. It investigates process and content issues of team building, interpersonal and group relations, and effective problem solving and decision making skills in collaborative environments. The course emphasizes the moral, ethical and social responsibilities of organizational leaders, as well as the application of principles to organizational leadership behavior and decision-making. Students will also investigate current research trends regarding ethical issues in education and other organizational contexts.

Prerequisite(s): Masters' Degree.

EDLD 801 Action Research: Principles and Methods 3 Credits

This course provides an introduction to action research, with emphasis on its application in educational settings. The course covers definitions and purposes of action research. Students will explore theoretical, methodological, and ethical issues pertinent to action research. During the course, students will engage in an action research project in an educational setting.

Prerequisite(s): Masters' Degree.

EDLD 802 Educational Change, Systemic Reform, Exercising the Politics of Change 3 Credits

This course will provide students with the skills necessary to achieve educational reform and improvement while navigating the political environment within educational institutions. Through this course, students will analyze various theories and how these ideas apply to education, organizations, change, and leadership.

Prerequisite(s): Masters' Degree.

EDLD 803 Instructional Leadership and Educational Reform 3 Credits

Through this course, students will examine contemporary educational practices and their relationship to leadership theories, models, and strategies. Participants will investigate research based instructional practices and develop the skills necessary to identify issues within organizations in suburban and urban settings. The course will provide students with a deep knowledge of the educational challenges faced by educational leaders in today's society. The focus will be on learning a successful organization through the implementation of research based strategies.

Prerequisite(s): Masters' Degree.

EDLD 804 Community Building and Sustaining Community Partnerships 3 Credits

Drawing on philosophies/theories, processes, and practices that build and sustain effective school-community partnerships, this course addresses the identification and utilization of community resources and the development of effective intra- and inter-organizational strategies, community linkages, and collaborative efforts necessary to provide for the holistic needs of students and families. Special attention is focused on the role of school leaders in planning and implementing community-wide and building level communications and involvement networks, through the development of practical action learning sets and tools. Building Commitment: How do leaders build and use public awareness and commitment to support their schools?

Prerequisite(s): Masters Degree.

EDLD 805 Valuing Diversity/Equity: Developing and Fostering a Community of Learners 3 Credits

The focus of the course is academic excellence with equity. The value orientation of the course is toward high-quality developmental outcomes for youth of all racial, ethnic, and social class backgrounds. With an emphasis on students of color and youth from less-advantaged families, the course explores several policy and strategic responses to achievement disparity: identify and work to remove key structural barriers to educational equity; excellence with equity goals; design more effective policies and practices to improve the quality of teaching; support families with ideas and practices for parenting children more effectively; engage youth to reshape their culture of achievement to align with their most positive values. The course explores theories, evidence, designs, methods, and mechanisms associated raising achievement and closing gaps.

Prerequisite(s): Masters' Degree.

EDLD 806 Research Proposal Development 3 Credits

This course builds on the action research course to more clearly define the rationale and procedures of educational and social science research. The course is designed for our first-year doctoral students. Topics will include the nature and purpose of research, planning and conducting research, critiquing and evaluation research, sampling, survey and experimental design, evaluation research, naturalistic observation and inquiry, measurement and methods of data collection, ethics, and the use of computers in data analysis. Methods are considered for collecting both quantitative and qualitative data. Students will build on prior project ideas, concepts, and research practice to more fully develop into their Dissertation of Practice topic. This course has two objectives: to increase participants' knowledge of methods for making causal inferences in quantitative research, and to provide participants with a forum for presenting and receiving feedback on their research topic for the Dissertation of Practice.

Prerequisite: Master Degree.

EDLD 807 Law and Policy 3 Credits

This course explores legal, ethical and politics issues governing PreK-12 education in America and the legal responsibilities and powers of state and local governing bodies and individuals that arise in elementary and secondary schools. Emphasis is given to federal and state statutes and case law affecting due process, liability, equal protection, and the rights of teachers and students in order to better understand the risks in education management and possible strategies to reduce those risks. The course will explore evolving legal standards on a variety of issues. The course will draw on real cases and legal/policy dilemmas that practitioners face, and focus on preventive law - providing current and future school learners with knowledge and skills they will need to make sound decisions, advance important educational objectives, and minimize legal problems.

Prerequisite: Master Degree.

EDLD 808 Generating, Using, and Assessing Data Accountability and Student Assessment 3 Credits

This course will develop the skills necessary for educational leaders to identify and define problems, implement data collection methods, and analyze, interpret, and report data across multiple levels from the individual student to the larger system. Students will gain the knowledge and skills to use data in decision making within a problem solving framework that enables evaluation of instructional programs and practices. Within this course, students will engage in activities designed to enhance skills in data-based decision making, including: large and small group discussion; review of the extant literature base; review and use of different technologies and statistical methods for data collection and analyses; case studies and simulated data analyses; and application of skills in real world settings. Attainment of these skills will prepare the student for the dissertation process to serve as an instructional leader in the field. The course references and aligns with state adopted core curriculum content standards and professional development standards, the Standards for Schools Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite: Master Degree.

EDLD 809 Finance, Fundraising and Fiscal Management 3 Credits

Financial and managerial leadership of a school building or district is a primary factor in the success or failure of school instructional programs. This course provides an opportunity for public and private school practicing and prospective administrators to gain an understanding of their role in these critical areas. Providing the resources to fund academics/instruction/athletics, facilities and capital projects is a focus of this course. A comprehensive understanding of the financial implications of systemic reform, centralized goal setting, accountability standards, and decentralized forms of site-based management, school choice, and charter schools will be a focus of study. This course will also provide a comprehensive overview of fund raising. Students are provided with an ethical foundation and are introduced to basic terminology and concepts in the field. Various fund raising vehicles are surveyed and participants learn to apply fund raising strategies that are appropriate to their organizational setting.

Prerequisite: Master Degree.

EDLD 810 Curriculum Leadership: Transforming Teachers/Developing Teacher Talent 3 Credits

This course will focus on the complex nature of teaching and learning and provide participants with the skills necessary to guide instructional practice. Adult learning theory will be examined as will curriculum theories, instructional practices, professional development, and human capital.

Prerequisite: Master Degree.

EDLD 811 Innovation and the Use of Educational Technology 3 Credits

This course addresses the intersection of organizational change and educational technology. Students will develop a philosophy of educational technology and explore related issues in policy, diversity, ethics, and evaluation. The course also covers research and theory on organizational change and processes for developing a culture of innovation. Students will apply theories of organizational change to the implementation and use of technology in educational contexts.

Prerequisite: Master Degree.

EDLD 812 Leading Programs for Diverse Learners and At Risk Students 3 Credits

This course examines some of the best practices for supporting diverse learners and at-risk students and some of the reasons behind the intrinsic and bureaucratic/policy barriers that may hinder their success. Schools are faced with an increasing number of diverse learners and at-risk students who require additional academic, social and/or medical supports for them to achieve success. This course will examine the root causes that may hinder student success and some of the programs and approaches that have proved successful in meeting their needs.

Prerequisite: Master Degree.

EDLD 813 Dissertation of Practice I/Research Proposal Development Defense 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research.

Prerequisite: Master Degree.

EDLD 814 Dissertation of Practice II 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice I.

Prerequisite(s): Master Degree.

EDLD 815 Dissertation of Practice III 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice II.

Prerequisite(s): Master Degree.

EDLD 816 Dissertation of Practice IV 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice III.

Prerequisite(s): Master Degree.

Early Childhood Teacher (Preschool-3) Certificate

Program Overview

The graduate-level Early Childhood Teacher Certification Program is designed for college graduates seeking initial certification as a preschool-grade 3 teacher. This is a streamlined, rigorous, and sequential program of professional studies that combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The teaching internship (student teaching) at the end of the program requires full-time enrollment for one semester. The program is state approved.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 961).

Curriculum Overview

This is a 24 credit program requiring five courses taken in late afternoons/evenings followed by a full semester of full-time student teaching in a host school in the region.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes, and learning products for students with disabilities and strengths.

CURR 702 Early Literacy Development for Diverse Learners 3 Credits

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. The candidate gradually assumes a full load of teaching responsibility. These experiences test and strengthen the translation of educational theory and research into meaningful practice. An on-campus or site-based seminar accompanies the clinical experience. Seminars emphasize reflective development toward professionalism through sharing and analyses of experiences, and in-depth reports on teaching learners with disabilities and instructional modifications employed to meet their needs. Additional analyses of student learning and reflective assignments require candidates to connect their clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars, which include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning, and agencies available for students with disabilities; classroom management strategies; awareness of methods for strengthening student achievement and career readiness, panel sessions with veteran teachers who graduated from this program; panel sessions with principals and superintendents who provide advice about long-term professional development; interviews with special education teachers who provide advice about meeting the needs of students with disabilities; and wrap-up reflective sessions at the conclusion of the semester.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

CURR 771 Supervised Clinical Experience in Teaching 3 Credits

This practicum is a condensed version of the Internship in Teaching. It is available only to interns seeking teacher certification who already have a year of successful, full-time teaching experience or its equivalent. A special application must be made and approved for enrollment in the course. The practicum requires six weeks of full-time, supervised daily participation in a school setting. After a brief period of orientation to the school and classroom, the intern assumes a full load of teaching responsibility at the school. The experience finetunes the teaching abilities of interns and enables them to demonstrate competence in the specialty for which they seek certification.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

ECED 507 Emergent Literacy 3 Credits

Examines perspectives on literacy acquisition including the social-constructivist perspective. Examines the processes of comprehension and composition through the language systems for written language: the grapho-phonetic, syntactic, semantic, and pragmatic. Explores the components of these processes including concepts of print, knowledge of the alphabet, phonological awareness, language play, literary genres, spelling development, vocabulary development, and word recognition.

ECED 532 Families, Community, and Diversity in Early Childhood Education 3 Credits

This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ECED 550 Development Methods and Assessment in Early Childhood Education 3 Credits

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

Educational Leadership

Program Overview

The program in Educational Leadership at Rider University prepares candidates for leadership positions at different administrative levels in elementary and secondary schools, colleges and related educational organizations. All programs are accredited by NCATE/CAEP. The program has been designed to be developmental and experiential in nature, fostering ethical behavior and the improvement of self and one's profession. Candidates are prepared for leadership opportunities in a collegial and collaborative academic environment that promotes inquiry and discovery, personal growth and initiative, and professional development. The Option Sequences build upon and reference the Professional Standards for School Leaders 2015, and the Standards of the National Policy Board for Educational Administration, utilized by the Educational Leadership Constituent Council 2011 (ELCC).

Preparing Principals for New Emerging Needs

Rider's Educational Leadership program recognizes that it is principals who are best positioned to lead the effort in their schools to ensure that teaching and learning are as excellent as possible. Principals who have a school-wide focus on better teaching and learning, who know how to create a vision and share authority, and who are prepared to be accountable for achieving the school's educational goals, are vital to ensuring the quality of our children's education. The professionals in our College of Education and Human Services work with our participants to develop and evaluate curricula, use data to diagnose student needs, coach teachers, plan professional development in their schools, and establish school-wide norms that support high quality teaching and learning.

Curriculum Overview

Leading to an Master of Arts in Educational Leadership, the Principal Leadership program's cohort-based, executive-style format brings educational peers together to study, network and learn as a unit throughout the program. Participants engage in online classes during the school year, and attend two residencies on Rider's Lawrenceville campus each summer. The program's flexible blended learning format recognizes the demands of the teaching profession while maintaining the rigors of a quality leadership training program. Participants pursue their graduate studies without interrupting their professional and personal responsibilities. Candidates complete their graduate studies in two years, and are eligible to apply for both the principal and supervisor certificates.

Educational Leadership Highlights

The 36-credit program of study consists of 12 courses that focus on three areas of leadership:

- personal leadership
- instructional leadership
- school culture leadership

An accomplished and distinguished faculty whose members bring deep practical and theoretical knowledge to their disciplines leads the program. There is close integration of coursework and fieldwork, using techniques such as case studies, problem-based learning and journaling to encourage continuous reflection about the connections between theory and practice. The curriculum heavily emphasizes teaching and learning, school redesign and collaborative decision-making. Relevant

field-based experiences (Leadership Growth Projects) are also integrated throughout the program of study, beginning with the very first course.

Planned Internship Experiences

This year-long aspect of the program emphasizes both the management and instructional facets of leadership for increased student performance. Coordinated by the program director at Rider and a school-based mentor, participants develop the skills needed to strategically transform public schools that prepare students for college and career success.

EDAD 505	Supervisor/Teacher Leadership for Improved Instruction and Student Learning	3
EDAD 511	Group Process in Supervision for Creative Change and Collaboration in Schools	3
Group III—Curriculum and Instruction		
CURR 531	Strategies for Curriculum Development, Design, Innovation and Change	3
CURR 538	Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners	3
CURR 548	Curriculum and Instruction for Diverse Learners	3
Group IV—Foundations		

EDUC 515	Issues in American Schools and Society	3
Total Credits		36

1. Meet general master's degree requirements.
2. Candidates will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.
3. Reference the ISLLC and ELCC Standards throughout the program.
4. Develop and refine the personal leadership platform statement throughout the program.
5. Complete a 9–12 hour standards and outcome-based growth project in each class and a 300 hour "capstone internship" in the Seminar/Practicum courses in Educational Leadership (EDAD 591/EDAD 592). Teacher Leadership candidates need only complete a 150 hour "capstone internship" in the Seminar/Practicum course EDAD 510.
6. Submit an electronic Leadership Growth Project Portfolio.
7. Complete a comprehensive standards-based self-assessment.
8. Complete a "Capstone School Improvement/Change Project."

Courses and Descriptions

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 507 Education and the Law 3 Credits

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 508 Leadership in School Business Adm. 3 Credits

The educational leadership required to establish an effective relationship between school business services and the success of the total educational program is the primary focus of this course. The professional and legal responsibilities of the school business administrator to manage the organization and resources, identifying and solving problems and issues related to the effective and efficient operation of school district, will be reviewed. Specific legal and code requirements and best-practice organizational and management procedures critical to the administration of a public school district will be examined. Among the topics of study in the course will be: the organization and management of the district business office; the development of strategic planning models; traditional and program oriented budgets; and, the application of technology to instruction and the management of school and district fiscal operations. Special emphasis will be given to the importance of "generally accepted accounting procedures" in district operations. Other topics to be addressed will include: personnel, enrollment, and resource forecasting; debt service and insurance expenses; food services, transportation, and facility operations; supply management and facility maintenance; and temporary financial investments. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 509 School Financial Mgt and Accounting 3 Credits

This course examines the historical precedents and current procedures that regulate and control the funding and financial operations of school districts. The leadership role of the school business administrator, ensuring the operation of the district in compliance with policy, procedure, and code, is a central theme. Judicial decisions, federal and state legislation, the planned curriculum, and generally accepted business practices that impact on the operation of the total educational program in school districts will be reviewed. Some specific topics of study will include: the leadership role of the school business administrator in monitoring, assessing and reporting on fiscal operations; determining taxation rates; and, developing non-public sources of revenue. The impact of state imposed "cap" regulations and negotiated bargaining unit benefit packages and agreements will be assessed with regard to possible budget growth and development. Enrollment, revenue, and cash flow projections; the fiscal controls used to approve, manage and track expenditures; regulations and restrictions on the use of school funds; school district surplus and debt regulations; current and emerging fiscal concerns in school budget planning and development; and, the role of the school fiscal structure in relation to the local, state, and federal governments are other important topics to be developed. Advanced study in double entry accounting procedures will be a major component in the course. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 510 Seminar/Practicum in Teacher Leadership and Supervision 3 Credits

This course requires the student to self-assess supervisory leadership strengths for the purpose of establishing an agenda for an extensive site-based internship. The internship agenda is guided by national leadership standards that ensure a comprehensive exposure to supervisory responsibilities. Students deepen their understanding of supervisory theory and best practice and apply this knowledge to the development and refinement of a personal leadership platform. Considerable attention is placed on understanding the ethical basis of supervisory practice. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531, CURR 532 or CURR 538, and EDAD 505.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 505.

EDAD 512 School Facility Planning and Development 3 Credits

This course will examine the leadership role of the school business administrator in facility planning, renovation, and expansion. The essential linkage between guiding principles, existing and proposed facilities, and the implementation of the total educational program is considered from both theoretical constructs and practical applications. Major topics of study will include: the development and revision of long-range facility plans; the role of the state Economic Development Authority; the critical review of state proposed "model" school buildings; and, the process of drafting educational specifications. In addition, required site plan reviews by state and local officials; the referendum approval process; and, the integral role of professional services (public opinion consultants, attorneys, demographers, architects, financial consultants, public information agencies, etc.) will be discussed. Students will evaluate geographic, socio-political, financial, and ecological considerations in proposed school construction. Planning for new and emerging technology, addressing health, safety, and security considerations, ensuring barrier-free access, incorporating energy conservation measures, and the utilization of school buildings by the greater community will be overarching themes developed. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 513 Human Resources in Education 3 Credits

This course will develop the practical and theoretical knowledge of the human resources function in the educational setting. Emphasis will be placed on understanding and utilizing human resources functions and processes to identify needs and address issues in both instructional and non-instructional positions. The student will gain an understanding of the inter-relationship that exists between organizational climate, strategic planning, and the established policies and regulations of the human resources function. Students will develop a comprehensive understanding of the importance of recruitment, selection, mentoring and evaluation of faculty and support staff. Emphasis will be to continuously identify issues that are legal requirements in human resources administration or required by federal or state regulations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 505 and EDAD 511.

EDAD 514 School Finance and Fiscal Management 3 Credits

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 501.

EDAD 515 Mentoring Beginning Teachers 3 Credits

This field-based practicum requires that each student work with a novice teacher (student teacher or beginning teacher) while enrolled in the course. Through reading, observation, biography and interview, students will explore how novice teachers acquire teaching knowledge and skill. By researching their own practice as mentors, reading relevant literature and participating in critical dialogue in seminars, students will explore and evaluate methods of facilitating and supporting novice teachers' professional growth.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 501 and EDAD 514.

EDAD 591 Seminar/Practicum in Education Leadership 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council. Enrollment by permission of instructor.

EDAD 592 Seminar/Practicum in Educational Leadership 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council. Enrollment by permission of instructor.

Prerequisite(s): EDAD 591.

EDAD 600 Independent Study and Research in Educational Administration 1-3 Credits

Course content varies with the academic research interests of students who wish to engage in independent study related to the overall content of educational administration.

Elementary Education (K-6) Certificate

Program Overview

The graduate-level Elementary Education Teacher Certification Program is designed for college graduates seeking initial certification as a teacher in elementary school settings. This is a streamlined, rigorous, and sequential program of professional studies that combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching) at the end of the program requires full-time enrollment for one semester. The program is state approved and nationally accredited.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 961).

Curriculum Overview

This is a 21-credit program requiring four courses taken in late afternoons/evenings followed by a full semester of full-time student teaching in a host school in the region.

Certificate Offered

Additional requirements for completion

- Completion of all courses before final clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes, and learning products for students with disabilities and strengths.

CURR 702 Early Literacy Development for Diverse Learners 3 Credits

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

CURR 715 Inclusive Elementary Science, Arts, & Social Studies Teaching 3 Credits

This course provides aspiring elementary school teachers with a variety of developmentally appropriate options for designing, implementing, and evaluating curriculum and instruction in science, social studies, and the arts. Using NJ Student Learning Standards, emphasis is placed on inclusive practices and differentiation of instruction (e.g., modifying curriculum planning, learning environments, and instructional materials, content, processes, and products), curriculum integration, thematic unit and lesson planning, various teaching strategies, hands-on learning experiences, inquiry learning, career readiness skills, higher-order thinking, reflective practice, and various assessment strategies. Other facets of teaching also are addressed or reviewed in the course. These include the characteristics and needs of students with disabilities motivation, classroom management, and becoming a team member of a school faculty. Candidates also refine their pedagogical knowledge and skills by participating in the modification of instruction to meet the needs of diverse learners in nearby school settings.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. The candidate gradually assumes a full load of teaching responsibility. These experiences test and strengthen the translation of educational theory and research into meaningful practice. An on-campus or site-based seminar accompanies the clinical experience. Seminars emphasize reflective development toward professionalism through sharing and analyses of experiences, and in-depth reports on teaching learners with disabilities and instructional modifications employed to meet their needs. Additional analyses of student learning and reflective assignments require candidates to connect their clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars, which include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning, and agencies available for students with disabilities; classroom management strategies; awareness of methods for strengthening student achievement and career readiness, panel sessions with veteran teachers who graduated from this program; panel sessions with principals and superintendents who provide advice about long-term professional development; interviews with special education teachers who provide advice about meeting the needs of students with disabilities; and wrap-up reflective sessions at the conclusion of the semester.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

CURR 771 Supervised Clinical Experience in Teaching 3 Credits

This practicum is a condensed version of the Internship in Teaching. It is available only to interns seeking teacher certification who already have a year of successful, full-time teaching experience or its equivalent. A special application must be made and approved for enrollment in the course. The practicum requires six weeks of full-time, supervised daily participation in a school setting. After a brief period of orientation to the school and classroom, the intern assumes a full load of teaching responsibility at the school. The experience finetunes the teaching abilities of interns and enables them to demonstrate competence in the specialty for which they seek certification.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

English Language Arts Education (K-12) Certificate

Program Overview

This graduate-level program is designed for college graduates seeking initial certification as a teacher of English Language Arts. The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The final clinical experience (student teaching) at the end of the program requires full-time enrollment for one semester. The program is state approved and nationally accredited.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 961).

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes, and learning products for students with disabilities and strengths.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 703.

CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. The candidate gradually assumes a full load of teaching responsibility. These experiences test and strengthen the translation of educational theory and research into meaningful practice. An on-campus or site-based seminar accompanies the clinical experience. Seminars emphasize reflective development toward professionalism through sharing and analyses of experiences, and in-depth reports on teaching learners with disabilities and instructional modifications employed to meet their needs. Additional analyses of student learning and reflective assignments require candidates to connect their clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars, which include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning, and agencies available for students with disabilities; classroom management strategies; awareness of methods for strengthening student achievement and career readiness, panel sessions with veteran teachers who graduated from this program; panel sessions with principals and superintendents who provide advice about long-term professional development; interviews with special education teachers who provide advice about meeting the needs of students with disabilities; and wrap-up reflective sessions at the conclusion of the semester.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

CURR 771 Supervised Clinical Experience in Teaching 3 Credits

This practicum is a condensed version of the Internship in Teaching. It is available only to interns seeking teacher certification who already have a year of successful, full-time teaching experience or its equivalent. A special application must be made and approved for enrollment in the course. The practicum requires six weeks of full-time, supervised daily participation in a school setting. After a brief period of orientation to the school and classroom, the intern assumes a full load of teaching responsibility at the school. The experience finetunes the teaching abilities of interns and enables them to demonstrate competence in the specialty for which they seek certification.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

English as a Second Language Certification

Program Overview

The mission of the English as a Second Language program at Rider University is to provide the skills, attitudes and understandings necessary to teach non-native speakers of English in order for them to achieve their greatest potential through education for life.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 961).

Curriculum Overview

This is a 24-credit program requiring five courses taken in late afternoons/evenings followed by a full semester of full-time student teaching in a host school in the region.

Certificate Offered

- ESL Certification

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531 and CURR 538.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. *NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. The candidate gradually assumes a full load of teaching responsibility. These experiences test and strengthen the translation of educational theory and research into meaningful practice. An on-campus or site-based seminar accompanies the clinical experience. Seminars emphasize reflective development toward professionalism through sharing and analyses of experiences, and in-depth reports on teaching learners with disabilities and instructional modifications employed to meet their needs. Additional analyses of student learning and reflective assignments require candidates to connect their clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars, which include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning, and agencies available for students with disabilities; classroom management strategies; awareness of methods for strengthening student achievement and career readiness, panel sessions with veteran teachers who graduated from this program; panel sessions with principals and superintendents who provide advice about long-term professional development; interviews with special education teachers who provide advice about meeting the needs of students with disabilities; and wrap-up reflective sessions at the conclusion of the semester.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

CURR 771 Supervised Clinical Experience in Teaching 3 Credits

This practicum is a condensed version of the Internship in Teaching. It is available only to interns seeking teacher certification who already have a year of successful, full-time teaching experience or its equivalent. A special application must be made and approved for enrollment in the course. The practicum requires six weeks of full-time, supervised daily participation in a school setting. After a brief period of orientation to the school and classroom, the intern assumes a full load of teaching responsibility at the school. The experience finetunes the teaching abilities of interns and enables them to demonstrate competence in the specialty for which they seek certification.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

English as a Second Language Endorsement Certificate

Program Overview

This program is designed for the teacher with a certification in another area who wants to add an endorsement (additional certification) as an ESL teacher who helps non-English speakers become fluent in the English language. This is a streamlined, rigorous, and sequential program of professional studies that combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The teaching internship (student teaching) at the end of the program requires full-time enrollment for one semester. The program is state approved and nationally accredited.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 961).

Curriculum Overview

This endorsement provides ESL teaching credentials for those already certified in another specialization. For example, teachers certified in elementary education or in a secondary specialization can become credentialed to teach ESL through this program track. This is a 15 credit program requiring five courses taken in late afternoons/evenings.

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

Higher Education Certificate

Higher Education Administration and Leadership is a field of interest to many Higher Education professionals. The coursework in this Graduate Certificate covers 4 critical areas that together describe how institutions of higher learning operate. Major content areas are how colleges and universities organize themselves, how they affect students in terms of learning and development, how they are shaped by the larger environment and legal mandates, and how they change and adapt to the changing landscape of education.

The coursework is aimed at working professionals who want to deepen their knowledge of functions such as student affairs, gain understanding of how schools assess, plan and change, and also want to develop insight into the complex and changing "big picture" of higher education.

Students earn a Graduate Certificate upon completion of the 4 required courses. If interested in continuing on to the MA Organizational Leadership (p. 930), all courses can be applied to the required degree credit hours.

EDUC 540	Planning, Budgeting and Program Evaluation in Higher Education	3
Total Credits		12

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

EDUC 531 Introduction to Collective Bargaining and Labor Relations 3 Credits

This course assumes that students do not have prior knowledge of legal terminology or concepts. It will provide students with a foundation in the fundamentals of collective bargaining and union-management relationships within the unique environment of the college campus. American labor law is the prevailing system of laws that govern universities and colleges, however, students will explore how these general "rules of the game" apply to higher education institutions. The course will challenge participants to consider how general rules and principles of collective bargaining and labor relations shape, and are shaped by fundamental aspects of the higher-education "workplace" including academic freedom, faculty workloads, tenure and shared governance. These unique factors have the potential to influence expectations concerning productivity, termination and the traditionally sharp distinction between labor and management found in other industries.

EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

Life and Career Coaching Certificate

Program Overview

The Life and Career Coaching certificate program at Rider University is designed to meet the educational requirements for certification as a Board Certified Coach through the Center for Credentialing and Education, Inc. (<http://www.cce-global.org/bcc>) Coaches are helping professionals who assist clients in achieving goals in areas such as life transitions, significant relationships, physical health, emotional well-being, career choices, and spirituality. Some coaches carve out a niche by working with business leaders as executive coaches. Coaches differ from other mental health professionals in that they do not work with clients with mental disorders.

Curriculum Overview

There are three pathways to completion of required coursework, depending on a student's educational and professional background. These pathways range from one to three courses.

Certificate Offered

3

Courses and Descriptions

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 501 Coaching Principles and Practices 3 Credits

The course covers core coaching competencies, including coaching screening and orientation, fundamental skills, assessment, approaches for organizations, and coaching ethics. The course meets all 30-hour educational requirements for certification as a Board Certified Coach (BCC) through the Center for Credentialing and Education and is required course for the 60-hour BCC educational requirements.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

Mathematics (K–12) Certificate

Program Overview

This graduate-level program is designed for college graduates seeking initial certification as a teacher of mathematics. The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The final clinical experience (student teaching) at the end of the program requires full-time enrollment for one semester. The program is state approved and nationally accredited.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT). (<http://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-sciences/school-of-education/graduate-programs/teacher-education-programs/master-arts-teaching>)

- Completion of CURR 770 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes, and learning products for students with disabilities and strengths.

CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 703.

CURR 707 Inclusive Methods for Teaching Mathematics 3 Credits

This course critically analyzes the aims of teaching mathematics in secondary schools. Research pertaining to mathematics teaching and learning is analyzed. Demonstration lessons including reflective teaching and individual and group processing are created and carried out to clarify teaching, mathematics curriculum planning using NJ Student Learning Standards in Mathematics, the organization of materials and subject matter, assessment processes classroom management strategies, and awareness of career requirements in STEM fields. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying mathematics curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. The candidate gradually assumes a full load of teaching responsibility. These experiences test and strengthen the translation of educational theory and research into meaningful practice. An on-campus or site-based seminar accompanies the clinical experience. Seminars emphasize reflective development toward professionalism through sharing and analyses of experiences, and in-depth reports on teaching learners with disabilities and instructional modifications employed to meet their needs. Additional analyses of student learning and reflective assignments require candidates to connect their clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars, which include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning, and agencies available for students with disabilities; classroom management strategies; awareness of methods for strengthening student achievement and career readiness, panel sessions with veteran teachers who graduated from this program; panel sessions with principals and superintendents who provide advice about long-term professional development; interviews with special education teachers who provide advice about meeting the needs of students with disabilities; and wrap-up reflective sessions at the conclusion of the semester.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

CURR 771 Supervised Clinical Experience in Teaching 3 Credits

This practicum is a condensed version of the Internship in Teaching. It is available only to interns seeking teacher certification who already have a year of successful, full-time teaching experience or its equivalent. A special application must be made and approved for enrollment in the course. The practicum requires six weeks of full-time, supervised daily participation in a school setting. After a brief period of orientation to the school and classroom, the intern assumes a full load of teaching responsibility at the school. The experience finetunes the teaching abilities of interns and enables them to demonstrate competence in the specialty for which they seek certification.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

Music Education (K-12) Certificate

Program Overview

This graduate-level program is designed for college graduates seeking initial certification as a music teacher. The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The final clinical experience (student teaching) at the end of the program requires full-time enrollment for one semester. The program is state approved and nationally accredited.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 961).

Curriculum Overview

This is a 21-credit program requiring four courses taken in late afternoons/evenings followed by a full semester of full-time student teaching in a host school in the region.

Certificate Offered

- Music Education (K-12) Certificate

- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes, and learning products for students with disabilities and strengths.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 703.

ME 721 Curric Development & Eval 3 Credits

This course examines the relationship between curriculum theory and philosophy of music education. Through the study of traditional and contemporary models of curriculum development and evaluation, students broaden their understanding of curriculum as it impacts the learning process. Post modern theory consistent with the Department's commitment to Critical Pedagogy for Music Education provide the focal point for the development of curricula that enhance and support quality music education. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

ME 581 Praxis in Elementary Music 3 Credits

This course prepares students to teach music in elementary schools. Consistent with the department's commitment to Critical Pedagogy for Music Education, the course covers materials and methodologies to engage young children in musical experiences that are significant, transformational, and that connect to the social context in which they teach. Students learn to write and evaluate curriculum and to integrate curriculum with academic core subjects. An off campus field experience in local elementary schools is an integral part of this course. Students must provide their own transportation to practicum sites. It is recommended that students complete Developmental or Educational Psychology before taking ME 581. course content, activities and experiences in this course connect to the New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. Music Education majors will receive priority registration for this class. A minimum 2.75 cumulative GPA is required.

Prerequisite(s): For undergraduates only; ME 171, ME 172 ME 271; two semesters of Piano Secondary, not including PI 045; TH 142.

ME 582 Praxis in Secondary Music 3 Credits

This course prepares students to teach music in secondary schools. Consistent with the department's commitment to Critical Pedagogy for Music Education, the course covers materials and methodologies to engage middle school and high school students in musical experiences that are significant, transformational, and that connect to the social context in which they teach. Students learn to write and evaluate curriculum and to integrate curriculum with academic core subjects. An off campus field experience in local middle and high schools is an integral part of this course. Students must provide their own transportation to practicum sites. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. It is recommended that students complete ME 581 and either Developmental or Educational Psychology before taking ME 582. Music Education majors will receive priority registration for this class.

Prerequisite(s): completion of two semesters of Piano Secondary, not including PI 045, TH 142, and a minimum 2.75 cumulative grade point average.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. The candidate gradually assumes a full load of teaching responsibility. These experiences test and strengthen the translation of educational theory and research into meaningful practice. An on-campus or site-based seminar accompanies the clinical experience. Seminars emphasize reflective development toward professionalism through sharing and analyses of experiences, and in-depth reports on teaching learners with disabilities and instructional modifications employed to meet their needs. Additional analyses of student learning and reflective assignments require candidates to connect their clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars, which include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning, and agencies available for students with disabilities; classroom management strategies; awareness of methods for strengthening student achievement and career readiness, panel sessions with veteran teachers who graduated from this program; panel sessions with principals and superintendents who provide advice about long-term professional development; interviews with special education teachers who provide advice about meeting the needs of students with disabilities; and wrap-up reflective sessions at the conclusion of the semester.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

CURR 771 Supervised Clinical Experience in Teaching 3 Credits

This practicum is a condensed version of the Internship in Teaching. It is available only to interns seeking teacher certification who already have a year of successful, full-time teaching experience or its equivalent. A special application must be made and approved for enrollment in the course. The practicum requires six weeks of full-time, supervised daily participation in a school setting. After a brief period of orientation to the school and classroom, the intern assumes a full load of teaching responsibility at the school. The experience finetunes the teaching abilities of interns and enables them to demonstrate competence in the specialty for which they seek certification.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

Organizational Leadership

Program Overview

The Master of Arts (M.A.) in Organizational Leadership program will enhance students' leadership, supervisory, and administrative skills. Students learn how to be more effective, strategic and creative in complex organizational settings — and graduate with a vision of leadership, values to guide their decisions, and the knowledge to transform vision into a reality.

While cultivating the ability to ethically lead organizations is the focus of the program, students will also develop and refine their critical thinking and problem solving skills, approaches to change management, ability to motivate and empower others, and aptitude to communicate effectively and persuasively. Through a concentration of courses, students will apply the concepts of leadership as they pertain to the advanced study of another academic discipline.

By successfully completing the program, students will develop a core set of leadership competencies that will enable them to:

- develop a personal leadership philosophy and approach to ethical leadership practice;
- understanding approaches to leadership practice;
- communicate, interact, and engage effectively with a diverse workforce;
- facilitate major leadership processes;
- lead organizations in a changing landscape; and
- be proficient in enhancing human and organizational performance

In addition to developing a core set of leadership skills and knowledge, the program (depending on the selected area of concentration) will provide students with skills and knowledge requisite to:

- Higher Education Leadership
- Developing People and Organizations
- Leadership in Counseling-Related Services
- Life and Career Coaching

Curriculum Overview

Students' broad understanding of leadership and organizations is accomplished through the study of the program's core courses. Developing an effective leadership practice takes self-knowledge, knowledge of others, financial and strategic acumen, a grasp of contextual forces and organizational dynamics, and a rigorous approach to making decisions and solving problems creatively.

In addition to the study of organizations, students pursue deep study of focal areas. One area is higher education administration and the unique opportunities of academia, particularly from a student affairs perspective. Students become more aware of the history and processes involved in executing higher education missions.

Another area is the field of organizational development, with an emphasis on enhancing organizations through knowledge of contemporary issues, the development of individuals and the cultivation of organizational change. Students become more adept at creating and delivering initiatives for improved effectiveness in teams and organizations.

A third curriculum area is the study of human services from the point of view of those in the helping professions. Acquiring knowledge of the foundations of counseling and mental health enables students to gain greater awareness of how human services organizations and agencies fulfill their promise to clients.

A fourth area is in the area of life and career coaching. Students gain understanding of organization members from the perspective of human growth and development and gain skills in forming coaching relationships for the purpose of aiding others in areas such as life transitions, career choices and work/life balance.

Forms of Study

Students generally take their core courses in an online format. Depending on their chosen concentration, they will complete their 30 credit degree in one of two ways. They will complete their studies entirely online, or with a set of classroom, online or hybrid courses. The fully online MA in Organizational Leadership is composed of the 6 core courses (18 credits) and 4 courses in the Developing People and Organizations concentration (12 credits).

Program Requirements

Group I - Core Courses

Group II - Concentration Courses

Organizational Leadership (M.A.)

- Comply with the general requirements concerning graduate study at the master's degree level.
- Enroll in graduate study at Rider for no fewer than two academic semesters or the equivalent thereof.
- Complete at least 30 credits of graduate study.
- Successfully pass a culminating experience and related written requirements.
- Maintain a GPA of "B" (3.0) or better for work submitted for the master's degree.
- Complete the program within six years of the date the student enrolled in his/her first course unless an extension is approved by the Department of Graduate Education, Leadership, and Counseling.

Course Requirements

(30 credits)

Group I - Core Courses - Required

Code	Title	Credits
LEAD 500	Introduction to Organizational Leadership	3
LEAD 510	Organizational Communication	3
LEAD 531	Developing The Human Side of Organizations ¹	3
LEAD 540	Strategic and Financial Decision-Making in Organizations	3
LEAD 550	Organizational Research	3

LEAD 598	Project Seminar in Leadership	3
Total Credits		18

Group II - Concentration Courses

Students will be expected to meet the requirements for any one of the four concentrations outlined below.

Developing People and Organizations

Program Goal: Prepare graduates to be strategic professionals who work effectively through others, particularly in the area of organization and human development. This concentration helps students to understand broad organizational concepts that apply to private and non-profit sectors. Students build conceptual understanding and explore connections to applied settings.

Code	Title	Credits

Courses and Descriptions

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

COUN 515 Substance Abuse Counseling 3 Credits

Analyzes the development, intervention, and treatment of drug abuse and alcoholism. Designed to assist counselors in identifying drug abuse and alcoholism, examining the specialized approaches of counseling with these clients and reviewing the related elements; i.e., family participation, physical problems, effects on school or job, etc.

COUN 520 Multicultural Counseling and Relationship Development 3 Credits

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

LEAD 500 The Practice of Leadership 3 Credits

This course allows students to gain an understanding of the practice of leadership and how they can develop as leaders. Students will explore leadership models, creativity in organizations, and approaches to decision making as they begin to form their own leadership philosophy.

LEAD 510 Organizations: Design and Dynamics 3 Credits

This course will provide students with foundational knowledge in the area of organization studies. Students will gain insight into organizational structure and how it affects interdepartmental behaviors, communication and work flow. The course emphasizes how organizational environment and culture generate and reinforce the way organizational systems work and how leaders operate within these organizational contexts.

LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 512 Forms of Diversity in Organizations 3 Credits

Increasingly, leaders and employees are part of a more diverse, multiethnic and globally influenced workforce. Students will become more conversant with forms of diversity, such as different cultural traditions, as well as differences in generational sensibilities, ableness, gender, and level of adult development. Students will learn about the different "worldviews" which organizational members bring into the organization, and how that affects their ability to work together. The course develops students' knowledge of and skills in practicing: principles for optimizing human performance in organizations, cultural intelligence, human diversity, and leading multicultural organizations.

LEAD 530 Individual and Group Processes in Organizations 3 Credits

This course will inform students about leadership concepts and models for identifying and working with the motivations, influences and tactics present in conflict and its resolution in personal and organizational settings. Through group dynamics exercises, the themes of developing leadership identity, recognized and affirmed by self-awareness; understanding and exercising relationship awareness and group behavior; and recognizing the multiple relational dimensions of leadership will guide both the understanding and practice of leading people and managing relationships.

Prerequisite(s): LEAD 500 or concurrent with LEAD 500.

LEAD 531 Developing The Human Side of Organizations 3 Credits

This course examines Strategic Human Resources Management (SHRM) within today's organizations, and is designed to provide students with a comprehensive understanding of SHRM practices from a systemic and strategic perspective. Students learn approaches leaders use to recruit, select, evaluate, and develop employees and strategies to create a positive work environment.

LEAD 532 Program Design for Training and Development in Organizations 3 Credits

This course provides a full circle approach to workforce training and development that is applicable to professionals in human resources, organizational development, or other leaders who see themselves as trainers, mentors and coaches. The course is designed for students to explore "real world" applications for programs, services and operations in a training environment, and covers key principles such as adult learning theory, facilitation skills, curriculum development, needs assessment, training methodology and techniques, resources and constraints, as well as learning how to evaluate and improve the efficacy of training programs.

LEAD 533 Conflict and Crisis Resolution in Organizations 3 Credits

Leaders face conflict and crisis in their organizations. Being effective in their resolution is an important leadership attribute. Skills that support positive and integrative outcomes include mediation, negotiation and crisis resolution skills. This course will use multiple case studies and role-playing assignments to engage students in understanding how individuals and teams handle mediation and negotiation scenarios. The course will also use multiple case studies to enhance students' understanding of the components of effective and ineffective leadership for crisis.

LEAD 534 Facilitation and Team Leadership 3 Credits

This course examines the characteristics and behaviors of teams that produce good results and/or generate new ideas. The focus of the course is on how to lead high functioning teams and the development of facilitation capabilities, so that students can effectively lead teams and organizations.

LEAD 540 Strategic and Financial Decision-Making in Organizations 3 Credits

This course explores the importance of information and financial resources within the culture of organizations, and the necessary relationship that exists between the two. The course draws on current literature and student experience to explore resource management and focuses on the effective use of information resources within the boundaries defined by financial realities. The relationship between data analyses and effective decision-making will be explored.

Prerequisite(s): LEAD 500 or concurrent with LEAD 500.

LEAD 550 Organizational Research 3 Credits

The purpose of this course is to prepare future organizational leaders to read professional journal articles, plan research, and critique research. The course covers basic research methods, such as experimental, ex post facto, correlational, case study, time series, interviews, surveys, and basic statistics in terms of understanding and selecting statistics. These concepts are taught within the framework of organizational leadership.

Prerequisite(s): LEAD 500 or concurrent with LEAD 500.

LEAD 598 Project Seminar in Leadership 3 Credits

This course serves as a practicum for students about to graduate with their M.A. in Organizational Leadership. Reflecting upon their own leadership philosophy developed throughout the program, students will formulate, research, and write a leadership capstone paper. The project integrates the competencies and concepts from the core courses as students use research strategies to analyze an organizational problem. Class sessions will also be used for exercises and the practice of skills.

Prerequisite(s): Must be taken in last semester of study. Permission of Instructor required.

Principal Certificate

Program Overview

The Principal certificate in Educational Leadership is a sequence option designed for candidates who aspire to obtain school leadership positions as a director, assistant principal or principal.

Curriculum Overview

Candidates have completed a master's degree and hold New Jersey certification as a supervisor. A second course in leadership (EDAD 592) is required of candidates who have previously taken only one course in a state-approved supervisory certification sequence. An internship experience begins with and is documented from the first course. The approximately 60–70 hours of field-based experience under the supervision of a mentor translates leadership theory into practice. The complete internship experience begins and is documented from the first course, and the "capstone" internship experience (EDAD 591, EDAD 592) concludes the program. Candidates will complete a year-long (300 hours) internship along with a "Capstone School Improvement/Change Project."

The frameworks for the program have been established to meet preparatory requirements as established in the New Jersey Administrative Code (6A:9-12.5) as well as the challenges, responsibilities, and opportunities inherent in educational leadership.

Courses and Descriptions

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 507 Education and the Law 3 Credits

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 505.

EDAD 514 School Finance and Fiscal Management 3 Credits

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 501.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 501 and EDAD 514.

EDAD 591 Seminar/Practicum in Education Leadership 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council. Enrollment by permission of instructor.

EDAD 592 Seminar/Practicum in Educational Leadership 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council. Enrollment by permission of instructor.

Prerequisite(s): EDAD 591.

Reading Specialist Endorsement

Program Overview

The Reading Specialist endorsement is designed for educators who have an earned master's degree in education or a related field and are interested in becoming a reading or literacy specialist in a pre-K-12 school.

Curriculum Overview

In order for candidates to be eligible for the Reading Specialist endorsement they must complete four graduate level literacy courses at Rider University. These include:

LITR 501 Psychology and Pedagogy of Literacy Processes

LITR 502 Curriculum, Instruction and Supervision in Literacy

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum

One Graduate Level Literacy Elective

Candidates must also show evidence of at least 18 credits of graduate study across three areas selected from the list below. These areas of study will come from the state approved graduate courses offered in the College of Education and Human Services at Rider University or a candidate's master's degree program at other institutions. These include:

- Children's or Adolescent Literature
- Measurement
- Organization of Reading Programs
- Psychology
- Staff Supervision
- Linguistics
- Special Education
- Research
- Foundations of Education

Certificate Offered

- Reading Specialist

- ¹ Required course.
- ² Elective (select at least one.)
- ³ Candidates must have completed at least two years of teaching by program completion.

LITR 500 Multimodal Teaching and Learning

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century and how it is influencing children's literacy development and the work of Educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

LITR 501 Psychology and Pedagogy of Literacy Processes

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included. 3 credits.

LITR 502 Curriculum, Instruction and Supervision in Literacy Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content. 3 credits.

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum

Studies reading/language arts abilities and disabilities and standardized and informal tests. Observational techniques and diagnostic teaching for assessment are stressed. 3 credits.

Credits LITR 508 Literacy and the Bilingual/Bicultural Child

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed. 3 credits.

LITR 510 Research and Survey of Texts for Children and Adolescents

This course surveys developmental trends in texts for children and adolescents. Students will become knowledgeable about the theoretical and practical aspects of the study of the texts (both digital and print) available for youth and adolescents. Candidates will explore their own assumptions about text and the relationship to literacy development. Course participants will explore strategies for integrating print and non-

print texts into the school curricula in ways that support youth and adolescent literacy development. 3 credits.

LITR 560 Writing Project at Rider

Examines theory, research, and practices in the teaching of writing K-12, with emphasis on improved practices in teaching writing as well as the personal writing of participants. Students investigate relevant local and national standards and curriculum, design, present, and respond to peer demonstration lessons in writing, and publish to the National Writing Project e-anthology. Further participation in NWP activities is encouraged and supported. This Invitational Summer Institute is part of the National Writing Project network. Project participants, called Summer Fellows, become Teacher Consultants upon completion of the Institute and are expected to maintain affiliation with the Project and to participate in the dissemination of professional development in writing instruction K-12 for all subject areas. 3 credits.

LITR 600 Independent Research and Study in Literacy Education

Course content is designed specifically to meet specific academic needs or interests of students who wish to engage in independent study related to literacy education. 1-3 credits.

Additional graduate courses with a literacy focus may be counted towards the elective requirement for the endorsement with prior approval from the coordinator

School Psychology, Educational Specialist Program Overview

Rider University offers one of the region's finest school psychology programs. It is one of only five specialist-level programs in New Jersey to hold full accreditation from the **National Association of School Psychologists** (NASP). This program is designed for students seeking national certification as a school psychologist.

Making a Difference in the Lives of Children

Across the country, there is a growing need for specially trained school psychologists who can work with students, teachers, families and other professionals to promote safe and supportive learning environments. They play an increasingly important role in helping children succeed — and thrive — academically, socially and behaviorally.

Highlights

- Rider's 64-credit Educational Specialist degree is a graduate-level program that typically takes three years of full-time study to complete.
- This program follows a cohort model in which students take classes together in a group, or team. Each cohort begins in the fall.
- Students develop and apply skills through fieldwork that complements coursework, starting with their first semester. Each student is expected to complete a 100-hour practicum each semester during the first two years.
- During the third year, students complete a one-year professional internship (1,200 hours) in a school setting where they perform the role and function of a professional school psychologist. Students have the option of completing this internship at an approved site setting anywhere in the country.
- In addition to New Jersey, the program meets requirements for certification in other states, including Pennsylvania and New York.

- Graduates of the program are eligible for national certification as a school psychologist after earning a passing score on the School Psychology Praxis.

Curriculum Overview

Rider University's School Psychology program will prepare students to become a productive and vital member of the school team through a highly-structured, developmental curriculum that builds on coursework and hands-on experience.

Students will learn to:

- effectively assess children's skills and abilities, including diverse learning needs;
- assess emotional and behavioral needs;
- apply effective social-emotional and academic interventions;
- plan appropriate Individualized Education Programs for students with disabilities;
- evaluate the effectiveness of prevention and intervention programs;
- consult with parents, administrators and teachers.

The program emphasizes problem solving and data-based decision making aimed at improving the educational and mental health of children and adolescents. Rider's innovative program provides a blend of traditional and contemporary school psychology training, including psychological assessment, response to intervention, consultation, positive behavior support, counseling and curriculum-based measurement. And, students learn to work sensitively with people from diverse cultural and individual backgrounds.

School Psychology Educational Specialist Program Requirements

- Satisfactory annual ratings for retention and progression in the School Psychology program. Program faculty will evaluate the academic, professional competencies, and professional work characteristics of each student based upon their portfolio and personal statement. A recommendation for continuation, continuation with remediation, or dismissal will be made by August 31st of each year.
- Based upon NASP standards, all students must fulfill a residency requirement by enrolling as a full-time student (minimum of nine graduate credits for one semester) so as to develop an affiliation with colleagues, faculty, and the profession.
- Completion of 64 graduate credits with a minimum GPA of 3.3.
- Take the Praxis Subject Assessments (formerly the Praxis II tests) test in school psychology during the first semester of internship, EDPS 590 Internship in School Psychology I and furnish a copy of the score to the school psychology program director.

Internship serves as the culminating experience consisting of 1,200 hours. The internship occurs on a full-time basis over the period of one year OR on a part-time basis over two consecutive years.

Courses and Descriptions

EDPS 502 Psychological Development of the Child and Adolescent 3 Credits

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 506 Testing and Measurement Techniques in Reading/Literacy Education 3 Credits

Studies basic characteristics of test scores, including: reliability and validity, selection, administration, and scoring of tests; measurement of achievement, intelligence, aptitude, and interests; and the writing and editing of items of teacher-made tests, school marking procedures, interpreting of test scores. Covers basic statistical tools needed by reading specialists.

EDPS 507 Advanced Educational Psychology 3 Credits

A critical examination of contemporary learning theory as applied to educational thought and practice. The psychological, physiological, and sociological foundations of education and training; personality problems encountered by classroom teachers.

EDPS 508 Cognitive Processes and Learning 3 Credits

This course deals with what is known relative to the principles of cognitive psychology and their application to learning. The flow of information is followed from where it begins through the processes of integration and storage. Cognitive principles will be studied relative to concept formation, reasoning, and problem solving. Their relationship to specific educational tasks such as the teaching of reading, writing, mathematics, and other content will be explored and confirmed through empirical evidence.

EDPS 509 Assessment and Intervention III: Psychoeducational Assessment and Report Writing 3 Credits

Building upon EDPS 514 and EDPS 515, this course furnishes students with the clinical, practical, and theoretical sophistication to understand the assessment process for learning, cognitive, and academic concerns. Students are expected to master a wide range of concepts and skills to successfully complete this course, including administering, scoring, and interpreting tests of cognitive abilities, academic achievement, emotional-behavioral status, and adaptive behavior. Students also are required to synthesize data from multiple methods of assessment and sources to produce written psychological reports that inform intervention practice.

Prerequisite(s): EDPS 513.

EDPS 510 Assessment & Intervention IV: Behavioral and Social-Emotional Needs 3 Credits

The assessment of personality is reviewed from the context of a comprehensive, ecological model of social-emotional, behavioral, and academic development. Assessment is studied from an empirically based, problem-solving model that links directly to intervention. Students learn to select appropriate assessment tools to match individual referral questions so as to evaluate the behavioral and social/emotional problems of children and adolescents.

Prerequisite(s): EDPS 513.

EDPS 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with specific educational exceptionalities, including learning disabilities, mental retardation, behavior disorders, physical handicaps, and giftedness. The characteristics, identification procedures, and current intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

EDPS 513 Professional Practice of School Psychology: Issues and Historical, Ethical, and Legal Considerations 3 Credits

This course is designed to provide an introduction to school psychology through an analysis of the contemporary roles and functions of school psychologists. Professional issues are explored in the context of the history and evolution of school psychology as a specialty area of professional psychology. In addition, the study of professional ethics, best practices, and standards for delivery of school psychological services that have been adopted by national organizations representing the profession of school psychology will be reviewed.

EDPS 514 Assessment and Intervention I: Standardized Measures of Academics And Behavior 3 Credits

This course will increase students' understanding of the standardized assessment process, measurement issues, psychometric properties of assessment instruments, and the role of these instruments in informing academic, behavioral, and social-emotional interventions.

EDPS 515 Assessment and Intervention II: Curriculum-Based Measures 3 Credits

This course will build upon students' knowledge and skills in individual-referenced assessment based upon the standards and general curriculum. Students will be able to design, administer, score, and interpret curriculum-based assessment and link these data to intervention.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDPS 521 Statistics and Quantitative Analysis 3 Credits

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

Prerequisite(s): EDPS 520, EDUC 500.

EDPS 535 Biological Basis of Behavior 3 Credits

This course will emphasize a biological approach to the study of psychology and behavior. Topics studied will include the following: 1) the genetics of human psychological differences; 2) the anatomy of the nervous system; 3) psychopharmacology; 4) neuropsychological diseases (e.g., epilepsy, autism, multiple sclerosis); 5) memory and amnesia; 6) sleeping, dreaming, and circadian rhythms; and 7) the biopsychology of mental health difficulties.

EDPS 538 Developmental Child Psychopathology 3 Credits

The course will furnish students with a comprehensive account of the characteristics, correlates, causes, contexts, and outcomes of psychopathology in children. It serves to augment students' understanding of specific conditions in childhood and adolescence including autism spectrum disorders, attention-deficit/hyperactivity disorder, mental retardation, childhood anxiety/depression, enuresis/encopresis, learning disabilities, communication disorders including selective mutism, and emotional/behavioral disorders. The diagnostic nosologies of the DSM and IDEA will be referenced and thoroughly discussed. A special emphasis upon a developmental-systems framework for understanding child psychopathology will be presented wherein the importance of context and the influence of multiple, interacting events and processes in shaping adaptive and maladaptive development will be investigated.

EDPS 570 Advanced Interventions for Children, Adolescents and Families 3 Credits

This course provides opportunity to expand each student's knowledge and skills in the development of effective interventions to meet academic, behavioral, and social-emotional needs. Currently accepted practices based upon the individual's referral problem will be explored. Intervention will be approached from a problem-solving model and based on current assessment data. Case studies will be used to link theory and application.

Prerequisite(s): EDPS 513.

EDPS 581 Practicum in Psychoeducational Assessment and Report Writing 1 Credits

This practicum experience provides supervised practice in administering, scoring, and interpreting an array of individually administered assessment instruments for the purpose of producing a written psychological report that is linked to intervention.

Prerequisite(s): EDPS 513.

EDPS 582 Practicum in the Assessment of Behavioral and Social-Emotional Needs 1 Credits

This practicum experience provides supervised practice using the techniques and methods taught in EDPS 510 Assessment of Behavioral and Social-Emotional Needs. Students will be expected to complete a Functional Behavioral Assessment including recommendations for a behavior intervention plan and a means to monitor and evaluate the target student's progress.

Prerequisite(s): EDPS 513.

EDPS 583 Practicum in Consultation in School and Agency Settings 1 Credits

This practicum experience provides supervised practice in the study, implementation, and evaluation of a problem-solving model to provide consultation across school and agency settings. Students will be expected to successfully initiate and lead the 4-step consultation process resulting in a databased intervention. The consultation will be documented in a formal report.

Prerequisite(s): EDPS 513.

EDPS 584 Practicum in Curriculum-Based Measures 1 Credits

This practicum provides supervised experience in identifying academic needs of students utilizing curriculum-based assessment (CBA) methods within a problem-solving framework. Students will practice the selection and administration of appropriate CBA tools to match referral question(s) at the individual, class-wide and school-wide levels. Students will also practice assessment of the academic environment by conducting structured direct observation of the classroom. Students will summarize and analyze assessment data, develop goals and objectives and make recommendations for intervention.

Prerequisite(s): EDPS 513.

EDPS 590 Internship in School Psychology I 3 Credits

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

Prerequisite(s): EDPS 581, EDPS 582, and EDPS 583.

EDPS 591 Internship in School Psych II 3 Credits

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

Prerequisite(s): EDPS 590.

EDPS 600 Independent Research and Study in School Psychology 1-3 Credits

Course content varies with the academic research interests of students who wish to engage in independent study related to the overall content of school psychology.

Science (K-12) Certificate in Biological Science, Chemistry, Earth Science or Physics

Program Overview

This graduate-level program is designed for college graduates seeking initial certification as a teacher in one or more of the scientific disciplines (biological sciences, chemistry, earth sciences, physics). The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The final clinical experience (student teaching) at the end of the program requires full-time enrollment for one semester. The program is state approved and nationally accredited.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 961).

Curriculum Overview

This is a 21-credit program requiring four courses taken in late afternoons/evenings followed by a full semester of full-time clinical experience (student teaching) in a host school in the region.

Certificate Offered

Science (K-12) Certificate in Biological Science, Chemistry, Earth Science, or Physics

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits
This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes, and learning products for students with disabilities and strengths.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits
This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students’ career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits
This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.
Prerequisite(s): CURR 703.

CURR 706 Inclusive Methods for Teaching Science 3 Credits

Classroom interaction analysis systems are used in the study of the instructional processes that support inquiry-based science learning. Candidates develop their own repertoires of teaching strategies, classroom management strategies, and awareness of career requirements in STEM fields. Emphases are on the investigation and interpretation of recent curriculum developments in NGSS and NJ Student Learning Standards in Science as well as the use of lab-based processes in science learning. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying science curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. The candidate gradually assumes a full load of teaching responsibility. These experiences test and strengthen the translation of educational theory and research into meaningful practice. An on-campus or site-based seminar accompanies the clinical experience. Seminars emphasize reflective development toward professionalism through sharing and analyses of experiences, and in-depth reports on teaching learners with disabilities and instructional modifications employed to meet their needs. Additional analyses of student learning and reflective assignments require candidates to connect their clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars, which include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning, and agencies available for students with disabilities; classroom management strategies; awareness of methods for strengthening student achievement and career readiness, panel sessions with veteran teachers who graduated from this program; panel sessions with principals and superintendents who provide advice about long-term professional development; interviews with special education teachers who provide advice about meeting the needs of students with disabilities; and wrap-up reflective sessions at the conclusion of the semester.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

CURR 771 Supervised Clinical Experience in Teaching 3 Credits

This practicum is a condensed version of the Internship in Teaching. It is available only to interns seeking teacher certification who already have a year of successful, full-time teaching experience or its equivalent. A special application must be made and approved for enrollment in the course. The practicum requires six weeks of full-time, supervised daily participation in a school setting. After a brief period of orientation to the school and classroom, the intern assumes a full load of teaching responsibility at the school. The experience finetunes the teaching abilities of interns and enables them to demonstrate competence in the specialty for which they seek certification.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

Social Studies (K-12) Certificate**Program Overview**

This graduate-level program is designed for college graduates seeking initial certification as a teacher of social studies. The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The final clinical experience (student teaching) at the end of the program requires full-time enrollment for one semester. The program is state approved and nationally accredited.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 961).

Curriculum Overview

This is a 21-credit program requiring four courses taken in late afternoons/evenings followed by a full semester of full-time clinical experience (student teaching) in a host school in the region.

Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 703.

CURR 705 Inclusive Methods for Teaching Social Studies 3 Credits

This course addresses the practical and theoretical aspects of teaching social studies to diverse adolescents in secondary schools. Using the NJ Student Learning Standards in Social Studies, candidates will prepare and design curriculum and assessment for students in various learning environments and with diverse learning needs. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying social studies curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

Special Education

Program Overview

The Master of Arts in Special Education program is designed to prepare certified teachers to teach students with special needs in a variety of settings.

The program provides opportunities for students to understand the nature and causes of disabilities, become familiar with agencies and resources for persons with disabilities, and learn the best practices and materials for teaching students with disabilities. This knowledge base, combined with a variety of shared and individual field-based experiences, provides opportunities for teachers to develop their expertise and become confident in their ability to work with students with special needs and become leaders in meeting the challenges of diverse classrooms.

Curriculum Overview

The M.A. in Special Education program comprises a sequence of coursework that includes courses required for a New Jersey Teacher of Students with Disabilities Endorsement.

For individuals who are currently prepared to teach in general education settings, a 30-credit course sequence is designed to strengthen their preparation to meet the needs of all children, particularly those with disabilities. Students who currently hold a regular New Jersey instructional certificate in another field and successfully complete the program will be eligible for the New Jersey Teacher of Students with Disabilities Endorsement.

Those who already hold New Jersey Teacher of the Handicapped or Teacher of Students with Disabilities (TOSD) certification, may be eligible for up to nine credits waived depending on prior course work and transcript review.

Graduation Requirements

- Meet general master's degree requirements.
- Successful completion of all academic and field requirements.
- Completion of 30 graduate credits with a minimum GPA of 3.00 on a 4.00 scale.
- Successful completion of a required sequence of field experiences.
- Candidates must successfully pass a comprehensive examination covering knowledge and skills related to the field of special education.
- Successful demonstration of professional dispositions and behavior.

Courses and Descriptions

SPED 500 The Inclusive Classroom: Effective Practices for General Education Teachers 3 Credits

This course is designed to introduce general education teachers to special education and the inclusive classroom. Students will explore current research, issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed.

SPED 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional strategies that maximize the learning of all individuals including those with exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using computer technology. Students will become familiar with the use of high-tech, low-tech solutions that support the individualized needs of learners with a wide range of disabilities.

SPED 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable candidates to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

SPED 514 Positive Behavior Support 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multicomponent interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable candidates to apply knowledge in a realistic classroom setting.

SPED 523 Inclusive Educational Practices 3 Credits

This course will emphasize planning and instructional strategies that maximize the learning of all students including those with exceptional learning needs in the general education classroom. Students will consider their role as curriculum makers and how to effectively plan a course, a unit, and a lesson for a wide array of diverse learners. The organization of the learning environment also will be discussed so as to guide learning. Teaching methods that enhance content for all learners and the design of learning strategies to help students learn how to learn will be introduced. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512 and SPED 514.

SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 525 Transition to Adult Life 3 Credits

This course is designed to provide students with an understanding of theoretical and applied models of transition in special education. Information on the application and interpretation of specialized assessment tools will be presented. Transition planning, including understanding, formulating and implementing the ITP, will be taught. Knowledge of and collaborative interactions with the wide variety of school and community personnel and agencies with a role in transition will be emphasized. Strategies for developing student self-advocacy and independence in the transition process will be presented. Legal information and ethical issues will be noted. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512 and SPED 514.

SPED 531 Assessment for Instruction in Special Education 3 Credits

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

Prerequisite(s): SPED 512.

SPED 535 Instructional Practices for Students with Severe Disabilities 3 Credits

The course will provide students with the knowledge and skills needed to provide systematic, individualized instruction to students with moderate to severe disabilities. Knowledge and training in the use of task analysis, prompting hierarchies, discrete trials, systematic instructional plans and routines will be offered across all domains of a life skills curriculum. Based upon a student's assessment data, students will be able to develop an appropriate individual educational plan with specific goals and objectives. In addition, strategies to modify and/or adapt goals to provide instruction in an inclusive setting will be explored. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 531.

SPED 536 Instruction and Transition for Autism and Severe Disabilities 3 Credits

The course will provide students with the knowledge and skills to support individuals with Autism Spectrum Disorders and those with moderate to severe disabilities. Strategies to address instruction, transition, behavior, and communication and will be emphasized across domains of life skills, inclusion, and transition. Transition planning, including understanding, formulating, and implementing the Individual Transition Plan will be taught. Collaborative interactions with school and community personnel and agencies will be addressed. An experience in the field will enable candidates to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 539 Instructional Practices for Students with Disabilities 3 Credits

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience portfolio will be completed in this course. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 540 Seminar in Collaboration, Consultation, and Inclusive Classroom 3 Credits

This course is designed to provide students with the knowledge and skills to facilitate successful inclusion programs. Students will develop the ability to design and manage the instructional environment in an inclusive classroom setting. Through the use of research, case studies, and classroom interactions, students will develop effective communication, conflict resolution, and collaboration skills for professional interactions. Students will become familiar with appropriate models for collaborative consultation. Attitudes and behaviors that influence the success of children with special needs in the general education classroom will be addressed. An experience in the field with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 539.

SPED 542 Literacy and Students With Special Needs 3 Credits

The course will provide an overview of theories, assessment, and intervention techniques for the literacy development of students with special instructional needs. Students will explore research validated methods for literacy development and instruction, including current strategies for teaching comprehension, composition, vocabulary, and language study. Management of literacy instruction is studied in a workshop setting. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 580 Supervised Internship in Special Education 3 Credits

This supervised internship experience will provide students with an opportunity to connect theory and practice in special education during the summer. Students will work full-time in a setting with individuals with disabilities. After a brief period of orientation to the setting, the intern will assume a full load of teaching and/or supervisory responsibilities appropriate to the context of the experience. Seminar meetings will be required. Permission of the program advisor is required.

Prerequisite(s): SPED 512, SPED 514, SPED 523, SPED 525, SPED 531, SPED 535, SPED 539.

SPED 590 Professional Seminar in Special Education 3 Credits

This course addresses the current issues in the field of special education. Candidates will synthesize research and literature from the field of special education to address current issues and practice. Collaboratively, students will examine one area of special education through research and presentation. A reflective comprehensive view of special education including assessment, instruction, inclusive practice, assistive technology, Autism Spectrum Disorder, behavior, literacy etc. will be shared. Students are expected to complete a comprehensive exam in these related special education topics and submit a cumulative portfolio of supervised field hours. This course should be taken in the final semester of the MA program as it is the culminating reflective course of study.

Prerequisite(s): Permission of instructor.

SPED 600 Independent Study and Research in Special Education 1-3 Credits

The content of the course varies with the academic research interests of students who wish to engage in independent study related to topics in special education.

Student Assistance Coordinator Certificate

Program Overview

This Rider Student Assistance Coordinator (SAC) Certificate qualifies students to apply for the Student Assistance Coordinator Certificate of Eligibility with Advanced Standing (SAC CEAS (<http://www.state.nj.us/education/educators/license/endorsements/3461CEAS.pdf>)) in New Jersey, which is supplied by the NJ Department of Education. For students interested in the school counseling profession, the SAC plays a specialized counseling role in the schools. SACs help students who are coping with social, emotional, and behavioral issues related to substance abuse and typically provide drug and alcohol prevention and intervention counseling services.

Students should consult the NJ Department of Education for the most updated and detailed explanations of the requirements to ultimately qualify for a standard New Jersey SAC certificate.

Curriculum Overview

This certificate is comprised of 21 credits, or seven courses.

Current M.A. students seeking either the Master of Arts in Counseling Services, School Counseling Concentration or the Master of Arts in Clinical Mental Health Counseling, may fulfill requirements for the SAC certificate as they complete their M.A. degree. Extra courses will be required beyond their M.A. degree requirements. For those who are pursuing a master's in school counseling at Rider, completion of only two extra courses in substance abuse is required. For those who are pursuing

a Master of Arts in Clinical Mental Health Counseling, three extra courses are required.

For practicing counselors interested in acquiring the SAC CEAS, the 21 credits are standard; however, Rider faculty recommend that interested students submit their transcripts to the NJ Department of Education for review and final determination of a required plan of study.

Certificate Offered

or CNSC 581	Secondary School Counseling Practicum and Student Assistance Coordinator Practicum	

Courses and Descriptions

CNPY 518 Counseling Children, Adolescents and Families 3 Credits

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

CNSC 580 Elementary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students will apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 581 Secondary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

COUN 515 Substance Abuse Counseling 3 Credits

Analyzes the development, intervention, and treatment of drug abuse and alcoholism. Designed to assist counselors in identifying drug abuse and alcoholism, examining the specialized approaches of counseling with these clients and reviewing the related elements; i.e., family participation, physical problems, effects on school or job, etc.

COUN 516 Strategies in Addiction Counseling 3 Credits

Analyzes the development, intervention and treatment of co-dependents. Designed to focus on the characteristics of co-dependency and how they were initiated in alcoholic families as well as other dysfunctional families. Symptoms will be discussed in terms of problems with intimacy, trust, eating disorders, assertiveness, love relationships and the differences among co-dependents. Specialized approaches to treating these areas will be discussed. (Classes will involve lecture, discussion and students will learn and experience group exercises for co-dependency treatment.)

Prerequisite(s): COUN 515 or permission of instructor.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDSO 501 Foundations of Counseling in Edu Settings: Referral Sources for Studetns /Students with Special Need 3 Credits

The course provides overview of the foundations of counseling in educational settings, including the historical roots; current and future trends, roles, and functions in multicultural schools and higher education settings; comprehensive developmental counseling programs; ethical school and higher education counseling practices; and individual and group counseling and consultation strategies, and evidence-based interventions and evaluations. In addition, the course will address community social services and educational-based programs (including special education and disability laws and accommodations) available to special needs students, other individuals and groups experiencing learning disabilities, and other temporary or chronic maladjustment. Reviews principles and methods utilized by social agencies, schools, and higher education settings.

Supervisor of Instruction Certificate

Program Overview

This program is designed for experienced and fully-certified teachers and other related instructional personnel to gain the necessary skills and professional knowledge to become supervisors in a school system.

It is a coherent program that develops the reflective capacities of students to perform a wide range of supervisory functions in accord with recognized professional standards, best practices and values.

Students should note that the recommended course sequence set by Rider University has been approved by the New Jersey Department of Education for the New Jersey supervisor's certificate and meets the four course requirements established by the Department: a course in the general principles of staff supervision (N-12); two courses in general principles of curriculum development (N-12); and a practicum in supervision where students will be expected to complete a mentored internship in a school or appropriate work setting as a requirement of the culminating course in the sequence.

EDAD 505	Supervisor/Teacher Leadership for Improved Instruction and Student Learning	
Supervision Practicum Requirement		3
EDAD 591	Seminar/Practicum in Education Leadership	

Courses and Descriptions

CURR 531 Strategies for Curriculum Development, Design, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 591 Seminar/Practicum in Education Leadership 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council. Enrollment by permission of instructor.

Teacher Leadership

Program Overview

The Master of Arts in Teacher Leadership program seeks students who wish to enhance their knowledge and ability to deliver content instruction and further develop their leadership skills in educational settings. This program is designed to be developmental and experiential in nature, fostering ethical behavior and the improvement of self and one's profession. The program is based upon leadership standards established by the Educational Leadership Constituent Council (ELCC) and the Teacher Leader Model Standards (TLMS). These standards emphasize performance-based learning opportunities in the areas of articulating and implementing a vision for learning, promoting effective instruction,

effectively utilizing and managing resources in the learning environment, collaborating with families and community members, promoting the success of all students in an ethical manner, and recognizing the influence of the larger political, social, economic, legal, and cultural context.

The teacher leadership degree program serves those students who seek a graduate program that will develop their professional capacities as teachers and leaders. Increasingly, teachers are called upon to play a leadership role in the following areas: design, coordinate, and evaluate standards-based curricular programs; assess the outcomes of instruction; support the work of other teachers through mentoring, peer-coaching, and collaborative problem-solving; contribute to the professional development of the staff by providing and facilitating teacher in-service programs; and to promote a positive climate and culture for learning both inside and outside of the classroom. This program also prepares students for formal instruction/supervisory roles by emphasizing the knowledge, skills, and dispositions needed to assume leadership responsibilities for school and district-wide improvement initiatives.

Leadership Growth Projects are a requirement of every teacher leadership core course within the program. They provide students with an opportunity to develop and practice their teacher/supervisory leadership skills throughout the program so that they are well-prepared for the requirements of their culminating internship experience (Capstone Project). An electronic portfolio showcasing all completed Leadership Growth Projects will be submitted at the end of the "core" requirements to document continuous and sustained accomplishments of all candidates in their educational settings. Upon the completion of the Master of Arts Degree in Teacher Leadership, graduates will qualify for the New Jersey Instructional Supervisor Certificate.

Curriculum Overview

Developed by Rider University's respected and NCATE-accredited School of Education, the Master of Arts is designed to prepare experienced teachers to assume a greater leadership role in their schools, and share their skills and knowledge while remaining active in the classroom.

Teachers who complete the full master's degree will acquire both content knowledge and the skills needed to be effective teacher leaders in their schools and school districts. The full master's degree program includes both the 21-credit teacher leadership core and the 15-credit core content disciplines. Students who complete the master's degree track are eligible to apply for New Jersey Supervisor Certification.

The teacher leadership core is designed to prepare experienced teachers to assume a greater leadership role in their schools and share their skills and knowledge while remaining active in the classroom. This is a low-residency program that combines the best of face-to-face learning with the convenience of online learning. Its innovative design gives participants the flexibility they need to balance work and family demands while advancing their skill as teacher leaders. In the core content disciplines, teachers select content courses designed to build content knowledge and pedagogy in specialized fields. Teachers may select courses in only one concentration or a combination of courses in more than one concentration.

Teacher Leadership Concentration Options

The concentrations provide teachers with face-to-face and/or online courses that require the application of what is being learned in class to how content is being taught in their classrooms. The primary goal

is to enhance content knowledge and ability to deliver instruction in a common core curriculum area of specialization. The completion of five courses in the concentrations will result in a Rider University Professional Development Certificate in that specific concentration and in some instances a New Jersey Department of Education endorsement/certification.

Courses and Descriptions

CURR 517 Teaching and Learning Number and Operations 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding early number theory. It addresses students' mathematical understanding of representing numbers, relationships among numbers, and number systems; operations and how they relate to one another; and computation. Strong emphasis is placed on the cognitive development of children's thinking in number and operations, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 518 Teaching and Learning Rational Numbers and Proportional Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding rational numbers and proportional reasoning. Content includes a variety of situations involving proportions, for example, real-world problems involving ratios, rates, and percents; geometry involving similarity; algebra involving linearity; and probability involving assigning a probability to an event. Distinguishing proportional situations from those that are not and reasoning proportionally in appropriate situations are emphasized. Emphasis is placed on children's cognitive development of rational numbers and proportional reasoning, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 519 Teaching and Learning Algebraic Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy necessary to facilitate the transition from concrete arithmetic reasoning to abstract algebraic reasoning. It addresses students' mathematical understanding of equality, variable, generalization, and functions; cognitive development of algebraic reasoning; and the instructional, curricular, and assessment implications for fostering algebraic reasoning in students. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for mathematics content and mathematical practices.

CURR 520 Teaching and Learning Geometric Understanding 3 Credits

This course provides an in-depth study of the content and pedagogy for geometric understanding. It addresses students' mathematical understanding of shapes and their properties, location, transformation of shapes, and visualization; the cognitive development of geometric thinking; and the instructional, curricular, and assessment implications for teaching. Emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

CURR 522 Teaching and Learning Measurement and Data 3 Credits

This course provides an in-depth study of the content and pedagogy for measurement, data analysis, and probability. Mathematical content includes units, systems, and processes of measurement; techniques, tools, and formulas to determine measurements; data collection and display; statistical methods to analyze data; and, evaluating inferences and predictions. Emphasis is placed on children's cognitive development of measurement and data, and the instructional, curricula, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core state Standards for Mathematics Practices.

CURR 531 Strategies for Curriculum Development, Design, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531 and CURR 538.

CURR 552 Creative, Ethical Teacher Leadership 3 Credits

In order to be effective, teacher leaders require in-depth understanding of the complex, threat-filled, 21st-century globalized environment that provides the context for their work. They must understand the problems, opportunities, and pressures generated by the current socioeconomic, political, and cultural system of the United States, which is characterized by dogmatism-saturated disputes over the purposes of education and the allocation of resources. In addition, they must appreciate the ways in which the larger forces of globalization influence these national trends and issues. Finally, they must understand the ways in which the principles of wise, ethical, intelligent, and creative leadership can help them and their colleagues in their efforts to maintain and strengthen student learning in these daunting conditions.

CURR 640 Teaching and Learning Physical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected physical science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 641 Teaching and Learning Life Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected life science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 642 Teaching and Learning Earth and Space Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected earth and space science topics aligned with state and national standards. The course will be structured around big ideas identified in standards. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 643 Teaching & Learning Engineering & Design 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding selected technology, engineering and design topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 644 Teaching&Learning Chemical Sci 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected chemistry topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the chemistry content, emphasis will also be placed on: effective instructional strategies and science practices for the K-8 classroom through the use and study of such practices and strategies. Participants will engage in experiences with the states and properties of matter, develop models of the atom, and gain an understanding of the major principles of chemistry. The course will focus on states of matter, characteristic physical and chemical properties of matter, and chemical and physical transformations of matter.

CURR 650 Understanding Gifted Learners 3 Credits

The course explores the ways in which the gifted and talented can differ from more typical learners in terms of their cognition, social-emotional dimensions, behavior, and long-term development. It focuses on theories of intelligence, differing conceptions of giftedness and talent development, and learning processes. Some specific topics include underachievement, perfectionism, dual exceptionality, gender issues, and underserved populations. The course also addresses the ways in which gifted education can evolve to fit the demands and opportunities embedded in complex, 21st-century socioeconomic, cultural, and technological contexts.

CURR 652 Differentiating Instruction for the Gifted and Talented 3 Credits

This course provides the rationale and practical strategies for effective instructional differentiation for the gifted and talented within and beyond the regular classroom. Participants will learn how to differentiate within subject areas by adjusting content, process, product, and learning environment to meet the needs of learners. They also will explore the nature and nuances of differentiation by ability, readiness, and interest, as well as the implications of instructional differentiation for formative and summative assessment. Throughout the course they will design and share examples of differentiation including tiered assignments, complex instruction, independent studies, graphic organizers, and learning contracts.

CURR 654 Innovative Instructional Strategies for Gifted Education 3 Credits

This hands-on, experiential course immerses participants in simulations and analyses of new and revised student-centered teaching models and strategies that are conducive to creative and critical thinking, advanced content mastery, and the invigoration of students' interests. Participants analyze the potential of each model/strategy while considering the ways in which it can apply to content learning in various subject areas/domains. The course also engages participants in studying the fundamental principles of program design in gifted education so they can make the best possible use of the instructional models and strategies.

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 507 Education and the Law 3 Credits

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 510 Seminar/Practicum in Teacher Leadership and Supervision 3 Credits

This course requires the student to self-assess supervisory leadership strengths for the purpose of establishing an agenda for an extensive site-based internship. The internship agenda is guided by national leadership standards that ensure a comprehensive exposure to supervisory responsibilities. Students deepen their understanding of supervisory theory and best practice and apply this knowledge to the development and refinement of a personal leadership platform. Considerable attention is placed on understanding the ethical basis of supervisory practice. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531, CURR 532 or CURR 538, and EDAD 505.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 505.

EDAD 514 School Finance and Fiscal Management 3 Credits

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 501.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 501 and EDAD 514.

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

EDAD 591 Seminar/Practicum in Education Leadership 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council. Enrollment by permission of instructor.

EDAD 592 Seminar/Practicum in Educational Leadership 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council. Enrollment by permission of instructor.

Prerequisite(s): EDAD 591.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. *NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

LITR 500 Multimodal Teaching and Learning 3 Credits

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century and how it is influencing children's literacy development and the work of Educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits

Studies reading/language arts abilities and disabilities and standardized and informal tests. Observational techniques and diagnostic teaching for assessment are stressed.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

LITR 510 Research and Survey of Texts for Children and Adolescents 3 Credits

This course surveys developmental trends in texts for children and adolescents. Students will become knowledgeable about the theoretical and practical aspects of the study of the texts (both digital and print) available for youth and adolescents. Candidates will explore their own assumptions about text and the relationship to literacy development. Course participants will explore strategies for integrating print and non-print texts into the school curricula in ways that support youth and adolescent literacy development. 3 credits.

LITR 560 Writing Project at Rider 3 Credits

Examines theory, research, and practices in the teaching of writing K-12, with emphasis on improved practices in teaching writing as well as the personal writing of participants. Students investigate relevant local and national standards and curriculum, design, present, and respond to peer demonstration lessons in writing, and publish to the National Writing Project e-anthology. Further participation in NWP activities is encouraged and supported. This Invitational Summer Institute is part of the National Writing Project network. Project participants, called Summer Fellows, become Teacher Consultants upon completion of the Institute and are expected to maintain affiliation with the Project and to participate in the dissemination of professional development in writing instruction K-12 for all subject areas.

LITR 600 Independent Research and Study in Literacy Education 1-3 Credits

Course content is designed specifically to meet specific academic needs or interests of students who wish to engage in independent study related to literacy education.

READ 503 Content Reading in High School, College, and Continuing Education 3 Credits

Familiarizes teachers with the philosophy, language, and methodology of the language arts as they effect instruction in content areas. Emphasis is on the ways in which the integration of listening, speaking, reading and writing activities within all curricular areas can increase learning. Through lectures, demonstrations, and workshop-type activities, students will both experience and create lessons within various fields. Also investigates the content and methodology of reading programs in educational settings ranging from middle school through adult education.

SPED 500 The Inclusive Classroom: Effective Practices for General Education Teachers 3 Credits

This course is designed to introduce general education teachers to special education and the inclusive classroom. Students will explore current research, issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed.

SPED 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable candidates to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

SPED 514 Positive Behavior Support 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multicomponent interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable candidates to apply knowledge in a realistic classroom setting.

SPED 523 Inclusive Educational Practices 3 Credits

This course will emphasize planning and instructional strategies that maximize the learning of all students including those with exceptional learning needs in the general education classroom. Students will consider their role as curriculum makers and how to effectively plan a course, a unit, and a lesson for a wide array of diverse learners. The organization of the learning environment also will be discussed so as to guide learning. Teaching methods that enhance content for all learners and the design of learning strategies to help students learn how to learn will be introduced. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512 and SPED 514.

SPED 539 Instructional Practices for Students with Disabilities 3 Credits

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience portfolio will be completed in this course. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 540 Seminar in Collaboration, Consultation, and Inclusive Classroom 3 Credits

This course is designed to provide students with the knowledge and skills to facilitate successful inclusion programs. Students will develop the ability to design and manage the instructional environment in an inclusive classroom setting. Through the use of research, case studies, and classroom interactions, students will develop effective communication, conflict resolution, and collaboration skills for professional interactions. Students will become familiar with appropriate models for collaborative consultation. Attitudes and behaviors that influence the success of children with special needs in the general education classroom will be addressed. An experience in the field with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 539.

SPED 542 Literacy and Students With Special Needs 3 Credits

The course will provide an overview of theories, assessment, and intervention techniques for the literacy development of students with special instructional needs. Students will explore research validated methods for literacy development and instruction, including current strategies for teaching comprehension, composition, vocabulary, and language study. Management of literacy instruction is studied in a workshop setting. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

Teacher Leadership Professional Development Certificate

Program Overview

This 36-credit teacher leadership certificate provides mediated field placements, mentored internships, face-to-face and online courses and experiences, and on-the-job training that build necessary skills in teacher leadership. Those teachers who complete the teacher leadership core, which consists of seven core courses, will receive the Rider University Professional Development Certificate in Teacher Leadership.

Certificate Offered

Courses and Descriptions

CURR 552 Creative, Ethical Teacher Leadership 3 Credits

In order to be effective, teacher leaders require in-depth understanding of the complex, threat-filled, 21st-century globalized environment that provides the context for their work. They must understand the problems, opportunities, and pressures generated by the current socioeconomic, political, and cultural system of the United States, which is characterized by dogmatism-saturated disputes over the purposes of education and the allocation of resources. In addition, they must appreciate the ways in which the larger forces of globalization influence these national trends and issues. Finally, they must understand the ways in which the principles of wise, ethical, intelligent, and creative leadership can help them and their colleagues in their efforts to maintain and strengthen student learning in these daunting conditions.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

CURR 531 Strategies for Curriculum Development, Design, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 501 and EDAD 514.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 505.

EDAD 510 Seminar/Practicum in Teacher Leadership and Supervision 3 Credits

This course requires the student to self-assess supervisory leadership strengths for the purpose of establishing an agenda for an extensive site-based internship. The internship agenda is guided by national leadership standards that ensure a comprehensive exposure to supervisory responsibilities. Students deepen their understanding of supervisory theory and best practice and apply this knowledge to the development and refinement of a personal leadership platform. Considerable attention is placed on understanding the ethical basis of supervisory practice. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531, CURR 532 or CURR 538, and EDAD 505.

Teacher of Students with Disabilities Certificate

Program Overview

The graduate education certification program for teacher of students with disabilities includes the 21 credits required by the State of New Jersey for endorsement as a Teacher of Students with Disabilities. This certification program is for candidates that possess a current New Jersey instructional elementary, secondary, or P-3 certification. Courses must be completed in order based on prerequisites. Completion of a sequence of field-based experiences is required.

Curriculum Overview

Courses include psychology of exceptionality, positive behavior support, inclusive educational practices, transition to adult life, assessment, and instructional practices for children with disabilities.

The M.A. in Special Education program comprises a sequence of coursework that includes courses required for a New Jersey Teacher of Students with Disabilities Endorsement. Candidates who are successful in the Teacher of Students with Disabilities Certification Program may apply their credits toward the M.A. in Special Education.

Endorsement/Certification Offered

Teacher of Students with Disabilities Certificate Requirements

The graduate education certification program for teacher of students with disabilities will require a minimum of 21 credits required by the State of New Jersey for endorsement as a teacher of students with disabilities. Candidates must possess an existing instructional certificate or certificate of eligibility in elementary education, secondary education, or P-3 education. Completion of a sequence of field-based activities is required.

Courses and Descriptions

SPED 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional strategies that maximize the learning of all individuals including those with exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using computer technology. Students will become familiar with the use of high-tech, low-tech solutions that support the individualized needs of learners with a wide range of disabilities.

SPED 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable candidates to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

SPED 514 Positive Behavior Support 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multicomponent interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable candidates to apply knowledge in a realistic classroom setting.

SPED 523 Inclusive Educational Practices 3 Credits

This course will emphasize planning and instructional strategies that maximize the learning of all students including those with exceptional learning needs in the general education classroom. Students will consider their role as curriculum makers and how to effectively plan a course, a unit, and a lesson for a wide array of diverse learners. The organization of the learning environment also will be discussed so as to guide learning. Teaching methods that enhance content for all learners and the design of learning strategies to help students learn how to learn will be introduced. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512 and SPED 514.

SPED 525 Transition to Adult Life 3 Credits

This course is designed to provide students with an understanding of theoretical and applied models of transition in special education. Information on the application and interpretation of specialized assessment tools will be presented. Transition planning, including understanding, formulating and implementing the ITP, will be taught. Knowledge of and collaborative interactions with the wide variety of school and community personnel and agencies with a role in transition will be emphasized. Strategies for developing student self-advocacy and independence in the transition process will be presented. Legal information and ethical issues will be noted. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512 and SPED 514.

SPED 531 Assessment for Instruction in Special Education 3 Credits

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

Prerequisite(s): SPED 512.

SPED 535 Instructional Practices for Students with Severe Disabilities 3 Credits

The course will provide students with the knowledge and skills needed to provide systematic, individualized instruction to students with moderate to severe disabilities. Knowledge and training in the use of task analysis, prompting hierarchies, discrete trials, systematic instructional plans and routines will be offered across all domains of a life skills curriculum. Based upon a student's assessment data, students will be able to develop an appropriate individual educational plan with specific goals and objectives. In addition, strategies to modify and/or adapt goals to provide instruction in an inclusive setting will be explored. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 531.

SPED 536 Instruction and Transition for Autism and Severe Disabilities 3 Credits

The course will provide students with the knowledge and skills to support individuals with Autism Spectrum Disorders and those with moderate to severe disabilities. Strategies to address instruction, transition, behavior, and communication and will be emphasized across domains of life skills, inclusion, and transition. Transition planning, including understanding, formulating, and implementing the Individual Transition Plan will be taught. Collaborative interactions with school and community personnel and agencies will be addressed. An experience in the field will enable candidates to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 539 Instructional Practices for Students with Disabilities 3 Credits

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience portfolio will be completed in this course. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

Teaching (M.A.T.)

Program Overview

The Master of Arts in Teaching degree program offers graduates of Rider University's Graduate-Level Teacher Preparation program or the undergraduate Teacher Education program the opportunity to acquire, enrich, and expand their professional knowledge so that they will become effective agents for positive change in their classrooms and schools. This 30-credit program incorporates work completed during the initial teacher preparation phase of candidates' development while adding broad and deep professional knowledge about innovative curriculum design, inclusive practices, and databased decision making in teaching and learning.

Students can take much of the initial coursework for the M.A.T. by completing one of the initial teacher certification programs:

- Business Education (K–12) (p. 891)
- Dance Education (K-12) (p. 905)
- Early Childhood Teacher (Preschool–Grade 3) (p. 913)

- Elementary Education (K–6) (p. 919)
- English as a Second Language (p. 922)
- English Language Arts Education (K–12) (p. 921)
- Mathematics Education (K–12) (p. 927)
- Music Education (K-12) (p. 928)
- Science Education (K–12) (Biological Sciences, Chemistry, Earth Sciences (p. 941), Physics (p. 941))
- Social Studies (K–12) (p. 943)
- Theater Education (K-12) (p. 963)
- World Languages (K–12) (French, German, Spanish) (p. 964)

Degree Offered

- MAT (Master of Arts in Teaching)

k (ambrose@rider.edu)pierce@rider.edu (kpierce@rider.edu)

Program Website: www.rider.edu/mat (<http://www.rider.edu/mat>)

Associated Department: Department of Graduate Education, Leadership, and Counseling

Teaching (M.A.T.) Program Requirements

Complete one of the following teacher certification sequences and then complete the additional required courses:

- Bilingual Education (p. 889)
- Business Education (K-12) (p. 891)
- Dance Education (p. 905)
- Early Childhood Teacher (Preschool - Grade 3) (p. 913)
- Elementary Education (K-6) (p. 919)
- English as a Second Language (p. 922)
- English Language Arts Education (K-12) (p. 921)
- Mathematics Education (K-12) (p. 927)
- Music Education (K-12) (p. 928)
- Science Education (K-12) (Biological Sciences, Chemistry, Physics, Earth Sciences) (p. 941)
- Social Studies (K-12) (p. 943)
- Theater Education (p. 963)
- World Languages (K-12) (French, German, Spanish) (p. 964)

- Meet general master's degree requirements;
- Successful completion of all academic requirements;
- Completion of 30 graduate credits with a minimum GPA of 3.00; and,
- Successful demonstration of professional dispositions and behavior.

Courses and Descriptions

CURR 531 Strategies for Curriculum Development, Design, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

SPED 500 The Inclusive Classroom: Effective Practices for General Education Teachers 3 Credits

This course is designed to introduce general education teachers to special education and the inclusive classroom. Students will explore current research, issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531 and CURR 538.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 501 and EDAD 514.

Theater Education (K-12)**Program Overview**

The graduate-level Theater Education Teacher Certification Program is designed for college graduates seeking initial certification as a teacher of theater in school settings. This is a streamlined, rigorous, and sequential program of professional studies that combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching) at the end of the program requires full-time enrollment for one semester. The program is state approved and nationally accredited.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 961).

Curriculum Overview

This is a 21-credit program requiring courses taken in late afternoons/evenings followed by a full semester of full-time student teaching in a host school in the region.

Certificate Offered

- Teacher of Theater (K-12) Certificate

- Completion of CURR 770 or CURR 771 with a "C+" grade or better.
-

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes, and learning products for students with disabilities and strengths.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. The candidate gradually assumes a full load of teaching responsibility. These experiences test and strengthen the translation of educational theory and research into meaningful practice. An on-campus or site-based seminar accompanies the clinical experience. Seminars emphasize reflective development toward professionalism through sharing and analyses of experiences, and in-depth reports on teaching learners with disabilities and instructional modifications employed to meet their needs. Additional analyses of student learning and reflective assignments require candidates to connect their clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars, which include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning, and agencies available for students with disabilities; classroom management strategies; awareness of methods for strengthening student achievement and career readiness, panel sessions with veteran teachers who graduated from this program; panel sessions with principals and superintendents who provide advice about long-term professional development; interviews with special education teachers who provide advice about meeting the needs of students with disabilities; and wrap-up reflective sessions at the conclusion of the semester.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

CURR 771 Supervised Clinical Experience in Teaching 3 Credits

This practicum is a condensed version of the Internship in Teaching. It is available only to interns seeking teacher certification who already have a year of successful, full-time teaching experience or its equivalent. A special application must be made and approved for enrollment in the course. The practicum requires six weeks of full-time, supervised daily participation in a school setting. After a brief period of orientation to the school and classroom, the intern assumes a full load of teaching responsibility at the school. The experience finetunes the teaching abilities of interns and enables them to demonstrate competence in the specialty for which they seek certification.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

World Languages (K-12) Certificate in French, German or Spanish

Program Overview

This graduate-level program is designed for college graduates seeking initial certification as a teacher of a foreign language. The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The final clinical experience (student teaching) at the end of the program requires full-time enrollment for one semester. The program is state approved and nationally accredited.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 961).

Curriculum Overview

This is a 21-credit program requiring four courses taken in late afternoons/evenings followed by a full semester of full-time clinical experience (student teaching) in a host school in the region.

Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 703.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. *NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. The candidate gradually assumes a full load of teaching responsibility. These experiences test and strengthen the translation of educational theory and research into meaningful practice. An on-campus or site-based seminar accompanies the clinical experience. College of Liberal Arts and Sciences

The College of Liberal Arts and Sciences (<http://www.rider.edu/claes>) (CLAS) offers advanced degrees designed to build professional success in a variety of organizational settings. With programs in Applied Psychology, Business Communication and Homeland Security, graduate programs in CLAS focus on refining essential skill sets for data analysis and its critical application, for career advancement and personal growth. A Master's degree from Rider will connect cutting edge curricula with real-world learning opportunities resulting in a unique and enriching educational experience.

Masters in Applied Psychology

The M.A. in Applied Psychology: Applied Behavior Analysis (ABA) prepares students to excel in professional careers as scientist-practitioners. By challenging students to use a scientific lens when creating and evaluating clinical interventions, and to use an applied lens when designing research, this program will ensure that students are prepared to achieve success in behavior analytic employment, or to pursue further education upon completion of the program.

Masters in Business Communication

The M.A. in Business Communication focuses on the application of communication skills within a business context. Students learn to better understand and leverage communication strategies to achieve organizational goals. The program introduces students to best practices in business communication, and engages them in real life current issues and scenarios faced by professionals on the job.

Masters in Business Communication with a concentration in Health Communication

The M.A. in Business Communication with a concentration in Health Communication prepares graduates to advance public health policy, influence the health and lifestyle behaviors of individuals and underserved population groups, and improve overall health outcomes.

The Health Communication program offers students a rich and engaging learning experience. Designed for working professionals, this online graduate program provides a rich and engaging learning experience.

Masters in Homeland Security

The M.A. in Homeland Security is a broad, theory-based program which offers a distinctive and multidisciplinary approach to preparing professionals for leadership roles in protecting the United States, its interests and its allies from terrorist attacks, as well as responding to natural disasters and other threats to the safety and welfare of our communities, state and nation. Students will gain the knowledge and foundation needed to pursue private or public sector employment in the expanding area of homeland security and emergency preparedness, or further study in public policy.

Applied Psychology

Program Overview

The Master of Arts in Applied Psychology: Applied Behavior Analysis (ABA) is intended to provide students with theoretical and practical knowledge in applied behavioral psychology while also providing general understanding of how psychology relates to ABA practice.

Applied behavioral psychology is the application of the science of motivation and learning to describing, explaining, predicting, and changing individual behavior. ABA is used in educational settings, organizational settings (e.g., job training, performance assessment, task analysis and training), behavior change related to health outcomes (e.g., compliance with medication, addictions, feeding problems, exercise, etc.) and most often in interventions with individuals with developmental disabilities.

Mission Statement

The Master of Arts in Applied Psychology: Applied Behavior Analysis (ABA) prepares students to excel in professional careers as scientist-practitioners. By challenging students to use a scientific lens when

creating and evaluating clinical interventions, and to use an applied lens when designing research, this program will ensure that students are prepared to achieve success in behavior analytic employment, or to pursue further education upon completion of the program.

National Certification in Behavior Analysis

The Behavior Analyst Certification Board, Inc. (<http://www.bacb.com>)® (BCBA) has approved Rider University's ABA core course sequence as providing the content hours under the 4th Edition Task List and meeting the coursework requirements for eligibility to take the Board Certified Behavior Analyst Examination®. Applicants will have to meet additional requirements to qualify.

Admission Status

Upon completion of the steps in the application procedure, the applicant will be assigned to one of the following classifications once admitted:

• Graduate Standing

The student is qualified to undertake graduate study and must apply for matriculated status when eligible;

• Conditional Standing

The student either has not satisfied all of the admission requirements or has not completed all of the undergraduate preparatory requirements or both and may be permitted to engage in studies during a probationary period;

• Special Standing

The student does not plan to matriculate in a Rider graduate degree.

Transfer of Credits

Upon acceptance to the Master of Arts in Applied Psychology: Applied Behavior Analysis program, students may request transfer of up to nine semester hours of graduate credits completed at an accredited institution. These credits must have been earned within six years of the date of credit transfer approval. All transfer credits must be approved by the Applied Psychology Steering Committee. Courses accepted for transfer must be similar to required or elective courses that are approved for the respective program, and a grade of at least "B" must have been earned in each of these courses.

Academic Standing

A minimum grade of "B" is required to obtain credit toward graduation. A grade of "B-" or lower will not count toward graduation credits. A GPA of 3.0 must be maintained to remain in good academic standing. Students whose GPA falls below 3.0 will be placed on Conditional Standing.

Course Repeat Policy

Students may not repeat any graduate course for credit that they have already taken, except a course in which they have received a grade lower than "B" or one from which they withdrew. Any exceptions must be approved by the department chair.

Dismissal

Rider University reserves the right to dismiss any student when, in the judgment of the faculty or the officers of Rider, such action seems advisable. Any of the following situations will result in the automatic

dismissal of a student working toward a graduate degree or certification program in Applied Psychology:

- Receiving any grade of "B-" or lower in two graduate courses;
- Not attaining a grade point average of 3.0 after taking 12 or more graduate credits at Rider University;
- Failure to complete degree requirements in six years.

Graduation Requirements

To graduate, students must have completed all the requirements for the degree within 6 years of enrolling in the program, have a GPA of 3.00 or higher, and have submitted the degree application for graduation form to the Dean's office.

Graduation with Distinction

Students who graduate with an overall grade point average of 3.85 or higher are designated as graduating with distinction. This term appears on the student's official transcript, below the student's name in the commencement program, and on the diploma.

Overview

The 4+1 Masters in Applied Psychology, Applied Behavior Analysis concentration is designed for students who wish to combine undergraduate study in psychology leading to a Bachelor's of Arts degree with graduate study leading to a Masters of Arts in Applied Psychology.

The admission process for this program ensures that only capable students are enrolled. Freshman students are encouraged to seek advice about the program from their advisor and the program coordinator. The following courses must be completed if the student intends to apply to the program: PSY-212 Intro to Applied Behavior Analysis and PSY-299 Field Placement in Applied Behavior Analysis. PSY-299 is intended to assist the student in determining if the program is a good match for them. During the first semester of the junior year, the student will formally apply to the Applied Psychology program through the Graduate Admissions Office. The process involves the following:

- A completed application form for admission to the Applied Psychology program, accompanied by a \$50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- A statement of objectives prepared by the student that presents the student's reasons for wanting to enter the Applied Psychology program;
- An interview with faculty from the Applied Psychology program; and
- Completion of required 200 level courses.

Students accepted into the Applied Psychology program at the end of their junior year will complete one graduate level elective course during each semester of their senior year.

Students will be awarded the BA degree when they complete the requirements for that degree in psychology. The MA will be awarded upon completion of the Applied Psychology requirements.

PSY 510 Introduction to Applied Behavior Analysis 3 Credits

This course will provide an introduction to applied behavior analysis. Students will learn the history and defining features of the field. Due to the scientific nature of applied behavior analysis, students will also learn characteristics and processes associated with the scientific method. Furthermore, foundational concepts will be defined, along with relevant behavior change procedures.

PSY 511 Principles of Learning 3 Credits

This course will provide students with more in depth understanding of the philosophical assumptions, characteristics and basic principles of behavior analysis. Students will have the opportunity to review concepts learned during Introduction to Applied Behavior Analysis. This course will also provide an introduction to the basic research in behavior analysis. Students will become more fluent in definitions, characteristics, principles, processes, and concepts of behavior analysis.

Prerequisite(s): PSY 510.

PSY 513 Observational Methods and Functional Assessment 3 Credits

This course is designed to provide knowledge and skills of methodologies to conduct a thorough behavioral assessment, interpret the assessment data, and identify goals for treatment. Topics will include direct observation/data collection methods, data analysis, functional assessment, stimulus preference and reinforcer assessments, and ethical and professional issues. The second half of the course will deal specifically with functional analysis including the history of and variations to the methodology. The relationship between assessment techniques and the development of the least-restrictive but most effective behavioral intervention will also be discussed.

Prerequisite(s): PSY 510, PSY 511.

PSY 514 Single Subject Research Design and Analysis 3 Credits

Students will be introduced to the basic evaluative methods used in behavior analysis including various models of single subject design such as multiple baselines, reversal designs, and alternating treatment models. Students will design analyses, collect data, graphically display their data, and provide an analysis of findings. Students will read original behavior analytic research articles and practice analysis of findings.

Prerequisite(s): PSY 510, PSY 511.

PSY 516 Creating Effective & Ethical Interventions 3 Credits

This course will familiarize the student with ethical issues and responsibilities of behavior analysts working in applied settings. Informed consent, due process, protection of confidentiality, and selection of least intrusive, least restrictive behavior change procedures will be presented and discussed within the context of case method. Ethical decision making processes will be emphasized, and the relationship between ethics and law will be explored.

PSY 518 Organizational Behavior Management 3 Credits

This course will provide an overview of research and practice in the field of Organizational Behavior Management (OBM), also referred to as Performance Management in organizational settings. Performance Management is a behaviorally-based area of specialization within the broad field of Industrial-Organizational Psychology. The concepts and techniques used in Performance Management originated from the field of behavior analysis.

PSY 520 Interventions for Challenging Behavior 3 Credits

Students will review principles of behavior in the context of application to functional assessment and treatment of socially significant problem behavior. Topics including extinction, functional communication training, differential reinforcement, choice, environmental manipulations, and punishment will be covered. Students will move through the process of developing function-based interventions and writing behavior plans.

Prerequisite(s): PSY 510.

PSY 530 Interventions for Individuals with Developmental Disabilities 3 Credits

The purpose of this course is to prepare students to work with individuals with a broad spectrum of developmental disabilities. The course will begin with a discussion of typical child development and milestones, address how development might differ from the norm, introduce subsequent assessment and diagnosis and ultimately, introduce appropriate interventions. The main focus of this course is applied behavior analysis [ABA] and common ABA strategies for intervention.

PSY 533 Interventions for Autism 3 Credits

The purpose of this course is to provide students with a general understanding of the clinical characteristics of autism spectrum disorders. The course will briefly address etiology and neurocognitive underpinnings of these disorders but will focus on psycho-educational interventions. The course will be taught from an applied behavior analytic perspective.

PSY 535 Language Assessment and Intervention 3 Credits

Students will be introduced to the classification of verbal responses, both vocal and non-vocal. Using videotaped examples, students will categorize observed verbal behavior. Students will be provided with practical tools for the assessment of verbal behavior, as well as an array of intervention strategies. A focus will include the design of teaching strategies to enhance language acquisition, as well as ongoing evaluation of intervention efficacy will be employed.

Prerequisite(s): PSY 510, PSY 511.

PSY 536 Social Skills Assessment & Intervention 3 Credits

Students will be introduced to the development of social skills and the identification social skills deficits. Using videotaped examples, students will categorize observed social behavior. Next, students will be provided with practical tools for the assessment of social and emotional behavior, as well as an array of intervention strategies. Tools for the collection of data and the evaluation of the success of target interventions will be stressed.

Prerequisite(s): PSY 510, PSY 511.

PSY 550 Behavior Analytic Approaches to Health and Physical Activity 3 Credits

The application of behavior analytic methods, practices, and principles has been demonstrated through research and clinical applications to be effective at changing health and fitness behavior. This course will provide an overview of research and practice in applying behavior analytic principles to changing health behavior and physical activity. Behavior change across various populations will be covered including both adults and children with and without disabilities. Discussion will focus on both functional assessment as well as interventions effective at changing health and physical activity including self-management, self-monitoring, goal setting, contingency management, etc. Students will spend the semester implementing self-management projects for their own health and/or fitness behavior.

PSY 565 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

PSY 567 Multicultural Perspectives in Applied Psychology 3 Credits

In this graduate level course, students will examine in-depth, culture and: identity formation, social relationships, the perception and manifestation of mental illness, and treatment seeking among other areas. Additionally, given the increasing diversity of communities in the US, the course will also focus on immigration, acculturation, discrimination, and the psychological correlates of each. Implications of these factors for emerging practitioners will also be covered.

PSY 574 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the varieties of ways family impacts development across the lifespan.

PSY 577 Developmental Psychopathology 3 Credits

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

PSY 582 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

PSY 584 Positive Psychology 3 Credits

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 584 is crosslisted with PSY 384.

PSY 585 Independent Research and Study 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. Permission of Instructor.

PSY 590 Field Placement in Applied Behavior Analysis 3 Credits

The applied behavior analysis practicum includes a required field placement of 15 hours per week and periodic on campus meetings. The practicum experience will allow students to experience the professional life of a behavior analyst in one of several preapproved sites. Sites approved include those for children, adolescents or adults with disabilities. Placements will be selected in consultation with the Practicum Coordinator and will require a written practicum plan from the cooperating field supervisor.

Prerequisite(s): PSY 510, PSY 511, PSY 513, PSY 514.

PSY 595 Selected Topics in Applied Psychology 3 Credits

Students will actively engage in an in-depth inquiry into a special topic area concerning applied psychology. Though the topics will change, students will be required to read and discuss current literature as well as considering the application of tools of the discipline to research questions of their own.

PSY 600 ABA Thesis I 1 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 601 ABA Thesis II 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 602 ABA Thesis III 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

Business Communication

Program Overview

Rider’s M.A. in Business Communication focuses on the application of communication skills within a business context. Students learn to better understand and leverage communication strategies to achieve organizational goals. The program introduces students to best practices in business communication, and engages them in real life current issues and scenarios faced by professionals on the job.

Students also benefit from Rider’s central location between New York City and Philadelphia, which connects them to the business, financial and cultural nexus of Princeton and the burgeoning Route 1 corridor.

Curriculum Overview

The Master of Arts degree in Business Communication is a 33-credit program designed to advance communication knowledge and skills as they apply to the professional work setting. Communication is the common thread weaving throughout every working day in every workplace. Most employees are required to communicate orally or in writing to clients, colleagues, supervisors and/or the public on a daily basis.

Completion of this 33-credit program will prepare students for jobs in business communication and as professional communicators in a range of organizational settings. Strategic communication is a central activity in the professional world and requires knowledge, case analysis and skill refinement at a high level. Courses focus on understanding the business environment and on analysis of business communication challenges and development of appropriate solutions to them. Students will learn the theories that are the foundation for effective communication and apply this knowledge to class exercises and professional experiences.

The program includes graduate-level courses from Rider’s College of Business, which holds prestigious accreditation by AACSB International: The Association to Advance Collegiate Schools of Business.

Among the skills participants in the M.A. in Business Communication develop are learning how to manage crisis communication, internally and externally, with credibility and transparency; thinking and writing strategically for the effective communication of business goals; being ethical and responsible communicators; functioning within the laws and regulations relative to workplace communication; and understanding organizational dynamics, including leadership and team building.

M.A. in Business Communication 4+1 Option Overview

The 4+1 Masters in Business Communication is designed for students who wish to combine undergraduate study in a major leading to a Bachelor's degree with graduate study leading to a Masters of Arts in Business Communication, including the option of the online Health Communication concentration.

The admission process for this program ensures that only capable students are enrolled. Freshman and sophomore students are encouraged to seek advice about the program from their advisor and the program director. During the junior year, the student will formally apply to the M.A.B.C. program through the Graduate Admissions Office. The process involves the following:

- A completed application form for admission to the Business Communication program, accompanied by a \$50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- A statement of objectives prepared by the student that presents the student's reasons for wanting to enter the Business Communication program;
- Two letters of recommendation, at least one from a college professor

Students accepted into the Business Communication program at the end of their junior year will complete one graduate level elective course during each semester of their senior year.

Students will be awarded the B.A. or B.S. degree when they complete the requirements for that degree. The M.A. will be awarded upon completion of the Business Communication requirements.

Academic Plan of Study

The Four-Plus-One M.A.B.C. is designed to be begun in the senior year of undergraduate study and completed in one additional year by the student who plans to attend the program on a full-time basis. The following educational plan is provided as a sample only. Each student,

with the guidance from the M.A.B.C. director, will develop a personalized educational plan.

Courses and Descriptions

COMM 503 Corporate/Persuasive Discourse 3 Credits

Imparts advanced knowledge of crisis management, including theory, techniques and applications. Students will gain competency in a number of areas including: changing opinion and behavior, crisis management principles, strategies, tactics and communication methods. Students will work in teams to develop the knowledge and skills to manage the messages surrounding crisis-related issues found in organizations.

COMM 504 Strategic Business Writing 3 Credits

Provides students with the tools to think and write strategically. Students will gain competency in a number of areas including: identifying challenges and communicating to different workplace audiences; developing content for daily, routine and specific workplace requirements; focusing on strategic, outcomes-based writing; and cultivating interpersonal relationships for successful communication. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

COMM 507 Bus Presentation Strategies 3 Credits

Develops the ability to create purposeful presentations with targeted messages relating to audience needs. Students will gain competency in a number of areas including: messaging, writing for the visual media, using current visual presentation tools, delivering an impactful presentation and taking advantage of social media channels. They will develop the knowledge and skills to influence and inspire internal and external constituencies, a key part of communication practitioners' jobs, especially those in managerial/senior staff roles.

COMM 525 Visual Communication 3 Credits

Develops understanding of the importance of visuals and using different ways to communicate effectively with visuals, which is an integral parts of any advanced communication and journalism curriculum. The goal of the course is to provide students with the practical knowledge and critical skills necessary to effectively use visuals as an important and inevitable component in the communication process. The course covers visual communication theories, perception of psychology, design and layout principles, typography, imagery in mass media and visuals in interactive media.

COMM 531 Legal/Ethical Iss for Prof Com 3 Credits

Provides students with the knowledge to understand and apply ethical guidelines and current laws and regulations relative to workplace communication, as well as the legal limits impacting professional communications. This knowledge is particularly important for those in or aspiring to managerial/senior staff roles.

COMM 545 Info Gathering & Analysis 3 Credits

Develops the knowledge and skills to use various research methods and analysis techniques to provide critical information for, and assist with, business decisions. It will cover developing research tools, gathering and verifying information, analyzing, and reporting results. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

COMM 552 Communication in a Multicultural Workplace 1.5 Credits

Instructs in the use of diversity and cultural communication principles and strategies to effectively manage a culturally diverse workforce. This course will help organizational leaders understand how gender, ethnic, religious, and other differences affect the workplace, and how to effectively harness those differences towards maintaining a workplace that promotes good employee relations, and ultimately, good productivity for the organization.

COMM 553 Communication in a Global Market 1.5 Credits

Examines communication between and among businesses in a global context. The course presents communication as an essential pivot around which revolve the social and institutional relationships within and among nations. Hence, exploring global communication structures and tendencies is an important means to understanding social, cultural, economic and political impositions on global business. The emerging role of technologies of communication, such as social media, will be a particular focus of this course.

COMM 554 Effective Group Communication 1.5 Credits

Encompasses the study of individual and group behavior in the workplace. Emphasis is placed on individual behavior and group dynamics, application of current group theories, effective group communication, and effective leadership/followership skills. A comprehensive review of these processes, as well as others, will allow students to examine their role in groups as well as teams.

COMM 555 Communication and Organizational Culture 1.5 Credits

Examines communication and culture in organized settings. Emphasis is placed on managing organizational culture, communication and the relationship between organizational performance and organizational culture. A review of research and analysis as it relates to organizations will allow students to apply what they have learned about organizational culture to real life situations.

COMM 599 Capstone in Business Comm 3 Credits

Provides students with the opportunity to explore, research and discuss practical and theoretical topics in business communication. This capstone course gives students an opportunity to apply skills and knowledge they have learned throughout the Master of Arts in Business Communication curriculum. Under faculty supervision, students will complete a major project using a variety of research methods.

PMBA 8020 Fundamentals of Accounting 3 Credits

For those students having no previous knowledge of accounting. Subject is approached from the point of view of the user of accounting information rather than that of the accountant who supplies the information. Surveys mechanics of accounting as a means to an end, emphasizing accounting as a tool of management and the language of business. Problems and cases bring out the managerial implications of accounting.

PMBA 8030 Economic Analysis 3 Credits

An intensive exposition of the essentials of price theory and income and employment theory. For students with less than a year of introductory economics at the undergraduate level. Topics include an analysis of markets, the nature and characteristics of producer behavior, the theory of pricing in competitive and non competitive markets, and their welfare effects. At the macro level, coverage of the economy in the short run deals with economic fluxuations, fiscal policy, and monetary policy. An examination of the economy in the long run covers factors effecting economic growth.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

in our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

Homeland Security (M.A.)

Program Overview

The M.A. in Homeland Security provides students with a multidisciplinary program that goes beyond conventional studies of the subject. The degree is designed to give students broad training in the theoretical and applied nature of security studies and then to offer students the

ability to specialize in Global or Domestic Security. The M.A. explores the causes and consequences of political violence and how the U.S.'s internal and global environment impacts issues of security within the nation and globally. Students will also learn about the institutions, actors and processes that support the security community. It explores the tools and actions the U.S. and other governments can utilize in maintaining security and the consequences of doing so. Finally, the graduate program in Homeland Security Policy provides students with the foundation for pursuing careers in the security sector.

Course Requirements for the M.A. in Homeland Security

To earn an M.A. in Homeland Security, a total of **36** credits must be completed from the following:

Code	Title	Credits
Required Foundation Courses (18 credits)		
HLSP 501	Homeland Security	3
HLSP 502	Development and Structure of the US Intelligence Community	3
HLSP 505	Civil Liberties and National Security	3
HLSP 527	Policy Analysis and Evaluation	3
HLSP 530	Data Analysis and Methods for Political Science	3
HLSP 545	Loyalty and the State of Exception	3
Specialized Courses: Choose one of the following specializations (three courses in one specialization)		
Global Security Specialization: Choose three courses from the following:		9
HLSP 508	Political Communication, Terrorism, and Security	
HLSP 510	Terrorism	
HLSP 529	Energy Security	
HLSP 551	Global Security	
HLSP 552	U.S. Foreign and Security Policy	
HLSP 567	Global Immigration Trends and Security Issues	
Domestic Security Specialization: Choose three courses from the following:		9
HLSP 504	Political Behavior of Security and Conflict	
HLSP 506	US Constitutional Law and National Security	
HLSP 514	Congress and National Security	
HLSP 515	Counterterrorism	
HLSP 516	The Presidency and National Security	

HLSP 520	Defense Policy and Analysis	
HLSP 550	American National Security	
Elective Courses:		6
Two additional courses in either specialization		
Capstone: Choose one of the following:		3
HLSP 590	Master's Thesis	
HLSP 591	M.A. in Homeland Security Internship	

Courses and Descriptions

HLSP 501 Homeland Security 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

HLSP 502 Development and Structure of the US Intelligence Community 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

HLSP 504 Political Behavior of Security and Conflict 3 Credits

The course focuses on various analytical approaches in behavioral political science in order to better understand how individuals interact with the political system. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior during periods of crisis and uncertainty. The course empowers students to conduct advanced research in order to test some of the leading theories of the subfield.

HLSP 505 Civil Liberties and National Security 3 Credits

During times of crisis, can our government maintain individual liberty? This course provides an in-depth exploration of the tension between the role of the state in balancing civil liberties with national security. In this context, the course provides a specific focus on freedom of speech, press and assembly, freedom of religion, the right to privacy and the courts' role, or lack thereof, in the War on Terror.

HLSP 506 US Constitutional Law and National Security 3 Credits

This graduate seminar examines the origin and development of the American constitutional system and constitutional law. It further examines this system within the context of national security. Primary emphasis is on the US Supreme Court, which includes its developmental as an institution, the origins of judicial review and the court's establishment of this process, as well as the decision-making process by Justices of the court. The course will then examine the interplay between the court and its political environment and the impact the court has had upon the functioning of the political system by considering the Marshall Court (1801-1835), the Hughes Court (1930-1941) and the Warren Court (1953-1969). We will conclude with a consideration of the role of the court in balancing the rights and freedoms of a democratic society within the demands of the national security state.

HLSP 508 Political Communication, Terrorism, and Security 3 Credits

This course explores how political communication affects terrorism and security. It is well known that media plays an important role in creating the narrative for understanding terrorism and national security issues. The question is whether that narrative tends to help protect that nation, or whether it actually interferes with that goal. In addition, social media has become a means by which terrorist groups recruit outside volunteers, while blogs and websites are often used to incite incidents in various countries. This course deals with the various ways in which political communication can support, or interfere with, the protection of national security.

HLSP 510 Terrorism 3 Credits

Politics is the study of power and its application, and hence the study of violence has always played a central role in the discipline. In the era of mass politics, violent political participation has been accentuated as evidenced by the prevalence of both domestic and international terrorism. The practice of terrorism itself has undergone changes in the new era and the appearance of groups and "lone wolves" bent on sowing death and destruction for its own sake is more common place. Moreover, the statelessness of today's terrorists removes crucial restraints that once held even extreme terrorists in check. Perhaps more than any other organization, ISIS embodies these trends. It is therefore incumbent upon us to take a step away from the spectacular nature of the news, and ask fundamental questions concerning the motivations, modes of operation, and circumstances contributing to the appearance of terrorist movements, and the roles of the leaders as against the "foot soldiers" in such organizations. Special attention is laid on the emotional fervor of those engaged in the activity, the ideology that mobilizes them and rationalizes their behavior, within each case's historical settings.

HLSP 514 Congress and National Security 3 Credits

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. In addition to an in-depth analysis of the US Congress, we also look comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror?

HLSP 515 Counterterrorism 3 Credits

One of the aims of analyzing the nature of terrorism, its goals, and the underlying deeper motives of those who partake in it, is to thwart as many terrorist efforts as possible and to bring terrorist campaigns to an end. Thus, the questions of how terrorism begins and how terrorism ends are intimately related. Because of the prevalence of terrorism in the national and international arenas and the spectacular nature of terrorist undertakings, the analysis of these questions is the subject of much media attention and public discussion that tends to obscure and politicize what should be a focus of attention of citizens, policy makers, and students of the social sciences alike. This course seeks to point out concrete measures for counterterrorism – of the type that sometimes is under public discussion – but in a more systematic manner that brings together methods of heuristic thinking in political science and adjacent disciplines, historical and comparative experience, and the literature on counter terrorism to analyze the range of possible strategies that could be adopted and the possible manner in which terror campaigns may be brought.

HLSP 516 The Presidency and National Security 3 Credits

This course is designed as an upper level graduate combination lecture and discussion section on the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School, English School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

HLSP 520 Defense Policy and Analysis 3 Credits

The course begins with an overview of the structure of US defense policy and administration and explores issues associated with national defense. Throughout the course students become familiar with basic data, institutions, actors, trends, issues and options in the strategic implementation of defense and force. The primary focus of the course is on the Department of Defense (DoD) as well as on key committees and actors within the White House, State Department, Central Intelligence Administration and Congress.

HLSP 527 Policy Analysis and Evaluation 3 Credits

Policy Analysis and Evaluation fully addresses this problem by providing students with an in-depth study of public policy. It does so by linking theory with practice in helping students think systematically about public policy. The course addresses the policy process through leading theoretical models within the subfield as well as an evaluation of government's response, or lack thereof, of contemporary policy problems. Our focus will be three areas of policy analysis: 1) descriptive 2) evaluative and 3) prescriptive. As part of our focus, we will address policy design, implementation, evaluation and failure. Overall, students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options.

HLSP 529 Energy Security 3 Credits

Energy Security explores the role of energy in shaping global politics, natural resource management practices and volatility in economic markets. The course begins with an overview of energy security and explores issues associated with energy production, national security, energy consumption, and environmental conservation. Throughout the course students will become familiar with basic data, trends, issues and options in the exploration and production of renewable and non-renewable energy sources.

HLSP 530 Data Analysis and Methods for Political Science 3 Credits

This course introduces students to quantitative and qualitative methods used by political scientists and security specialists in the study of social and political phenomena. Students will learn the logical structure of political analysis, and the quantitative measures used to supplement and support these logical structures. Overall the course draws on the fundamentals of statistics: Namely the ability to describe data samples and draw inferences about the populations from which they were drawn. It should also improve one's ability to read data, interpret data, and judge others' claims about data. After students learn these skills, they will apply them to a prepared data set. The emphasis of this course is on "hands-on" experience. Students approaching this subject for the first time will "learn by doing" this type of analysis.

HLSP 545 Loyalty and the State of Exception 3 Credits

The course enquires into cases ranging across Europe, the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, have suspended, if not dissolved, constitutionally guaranteed civil liberties. Under emergency situations, organs of national security are energized; organs of opinion and electronic media including internet newsgathering, opinion expression and formation, may be censored; citizens may be enlisted to report to and inform on their neighbors. Regimes of exception may severely curtail academic freedom and university life; they may regulate voluntary associations by means of secret or not so secret surveillance of meetings, and a demand for lists of members and financial contributors. States of exception may deploy methods of coercion usually proscribed in "normal" times, e.g., suspension of habeas corpus rules; extended if not indeterminate periods of detention of suspects; and techniques of "enhanced interrogation" that may violate constitutional and international law. Using a number of case studies, the course inquires into the conditions under which liberal democracies transform themselves into states of exceptions; the effects of such transformations on individual and civic life; and the procedures by which states no longer under stress return to liberal democratic procedures and recovery of civil liberties.

HLSP 550 American National Security 3 Credits

The course is part of the foundational sequence of the M.A. in Homeland Security Policy. The course trains students to think strategically and critically about major issues facing American National Security.

HLSP 551 Global Security 3 Credits

This seminar critically addresses the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

HLSP 552 U.S. Foreign and Security Policy 3 Credits

This course emphasizes the main theories of and themes in American foreign policy since the end of the Second World War. We will examine the patterns that have permeated American Foreign Policy since 1945, and discuss the roles that various actors play in the foreign policy process. We will use theoretical concepts to discuss the major events in American foreign policy over the last half of a century. The course will focus on both the conduct and formulation of American foreign policy. Detailed knowledge of the policy-making process, including legal and institutional restraints and standard operating procedures, is clearly essential for all students of foreign policy. Yet, only by exploring America's past actions in the global arena and only by searching for historical precedents and patterns can students fully grasp the dilemmas facing the United States today.

HLSP 567 Global Immigration Trends and Security Issues 3 Credits

Amidst the broader trends of international politics that address the growing flow of goods, capital, and information across state borders, the movement of people is a permanent and expanding feature. However, central to the notion of the political identity of the nation-state is the ability to control the entry of non-citizens. The regulatory power of the nation-state to control its borders is at least threatened by the migratory movements of people. People are driven from their homes by conditions of war, economic difficulty, or environmental disaster. Millions of people migrate permanently each year, and about 20 million are refugees and seek political asylum worldwide. The vast majority of refugees are women and children—this is the hidden truth of the post-Cold War order, huge numbers of displaced women and children. These numbers are significant, particularly since the general movement heads in one direction, toward advanced industrial states, mainly Western Europe and the United States. About 35 million legal and illegal immigrants live in the United States. Immigrants account for 11.5 percent of the total population, the highest percentage in 70 years. Critics warn that if current trends continue, by the end of this decade the immigrant share of the total population will surpass the all time high of 14.8 percent reached in 1890. Understanding immigration and refugee issues in this interdependent world will help us to gain insights into the workings of political, economic, and social forces both within receiving and sending states as well as the international regime which regulates these movements. The topics addressed in this course go beyond simple models of utility and efficiency since the questions of immigration and political asylum are often deeply emotional issues for societies; the issue also has a significant moral dimension.

HLSP 590 Master's Thesis 3 Credits

Students will complete an original substantive research paper that will build on prior research in Security Studies or related discipline.

HLSP 591 M.A. in Homeland Security Internship 3 Credits

The course is part of the capstone requirements of the M.A. in Homeland Security Policy. The course will have students complete an internship, self-evaluation and write a reflection paper outlining their experience working in a security related position.

Health Communication Concentration, Master of Arts in Business Communication

Program Overview

Rider's Health Communication concentration in the M.A. in Business Communication (M.A.H.C.) focuses on the application of communication skills within the health context. Health communication is one of the areas of communication that is growing exponentially and is projected to experience continued growth. Communication contributes to vital health outcomes by directing positive health behaviors. Interventions, strategies, and programs to change health behaviors are communicative acts and are the primary tools used in health communication. The program introduces students to best practices in communication, and engages them in real-life current issues and scenarios faced by professionals on the job. Students in the program learn to better understand and leverage communication strategies to achieve organizational goals.

Curriculum Overview

The M.A.H.C. is a fully online, 33-credit program designed to prepare students for careers in the fast-paced, expanding field of health. Students learn to identify and explain current issues in health communication; use theory and research methodology to examine and explain trends and phenomena in health; interpret the verbal and nonverbal communication practices of individuals, healthcare providers, and organizations in order to reform conversations about health; explain complex medical terminology, statistics, and research findings in simplified language; compose written materials and develop health communication campaigns for general audiences, healthcare professionals, medical organizations, and advocacy groups; understand the far-reaching, multi-layered impact that culture has on health communication and health

outcomes; and develop a variety of health communication campaigns that inform, educate, promote, or call for action.

Degrees Offered

- M.A. in Business Communication with a concentration in Health Communication

Overview

The 4+1 Masters in Business Communication is designed for students who wish to combine undergraduate study in a major leading to a Bachelor's degree with graduate study leading to a Masters of Arts in Business Communication, including the option of the online Health Communication concentration.

The admission process for this program ensures that only capable students are enrolled. Freshman and sophomore students are encouraged to seek advice about the program from their advisor and the program director. During the junior year, the student will formally apply to the M.A.B.C. program through the Graduate Admissions Office. The process involves the following:

- A completed application form for admission to the Business Communication program, accompanied by a \$50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- A statement of objectives prepared by the student that presents the student's reasons for wanting to enter the Business Communication program;

- Two letters of recommendation, at least one from a college professor

Students accepted into the Business Communication program at the end of their junior year will complete one graduate level elective course during each semester of their senior year.

Students will be awarded the B.A. or B.S. degree when they complete the requirements for that degree. The M.A. will be awarded upon completion of the Business Communication requirements.

Academic Plan of Study

The Four-Plus-One M.A.B.C. is designed to be begun in the senior year of undergraduate study and completed in one additional year by the student who plans to attend the program on a full-time basis. The following educational plan is provided as a sample only. Each student, with the guidance from the M.A.B.C. director, will develop a personalized educational plan.

Courses and Descriptions

COMM 500 Communication Processes in Health 3 Credits

Interpersonal and nonverbal communication are the two areas of general communication studies that health communication draws from most heavily. These concepts affect relationships in healthcare, the ability to understand and process medical information, the efficacy of messages in relation to nonverbal indicators, and how bad news, another major concept in health communication, is received. This class will provide a comprehensive understanding of these concepts, how they are utilized in the field of health communication, and the ways in which the two areas intersect, all in the broader context of understanding health communication as a discipline.

COMM 501 Medical Concepts and Health Writing 3 Credits

Improving the way that health is communicated requires the ability to understand health information at the initial – and often complex – level. In particular, health communication aims to provide information to underserved populations, who may suffer from lack of education and poor health literacy. This class will provide students with a basic understanding of medical terminology and the ability to comprehend and explain scientific literature. Students will develop the skills needed to translate medical information for a wide range of audiences. Students will also be required to apply these concepts through the creation of multiple types of health writing assignments.

COMM 505 Health Communication Theory 3 Credits

Health communication is driven by a set of principles that guide the conceptualization, design, and implementation of new health guidelines and interventions. The ultimate goal of health communication is to increase health and satisfaction by encouraging healthier behaviors, medical compliance, and more efficient communication of medical information. This class is designed to give an overview of the major fields of study in health communication through examination of the major theoretical perspectives therein. Topics include the different areas of study in which health communication theories are based, how theory is used to support the initial design of research studies and interventions, and the situations in which the use of more than one theoretical approach is warranted.

COMM 507 Bus Presentation Strategies 3 Credits

Develops the ability to create purposeful presentations with targeted messages relating to audience needs. Students will gain competency in a number of areas including: messaging, writing for the visual media, using current visual presentation tools, delivering an impactful presentation and taking advantage of social media channels. They will develop the knowledge and skills to influence and inspire internal and external constituencies, a key part of communication practitioners' jobs, especially those in managerial/senior staff roles.

COMM 525 Visual Communication 3 Credits

Develops understanding of the importance of visuals and using different ways to communicate effectively with visuals, which is an integral parts of any advanced communication and journalism curriculum. The goal of the course is to provide students with the practical knowledge and critical skills necessary to effectively use visuals as an important and inevitable component in the communication process. The course covers visual communication theories, perception of psychology, design and layout principles, typography, imagery in mass media and visuals in interactive media.

COMM 531 Legal/Ethical Iss for Prof Com 3 Credits

Provides students with the knowledge to understand and apply ethical guidelines and current laws and regulations relative to workplace communication, as well as the legal limits impacting professional communications. This knowledge is particularly important for those in or aspiring to managerial/senior staff roles.

COMM 545 Info Gathering & Analysis 3 Credits

Develops the knowledge and skills to use various research methods and analysis techniques to provide critical information for, and assist with, business decisions. It will cover developing research tools, gathering and verifying information, analyzing, and reporting results. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

COMM 551 Cultural Conceptions of Health and Illness 3 Credits

Culture affects every relationship dynamic, the way nonverbal communication is interpreted, how audiences are selected for health campaigns, the ability and willingness to use technology, and the way bad news is broken to individuals and families. In health communication, culture comprises both the general conceptions of what culture is – the characteristics of a particular social, ethnic, or age group – as well as other factors. This class will examine the specific variables of culture in this setting, how the variables are both unique and interconnected, and the wide-reaching impact culture has in health. The first half of the course explores the variables that culture includes. The latter part of the course takes these variables and demonstrates the roles they play in real-world health communication settings.

COMM 558 Health Communication Campaigns 3 Credits

Campaigns are the primary tool used in health communication to disseminate messages and effect change. Campaigns can provide information on a specific issue or to a specific community, encourage preventative health behaviors, demonstrate behaviors (such as performing self-skin exams for skin cancer or the proper way to follow medication instructions), put forward suggestions for a healthy lifestyle, raise awareness, or offer support. At times, multiple messages may be present in one campaign. This class will examine the different types of health campaigns and the impact a health communication campaign can have. Students will learn how to analyze a health campaign through its full cycle. The class will also serve as a foundation for the capstone class of the Master's in Health Communication program.

COMM 559 Communicating Crises in Health 3 Credits

In the health setting, multiple events can be considered a crisis: the outbreak of a disease, contamination of food, a natural disaster, and more. The response to a crisis can have a significant, long-lasting impact on the organization's reputation. The development of a crisis plan, which sets forth guidelines for an organization's response to a crisis and involves multiple steps, can be completed before any events occur and can significantly affect the way an organization handles a crisis. This class explores the types of crises that occur in health communication, the factors involved in a crisis, the development of a crisis plan, and the effects of a crisis on an organization.

COMM 600 Capstone: Implementing a Health Communication Campaign 3 Credits

The ability to implement, evaluate, revise and successfully launch a campaign is a critical skill for all individuals who work in health communication. Campaigns are the primary tool used by health communicators to initiate change in a community, although their implementation will not always be a fluid, one-step process. This class will require students to select a local health campaign and evaluate the campaign from start to finish. Students will complete the Master's program in Health Communication with a complete proposal for a health communication campaign and the skills needed to analyze an existing campaign from beginning to end.

Courses and Descriptions

Arts Administration (AADM)

Course list will be provided in the near future.

Athletic Leadership (ATHL)

ATHL 501 Seminar in Sport Psychology 3 Credits

This course covers psychological and social-psychological antecedents and consequences of exercise, physical activity, and sports participation. Emphasizes theory and research on personality, motivation, arousal, cognition, attributions, attitudes, self-efficacy, leadership effectiveness, and group dynamics. Emphasis is placed on applications for maximizing effectiveness while serving in the position of coach or administrator.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 502 Evaluating Athletic Interventions 3 Credits

This course in research methods prepares the student to understand materials and issues associated with but not limited to the logic of the scientific method, research design, and qualitative and statistical analysis of data. Students will be afforded the opportunity to conduct research in the course on topics.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 503 Seminar in Strength, Speed, and Conditioning 3 Credits

Emphasis will be placed upon assessment, description, and analysis of sport movement and designing training programs to enhance performance variables. While this course will assist those who desire to sit for the National Strength and Conditioning Association's (NSCA) Certified Exam, it is NOT a preparation course for the NSCA-CSCS exam.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 504 Seminar in Athletic Training 3 Credits

Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 505 Seminar in Sports Media and Communication 3 Credits

Seminar in Sports Media and Communication is a critical examination of the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 506 Seminar in Facility Management 3 Credits

Seminar in Facilities Management and Event Planning provides an examination of principles and techniques of planning and operating sport facilities. Emphasizes the principles and concepts of organization and administration including communication, personnel management, management of physical resources, and risk management. Examines a variety of sport operations such as indoor stadiums, athletic field complexes, and managing recreation and intramural activities.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 507 Seminar in Athletic Governance and Policy 3 Credits

Students in this course will explore principles, techniques, and process related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students value effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. Studying collegiate athletic administration involves interpreting NCAA By-laws, including a comparison between Division I, II, and III compliance regulations. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will characterize the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level. At the end of the course, students will understand the primary duties of the athletic director and the intricacies of managing an intercollegiate athletic program.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 508 Seminar in Athletics and Risk Management 3 Credits

Students in this course will explore proactive approaches to managing risks associated with conducting health, physical education, recreation and outdoor education programs. This course will emphasize safety as a foundation of quality program planning. Students will study governing associations and leadership/management skills required to be successful in the world of college athletics.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 509 Seminar in Legal and Ethical Issues in Athletics 3 Credits

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues which will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 510 Seminar in Athletic Coaching 3 Credits

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching; integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 511 Athletic Coaching Internship 3 Credits

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching; integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 512 Athletic Administrative Internship 3 Credits

The internship affords students professional experience with an organization where the course theory can be applied to best practices. The internship is developed in consultation with the student, the student's academic advisor and the Internship. A learning/work plan is prepared by the student for approval by the site supervisor, both of whom share responsibility for the internship.

Prerequisite(s): Permission of Program Director or approval by CCS.

ATHL 513 Special Topics Seminar 3 Credits

This course will provide students the opportunity to survey the various sub-disciplines related to coaching and athletic administration, and their methods of inquiry. The course will place emphases on critically appraising research literature, and data collection, data organization and analyses for various research questions.

Prerequisite(s): Permission of Program Director or approval by CCS.

BSED 504 Curriculum Strategies and Evaluative Concepts in Business Education 3 Credits

Designed to provide the student with effective curriculum strategies and evaluative concepts relative to business and office education programs in elementary, secondary, and post-secondary public and private schools. Students are acquainted with appropriate curriculum and evaluation models designed to plan, organize, implement, revise and assess instruction and programs. Improvement of curriculum and evaluation is the primary goal.

BSED 506 Administration and Supervision of Business and Vocational Education 3 Credits

A study of the administrative and supervisory problems associated with business and vocational education at the local, county, state, and federal levels. Administrative and supervisory improvement strategies are explored. Major topics include: educational administrative structures; role of the supervisor of instruction; state and federal legislation; certification; personnel policies; ethical conduct; funding procedures; and public relations. Improvement of administration and supervision of business and vocational education is the primary goal.

BSED 508 Organizing and Administering Cooperative Work Experience Programs 3 Credits

An overview of the current administrative and instructional strategies used in organizing and administering cooperative work experience programs at the secondary and post-secondary levels. Up-to-date concepts are reviewed relative to program approval, teacher coordinator certification, work agreements, labor laws, funding, reporting supervision of student learners, related instruction, student wages, and vocational student organizations. Current instructional materials are reviewed and evaluated. Improvement in the organization and administration of cooperative work experience programs is the primary goal.

BSED 509 Principles and Strategies of Vocational and Cooperative Education 3 Credits

Designed as one of the specialized courses in the preparation of business and marketing education teachers and teacher-coordinators of cooperative work experience programs. The philosophy and history of education for and about work, including technology, are studied along with the principles and strategies for organizing and administering vocational cooperative education programs. Developmental/reflective evaluative techniques will be applied for the assessment of self, students, instruction and selected case studies. Current instructional concepts, organizational and administrative strategies, legislative enactments, and regulations pertaining to the employment of youth are included. Special attention is given to the role of vocational student organizations and advisory committees.

BSED 519 Directed Study and Research in Business Education 1-3 Credits

Provides the student with an opportunity to complete a project, resolve a problem, or pursue a major activity that will make a contribution to the teaching profession in business or marketing education. Each participant, under the supervision of a senior faculty member, follows a planned sequence of professional activity that culminates in a completed written project. Professional teacher development is the primary goal.

Business Education-GR (BSED)

BSED 530 Emerging Instructional Strategies in Business Education 3 Credits

Emphasis is placed on the enhancement of teaching effectiveness in business education as emerging instructional strategies are reviewed and studied. Special attention is devoted to the new technology and its use in business education while focusing attention to the present and future needs of the employer. Current instructional materials are presented and utilized. Master practicing business education teachers will augment the instructor's presentations.

Communication-GR (COMM)**COMM 500 Communication Processes in Health 3 Credits**

Interpersonal and nonverbal communication are the two areas of general communication studies that health communication draws from most heavily. These concepts affect relationships in healthcare, the ability to understand and process medical information, the efficacy of messages in relation to nonverbal indicators, and how bad news, another major concept in health communication, is received. This class will provide a comprehensive understanding of these concepts, how they are utilized in the field of health communication, and the ways in which the two areas intersect, all in the broader context of understanding health communication as a discipline.

COMM 501 Medical Concepts and Health Writing 3 Credits

Improving the way that health is communicated requires the ability to understand health information at the initial – and often complex – level. In particular, health communication aims to provide information to underserved populations, who may suffer from lack of education and poor health literacy. This class will provide students with a basic understanding of medical terminology and the ability to comprehend and explain scientific literature. Students will develop the skills needed to translate medical information for a wide range of audiences. Students will also be required to apply these concepts through the creation of multiple types of health writing assignments.

COMM 503 Corporate/Persuasive Discourse 3 Credits

Imparts advanced knowledge of crisis management, including theory, techniques and applications. Students will gain competency in a number of areas including: changing opinion and behavior, crisis management principles, strategies, tactics and communication methods. Students will work in teams to develop the knowledge and skills to manage the messages surrounding crisis-related issues found in organizations.

COMM 504 Strategic Business Writing 3 Credits

Provides students with the tools to think and write strategically. Students will gain competency in a number of areas including: identifying challenges and communicating to different workplace audiences; developing content for daily, routine and specific workplace requirements; focusing on strategic, outcomes-based writing; and cultivating interpersonal relationships for successful communication. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

COMM 505 Health Communication Theory 3 Credits

Health communication is driven by a set of principles that guide the conceptualization, design, and implementation of new health guidelines and interventions. The ultimate goal of health communication is to increase health and satisfaction by encouraging healthier behaviors, medical compliance, and more efficient communication of medical information. This class is designed to give an overview of the major fields of study in health communication through examination of the major theoretical perspectives therein. Topics include the different areas of study in which health communication theories are based, how theory is used to support the initial design of research studies and interventions, and the situations in which the use of more than one theoretical approach is warranted.

COMM 507 Bus Presentation Strategies 3 Credits

Develops the ability to create purposeful presentations with targeted messages relating to audience needs. Students will gain competency in a number of areas including: messaging, writing for the visual media, using current visual presentation tools, delivering an impactful presentation and taking advantage of social media channels. They will develop the knowledge and skills to influence and inspire internal and external constituencies, a key part of communication practitioners' jobs, especially those in managerial/senior staff roles.

COMM 525 Visual Communication 3 Credits

Develops understanding of the importance of visuals and using different ways to communicate effectively with visuals, which is an integral parts of any advanced communication and journalism curriculum. The goal of the course is to provide students with the practical knowledge and critical skills necessary to effectively use visuals as an important and inevitable component in the communication process. The course covers visual communication theories, perception of psychology, design and layout principles, typography, imagery in mass media and visuals in interactive media.

COMM 531 Legal/Ethical Iss for Prof Com 3 Credits

Provides students with the knowledge to understand and apply ethical guidelines and current laws and regulations relative to workplace communication, as well as the legal limits impacting professional communications. This knowledge is particularly important for those in or aspiring to managerial/senior staff roles.

COMM 545 Info Gathering & Analysis 3 Credits

Develops the knowledge and skills to use various research methods and analysis techniques to provide critical information for, and assist with, business decisions. It will cover developing research tools, gathering and verifying information, analyzing, and reporting results. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

COMM 550 Effective Group Communication 1.5 Credits**COMM 551 Cultural Conceptions of Health and Illness 3 Credits**

Culture affects every relationship dynamic, the way nonverbal communication is interpreted, how audiences are selected for health campaigns, the ability and willingness to use technology, and the way bad news is broken to individuals and families. In health communication, culture comprises both the general conceptions of what culture is – the characteristics of a particular social, ethnic, or age group – as well as other factors. This class will examine the specific variables of culture in this setting, how the variables are both unique and interconnected, and the wide-reaching impact culture has in health. The first half of the course explores the variables that culture includes. The latter part of the course takes these variables and demonstrates the roles they play in real-world health communication settings.

COMM 552 Communication in a Multicultural Workplace 1.5 Credits

Instructs in the use of diversity and cultural communication principles and strategies to effectively manage a culturally diverse workforce. This course will help organizational leaders understand how gender, ethnic, religious, and other differences affect the workplace, and how to effectively harness those differences towards maintaining a workplace that promotes good employee relations, and ultimately, good productivity for the organization.

COMM 553 Communication in a Global Market 1.5 Credits

Examines communication between and among businesses in a global context. The course presents communication as an essential pivot around which revolve the social and institutional relationships within and among nations. Hence, exploring global communication structures and tendencies is an important means to understanding social, cultural, economic and political impositions on global business. The emerging role of technologies of communication, such as social media, will be a particular focus of this course.

COMM 554 Effective Group Communication 1.5 Credits

Encompasses the study of individual and group behavior in the workplace. Emphasis is placed on individual behavior and group dynamics, application of current group theories, effective group communication, and effective leadership/followership skills. A comprehensive review of these processes, as well as others, will allow students to examine their role in groups as well as teams.

COMM 555 Communication and Organizational Culture 1.5 Credits

Examines communication and culture in organized settings. Emphasis is placed on managing organizational culture, communication and the relationship between organizational performance and organizational culture. A review of research and analysis as it relates to organizations will allow students to apply what they have learned about organizational culture to real life situations.

COMM 556 Special Topics in Communication 3 Credits**COMM 557 Special Topics in Communication 3 Credits****COMM 558 Health Communication Campaigns 3 Credits**

Campaigns are the primary tool used in health communication to disseminate messages and effect change. Campaigns can provide information on a specific issue or to a specific community, encourage preventative health behaviors, demonstrate behaviors (such as performing self-skin exams for skin cancer or the proper way to follow medication instructions), put forward suggestions for a healthy lifestyle, raise awareness, or offer support. At times, multiple messages may be present in one campaign. This class will examine the different types of health campaigns and the impact a health communication campaign can have. Students will learn how to analyze a health campaign through its full cycle. The class will also serve as a foundation for the capstone class of the Master's in Health Communication program.

COMM 559 Communicating Crises in Health 3 Credits

In the health setting, multiple events can be considered a crisis: the outbreak of a disease, contamination of food, a natural disaster, and more. The response to a crisis can have a significant, long-lasting impact on the organization's reputation. The development of a crisis plan, which sets forth guidelines for an organization's response to a crisis and involves multiple steps, can be completed before any events occur and can significantly affect the way an organization handles a crisis. This class explores the types of crises that occur in health communication, the factors involved in a crisis, the development of a crisis plan, and the effects of a crisis on an organization.

COMM 560 Communication Issues for Leaders 3 Credits

Focuses on analysis of contemporary issues that highlight the necessity of effective communication for those in a leadership position. Through analysis and discussion of historical and current challenges faced by organizations, students will learn to recognize how effective leaders apply successful communication strategies. Case studies will also explore the effect that poor communication choices have had on organizations. Emphasis will be placed on discussion, research, and presentation.

COMM 563 Digital Media Communication 3 Credits

Looks at the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COMM 564 Communication and Diversity in the Workplace 3 Credits

The culture of work, like society, is multicultural. More than ever, today's organizational leaders, including CEOs, managers and supervisors, must understand how to use diversity and cultural communication principles and strategies to effectively nurture and promote a culturally diverse workforce. This course helps organizational leaders understand how gender, ethnic, religious, and other social and cultural differences affect the workplace, and how to effectively harness those differences towards maintaining a workplace that promotes good employee relationship, and ultimately, good productivity for the organization.

COMM 565 Rel Comm: Interpersl, Group, Intercult 3 Credits

Introduces students to seminal and contemporary research in the area of relational communication. Broken down into three modules, the curriculum will be divided among the topics of Interpersonal Communication, Group Communication, and Intercultural Communication. In the first, emphasis will be placed upon theories of human communication, verbal and nonverbal communication, gender, and conflict. The second module will explore various elements of group communication, including leadership and followership, roles, status, power and problem solving and decision making. The third module will introduce students to the study of intercultural communication, with its focus on the relationship between culture and communication.

COMM 590 Independent Research and Study 3 Credits

Independent Research and Study allows students in good academic standing to investigate topics of interest under faculty supervision.

COMM 599 Capstone in Business Comm 3 Credits

Provides students with the opportunity to explore, research and discuss practical and theoretical topics in business communication. This capstone course gives students an opportunity to apply skills and knowledge they have learned throughout the Master of Arts in Business Communication curriculum. Under faculty supervision, students will complete a major project using a variety of research methods.

COMM 600 Capstone: Implementing a Health Communication Campaign 3 Credits

The ability to implement, evaluate, revise and successfully launch a campaign is a critical skill for all individuals who work in health communication. Campaigns are the primary tool used by health communicators to initiate change in a community, although their implementation will not always be a fluid, one-step process. This class will require students to select a local health campaign and evaluate the campaign from start to finish. Students will complete the Master's program in Health Communication with a complete proposal for a health communication campaign and the skills needed to analyze an existing campaign from beginning to end.

COMM 690 Research and Creative Expressi 1-4 Credits**Counseling Substance Aware (CNSC)****CNSC 580 Elementary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students will apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 581 Secondary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 590 Counseling Internship I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School counselors, student assistance coordinators (SACs) and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled. Students must be supervised by a SAC.

Prerequisite(s): all other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

CNSC 591 Counseling Internship II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School counselors, Student Assistance Coordinators (SACs), and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. Students must be supervised by a SAC. The approval and cooperation of the intern's field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 or CNSC 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

Counseling (COUN)**COUN 500 Introduction to Counseling and Helping Professions 3 Credits**

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 501 Coaching Principles and Practices 3 Credits

The course covers core coaching competencies, including coaching screening and orientation, fundamental skills, assessment, approaches for organizations, and coaching ethics. The course meets all 30-hour educational requirements for certification as a Board Certified Coach (BCC) through the Center for Credentialing and Education and is required course for the 60-hour BCC educational requirements.

COUN 503 Group Counseling 3 Credits

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

Prerequisite(s): COUN 500, CNPY 502.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

COUN 510 Approaches to Family Counseling 3 Credits

Presents a basic understanding of major approaches of family counseling. Family counseling approaches covered include structural, systems, Ackerman, Satir, and analytical. These approaches are presented as related to major problem centered family concerns—child-rearing concerns, alcohol, drugs, child abuse, dysfunctional marriage, divorce, etc. Emphasizes self-awareness as related to family development.

Prerequisite(s): COUN 500, CNPY 502, or permission of instructor or advisor.

COUN 515 Substance Abuse Counseling 3 Credits

Analyzes the development, intervention, and treatment of drug abuse and alcoholism. Designed to assist counselors in identifying drug abuse and alcoholism, examining the specialized approaches of counseling with these clients and reviewing the related elements; i.e., family participation, physical problems, effects on school or job, etc.

COUN 516 Strategies in Addiction Counseling 3 Credits

Analyzes the development, intervention and treatment of co-dependents. Designed to focus on the characteristics of co-dependency and how they were initiated in alcoholic families as well as other dysfunctional families. Symptoms will be discussed in terms of problems with intimacy, trust, eating disorders, assertiveness, love relationships and the differences among co-dependents. Specialized approaches to treating these areas will be discussed. (Classes will involve lecture, discussion and students will learn and experience group exercises for co-dependency treatment.)

Prerequisite(s): COUN 515 or permission of instructor.

COUN 520 Multicultural Counseling and Relationship Development 3 Credits

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

COUN 525 Gender Issues in Counseling 3 Credits

Examines the psychological, physiological, historical, and socio-cultural factors that affect the development of women and men across the life span and discusses implications for counseling. Focuses on relevant gender issues including gender bias and equity, misdiagnosis, self-esteem, depression, violence and sexual abuse, the feminization of poverty, and the importance of relationship for women. Presents an overview of feminist psychotherapy and explores the context of the behavioral, emotional and biological problems that impact on mental health. Also discusses the emerging men's movement and trends in counseling men; introduces gay and lesbian issues, the issues of minority women, and factors in counseling the HIV/AIDS client.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

COUN 535 Holistic Wellness Counseling 3 Credits

Based on current methods and research, students will explore holistic wellness (e.g., spirituality, self-direction, work and leisure, friendship, and love) positive psychology (e.g., hope, forgiveness, etc.), and human change from personal and interpersonal perspectives.

Prerequisite(s): CNPY 502.

COUN 550 Counseling Techniques Laboratory 3 Credits

A basic laboratory pre-practicum for counseling services majors which provides opportunities for both observation of and participation in counseling activities. The purpose of this course is to provide students with their initial counseling experience under closely supervised conditions. The focus of this course is the development of basic counseling skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling process), and self development (the student as counselor) grounded in professional counseling theories.

COUN 580 Elementary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 581 Secondary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor-in-training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 582 Coaching Practicum 3 Credits

A 30-hour supervised experience in coaching with individuals, groups, or organizations. Includes seminar discussions, observations of recorded sessions, session analyses, and group supervision with the faculty supervisor. Provides the coach in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of coaching services. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on coaching services as they address the needs of clients. This course is designed to fulfill the practice requirements for certification as a Board Certified Coach through the Center for Credentialing and Education.

Prerequisite(s): COUN 500 or COUN 501, CNPY 502, COUN 505, and permission of instructor.

COUN 585 Clinical Mental Health Counseling Practicum 3 Credits

A supervised experience in counseling and consulting techniques in mental health facility, community counseling agency, or college setting. Includes seminar discussions, interview analyses or audiotape/videotape observations, and individual supervision with the instructor. For the experienced counselor or the advanced counselor in training who desires to review and/or strengthen individual counseling and consulting techniques. A field placement of 100 hours is required with a minimum of 40 direct contact hours with clients. Students registering for this course should contact the instructor the semester prior to the course being offered.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 586 Practicum II 1 Credits

The continuation of Practicum, this 1-credit course is required for those students who were unable to complete the 100-fieldwork hours of Practicum in the fall or spring semester. Students will continue at their Practicum fieldwork site and will be responsible for completing the remainder of their 100-hours. A grade will not be granted in Practicum until the successful completion of Practicum II. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor, director, and professor permission and a comprehensive plan for fieldwork- hour completion to the clinical coordinator. **Prerequisite(s):** COUN or CNSC 580, 581, or 585 and all other required course work must be completed or in progress. **Comments/Restrictions:** Program director approval with professor of record approval is required.

COUN 590 Internship in Counseling I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

Prerequisite(s): all other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

COUN 591 Internship in Counseling II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

COUN 593 Internships III 1 Credits

The continuation of Internship II, this 1-credit course is required for those students who were unable to complete the 300-fieldwork hours of Internship II in the fall or spring semester. Students will continue at their Internship II fieldwork site and will be responsible for completing the remainder of their 300-hours. A grade will not be granted in Internship II until the successful completion of Internship III. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor permission and a comprehensive plan for fieldwork- hour completion to the clinical coordinator. Clinical coordinator approval is required.

Prerequisite(s): COUN 591 and all other required course work must be completed or in progress and permission of the clinical coordinator is required.

COUN 600 Independent Study and Research in Counseling Services 1-3 Credits

Students may take two independent studies. However, under special circumstances, such as students seeking certifications (e.g., Student Assistance Coordinator), students may be approved by their advisor to take up to six COUN 600 3-credit courses for a total of 18 credits.

COUN 660 Counseling Supervision: Issues, Concepts and Methods 3 Credits

This course introduces and critically examines issues and concepts that arise in the supervision of counseling and psychotherapy practitioners and trainees. Methods and techniques of supervision are presented to enable students to become knowledgeable and skilled providers of proficient clinical supervision. Psychotherapeutic, behavioral, integrative, systems, experiential, and developmental models of supervision are studied. The unique problems encountered in group, family, and couples counseling supervision are raised as well as legal, ethical, and multicultural issues. Administrative and contemporary issues such as inter- and intra-agency supervision, inter-agency communication, record keeping, evaluation, and taping of counseling sessions are examined.

Prerequisites: COUN 590.

COUN 690 Internship in Counseling Speciality I 3-6 Credits

This internship provides on-the-job clinical experience in approved settings. Placement is selected based on students' specialty area goals and must be approved by the faculty advisor the semester prior to actual placement. Students must also submit in writing a description of clinical activities available in the field site before the placement is approved. Students will be required to attend a weekly seminar during which time each student will present and/or discuss legal, ethical, multicultural, contemporary, and clinical issues in her/his specialty area.

Counseling Psychology (CNPY)**CNPY 502 Theories of Counseling and Helping Professions 3 Credits**

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 503 Psychological Development of the Adult and Aging 3 Credits

Surveys psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human adult development and transitions throughout the adult life span. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the adult and aging will be examined.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

CNPY 515 Consultation in School and Agency Settings 3 Credits

This course provides an introduction to school and agency based consultation theories and practices. Contemporary models of consultation are presented with students' emphasis on mental health, behavioral, and systems approach. In addition to the study of conceptual models, the development of skills in the consultation process in school and/or agency settings is emphasized. Students engage in behavioral consultations with consultees in approved placements.

CNPY 516 Advanced Psychopathology 3 Credits

An in-depth study of psychopathology with emphasis on developmental and personality disorders, and physiological disturbances. Includes assessment, classification, and treatment with emphasis on utilization in a variety of counseling and school settings. Biological, pathological, pharmacological bases of mental disorders are introduced and discussed in relationship to specific disorder classifications.

Prerequisite(s): CNPY514 or permission of instructor.

CNPY 518 Counseling Children, Adolescents and Families 3 Credits

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

Curriculum & Instruction (CURR)**CURR 517 Teaching and Learning Number and Operations 3 Credits**

This course provides an in-depth study of the content and pedagogy for understanding early number theory. It addresses students' mathematical understanding of representing numbers, relationships among numbers, and number systems; operations and how they relate to one another; and computation. Strong emphasis is placed on the cognitive development of children's thinking in number and operations, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 518 Teaching and Learning Rational Numbers and Proportional Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding rational numbers and proportional reasoning. Content includes a variety of situations involving proportions, for example, real-world problems involving ratios, rates, and percents; geometry involving similarity; algebra involving linearity; and probability involving assigning a probability to an event. Distinguishing proportional situations from those that are not and reasoning proportionally in appropriate situations are emphasized. Emphasis is placed on children's cognitive development of rational numbers and proportional reasoning, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 519 Teaching and Learning Algebraic Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy necessary to facilitate the transition from concrete arithmetic reasoning to abstract algebraic reasoning. It addresses students' mathematical understanding of equality, variable, generalization, and functions; cognitive development of algebraic reasoning; and the instructional, curricular, and assessment implications for fostering algebraic reasoning in students. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for mathematics content and mathematical practices.

CURR 520 Teaching and Learning Geometric Understanding 3 Credits

This course provides an in-depth study of the content and pedagogy for geometric understanding. It addresses students' mathematical understanding of shapes and their properties, location, transformation of shapes, and visualization; the cognitive development of geometric thinking; and the instructional, curricular, and assessment implications for teaching. Emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

CURR 522 Teaching and Learning Measurement and Data 3 Credits

This course provides an in-depth study of the content and pedagogy for measurement, data analysis, and probability. Mathematical content includes units, systems, and processes of measurement; techniques, tools, and formulas to determine measurements; data collection and display; statistical methods to analyze data; and, evaluating inferences and predictions. Emphasis is placed on children's cognitive development of measurement and data, and the instructional, curricula, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core state Standards for Mathematics Practices.

CURR 523 Teaching and Learning Mathematics in the High School 3 Credits

This course addresses issues central to teaching and learning mathematics in the high school; building learning communities, how students learn mathematics, use of worthwhile mathematical tasks, instructional modes, technology options, and assessment to inform instruction. Mathematical topics examined are number and quantity, algebra, trigonometry, geometry, and statistics and probability, and modeling. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

CURR 524 Teaching Mathematics in the Middle School 3 Credits

This course has been designed to guide both in-service and pre-service teachers towards growth in teaching mathematics in middle school classrooms, according to the best of current practices. It is accepted that teaching and learning is an ongoing process throughout our careers. Teaching math well requires: a) Deep understanding of the mathematics content, b) Understanding of how students develop mathematical ideas, and c) The ability to shape appropriate learning environments and tasks. Realistically, the process of teaching mathematics, how student learn it, and how to build appropriate learning environments in courses like this one is only the first step towards developing the content and pedagogical skills needed to teach in the 21st century. The objective is to help students construct ideas that take them in the right direction, providing models for the continued long-term learning they will develop with their own classrooms clearly in mind. According to the best of current practice, this involves learning through exploration, inquiry and discovery. As students communicate and then reflect on teaching situations, they will form what has been described as a community of practice, a prototype for how groups of educators join forces, over months and years, to strengthen both their understanding and school practice.

CURR 526 Place Value Instruction: Navigating the Decimal 3 Credits

K-8 teachers examine the theory and practice of K-8 place value instruction during a weeklong course. Incorporating the ideas of the successful CONNECT-ED project, this seminar will examine place value theory and model instructional design that traces children's developmental levels and aligns with national and state standards. Participants will work with peers and experienced University faculty to design longitudinal instructional modules on other math topics. By engaging in this multi-grade design process, teachers will examine new ideas about mathematics, children's mathematical thinking, and mathematics instruction. Participants can earn professional development hours or college credit.

CURR 527 Curricular and Instructional Design for Fraction Understanding 3 Credits

K-8 teachers examine the theory and practice of K-8 fraction instruction during a weeklong course. Based on the successful CONNECT-ED project, this seminar will model how to design fraction instruction that traces children's developmental levels, and aligns with national and state standards. Participants will work with peers and experienced University faculty to design similar instructional activities. By engaging in this multi-grade design process, teachers will examine new ideas about mathematics, children's mathematical thinking, and mathematics instruction. Participants can earn professional development hours or college credit.

CURR 531 Strategies for Curriculum Development, Design, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

CURR 532 Strategies for Curriculum Change 3 Credits

This course will examine organizational skills and knowledge necessary to effect curriculum development and change, K-12. The course will address the socio-political context of curriculum change along with alternative strategies for initiating, implementing and sustaining standards-based curriculum improvements. Topics of study include strategic planning, problem-solving strategies, needs assessments, curriculum alignment, program evaluation, staff development and the organization of staff members for collaborative deliberation and decision making as essential means for promoting successful curriculum change at all levels of schooling. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531.

CURR 533 Elementary School Curriculum 3 Credits

A review of principles, curriculum, and methodology in elementary education, examined in the framework of social, cultural, and psychological developments. Recent developments in theory and empirical knowledge are analyzed. Emphasizes developing the content and organization of an integrated curriculum with a concern for individual differences with provision for social environments best adapted to fulfill basic needs and interests.

Prerequisite(s): CURR 531.

CURR 534 Secondary School Curriculum 3 Credits

A survey of the changing aims and programs of the secondary school. General, specialized, vocational, and activity programs are discussed with an analysis and evaluation of recent curriculum developments and projects. Current issues and controversies, in addition to research findings affecting secondary curriculum, are studied.

Prerequisite(s): CURR 531.

CURR 535 Theory and Practices of Bilingual Education 3 Credits

Introduces the rationale and research as a basis for bilingual education as well as the varied and current approaches to implementing programs. Implications drawn from the social, psychological, and linguistic problems of bilingual learners are considered as they apply to the needs, goals, and issues of bilingual/bicultural programs.

CURR 536 Special Studies in Curriculum, Instruction, and Supervision 3 Credits

The content of this course varies for each offering. In-depth treatment of issues, problems, concerns, or developments in curriculum, instruction and/or supervision will be provided. Topics such as global education, teaching and learning styles, classroom management, etc., are announced in advance and serve as the focus of course content.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531 and CURR 538.

CURR 552 Creative, Ethical Teacher Leadership 3 Credits

In order to be effective, teacher leaders require in-depth understanding of the complex, threat-filled, 21st-century globalized environment that provides the context for their work. They must understand the problems, opportunities, and pressures generated by the current socioeconomic, political, and cultural system of the United States, which is characterized by dogmatism-saturated disputes over the purposes of education and the allocation of resources. In addition, they must appreciate the ways in which the larger forces of globalization influence these national trends and issues. Finally, they must understand the ways in which the principles of wise, ethical, intelligent, and creative leadership can help them and their colleagues in their efforts to maintain and strengthen student learning in these daunting conditions.

CURR 580 Action Research Tchg & Learn 3 Credits**CURR 585 Practicm Conductng Action Rsch 3 Credits****CURR 590 Seminar and Practicum in Curriculum, Instruction and Supervision 3 Credits**

Taken at the completion of all course work in the program. Students study in seminar fashion the current literature and research in the general areas of curriculum, instruction and supervision. Each student is involved in an individualized field experience. Typically the experience involves work with supervisory assistance in a selected segment of the student's school district, or in an approved location. The cooperation of the administrative staff of the student's school district is essential for the effective completion of this project. The instructor is free to observe the project in progress, and to evaluate the completed research project and the finished project paper.

Prerequisite(s): all course work including EDUC 500, permission of instructor.

CURR 600 Independent Study and Research 1-3 Credits

Course content varies with academic research interests of students who wish to engage in independent study related to the overall content of curriculum, instruction and/or supervision.

CURR 630 Big Ideas Learn Phy Sci-Matter 1 Credits**CURR 631 Big Ideas Learn Phy Sci-Energy 1 Credits****CURR 632 Big Ideas Learn Phy Sci-Motion 1 Credits****CURR 633 Big Ideas Earth&Space-Tecton 1 Credits****CURR 634 Big Ideas Earth&Space-Climate 1 Credits****CURR 635 Big Ideas Earth&Space-Universe 1 Credits****CURR 636 Big Ideas Life Sci-Cell Behav 1 Credits****CURR 637 Big Ideas Life Sci-Evolution 1 Credits****CURR 638 Big Ideas in Life Sci-Energy 1 Credits****CURR 640 Teaching and Learning Physical Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected physical science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 641 Teaching and Learning Life Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected life science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 642 Teaching and Learning Earth and Space Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected earth and space science topics aligned with state and national standards. The course will be structured around big ideas identified in standards. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 643 Teaching & Learning Engineering & Design 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding selected technology, engineering and design topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 644 Teaching&Learning Chemical Sci 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected chemistry topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the chemistry content, emphasis will also be placed on: effective instructional strategies and science practices for the K-8 classroom through the use and study of such practices and strategies. Participants will engage in experiences with the states and properties of matter, develop models of the atom, and gain an understanding of the major principles of chemistry. The course will focus on states of matter, characteristic physical and chemical properties of matter, and chemical and physical transformations of matter.

CURR 650 Understanding Gifted Learners 3 Credits

The course explores the ways in which the gifted and talented can differ from more typical learners in terms of their cognition, social-emotional dimensions, behavior, and long-term development. It focuses on theories of intelligence, differing conceptions of giftedness and talent development, and learning processes. Some specific topics include underachievement, perfectionism, dual exceptionality, gender issues, and underserved populations. The course also addresses the ways in which gifted education can evolve to fit the demands and opportunities embedded in complex, 21st-century socioeconomic, cultural, and technological contexts.

CURR 652 Differentiating Instruction for the Gifted and Talented 3 Credits

This course provides the rationale and practical strategies for effective instructional differentiation for the gifted and talented within and beyond the regular classroom. Participants will learn how to differentiate within subject areas by adjusting content, process, product, and learning environment to meet the needs of learners. They also will explore the nature and nuances of differentiation by ability, readiness, and interest, as well as the implications of instructional differentiation for formative and summative assessment. Throughout the course they will design and share examples of differentiation including tiered assignments, complex instruction, independent studies, graphic organizers, and learning contracts.

CURR 654 Innovative Instructional Strategies for Gifted Education 3 Credits

This hands-on, experiential course immerses participants in simulations and analyses of new and revised student-centered teaching models and strategies that are conducive to creative and critical thinking, advanced content mastery, and the invigoration of students' interests. Participants analyze the potential of each model/strategy while considering the ways in which it can apply to content learning in various subject areas/domains. The course also engages participants in studying the fundamental principles of program design in gifted education so they can make the best possible use of the instructional models and strategies.

CURR 656 Creative, Interdisciplinary Thinking 3 Credits

This course facilitates creative thinking through the exploration of important insights specific natures of giftedness and creativity.

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes, and learning products for students with disabilities and strengths.

CURR 702 Early Literacy Development for Diverse Learners 3 Credits

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

CURR 705 Inclusive Methods for Teaching Social Studies 3 Credits

This course addresses the practical and theoretical aspects of teaching social studies to diverse adolescents in secondary schools. Using the NJ Student Learning Standards in Social Studies, candidates will prepare and design curriculum and assessment for students in various learning environments and with diverse learning needs. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying social studies curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 706 Inclusive Methods for Teaching Science 3 Credits

Classroom interaction analysis systems are used in the study of the instructional processes that support inquiry-based science learning. Candidates develop their own repertoires of teaching strategies, classroom management strategies, and awareness of career requirements in STEM fields. Emphases are on the investigation and interpretation of recent curriculum developments in NGSS and NJ Student Learning Standards in Science as well as the use of lab-based processes in science learning. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying science curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 707 Inclusive Methods for Teaching Mathematics 3 Credits

This course critically analyzes the aims of teaching mathematics in secondary schools. Research pertaining to mathematics teaching and learning is analyzed. Demonstration lessons including reflective teaching and individual and group processing are created and carried out to clarify teaching, mathematics curriculum planning using NJ Student Learning Standards in Mathematics, the organization of materials and subject matter, assessment processes classroom management strategies, and awareness of career requirements in STEM fields. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying mathematics curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

CURR 711 Pedagogy and Methodology in Dance 3 Credits

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. Crosslisting the existing methods course in Dance for beginning teachers offered at the undergraduate level (DAN 450).

CURR 715 Inclusive Elementary Science, Arts, & Social Studies Teaching 3 Credits

This course provides aspiring elementary school teachers with a variety of developmentally appropriate options for designing, implementing, and evaluating curriculum and instruction in science, social studies, and the arts. Using NJ Student Learning Standards, emphasis is placed on inclusive practices and differentiation of instruction (e.g., modifying curriculum planning, learning environments, and instructional materials, content, processes, and products), curriculum integration, thematic unit and lesson planning, various teaching strategies, hands-on learning experiences, inquiry learning, career readiness skills, higher-order thinking, reflective practice, and various assessment strategies. Other facets of teaching also are addressed or reviewed in the course. These include the characteristics and needs of students with disabilities motivation, classroom management, and becoming a team member of a school faculty. Candidates also refine their pedagogical knowledge and skills by participating in the modification of instruction to meet the needs of diverse learners in nearby school settings.

CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. The candidate gradually assumes a full load of teaching responsibility. These experiences test and strengthen the translation of educational theory and research into meaningful practice. An on-campus or site-based seminar accompanies the clinical experience. Seminars emphasize reflective development toward professionalism through sharing and analyses of experiences, and in-depth reports on teaching learners with disabilities and instructional modifications employed to meet their needs. Additional analyses of student learning and reflective assignments require candidates to connect their clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars, which include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning, and agencies available for students with disabilities; classroom management strategies; awareness of methods for strengthening student achievement and career readiness, panel sessions with veteran teachers who graduated from this program; panel sessions with principals and superintendents who provide advice about long-term professional development; interviews with special education teachers who provide advice about meeting the needs of students with disabilities; and wrap-up reflective sessions at the conclusion of the semester.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

CURR 771 Supervised Clinical Experience in Teaching 3 Credits

This practicum is a condensed version of the Internship in Teaching. It is available only to interns seeking teacher certification who already have a year of successful, full-time teaching experience or its equivalent. A special application must be made and approved for enrollment in the course. The practicum requires six weeks of full-time, supervised daily participation in a school setting. After a brief period of orientation to the school and classroom, the intern assumes a full load of teaching responsibility at the school. The experience finetunes the teaching abilities of interns and enables them to demonstrate competence in the specialty for which they seek certification.

Prerequisite(s): CURR 704, CURR 705, CURR 706, CURR 707, CURR 715 and (BSED 530 or ECED 550) or Permission of instructor.

Early Childhood Ed-GR (ECED)**ECED 507 Emergent Literacy 3 Credits**

Examines perspectives on literacy acquisition including the social-constructivist perspective. Examines the processes of comprehension and composition through the language systems for written language: the grapho-phonetic, syntactic, semantic, and pragmatic. Explores the components of these processes including concepts of print, knowledge of the alphabet, phonological awareness, language play, literary genres, spelling development, vocabulary development, and word recognition.

ECED 532 Families, Community, and Diversity in Early Childhood Education 3 Credits

This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ECED 550 Development Methods and Assessment in Early Childhood Education 3 Credits

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

Education Administration (EDAD)

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 507 Education and the Law 3 Credits

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 508 Leadership in School Business Adm. 3 Credits

The educational leadership required to establish an effective relationship between school business services and the success of the total educational program is the primary focus of this course. The professional and legal responsibilities of the school business administrator to manage the organization and resources, identifying and solving problems and issues related to the effective and efficient operation of school district, will be reviewed. Specific legal and code requirements and best-practice organizational and management procedures critical to the administration of a public school district will be examined. Among the topics of study in the course will be: the organization and management of the district business office; the development of strategic planning models; traditional and program oriented budgets; and, the application of technology to instruction and the management of school and district fiscal operations. Special emphasis will be given to the importance of "generally accepted accounting procedures" in district operations. Other topics to be addressed will include: personnel, enrollment, and resource forecasting; debt service and insurance expenses; food services, transportation, and facility operations; supply management and facility maintenance; and temporary financial investments. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 509 School Financial Mgt and Accounting 3 Credits

This course examines the historical precedents and current procedures that regulate and control the funding and financial operations of school districts. The leadership role of the school business administrator, ensuring the operation of the district in compliance with policy, procedure, and code, is a central theme. Judicial decisions, federal and state legislation, the planned curriculum, and generally accepted business practices that impact on the operation of the total educational program in school districts will be reviewed. Some specific topics of study will include: the leadership role of the school business administrator in monitoring, assessing and reporting on fiscal operations; determining taxation rates; and, developing non-public sources of revenue. The impact of state imposed "cap" regulations and negotiated bargaining unit benefit packages and agreements will be assessed with regard to possible budget growth and development. Enrollment, revenue, and cash flow projections; the fiscal controls used to approve, manage and track expenditures; regulations and restrictions on the use of school funds; school district surplus and debt regulations; current and emerging fiscal concerns in school budget planning and development; and, the role of the school fiscal structure in relation to the local, state, and federal governments are other important topics to be developed. Advanced study in double entry accounting procedures will be a major component in the course. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 510 Seminar/Practicum in Teacher Leadership and Supervision 3 Credits

This course requires the student to self-assess supervisory leadership strengths for the purpose of establishing an agenda for an extensive site-based internship. The internship agenda is guided by national leadership standards that ensure a comprehensive exposure to supervisory responsibilities. Students deepen their understanding of supervisory theory and best practice and apply this knowledge to the development and refinement of a personal leadership platform. Considerable attention is placed on understanding the ethical basis of supervisory practice. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531, CURR 532 or CURR 538, and EDAD 505.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 505.

EDAD 512 School Facility Planning and Development 3 Credits

This course will examine the leadership role of the school business administrator in facility planning, renovation, and expansion. The essential linkage between guiding principles, existing and proposed facilities, and the implementation of the total educational program is considered from both theoretical constructs and practical applications. Major topics of study will include: the development and revision of long-range facility plans; the role of the state Economic Development Authority; the critical review of state proposed "model" school buildings; and, the process of drafting educational specifications. In addition, required site plan reviews by state and local officials; the referendum approval process; and, the integral role of professional services (public opinion consultants, attorneys, demographers, architects, financial consultants, public information agencies, etc.) will be discussed. Students will evaluate geographic, socio-political, financial, and ecological considerations in proposed school construction. Planning for new and emerging technology, addressing health, safety, and security considerations, ensuring barrier-free access, incorporating energy conservation measures, and the utilization of school buildings by the greater community will be overarching themes developed. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 513 Human Resources in Education 3 Credits

This course will develop the practical and theoretical knowledge of the human resources function in the educational setting. Emphasis will be placed on understanding and utilizing human resources functions and processes to identify needs and address issues in both instructional and non-instructional positions. The student will gain an understanding of the inter-relationship that exists between organizational climate, strategic planning, and the established policies and regulations of the human resources function. Students will develop a comprehensive understanding of the importance of recruitment, selection, mentoring and evaluation of faculty and support staff. Emphasis will be to continuously identify issues that are legal requirements in human resources administration or required by federal or state regulations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 505 and EDAD 511.

EDAD 514 School Finance and Fiscal Management 3 Credits

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 501.

EDAD 515 Mentoring Beginning Teachers 3 Credits

This field-based practicum requires that each student work with a novice teacher (student teacher or beginning teacher) while enrolled in the course. Through reading, observation, biography and interview, students will explore how novice teachers acquire teaching knowledge and skill. By researching their own practice as mentors, reading relevant literature and participating in critical dialogue in seminars, students will explore and evaluate methods of facilitating and supporting novice teachers' professional growth.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 501 and EDAD 514.

EDAD 591 Seminar/Practicum in Education Leadership 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council. Enrollment by permission of instructor.

EDAD 592 Seminar/Practicum in Educational Leadership 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council. Enrollment by permission of instructor.

Prerequisite(s): EDAD 591.

EDAD 600 Independent Study and Research in Educational Administration 1-3 Credits

Course content varies with the academic research interests of students who wish to engage in independent study related to the overall content of educational administration.

Education Psychology (EDPS)

EDPS 502 Psychological Development of the Child and Adolescent 3 Credits

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 506 Testing and Measurement Techniques in Reading/Literacy Education 3 Credits

Studies basic characteristics of test scores, including: reliability and validity, selection, administration, and scoring of tests; measurement of achievement, intelligence, aptitude, and interests; and the writing and editing of items of teacher-made tests, school marking procedures, interpreting of test scores. Covers basic statistical tools needed by reading specialists.

EDPS 507 Advanced Educational Psychology 3 Credits

A critical examination of contemporary learning theory as applied to educational thought and practice. The psychological, physiological, and sociological foundations of education and training; personality problems encountered by classroom teachers.

EDPS 508 Cognitive Processes and Learning 3 Credits

This course deals with what is known relative to the principles of cognitive psychology and their application to learning. The flow of information is followed from where it begins through the processes of integration and storage. Cognitive principles will be studied relative to concept formation, reasoning, and problem solving. Their relationship to specific educational tasks such as the teaching of reading, writing, mathematics, and other content will be explored and confirmed through empirical evidence.

EDPS 509 Assessment and Intervention III: Psychoeducational Assessment and Report Writing 3 Credits

Building upon EDPS 514 and EDPS 515, this course furnishes students with the clinical, practical, and theoretical sophistication to understand the assessment process for learning, cognitive, and academic concerns. Students are expected to master a wide range of concepts and skills to successfully complete this course, including administering, scoring, and interpreting tests of cognitive abilities, academic achievement, emotional-behavioral status, and adaptive behavior. Students also are required to synthesize data from multiple methods of assessment and sources to produce written psychological reports that inform intervention practice.

Prerequisite(s): EDPS 513.

EDPS 510 Assessment & Intervention IV: Behavioral and Social-Emotional Needs 3 Credits

The assessment of personality is reviewed from the context of a comprehensive, ecological model of social-emotional, behavioral, and academic development. Assessment is studied from an empirically based, problem-solving model that links directly to intervention. Students learn to select appropriate assessment tools to match individual referral questions so as to evaluate the behavioral and social/emotional problems of children and adolescents.

Prerequisite(s): EDPS 513.

EDPS 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with specific educational exceptionalities, including learning disabilities, mental retardation, behavior disorders, physical handicaps, and giftedness. The characteristics, identification procedures, and current intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

EDPS 513 Professional Practice of School Psychology: Issues and Historical, Ethical, and Legal Considerations 3 Credits

This course is designed to provide an introduction to school psychology through an analysis of the contemporary roles and functions of school psychologists. Professional issues are explored in the context of the history and evolution of school psychology as a specialty area of professional psychology. In addition, the study of professional ethics, best practices, and standards for delivery of school psychological services that have been adopted by national organizations representing the profession of school psychology will be reviewed.

EDPS 514 Assessment and Intervention I: Standardized Measures of Academics And Behavior 3 Credits

This course will increase students' understanding of the standardized assessment process, measurement issues, psychometric properties of assessment instruments, and the role of these instruments in informing academic, behavioral, and social-emotional interventions.

EDPS 515 Assessment and Intervention II: Curriculum-Based Measures 3 Credits

This course will build upon students' knowledge and skills in individual-referenced assessment based upon the standards and general curriculum. Students will be able to design, administer, score, and interpret curriculum-based assessment and link these data to intervention.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDPS 521 Statistics and Quantitative Analysis 3 Credits

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

Prerequisite(s): EDPS 520, EDUC 500.

EDPS 535 Biological Basis of Behavior 3 Credits

This course will emphasize a biological approach to the study of psychology and behavior. Topics studied will include the following: 1) the genetics of human psychological differences; 2) the anatomy of the nervous system; 3) psychopharmacology; 4) neuropsychological diseases (e.g., epilepsy, autism, multiple sclerosis); 5) memory and amnesia; 6) sleeping, dreaming, and circadian rhythms; and 7) the biopsychology of mental health difficulties.

EDPS 538 Developmental Child Psychopathology 3 Credits

The course will furnish students with a comprehensive account of the characteristics, correlates, causes, contexts, and outcomes of psychopathology in children. It serves to augment students' understanding of specific conditions in childhood and adolescence including autism spectrum disorders, attention-deficit/hyperactivity disorder, mental retardation, childhood anxiety/depression, enuresis/encopresis, learning disabilities, communication disorders including selective mutism, and emotional/behavioral disorders. The diagnostic nosologies of the DSM and IDEA will be referenced and thoroughly discussed. A special emphasis upon a developmental-systems framework for understanding child psychopathology will be presented wherein the importance of context and the influence of multiple, interacting events and processes in shaping adaptive and maladaptive development will be investigated.

EDPS 570 Advanced Interventions for Children, Adolescents and Families 3 Credits

This course provides opportunity to expand each student's knowledge and skills in the development of effective interventions to meet academic, behavioral, and social-emotional needs. Currently accepted practices based upon the individual's referral problem will be explored. Intervention will be approached from a problem-solving model and based on current assessment data. Case studies will be used to link theory and application.

Prerequisite(s): EDPS 513.

EDPS 581 Practicum in Psychoeducational Assessment and Report Writing 1 Credits

This practicum experience provides supervised practice in administering, scoring, and interpreting an array of individually administered assessment instruments for the purpose of producing a written psychological report that is linked to intervention.

Prerequisite(s): EDPS 513.

EDPS 582 Practicum in the Assessment of Behavioral and Social-Emotional Needs 1 Credits

This practicum experience provides supervised practice using the techniques and methods taught in EDPS 510 Assessment of Behavioral and Social-Emotional Needs. Students will be expected to complete a Functional Behavioral Assessment including recommendations for a behavior intervention plan and a means to monitor and evaluate the target student's progress.

Prerequisite(s): EDPS 513.

EDPS 583 Practicum in Consultation in School and Agency Settings 1 Credits

This practicum experience provides supervised practice in the study, implementation, and evaluation of a problem-solving model to provide consultation across school and agency settings. Students will be expected to successfully initiate and lead the 4-step consultation process resulting in a databased intervention. The consultation will be documented in a formal report.

Prerequisite(s): EDPS 513.

EDPS 584 Practicum in Curriculum-Based Measures 1 Credits

This practicum provides supervised experience in identifying academic needs of students utilizing curriculum-based assessment (CBA) methods within a problem-solving framework. Students will practice the selection and administration of appropriate CBA tools to match referral question(s) at the individual, class-wide and school-wide levels. Students will also practice assessment of the academic environment by conducting structured direct observation of the classroom. Students will summarize and analyze assessment data, develop goals and objectives and make recommendations for intervention.

Prerequisite(s): EDPS 513.

EDPS 590 Internship in School Psychology I 3 Credits

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

Prerequisite(s): EDPS 581, EDPS 582, and EDPS 583.

EDPS 591 Internship in School Psych II 3 Credits

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

Prerequisite(s): EDPS 590.

EDPS 600 Independent Research and Study in School Psychology 1-3 Credits

Course content varies with the academic research interests of students who wish to engage in independent study related to the overall content of school psychology.

Education Sociology (EDSO)

EDSO 501 Foundations of Counseling in Edu Settings: Referral Sources for Studetns /Students with Special Need 3 Credits

The course provides overview of the foundations of counseling in educational settings, including the historical roots; current and future trends, roles, and functions in multicultural schools and higher education settings; comprehensive developmental counseling programs; ethical school and higher education counseling practices; and individual and group counseling and consultation strategies, and evidence-based interventions and evaluations. In addition, the course will address community social services and educational-based programs (including special education and disability laws and accommodations) available to special needs students, other individuals and groups experiencing learning disabilities, and other temporary or chronic maladjustment. Reviews principles and methods utilized by social agencies, schools, and higher education settings.

EDSO 510 Sociological and Cultural Foundations of Education 3 Credits

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

Education-GR (EDUC)**EDUC 500 Introduction To Research 3 Credits**

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

EDUC 501 Methods and Instruments of Research 3 Credits

Acquaints students with insights, information, methods, procedures, and techniques for planning, conducting, and evaluating research. Includes the nature and types of research, methods, and procedures used in educational and psychological research, and the use of research data and other appropriate tools. The completion of a research proposal is required. Students who wish to complete the research project may do so on an individual basis in consultation with their respective advisors.

Prerequisite(s): EDPS 506 and READ 501.

EDUC 502 History of Education 3 Credits

The necessary knowledge of modern education's heritage so that students understand and appreciate current educational practices in proper perspective. Concentration on education's evolution in the U.S. from colonial times to the present, with a major emphasis on a study of topical issues in education treated within the framework of their historical background. A term paper and intermittent reports are required.

EDUC 503 Philosophy of Education 3 Credits

Considers the nature, aims, and objectives of education in a democratic society. Critical evaluations of various educational theorists and the philosophies of pragmatism, idealism, realism, existentialism, etc., are made. Students are encouraged to develop their own philosophy of education by preparing intermittent reports and term papers.

EDUC 511 Educational Foundations: Philosophical/Historical Perspectives 3 Credits

Major thoughts and significant actions in American educational history from colonial times to the present. Synthesis and integration of philosophical and historical contributions to the evolution of America's educational heritage for the purpose of understanding and appreciating current educational practices in proper perspective. Major emphasis on topical issues within the framework of their philosophical/historical backgrounds. Critical evaluations made of educational practices based on pragmatism, idealism, realism, existentialism. Students are encouraged to develop their own philosophy of education by preparing intermittent reports and term papers.

EDUC 515 Issues in American Schools and Society 3 Credits

This course is designed to examine contemporary educational issues impacting on schools and to re-examine the purposes of schooling in a democratic society. Students will explore current and emerging policy issues and the demands for reform in schools and districts. Emphasis will be placed on identifying and developing politically feasible responses to policy issues and procedural problems facing educational leaders today. The role of the leader in promoting the development of a collaborative institutional culture and climate and the identification of best-practice strategies to involve community stakeholders in the development of policies and programs will be emphasized. Effective communication models for use within the school, district and greater community and the use of different media and technology formats will be examined and evaluated. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. *NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

EDUC 531 Introduction to Collective Bargaining and Labor Relations 3 Credits

This course assumes that students do not have prior knowledge of legal terminology or concepts. It will provide students with a foundation in the fundamentals of collective bargaining and union-management relationships within the unique environment of the college campus. American labor law is the prevailing system of laws that govern universities and colleges, however, students will explore how these general "rules of the game" apply to higher education institutions. The course will challenge participants to consider how general rules and principles of collective bargaining and labor relations shape, and are shaped by fundamental aspects of the higher-education "workplace" including academic freedom, faculty workloads, tenure and shared governance. These unique factors have the potential to influence expectations concerning productivity, termination and the traditionally sharp distinction between labor and management found in other industries.

EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

EDUC 550 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 551 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 552 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 553 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 554 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 555 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 556 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 557 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 558 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 559 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

Educational Leadership (EDLD)

EDLD 800 Strategic Management, Organizational and Moral Leadership Behavior in a Cultural of Learning 3 Credits

This course will challenge students to embrace a system view of leadership and organizational change at the organizational level. Students will compare, contrast and critique theories and models of organizational learning, knowledge creation, and organizational capacity building and apply them to their own organizational settings. The course will focus on three leadership standards: instructional leadership, operational and managerial leadership, and professional culture. While the course will focus on conceptual frameworks and theory, it is a practice-based course. The course will enhance student ability to think systematically and develop comprehensive understanding of core competencies required to lead, initiate and sustain change in organizations. It investigates process and content issues of team building, interpersonal and group relations, and effective problem solving and decision making skills in collaborative environments. The course emphasizes the moral, ethical and social responsibilities of organizational leaders, as well as the application of principles to organizational leadership behavior and decision-making. Students will also investigate current research trends regarding ethical issues in education and other organizational contexts.

Prerequisite(s): Masters' Degree.

EDLD 801 Action Research: Principles and Methods 3 Credits

This course provides an introduction to action research, with emphasis on its application in educational settings. The course covers definitions and purposes of action research. Students will explore theoretical, methodological, and ethical issues pertinent to action research. During the course, students will engage in an action research project in an educational setting.

Prerequisite(s): Masters' Degree.

EDLD 802 Educational Change, Systemic Reform, Exercising the Politics of Change 3 Credits

This course will provide students with the skills necessary to achieve educational reform and improvement while navigating the political environment within educational institutions. Through this course, students will analyze various theories and how these ideas apply to education, organizations, change, and leadership.

Prerequisite(s): Masters' Degree.

EDLD 803 Instructional Leadership and Educational Reform 3 Credits

Through this course, students will examine contemporary educational practices and their relationship to leadership theories, models, and strategies. Participants will investigate research based instructional practices and develop the skills necessary to identify issues within organizations in suburban and urban settings. The course will provide students with a deep knowledge of the educational challenges faced by educational leaders in today's society. The focus will be on learning a successful organization through the implementation of research based strategies.

Prerequisite(s): Masters' Degree.

EDLD 804 Community Building and Sustaining Community Partnerships 3 Credits

Drawing on philosophies/theories, processes, and practices that build and sustain effective school-community partnerships, this course addresses the identification and utilization of community resources and the development of effective intra- and inter-organizational strategies, community linkages, and collaborative efforts necessary to provide for the holistic needs of students and families. Special attention is focused on the role of school leaders in planning and implementing community-wide and building level communications and involvement networks, through the development of practical action learning sets and tools. Building Commitment: How do leaders build and use public awareness and commitment to support their schools?

Prerequisite(s): Masters Degree.

EDLD 805 Valuing Diversity/Equity: Developing and Fostering a Community of Learners 3 Credits

The focus of the course is academic excellence with equity. The value orientation of the course is toward high-quality developmental outcomes for youth of all racial, ethnic, and social class backgrounds. With an emphasis on students of color and youth from less-advantaged families, the course explores several policy and strategic responses to achievement disparity: identify and work to remove key structural barriers to educational equity; excellence with equity goals; design more effective policies and practices to improve the quality of teaching; support families with ideas and practices for parenting children more effectively; engage youth to reshape their culture of achievement to align with their most positive values. The course explores theories, evidence, designs, methods, and mechanisms associated raising achievement and closing gaps.

Prerequisite(s): Masters' Degree.

EDLD 806 Research Proposal Development 3 Credits

This course builds on the action research course to more clearly define the rationale and procedures of educational and social science research. The course is designed for our first-year doctoral students. Topics will include the nature and purpose of research, planning and conducting research, critiquing and evaluation research, sampling, survey and experimental design, evaluation research, naturalistic observation and inquiry, measurement and methods of data collection, ethics, and the use of computers in data analysis. Methods are considered for collecting both quantitative and qualitative data. Students will build on prior project ideas, concepts, and research practice to more fully develop into their Dissertation of Practice topic. This course has two objectives: to increase participants' knowledge of methods for making causal inferences in quantitative research, and to provide participants with a forum for presenting and receiving feedback on their research topic for the Dissertation of Practice.

Prerequisite: Master Degree.

EDLD 807 Law and Policy 3 Credits

This course explores legal, ethical and politics issues governing PreK-12 education in America and the legal responsibilities and powers of state and local governing bodies and individuals that arise in elementary and secondary schools. Emphasis is given to federal and state statutes and case law affecting due process, liability, equal protection, and the rights of teachers and students in order to better understand the risks in education management and possible strategies to reduce those risks. The course will explore evolving legal standards on a variety of issues. The course will draw on real cases and legal/policy dilemmas that practitioners face, and focus on preventive law - providing current and future school learners with knowledge and skills they will need to make sound decisions, advance important educational objectives, and minimize legal problems.

Prerequisite: Master Degree.

EDLD 808 Generating, Using, and Assessing Data Accountability and Student Assessment 3 Credits

This course will develop the skills necessary for educational leaders to identify and define problems, implement data collection methods, and analyze, interpret, and report data across multiple levels from the individual student to the larger system. Students will gain the knowledge and skills to use data in decision making within a problem solving framework that enables evaluation of instructional programs and practices. Within this course, students will engage in activities designed to enhance skills in data-based decision making, including: large and small group discussion; review of the extant literature base; review and use of different technologies and statistical methods for data collection and analyses; case studies and simulated data analyses; and application of skills in real world settings. Attainment of these skills will prepare the student for the dissertation process to serve as an instructional leader in the field. The course references and aligns with state adopted core curriculum content standards and professional development standards, the Standards for Schools Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite: Master Degree.

EDLD 809 Finance, Fundraising and Fiscal Management 3 Credits

Financial and managerial leadership of a school building or district is a primary factor in the success or failure of school instructional programs. This course provides an opportunity for public and private school practicing and prospective administrators to gain an understanding of their role in these critical areas. Providing the resources to fund academics/instruction/athletics, facilities and capital projects is a focus of this course. A comprehensive understanding of the financial implications of systemic reform, centralized goal setting, accountability standards, and decentralized forms of site-based management, school choice, and charter schools will be a focus of study. This course will also provide a comprehensive overview of fund raising. Students are provided with an ethical foundation and are introduced to basic terminology and concepts in the field. Various fund raising vehicles are surveyed and participants learn to apply fund raising strategies that are appropriate to their organizational setting.

Prerequisite: Master Degree.

EDLD 810 Curriculum Leadership: Transforming Teachers/Developing Teacher Talent 3 Credits

This course will focus on the complex nature of teaching and learning and provide participants with the skills necessary to guide instructional practice. Adult learning theory will be examined as will curriculum theories, instructional practices, professional development, and human capital.

Prerequisite: Master Degree.

EDLD 811 Innovation and the Use of Educational Technology 3 Credits

This course addresses the intersection of organizational change and educational technology. Students will develop a philosophy of educational technology and explore related issues in policy, diversity, ethics, and evaluation. The course also covers research and theory on organizational change and processes for developing a culture of innovation. Students will apply theories of organizational change to the implementation and use of technology in educational contexts.

Prerequisite: Master Degree.

EDLD 812 Leading Programs for Diverse Learners and At Risk Students 3 Credits

This course examines some of the best practices for supporting diverse learners and at-risk students and some of the reasons behind the intrinsic and bureaucratic/policy barriers that may hinder their success. Schools are faced with an increasing number of diverse learners and at-risk students who require additional academic, social and/or medical supports for them to achieve success. This course will examine the root causes that may hinder student success and some of the programs and approaches that have proved successful in meeting their needs.

Prerequisite: Master Degree.

EDLD 813 Dissertation of Practice I/Research Proposal Development Defense 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research.

Prerequisite: Master Degree.

EDLD 814 Dissertation of Practice II 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice I.

Prerequisite(s): Master Degree.

EDLD 815 Dissertation of Practice III 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice II.

Prerequisite(s): Master Degree.

EDLD 816 Dissertation of Practice IV 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice III.

Prerequisite(s): Master Degree.

Educational Technology (TEC)

Courses and Descriptions

TEC 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners. Research in this area will be examined and applied to instructional support and design.

Prerequisite(s): SPED 512.

Executive MBA (EMBA)

EMBA 9001 Top Management Perspective 3 Credits

This team-taught course will serve as the initial course of the EMBA program. The course will take place over three weekends. Top managers will also attend and provide their perspectives to students and faculty in attendance. This course will explore the “art” of case study analysis. Students will focus on identifying, analyzing, and resolving issues from a top management perspective. This course will consider various issues confronted by top managers and heavily emphasizes contemporary cases that illustrate a wide range of management issues. By having the course team-taught by a faculty member and an Executive-in-Residence, both the academic and applied aspects of business will be represented in the classroom. This sets the tone for the approach and philosophy of the entire program - a blending of business theory with real world application. Another of the course's purposes is to allow the students to get to know one another, become acquainted with the faculty who will be teaching in the program, and receive an overview of the material that will be covered.

EMBA 9220 Financial Accounting 3 Credits

This course provides a managerially-oriented focus on the aspects of financial accounting most relevant to business decision makers. Students will develop the ability to read, analyze, and interpret financial information for decisions regarding operating, investing, and financing activities as well as serving as a foundation for more advanced analysis in areas such as credit and equity decisions.

EMBA 9230 Economics Principles 1.5 Credits

This course focuses on how markets work in different settings (structures). The course begins by establishing basic relationships between consumer behavior and demand, and production costs and supply. The remainder of the course focuses on profit-maximizing strategies in different market structures (perfect competition, monopoly, and imperfect competition). Also, this course provides an introduction to the basic economic concepts to prepare students for EMBA 9231, Economic Analysis and Decision Making.

EMBA 9231 Economic Analysis and Decision Making 3 Credits

This course focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

EMBA 9240 Corporate Finance 3 Credits

This course introduces modern corporate finance principles that today's managers should know. Its purpose is to give students a thorough introduction to the theory and practice of financial management. The course reviews the principles executives need to acquire to manage for value creation. Topics covered include valuation of securities, capital budgeting, cost of capital, capital structure, and value-creating decisions in a global environment.

EMBA 9250 Statistical Analysis for Bus 3 Credits

This course introduces students to basic concepts and methodologies in probability theory and statistics. Emphasis is on real-world application of reasoning techniques used for interpreting data for decision criteria of managerial decision making. Topics include probability, variables, estimation, hypothesis, regression, and sampling. Concepts of learning are facilitated through real-world practices.

EMBA 9251 Service/Product Management 3 Credits

This course focuses on the issues, concepts, skills, and techniques related to the management of operations of organizations. Students are introduced to various techniques of operations research and management science as they are applied to decision making in the management of operations. Topics include productivity, supply chain management, manufacturing strategies, and competitiveness.

EMBA 9260 Strategic Marketing 3 Credits

The focus of this course is to provide students with the analytical skills required to understand and assess complex marketing situations in order to develop and implement appropriate marketing strategies. Identifying individual case factors and understanding the relationship between developments of strategies is emphasized. Students will apply the material using real-world cases faced by organizations.

EMBA 9270 Management/Team Skills 3 Credits

This course is based on the assumption that management and team skills can be learned. To learn skills requires active involvement in the classroom exercises and many learning opportunities come from group activities. To develop these skills, students will need to set personal goals and experiment with new behavior. This course will involve a variety of in-class exercises including self-assessments, interpersonal activities, and a team project.

EMBA 9271 Leadership 3 Credits

This course has been designed to provide students with an understanding of leadership from both a scholarly and a practitioner perspective. The purpose is to help students understand what it means to be a leader in general and in the current business environment specifically. Students will be encouraged to consider their own leadership aspirations, to observe others in leadership roles, and to test their own leadership acumen.

EMBA 9301 Corp Governance Legal Ethical Issues 3 Credits

This team-taught course provides an overview of corporate governance. The governance structure specifies the distribution of rights and responsibilities among different participants in the corporation, such as the board of directors, managers, shareholders, and other stakeholders. In this course, students will discuss the importance of corporate governance and the roles of various stakeholders in the governance structure. Conflicts of interest that arise between the stakeholders and approaches to mitigate those conflicts will be a central focus of the course. Because corporate governance plays an integral role in creating a culture in which ethical behavior is the norm, this course will also focus on identifying, analyzing, and resolving ethical dilemmas in business. The course will consider ethical issues confronted by managers and heavily emphasizes contemporary cases that illustrate a wide range of ethical issues.

EMBA 9302 Corporate Performance Evaluation 3 Credits

This team-taught course emphasizes to executives that shareholder value creation should be an enduring focus of concern because value is the foundation of survival and prosperity for the enterprise. The course introduces multiple perspectives in evaluating the performance of the firm. Among them are management control systems, financial statement analysis, cash flow analysis, and the balanced score card (BSC) including Economic Value Added. The nature of these approaches to evaluation draws from the disciplines of accounting and finance. Structuring the course as a team-taught course in which instructors from both of these disciplines will be present helps to ensure that students will receive a comprehensive and integrated understanding of the course topics. Students will experience using real-world cases in evaluation.

EMBA 9303 Intl Bus Seminar W/ Travel Exp 3 Credits

The purpose of this course is to examine the intricacies of conducting business internationally. With each offering, the course will focus on parts of the world where emerging economies are becoming influential players in international business. Examples of these emerging economies include China, South America, Argentina and Chile in particular, and Eastern Europe or Southeast Asia. The influence of external forces resulting from the socio-cultural, economic, technological and political aspects of the macro-environment will be examined. The competitive environment will be examined from the perspective of both multinational and domestic corporations. Finally, consideration will be given to the corporate level strategies and the functional operation of these corporations as they compete for market share, financial investment and human resources.

EMBA 9309 Special Topics 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9310 Information Technology and Management 3 Credits

This course enables current and future senior executives to gain a strategic perspective of information technology resources within the organization. The focus is on opportunities and challenges associated with managing technological resources as well as how the effective management of information technology can improve competitive positioning and operational performance. Course format will be a combination of lectures, guest speakers, case studies, and hands-on exercises. Experiential learning opportunities will allow students to work with real-world case studies using relevant technologies.

EMBA 9362 Product Development and Commercialization 3 Credits

The purpose of this course is to provide an in-depth overview of the Product Development and Commercialization (PD&C) process. This will be done through the analysis of cases that describe actual PD&C as well as innovation problems faced by a variety of organizations (e.g. consumer, health care service). Topics covered include innovation funding, opportunity analysis, common PD&C challenges and issues, and the interface among various disciplines to achieve best-in-class PD&C strategies.

EMBA 9880 Strategic Management: a Capstone Course 3 Credits

The capstone course focuses on the elements required to make effective strategic decisions in organizations with reference to the impact these decisions have on all stakeholders. The purpose of this course is to provide students with an understanding of the strategy process through an analysis of how a firm develops a mission, vision, and establishes a sense of purpose while simultaneously monitoring the external environment for emerging opportunities and threats. Topics focus on real-world cases, the evolution of strategic management processes, and strategies for a global world.

EMBA 9900 Leadership Edge 0 Credits

This course is structured as pass/fail. It provides students at, or aspiring to, executive positions within their organization's career, leadership and management development with a real-time, practical approach to leadership. This differentiator and developmental component is referred to as "The Leadership Edge." Students will reflect on self-assessments completed as part of the program. They are then able to leverage the Leadership Edge experience by pursuing different methods of developing career, leadership, and management competencies to fill identified gaps. Opportunities for development are met through group sessions and student participation in individual (private) coaching or group seminars to discuss personal career and organizational situations. The choice of which avenue is taken (individual or group) is made on an integrated group basis.

EMBA 9906 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9907 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9908 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9909 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Homeland Security (HLSP)

HLSP 501 Homeland Security 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

HLSP 502 Development and Structure of the US Intelligence Community 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

HLSP 504 Political Behavior of Security and Conflict 3 Credits

The course focuses on various analytical approaches in behavioral political science in order to better understand how individuals interact with the political system. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior during periods of crisis and uncertainty. The course empowers students to conduct advanced research in order to test some of the leading theories of the subfield.

HLSP 505 Civil Liberties and National Security 3 Credits

During times of crisis, can our government maintain individual liberty? This course provides an in-depth exploration of the tension between the role of the state in balancing civil liberties with national security. In this context, the course provides a specific focus on freedom of speech, press and assembly, freedom of religion, the right to privacy and the courts' role, or lack thereof, in the War on Terror.

HLSP 506 US Constitutional Law and National Security 3 Credits

This graduate seminar examines the origin and development of the American constitutional system and constitutional law. It further examines this system within the context of national security. Primary emphasis is on the US Supreme Court, which includes its developmental as an institution, the origins of judicial review and the court's establishment of this process, as well as the decision-making process by Justices of the court. The course will then examine the interplay between the court and its political environment and the impact the court has had upon the functioning of the political system by considering the Marshall Court (1801-1835), the Hughes Court (1930-1941) and the Warren Court (1953-1969). We will conclude with a consideration of the role of the court in balancing the rights and freedoms of a democratic society within the demands of the national security state.

HLSP 508 Political Communication, Terrorism, and Security 3 Credits

This course explores how political communication affects terrorism and security. It is well known that media plays an important role in creating the narrative for understanding terrorism and national security issues. The question is whether that narrative tends to help protect that nation, or whether it actually interferes with that goal. In addition, social media has become a means by which terrorist groups recruit outside volunteers, while blogs and websites are often used to incite incidents in various countries. This course deals with the various ways in which political communication can support, or interfere with, the protection of national security.

HLSP 510 Terrorism 3 Credits

Politics is the study of power and its application, and hence the study of violence has always played a central role in the discipline. In the era of mass politics, violent political participation has been accentuated as evidenced by the prevalence of both domestic and international terrorism. The practice of terrorism itself has undergone changes in the new era and the appearance of groups and "lone wolves" bent on sowing death and destruction for its own sake is more common place. Moreover, the statelessness of today's terrorists removes crucial restraints that once held even extreme terrorists in check. Perhaps more than any other organization, ISIS embodies these trends. It is therefore incumbent upon us to take a step away from the spectacular nature of the news, and ask fundamental questions concerning the motivations, modes of operation, and circumstances contributing to the appearance of terrorist movements, and the roles of the leaders as against the "foot soldiers" in such organizations. Special attention is laid on the emotional fervor of those engaged in the activity, the ideology that mobilizes them and rationalizes their behavior, within each case's historical settings.

HLSP 514 Congress and National Security 3 Credits

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. In addition to an in-depth analysis of the US Congress, we also look comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror?.

HLSP 515 Counterterrorism 3 Credits

One of the aims of analyzing the nature of terrorism, its goals, and the underlying deeper motives of those who partake in it, is to thwart as many terrorist efforts as possible and to bring terrorist campaigns to an end. Thus, the questions of how terrorism begins and how terrorism ends are intimately related. Because of the prevalence of terrorism in the national and international arenas and the spectacular nature of terrorist undertakings, the analysis of these questions is the subject of much media attention and public discussion that tends to obscure and politicize what should be a focus of attention of citizens, policy makers, and students of the social sciences alike. This course seeks to point out concrete measures for counterterrorism –of the type that sometimes is under public discussion –but in a more systematic manner that brings together methods of heuristic thinking in political science and adjacent disciplines, historical and comparative experience, and the literature on counter terrorism to analyze the range of possible strategies that could be adopted and the possible manner in which terror campaigns may be brought.

HLSP 516 The Presidency and National Security 3 Credits

This course is designed as an upper level graduate combination lecture and discussion section on the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School, English School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

HLSP 520 Defense Policy and Analysis 3 Credits

The course begins with an overview of the structure of US defense policy and administration and explores issues associated with national defense. Throughout the course students become familiar with basic data, institutions, actors, trends, issues and options in the strategic implementation of defense and force. The primary focus of the course is on the Department of Defense (DoD) as well as on key committees and actors within the White House, State Department, Central Intelligence Administration and Congress.

HLSP 527 Policy Analysis and Evaluation 3 Credits

Policy Analysis and Evaluation fully addresses this problem by providing students with an in-depth study of public policy. It does so by linking theory with practice in helping students think systematically about public policy. The course addresses the policy process through leading theoretical models within the subfield as well as an evaluation of government's response, or lack thereof, of contemporary policy problems. Our focus will be three areas of policy analysis: 1) descriptive 2) evaluative and 3) prescriptive. As part of our focus, we will address policy design, implementation, evaluation and failure. Overall, students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options.

HLSP 529 Energy Security 3 Credits

Energy Security explores the role of energy in shaping global politics, natural resource management practices and volatility in economic markets. The course begins with an overview of energy security and explores issues associated with energy production, national security, energy consumption, and environmental conservation. Throughout the course students will become familiar with basic data, trends, issues and options in the exploration and production of renewable and non-renewable energy sources.

HLSP 530 Data Analysis and Methods for Political Science 3 Credits

This course introduces students to quantitative and qualitative methods used by political scientists and security specialists in the study of social and political phenomena. Students will learn the logical structure of political analysis, and the quantitative measures used to supplement and support these logical structures. Overall the course draws on the fundamentals of statistics: Namely the ability to describe data samples and draw inferences about the populations from which they were drawn. It should also improve one's ability to read data, interpret data, and judge others' claims about data. After students learn these skills, they will apply them to a prepared data set. The emphasis of this course is on "hands-on" experience. Students approaching this subject for the first time will "learn by doing" this type of analysis.

HLSP 545 Loyalty and the State of Exception 3 Credits

The course enquires into cases ranging across Europe, the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, have suspended, if not dissolved, constitutionally guaranteed civil liberties. Under emergency situations, organs of national security are energized; organs of opinion and electronic media including internet newsgathering, opinion expression and formation, may be censored; citizens may be enlisted to report to and inform on their neighbors. Regimes of exception may severely curtail academic freedom and university life; they may regulate voluntary associations by means of secret or not so secret surveillance of meetings, and a demand for lists of members and financial contributors. States of exception may deploy methods of coercion usually proscribed in "normal" times, e.g., suspension of habeas corpus rules; extended if not indeterminate periods of detention of suspects; and techniques of "enhanced interrogation" that may violate constitutional and international law. Using a number of case studies, the course inquires into the conditions under which liberal democracies transform themselves into states of exceptions; the effects of such transformations on individual and civic life; and the procedures by which states no longer under stress return to liberal democratic procedures and recovery of civil liberties.

HLSP 550 American National Security 3 Credits

The course is part of the foundational sequence of the M.A. in Homeland Security Policy. The course trains students to think strategically and critically about major issues facing American National Security.

HLSP 551 Global Security 3 Credits

This seminar critically addresses the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

HLSP 552 U.S. Foreign and Security Policy 3 Credits

This course emphasizes the main theories of and themes in American foreign policy since the end of the Second World War. We will examine the patterns that have permeated American Foreign Policy since 1945, and discuss the roles that various actors play in the foreign policy process. We will use theoretical concepts to discuss the major events in American foreign policy over the last half of a century. The course will focus on both the conduct and formulation of American foreign policy. Detailed knowledge of the policy-making process, including legal and institutional restraints and standard operating procedures, is clearly essential for all students of foreign policy. Yet, only by exploring America's past actions in the global arena and only by searching for historical precedents and patterns can students fully grasp the dilemmas facing the United States today.

HLSP 567 Global Immigration Trends and Security Issues 3 Credits

Amidst the broader trends of international politics that address the growing flow of goods, capital, and information across state borders, the movement of people is a permanent and expanding feature. However, central to the notion of the political identity of the nation-state is the ability to control the entry of non-citizens. The regulatory power of the nation-state to control its borders is at least threatened by the migratory movements of people. People are driven from their homes by conditions of war, economic difficulty, or environmental disaster. Millions of people migrate permanently each year, and about 20 million are refugees and seek political asylum worldwide. The vast majority of refugees are women and children—this is the hidden truth of the post-Cold War order, huge numbers of displaced women and children. These numbers are significant, particularly since the general movement heads in one direction, toward advanced industrial states, mainly Western Europe and the United States. About 35 million legal and illegal immigrants live in the United States. Immigrants account for 11.5 percent of the total population, the highest percentage in 70 years. Critics warn that if current trends continue, by the end of this decade the immigrant share of the total population will surpass the all time high of 14.8 percent reached in 1890. Understanding immigration and refugee issues in this interdependent world will help us to gain insights into the workings of political, economic, and social forces both within receiving and sending states as well as the international regime which regulates these movements. The topics addressed in this course go beyond simple models of utility and efficiency since the questions of immigration and political asylum are often deeply emotional issues for societies; the issue also has a significant moral dimension.

HLSP 590 Master's Thesis 3 Credits

Students will complete an original substantive research paper that will build on prior research in Security Studies or related discipline.

HLSP 591 M.A. in Homeland Security Internship 3 Credits

The course is part of the capstone requirements of the M.A. in Homeland Security Policy. The course will have students complete an internship, self-evaluation and write a reflection paper outlining their experience working in a security related position.

Interdisciplinary Studies (IND)**IND 600 Supervised Study 1-4 Credits****Literacy (LITR)****LITR 500 Multimodal Teaching and Learning 3 Credits**

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century and how it is influencing children's literacy development and the work of Educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits

Studies reading/language arts abilities and disabilities and standardized and informal tests. Observational techniques and diagnostic teaching for assessment are stressed.

LITR 510 Research and Survey of Texts for Children and Adolescents 3 Credits

This course surveys developmental trends in texts for children and adolescents. Students will become knowledgeable about the theoretical and practical aspects of the study of the texts (both digital and print) available for youth and adolescents. Candidates will explore their own assumptions about text and the relationship to literacy development. Course participants will explore strategies for integrating print and non-print texts into the school curricula in ways that support youth and adolescent literacy development. 3 credits.

LITR 560 Writing Project at Rider 3 Credits

Examines theory, research, and practices in the teaching of writing K-12, with emphasis on improved practices in teaching writing as well as the personal writing of participants. Students investigate relevant local and national standards and curriculum, design, present, and respond to peer demonstration lessons in writing, and publish to the National Writing Project e-anthology. Further participation in NWP activities is encouraged and supported. This Invitational Summer Institute is part of the National Writing Project network. Project participants, called Summer Fellows, become Teacher Consultants upon completion of the Institute and are expected to maintain affiliation with the Project and to participate in the dissemination of professional development in writing instruction K-12 for all subject areas.

LITR 600 Independent Research and Study in Literacy Education 1-3 Credits

Course content is designed specifically to meet specific academic needs or interests of students who wish to engage in independent study related to literacy education.

Marine Sciences (MAR)**MAR 580 Independent Marine Science Field Study 4 Credits**

This field-based course provides a practical experience in integrating marine science with pedagogical concepts. Students will use scientific methodology to explain marine ecosystems through specially designed, inquiry-based exercises. During these activities, students will address the process of applying college-level content to their own classroom settings, considering national and state standards. Hands-on, field-based exercises will provide experience with a diversity of marine habitats and the biological, geological, hydrological, and physical processes that influence them. Visited habitats can include rocky intertidal, salt marsh, tidal flat, beach and channel sand bars. As a result, students will develop field and laboratory skills in marine science and use them in designing materials for their own classroom use.

Master of Accountancy (MACC)**MACC 650 Seminar in Federal Taxes 3 Credits**

The course is designed (1) to expand a student's tax research skills, (2) to examine tax compliance and basic planning concepts available to C corporations, S corporations, partnerships, gifts, estates, and trusts, (3) to explore the tax issues involved in the decision to select a particular form of business organization, (4) to provide an introduction to fundamental concepts of interstate, international, and New Jersey taxation, and (5) to expose the student to a variety of common tax returns, applicable to the above topics.

Prerequisite(s): completion of ACC 410 Fundamentals of Federal Taxation.

MACC 652 Analysis of Accounting Data 3 Credits

Employs appropriate information technology and analytical techniques to pursue data collection and analysis needs commonly faced by accounting professionals. Uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics. MACC 654 should be taken before this course.

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 654 Issues in Financial Reporting 3 Credits

Examines accounting theories and the development of a conceptual framework for financial reporting. Theoretical and conceptual assessments of current reporting issues pertaining to asset valuation and income measurement are addressed through cases, readings, and projects. Topics to be investigated from term to term vary depending on their importance and timeliness to the profession. This course should be taken first or early in the program.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MACC 656 International Dimensions of Accounting 3 Credits

This course examines the global applications of accounting principles and practices, including the relationship between international accounting issues and company strategy. Topics include theoretical and societal considerations of international accounting issues, the identification of transnational accounting practices, and attempts at harmonization.

Prerequisite(s): completion of the Preliminary Accounting Requirements; this course applies to the Global Business concentration.

MACC 658 Governmental and Not-for-Profit Accounting 3 Credits

This course provides an in-depth study of the concepts, objectives and techniques of the evolving field of accounting for nonprofit institutions and organizations. Areas emphasized include municipal and state governmental units, hospitals, colleges and universities and service organizations. Problems, cases and selected readings are employed.

Prerequisite(s): completion of PMBA 8020 or Preliminary Accounting requirements.

MACC 662 Auditing Practice & Problems 3 Credits

Uses cases to examine current auditing issues, including professional ethics, internal control, materiality and risk assessment. Students will complete a simulated audit from start to finish, including audit planning, audit fieldwork and preparation of an audit opinion.

Prerequisite(s): ACC 400 Principles of Auditing.

MACC 663 Fraud and Forensic Accounting 3 Credits

A course designed to provide a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

Prerequisite(s): completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

MACC 664 Issues in Managerial Accounting 3 Credits

Examines current management accounting practices with an emphasis on world class developments and strategic implications to the firm. Integrates current management accounting literature with considerations of planning, control, decision-making and information needs of the firm.

Prerequisite(s): completion of ACC 302 Cost Management or PMBA 8220 Strategic Accounting for Managers; this course applies to the Corporate Accounting for Managers concentration.

MACC 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

Prerequisite(s): MACC 663 and completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

A course in the fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

Prerequisite(s): completion of PMBA 8240 or the Preliminary Accounting Requirements; this course applies to the Corporate Accounting for Managers, Forensic Accounting and Fraud & Forensic Accounting concentrations.

MACC 668 Enterprise Risk Management 3 Credits

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

Prerequisites: ACC 302 or PMBA 8220.

MACC 670 Accounting Internship 3 Credits

This course provides on-site experiential learning through supervised employment with a participating company. Students will be reviewed periodically by senior staff. Academic assignments, including a formal report, will be developed in conjunction with a faculty member. Permission of the instructor is required.

MACC 690 Special Topics 3 Credits

The study of a timely topic that represents a dimension of business administration or accounting that not covered in a regular course. Such a topic may be offered by the Accounting Department. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Musical Theatre (MTR)

MTR 511 Music Theater Ensemble 1 Credits

The performance-based, auditioned music theater ensemble engages multiple singers/actors/dancers in performance, utilizing scenes from music theater literature as the primary material. Emphasis is placed upon group interaction and building an ensemble. This ensemble often is asked to perform for University sponsored events.

Organizational Leadership (LEAD)

LEAD 500 The Practice of Leadership 3 Credits

This course allows students to gain an understanding of the practice of leadership and how they can develop as leaders. Students will explore leadership models, creativity in organizations, and approaches to decision making as they begin to form their own leadership philosophy.

LEAD 510 Organizations: Design and Dynamics 3 Credits

This course will provide students with foundational knowledge in the area of organization studies. Students will gain insight into organizational structure and how it affects interdepartmental behaviors, communication and work flow. The course emphasizes how organizational environment and culture generate and reinforce the way organizational systems work and how leaders operate within these organizational contexts.

LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 512 Forms of Diversity in Organizations 3 Credits

Increasingly, leaders and employees are part of a more diverse, multiethnic and globally influenced workforce. Students will become more conversant with forms of diversity, such as different cultural traditions, as well as differences in generational sensibilities, ableness, gender, and level of adult development. Students will learn about the different "worldviews" which organizational members bring into the organization, and how that affects their ability to work together. The course develops students' knowledge of and skills in practicing: principles for optimizing human performance in organizations, cultural intelligence, human diversity, and leading multicultural organizations.

LEAD 513 Media and Technology in Organizations 3 Credits

Students will learn how digital technology affects effective communication by leaders and will gain basic skills in the use of new media in organizations. From social media to mobile applications and video blogging, organizations now operate in complex communication environments. Making use of these new means for communication is an organizational challenge and opportunity, of especial importance to the leadership and implementation of change.

LEAD 530 Individual and Group Processes in Organizations 3 Credits

This course will inform students about leadership concepts and models for identifying and working with the motivations, influences and tactics present in conflict and its resolution in personal and organizational settings. Through group dynamics exercises, the themes of developing leadership identity, recognized and affirmed by self-awareness; understanding and exercising relationship awareness and group behavior; and recognizing the multiple relational dimensions of leadership will guide both the understanding and practice of leading people and managing relationships.

Prerequisite(s): LEAD 500 or concurrent with LEAD 500.

LEAD 531 Developing The Human Side of Organizations 3 Credits

This course examines Strategic Human Resources Management (SHRM) within today's organizations, and is designed to provide students with a comprehensive understanding of SHRM practices from a systemic and strategic perspective. Students learn approaches leaders use to recruit, select, evaluate, and develop employees and strategies to create a positive work environment.

LEAD 532 Program Design for Training and Development in Organizations 3 Credits

This course provides a full circle approach to workforce training and development that is applicable to professionals in human resources, organizational development, or other leaders who see themselves as trainers, mentors and coaches. The course is designed for students to explore "real world" applications for programs, services and operations in a training environment, and covers key principles such as adult learning theory, facilitation skills, curriculum development, needs assessment, training methodology and techniques, resources and constraints, as well as learning how to evaluate and improve the efficacy of training programs.

LEAD 533 Conflict and Crisis Resolution in Organizations 3 Credits

Leaders face conflict and crisis in their organizations. Being effective in their resolution is an important leadership attribute. Skills that support positive and integrative outcomes include mediation, negotiation and crisis resolution skills. This course will use multiple case studies and role-playing assignments to engage students in understanding how individuals and teams handle mediation and negotiation scenarios. The course will also use multiple case studies to enhance students' understanding of the components of effective and ineffective leadership for crisis.

LEAD 534 Facilitation and Team Leadership 3 Credits

This course examines the characteristics and behaviors of teams that produce good results and/or generate new ideas. The focus of the course is on how to lead high functioning teams and the development of facilitation capabilities, so that students can effectively lead teams and organizations.

LEAD 540 Strategic and Financial Decision-Making in Organizations 3 Credits

This course explores the importance of information and financial resources within the culture of organizations, and the necessary relationship that exists between the two. The course draws on current literature and student experience to explore resource management and focuses on the effective use of information resources within the boundaries defined by financial realities. The relationship between data analyses and effective decision-making will be explored.

Prerequisite(s): LEAD 500 or concurrent with LEAD 500.

LEAD 550 Organizational Research 3 Credits

The purpose of this course is to prepare future organizational leaders to read professional journal articles, plan research, and critique research. The course covers basic research methods, such as experimental, ex post facto, correlational, case study, time series, interviews, surveys, and basic statistics in terms of understanding and selecting statistics. These concepts are taught within the framework of organizational leadership.

Prerequisite(s): LEAD 500 or concurrent with LEAD 500.

LEAD 551 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 552 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 553 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 554 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 555 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 556 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 557 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 558 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 559 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 560 Legal and Ethical Issues in Organizations 3 Credits

This course will provide students with knowledge of ethical guidelines and current laws/regulations to ensure appropriate workplace behaviors. Students will gain knowledge and skills in the use of conflict resolution strategies to help build harmonious relationships in the workplace. Potential sources of conflict that lead to employee grievances and litigation will be identified. Students will complete self-assessment tools to determine their own conflict resolution style. The course will also cover legal issues found in the workplace, such as sexual harassment, collective bargaining agreements, employment law, etc.

Prerequisite(s): LEAD 500 or concurrent with LEAD 500.

LEAD 570 Guided Field Experience in Organizational Leadership 3 Credits

This required course provides students enrolled in the M.A. in Organizational Leadership degree program with the opportunity to gain practical experience through an organized and mentored field experience. Through specialized readings and the completion of a significant project, students will be asked to apply their knowledge of leadership concepts to analyze and address leadership issues within organizations where they work, study, or volunteer. The field experience entails active observation and participation in a variety of leadership roles and organizational functions.

Prerequisite(s): LEAD 500, LEAD 510.

LEAD 598 Project Seminar in Leadership 3 Credits

This course serves as a practicum for students about to graduate with their M.A. in Organizational Leadership. Reflecting upon their own leadership philosophy developed throughout the program, students will formulate, research, and write a leadership capstone paper. The project integrates the competencies and concepts from the core courses as students use research strategies to analyze an organizational problem. Class sessions will also be used for exercises and the practice of skills.

Prerequisite(s): Must be taken in last semester of study. Permission of Instructor required.

LEAD 600 Independent Study and Research in Organizational Leadership 3 Credits

The content of the course varies with the academic research interests of students who wish to engage in independent study related to the core content of organizational leadership and/or one of the concentrations in higher education administration, communication, information technology, and counseling-related services.

Political Science (POL)

POL 501 Homeland Security 3 Credits

This course is designed to help students increase their knowledge and understanding of problems impact the public agenda, why some solutions are adopted and other rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

POL 502 The Development and Structure of U.S. Intelligence Agencies 3 Credits

This course will provide an historical review of intelligence during the following World War II. It will examine the major functions of intelligence, as well as intelligence as a part of the foreign policy process: collection, analysis, counterintelligence and covert action. Students will be introduced to a range of collection procedures: human, open source, electronic, photographic, and signal. With emphasis placed on interpreting and writing intelligence summaries.

Professional MBA (PMBA)

PMBA 8000 Executive Communications 1.5 Credits

This course will provide students with knowledge, skills, and techniques to further develop their presentation skills. This course, which is taught in a workshop style, challenges the students to improve their formal presentation skills, increase the impact of their presentations, and strengthen their confidence. Students will be introduced to different media tools that will support them in advancing their speaking and presentation skills.

PMBA 8010 Information Technology Proficiency 1.5 Credits

Computing proficiency requires understanding implications of advanced information technologies and the ability to successfully apply these technologies in an increasingly global society. This course will enable students to effectively use specific information systems tools (spreadsheet and database management) to begin to design applications for effective decision making.

PMBA 8020 Fundamentals of Accounting 3 Credits

For those students having no previous knowledge of accounting. Subject is approached from the point of view of the user of accounting information rather than that of the accountant who supplies the information. Surveys mechanics of accounting as a means to an end, emphasizing accounting as a tool of management and the language of business. Problems and cases bring out the managerial implications of accounting.

PMBA 8030 Economic Analysis 3 Credits

An intensive exposition of the essentials of price theory and income and employment theory. For students with less than a year of introductory economics at the undergraduate level. Topics include an analysis of markets, the nature and characteristics of producer behavior, the theory of pricing in competitive and non competitive markets, and their welfare effects. At the macro level, coverage of the economy in the short run deals with economic fluctuations, fiscal policy, and monetary policy. An examination of the economy in the long run covers factors effecting economic growth.

PMBA 8040 Basic Financial Principles 1.5 Credits

The central unifying theme of this course is valuation. Valuation is the basis for decisions in all major areas of finance. This course begins with a discussion of basic concepts including time value of money and its application for valuation of stocks and bonds and analysis of risk and return. Further application of valuation for capital investment projects made by a firm is explored by introducing the techniques of capital budgeting.

PMBA 8050 Introduction to Calculus 1.5 Credits

This course has been designed to prepare students for courses in the MBA program in which calculus is used. Topics include limits, derivatives, functions of two or more independent variables and maxima and minima in one and two independent variable(s).

PMBA 8051 Fundamentals of Statistical Analysis 3 Credits

Covers basic statistical techniques useful in business decision making. Includes descriptive statistics, event probability, random variables, sampling distributions, regression analysis and topics in statistical inference.

Prerequisite(s): MSD 105 (or equivalent).

PMBA 8052 Models and Methods of Operations Management 1.5 Credits

This course provides students with some of the most frequently used quantitative tools necessary in analyzing and resolving issues and problems in managing service and/or manufacturing operations. These tools are required in PMBA 8250 Operations and Supply Chain Management, and may also be used in other PMBA courses such as Economic Analysis and Decision Making, and Business Intelligence.

PMBA 8060 Basic Marketing Principles 1.5 Credits

The purpose of this course is to provide students with an operational understanding of basic marketing principles and concepts. This will be done through interactive exercises and discussions based both on primary source and textbook readings as well as discussions and critical examinations of current marketing practices in companies and industries of interest to the students. Topics covered include environmental analysis, target marketing, product and service strategy, integrated marketing communications, channels of distribution, pricing practices, and the interface between marketing and corporate strategic planning.

PMBA 8070 Management: Theory & Application 1.5 Credits

A foundation course that provides an introduction to the theory and practice of management. The management functions of planning, organizing, leading, and controlling provide an organizing framework for examining current management challenges (e.g. globalization, ethics, diversity, and multidimensional organizational structures).

PMBA 8200 Managerial Decision Making 3 Credits

In this course, students will improve their managerial and analytical thinking skills through a range of approaches and techniques. Students will learn to analyze business problems within the context of managerial decision making. The course is designed as a series of seminars and will be organized in three areas, each with its complementary learning goals: Business Intelligence, Enterprise Analysis, and Executive and Managerial Decision Making.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8210 Information Technology Management 3 Credits

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

Prerequisite(s): Completion of PMBA 8010.

PMBA 8220 Strategic Accounting for Manager 3 Credits

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8230 Managerial Economics 3 Credits

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8240 Applied Corporate Finance 3 Credits

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

Prerequisite(s): Completion of PMBA 8040 and PMBA 8220.

PMBA 8250 Operations & Supply Chain Management 3 Credits

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8260 Mkt Analysis & Decision Making 3 Credits

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8303 International Business Study Tour 3 Credits

This course provides a cross-cultural perspective for conducting business outside of the United States. Students will gain a better appreciation of how culture, history, and politics influence organizational dynamics, transactions and business customs. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions.

This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered. This course applies to the Business Analytics, Forensic Accounting and Fraud & Forensic Accounting concentrations. This course applies to the graduate certificate in Business Analytics.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

in our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8315 Globalization and Technology 3 Credits

The emergence and growth of the global economy constitutes an epochal shift in the organization of the world. Technology has been a key component in the production and acceleration of these phenomena. This course introduces students to the latest theoretical and empirical literature on globalization as shaped by technology. This course applies to the Information Systems and Global Business concentrations. This course will satisfy the International elective requirement.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

PMBA 8319 Selected Topics in CIS 3 Credits

The study of a topic (or combination of topics) that represents some dimensions of computer information systems or has important and direct implications for CIS management. Topics recently covered include project management, data mining and data privacy. Theoretical foundations as well as applications may be explored. Readings, research, lectures, projects, discussions or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8321 Managerial Taxation and Strategy 3 Credits

This course is designed for students who are embarking on (or already in) careers in investment banking, corporate finance, strategy consulting, money management, or venture capital. The focus of the course comes from integrating the tax law with the fundamentals of corporate finance and microeconomics.

Prerequisite(s): PMBA 8020.

PMBA 8324 Financial Accounting & Report 3 Credits

Focus is on analysis and evaluation of alternative accounting methods and the relationship to company policy. Insight is gained through the reading of articles in leading accounting and financial periodicals and Internet research. Cases demonstrating financial reporting methods are assigned and discussed in class. Term project required. Topics include financial instruments, earnings per share, deferred taxes, post-retirement benefits and the accounting rule-making process.

Prerequisite(s): PMBA 8020 and PMBA 8040.

PMBA 8325 Enterprise Risk Management 3 Credits

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

Prerequisites: ACC 302 or PMBA 8220.

PMBA 8335 International Trade & Investment 3 Credits

A study of the international economy in which business firms operate, and public policies that influence their activities. Includes international trade theory, balance of payments analysis, the international monetary system, barriers to trade, and the role of multinational corporations. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8341 Corporate Treasury Management 3 Credits

This course is designed to provide an understanding of modern principles and techniques for corporate treasury management. The course materials are useful for finance, banking, accounting and information system professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multinational cash management, and other related topics. Success in this course will help students preparing for the Certified Cash Manager (CCM) exam. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8343 Investment Instruments and Strategies 3 Credits

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8344 Financial Market Operations 3 Credits

Flow of funds analysis is used to study financial intermediation and interest rate determination in money and capital markets. Includes the flow of funds accounts, funds flow through financial institutions, the demands for and supply of credit by economic sectors, and the impact of public policies on financial market behavior. This course applies to the Finance and Global Business concentrations.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8345 International Financial Management 3 Credits

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions. This course applies to the Finance and Global Business concentrations.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8346 Financial Modeling 3 Credits

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8347 Portfolio Management 3 Credits

Real-world application of the concepts and techniques of investment analysis and portfolio theory. Students interact with and make recommendations to professional portfolio managers. Topics include stock valuation methods, major forces driving movements in current equity markets, international investment opportunities, industry analysis, technical analysis and investment timing, evaluation of portfolio performance, analysis of business conditions and interest rates, and hedging portfolio risk with stock index options and financial futures. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8348 Fixed Income Securities and Alternative Investments 3 Credits

This is an introductory course in fixed income securities and alternative investments. The first part of the course covers the markets for fixed income securities and their derivatives. Valuation of these securities and determination of the risk inherent in these securities are discussed. Methods for managing that risk, such as hedging and credit derivatives, are also discussed. The second part of the course covers a variety of alternative investments, including real estate funds, venture capital, hedge funds, and commodities. Valuation of these investments and determination of their risk are discussed. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8349 Personal Financial Planning 3 Credits

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning. This course applies to the Finance concentration.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8354 Quality Assurance and Total Quality Mgt 3 Credits

This course integrates the concepts of statistical quality control and the practices of today's leading companies in creating systems of total quality management (TQM). Considers how various business functions (e.g., production, engineering and design of products and services, purchasing raw materials, providing technical assistance to customers, and statistical quality control) and their interrelationships can be used to create high-quality products, and, thus, high levels of customer satisfaction. Includes traditional statistical methods for process control, acceptance sampling, reliability and quality improvement, as well as numerous examples of U.S. and foreign firms at the cutting edge of TQM. Introduces current thinking of leading figures in TQM.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8357 Business Analytics for Managers 3 Credits

Business Analytics, the data driven approach to management, is essential to achieve effective business decision-making and competitive advantage. All business managers need to analyze data and make quantitative-based decisions in their business careers. The focus of this course is to equip students with a variety of data analysis methods and tools that are useful to uncover trends, patterns, relationships, and other useful information. The course will take a hands-on, example-based approach and introduce fundamental concepts as they are needed. Students will be using both Excel and SAS software. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

PMBA 8361 Business to Business Marketing 3 Credits

The practices and policies used in the marketing of goods and services to business and industrial buyers are analyzed, focusing on the market and demand for products, marketing research, product planning, channels of distribution, pricing policies and practices and the development of sales program and service policies.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8362 Marketing Communications 3 Credits

This course dynamically blends the concepts and issues of integrated marketing communications with real world experiences. It is highly interactive, with students spending time in teams creating solutions, presenting, and feeling the experience of being in real life marketing communications situations. Students also will be exposed to current and classic literature pertaining to the course content.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8363 Consumer Behavior 3 Credits

The purpose of this course is to provide the analytical skills required to understand the nature of consumer decision making and internal and external factors that influence buying decisions in order to develop and implement appropriate marketing strategies. A case study approach is utilized in this course. This will be done through the analysis of actual marketing problems faced by a variety of organizations. The readings and class discussions will also include internal and external influences on consumer behavior, marketing research tools, marketing strategies to reach consumers and shape consumers' opinions, the role of marketing communications and marketing mix elements in creating a unique value proposition, and managing consumer relationships.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8364 Marketing Research 3 Credits

An overview of the subject matter which will assist students in developing an appreciation for the use by marketing management of marketing research and marketing information systems in making marketing decisions. Topics include specific research procedures for gathering, processing, analyzing and presenting information relevant to marketing problems in such areas as: advertising effectiveness, product development, distribution channels, sales techniques, consumer behavior, and forecasting study of research planning, implementation, and interpretation of findings is facilitated by the use of cases or projects.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8365 International Marketing Management 3 Credits

Examination of the nature and scope of global marketing activities, including the theoretical framework of international marketing, foreign marketing environments, multinational markets, MNC information systems, strategic marketing decisions, and organization for transnational marketing. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8369 Selected Topics in Marketing 3 Credits

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision-making may be explored. Readings, research, lectures, discussions or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8371 Human Resource Management 3 Credits

This course is an introduction to the field of human resource management (HRM). The goal is to provide students with an understanding of current corporate HR practices. Common HR problems and the tools and procedures for dealing with them will be discussed. Contemporary topics such as strategic HR planning, international staffing, career planning, workforce diversity, work/family balance, and work motivation will be examined. EEO guidelines and their implications for human resource functions will be discussed as well. A combination of conceptual and experiential approaches include discussions, case studies, exercises, small group activities, and lectures.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8372 Management Skills 3 Credits

This is a practicum in interpersonal skills that are useful for practicing managers. Topics include motivating oneself and others, persuasive communication, creative problem-solving, managing conflict, using power constructively, managing change, and team management. Students are given opportunities to practice these skills in class and are asked to apply them to their current lives and report on the results of their applications. The course will provide students with a better understanding of the art of managing and of themselves as current or future managers.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8375 International Management 3 Credits

This course focuses on the complexities of working and managing in a global business environment. Emphasis is placed on cross-cultural awareness, international communication, and negotiations. Students will explore the effect of culture on organizational behavior, managerial decision making, and global leadership. This course applies to the Global Business concentration.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8376 Org Development & Effectiveness 3 Credits

This course focuses on Organization Development (OD), a discipline concerned with improving organizational effectiveness by means of planned, systematic interventions. The course will acquaint students with OD concepts, techniques, and skills. The course provides opportunities for students to explore and enhance their personal skills as change agents and consultants. The teaching/learning process emphasizes experiential activities and case analysis. This course applies to the Management concentration.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8377 Managing Workforce Diversity 3 Credits

This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the U.S. today. It will address the knowledge and skills managers must develop in working with others who are different from themselves. Some of these differences are obvious - gender, race, age, and physical characteristics. Other differences are not as easily observed such as family structure, educational level, social class, and sexual orientation. Understanding and valuing diversity requires attitudinal self-assessment and change. Values, stereotypes, and prejudices will be explored through readings, reflective writing, and active involvement in discussions, projects, and activities. This course applies to the Management concentration.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8380 Business Analytics Optimization 3 Credits

This course has been designed to provide professional MBA students with the current knowledge and practice of optimization business analysts use. Optimization aims at selecting the best alternative from among available alternatives according to a predetermined objective. In general it involves building a mathematical model and finding the best alternative through a mathematical procedure. Optimization techniques help decision-makers make fact (i.e. data) based decisions and offer the potential of making significant profits or cost savings. The main focus of this course will be on developing modeling skills to gain insight into a wide variety of business decision problems. In other words, the emphasis in this course will be on modeling practical business decision problems, use of relevant software for optimal solution, interpretation of results, and sensitivity analysis rather than the theory of mathematical solution techniques. Coverage of course material will follow the typical sequence of (1) identification and discussion of a business decision problem; (2) developing a graphical model (e.g. influence diagram); (3) developing a mathematical model; (4) computer solution; (5) interpretation of results and sensitivity analysis; (6) discussion of insights gained from the experience; (7) discussion of implementation issues. In addition, heuristics will be discussed when optimization techniques are not available or too costly. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

Prerequisite(s): PMBA 8010 and PMBA 8051.

PMBA 8383 Entrepreneurship 3 Credits

The course deals with new business venture start-up. Topics include entrepreneurship concepts and characteristics, new venture types and pros/cons, choice of products/services, market study, marketing planning, financing, and business plan preparation. Practical exercises in developing business plans for new business ventures are part of the course.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8384 Consulting for New and Small Ventures 3 Credits

This course provides experience-based learning to students through the use of student teams to assist area small businesses/organizations. These small firms could have a variety of needs ranging from market research, improving financial reporting and bookkeeping, business planning, streamlining operational procedures, etc. This course will provide students the opportunity to experience in-depth analysis of an individual organization. The emphasis is on student consultants generating immediate, actionable recommendations for the client. Thus, this course is useful not only for those considering small business ownership, but provides an opportunity to students to learn entrepreneurial thinking.

Prerequisite(s): Completion of MBA pre-program courses and permission of instructor.

PMBA 8385 New Venture Launch 3 Credits

Students will start and run a new venture while under the supervision and guidance of faculty. Students will take a business plan they have developed and execute it. This is an opportunity to experience the launch process and learn hands-on how to adapt to the marketplace. Some businesses started in this class may also be eligible to receive venture funding from Rider.

PMBA 8386 Green Entrepreneurship 3 Credits

This course is both a traditionally academic graduate course and a practical, case study based, business development course. Lectures will present the scientific, technical, financial, and business underpinnings required to understand the rationale for and the range of solutions possible that businesses can utilize when initiating or developing sustainable practices or new entrepreneurs can consider as they develop new businesses. Students will be learning about real business examples and discussing how the technical aspects of sustainability interact with the more practical and immediate demands of running a business – making a profit and maintaining positive cash flow while acting ethically.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8389 Tax Planning for Entrepreneurs 3 Credits

The business and personal finances of an entrepreneur are integrally related. Often personal resources fund business operations and business resources fund individual necessities and obligations. This course is designed to familiarize the entrepreneur with wealth maximization and tax minimization strategies for business and personal activities. This course covers basic tax compliance concepts and includes personal financial planning and estate planning issues. Restricted to MBA students only. This course applies to the Entrepreneurship concentration.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8397 Evidence Management and Presentation 3 Credits

This course addresses legal issues and practical considerations involved in the collection, acquisition, analysis and storage of digital evidence and presentation of digital and technical evidence to judges, juries and other decision makers. The law of evidence and its implications for the manner and method technical evidence is acquired and presented for consideration in court or in other proceedings (i.e. criminal, civil, or administrative). Requirements and preparation for the presentation of technical evidence as an expert or fact witness.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8402 The Business of Sports 3 Credits

This course examines diverse managerial issues involving the sports industry. The course covers topics at the league level, the team level, the athlete-agent level, and the college level. The constituencies with interests in sports issues such as athletes, fans, media, companies, advertisers, and legislators are discussed along with global aspects of sports enterprises. Valuation issues related to sports teams are also covered. The course is designed to integrate all aspects of businesses as they apply to sports with an emphasis on strategy, management, marketing, and finance.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8491 Business Law 3 Credits

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement; this course applies to the Entrepreneurship concentration.

Prerequisite(s): BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

PMBA 8492 Ethical Issues in International Business 3 Credits

Course Description: This course is an introduction to identifying, analyzing and resolving ethical dilemmas in both U.S. and international business, including reference to legal and regulatory issues. The course begins with a general introduction to ethics, considers ethical issues connected with the economic, legal and regulatory systems within which modern business takes place and heavily emphasizes contemporary cases that illustrate a wide range of ethical issues, including cases resulting in civil and criminal litigation. The primary focus of this course will be ethics in the international business environment. Most of the readings and discussion board topics, the group case studies and the individual research paper will have an international focus.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8880 Strategic Management 3 Credits

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

Prerequisite(s): All other MBA breadth courses.

PMBA 8880L Strategic Management Simulatn 1.5 Credits

Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation.

Corequisite: PMBA 8880.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study. **Prerequisite(s):** Completion of MBA pre-program courses and permission of the associate Dean of Graduate Programs.

PMBA 8905 Internship 3 Credits

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be done at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and during the semester he/she receives credit for the internship is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Associate Dean of Graduate Programs.

PMBA 8906 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8907 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8908 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8909 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8989 Spec Topics Entrepreneurship 3 Credits

Special Topics in Entrepreneurship.

Psychology (PSY)

PSY 510 Introduction to Applied Behavior Analysis 3 Credits

This course will provide an introduction to applied behavior analysis. Students will learn the history and defining features of the field. Due to the scientific nature of applied behavior analysis, students will also learn characteristics and processes associated with the scientific method. Furthermore, foundational concepts will be defined, along with relevant behavior change procedures.

PSY 511 Principles of Learning 3 Credits

This course will provide students with more in depth understanding of the philosophical assumptions, characteristics and basic principles of behavior analysis. Students will have the opportunity to review concepts learned during Introduction to Applied Behavior Analysis. This course will also provide an introduction to the basic research in behavior analysis. Students will become more fluent in definitions, characteristics, principles, processes, and concepts of behavior analysis.

Prerequisite(s): PSY 510.

PSY 513 Observational Methods and Functional Assessment 3 Credits

This course is designed to provide knowledge and skills of methodologies to conduct a thorough behavioral assessment, interpret the assessment data, and identify goals for treatment. Topics will include direct observation/data collection methods, data analysis, functional assessment, stimulus preference and reinforcer assessments, and ethical and professional issues. The second half of the course will deal specifically with functional analysis including the history of and variations to the methodology. The relationship between assessment techniques and the development of the least-restrictive but most effective behavioral intervention will also be discussed.

Prerequisite(s): PSY 510, PSY 511.

PSY 514 Single Subject Research Design and Analysis 3 Credits

Students will be introduced to the basic evaluative methods used in behavior analysis including various models of single subject design such as multiple baselines, reversal designs, and alternating treatment models. Students will design analyses, collect data, graphically display their data, and provide an analysis of findings. Students will read original behavior analytic research articles and practice analysis of findings.

Prerequisite(s): PSY 510, PSY 511.

PSY 515 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): any statistics course.

PSY 516 Creating Effective & Ethical Interventions 3 Credits

This course will familiarize the student with ethical issues and responsibilities of behavior analysts working in applied settings. Informed consent, due process, protection of confidentiality, and selection of least intrusive, least restrictive behavior change procedures will be presented and discussed within the context of case method. Ethical decision making processes will be emphasized, and the relationship between ethics and law will be explored.

PSY 518 Organizational Behavior Management 3 Credits

This course will provide an overview of research and practice in the field of Organizational Behavior Management (OBM), also referred to as Performance Management in organizational settings. Performance Management is a behaviorally-based area of specialization within the broad field of Industrial-Organizational Psychology. The concepts and techniques used in Performance Management originated from the field of behavior analysis.

PSY 520 Interventions for Challenging Behavior 3 Credits

Students will review principles of behavior in the context of application to functional assessment and treatment of socially significant problem behavior. Topics including extinction, functional communication training, differential reinforcement, choice, environmental manipulations, and punishment will be covered. Students will move through the process of developing function-based interventions and writing behavior plans.

Prerequisite(s): PSY 510.

PSY 525 Cognitive Development 3 Credits

Compares and analyzes the major theories of cognitive development: Piaget, Information Processing, Vygotsky, Gardner, and Sternberg. The course describes cognitive growth from infancy to adulthood. Particular topics will include: concept formation, language acquisition, memory reading and writing, mathematical skills and sociocultural skills. Also of interest will be the use of cognitive theory in education, and understanding variations from the typical pattern of cognitive development as in mental retardation and prodigies.

PSY 530 Interventions for Individuals with Developmental Disabilities 3 Credits

The purpose of this course is to prepare students to work with individuals with a broad spectrum of developmental disabilities. The course will begin with a discussion of typical child development and milestones, address how development might differ from the norm, introduce subsequent assessment and diagnosis and ultimately, introduce appropriate interventions. The main focus of this course is applied behavior analysis [ABA] and common ABA strategies for intervention.

PSY 533 Interventions for Autism 3 Credits

The purpose of this course is to provide students with a general understanding of the clinical characteristics of autism spectrum disorders. The course will briefly address etiology and neurocognitive underpinnings of these disorders but will focus on psycho-educational interventions. The course will be taught from an applied behavior analytic perspective.

PSY 535 Language Assessment and Intervention 3 Credits

Students will be introduced to the classification of verbal responses, both vocal and non-vocal. Using videotaped examples, students will categorize observed verbal behavior. Students will be provided with practical tools for the assessment of verbal behavior, as well as an array of intervention strategies. A focus will include the design of teaching strategies to enhance language acquisition, as well as ongoing evaluation of intervention efficacy will be employed.

Prerequisite(s): PSY 510, PSY 511.

PSY 536 Social Skills Assessment & Intervention 3 Credits

Students will be introduced to the development of social skills and the identification social skills deficits. Using videotaped examples, students will categorize observed social behavior. Next, students will be provided with practical tools for the assessment of social and emotional behavior, as well as an array of intervention strategies. Tools for the collection of data and the evaluation of the success of target interventions will be stressed.

Prerequisite(s): PSY 510, PSY 511.

PSY 545 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

PSY 550 Behavior Analytic Approaches to Health and Physical Activity 3 Credits

The application of behavior analytic methods, practices, and principles has been demonstrated through research and clinical applications to be effective at changing health and fitness behavior. This course will provide an overview of research and practice in applying behavior analytic principles to changing health behavior and physical activity. Behavior change across various populations will be covered including both adults and children with and without disabilities. Discussion will focus on both functional assessment as well as interventions effective at changing health and physical activity including self-management, self-monitoring, goal setting, contingency management, etc. Students will spend the semester implementing self-management projects for their own health and/or fitness behavior.

PSY 565 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

PSY 567 Multicultural Perspectives in Applied Psychology 3 Credits

In this graduate level course, students will examine in-depth, culture and identity formation, social relationships, the perception and manifestation of mental illness, and treatment seeking among other areas. Additionally, given the increasing diversity of communities in the US, the course will also focus on immigration, acculturation, discrimination, and the psychological correlates of each. Implications of these factors for emerging practitioners will also be covered.

PSY 572 States of Consciousness 3 Credits

This course explores the variety of states that comprise normal and altered consciousness. It highlights how these states are determined by complex interactions between conscious and unconscious mental functions. Key psychological concepts are applied in an investigation of various states of consciousness, especially meditative states and dreams. The course examines both the psychopathological aspects of altered states, as well as their potential beneficial effects on creativity and the development of the self.

PSY 574 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the varieties of ways family impacts development across the lifespan.

PSY 577 Developmental Psychopathology 3 Credits

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

PSY 582 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

PSY 584 Positive Psychology 3 Credits

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 584 is crosslisted with PSY 384.

PSY 585 Independent Research and Study 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. Permission of Instructor.

PSY 590 Field Placement in Applied Behavior Analysis 3 Credits

The applied behavior analysis practicum includes a required field placement of 15 hours per week and periodic on campus meetings. The practicum experience will allow students to experience the professional life of a behavior analyst in one of several preapproved sites. Sites approved include those for children, adolescents or adults with disabilities. Placements will be selected in consultation with the Practicum Coordinator and will require a written practicum plan from the cooperating field supervisor.

Prerequisite(s): PSY 510, PSY 511, PSY 513, PSY 514.

PSY 595 Selected Topics in Applied Psychology 3 Credits

Students will actively engage in an in-depth inquiry into a special topic area concerning applied psychology. Though the topics will change, students will be required to read and discuss current literature as well as considering the application of tools of the discipline to research questions of their own.

PSY 600 ABA Thesis I 1 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 601 ABA Thesis II 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 602 ABA Thesis III 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

Reading/Language Arts (READ)

READ 503 Content Reading in High School, College, and Continuing Education 3 Credits

Familiarizes teachers with the philosophy, language, and methodology of the language arts as they effect instruction in content areas. Emphasis is on the ways in which the integration of listening, speaking, reading and writing activities within all curricular areas can increase learning. Through lectures, demonstrations, and workshop-type activities, students will both experience and create lessons within various fields. Also investigates the content and methodology of reading programs in educational settings ranging from middle school through adult education.

READ 517 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. *NOTE: This course is cross-listed as EDUC 521. Students cannot get credit for both EDUC 521 and READ 517.

READ 518 Social and Cultural Practices and their Effects on Learning in School 3 Credits

This course focuses on the customs and cultures of culturally and linguistically diverse learners and how their diversities affect their enculturation into American communities. These differences will be studied by reviewing professional literature and children's literature whose stories are set in the varied locations where these customs are practiced.

Spanish (SPA)

SPA 500 The Poetry of Resistance in the Time of the Generals in Latin America 3 Credits

This course offers a broad overview of important historical literature about dictatorships in Latin America. The weekly readings and writing assignments have been selected in order to: 1) introduce major concepts, arguments, and figures in the field of Latin American literature and culture; 2) appreciate the evolution of the role of artists and intellectuals during the years of the "dirty war" in Latin America; 3) sharpen analytical writing; and, 4) demonstrate the connection (and the limits of the connection) between literature, culture, and society. This course is predominantly a study of Latin American governments in the twentieth century and of the role of artists, primarily writers of fiction and poetry, as a corps of truth-tellers and resisters in the face of government propaganda, censorship, and cultural/political repression.

SPA 510 Marks of Identity: The Journey of the Self in Spanish Theater 3 Credits

What markers of class, race, ethnicity, gender and even species shape individual and group identity? How does identity change over time? How do I know who I am, and how does my identity further my interests and those of society? Offered in translation, this course explores the staging of identity in Spanish theater from the seventeenth to the twenty-first century. Topics may include the 17th-century honor code and gender, the myth of Don Juan, imperialist imaginings of New World subjects, the romantic hero and the angel of love, identity and the grotesque, identity and erotic desire, identity and media technologies, and non-human animal subjects. Film, art, music and live-theater attendance.

Special Education-GR (SPED)

SPED 500 The Inclusive Classroom: Effective Practices for General Education Teachers 3 Credits

This course is designed to introduce general education teachers to special education and the inclusive classroom. Students will explore current research, issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed.

SPED 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional strategies that maximize the learning of all individuals including those with exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using computer technology. Students will become familiar with the use of high-tech, low-tech solutions that support the individualized needs of learners with a wide range of disabilities.

SPED 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable candidates to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

SPED 514 Positive Behavior Support 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multicomponent interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable candidates to apply knowledge in a realistic classroom setting.

SPED 523 Inclusive Educational Practices 3 Credits

This course will emphasize planning and instructional strategies that maximize the learning of all students including those with exceptional learning needs in the general education classroom. Students will consider their role as curriculum makers and how to effectively plan a course, a unit, and a lesson for a wide array of diverse learners. The organization of the learning environment also will be discussed so as to guide learning. Teaching methods that enhance content for all learners and the design of learning strategies to help students learn how to learn will be introduced. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512 and SPED 514.

SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 525 Transition to Adult Life 3 Credits

This course is designed to provide students with an understanding of theoretical and applied models of transition in special education. Information on the application and interpretation of specialized assessment tools will be presented. Transition planning, including understanding, formulating and implementing the ITP, will be taught. Knowledge of and collaborative interactions with the wide variety of school and community personnel and agencies with a role in transition will be emphasized. Strategies for developing student self-advocacy and independence in the transition process will be presented. Legal information and ethical issues will be noted. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512 and SPED 514.

SPED 531 Assessment for Instruction in Special Education 3 Credits

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

Prerequisite(s): SPED 512.

SPED 535 Instructional Practices for Students with Severe Disabilities 3 Credits

The course will provide students with the knowledge and skills needed to provide systematic, individualized instruction to students with moderate to severe disabilities. Knowledge and training in the use of task analysis, prompting hierarchies, discrete trials, systematic instructional plans and routines will be offered across all domains of a life skills curriculum. Based upon a student's assessment data, students will be able to develop an appropriate individual educational plan with specific goals and objectives. In addition, strategies to modify and/or adapt goals to provide instruction in an inclusive setting will be explored. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 531.

SPED 536 Instruction and Transition for Autism and Severe Disabilities 3 Credits

The course will provide students with the knowledge and skills to support individuals with Autism Spectrum Disorders and those with moderate to severe disabilities. Strategies to address instruction, transition, behavior, and communication and will be emphasized across domains of life skills, inclusion, and transition. Transition planning, including understanding, formulating, and implementing the Individual Transition Plan will be taught. Collaborative interactions with school and community personnel and agencies will be addressed. An experience in the field will enable candidates to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 539 Instructional Practices for Students with Disabilities 3 Credits

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience portfolio will be completed in this course. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 540 Seminar in Collaboration, Consultation, and Inclusive Classroom 3 Credits

This course is designed to provide students with the knowledge and skills to facilitate successful inclusion programs. Students will develop the ability to design and manage the instructional environment in an inclusive classroom setting. Through the use of research, case studies, and classroom interactions, students will develop effective communication, conflict resolution, and collaboration skills for professional interactions. Students will become familiar with appropriate models for collaborative consultation. Attitudes and behaviors that influence the success of children with special needs in the general education classroom will be addressed. An experience in the field with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 539.

SPED 542 Literacy and Students With Special Needs 3 Credits

The course will provide an overview of theories, assessment, and intervention techniques for the literacy development of students with special instructional needs. Students will explore research validated methods for literacy development and instruction, including current strategies for teaching comprehension, composition, vocabulary, and language study. Management of literacy instruction is studied in a workshop setting. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 580 Supervised Internship in Special Education 3 Credits

This supervised internship experience will provide students with an opportunity to connect theory and practice in special education during the summer. Students will work full-time in a setting with individuals with disabilities. After a brief period of orientation to the setting, the intern will assume a full load of teaching and/or supervisory responsibilities appropriate to the context of the experience. Seminar meetings will be required. Permission of the program advisor is required.

Prerequisite(s): SPED 512, SPED 514, SPED 523, SPED 525, SPED 531, SPED 535, SPED 539.

SPED 590 Professional Seminar in Special Education 3 Credits

This course addresses the current issues in the field of special education. Candidates will synthesize research and literature from the field of special education to address current issues and practice. Collaboratively, students will examine one area of special education through research and presentation. A reflective comprehensive view of special education including assessment, instruction, inclusive practice, assistive technology, Autism Spectrum Disorder, behavior, literacy etc. will be shared. Students are expected to complete a comprehensive exam in these related special education topics and submit a cumulative portfolio of supervised field hours. This course should be taken in the final semester of the MA program as it is the culminating reflective course of study.

Prerequisite(s): Permission of instructor.

SPED 600 Independent Study and Research in Special Education 1-3 Credits

The content of the course varies with the academic research interests of students who wish to engage in independent study related to topics in special education.

Graduate Academic Policies

Introduction

Graduate students must comply with the general requirements of Rider University concerning graduate study. Graduate students must demonstrate the ability to express their thoughts in writing and in speaking in clear, correct English for class reports, research papers, theses and examinations.

Graduate students should refer below for important information regarding Rider's graduate academic policies. In addition, academic policies specific to degree programs or certificates housed within each of the colleges/schools can be found in the Academic Catalog as per the list below.

- College of Business Administration (p. 855)
- College of Liberal Arts and Sciences (p. 967)
- School of Education (p. 885)
- Westminster Choir College (<http://catalog.rider.edu/westminster-choir-college/graduate-programs/general-requirements>)

Significance of Accepting Admission to Rider University

By the act of accepting admission to Rider University, students acknowledge and agree to the following:

1. that they will be bound by and comply with all University standards and policies, including but not limited to, those standards and policies set forth in this catalog and in the student handbook (The Source (<http://www.rider.edu/offices-services/handbooks-policies/thesource>)). **Primary and ultimate responsibility for knowing and conforming to these standards and policies and degree requirements resides with the individual student.**
2. that the ultimate authority to regulate and maintain order on the University campuses resides with the President and the Board of Trustees; and,
3. that the University retains ownership and the exclusive right to use any and all promotional, publicity, and entertainment products (including those produced as course requirements), creations, and activities engaged in by the student while at the University,

including but not limited to photographs, television, audio and video recordings, motion pictures, artistic performances and presentations, internet/web-based productions and sales, and athletic events and all proceeds therefrom. The student has no right to any payment for participation therein.

Students further agree to execute any documents required to confirm or convey to the University all rights outlined in subpart (3) above.

Rider University's Right to Change Catalog Content

This Academic Catalog is not a contract nor is it an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this catalog, it must be understood that all policies and procedures (as well as courses, course descriptions, curricular and degree requirements and other academic information) described in this catalog are subject to change or elimination at any time without prior notice.

Primary and ultimate responsibility for knowing and conforming to the standards, policies and degree requirements outlined in the Academic Catalog resides with the individual student.

While every effort will be made to inform students of any changes as soon as is practical, students should consult the appropriate academic or administrative department, school, college, or other service provider for currently accurate information on any matters described in this catalog. Changes affecting degree requirements will take into account the applicability of the change to currently matriculated students.

Rider University also reserves the right to vary the policies and procedures in the Academic Catalog on a case-by-case basis, as fair and reasonable treatment of interested parties requires in the University's best judgment.

- Recital Scheduling (p. 1035)
- Thesis/Capstone - Westminster Choir College (p. 1036)
- Transfer Credit While Currently Enrolled at Rider (p. 1036)

Academic Concern, Conditional Standing/Dismissal and Readmission

All students permitted to enroll at Rider University are in good standing and are qualified to be bona fide students. Decisions regarding academic progress, conditional standing, and dismissal for poor scholarship are the responsibility of the Committee on Academic Standing within each college or school. These committees may establish and apply criteria in addition to the minimum university cumulative grade point average (GPA). Using approved academic criteria, the Committee on Academic Standing within each college or school may review the academic record of any student. The following applies to all graduate students.

- Graduate students with a cumulative GPA below 3.0 will be placed on probationary academic standing and may be dismissed.
- The minimum GPA to graduate from a graduate program is 3.0.
- For all graduate programs, students graduating with a cumulative GPA of 3.85 or above graduate with distinction.

Graduate students who fail to maintain at least a 3.0 cumulative GPA will be reviewed by the appropriate Committee on Academic Standing and may receive a letter of academic concern, be placed on conditional standing, or be dismissed from the University.

Graduate education students enrolled in certification programs may be required to meet other standards.

Academic Concern

Upon review of a student's academic record, a Committee on Academic Standing may issue a letter of concern, which responds to academic progress that does not meet college, school or university expectations, and describes an academic plan of study that must be met in the

subsequent semester. Students who fail to pursue a course of study prescribed by an academic standing committee, who do unsatisfactory work in the prescribed course of study, or who fail to meet other academic standards may be placed on Conditional Academic Standing or dismissed.

Conditional Academic Standing

Upon review of a student's academic record, a Committee on Academic Standing may place a student on Conditional Academic Standing. In reaching this decision, the committee may require a student who does unsatisfactory work to pursue a specific course of study during a particular academic session. Students who fail to pursue a course of study prescribed by an academic standing committee, who do unsatisfactory work in the prescribed course of study, or who fail to meet other academic standards may be continued on Conditional Academic Standing or may be dismissed without further right of appeal. There must be substantial evidence of proper motivation and a capacity for doing graduate level work to warrant maintaining a student in school with a record of continued conditional status as opposed to dismissal.

Students on conditional academic standing may not register for an academic overload. Westminster Choir College graduate students on conditional standing are ineligible for assistantships and may become ineligible for other scholarship awards. Additionally, students must be removed from conditional status in order to be approved for graduation.

Academic Dismissal from the University

Students who have not done satisfactory work may be dismissed from the University for poor scholarship at the end of any semester after an appropriate review of their scholastic records by the Committee on Academic Standing within their college or school. Students may also be subject to academic dismissal if their cumulative GPA falls below the required minimum for two or more consecutive semesters. Academic dismissal at the end of the fall semester is effective prior to the beginning of the spring semester. Academic dismissal at the end of the spring semester is effective prior to the beginning of summer session II.

Students who wish to appeal a dismissal must submit a written statement of appeal to the academic dean of their college or school within 10 days from the date on their letter of dismissal. All appeals submitted by the deadline will receive consideration by the appropriate academic standing committee.

Dismissal for academic reasons terminates a student's relationship with Rider. Dismissed students may not enroll for courses nor participate in university-sponsored activities or ensembles at either campus for a period of one year following their dismissal. Students dismissed for academic reasons normally will not be eligible for readmission within one calendar year of the dismissal date. Although some students will apply for readmission, there is no real or implied right to such readmission.

Students dismissed by Westminster Choir College (WCC) but not Rider University may apply for enrollment in graduate programs in other colleges of the University. Students dismissed by WCC but not Rider University may not enroll in WCC courses, ensembles or activities until they have been readmitted to WCC with the exception of courses, ensembles or activities that are delivered by or at WCC and are required in music degrees housed within the SFPA.

Dismissal from a Major within Westminster College of the Arts

Academic departments within Westminster College of the Arts reserve the right to dismiss a student from a major following notification that their standing in the major is in jeopardy and the passage of a suitable amount of time permitted to address stated issues, typically one semester. Such dismissal may be based upon any of the following conditions: failure to maintain a satisfactory or minimum GPA; failure to sustain academic progress in the courses of the major; conduct in violation of the standards of the department or profession; failure to meet conditions or requirements as stated in university catalogs, The Source, or the departmental handbook; or the student's general standing at Rider University. Such dismissal will become effective at the end of the semester in which the decision is reached. Students dismissed from Music Education are not permitted to enroll in Music Education courses until readmitted into the Music Education major.

Readmission after Academic Dismissal

Dismissed students seeking readmission must first contact the Dean of Students Office, Bart Luedeke Center, on the Lawrenceville campus or the Associate Dean of Students Office, Scheide Student Center, on the Princeton campus to obtain appropriate forms. Once the Dean of Students or his/her designee approves the readmission application, the application is forwarded to the dean of the college to which the student seeks reentry. Students dismissed for academic reasons must submit with their readmission application a personal letter to the Academic Standing Committee which will make decisions concerning their readmission. They should also provide evidence, usually in the form of a transcript from another institution, of formal study and/or accomplishment. If possible, such work should have been done in specific areas of deficiency in the student's academic record.

Academically dismissed students must meet all academic requirements in place at the time of their readmission. Readmission will be dependent upon various criteria including GPA, current academic progress, and the student's general standing. Students in the Westminster College of the Arts may be required to reapply or re-audition.

If readmission is granted, the student is placed on conditional academic standing until the cumulative GPA reaches a satisfactory level of at least 3.0. A readmitted student is responsible for curriculum requirements in effect at the time of readmission.

Students should refer to The Source at www.rider.edu/thesource (<http://www.rider.edu/thesource>) for information regarding readmission following a voluntary or judicial dismissal.

Academic Load/Overload

Students should understand that for every hour spent in class, they are expected to spend two to three hours studying outside of class time, and should therefore plan their academic load accordingly. Study time may vary based on the student's background knowledge and class difficulty.

Graduate Business

A full-time program consists of nine (9) or more semester hours of graduate course work. Part-time students who are employed full-time will generally be limited to six semester hours of graduate work in a given semester. During the evening summer session, the recommended course load is one-half that of a regular semester.

Graduate Education

A full-time program during the fall and spring semesters consists of nine (9) or more semester hours of graduate course work. A full-time program during the Summer Sessions consists of six (6) or more semester hours of graduate course work. Students enrolled in the Graduate-Level Teacher Certification program are restricted to two courses (6 semester hours) per semester until the point of student teaching.

Graduate Liberal Arts and Sciences

A full-time program consists of nine (9) or more semester hours of graduate course work. Part-time students who are employed full-time will generally be limited to six semester hours of graduate work in a given semester. During the evening summer session, the recommended course load is one-half that of a regular semester.

Westminster Choir College

In the Westminster College of the Arts, a full-time graduate program consists of between nine (9) and fifteen (15) semester hours. Enrollment for more than 15 semester hours constitutes an academic overload, and requires the permission of the WCA Associate Dean.

Westminster College of the Arts graduate students may exceed the normal maximum academic load after completing one (1) full-time semester at Rider University (minimum of 9 credit hours) **and** attaining a cumulative grade point average of 3.00 or higher. Students on Conditional Academic Standing are not eligible for an academic overload.

Students who exceed the normal load are required to pay an overload per credit fee for each credit over 15, except in the case of non-billable hours.

Students may enroll for a maximum of 12-14 combined credits during Summer I and II, with no more than 7 credits in any one session. These maximums may be exceeded only with the permission of the student's academic dean.

Academic Records

Academic records are maintained by the Registrar and the dean's office of each college or school for a minimum of 10 years from the date of last attendance. Records may be kept longer at the sole discretion of the University. All other official records of Rider University pertaining to students are kept in files maintained by the Dean of Students Office. Further information regarding these records can be found in The Source (<http://www.rider.edu/offices-services/handbooks-policies/thesource>).

Access to student academic and other records may be accorded to Rider personnel with a legitimate educational interest in the records. Information may be released to other agencies and individuals according to these policies in compliance with the Family Educational Rights and Privacy Act (FERPA) of 1974 (as amended):

- Rider may release the following information without written permission from the student: fact of enrollment, dates of enrollment, degree candidacy, degree awarded, and major field.
- Rider may release the following information unless the student has requested in writing by the end of the second week of classes each semester that the information not be released: name, email, home and local address, and home and local telephone number, participation on athletic teams and organizations, dates of attendance and honors and awards received.

No other information concerning a student will be released without that student's written permission.

Students having a complaint or question regarding FERPA may write to: Family Education Rights and Privacy Act Office, US Department of Education, Room 4512, Switzer Building, Washington, DC 20202.

Students may request to view their academic record by making an appointment with the appropriate dean's office.

Accompanying Costs for Voice Students

Any student studying individual voice at Rider University should expect in most cases to hire an accompanist. Students may choose to hire a college-approved accompanist. The per-semester fee is not refundable in any part if a student discontinues voice study or decides to seek out another accompanist. For additional information, see Tuition and Fees on Rider's website (<http://www.rider.edu/offices-services/financial-aid/tuition-fees/undergraduate-tuition-fees>).

Applied Music - Westminster College of the Arts

Individual applied music lessons for academic credit are available to all Rider University students with prior experience, regardless of major.

Lessons are available in brass, composition, conducting, guitar/bass, harpsichord, organ, percussion, piano, strings, woodwinds, and voice.

For all students whose major or minor program does not require applied music lessons, and for those students who have completed the applied music requirements for their degree program, fees for this elective (non-required) study will apply. Elective lessons are provided on a space-available basis. All part-time students are charged an applied music fee.

Students may earn 1 or 2 credits per semester, with the exception of graduate applied composition courses, which carry 3 credits per semester. Each fall, spring, or summer applied course consists of twelve private lessons, or the equivalent instructional time, and may require participation in studio classes, performance classes, and/or an end-of-semester jury or performance review. Applied lessons completed during the January term follow specific departmental requirements regarding instructional time.

All applied music students must observe departmental applied requirements listed in the catalog and in departmental handbooks.

Applied lesson fees are described on the Tuition and Fees section of Rider's website.

All applied music students must observe departmental applied requirements listed elsewhere in this catalog and in departmental handbooks. Students for whom applied music lessons are not required may register for lessons on a space-available basis. Interested students should consult the Associate Dean.

Applied lesson fees are described on the Undergraduate Tuition and Fees (<http://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees>) section of Rider's website.

Effective as of the fall 2009 semester for all new or readmitted Rider University students on both campuses. For all students whose major or minor program does not require applied music study, or for those students who have completed applied music requirements, elective fees will apply. All part-time students are charged an applied music fee.

Registration for applied music study follows this table of suffixes. Students will register for the appropriate course number and suffix, as indicated in the curriculum pages found elsewhere in this catalog.

Full-time Students

A – One-hour, 2-credit required lesson. Included in tuition – no extra charge.

- Lawrenceville example: Musical Theatre major
- Princeton example: All undergraduate majors

B – Half-hour, 1-credit required lesson. Included in tuition – no extra charge.

- Lawrenceville example: Popular Music Culture, up to 3 semesters
- Princeton example: Theory/Composition major (half-hour voice or keyboard lesson)

C – One-hour, 2-credit elective lesson. Not included in tuition – fee charged per semester.

- Both campuses: Student who has completed all required lessons in their major. Student whose major does not require lessons.

D – Half-hour, 1-credit elective lesson. Not included in tuition – fee charged per semester.

- Both campuses: Student who has completed all required lessons in their major. Student whose major does not require lessons.

G – One-hour, 2-credit required/elective lesson. Half-hour is required and is included in tuition. The second half-hour is elective and is not included in tuition – fee charged per semester.

- Lawrenceville example: Popular Music Culture, up to 3 semesters
- Princeton example: Theory/Composition major (full-hour voice or keyboard lesson)

Part-time Students

(all students, both campuses, regardless of major or requirements)

- Suffix E – One-hour, 2-credit required or elective lesson – fee charged per semester.
- Suffix F – Half-hour, 1-credit required or elective lesson – fee charged per semester.

Change of Applied Teacher

Students wishing to change their applied teacher must apply to the chair of the appropriate department. Any change requested after the beginning of a semester will require the permission of both applied teachers and the department chair. If either applied teacher is the department chair, permission of the Associate Dean also is required.

Change of Major or Applied Primary Area

Students wishing to change their major or the applied primary instrument must complete the appropriate form. Permission of the old and new major departments is required.

Class Attendance/Absence

It is the prerogative as well as the responsibility of each faculty member to establish a clear policy for each course of instruction in regard to

the nature and extent of student participation that will be expected and required.

The effect of absences upon the student's standing in a particular class will be left to the determination of the instructor in the course. However, it is expected that faculty members will be fair and reasonable concerning validated absences due to field trips, practicum, religious observance, participation in varsity athletics, placement interviews for graduating seniors,

Westminster College of the Arts rehearsals or performances, and illnesses sufficiently serious to be certified by either the University Health Center or the student's physician. The faculty member should consult with the Dean of Students in instances where doubts arise regarding the course to follow in evaluating student absences.

It is the student's responsibility to inform instructors of the nature and extent of an actual or anticipated absence. If that is impossible, or if the absence is or will be more than three (3) consecutive class sessions (seven (7) calendar days), the student should contact the Office of the Dean of Students at 609-896-5101. Then the dean's office will notify the appropriate faculty member.

Class Cancellation Policy and Excused Absences for Princeton Campus Students Only

During run-outs involving Westminster ensembles, private lessons for those students not involved in the run-out continue to meet. When a college-sponsored performance necessitates that 30% or more of the students in a class be absent, the class may be cancelled at the discretion of the faculty member.

The dean will excuse individuals or groups of students who are participating in college-sponsored events. Only students registered for the class or ensemble participating in an activity will be excused from class. Students excused from class(es) under these circumstances remain responsible for all class work.

Class Cancellation – Both Campuses

In most cases, Rider will remain open and fully operational during inclement weather and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, close certain buildings or take other emergency actions.

If such circumstances should arise, a notice will be sent via the Rider Alert System, Rider's mass electronic messaging system. Students may sign up for Rider Alert (<http://www.rider.edu/rideralert>).

Cancellations will also be announced online at www.rider.edu and on the Rider University information hotline at 609-219-2000, option 1.

Commencement Requirements – Westminster Choir College only

Academic year requirements at Westminster Choir College extend through the annual spring Commencement. All students enrolled in required ensembles (Chapel Choir, Schola Cantorum, Symphonic Choir) are required to participate in Commencement unless excused under extraordinary and unavoidable circumstances, such as serious illness. In particular, credit for spring semester choir participation is lost if a

student does not attend and is not excused from Commencement. All other students are encouraged to participate in Commencement.

Students participating with the members of the graduating classes are required to purchase or rent appropriate academic regalia, available through the college store.

Course Credits

Rider University has a 13-week semester, followed by seven days of examinations. Rider uses the true number of minutes per hour-long session; i.e., a one-hour meeting is actually 60 minutes. Three-credit classes meet for 60, 90, or 180 minutes, corresponding to, respectively and typically, 3, 2, or 1 meetings per week.

In the Westminster College of the Arts all performance courses receive credit:

- All ensembles receive 1 credit
- Other performance-based courses receive 1-3 credits
- A full-semester Student Teaching experience receives 12 credits.
- Westminster Choir College students enrolled in LL 037, MTH 100S, PI 045, or TH 045 receive credit toward their semester course load, but such credits do not count toward graduation.
- Applied music instruction receives 1-3 credits.

Course Level Numbering

Courses numbered below 100 are taught at pre-college level and carry no credit. Courses numbered at the 100- to 400-level carry only undergraduate credit. The course number indicates the anticipated audience for a course; 100 level courses are designed for freshmen, 200 level for sophomores, etc.

On the Princeton campus:

1. Courses at the 500-level are open to undergraduate and graduate students. Undergraduate students who have earned at least 60 credits and a minimum cumulative GPA of 3.0 may enroll in a 600-level course upon permission of the instructor and the Associate Dean. Undergraduate students who have earned at least 90 credits and a minimum cumulative GPA of 3.8 may enroll in a 700-level course upon permission of the instructor, the Director of Graduate Studies and the Associate Dean.
2. Students with undergraduate status in the five-year B.M./M.A.T. program may take graduate courses required in that curriculum at the 500- or 600-level. Students in the B.M./M.A.T. program may take required 700-level courses in the senior year or upon successfully completing 124 credits and the student teaching semester. Students in the B.M./M.A.T. program who have not attained graduate status may enroll in non-required 700-level courses according to the restrictions stated in the previous paragraph.
3. Special students who have completed a baccalaureate degree may apply for permission to take 600- or 700-level courses. Undergraduate students in the Baccalaureate Honors Program (BHP) should see the Assistant Registrar regarding enrollment in graduate courses.

Course Repeats - Westminster College of the Arts

All undergraduate and graduate students who are enrolled in a major or minor offered by the Westminster College of the Arts may enroll for a second or subsequent time in any *non-repeatable* WCA course from which they have withdrawn, in which they have earned an "F," or in which they have failed to earn the required minimum grade ¹ according to the following rules:

- 1) Students who have withdrawn from, failed, or failed to achieve the required minimum grade in a required course ¹ in their first attempt at the course may enroll for a second time without permission. All other students must have the permission of the Associate Dean.
- 2) Permission of the dean or associate dean of the college (FPA or WCC) offering the course in question is required in order to enroll in a course for the third time.
- 3) Permission of the Academic Standing Committee of the college (FPA or WCC) offering the course in question is required in order to enroll in a course for the fourth time. Permission for a fourth enrollment will be granted only in rare, extenuating, and documented circumstances.

In all instances, the most recent grade is calculated into the grade point average, and all listings and grades will remain on the transcript.

¹ Examples include: a minimum grade of "B-" is required in Piano Secondary, a minimum grade of "C" is required in foreign language study in order to progress to the next level in that language.

Courses - Adding, Dropping, Repeating and Withdrawing

Timetables and deadlines given below pertain to fall and spring semesters. Students should consult the Registrar's web page for summer session deadlines.

Adding Courses

Graduate students may add a course through the first week of the semester provided the course is still open for registration.

Dropping Courses

Students may drop courses through the second week of the regular semester at their own discretion. In such cases, the courses are deleted from the student's record. After the second week of the semester, a withdrawal from the course is necessary and a 'W' is recorded on the transcript.

Repeating Courses

Students may request permission from the academic dean to repeat a course to earn a better grade provided that the course is one that cannot be repeated for additional credit (e.g., applied music lessons, acting courses, coaching, ensembles and productions, stagecraft, studio dance, and other related classes). The grade first earned will remain on the transcript but only the latest grade will be used in computing grade point average and determining whether or not degree requirements have been met.

Students who fail a required course must repeat the course until a passing grade is received. Students do not have to repeat a failed

elective, but must pass another acceptable elective of comparable credit in order to meet graduation requirements.

Students receiving financial aid should consult with Student Financial Services before repeating a course already passed to determine the possible impact upon the student's continuing eligibility for financial aid.

Withdrawing from Courses

Students may withdraw from courses and receive a grade of 'W' during the third through seventh weeks of the semester. In the semester's eighth through eleventh weeks, students may withdraw from courses with the written consent of the course instructor and receive a grade of 'W.' Differing subject matters, instructional methodologies and course objectives make it likely that instructors will have differing criteria for giving consent to withdrawal in this period. A Lawrenceville student who wishes to withdraw officially from one or more graduate or undergraduate courses must submit a written request and must obtain the approval of the associate dean or department chair of graduate studies, or dean of the respective school.

Withdrawals are not permitted during the last two weeks of class except for reasons of validated physical or psychological incapacitation as approved by the dean of the college. Reasons must be validated by the Dean of Students and approved by the academic dean of the college in which the student is enrolled.

Students who do not withdraw officially from courses they fail to complete, will receive a grade of "F" for those courses.

Please refer to Financial Aid website (<http://www.rider.edu/offices-services/finaid/payments-billing-deposits/refunds>) for information regarding course withdrawals and refunds.

Degree Completion

On both campuses, students who have not satisfied requirements by the end of the specified time may be required to repeat courses and/or meet further requirements. Students for whom more than one year has elapsed since the date of last enrollment may be required to re-apply and/or re-audition for the program, and must meet all requirements in place at the time of their readmission.

On the Lawrenceville campus, students must complete all requirements for the master's degree within six (6) years of the date of first registration for graduate course work.

On the Princeton campus, students must complete all requirements for the master's degree within seven (7) years of the date of first registration for graduate course work. For Westminster Choir College students, credits earned at another institution or through Westminster Continuing Education outside the seven-year period that commenced with initial enrollment in a degree program must be approved for transfer into that program by the department offering the degree.

Diploma Conferral

Diplomas are conferred three times each year: May, August, and December. Students must submit a degree application form, available online via MyRider or in their academic dean's office, in order to be eligible to receive a diploma on any date. Students must apply for graduation by the deadlines established each year by the Registrar's Office. See the Registrar's Office website (<http://www.rider.edu/>

[academics/academic-support-resources/registrar/commencement-candidates](#)) for more information.

Diplomas are conferred only upon those who have met 100% of all degree requirements. Students in the combined B.M./M.A.T. program receive both diplomas upon the completion of all requirements.

Disabilities

Rider University supports the protections available to students with disabilities under Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended, and the New Jersey Law Against Discrimination.

Services for Students with Disabilities (SSD) facilitates equal access to the programs and activities at Rider University for students with disabilities, as defined by the Americans with Disabilities Act (ADA).

Students must initiate contact with SSD in order to receive services and to arrange reasonable accommodations, such as course adjustments, course substitutions and auxiliary aids. Any Rider student who supplies SSD with appropriate documentation of a disability is eligible on a case-by-case basis for reasonable accommodations. Students with disabilities should contact SSD (Joseph P. Vona Academic Annex, Room 8, 609-895-5492) to discuss available services and reasonable accommodations, including academic adjustments.

Only students with documented disabilities that prevent equal access to an academic course or program are entitled to reasonable accommodations, which may include course adjustments, course substitutions and auxiliary aids. A reasonable accommodation is an accommodation that provides the student with equal access to the academic course or program, including all course or program materials, but does not impose an undue burden on the University or constitute a fundamental alteration to the course or program in question. Knowledge of the essential course and program standards resides primarily with the individual faculty member and/or the academic department.

SSD evaluates the disability documentation provided by the student, collects additional information from the student, and gathers information from relevant educational support personnel (e.g., high school guidance counselors), medical and psychological professionals, and other pertinent sources outside of Rider University. When the student's disability has been sufficiently documented and potential reasonable accommodations have been identified, the student is provided a Notice of Academic Adjustments specific to each course and encouraged to present that Notice of Academic Adjustments to the relevant faculty member and to discuss, in a private setting, how the reasonable accommodations will be implemented.

If any such faculty member has concerns that the accommodations constitute a fundamental alteration to the course or program in question, that faculty member shall promptly contact SSD to initiate discussion and resolution of those concerns.

If the faculty member does not demonstrate to SSD that the accommodation constitutes a fundamental alteration of the course or program in question, the accommodation shall be put in place. If the faculty member demonstrates to SSD that the accommodation constitutes a fundamental alteration of the course or program in question, alternate accommodations, to the extent available, shall be made. If SSD and the faculty member are unable to mutually agree on this issue, they shall appeal it to the Provost or his/her designee, who

shall hear both positions, review any necessary documents, and render a final decision.

If such an appeal is taken to the Provost or his/her designee, and the semester has already begun, the Provost or his/her designee shall determine at the outset of the appeal process whether or not the student will suffer an immediate negative impact, if the proposed accommodation is not yet in place. If the determination is that the student will suffer such an immediate negative impact, then the proposed accommodation will be put into place pending resolution of the appeal. If no such immediate negative impact is apparent, the proposed accommodation will be withheld, pending resolution of the appeal. In either case, the Provost or his/her designee will make every reasonable effort to render his/her decision within four working days of the initiation of the appeal.

This policy is designed to ensure the University's compliance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended and the New Jersey Law Against Discrimination, and to enable every Rider student with a disability to enjoy an equal opportunity to achieve his/her full potential while attending this University.

Employment Opportunities – Westminster Choir College

In addition to general opportunities provided by the University, there are arts-specific opportunities both on-campus and in the general community. For example, many Westminster Choir College students are employed in area churches as organists, directors and singers on a part-time basis. These assignments provide laboratory experiences in which knowledge and techniques can be applied and tested. Inquiries and requests should be addressed to the Office of Church Field Education on the Princeton campus.

Ensembles/Productions – Attire and Registration

Attire

Students must purchase official ensemble attire for choirs in which they are enrolled. Freshman/transfer students at the Princeton campus must be fitted during orientation and purchase a red robe which will be charged to their student account by the Bursar's Office.

Registration

Students participating in music ensembles or artistic productions must be registered for the course that accompanies that activity. It is the responsibility of the student to ensure proper registration in the appropriate course. Excused absences are granted only to registered students.

Each semester, the official personnel roster for each ensemble will be finalized for that semester at the end of the schedule adjustment period, typically two weeks after the first day of classes.

Full-Time Graduate Tuition Inclusion – Princeton Students

Full-time tuition charges are incurred by students who enroll for credit loads, including credit equivalents for non-credit and audited courses, which fall within the ranges indicated below. Further charges are incurred

when full-time students exceed maximum load levels, excluding VC593 or participation in auditioned choirs.

Please see Rider's Financial Aid website (<http://www.rider.edu/offices-services/financial-aid/tuition-fees/undergraduate-tuition-fees>) for elective and part-time charges for elective music and dance study.

Full graduate tuition includes:

1. A minimum of 9 and maximum of 15 credits per semester, or the equivalent including undergraduate and non-credit courses.
2. For required graduate primary applied music study, one hour per week of private instruction, except for Choral Conducting majors, who receive one half-hour per week of private instruction.
3. Once all required primary, secondary or private composition applied requirements have been completed, all additional applied lessons will be billed at the elective rate given below.
4. Students in double major programs with two different primary instruments will be billed for the second applied lesson at the elective rate.
5. Any non-required private lesson will be billed at the elective rate given below. Graduate students in majors without applied requirements will be billed for applied lessons at the elective rate.
6. Please see the table of applied lesson suffixes under "Applied Music" in the Academic Policies section of this catalog. Registration for the incorrect suffix may result in an incorrect bill.

Grades – Grade Reports, Grade Point Average, Incomplete Grades, Grade Appeals

Grade Reports

Members of the faculty are officers of instruction at Rider University.

Among their responsibilities as such is the evaluation of students' academic accomplishments in courses of instruction. These evaluations ultimately are expressed in grades that are recorded in the students' academic record. Members of the faculty, judging the competencies and performances of students, assign grades based on their professional experience and training. Grades assigned by the faculty follow practices and procedures within the standards established by Rider and within the standards established by individual course requirements.

Letter grades are used at Rider University for recording faculty evaluations of final student achievement in individual courses and are entered on the permanent academic record of a student's academic performance.

The academic grades used by faculty for recording evaluations of student achievement are as follows. For determining grade point averages (GPAs), grades have weighted values called variously honor points, quality points, or grade points as follows:

Grade	Trans Notation
A (Excellent)	4.0
A-	3.7
B+	3.3
B (Good)	3.0
B-	2.7
C+	2.3
C (Fair)	2.0
C-	1.7

D (Poor, minimum passing grade) 1.0
(See Note below)

F (Failing academic work; failed to abide by standards of academic honesty and integrity; unauthorized withdrawal, and fail to complete work in prescribed time.) 0.0

Note: At Westminster Choir College the "D" grade is not given at the graduate level.

Each instructor of a course will inform the student of the course objectives, procedures, and applicable grading standards. Upon a student's written request, members of the faculty will provide a review of the student's course standing at least once each term by the mid-point of that term. Each student may also review material submitted to the instructor for evaluation such as papers, examinations, and the like. In these ways, students will be able to assess their own progress in a course before final grades are assigned.

NOTE: Faculty members are not required to maintain student course materials more than four months after the end of an academic term.

A student grade report may also show the following transcript notations, which carry no grade point value:

I	Incomplete
L	Late grade
N	Registered: Did not attend
AU	Audit
P	Pass
S	Satisfactory progress
U	Failure in pass/fail course
W	Withdrawal
Y	Satisfactory completion of supplemental education course
Z	Insufficient progress in supplemental education course

"N" and "W" notations are included in the total semester hours attempted, as far as tuition payment is concerned.

Grade Point Average (GPA)

Grade point averages (GPA) are used to establish academic standing. In order to compute the grade point average, students must first determine the number of quality points earned for each course. The total number of quality points for a course is derived by multiplying the number of credits for the course by the number of quality points for each letter grade. The grade point average (GPA) is determined by dividing the number of quality points by the number of GPA hours.

Incomplete Grades

Students who, as a result of extenuating circumstances, are unable to complete the required work of a course within the term, may request an extension of time from a faculty member. Such extensions of time can be granted only in cases in which illness or another serious emergency has prevented the student from completing the course requirements or from taking a final examination. The request for extension of time must be

made prior to the last scheduled class meeting, except in those unusual situations in which prior notification is impossible.

The faculty member shall determine whether to grant the request for a time extension and the type of verification (if any) required to support the request. The faculty member shall specify the time, up to four weeks from the last day of the term, as specified in the academic calendar, by which work must be completed by the student. If the faculty member does agree to the request, the notation "I" (Incomplete) shall be submitted on the grade roll. In those situations where the faculty member has not received a request for an extension of time, the notation "I" (Incomplete) may be submitted on the grade roll by the faculty member when, in his or her judgment, such a determination appears justified. Upon submission of completed required work the faculty member shall submit a Change of Grade form to the Registrar.

Students who, as a result of extenuating circumstances, are unable to submit the completed required work at the end of the four-week period may request an extension of the incomplete grade. The request for an extension of the incomplete must be made prior to the expiration of the four-week period. If the faculty member agrees to the request for an extension of the incomplete, the faculty member shall specify the time, up to a maximum of two weeks from the date of expiration of the four-week period (i.e., six weeks from the last day of the term) by which work must be completed by the student and shall submit an Extension of Incomplete form to the Registrar.

Upon submission of completed required work, the faculty member shall submit a Change of Grade form to the Registrar and assign the course grade. Failure of the Registrar to receive from the faculty member a Change of Grade form or an Extension of Incomplete form at the end of the four-week period, or a Change of Grade form at the end of the six-week period shall result in the automatic assignment of the grade "F," "Z," or "U" by the Registrar.

Students who receive an incomplete in a course that is part of a course sequence must obtain permission from the department chairperson to remain enrolled in the next course in the sequence or they will be removed from that next course.

Grade Appeals

Basis for Grade Appeal

A final course grade may be changed only at the initiative of the faculty member who originally assigned the grade or as the result of a decision made in the hearing of a grade appeal by the Faculty Grade Review Panel. It is assumed that the final course grade is assigned in good faith and based on the professional expertise of the faculty member.

A student may appeal a final course grade only on the grounds that it represents an arbitrary, capricious, and/or unreasonable evaluation of his or her performance.

A grade appeal may not be based on a disagreement with the faculty member's professional academic evaluation of the student's work. The burden of proof rests with the student. A grade appeal shall be supported only when a student convincingly demonstrates that an arbitrary, capricious, and/or unreasonable evaluation occurred. Changes and appeals for grades on written comprehensive graduate examinations are subject to the same requirements and procedures as course grades.

The Faculty Grade Review Panel may return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process; may decline to hear an appeal when

there is insufficient documentation of arbitrary, capricious and/or unreasonable grading; and shall decline an appeal if it is based on failure to accommodate a disability covered by the University Disability Policy.

Faculty Grade Review Panel

The Faculty Grade Review Panel has final authority concerning all grade appeal questions. **The panel consists of the following nine members:**

1. Six tenured faculty members including one tenured faculty member elected by the bargaining unit members of each of the five college/school academic policy committees and one selected by the bargaining unit members of the University Academic Policy Committee, who shall serve as chairperson of the panel;
2. A seventh faculty member selected jointly by the Provost and Vice President for Academic Affairs and the academic deans;
3. Two full-time students selected by the Student Government Association who, at the time of their service, must be seniors who have attained a grade point average of at least 3.25.

Each of the above appointing groups shall also designate an alternate for each member they appoint to the panel. Faculty members of the panel shall serve two-year terms and may be reappointed.

A quorum of the Faculty Grade Review Panel shall consist of any five members. The failure or inability of any appointing body to fulfill its responsibility to appoint any member or members to the panel shall not prevent the panel from organizing itself and exercising its duties.

The chairperson of the panel will serve as the hearing coordinator and has the following duties and responsibilities:

1. Inform the members of the panel that a grade appeal has been received and set a date for the hearing,
2. Distribute documentary materials pertaining to the appeal to members of the panel,
3. Maintain a permanent record of the panel's proceedings,
4. Prepare and distribute any decision made by the panel to the appropriate parties.

Prior to Initiating a Grade Appeal

A student who believes that his or her final course grade represents an arbitrary, capricious, and/or unreasonable evaluation of his or her work is strongly encouraged to talk with the faculty member in an effort to resolve the issue before filing a formal grade appeal. However, it must be emphasized that this informal discussion does not constitute the initiation of a grade appeal and does not extend the time limits specified in the next paragraph.

Initiating a Grade Appeal

To initiate a grade appeal, the student must forward a letter to the faculty member which clearly and precisely describes the student's reasons for believing that the final course grade constitutes an arbitrary, capricious, and/or unreasonable evaluation of his or her performance. A copy of this letter shall also be sent to the faculty member's department chairperson. (If the faculty member taught the relevant course in another department, the letter shall be sent to the chair of that other department. If the relevant course is in a program and is not cross-listed, the letter shall be sent to the chair of the program director's home department.)

For appeal of fall semester grades, the letter must be postmarked or hand-delivered within seven (7) days of the start of the upcoming spring

semester. For appeal of spring semester grades, it must be postmarked or hand-delivered within thirty (30) days of the last regularly scheduled spring semester examination. For appeal of summer grades, it must be postmarked or hand-delivered within seven (7) days of the start of the upcoming fall semester. For appeal of grades on written comprehensive graduate examinations, it must be postmarked or hand-delivered within thirty (30) days of the date that grades were issued for the examination.

If a change of grade occurs after the aforementioned deadlines, the grade appeal must be filed within thirty (30) days of the submission of the changed grade to the registrar.

If the faculty member who assigned the grade in question is no longer at Rider or is away from Rider on an extended basis and not available for consultation, the initial review shall be conducted by the appropriate department chairperson, and the schedule may be extended at the appropriate dean's discretion.

If the faculty member who assigned the grade in question is the department chairperson, the chairperson's dean or that dean's designee shall replace the chairperson in all the procedures that follow.

Failure to submit a written statement of the appeal within the time guidelines established above shall constitute grounds for denying a student access to the grade appeal process. Failure to provide a clear and precise statement shall constitute grounds for denying the appeal at any step in the process. Once a grade appeal is initiated, the basis of all subsequent proceedings must be limited to the allegations appearing in the initial written statement. This limitation does not exclude the introduction of new evidence directly related to the initial allegations.

The chairperson of the Faculty Grade Review Panel, upon written request of any party, may extend any deadline contained in this policy if he or she believes that circumstances beyond the control of a party to the appeal have prevented compliance with stated deadlines. The decision of the panel chairperson to extend or not to extend a deadline shall not be subject to appeal.

The Grade Appeal Process

Step One

In the letter of appeal, the student may request a formal meeting with the faculty member. If the faculty member agrees to such a meeting, the meeting shall be held no later than fourteen (14) days after the beginning of the fall or spring semester following the semester or session in which the grade was given. However, the parties are encouraged to schedule such a meeting at an earlier date if mutually convenient.

The faculty member shall render a decision on the appeal within seven (7) days of such a meeting and shall notify the student and the department chairperson in writing of the decision. If the faculty member agrees to change the final course grade of the student, he or she shall submit a Change of Grade form to the Registrar.

If the faculty member believes that a meeting with the student would not be productive, he or she shall make a decision on the appeal based on the student's letter and shall communicate the decision in writing to the student and the department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given.

If the student accepts the decision of the faculty member at Step One, no further action is required. If the student does not accept the faculty member's decision at Step One, he or she may appeal the decision to Step Two in writing to the department chairperson with a copy to the

faculty member's dean. This letter must be postmarked or hand-delivered within seven (7) days of the postmark date of the faculty member's Step One decision.

If the student does not receive a written response from the faculty member or department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given, the student may, within twenty-one (21) days of the beginning of that semester, proceed to Step Two as indicated below. All such written responses shall be mailed to the student's campus address, if the student resides on campus, or otherwise to the student's home address on record.

Step Two

Within fourteen (14) days of the receipt of a student's letter of appeal to Step Two, the department chairperson shall schedule a meeting with the student and the faculty member. At such meeting, the student and the faculty member will have the opportunity to explain their positions with respect to the grade in question, but they shall be limited to the allegations raised in the student's initial written statement.

The department chairperson shall render an opinion on the matter within seven (7) days of the Step Two meeting and shall provide explanatory language for this opinion in writing to the student, the faculty member and the faculty member's dean.

If the department chairperson's opinion supports the position of the faculty member, the student shall have seven (7) days from the postmark date of the letter from the department chairperson to continue his or her appeal to the Faculty Grade Review Panel as described in Step Three.

If the department chairperson's opinion supports the student's position in the appeal, the faculty member shall have seven (7) days from the postmark date of the department chairperson's letter opinion either to accept that opinion and submit a Change of Grade form to the registrar, or to reject the opinion and notify the student, department chairperson, and faculty member's dean that the faculty member is making an appeal pursuant to the Step Three process.

If the student does not receive notification of a change of grade within twenty-one (21) days of the date of the department chairperson's written decision, the student may carry the appeal to Step Three.

Step Three

To carry the appeal to Step Three, the student must submit a letter expressing that intent to the chairperson of the Faculty Grade Review Panel with copies to the faculty member, the department chairperson, the dean, and the Provost and Vice President for Academic Affairs.

Within seven (7) days (excluding vacation and examination periods) of the receipt of this letter, or the letter from the faculty member who has appealed, whichever the case may be, the chairperson of the Faculty Grade Review Panel shall schedule a meeting of the panel to consider the appeal.

The student and the faculty member shall have the right to appear before the panel to present information pertaining to the allegations made in the student's initial written statement.

The Faculty Grade Review Panel may, if it deems it desirable, request attendance by the chairperson, the dean, and/or any other representatives of the University. Attorneys or advisors to the participants may attend but not participate in the meeting of the panel.

The unwillingness of the faculty member or student to appear before the panel shall not prevent the panel from proceeding with its deliberations. In those deliberations, the panel shall have access to written documents pertaining to the appeal, pertinent records of student performance, and such verbal presentations as may be made during panel deliberations.

On the basis of careful consideration of the available information, the Faculty Grade Review Panel will determine if an arbitrary, capricious, and/or unreasonable evaluation of the student's performance has occurred. This determination will be made in writing and provided to all affected parties.

If the panel determines that no such action occurred, the case will be closed with no further right of appeal. If the panel determines that an arbitrary, capricious, and/or unreasonable evaluation has occurred, it will direct the faculty member's department (or will establish an evaluation committee of faculty members in the field of the course offered) to re-evaluate the student's performance based upon the panel's decision, the records and documentary materials.

Within fourteen (14) days of the receipt of the panel's directive, the department or evaluation committee shall recommend to the panel a grade that it deems appropriate, whether higher than, lower than, or the same as the original grade. Normally, the panel will accept the revised evaluation by the department or committee and will subsequently notify the Registrar of any change of grade. Should the panel feel that the department or committee has not conducted its review in an appropriate manner and that, as a result, the suggested substitute grade is not appropriate, it shall have the authority to direct the Registrar to enter the grade that the panel judges appropriate.

Decisions of the panel are not subject to further appeal. The panel may also return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process, or when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading. The panel shall decline an appeal if it is based on failure to accommodate a disability covered by the University Disability Policy.

Expediting a Grade Appeal

When a student's graduation is affected by the outcome of a grade appeal in a semester, term, or session immediately preceding such graduation, faculty members shall make reasonable efforts to expedite the process.

Grade Changes Made at Initiative of Faculty Member

The individual faculty member may determine that it is appropriate to change a recorded academic grade. Such changes must be made within four (4) months of the date that the original grade was assigned. Any change of grade initiated by a faculty member more than four (4) months after the date the original grade was assigned must be approved by the faculty member's dean. Faculty members, using forms supplied by the Office of the Registrar, will prepare a written change of grade stating the reasons for the grade change with a copy to the student, the department chairperson and the faculty member's dean. Upon receipt of this form by the Office of the Registrar, the grade will be changed on the official records of the University.

Graduate Assistantships

A limited number of assistantship positions and graduate scholarships are available to full-time graduate students.

On the Lawrenceville campus, further information can be found on Rider's website (<http://www.rider.edu/offices-services/finaid/scholarships-grants/graduate-scholarships>).

On the Princeton campus, inquiries should be directed to the Office of Admissions (<http://www.rider.edu/wcc/admissions>). Princeton students must maintain a minimum GPA of 3.0 at all times to retain an assistantship.

Health and Safety

Westminster Choir College/Westminster College of the Arts of Rider University, as required by the National Association of Schools of Music, is obligated to inform students and faculty of health and safety issues, hazards, and procedures inherent in practice, performance, teaching, and listening both in general and as applicable to their specific specializations. This includes but is not limited to information regarding hearing, vocal and musculoskeletal health, injury prevention, and the use, proper handling, and operation of potentially dangerous materials, equipment, and technology.

It is important to note that health and safety depends largely on personal decisions made by informed individuals. Rider University has health and safety responsibilities, but fulfillment of these responsibilities cannot and will not ensure any individual's health and safety. Too many factors beyond the University's control are involved.

Each individual is personally responsible for avoiding risk and preventing injuries to themselves before, during, and after study or employment at Rider University. The policies, protocols, and operational procedures developed do not alter or cancel any individual's personal responsibility, or in any way shift personal responsibility for the results of any individual's personal decisions or actions in any instance or over time to the University.

All members of the Westminster College of the Arts community are encouraged to visit Health and Safety Recommendations (<http://www.rider.edu/student-life/health-wellness/student-health-services/health-safety-sfpa-wcc-students>) on Rider's website for a series of recommendations and resources designed to help each individual to become aware of and attend to various issues.

International Student Status

Federal regulations require that all F-1 and J-1 international students maintain full-time status. Students may request part-time status under specified, limited circumstances, including their final semester. Prior approval of the Center for International Education (<http://www.rider.edu/offices-services/center-for-international-education>) is required.

Interruption of Studies

In addition to information given here, students should refer to The Source (<http://www.rider.edu/thesource>) for information regarding the circumstances and procedures related to withdrawing from the University.

Lawrenceville

Students who interrupt their studies must notify the appropriate graduate program office. If studies are interrupted for up to one year, students may return with the approval of the advisor. However, if two calendar years elapse between the last date of attendance and the next registration, students must submit an application for readmission together with a

nonrefundable readmission fee. Students will be responsible for the application and degree requirements in force at the time of readmission.

For students to remain in good standing with the division, they must file a notification of non-attendance form announcing their intention to not attend any semester prior to the beginning of that semester. The form may be procured from the approved graduate office.

Princeton

A student who wishes to discontinue study for any reason should withdraw officially from Rider University. Withdrawal from the university is accomplished by submission of the proper form, signed by the student, to the Associate Dean of Students. If it is not feasible to complete and submit the official form, a letter stating intention to withdraw may suffice.

Failure to observe the proper withdrawal procedure results in the recording of failing grades for all courses if a student leaves during a term. If a student leaves and returns within the same semester, consultation with course instructors may be necessary to ensure that coursework can be completed. Official withdrawal from the college is effective on the date that the Associate Dean of Students signs a withdrawal form or receives a letter stating intention to discontinue enrollment. A withdrawal date must fall within a term if grades of "W" are to be recorded.

The Graduate Committee may require a student who has withdrawn from the college and who seeks readmission to present evidence demonstrating that the conditions leading to the withdrawal are no longer operative. If it is felt that it is not in the best interests of the student or the college, permission to return may be denied. An audition and/or interview may be required for readmission.

Students withdrawing for medical reasons or to fulfill a military obligation may apply to the Associate Dean of Students. Written documentation is required, and the maximum length for such a leave is one year. If a leave of absence has been granted for medical reasons, the student may be required to submit evidence documenting full recovery. If a leave is granted, the student may return at any time within one year, so long as a letter stating intention to return is submitted to the Associate Dean of Students at least one month in advance of the start of a new term.

Outside Activities – Westminster Choir College only

Westminster Choir College students are expected to give priority to all officially scheduled classes, lessons, rehearsals, on- and off-campus performances (including tours), and other official functions involving music students. Outside activities, such as employment, church or volunteer work, or other professional engagements should not conflict with college requirements or those listed on course syllabi. Students employed outside of the college should inform employers of their commitment to their education and their obligation to college classes and ensembles.

Recital Scheduling – Westminster Choir College only

Students wishing to give applied music or graduate conducting recitals, whether or not for the purpose of fulfilling degree requirements, must schedule the recitals in the Office of Performance Management. Either prior or subsequent approval or confirmation by a department may be required in order to confirm the recital date. A recital date not confirmed

by departmental authorization may be released by Performance Management. No required recitals may be scheduled during examination or reading days during the final examination period in any semester.

Thesis/Capstone - Westminster Choir College Only

Students in the M.M.E. (<http://catalog.rider.edu/westminster-choir-college/graduate-programs/master-music-education>) and M.V.P. (<http://catalog.rider.edu/westminster-choir-college/graduate-programs/master-voice-pedagogy>) programs must register for one hour of thesis credit in the semester or summer term in which thesis work begins, in the semester or summer term in which work is completed, and in any other semester or summer term in which assistance is provided by the thesis advisor. A grade of "S" will be recorded on the student's transcript in any/all semesters while thesis work is ongoing, but incomplete. Students in the M.A.T. (p. 777) program must complete a capstone as part of the degree requirements.

Upon final approval of the thesis, a letter grade will be assigned by the thesis advisor for the final semester of registration. Final approval and deposit of the thesis must occur a minimum of one month prior to the end of the semester in which graduation is anticipated for Music Education students; a minimum of two weeks prior to the end of the semester in which graduation is anticipated for Voice students.

Transfer Credit While Currently Enrolled at Rider

Currently enrolled students are strongly encouraged to obtain permission to transfer a course before enrolling for a course at another institution, using the form available in the Assistant Registrar's Office on the Princeton campus, the Registrar's Office on the Lawrenceville campus or their academic dean's office. If prior approval is not obtained, there is no guarantee that transfer credit will be granted.

For information about transfer credit policies on the Lawrenceville campus, visit their webpages:

College of Business Administration (p. 855)
School of Education (<http://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-sciences/school-of-education>)

The following information is for the Princeton Campus only:

Westminster Choir College

Approval of transfer credits is given by the appropriate academic department, following receipt of a written petition and an official transcript. Graduate students may request transfer of a maximum of six (6) credits from other graduate schools. A maximum of six (6) additional credits earned through the Westminster Continuing Education program may be applied toward graduation requirements in the M.M. and M.V.P. programs. A maximum of twelve (12) additional credits earned through the Westminster Continuing Education program may be applied toward graduation requirements in the M.M.E. program. Official transcripts must be submitted before any transfer or continuing education credits can be accepted.

Code of Academic Integrity

Introduction

All information given here applies to all undergraduate and graduate students of Rider University.

Significance of Accepting Admission to Rider University

By the act of accepting admission to Rider University, students acknowledge and agree to the following:

1. that they will be bound by and comply with all University standards and policies, including but not limited to those standards and policies set forth in this catalog and in the student handbook (The Source).
Primary and ultimate responsibility for knowing and conforming to these standards and policies and degree requirements resides with the individual student,
2. that the ultimate authority to regulate and maintain order on the University campuses resides with the President and the Board of Trustees; and,
3. that the University retains ownership and the exclusive right to use any and all promotional, publicity, and entertainment products (including those produced as course requirement), creations, and activities engaged in by the student while at the University, including but not limited to photographs, television, audio and video recordings, motion pictures, artistic performances and presentations, Internet/web-based productions and sales, and athletic events and all proceeds therefrom. He/she has no right to any payment for participation therein.

Students further agree to execute any documents required to confirm or convey to the University all rights outlined in subpart (3) above.

Rider University's Right to Change Catalog Contents

This Academic Catalog is not a contract nor is it an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this catalog, it must be understood that all policies and procedures (as well as courses, course descriptions, curricular and degree requirements and other academic information) described in this catalog are subject to change or elimination at any time without prior notice.

Primary and ultimate responsibility for knowing and conforming to the standards, policies and degree requirements outlined in the Academic Catalog resides with the individual student.

While every effort will be made to inform students of any changes as soon as is practical, students should consult the appropriate academic or administrative department, school, college, or other service provider for currently accurate information on any matters described in this catalog. Changes affecting degree requirements will take into account the applicability of the change to currently matriculated students.

Rider University also reserves the right to vary the policies and procedures in the Academic Catalog on a case-by-case basis, as fair and reasonable treatment of interested parties requires in the University's best judgment.

Academic Rights and Freedoms

It is the responsibility of Rider University to protect the academic freedoms of the students in accordance with the Joint Statement on

Rights and Freedoms of Students. "Joint Statement on Rights and Freedoms of Students," Interassociation Task Force (U.S. Student Assoc., AAC&U, AAUP, 1993). Of critical importance is section two, which deals with the relationship between the professor and the student. "The professor in the classroom and in conference should encourage free discussion, inquiry and expression. Student performance should be evaluated solely on an academic basis, not on opinions or conduct in matters unrelated to academic standards."

Protection of Freedom of Expression

Students should be free to take reasoned exception to the data or views offered in any course of study and to reserve judgment about matters of opinion, but they are responsible for learning the content of any course of study for which they are enrolled.

Protection Against Improper Academic Evaluation

Students should have protection through orderly procedure against prejudiced or capricious academic evaluation. At the same time, they are responsible for maintaining standards of academic performance established for each course in which they are enrolled.

Protection Against Improper Disclosure

Information about student views, beliefs and political associations which professors acquire in the course of their work as instructors, advisors and counselors should be considered confidential. Protection against improper disclosure is a serious professional obligation. Judgments of ability and character may be provided under appropriate circumstances, normally with the knowledge or consent of the student.

When students feel that their academic rights and freedoms have been violated, they must have a defined avenue of appeal that is consistent with the principles outlined in the Joint Statement on Rights and Freedoms of Students, the AAUP 1940 Statement on Academic Freedom, and the AAUP 1956 Statement on Professional Ethics.

Code of Academic Integrity

Preamble

Academic honesty constitutes the cornerstone of the academic community. Learning, teaching and scholarship cannot be conducted in an atmosphere of dishonesty. Therefore, Rider University insists on strict adherence to the concept of academic honesty as indispensable to the continued existence and future development of the campus community. Every student has a direct personal interest in maintaining academic honesty since each evaluation of academic progress involves a judgment by the faculty member concerning each individual's intellectual performance. The evaluation process is predicated on the assumption that an individual's achievement reflects his/her own ability, effort and perceptions.

Academic dishonesty includes any unauthorized collaboration, misrepresentation or fabrication in the submission of academic work. In all written work, whether in class or out of class, the student's name on the work is considered to be a statement that the work is his or hers alone, except as otherwise indicated. Students are expected to provide proper citations for the statements and ideas of others whether submitted word for word or paraphrased. Failure to provide proper citations will be considered plagiarism and offenders will be subject to the charge of plagiarism specified in the statement of regulations.

Similarly, students are expected to adhere to all regulations pertaining to examination conduct including placement tests. These regulations are designed to insure that the work submitted by the student on examinations is an honest representation of that student's effort and that

it does not involve unauthorized collaboration, unauthorized use of notes during the exam, or unauthorized access to prior information about the examination.

In oral or written submissions presented as scientific or non-fiction, fabrication or alteration of facts, data, images, or audio or video recordings, or misrepresentation of procedures or of participation in an academic activity, for the purpose of misleading, also constitutes academic dishonesty.

Jurisdiction of the Code of Academic Integrity

Each student is responsible for his or her academic conduct from the time of acceptance for admission through the actual awarding of a degree.

Statement of Regulations

Section 1. Out-of-Class Assignments.

Students are expected to provide proper citations for the ideas and statements of others. When the ideas are paraphrased, the sources of those ideas need only to be properly cited. When the ideas are quoted (copied word for word), the copied words must be set in quotation marks and cited. When students collaborate on papers or out-of-class examinations, the names of all collaborators must be acknowledged on all papers submitted. It is expected that research and writing assigned to an individual student will be done by that student.

1.1 Ghostwriting. Written work submitted by an individual student (or group of students working together as approved in advance by the instructor) is expected to be the work of that student (or approved group). A false claim of authorship is an act of academic dishonesty.

1.2 Word for Word Plagiarism. Copying, word for word, from any source (book, magazine, newspaper, Internet source, unpublished paper or thesis) without proper acknowledgment by quotation and citation within the text of the paper, or the submission of any part of another's work, word for word, without proper quotation and citation is an act of academic dishonesty.

1.3 Patchwork Plagiarism. The submission of work which has been constructed by piecing together phrases and/or sentences quoted verbatim (word for word) or paraphrased from a variety of unacknowledged sources is an act of academic dishonesty.

1.4 Unacknowledged Paraphrases. Submission of another author's facts or ideas in one's own words without acknowledgment by proper citation is an act of academic dishonesty. (If the ideas or information are neither originally the student's nor cannot be found in a variety of sources, the source must be acknowledged by footnotes or by proper citation within the text of the paper. Failure to acknowledge this indebtedness is referred to as "unacknowledged paraphrase.")

Section 2. Examination Conduct

Students are expected to adhere to the following regulations pertaining to their personal and academic conduct before, during, and after examinations. These regulations are designed to insure that the work submitted by a student on examinations is an honest representation of that student's effort and that it does not involve unauthorized

collaboration, unauthorized use of notes during an examination, or unauthorized access to prior information about the examination.

2.1 Prior Access to Examinations. No student may have direct or indirect access to an examination or an examination question without the express approval of the faculty member who has prepared the examination. Unauthorized entry into offices, duplicating centers, computers, voice mail, fax, other electronic media, or personal possessions of faculty is prohibited. Prior access to examination information, attempts to gain access to examination material, unauthorized possession of examination material, and the derivation of benefit from or aiding access to examination materials are all acts of academic dishonesty.

2.2 Unauthorized Assistance During Examinations. The receiving or giving of any written, oral or visible help on an examination is an act of academic dishonesty.

2.3 Proxy Representation. Students are expected to sit for examinations required for the courses in which they are enrolled. Proxies/ghosts are strictly prohibited. Serving as a proxy, or being served by proxy, during an examination is an act of academic dishonesty. (Students must carry ID cards at all times, including the times they present themselves for examinations. Students must present their ID cards during an examination if requested to do so by the proctor or instructor.)

2.4 Unauthorized Use of Written or Electronic Material During Examinations. No student may use any book, notebook or other written or electronic materials during an examination unless such examination has been designated as an "open book" type, in which case the examining faculty member must have so informed the class prior to the examination. Materials which are not permitted to be used on the examination, if brought to the examination room, must be deposited at a location specified by the faculty member. Unauthorized possession of any written materials during an examination is an act of academic dishonesty.

Section 3. Fabrication

Students are expected to accurately report facts and data obtained in their research activities; present documentary photographs and audio and video recordings honestly; and, report on their attendance at events and engagement in activities honestly and accurately. Fabrication includes the making up or falsification of facts, data, sources or procedures; misleading doctoring or manipulation of photographs or video; or falsely claiming to have attended an event or visited a site, or engaged in an activity, or misrepresenting the time devoted to such attendance, visitation, or engagement, for the purpose of misleading.

3.1 Fictional devices in nonfiction material. Names, dates, places and other verifiable facts should not be altered in any paper or story that purports to be factual and non-fiction. Facts that must be disguised or withheld to protect the privacy or safety of a source should be acknowledged with an appropriate explanation to the reader/viewer. Composites, which present the characteristics or experiences of more than one person or event blended into one, should not be used without a clear explanation to the reader/viewer.

3.2 Documentary photos and audio or video recordings. While manipulating images and recordings for purposes of satiric or similar effect is permissible for artistic purposes, such manipulations should not be presented in a way that can be confused with reality. It is not permissible to doctor or manipulate photographs or recordings if the result is counterfactual. Cropping and enhancement of clarity are permissible, provided it does not distort reality so as to deceive the audience.

3.3 Scientific misconduct. Fabrication, manipulation, or "fudging" of the processes or results of experiments or observations, and similar practices which seriously deviate from those commonly accepted by the scientific community, as represented by your faculty, for proposing, conducting or reporting research, are also violations of this policy. Honest errors and honest differences of opinion in interpretations and judgments of data are not included in this definition.

3.4 Procedural dishonesty. This category includes falsely claiming to have attended an event or to have remained at the event longer than one did; claiming to have visited a site; or to have engaged in an activity, whether for purposes of extra-credit in a course, or for inclusion in a graded assignment.

Procedures to be Followed in Cases of Academic Dishonesty

Step One

When a faculty member has reason to believe that an act of academic dishonesty has been committed by a student enrolled either in a current course or in one completed within the previous four months, the faculty member shall notify the student in writing of the alleged violation and require that the student meet with the faculty member at a mutually satisfactory time within five (5) working days after the faculty member's notification. The faculty member shall have the authority to extend the time within which the meeting takes place to ten (10) working days at his or her discretion. If the meeting does not occur within this time, the faculty member may proceed with the imposition of any of the sanctions described below.

At this meeting with the student, the faculty member and the student shall discuss the alleged act of dishonesty. The faculty member and the student shall seek to resolve the matter during this meeting. If the faculty member concludes that an act of academic dishonesty has not occurred, no further action shall be taken and the student shall be permitted to complete the course, if it is still in session, as if the faculty member's allegation had not been made.

If, as a result of information obtained in this meeting and/or shortly thereafter, the faculty member concludes that an act of academic dishonesty has occurred, he/she must notify the student of this determination in writing within seven (7) working days of the meeting and must indicate which one of the following sanctions will be invoked. The existence of a prior finding of academic dishonesty may impact the choice of sanction. The options are listed below in ascending order of seriousness. The faculty member may:

1. Direct the student to resubmit any work necessary to complete the course requirements;
2. Direct the Registrar to change the grade given to the student to the notation "Incomplete" and direct the student to resubmit any work necessary to complete the course requirements;
3. Lower the grade appropriately on the assignment in which the academic dishonesty took place in light of the gravity and implications of the act of dishonesty, recalculate the final course grade, and direct the registrar to change the final course grade accordingly;
4. Direct the Registrar to enter the grade of "F" for the course on the student's permanent academic record (this "F" supersedes all other grades, including the "W" notation);

5. Initiate charges against the student with the Academic Integrity Committee for the purpose of causing the student to be suspended or dismissed from the University

The sanction will be effective immediately upon notification, except for sanction #5.

When the faculty member invokes sanction #5, he/she must submit a letter detailing the act of alleged academic dishonesty to the Academic Integrity Committee and, simultaneously, to the student involved, to the faculty member's department chairperson, to the student's academic dean and, in the case of an undergraduate student, to the Dean of Students.

When the faculty member invokes any of the sanctions #1 through #4 and the student does not challenge the decision within seven (7) working days of receiving notice from the faculty member, the faculty member shall place copies of the decision in the student's academic file in the student's academic dean's office and in the student's file in the office of the Dean of Students. If the student challenges the sanction (#1-#4) recommended by the faculty member (based solely on disputing the charge of academic dishonesty), he/she shall have the right to pursue a written appeal beyond the faculty member, first to the chairperson of the department where the faculty member (or if an adjunct based solely in a program, where his/her program director) is based and then, if necessary, to the appropriate academic dean. If the faculty member of the course is the department chairperson, the appeal shall go directly to the appropriate academic dean.

Step Two

The written appeal to the department chairperson or academic dean must be made within seven (7) working days of the receipt of the faculty member's decision, with a copy of the appeal to the faculty member. The department chairperson or academic dean will have seven (7) working days to reach his/her decision. The department chairperson or academic dean shall send the decision to the student by registered mail or hand delivery, with a copy to the faculty member. If the department chairperson upholds the faculty member's decision regarding academic dishonesty and the student does not appeal this decision in writing to the appropriate academic dean within seven (7) working days from the receipt of the decision, the department chairperson shall place copies of the decision in the student's academic file in the student's academic dean's office and in the student's file in the office of the Dean of Students.

Step Three

If either the student or faculty member is dissatisfied with the chairperson's or dean's decision, the student or faculty member will have seven (7) working days from receipt of that decision to submit a written appeal to the dean of the college in which the course is taught, with copies to the faculty member, student, and department chairperson. (If the dean has already ruled on the case, he/she shall appoint another department chair, or an associate or assistant dean to handle this appeal.) The appropriate dean shall schedule a meeting with the student and faculty member to hear the appeal as soon as it can reasonably be set, and, following his/her assessment of the situation, will have seven (7) working days to render a decision. The dean shall convey his/her decision in writing by registered mail or hand delivery to the student, with a copy to the faculty member and the department chairperson. If the dean upholds the faculty member's decision regarding academic dishonesty and the student does not appeal this decision to the Academic Integrity Committee within seven (7) working days from receipt of the decision, the dean shall place copies of the decision in the student's academic file in

the student's academic dean's office and in the student's file in the office of the Dean of Students. If after appealing to the dean, the student or faculty member is still dissatisfied, a final appeal may be made in writing to the Academic Integrity Committee within seven (7) working days of receipt of the dean's decision.

Step Four

The Academic Integrity Committee shall consist of six (6) members:

Three (3) faculty members appointed by the bargaining unit members of the University Academic Policy Committee; two (2) administrators with faculty rank appointed by the Provost and Vice President for Academic Affairs; and one (1) full-time undergraduate student selected by the Student Government Association who, at the time of his/her service, must be a senior with a grade point average no lower than 3.25.

The bargaining unit members of the University Academic Policy Committee, the Provost and Vice President for Academic Affairs, and the Student Government Association shall each designate one alternate who shall serve in the event an applicable appointee is unable to serve. The bargaining unit faculty members and the administrators shall serve two-year terms, beginning with the date of appointment, and may be reappointed. The student member shall serve a one-year term.

The committee shall select from among its members with faculty rank a chairperson and a vice chairperson, and immediately notify the President, the Provost and Vice President for Academic Affairs and the chairperson of the University Academic Policy Committee, the president of the Student Government Association, and the Dean of Students of the names of the designees. The chairperson or vice-chairperson shall serve as the hearing coordinator. Any three (3) members of the committee with faculty rank (including the hearing coordinator) shall constitute a quorum.

The failure or inability of any appointing body to fulfill its responsibility to appoint any member(s) to the Academic Integrity Committee shall not prevent the committee from organizing and exercising its prescribed duties. Whenever there is no chairperson or vice-chairperson of the committee, the Provost and Vice President for Academic Affairs shall appoint a convener. Ordinarily, the chairperson (or vice-chairperson, in his/her absence) shall preside over the meetings of the committee.

The hearing coordinator shall have the following duties and responsibilities:

1. To assure that all procedures have been followed;
2. To inform the members of the committee that a charge of alleged academic misconduct against a student has been brought by a faculty member or that a student or faculty member has appealed a decision;
3. To see that all members of the committee receive the appropriate materials necessary for the hearing of the charge and appeal;
4. To keep a permanent record of the committee's proceedings; and
5. To see that all decisions made by the committee are prepared and distributed to the relevant parties.

Within ten (10) working days after receipt of a charge brought by a faculty member, or an appeal brought by either party, a date for a hearing shall be set and the faculty member and the student shall be notified of that date. If the hearing has not occurred within those ten (10) days, it shall be scheduled to take place as soon as possible thereafter. The committee chairperson shall have authority to extend any deadlines when it is evident that both parties have made good faith, though unsuccessful, efforts to meet the stated deadlines. Parties at the hearing

shall be limited to members of the Rider University community with information pertinent to the given case. The student may choose to have a University advisor present with him/her. This advisor may be a university administrator, faculty member, or current student.

If the requested sanction is dismissal from the University, the student shall have the right to be accompanied by an attorney. If the committee indicates in advance that dismissal will not be considered by the committee no attorney shall attend. In cases where dismissal will be considered, if the student wishes to be accompanied by an attorney, the hearing coordinator must be so notified at least seven (7) days before the scheduled hearing so that the University may also have counsel present.

The committee shall establish the operating procedures by which it reviews cases. Standard operating steps include:

1. An uninterrupted presentation of his/her position by whichever person brought the matter to the committee (faculty member or student);
2. An uninterrupted presentation of his/her position by the other party (faculty member or student);
3. Committee questioning of either and/or both parties;
4. Committee review of any documents or affidavits proffered by the parties;
5. Committee deliberations in executive session.

The role of any University advisor or attorney present shall be that of observer of the proceedings and advisor to his/her client and shall not include the right to question either party for the record. An audio recording shall be made of all proceedings conducted by the Academic Integrity Committee.

After both the faculty member's and the student's assertions and responses have been heard (including questioning of either party by the committee), the committee will decide whether the faculty member's charge and sanction shall be upheld.

If the faculty member's charge is upheld, the committee will normally uphold the sanction originally imposed, if it is consistent with the faculty member's pre-stated written guidelines (if any) given to the student at the outset of the course about the consequences of an act of academic dishonesty. However, the committee will have recourse to any one of the four (4) other sanctions which the faculty member could have chosen, or may decide to suspend or dismiss the student, depending upon the specific circumstances connected with each case.

When a student's graduation is affected by the outcome of an academic conduct case in a semester, term or session immediately before such graduation, all parties in the case shall make reasonable efforts to expedite the entire process.

As a result of its deliberation, the committee may find the student innocent of academic dishonesty, thereby levying no sanctions against the student. Under this condition, no punitive action shall be taken against the student, either by the committee or by the faculty member.

If the committee finds the student guilty of academic dishonesty, it may direct that one of the following sanctions be taken against the student in ascending order of seriousness:

1. That the student resubmit any work necessary to complete the course requirements;

2. That the registrar change the grade given to the student to the notation "Incomplete" and direct the student to resubmit any work necessary to complete the course requirements;
3. That the grade be lowered appropriately on the assignment in which the academic dishonesty took place in light of the gravity and implications of the act of dishonesty, and recalculate the final course grade and direct the registrar to change the final course grade accordingly;
4. That the registrar enter the grade of "F" for the course on the student's permanent academic record (this "F" supersedes all other grades, including the "W" notation);
5. That in addition to, or in place of, any of the sanctions imposed above, the student be suspended for a definite period of time or be dismissed from the University, whenever the committee deems it in the best interests of the University to do so, with the notation, "Dismissed for Academic Dishonesty" entered on the student's permanent academic record.

The sanction invoked will become effective immediately upon notification.

The committee shall notify, by registered mail or hand delivery, the faculty member and the student of its decision within five (5) working days after the hearing, and copies of the decision shall be forwarded to the student's chairperson and dean for inclusion in the student's academic file and, in the case of an undergraduate student, to the Dean of Students for the student's file. The committee's decision shall be final, with no other right of appeal.

Any letters placed in a student's academic file and student's file in the office of the Dean of Students according to any of the provisions in this policy will be available to individual members of the faculty and the committee when determining sanctions in subsequent incidents of academic dishonesty for that student. These letters will also be made available to the members of Academic Standing Committees for making subsequent decisions regarding conditional academic standing and academic dismissal for that student.

Veterans and Military Service Information

Rider's degree programs are approved under the Veterans Readjustment Benefits Act of 1966, as amended. An Application for Program of Education is available from one of Rider's veterans' affairs representatives or online at www.vabenefits.vba.va.gov/vonapp (<http://www.vabenefits.vba.va.gov/vonapp>) or www.benefits.va.gov/gibill/ (<http://www.benefits.va.gov/gibill/>). Students in CCS should complete this form and return it to the veterans' affairs representative in their college. Students enrolled as full-time day students, graduate students, or students receiving benefits under Vocational Rehabilitation for Disabled Veterans should return this form to the veterans' affairs representative in the registrar's office.

Veterans who receive post 9/11 G.I. Bill benefits may be eligible for Rider's Yellow Ribbon program.

Students filing for benefits at Rider will be responsible for filing a copy of their DD 214 (separation papers) or their Certificate of Eligibility (for students under the post 9/11 G.I. Bill) with the appropriate veterans affairs representative. Contact the CCS certifying official at 609-896-5033 or the Registrar's Office certifying official at 609-896-5066 if there are any questions.

Enrolled students may contact the Veterans and Military Affairs
Coordinator at 609-896-5000 ext.7382 with any questions or concerns.
